Though the weather was anything but propitious for Easter Fineries the Millinery Parlors were well patronized and in spite of Spring's reluctance to appear the Easter Fashion's were much in evidence on Sunday.

"You never miss the water till the well runs dry" is an old, but true saying and never were April showers welcome throughout this country than more at the present time, for many of the farmers have been carrying water during the best part of the winter.

"Adam's Rib" A Paramount Picture that will be shown in Brownsburg, on April 12nd, and 14th, and in Bishop's Hall, Lachute, on Friday, April 13th. This is one of the finest productions and most exciting dramas ever shown. The price of admission is 50cts. so don't miss the chance of seeing the picture.

Mr. J. T. Ayers returned on Friday from his annual run out to the Coast, renewing the contracts for their extensive business with the Mills of the West. Although still feeling the effects of the war, there is a general feeling of optimism throughout the West that bespeaks brighter prospects from now on.

In the interests of the Grand Ligne Mission, the children of the Baptist Church Sunday School under the able instruction of Mrs. W. A. Ball, rendered a special Missionary programme on Sunday afternoon, every number of which carried an Easter thought and message. At the evening service the ordinance of Baptism was administered to two young candidates by the pastor, the Rev. V. Collins.

A Special Success

Notwithstanding the inclemency of the weather the Town Hall was filled to capacity on Tuesday evening last. The programme was more than equal to the promises made and the artists all excelled themselves in furnishing numbers for which they had repeatedly to respond with well merited encores. The Concert was under the auspices of the St. Julien Church. The artists who contributed to the pleasant evening were Mrs. Chas. Delago, the Misses Vera Day, and M. E. Pitts, Emile Taranto and Mello Blanche Ayers.

CHURCH NOTES.

For the Boys and Girls

A Wren House in a Post.

Although we put out ten new nesting boxes in the spring for the birds of our garden, we soon found that we were lacking in sufficient accommodations for the wrens. These tiny members of the feathered tribes display here, as they do the world over, a habit of building both false and true nests. They constructed their rough little nurseries not only in the boxes designated for them, but in many others as well, even snuggling in an apartment in the martin's flat-building. We knew they could not occupy them all.

Yet, realizing their fondness for a goodly number of homes as we never had before, we soon found an opportunity for supplying them. This came about with the construction of a fence between the lawn and the vegetable garden. The supporting posts for the lattice panels were square in shape, and hollow from the top rail upwards. So in some half dozen of the posts we converted this space into private apartments for the wrens, making the openings on the east, or garden side.

It is needless to say that one of these apartments de luxe was soon occupied by a pair of little brown tenants. In due time it sheltered the second brood of wren-babies. False nests were promptly built in two of the other flats, but they were never entirely completed, may as well say, so far as we know. We noted with some degree of satisfaction that these tenants of ours obtained their food almost entirely from the garden, making constant warfare on the many insect pests to be found there during the season. In fact they proved so desirable that we were only too glad to supply them with a private bath on the roof free of charge. —Frances Higgins.

The Locket in the Pocket.

Mary Alice had come to spend two weeks with her little cousin Cornelia on the farm. Oh, such fun as they had! Especially Mary Alice, for never before had she romped the livelong day in the beautiful outdoors. She grew as brown as a berry and slept like a top at night. As for chubby little Cornelia, never before had she had such a happy time. Think of having a playmate all day long and some one to sleep with and hug up at night!

"I hope it doesn't rain a single teeny tiny drop the whole time I am here," said Mary Alice one day, as she came in from picking berries. "See here, Mary Alice," spoke up Uncle John. "Don't you go to making any such wishes, as badly as the chicks need a drink of water."

One morning before she opened her blue eyes Mary Alice heard a pitter-

patter, pitter-patter, on the tin roof. In two twinkles she hopped out of bed and ran to the window and saw that the rain was coming down in a torrent.

"Rain, rain, go away!" she cried. But Cornelia, who was truly a farmer's daughter, clapped her chubby hands and cried, "O goody! Now father's corn will grow."

Poor Mary Alice did not share Cornelia's enthusiasm, and at breakfast she presented a most forlorn face.

"I tell you what," said Aunt Flora, "suppose you children go up to the attic and play this morning. Mary Alice, your mamma and I loved to play up there on rainy days."

"That will be jimsy," cried Cornelia, hopping up and down. "May we dress up in those funny clothes in the old green chest?"

"Yes, indeed," answered her mother. So Mary Alice's countenance gradually changed, and after they had tidied their rooms they set off in hilarious spirits for the attic. Such quaint-looking old dresses, festooned and ruffled and beribboned, as they found in that old green chest! And such a happy time they had dressing up and playing "ladies" and "social."

About the middle of the morning Aunt Flora's voice came from the foot of the stairs. "O children, come down. Hot chocolate and milk for a little party!"

"Goody!" cried Cornelia delightedly. "Goody, goody!" cried little Mary Alice.

There was a scuffling to get out of the funny dresses. Of a sudden while Mary Alice was struggling with her beribboned dress her hand went into a pocket.

"Cornelia!" she exclaimed. "Here's a deep pocket—and, my goodness, it's something in it!"

Mary Alice, still wearing the beribboned dress, ran down beside Cornelia.

"Aunt Flora! Aunt Flora!" she cried. "Do please look; it's a gold locket—I found it in the pocket!"

"Mary Alice!" exclaimed Aunt Flora, reaching for the gold locket. "Why, you've found the gold locket your mother lost when she was a little girl. It's just too lovely that you should have found it. You see, your grandmother gave us each a locket, and your mother lost hers. Our names were engraved on them; here's Mary Alice, your mother's name. See it, child?"

Mary Alice gave a little squeal of delight and clapped her hands and cried, "My name too!"

"Of course," laughed her aunt.

"But, Aunt Flora," began Mary Alice, "how do you suppose it ever got in the pocket of this funny old dress?"

Aunt Flora looked down at the little figure in the quaint dress, and then of a sudden a light darted over her face. "Child, I know!" she cried softly.

"Why, it seems like yesterday, your mother and I were playing in the attic, just as you and Cornelia were playing there to-day, and I suppose your mother was afraid she might lose the locket, and she took it off and slipped it into the pocket of this dress and never remembered a thing about it after that."

Uncle John poked his head in the door and cried in his funny way, "What's this? Is Mary Alice going to a masquerade party?"

The little girls just shouted with laughter. Then Mary Alice told him all about the locket in the pocket, and Uncle John said, "Ho, now, you were the little person who wished it wouldn't rain, and if it hadn't rained you wouldn't have come to the attic to play."

"And then I thought I'd go and find the locket in the pocket," said Mary Alice softly as she fondled the locket at her neck. Linda Stevens Almond, in Youth's Companion.

Dye Dress, Skirt or Faded Curtains in Diamond Dyes

Each package of "Diamond Dye" contains directions so simple any woman can dye, or that her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, sportswear, sporties, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

Ripe blackberries were gathered in the middle of January a thousand feet above sea level in North Wales.

Minard's Liniment for Coughs & Colds

"THE MAN WHO WON THE WAR"

From London Opinion.

MINING IN CENTRAL BRITISH COLUMBIA

BRIGHT FUTURE AS A MINERAL REGION.

Experts Predict for Province a Formidable Rivalry to Ontario in Gold Production.

A striking feature of the general revival exhibited in Canadian mining affairs in 1922 was the progress achieved by the Pacific Coast province and the general stimulus given to all phases of mining in British Columbia. Not only was work pressed on existing mines, but abandoned works reopened, new ones developed and a host of new discoveries made. In a survey of the situation, Fred A. Starkey, Commissioner of the Associated Boards of Trade of British Columbia, finds reason for unbounded optimism and faith in the future of the interior of British Columbia as a mineral region.

He points out that the Province of British Columbia can boast of having the most wonderful world smelter which is owned and operated by the Consolidated Mining and Smelting Company of Trail and is equipped with the largest electrolytic zinc plant in the world. It provides facilities for the treatment of silver-lead-also, gold, copper, refining of copper, treatment of iron ores, manufacture of lead pipes, sheet lead and zinc, copper rods, sulphates of copper, etc.

The same company owns the Le Roi, Center Star, War Eagle, and other properties in the Rossland camp which have to their credit a value production of some \$90,000,000. It is a known fact that these mines are capable of producing for many years to come. In the Sullivan mine, Kimberley, is the largest lead-zinc property in the world. It is estimated that there is sufficient ore in sight to last fifty years. The value of the ore bodies has been estimated at a round figure of \$181,000,000. At the present time the company is constructing a concentrator with a daily capacity of 2,000 tons.

Demand for Silver and Lead.

In the Portland Canal district is the Premier Mine, which in its short three years of life, has paid \$2,400,000 in dividends from December, 1921, to June, 1922, equivalent to three-quarters of its capital. The ore gives high value in gold and silver, the present estimated value of the ore in sight being \$80,000,000.

The Granby, with its large fields of ore bodies, the Britannia, and the Copper Mountain mines have tons of millions of ore reserves and, combined, may safely claim the distinction of being the largest copper producers in the British Empire. With normal prices for the metal it would not be too much to forecast an annual production of 100,000,000 pounds of copper for British Columbia.

With the revival of silver and lead prices many silver-lead mines which have not been operated for some two years are now under steady development, and many leases have been granted on properties hitherto idle.

The Silver Smith Mines has been making records on shipment of concentrates which after being treated run high in silver and lead. The Wonder Mine is again a producer and the McAllister expected to commence shipments at any time. The Ruth-Hope is to recommence operations and the Queen Bee, which has a record of over a million in shipments, is now under lease and is likely to commence shipments immediately.

It is the same all over the province. The old mines, once worked profitably and then abandoned in the days of declining prices and high operating costs are coming back. In addition there are several new mines being developed and throughout the silver-lead districts hundreds of others having merit to warrant expenditure on them, lying dormant, waiting the advent of capital to develop them.

Much Development Expected.

Gold is every bit as encouraging in the Pacific Coast province, and some experts even predict for the province a formidable rivalry to Ontario, in time. The Premier, Rossland, Surf, Nickel Plate, Heady, Nugget and Sheep Creek are all contributing in no small volume to the provincial gold production, which in 1922 was higher than for some time.

British Columbia is undoubtedly on the eve of a tremendous mineral development which will exceed anything the province has hitherto experienced and the merest indications of which were exhibited in 1922. For some time British Columbia has occupied second place among the mineral producing provinces of Canada, accounting for between 17 and 20 per cent. of the total Dominion output. In the first six months of 1922, however, with a production value of \$16,153,307, she was responsible for 23 per cent. as against Ontario's 22.5, and the latter half of the year was that of greater activity. British Columbia's mineral production in 1916 was worth \$24,547,517; in 1918 \$42,832,569, and in 1921 \$34,778,894. Those who closely investigate the situation cannot question but that in a very short time these figures will be substantially left behind.

HEARTLESS!

Mrs. Goodcole: I haven't seen you at church for some time. Don't you like the rectory?
Mrs. Goodcole: No, I don't. I'll never forgive him for refusing to read the funeral services over my poor little dead doggy.

The first labor union was organized about 1720.

Minard's Liniment for Coughs and Warts

The "Daughters of the Sea"

For the purpose of making more comfortable and pleasant the homes spent in their home ports by the masters, mates, and pilots of the Pacific and developing radio broadcasting to their ships while at sea, wives, daughters and sweethearts of sailors living at Seattle have formed an organization called the "Daughters of the Sea."

The Daughters of the Sea plan to bring the home closer to the ship, and the radio will be their chief means toward that end. The club has undertaken the fitting up of quarters on the top floor of one of the city's tall buildings, and in furnishing them with a library, comfortable chairs, smoking accessories, and marine games, so that seafarers may watch from the windows the ships making and leaving port.

A powerful radio-pending and receiving apparatus is to be installed on the roof of the building, and entertainments, concerts, etc., held in the club rooms will be broadcasted to the ships at sea. The personnel of vessels in any storm area will be cheered by the voices of loved ones at home. A practical service also will be maintained; the location of all ships from the home port will be recorded from day to day. The plans also include the entertainment of visiting captains from other ports of the world. There will be a committee supplying all arriving ships with flowers and seamen's letters will be provided with comfort and entertainment.

Eventually, it is expected, the Daughters of the Sea will extend their work to all countries by establishing branch chapters.

Changes in Arctic Weather Conditions Affect the Entire Globe.

Arctic regions seem to be warming in certain portions and cooling in others (and as conditions there affect weather all over the earth) the Weather Bureau at Washington are endeavoring to keep the public in the loop. In the Canadian north, northeast Europe, midwest weather with less ice than ever before has been reported during the winter, while in the Siberia and in the various north of America, unusually heavy ice has been reported. The cause of the unusual conditions has not been fathomed by meteorologists.

The Gulf Stream, which circles around the Gulf of Mexico, passes through the Straits of Florida and sweeps northeastward across the Atlantic and between Iceland and Norway, has been traced by one oceanographic expedition as a warm surface current beyond the 81st parallel of latitude, which would be some 2,500 miles north of Hammerfest, Norway. This expedition sailed as far north as 81 degrees 23 minutes 'N ice-free waters.

Arctic conditions are said to be exceptional in this particular region, and many old landmarks are so changed as to be unrecognizable. Where formerly great masses of ice were found, there are now often accumulations of earth and stones. At many points where glaciers formerly extended far into the sea about the Island of Spitzbergen, 2,000 miles north of Norway, they have disappeared.

The change in temperature has brought about great changes in the flora and fauna of this portion of the Arctic. Former great shoals of whitefish have disappeared from Spitzbergen waters and the seal catch is far under the average. Herring and sweet, however, are now found in great numbers.

In contrast to these mild conditions, the unusually heavy ice in the Western Arctic regions north of Alaska and in the Bering Sea has caused the Weather Bureau to forecast famine conditions in Northern Japan this year.

A Bit Late.

One day on the golf course, says an English paper, Field Marshal Haig asked his caddy what service he had been during the war.

"One of my brothers," the caddy replied, "was in the infantry, one in the artillery and one was in the engineers."

"But you?"
"Well, I didn't do anything," replied the caddy. "But I'm going to do my bit now. I'm going to carry your bloomin' clubs for nothing!"

MOTHER! MOVE CHILD'S BOWELS

"California Fig Syrup" is Child's Best Laxative

Even if cross, feverish, bilious, constipated or full of cold, children love the "fruit" taste of California Fig Syrup. A teaspoonful never fails to clean the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the souring food and nasty bile out of the stomach and bowels, and you have a well, fat, child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation of syrup.

Bakers Bake It For You —no need to bake at home

HERE'S your old-time favorite—full-fruited raisin bread with at least eight tempting raisins to the slice—already baked for you by master bakers in your city.

Simply phone your grocer or a neighborhood bake shop and have a fresh loaf for lunch or dinner to delight your folks.

We've arranged with bakers in almost every town and city to bake this full-fruited raisin bread.

Made with big, plump, tender seeded raisins. The raisin flavor permeates the

bread. You've never tasted finer food. Order a loaf now and count the raisins.

Raisin bread is a rare combination of nutritious cereal and fruit—both good and good for you. Serve at least twice weekly to get the benefits.

Use Sun-Maid for home cooking of puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

German Ambassador Lunches With British Sovereigns

A despatch from London says:—
For the first time since the war, the
German Ambassador, Dr. Gustave
Stahmer, and his wife, lunched with
the King and Queen at Buckingham
Palace on Thursday.

Six Million for Agriculture
Hon. W. R. Motherwell, Minister of Agriculture, has had estimates totaling \$6,085,500 passed in the Dominion House for his department.

Officials here explain the Turkish propensity for mind changing may modify this new ultimatum, or bury it altogether, but the whole trend of the Turkish Government is now toward a more warlike position.

H. M. Stevens, M.P.
In reply to queries in the House, a
Statement made by Mr. Stevens, Dr. Del-
and stated that Canada has 9,500 drug
addicts. Prince Edward Island is the
only spot in the Dominion free of drug
peddlers and addicts. Thirty Chime-
men have already been reported and
two hundred more are in custody
charged with handling drugs.

What London Express Correspondent Found to Exist in Ireland

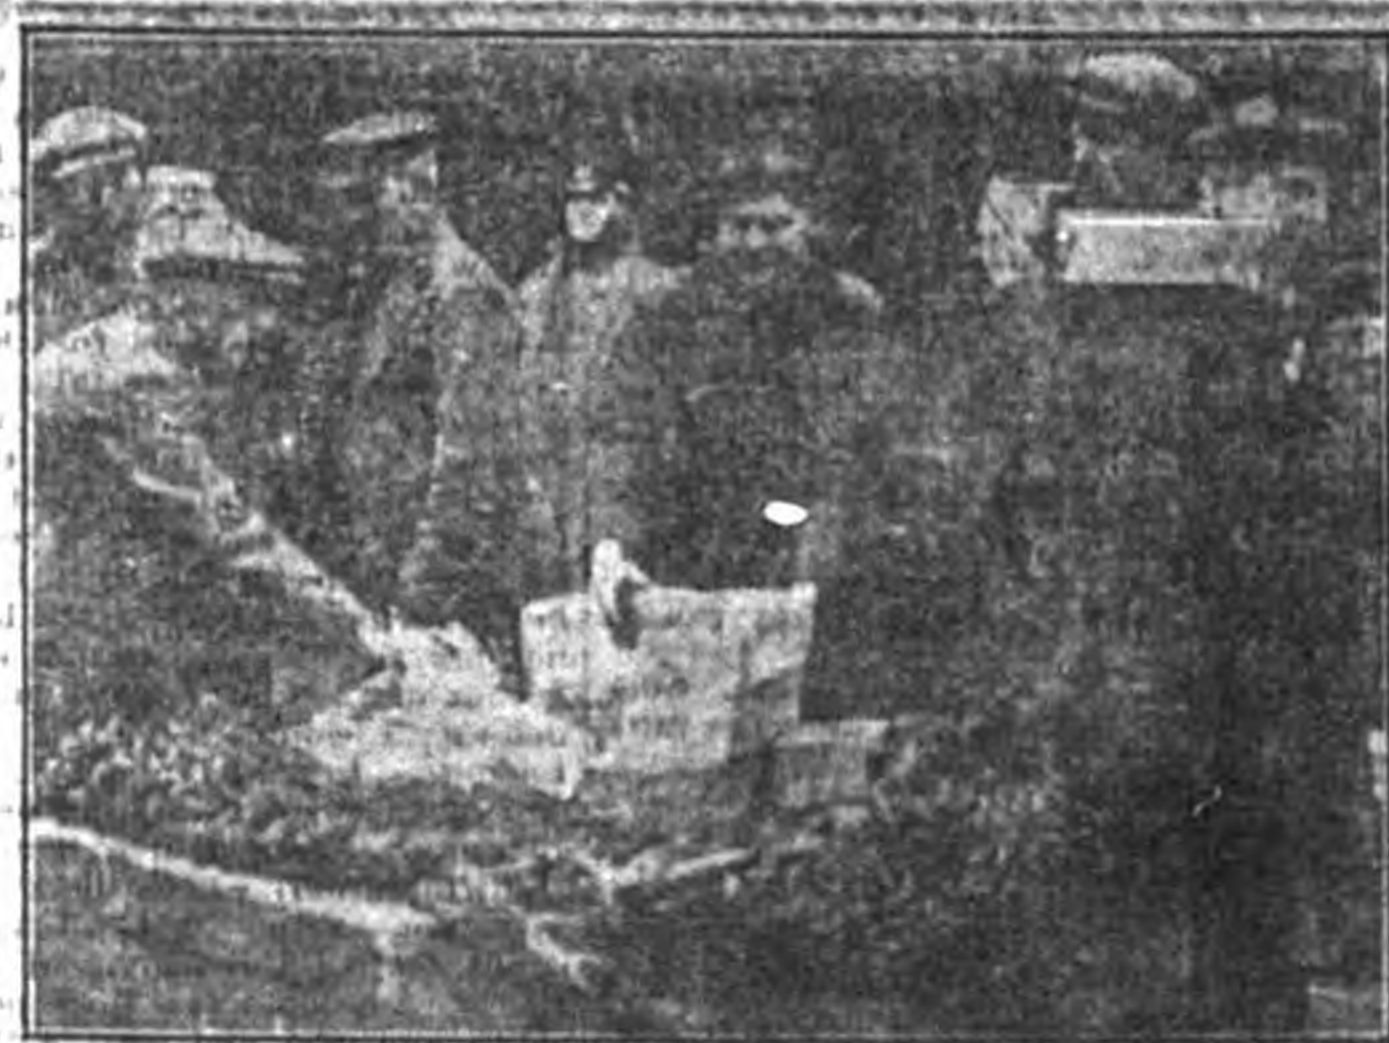

of the Daily Express. He says the Government has the rebel forces completely on the run and is likely to keep them so until the trouble ceases. He describes them as purely scattered-roving bands under robber chiefs and robber gang organizations. No district, adds the correspondent, can long be termed a rebel stronghold and the Government grows stronger daily.

A dispatch from Niagara Falls, Ont., says:—Ice-shooting for the spring has commenced in the Niagara River gorge. Employees of the Niagara Gorge Railroad Company started their annual work of dislodging overhanging ice from the walls of the gorge.

The ice during the early thawing weather is dangerous to traffic on the trolley tracks at the foot of the cliff, and all masses that appear to be loosened are shot with a heavy charge of explosives.

Hawaii's Sugar Harvest Largest for Eight Years

A despatch from Washington says:—Hawaii's sugar cane harvest during the year ended last September 30 was the largest in eight years, according to an estimate by the Department of Agriculture. Production for the year was placed at 1,184,000,000 pounds, or 13 per cent. more than that for the previous year, and larger than the average for the previous ten years.

THE U.S. SHIPS GOLD BACK TO BRITAIN.

It must have been a cheerful sight for Britons to see the incident of Gold bullion is again being shipped back across the Atlantic to Great Britain. The dockworkers shown in the picture are handling solid gold bricks which are on their way back to the money center of the world, London. Despite the efforts made to wrest that position from the British capitalists, financiers are satisfied that London's position is as secure as ever it was in relation to the commerce of the world.

A despatch from Paris says:—Premier Poincaré has decided upon three important measures to subdue the Ruhr. They involve:—
 1. The partial mobilization or use of colonial troops. Partial mobilization was ordered by the Poincaré Ministry, in violation of the Premier's statement on the

2. Imprisonment of all defaulters of a 40 per cent coal tax until they pay.

3. Movement of "colored" as distinct from "black" troops into the Ruhr.

A despatch from Dusseldorf says: Two decisions having an important bearing on the administration of Rhineland and the Ruhr by the Allies are announced at French headquarters here. The first is the final step in the above-mentioned measures. It is

In the decree promulgating the decisions the Inter-Allied High Commission's right to operate the roads along the left bank of the Rhine is turned over formally to the

Several of the Ministers have suggested that keeping the 1922 classification the colors will be sufficient, but this idea has been out-voted, and the alternative presented was either partitioning the area into blocks, or turning over formally to the authorities, partly as a precautionary measure to guarantee the safety of the troops of occupation. The Cologne bridgehead area occupied by British is not included in this order.

A despatch from Cologne says:—General Degoutte issued a proclamation that all Germans in the Ruhr who obey the orders of the French military authorities, and pay the taxes being levied upon them, will be protected from charges of treason by the German Government.

It is also proclaimed that the Als will not leave the Ruhr until all penalties for obeying the occupational forces have been revoked.

A despatch from Vienna says:—One thousand tons of coke are being shipped from Czecho-Slovakia over Austria to France daily, and the Austrian government has ordered railroads to expedite the shipment. It is said Austria fears sabotage by railroad men would lead to unpleasant complications.

Czech miners who were being transported to France, and who were held in Austrian territory, were allowed to pass upon the Government's order. Should Austria provoke them to it, the Czechs might cut off her coal supply.

Miss Muriel Corkery, of St. John, B., was admitted to the bar before a Court of Appeals recently. Miss Corkery enjoys the distinction of being the only woman barrister practicing law in the province, her predecessor Miss Mabel P. French, who was

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

The area of Ontario is 407,262 square miles, of which 366,880 square miles is land and 41,382 square miles is water. The province's population in 1991 was 2,932,600, of whom 1

There are in the province 20 cities of 10,000 and over and 40 cities and towns of 5,000 and over. In 1921 of a total immigration into Canada of 148,477 42 per cent., or 62,572 settled in Ontario. There were, in 1920, 686,344 pupils attending public schools, and \$30,626,435 was expended on education in schools under public control.

A despatch from Belfast, says Thomas Finlay, who as bugler son "charge" for the gallant Light Brigade at Balaklava, and thus stage-wild ride immortalized by Tennyson, died on Tuesday at Drogheda. Finlay's death follows closely Thomas Shaw, a member of the same brigade, who died at Londonderry Sunday night.

Signing of International Fisheries Treaty With the United States by Canadian Minister, Apart from British Ambassador, Marks a New Departure in the History of Canada as a Self-Governing Dominion.

When Hon. Ernest Lapointe, Canadian Minister, signed with United States Secretary of State Charles Evans Hughes the international fisheries between Canada and the United States a new constitutional departure was made, under which Canada takes

was made, under which Canada takes a position of autonomous nationhood within the British Empire. Heretofore such treaties and conventions have been attested also by the British Ambassador.

It is understood that the decision

A despatch from London, says:
The construction of the new Zeppelin
ordered by the United States Navy,
will be finished soon at the Zeppelin

works at Friedrichshagen, according to a despatch from Berlin. The airship will be the largest ever constructed and will start from Berlin for Chicago early in June. It will fly under the American flag, but operated by German mechanics and airship experts. The trial flight will begin in April and several over the Alps are proposed. When everything is perfected the airship will start for Berlin, where the final preparations for the trans-Atlantic flight will be completed.

A despatch from Winnipeg says: Although commonly he has had only twenty-three birthdays, J. S. Stevenson of Winnipeg has entered his hundredth year hale and hearty. Mr. Stevenson was born February 29, 1824, and has been cheated out of about 75 birthdays. He even skipped a leap year because the day was rightfully his in 1900, when by a quirk of the calendar he was missed again. Mr. Stevenson came to Canada when he was nine years old, and forty years ago moved from Ontario to Manitoba.

Toronto.

EN PASSANT.

INTERVIEWS, being personal glimpses of the prominent people who live and move amongst us, are always popular, if they do not fall below a certain standard. Even then, the alleged interviews may still have a vogue, but they are purile, childish reading, and are not conducive to the formation of correct impressions.

Celebrities, such as Actors, Authors, Militaires, Millionnaires and others who have been selected by fortune to become famous, or who have bobbed up like irrepressible corks on the surface of the seething sea of popularity, all with one accord profess to have an intense dislike to being interviewed.

This is probably more on account of the methods of the interviews, and the poor stuff they produce, than the natural shyness of their quarry. People who fill the public eye cannot evade the responsibilities of their fame: to be interviewed in the public interest is one of the penalties of their exalted position, and when they pretend to dislike the process they are only assuming a self-deprecating sort of mock-modesty which they do not really feel. They are only "letting on" that they do not like to be kissed under the mistletoe, while all the time they are looking at it out of the corner of their eye, and they give little gasps of astonishment and pretend to be surprised when they are found to be standing plumb underneath the time honoured emblem.

Whatever may be said to the contrary, I believe that celebrities carry with them all their former human feelings and attributes when they step up to the dias of fame. They cannot shed the qualities which have raised them. Famous people are very human, and in every respect as near like the average type from which they have sprung into prominence. The average man continually expecting it to be his turn next. The inherent belief which he holds, or ought to hold, secretly perhaps, but none the less firmly, that within his composition there lies the power, the superlative quality of success, waiting to be revealed and recognized, disposes of the idea that those who have reached success are timid shrinking creatures, startled at the mention of their own names, and terribly upset when the limelight for which they have been praying is turned upon them.

Even if they were of the startled fawn sort, celebrities ought never to be shy at being interviewed. Not if they managed the interviews properly. They could have all the important questions and answers all ready written out, leaving only the "local colouring" to be added, and any celebrity worth his salt would know how to deal with the local colouring. In fact I think that would be the least difficult part of an interview.

Suppose, for instance, that you, gentle reader, woke up some morning and found yourself famous, and that there were relays of reporters outside your door waiting there to capture your "impressions" for their newspapers or magazines! Would you turn them down? Not much. You would pass the cigars, the "specials" you were keeping in reserve for this great moment. After they had written down in their notebooks, for future use, the brand of your cigars you would light one yourself, and pace thoughtfully up and down your study enveloping yourself in clouds of fragrant smoke. Then you would proceed to interview them. That is the secret of successful interviews. You would sit down and say, "Well, gentlemen, I am entirely in your hands for exactly twenty minutes. Please let me down gently with your brethren outside. I am sorry to disappoint them, but if you will give them any matter you do not use yourself, I will be your debtor." You would then blindly lead them on to talking about themselves. This would be easy, there being two of them, from rival papers, and when you have let them run for nearly the allotted time you glance at your watch, and, you have got them where you want them: It is your turn now. You tell them your age, birthplace, and upbringing: You refer in feeling terms to the beneficent influence of your schoolmaster upon your youthful mind: You mention your favourite author, and then you introduce the local colour.

That is the main thing, you reflect, and you are ready for them. Being

an Argenteuil man, by birth or adoption, your sympathies lie in the improvement of the Country, and you wedge in a few remarks about Railways. There, you have them in the hollow of your hand: You rise impressively, and pass the cigars again (they don't need them for they have been doing most of the talking), then carefully noting the time you let off steam. "Yes, gentlemen of the Press yours is a great calling. If I possessed the power you have I would not hesitate to decide where to locate the headquarters of the C. N. R. No, sirs, not for an instant, I would decide in favour of C. N. R. no, sirs, not for an instant; I would decide in favour of Lachute. I would plant it on the site of the present station over there (waving an impressive hand in the right direction) where there is plenty of room. From that situation you could control the traffic of the continent, you could run lines north and south and east and west with equal acceptance. Look at the position of Lachute on the map. It is the doorway to the whole Province of Quebec. It is the key to the whole situation." "But time is up, gentlemen, I am sorry: Drop in another time and see me. I would like to give you my ideas about incorporating Brownsburg with the town, and running our boundary down to the Ottawa River. Goodbye, mind the step." There's nothing like local colour for making an interview interesting.

THE LINEMAN.

ST. ANDREWS EAST.

Mr. W. Shaw with his friend, Mr. S. Hardy, of Montreal, spent Easter with his parents, Dr. and Mrs. G. F. Shaw.

Both the Presbyterian and Anglican Churches were looking their best with their vases of cut flowers and Easter Lilies, on Easter Day.

Miss B. Robertson with her little nieces the Misses Margaret and Janet Barclay is spending the holidays with her parents Mr. and Mrs. W. H. Robertson.

Among the summer cottages which were occupied for the Easter holidays were those of Col. Evans, Messrs. W. and Geo. Simpson and Mr. Howell of Montreal.

Mrs. Neill, of West Shefford, and Miss Neill, St. Agathe des Monts were Easter guests at the Rectory and Mr. W. A. M. Howard of Montreal, spent the holidays with his parents the Rev. W. A. and Mrs. Howard.

The Holy Eucharist was celebrated in Christ Church on Easter Day at 8 and 11 a.m., Evensong at 7.30 p.m. The usual beautiful Easter Hymns were sung and at the 11 a.m., Service Miss Madeleine Neve sang the Offertory Tole.

The Annual Vestry meeting of Christ Church, was held in the Vestry of the Church Easter Monday. The Wardens report showed a substantial balance on hand, and all indebtedness fully paid. During the year \$300.00 was added to the Endowment Fund. Vote of thanks were passed to the W. A., the Chancel Guild, and the Anglican Dramatic Club. The following officers were re-elected for the ensuing year, Rector's Warden, J. J. Fraser, People's Warden, Edmund Neve, Delegates to Synod, Mr. Alec. Leroy and G. F. Shaw, M.D. Vestry Clerk, H. W. Mayrand, Sidemen, Geo. Bennett, Jas. and P. Burwash, E. Albright, D. de Hertel, J. Fraser Jr., and H. W. Mayrand.

Select Your Own Audience

If you could gather into one hall the people you would like to do business with, and could tell them your story through a microphone so they could hear every word distinctly, is there any doubt in your mind that you would reap a rich reward of orders?

How much would it cost you for such a hall, and for such a gathering together of all potential customers?

Long Distance enables you to pick your audience, at very much less cost, and your prospects will hear your sales talk as distinctly as if you spoke through a microphone.

The voice-reach of Long Distance includes everyone you could do business with. Speak! They will surely listen!

Every Bell Telephone on Long Distance Station

R. M. RODGERS, Local Representative.

GRENVILLE.

Mr. Fred Fitzgerald, of Carillon, spent Sunday evening visiting friends here.

The Misses Barron of Montreal were recent guests of their parents Mr. and Mrs. John Barron.

Miss Victorine Lefebvre of Montreal spent Easter the guests of her mother and other friends.

Miss Tessie Kayson of Montreal is at present the guest of her parents Mr. and Mrs. Thos Kayson.

We regret to record the death of Miss Della Villeneuve on Monday, and whose funeral took place on Wednesday at the R. C. Church, thence to Calumet Cemetery.

IN MEMORIAM.

In loving memory of Paul Martin Who was killed at Brownsburg, Que. on April 18th, 1922.

Two years have passed our hearts still sore.

As years roll on we miss him more, His loving smile and cheery face, None can ever fill his place.

Inserted by his wife and family

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

THE CENTAUR COMPANY, NEW YORK CITY

Town Council.

The regular meeting of Lachute Council was held in the Town Hall, on Wednesday last. There were present Mayor Wm. Scott, Alderman H. M. Gall, A. Larocque, P. Dobbie, T. Dallaire, E. Charlebois, G. H. Creswell and E. Jousse.

Finance report was received and adopted.

Alderman H. M. Gall gave notice of motion that at the next meeting of council he will introduce a by-law to borrow money to put a water main on Bedard Boulevard and other improvements to the waterworks.

Moved by Alderman H. M. Gall that where water pipes were frozen on privat property, the proprietor bears the full expense of digging and repairing the pipe.

Thursday and Friday, May 10th & 11th were appointed clean up days.

Moved by Ald. Larocque and seconded by Ald. E. Charlebois, that Messrs. R. Urbain, Omer Guindon and Henry Cote, be recommended to Dr. Page, collector of Provincial Revenue, as suitable persons to keep pool rooms in the town of Lachute on condition that they close their pool rooms on Sundays.

The box of cigars, donated for the benefit of Refreshment Committee by Mr. Cullen, was presented to the winner Mr. W. J. Deacon. A vote of thanks to the retiring Committees was moved by Mr. Yelland and seconded by Rev. McKinnon. The meeting was well interspersed with remarks from many of the members which evidenced the keen interest taken.

CUSHING.

Miss M. Weir, of Montreal, is spending the Easter vacation at her home here.

Mr. Eddie Wheelan, of Montreal, spent Easter Sunday in Cushing.

Mr. Kenrick Dorion spent Easter at his home in St. Andrews.

Mrs. J. McAllister and Mrs. G. Higginson, Hawkesbury, were visiting friends in Cushing last week.

Miss Katie Wheelan, of Montreal, who has been enjoying a months vacation in Cushing returned to the city on Monday.

Miss Lois Kestley is spending the Easter vacation with friends in Montreal.

Mr. Percy Nicholls left on Wednesday for Thorold, Ont., where he has secured a very desirable position and has rented his farm to Mr. Moncrieff.

Operations in the sugar bush are much delayed by the unusual lateness of the season. So far no syrup has been made in this locality, and the outlook is far from promising for a successful season.

The C. C. Club are holding a taffy party (which may be taffy-less) in the Hall, on Friday evening of this week and on Friday of next week, the literary feature of the evening is to be a debate—Resolved "That a farmer with 100 acres of land and \$1000 worth of machinery is in a better position than a city man with a salary of \$2000 yearly." D. T. Greig assisted by Miss L. Crooks on the affirmative side with Mr. O. E. Kestley and Miss Wheelan in the negative.

ARUNDEL.

The Church services on Sunday next 8th inst., will be as follows:—

Anglican.
Weir, celebration of Holy Communion. 10.30 a.m.
Grace Church, Arundel. 7.30 p.m.
S. S. Grace Church. 2.30 p.m.
Rev. Geo. H. Gagnon, M.A., Pastor.
Arundel Union Church.
Rockway. 10.30 a.m.
S. S. Arundel. 10.30 a.m.
Crystal Falls. 3.00 p.m.
Arundel. 7.00 p.m.

Rev. Albert Johnson, Pastor.
The Annual Vestry meeting of the Corporation of Grace Church, (Anglican), was held on Easter Monday evening, 2nd inst., with Rev. G. H. Gagnon, Rector, presiding.

The financial statement for the year was presented and was found to be satisfactory.

A considerable amount of business was before the meeting which was a harmonious one throughout.

The retiring Wardens, Messrs. A. D. Morrison, and A. Smith, were re-elected, as also were the delegates to the Synod, Hon. Smeaton White and J. M. Nelson.

Mr. and Mrs. F. J. Elliot, of Westmount, have been on a two week's visit to Arundel, the guests of Mr. J. M. Nelson.

Notwithstanding the cold weather several ladies and gentlemen from the City, spent the Easter holidays at their cottages at Bark Lake.

Amongst the young people of Arundel, who are students at Macdonald and McGill, and teachers elsewhere, and who were home for the Easter holidays, were the following:—The Misses Muriel Graham, Doris Gagnon, Evelyn Gagnon, Laura Davis, Ethel Cooke, Edna Loughren, and Messrs. George Gagnon, Leslie and Homer Cooke.
Arundel. 10.30 a.m.

HELP WANTED, FEMALE.—House-worker, general, for three young adults in Motherless home in Brooklyn, New York, prefer middle-aged woman. Must be able to cook and take full charge. Write to Miss Jennie Morris, 133 Berkeley Pl., Brooklyn, New York giving full particulars as to age, salary, references and when available.

Special Auction Sale of Farm Machinery!

FRIDAY, April 13th, 1923

Fraser's Auction Rooms

453 St. James St. Montreal.

On account of Whom It May Concern:

THREE CARLOADS

of New Machines of all sizes, including Cream Separators, Gasoline Engines, Tractors, Farm Lighting Plants, Pump Jacks, Grain Grinders, Pullies & Parts for above, Washing Machines, Etc.

ROUGE RIVER IMPROVEMENT COMPANY

Schedule of Tolls for year 1923: The improvements are divided into 15 sections and one-fiftieth of the amounts of Tolls has been apportioned to each section to facilitate the collection of same, as follows:

Red and White Pine, Tamarac, Spruce, Hemlock, square or flatted board, per thousand cubic feet .10cts
Oak, Elm or other hardwood, square or flatted or waney board per thousand cubic feet .15cts
Saw logs 17 ft. in length and under per thousand feet board measure .2-3
Red and White Pine, Tamarac, Spruce, Hemlock, round or flatted over 17 ft. and under 30 ft. long per thousand feet B. M. .3-6
Red or White Pine, Tamarac, Spruce, Hemlock, round or flatted, 30 ft. and upwards in length per thousand feet board measure .61cts
Saw Timber per thousand feet board measure .02cts
Staves per thousand feet board measure .10cts
Cords of wood, shingle butts and other lumber per cord of 128 Cubic Feet .1-3cts
Spikes per piece .02cts
Railway Ties other than Cedar, on 8 ft. lengths per length of 8 ft .1-36cts
Masts per piece .3-13cts
Cedar, round or flatted, 8 ft. long and under per piece .1-70cts
Cedar, round or flatted, over 8 ft. and under 17 ft. long per piece .1-24cts
Cedar, round or flatted, 17 feet and under 25 feet long per piece .1-16cts
Cedar, round or flatted, 25 ft. and under 35 ft. long per piece .1-9cts
Cedar, round or flatted, 35 ft. and upwards in length per piece .1-6cts

Care of Flock at Lambing Time.

Breeding ewes should be put in a good thriving condition and kept in that condition throughout the winter up to lambing time, care being taken to have them neither too fat nor too thin. Ewes that carry excessive flesh usually develop a good coat of fat inside, which prevents the proper development of the lamb and very often is the direct cause of so many late lambing times. On the other hand, ewes that are too thin have not sufficient nourishment for the proper development of the young either before or after birth. A good ration for breeding ewes is a mixture of one and one-half parts of oats to one part of good wheat bran, fed at the rate of one-half pound per ewe per day along with two pounds of good roots and two to three pounds of good clover hay per day. Roots should be reduced in the feeding ration one month previous to lambing time.

At lambing time the ewes should keep a watchful eye on the flock both night and day for, very often a little careful attention to the newly born lambs means an extra one added to the flock. This is particularly true with the young mothers and in cases of twins or triplets. Very often one of these is weaker than the other, and should it become chilled may die before it gains sufficient strength to take nourishment from the mother.

When the lambing season is early a comfortable lambing pen is essential; in fact it is profitable at any time, for very often ewes with twins or triplets when left in the flock will drown their lambs. Furthermore, ewes after lambing require more generous feeding, and the lambing pen makes this possible. A careful watch to assist the weak ones will reduce the number of losses. In cases of heavy milkers, milk fever may occur. In such cases the ewe should be bathed in warm water, thoroughly dried and rubbed with pure hog lard or not as the ewe can stand. If her tests become sore from lambs biting them, two or three applications of vasoline per day will help them. All wool on the udders that prevents the lambs from feeding properly should be clipped off with the shears.

It has been noticed that lambs soon begin taking a little of the grain mixture fed to their mothers, therefore it is advisable to have a small run made at one end of the pen into which the lambs only may go and be fed separately. A good grain mixture for lambs is two parts of wheat bran, one part of crushed oats, one part of finely ground corn meal, and from one-quarter to one-half part of oil meal. Whole oats will do, but the former is preferable. Should a ewe not have sufficient milk for her young, the lamb may be materially helped out by giving it two or three feeds per day of cow's milk.

All lambs should be marked a few days after birth, thus saving trouble later on. All ram lambs that are undesirable as breeders should be castrated and all lambs docked at the age of two or three weeks.

As many of the failures in the sheep industry can be attributed to carelessness and negligence during the breeding and lambing seasons, it is most essential that careful study and attention be given to the flock at this time if success is to be assured.

Keep the Cow Comfortable.

The dairy cow, to give a large yield of milk of high butter-fat per cent.,

must be made comfortable. Most dairymen stable their cows most of the time during the winter. I find that on an average, my cows are stabled twenty-three out of every twenty-four hours. Mild days I allow my cows to remain in the yard from one to two hours, but in chilling weather they are in the yard just long enough for watering. I believe daily outdoor exercise adds to the health and comfort of the dairy cow.

My cows are tied with swinging stanchions. These stanchions are suspended on a short chain about six inches long and are also fastened at the bottom with a short chain about the same length. I like this stanchion as it gives the cows a great deal of liberty, yet they are properly tied. I do not like the rigid stanchion. For years we tied our cows with chains about the neck, attached to a vertical bar. This was far ahead of the rigid stanchion from the standpoint of comfort of the cows, but the swinging stanchions are the most satisfactory of all.

To stable cows comfortably, a properly arranged and constructed stall is essential. We have used plank floors, cobblestone and block floors in our stalls, but the cement floor is the most satisfactory, beyond all question. It is easy to keep clean and sanitary and because of this there is no unpleasant odor about the stable. I consider four-gates about the stable as injurious to the health of the cows as to the dairymen himself. I believe a smooth, tight floor an important factor in the sanitary stabling of cows.

The stable should have plenty of windows on all sides, if possible, and especially on the south side. During winter the days are short and many days are cloudy. Unless there are plenty of windows the stable will be very dark and gloomy. The dairy cow, like a human being, enjoys sunshine. My cows are stabled along the south side of my barn so that the sun can shine directly upon the cows.

Good ventilation is absolutely necessary to the health and comfort of the cows. Few farm barns are equipped with an adequate system of ventilation. However, fresh air may be brought into the stable in various ways if care is exercised to avoid direct drafts. One or more windows may be raised several inches and a board fitted across the opening in such a manner as to allow fresh air to come in without draft. A door may be left partly open on the side opposite the prevailing wind. Abundance of fresh air is essential for the health and comfort of the dairy cow.

To consume her food profitably the dairy cow must have a comfortable bed to lie on. Plenty of clean, dry bedding not only provides comfort but assists in keeping the cows clean and the stable sanitary. I like to use all the bedding I possibly can in my stable as it not only keeps my cows clean and makes them comfortable, but materially increases my manure supply. —Leo O. Reynolds.

Study the Individual Cow.

From various experiments in feeding dairy cattle, and from observations made through the records of cow-testing associations, it has been found that good feeding will increase the milk flow of the average cow from 25 to 60 per cent., says Mr. A. H. White, Chief Dairy Promoter of the Dominion Dairy and Cold Storage Branch, in his recently issued pamphlet on cow-testing. To bring this increase about, it is not sufficient for the dairymen to know the requirements of his herd as a whole; he must know the requirements of each individual cow in order that she may produce the most. This knowledge can be obtained only by keeping records of each cow's milk, as Mr. White points out, where there is a milk sheet, it is an easy and simple matter to appportion the grain ration according to each animal's production. It is no uncommon thing to find dairy cows being fed a ration of silage, hay and straw with a little oat chop and no grain at all. Yet they are expected to produce milk profitably. As the author further says, protein is a necessity and should be applied either in good alfalfa or clover hay or in such concentrates and grains as all meal, cotton seed cake, gluten meal, bran, oat chop, and other meals.

Small Profit in Scrub Stock.

To secure quality and early maturity in beef animals (and it might be added for economy), a good pure-bred bull is essential. With present prices it would pay most farmers to buy such an animal now, or if not, to set about making arrangements for the use of a pure-bred bull in the spring. If there is no animal of the kind near, the Dominion Live Stock Commission has arrangements for overcoming the difficulty, and will furnish information on request.

Died Bald.
The pupils had been writing a history essay, and when the teacher was correcting the papers she was puzzled to find this remark in one of them: "King John died bald."

COCHRANE, ROUYN, TEMISKAMING

When geologists, mineralogists and prospectors all agree that Northern Quebec has the richest all of wealth producing land yet untapped in Canada, it can be readily expected that there will be the next great gold rush. In spite of intense winter weather thousands of gold seekers are already in Rouyn Township seeking the precious metal. An unprecedented rush is predicted for the spring when the waterways open up. It lies just east of the Quebec border and not far distant from the rich iron fields of northern Ontario. The water route to the new field will be by a chain of lakes and rivers from the head of Lake Temiskaming.

HOGS

The feeding value of alfalfa for hogs has been demonstrated in numerous instances, but it would not seem amiss at the present time to offer a brief discussion on the matter. Because of its suitability in a variety of forms, it has proven to be a boon to the hog raiser.

When used in the form of a green feed either as a possum or pasture crop, when cured and used as hay, or ground into meal it has been found that almost invariably this feed has taken a foremost place when compared with the other legumes.

In the cured state, as hay, it is particularly well adapted to meet the requirements of mature hogs as a roughage. The hogs consume only the finer portions of the stems and the leaves, and it is, therefore, very important when harvesting this crop to preserve as many of the leaves as possible.

Analysis shows that alfalfa contains upwards of 16 per cent. of crude protein and about 8.5 per cent. of mineral matter or ash. Both these constituents are relatively important and in the case of the former, forms one of the most expensive constituents of the ration. When thus procured from alfalfa hay, which is a

relatively inexpensive source, it permits of a material reduction in the cost of the ration of mature stock.

There is little advantage to be gained from chopping alfalfa or grinding it into meal, except for young pigs, because of the fact that the increased value has not proven sufficiently great to offset the additional cost. In the case of young pigs, however, which are incapable of handling any appreciable quantity of roughage, alfalfa can be used in the form of meal to good advantage.

Because of the peculiar limitations of the hog in the handling of roughages, this class of stock cannot make substantial gains on alfalfa pasture alone without the addition of concentrates. Some form of meal is necessary in order to produce economical gains. Experimental results have shown that when on alfalfa pasture the most economical as well as the most rapid gains are realized when from 2 1/2 to 3 1/2 pounds of corn or barley meal are supplied for every pound gain in live weight. It was further found that the most economical gains on alfalfa pasture are obtained from hogs which weigh in the proximity of 100 pounds when placed on the pasture.

It is a generally accepted fact that somewhat greater gains may be ob-

A Mad March Hare Party

Here is a rather novel idea for an entertainment, known as the Mad Hare's Party. If you are well acquainted with Alice in Wonderland, you know all about March Hare.

The invitations are written on cards and pasted on the top of each card is a little brown rabbit, running. A few touches of the pen make the eyes and whiskers, and then we have a hare on a mad chase. Repetition of the picture is the verse:

Will you come to the March Hare's party
And be as mad as mad can be,
And with the Hatter and the Dormouse
Sit down for a cup of tea?

He has invited only a chosen few,
And hopes that you will be there;
Come March twenty-seven at eight o'clock,
And please the Mad March Hare.

The rooms are arranged as hatter's shop as possible. Pictures upside down, an old umbrella blown inside out over the door, party willows scattered about in confusion. In each of the guest rooms is a basket containing a rabbit surrounded by little bows of various colors, each bow having a name in another basket. A card containing this rhyme is given to each guest:

Please go upstairs and take off your hat,
And while up there get a bow;
But do not stop to have a chat,
You can do that later, down below.

Each guest accordingly selects a bow, and after all are assembled downstairs finds a partner wearing a bow to match. They talk for five minutes, then separate, each to write a description of the other in verse, not more than four lines. The assembled guests then read their verses and the winner of the one voted the best receives a large rabbit with a yellow bow about its neck.

Each guest is next invited to take a sheet of large paper and crayons, and to draw the best March Hare he can. A prize is given for the best.

The game affording the most fun comes next. All sorts of little favors and funny objects have previously been wrapped up in bundles of various shapes and sizes. Each guest is given a bag containing twenty-five beans, and when all are seated, the auctioneer reads:

The Mad March Hare brought with him to-night
These bundles, which seem so queer to me;
He says there are wonderful things inside,
But that we must bid and see.

He tied them up with paper and string,
And wrote on each its name;
For he said he thought they might get soiled,
So he wrapped them in waxed paper.

In case it began to rain,
For each he brought a bag of beans,
With which to bid high or low,
These being very much better, it seems.

Than the stuff that men call "dough."
So please the Hare and bid on these things,
And we hope they will make you glad;
But if you should find them silly or wild,
Remember the March Hare is mad.

Then the bidding begins and a lot of fun will follow. Someone will bid most of his beans on a package labeled "A Pair of Slippers, only to find himself, when he has opened it, the proud possessor of two banana peels. Another package marked "The Most Important Part of a Dog" will prove to be a piece of bark. Most of the articles should make nice little favors. Then distribute small cards reading:

The Hatter and the Dormouse
Are just now drinking tea;
The March Hare too has joined them
And that's where you should be.

"No room; no room," they may cry out,
But do not let that matter;
Just push right in, and like Alice
Shout,

"There's plenty of room, Mr. Hatter."
The dining-room can be strewn with pussywillows and little rabbits. Cray paper with brown rabbits can probably be obtained. Use for the centre piece a tea table mounted on a box covered with a yellow crepe paper. Have at it the Hatter, a Dormouse and a Mad March Hare drinking tea.

These little figures can be procured at a five-and-ten-cent store. Use little guns and pistols, and round the top of the box have rabbits.

The place cards should be written upside down and backwards, and at each place should be a verse from Alice in Wonderland which can be read aloud during supper.

SMOKE OGDEN'S CUT PLUG

15¢ per packet
80¢ 1/2 lb tin

If you roll your own, ask for OGDEN'S CUT PLUG (Green Label)

tailed where a system of sowing is practiced than when hogs are pastured, but the not inconsiderable additional labor and expense involved in the cutting and hauling of the crop has resulted in the production of pork by this method being fully as expensive when compared on the basis of cost per pound of gain in live weight.

Grading of Eggs.

The only export of farm produce, excepting fruit, in which we do any grading worth mentioning at the present moment is eggs, and when it comes to eggs Canada ranks highest, next to the home article or the Holland article, which of course, reaches Britain inside of twenty-four hours. Thirty dozen crates, "Canada Firsts," were quoted some shillings higher than American selected eggs. Americans being naturally our greatest competitors," testified the Deputy Minister of Agriculture of the Dominion in a delivery on his return from a personal investigation of the British market. In connection with this statement it is interesting to note that Canada is the only country in the world with egg standards based on the actual quality of the egg. These standards are based on weight, size of air cell, visibility of yolk, firmness of the white, and cleanliness. In the standards, eggs are divided into three classes—fresh, storage and preserved, cracked and dirty. The class for fresh is again divided into the grades, special, extras, pullet extras, first and second, and the class for storage and preserved into the grades, extras, firsts, and seconds. If inspected eggs are intended for export and are up to grade, they receive the Government mark, consisting of a maple leaf design bearing the words "Canadian Eggs" "Government Inspected."

A system of inspection for imported eggs has also been adopted, and came into effect on October 7, 1922, since which time inspectors working under the Dominion Department of Agriculture have been able to report an improvement in eggs from the United States compared with shipments earlier in the season. It is

Brantford Concrete Mixer

Add Concrete Improvement to Your Farm. The farmer of today realizes the advantages of concrete. It is strong, durable, and lasts forever. It is the best material for building a mixer. Loads and unloads from either side. Made on wheels or mounted on truck, with or without engine. Write for booklet. Good Supply & Mfg. Co. Ltd., 200 Wellington St., Brantford, Ont.

Irrigated Farms in Southern Alberta

In the Famous Vauxhall District. Now Active Irrigation Project. An especially good location for mixed farming and dairying. A splendid opportunity for young men now living in districts where good land cannot be bought at reasonable prices. This land is NOT FENCED IN, the first 10,000 acres are fully settled and another 10,000 acres now ready for settlement; maximum distance from railroad, seven miles. Good roads, telephones and schools. Easy payments, extending over 15 years. Write to the Best Land May in Alberta. For complete information for CANADA, SEND AND TRANSMIT TO COMPANY, LIMITED, Alberta.

PRATTS SIXTY-ONE YEARS OF SERVICE

A MOTHER'S HEALTH NEEDS GREAT CARE

Care of Home and Children Often Causes a Breakdown.

The woman at home, deep in household duties and the cares of motherhood, needs occasional help to keep her in good health. The demands upon a mother's health are many and severe. Her own health trials and her children's welfare exact heavy tolls, while indoor living tends to weaken her constitution. No wonder that the woman at home is often predisposed through weakness, headaches, backaches and nervousness. Too many women have grown to accept these visitations as a part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple and relief at hand. When well, it is the woman's good blood that keeps her well, which she must make her blood rich to renew her health. The nursing mother more than any other woman in the world needs rich blood and plenty of it. There is one way to get this good blood so necessary to perfect health, and that is through the use of Dr. Williams' Pink Pills. Mrs. W. T. Riley, R.R. No. 1, Apple Hill, Ont., has provided the great value of Dr. Williams' Pink Pills to mothers, and tells her story as follows: "Two years ago, after the birth of my boy, I became very weak and run down. Gradually I lost weight and energy until I was unable to do my household work. I could not sleep, my nerves would twitch and jump so that I could hardly morning with heavy aching limbs and head. Indigestion helped to make the misery worse, and my heart would palpitate terribly. I doctored steadily for a year without getting better, but just dragged along feeling that I would never be well again. But one lucky day, on the advice of a friend, I began treatment with Dr. Williams' Pink Pills. I have taken only six boxes, but I wish you could see the difference. I am now able to do my work, go about and enjoy myself. I feel so entirely like a new woman that I advise every weak or ailing woman to try Dr. Williams' Pink Pills and I know they will get beneficial results."

If you are ailing, easily tired or depressed, it is a duty you owe yourself and your family to give Dr. Williams' Pink Pills a fair trial. What this medicine has done for others it will surely do for you. You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

To My Mother.
Dear gently with her, Time; these many years
Of life have brought more smiles with them than tears,
Lay not thy hand too harshly on her brow,
But trace decline, so slowly on her brow,
That like a sunset of the northern clime,
Where twilight fingers to the summer time,
And fades at last into the silent night
Ere one may note the passing of the light.
So may she pass—since 'tis our common lot—
As one who, resting, sleeps and knows it not.
—John Allen Wyeth.

A crowd of a million persons standing in comfort would cover seventy acres.
Londoners have lost the knack of laughing, according to a German business man who has been in the metropolis for the first time since 1914.

TOO EASY
"It's altogether too easy to get a divorce."

Three Wishes.
If a fairy came to me
With the gift of wishes three,
First, I'd have a home (quite small)
With roses on the southern wall,
Four red chrysanthemums in light,
And shutters for the winter nights.

Then I'd have a garden, too,
Where the old-world flowers grew,
Lavender in misty beds,
Flaming scarlet poppy heads,
Fruit for jam, a kitchen plot,
Wallflower and forget-me-not.

Neither Seen Nor Heard.
A small, slender, slender figure
Up dinner party, and being wedged in
A corner of the table, she was quite overlooked.

She entered in silence for some time, until at last, during a lull in the conversation, a pathetic little voice piped up: "Does anyone want a clean plate?"

Surnames and Their Origin
Variations—Eberly, Eberle.
Racial Origin—Welsh or Cornish, German, possibly Scottish English.
Source—A locality, a given name, a characteristic.

Here is a family name with several possible sources, which certainly may be assumed to have developed from more than one of them.

Unfortunately it is unusually difficult to get track of it. In the Middle Ages, but from known data, considered in the light of linguistic development, the following explanations present themselves.

As a German family name it may be considered the development of a nickname indicating a personal characteristic, from "eber" a "board," and meaning "boardlike," figuratively "hard" or "bold." Or it may have come from the given name indicating the characteristic.

As Welsh or Cornish British it would be the development of "aber," indicating a marshy place where two or three streams come together.

The Gaelic equivalent for this would be "eabar," and the name, developing in the region where highlands and lowlands of Scotland first might be due to unconscious redundancy. Those speaking English, coming across the locality known as "Eabar," might conceivably add their own descriptive word "lean" to it, not knowing that the meaning of the two words were virtually the same.

As an English family name it may be a development of a Saxon given

Secret.
I know a thing that no one knows
Save only one and I,
So frail it is, a thread seems strong,
So great, it mocks the sky.

I dare not tell it if I would,
And would not if I dared.
It is as nothing even told
Is only dull compared.

But he must tell it to me,
As mightiest men do,
My little heart, will be glad
To find I know it too?
—Helen Brice

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is often confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system, his stomach and bowels get out of order and he becomes fretful and irritable. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels, and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Something Worth While.
Guest (inspecting pictures): "Ah, an old master, I think?"
Mrs. Newrich: "Yes; but the frame is new."

MONEY ORDERS.
Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

Music can lull to slumber any form of disease curable by science, according to a professor at Cincinnati University.

Minard's Liniment for sale everywhere.
Ten years is the average life of an oyster.

Man of Letters THANKS TANLAC

Canadian Writer Declares He Never Saw Its Equal for Building One Up.

"Tanlac is a faithful old friend that never fails me," declared James A. Brain, 1001 Gerrard St. E., Toronto, Ont., recently. Mr. Brain is one of Toronto's best known citizens, and in addition to being a successful business man, has written many poems and songs that have gained wide popularity.

"I've been taking an occasional treatment of Tanlac for four years, and it keeps me in fine condition. Why, right now, I feel like I could hold ground in a foot race with any man in Canada."

"Before taking Tanlac, I was all run down, had little appetite, and was out of sleep. I couldn't attend to business, and all these ailments disappeared with my first treatment of Tanlac, and I feel good now. I've been eating, sleeping and feeling fine. In all my seventy years, I've never seen the equal of Tanlac, and I just wouldn't be without it."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

ITCHY PIMPLES ALL OVER FACE

And Shoulders, Burned Badly. Cuticura Heals.

"My trouble started with pimples breaking out all over my face and shoulders. The pimples were large and red and feasted, and itched and burned so badly that I could not sleep. They were very sore and my clothing aggravated them."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample which helped me. I purchased more, and using four cakes of Cuticura Soap and three boxes of Cuticura Ointment, I was healed." (Signed) William C. Steen, 39 Peabody St., Buffalo, N. Y.

Use Cuticura for all skin purposes.

IF STOMACH IS TROUBLING YOU

Instantly! End Indigestion or Stomach Misery with "Pape's Digestin."

As soon as you eat a tablet or two of "Pape's Digestin" your indigestion (gas, flatulency, heartburn, flatulence, cramps, palpitation, or any misery from a sour, acid stomach) goes away. Each package guaranteed by druggist.

DOG DISEASES

How to Feed, Train, and Cure any Dog Disease by the Author, M. Clay Glover Co., Inc., 125 West 24th Street, New York, U.S.A.

Opened Solomon's Pools.

In its solution of the vexed problem of a water supply in Jerusalem, the Department of Public Works in Palestine has collected to combine utility with romance, writes the Jerusalem correspondent of The London Morning Post. In the days of the Roman occupation, when the population of the Holy Land was so small, apparently, clean water, Jerusalem was well supplied with water. It has occurred to the department to make use of the Roman reservoirs and aqueducts, of which the ruins can still be seen.

Thus the Pools of Solomon, so called from being near the Gardens of Solomon, and of second century date, three large reservoirs, with a total capacity of 40,000,000 gallons, situated some eight miles from the capital, are again, after centuries of disuse, supplying Jerusalem with water. Some difficulty was found in repairing leaks, but two of the pools have already been successfully cleared out and restored to their original purpose.

The department has even found it possible to use the surface aqueducts and tunnels, which the Romans made, so as to secure communication between the pools and their main source of supply, a spring flowing in a cavern named Bir Daraah. This was effected after the removal of much silt and stones. No history is repeating itself at Jerusalem.

Petroleum in Spain.

The Spanish Government will dig two 2,000-metre wells in a search for petroleum in provinces where it is believed to exist.

When a dog barks at night in Japan the owner is arrested and sentenced to work for a fixed time for the neighbors whose slumber may have been disturbed.

CORNS

Lift Off with Fingers

Don't hurt a bit! Drop a little "Fruensol" on an aching corn, instantly it stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Fruensol" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the salver, without soreness or irritation.

Minard's Liniment

The Family Medicine Chest

Relieves Dyspepsia

M.D. advises persons who suffer from severe indigestion and constipation should take after each meal and at bedtime, fifteen to thirty drops of the Extract of Roots known to the Drug Trade as "Mother Seigel's Curative Syrup." Get the Curative, 50c and \$1.00 bottles.

BACK ACHED TERRIBLY

Mrs. McMahon Tells How She Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for a run-down condition after the birth of my baby boy. I had terrible pains and backache, and was tired and weak, not fit to do my work and care for my three little children. One day I received your little book and read it, and gave up taking the medicine I had and began taking the Vegetable Compound. I feel much better now and am not ashamed to tell what it has done for me. I recommend it to any woman I think feels as I do."

Mrs. J. H. McMahon, 180 Harvey St., Chatham, Ont.

Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has for nearly fifty years been restoring sick, ailing women to health and strength. It relieves the troubles which cause such symptoms as backache, painful periods, irregularities, tired, worn-out feeling and nervousness. This is shown again and again by such letters as Mrs. McMahon writes, as well as by one woman telling another. These women know, and are willing to tell others, what it has done for them; therefore, it is surely worth your trial.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text Book upon "Ailments Peculiar to Women."

Sure relief from rheumatic pain!

WHITE STAR DOMINION LINE

CANADA
PROVINCE OF QUEBEC
DISTRICT OF TERREBONNE
No. 2263

Notice is hereby given, that this twenty-fourth day of March, one thousand nine hundred and twenty-three, there has been lodged in the office of the Prothonotary of the Superior Court, in the district of Terrebonne, a deed executed before David Desroches, notary, on the fourth of November, one thousand nine hundred and two, between Alphonse Alarie, farmer, of St-Jean-Vier, and Arthur Alarie, farmer of the same place, being a sale by the said Alphonse Alarie, to the said Arthur Alarie, of a farm situated at St-Jean-Vier, known at the plan and book of isosquaque, containing 30 1/2 acres, reference of the said parish, under number one hundred and thirty-seven (No. 137) with house and other buildings, thereon erected.

20. A lot of wood land situated in the Parish of Ste-Therese de Blainville, being part of number eight hundred and ninety-two, of the plan and book of reference of the said parish of Ste-Therese de Blainville, measuring eight perches and one third, by the width, on twenty acres of length, adjoining on the south at Filas Desjardins on the north, to Thomas Chartrand, on the west to Alfred Alarie, and on the east to Francois Giroux, representing Gilbert Courcelles, and possessed by the said Arthur Alarie, as proprietor for the three years now last past; and all persons who claim any privilege or hypothec upon the immovables immediately before the registration of the said deed by which the said lot was acquired by the said Arthur Alarie, are hereby notified that application will be made to the said Court of the district of Terrebonne, at Ste-Scholastique, the seventh of May, one thousand nine hundred and twenty-three, at ten o'clock in the forenoon, for the judgment of confirmation of title; and that unless their claims are such as the registrar is bound by the provisions of the Code of Civil Procedure to include in his certificate to be filed in this case, they are hereby required to serve their oppositions in writing, and file the same in the office of the said prothonotary, within six days after the said day, in default of which they will be forever precluded from the right of so doing.
Ste-Scholastique March 24th, 1923.

Success Is Guaranteed For Your Baking

QUAKER FLOUR must be not only the best in quality, but it must always be the same. We see to this by hourly tests during the milling process. But laboratory tests are not enough. Each day's milling is put to a practical test by our Master Baker. It must always measure up to the exact Quaker standard before it can go into the sack with the Quaker on it. All "chance" is taken out of your baking when you use Quaker Flour. "The happy baker uses Quaker."

Miss Emily Mackie is spending a few days in Montreal this week.

Miss Elsie Tomalty of Louisa is the guest of Miss Hazel Morrison this week.

Mr. Anderson Baillie, of Buffalo, was the guest of Mrs. Wm. Banford on Tuesday.

Dr. and Mrs. Mason and daughter Freda were in Montreal the early part of this week.

Miss Rennie Bruneau of Montreal was the week-end guest of her sister Mrs. E. Jousse.

Mr. Harold Mason left on Monday to spend the summer at Saskatoon and other Western points.

Miss Ruth Arthur of Belle Riviere is spending this week the guest of Mrs. Archie McFaul.

Mr. Owen Todd returned home on Friday last after spending the winter months at Nesto, Ont.

Miss Elsie Crooks of Ottawa was the guest of Miss Hazel McGibbon for a few days last week.

Miss Sherritt of Lakefield returned home this week after spending a pleasant holiday in Boston.

Rev. Mr. MacKinnon is attending a meeting of the Church Union Committee being held to-day in Toronto.

Mr. Norman and Miss Myrtle Thorburn, of Montreal, were the week-end guests of their grandmother Mrs. Jno. Thorburn.

Mr. Jas. Ferguson, of Dundee, was in town on Tuesday attending the funeral of his aunt Mrs. T. Cowan Sr., of Beech Ridge.

Mr. Robt. Cruise, Ex-M.P., of Dauphin, Man., and his son, spent the week-end in town the guest of his brother Mr. John Cruise.

Miss Gladys Dewar spent the week-end with her parents, Mr. and Mrs. Edward Dewar, of Grenville. She was accompanied by her cousin Mrs. Geo. Holt, of Montreal.

Mrs. Ducheneau, (next door to Filion's Bakery,) invites the Ladies to her Spring Opening of Hats, Underwear, Dress goods, and everything pertaining to Women's wear. Call and inspect her Goods.

A very pleasant and profitable afternoon was spent in the Baptist Church, on Friday last, when the Ladies held their Thank Offering meeting. An excellent address on Home Missions was given by Mrs. Victor Collins, also singing by the Misses S. and E. McGibbon, Miss Allison Cottingham, Mrs. S. Goldworthy and the Mission Band. Tea was served, and the proceeds amounted to \$37.00.

The Rev. G. Victor Collins, pastor of Lachute, Brownsburg and Dalesville, Baptist Churches, tendered his resignation on Sunday last which was accepted at the close of the morning service. Mr. Calder, on behalf of the congregation spoke of the regret which the Lachute field felt at his leaving and the kindly relationship that had always existed. It was decided that the clerk of the Church should write the Home Mission Board to procure a student during the summer months.

A Happy Surprise.

Last Thursday evening a very delightful event took place in the Presbyterian Church. After choir practice the members of the choir with a few friends gathered for a social hour in the Hall. During that hour one surprise followed another in quick succession. The first was a presentation of a reading lamp to Mr. W. A. Houston in recognition of assistance given in training the choir for Easter music. The second surprise was a double one involving Mrs. T. Christie and Miss Hazel McGibbon, in recognition of their great services to the congregation as organists for several years past.

Contributions were received during the day which made possible the presentation to each of these ladies of a beautiful pearl necklace and a handsome manicure set, together with a letter expressing the confidence, gratitude and affection of the congregation.

TO RENT.—Store to rent, on Main Street, opposite Post Office. Immediate possession. Apply to J. F. Lavigne, Notary, Lachute. 4-20.

If you have anything to sell or wish to procure something that others might have, try a For Sale or Want Ad in this paper. It gets results.

HELP WANTED.—Youth of between 16 and 20 yrs. to help on farm for six months. Good home with family and good wages. Apply to W. F. M., Box 302, Lachute.

A RARE TREAT THE ALBERT HALL Presents

ALICE CALHOUN in a Desert Romance "ONE STOLEN NIGHT" Wednesday and Thursday, April 18th and 19th. Admission — 20c. & 25c.

ST. ANDREWS EAST

Mr. E. Calder, of the Bank of Nova Scotia, North Bay, Ont., was in town Easter Day.

Miss Adria Dorion was the guest of her brother, Mr. K. Dorion in Cushing, on Friday.

The regular Quarterly Communion Service was held in the Presbyterian Church Sunday morning.

Mr. Ffolliott Shaw, of Montreal, was the week-end guest of his parents, Dr. and Mrs. G. F. Shaw.

Mr. Walter Dorion, Montreal, and Mr. K. Dorion, Cushing, were Easter guests of their parents, Mr. and Mrs. O. Dorion.

Mr. A. LeRoy and G. F. Shaw M.D. are attending the Annual meeting of the Montreal Diocesan Synod this week.

Mrs. W. Lamb left Monday on a trip to Freeport Texas, where she will be the guest of Mrs. Morrison, (nee MacDonald.)

The next regular meeting of Christ Church W.A., will be held at the home of Miss Dewar, on Thursday afternoon April 19th.

Miss Adria Dorion left Wednesday to take up a course of training in the St. V. Hospital, Montreal. We wish her every success.

Miss E. Walsh returned to town on Friday accompanied by her cousin Miss Walsh, a daughter of Dr. Walsh and a student at McGill College, Montreal.

Mrs. Kilgour, of Beauharnois, is the guest of Dr. and Mrs. Wales and Miss Tita Wales who has been in Beauharnois for some months and Miss Evelyn Wales of Montreal are guests of their parents, Dr. and Mrs. Wales.

The Rev. W. A. Howard left Tuesday to attend the Annual meeting of the diocesan Synod Montreal; Mrs. Howard who accompanied Mr. Howard, went on to West Sheffield, and Waterloo, P.Q., to visit friends where Mr. Howard will join her for a few days before returning to St. Andrews.

The most heartfelt sympathy of all their friends and neighbors, goes out to Mr. and Mrs. Buchanan Robertson, in the loss of their baby girl, Ruth Isabel, who passed away at the Gen. Hosp. Montreal Easter Monday afternoon. The funeral was held in Christ Church, Wednesday afternoon, the Rev. W. A. Howard officiating.

—Miss Hampton invites the ladies of St. Andrews and vicinity to a Millinery Opening on Tuesday and Thursday, April 17th and 18th, in Mr. A. E. Ladouceur's Store, Main Street St. Andrews. A large assortment of latest styles. Prices reasonable.

DEATHS

SCOTT.—At the Seignory on Saturday April 7th, Margaret A. Nicol, wife of Albert Scott in her 53rd year.

God takes our loved ones from our home, but never from our hearts.

COWAN.—At Beech Ridge, on Sunday April 8th, 1923, Mrs. Thomas Cowan Sr., in her 88th, year.

In Brownsburg on April 3rd, 1923, Gladys Ivy Green, age 3 yrs and 1 Month old, beloved child of Mr. and Mrs. Arthur Green. Funeral private April 5th.

CHURCH NOTES.

Baptist Church services on Sunday, April 15th, will be held as follows:—Dalesville 11 a.m., Brownsburg 3 p.m., Lachute 7 p.m. The ordinance of Baptism will be administered at the Lachute service.

The Methodist Church, Rev. Albert Mathews, Pastor. The Pastor will preach next Sunday (D.V.) at Lachute 10.30 a.m., East Settlement 3 p.m., Brownsburg 7 p.m. "Give God a chance here, and you avoid taking a chance hereafter." Welcome to all.

Services in the Presbyterian Churches next Sunday, April 15th, will be as follows: The minister Rev. A. George MacKinnon will conduct the services in Lachute at 11 a.m., and in Brownsburg at 3 p.m., Mr. A. O. Lloyd the assistant will conduct the services in Upper Lachute at 11 a.m., and in Lachute 7 p.m. At the afternoon services in Brownsburg the communion of the Lord Supper will be observed. Preparatory service will be held Friday evening at 8 o'clock in the Brownsburg Church. "This do in remembrance of me". Everybody is welcome.

OUT OF THE GOLDEN PACK

BY IDA M. EVANS.

PART II.

Lettice was at the dinner table; white shouldered, satin clad, in beaded evening slippers. For some reason she was a little pessimistic.

And then, between dinner and the first act of the play which followed, his pulse beat faster. Why? As he helped Lettice into the Wellman car and his hand touched her bare elbow, her loose evening coat sleeve having fallen back, a lovely color ran up her delicate profile.

In view of what was to come months later it was of some significance that, at the end of the second act that night, a messenger boy from Hammond Wettles himself slipped a summons to Stephen. Wettles, the breakfast food king who could not direct his own products, was chronically threatened with appendicitis, but shied from the necessary operation like an old horse from a high fence.

Stephen, obeyed the summons, although Lettice smiled "Must you?" and Dan Wellman snorted, "Dog's life you lead, Steve."

But because that last disappointed lift of Lettice's eyes stayed with him, giving rise to a certain reflection on his part, Stephen was somewhat absent-minded with an old pain-gripped man. Afterward he blamed himself. Had he been more insistent Wettles might have yielded then on a long mooted point and saved himself and Stephen much trouble.

"I'm afraid of the knife," said Wettles ill-humoredly. "And it's my own business."

"Yours," agreed Stephen. "Then why urge?"

"It's my business to urge," said Stephen curtly.

Old Hammond Wettles heard, grunted, sighed gloomily, and promised to bear his own condition in mind after a business trip to New York.

He went to New York. A diphtheria epidemic quarrelled for stage space with the year's influenza. A boiler explosion in a factory sickeningly marked one week. Hammond Wettles wrote that he would return presently—and, mind, no saw but yours, Bentlewin, if saw it must be. Stephen, who was grimly devoid of vanity, disapprovingly reflected that Wettles better act faster and be less particular as to the saw's wielder, and then forgot Wettles. He dined several times with the Wellmans, which meant with Lettice Towne, and he dined once at the Towne table itself, and he played golf twice out north where Lettice happened to be playing.

Lettice played golf—on nice days, when it was not too warm or too cold, she said.

He denied to himself that Lettice Towne had come to regard him with a fleeting, plaintive wonder in her lovely dark blue eyes. He would not admit to himself that very often he had been greatly tempted to answer that question in a way to satisfy her—and himself for a while at least. He stuck to a slowly formed, austere resolution.

Perhaps because in those early childish years Cora Bentlewin had printed austere on a small, clean, receptive mind. Perhaps he was a little morbid. He deliberately "dropped" Lettice from his thoughts.

And then—
He had been grossly negligent. Criminally negligent, he could not quite admit; even if he had departed in silly schoolboy-like greed for a holiday, from his long fixed professional habit of keeping, in perfect repair, his own car or an excellent hired substitute.

Accident, Lettice's responsibility, his own negligence—

He had been grossly negligent. Criminally negligent, he could not quite admit; even if he had departed in silly schoolboy-like greed for a holiday, from his long fixed professional habit of keeping, in perfect repair, his own car or an excellent hired substitute.

His car was undergoing repair that Saturday afternoon when, just at the close of office hour, Dan Wellman breezed into his private consultation room. Dan was all invitation.

"Come along, Steve. Call it a day. These rains have made the turf springy as a hair mattress. And there'll be creamed home-grown peas for dinner."

Every year the Wellmans played at raising their own vegetables on two extensively fertilized acres, with a luxurious twelve-room cottage, near the golf links of a far north shore country club.

Stephen Bentlewin accepted the invitation almost without a word. It was welcome.

He had been hard driven for a good many weeks, his night and day calls stepping on each other's heels.

At Dan's imperative invitation he thought of his own car. He seldom rode in another man's. But he saw no great wisdom in waiting an hour or two on repair work. His spare hours were too few, and daylight waits on no mechanic. He saw no good reason for not hopping into Dan's six-thousand-dollar roadster. Now that it was proffered to him, he felt eager to get at his golf, in a place which he knew would be good and green.

And Lettice Towne undoubtedly would be one of the smiling, appreciative guests at the Wellman dinner. For all the cold and careful resolution which undermined his feeling for her, the prospect of seeing her was not unpleasant.

Without ado, he accompanied Dan out the door, pausing to give a direction or two to the office girl, then down in an express elevator.

The sun was bright, and just inclining toward descent of day, as they rolled north over the great new bridge and took the lovely skirting road of the lake. With the first swift rush of north shore air against his face, Stephen shook off some of the accumulated fatigue of weeks.

He shook off more as Dan drove into the low club garage. To the immediate west of the garage the smooth rolling turf had caught something fresher and more emerald than usual from the recent rains. Like a mirroring lake, it allured.

Over it was a scattering of concentrated men and women in gay sport sweaters and white footgear. Lettice Towne was one of them, in a soft blue silk sweater and flat heeled white shoes, which made her seem smaller and younger. For all her modern training, the color rose in her face, too, at sight of Stephen Bentlewin.

Although Lettice had merely motorized out to the Wellmans for the day, she had had foresight enough to bring along evening wear. In a soft white silk dress, she sat next Stephen Bentlewin at dinner. It was a filmy, delicate silk. Her arms were bare and powdered. Her slippers were satin and never manufactured for walking purposes. Her stockings were white cowboys.

Later when the cottageful went across to the clubrooms, for the evening dance, she wore a tulle scarf as well. It was silvery tulle, with infinitesimal beads forming a feathery design. Expensive-looking, but neither a useful nor a durable article. Merely one of the soft, useless, lovely trifles which civilization exhibits pathetically to mark wistful humanity's rise from savage red and yellow beads.

His pulse was not slow as he and she entered the club doors, lighted and streaming music. He was not a facile dancer. He had learned the art too late in life, with hardly enough zeal. But he knew that he was going through a turn or two with Lettice. That would top a pleasant day. He continued unmoved, however, in some secret recess of his being.

And then, even as she put a hand on his arm and the orchestra finished with the preliminary strumming of a fox-trot, he was summoned to the telephone. The telegram was repeated over the wire to him as it had been received by his office assistant in town.

Aboard Flier:
Hammond Wettles stricken on way home. Immediate operation imperative. Have ambulance meet train 11:30 p.m. You yourself requested to operate. Telegraph reply Flier, Toledo.

Physician on Train.
When he had had his assistant in Chicago repeat the telegram and in return had telephoned orders for a reply to be made and the ambulance attended to the turn of Stephen Bentlewin's heel was professionally eager and obedient. An animation, too, different from that induced by a green turf had taken possession of his face. That, to correspond, a certain animation had withdrawn from Lettice Towne's face, at his side, irrelevant to Hammond Wettles's plight.

Stephen looked about for Dan Wellman, or a club steward. "Where can I get a taxi, Dan? Or a hired car? No, not yours—at the garage."

Two or three men, besides his host, were cordially ready to supply Stephen's lack. They pressed forward in a group as they heard. But Lettice Towne, gracefully, deftly took precedence of all. Smilingly, with a curious little fixed glint in her eyes, she waved them back.

"I'm driving back to town to-night. Truly! I promised to get home. And I can just as well go now. Please!"

Stephen was slightly annoyed. His mind and attention had thrust ahead to Wettles and hospital, and he would have preferred not having any one to talk to him on the drive back to town.

"I'd like to start instantly," he said. "And make good time."

"I'll get my coat in a second. Dan, have the car brought out of the garage, please."

(To be concluded.)

Woman's Interests

Labor Savers I Use.

First comes my kitchen cabinet, standing five feet from and in front of the stove and containing everything that is needed for baking. I can prepare anything for the oven without taking a step till the cake or pie or biscuit are ready to slip into the oven.

Next comes my built-in woodbox that can be filled from the shed and forms a seat in my kitchen beside the firebox end of the stove.

With my five babies, all under five and one-third years of age, the bathroom on the first floor is a blessing. Two springs piped into a concrete reservoir supply the house and barn. The hot water tank is connected with my range.

And my laundry tubs! Such backache and time savers as they are. Mine are in the kitchen and covered as a table when not in use for washing. With no tubs to lift and empty, washing does not seem like washing. I had rather be without my hand-power washer than the tubs.

My husband had acetylene lights put in, so all the time I once used cleaning and filling oil lamps is now used for other work. With the outfit is the hot plate which makes summer cooking more comfortable.

I have an ironing board on a standard and a gasoline iron so I can iron when and where I choose.

One year I spent almost a day pitting cherries but never again! I bought a pitter and an apple parer. They not only do better and much quicker work but my five-year-old boy can operate them as well as I. Doing every bit of my own work, sewing for all of us even to the making of the children's coats, I must plan to save every minute I can so as to have a little time for reading and other things I enjoy.

By using my bread-mixer, it takes seven minutes to knead bread and have it set to rise.

I must also mention my mop wringer, dust mop and sweeper.

Winter used to mean spending a goodly share of each day carrying "chunks" from the woodshed to keep two heaters going. Now we have a pipeless furnace, all wood for it in the cellar and a much warmer house. —Mrs. L. L. S.

Women 100,000 Years Ago.

What were women like a hundred thousand years ago?

A number of French professors have been trying to find out, and some very interesting results have followed their search. They say that in the days when people lived in caves Woman was the most important of the two sexes. Men were only tolerated for the sake of the food and skins they provided. Women ruled everything, and almost every art and science we have to-day is due to the work of the women of thousands of years ago.

Women taught men how to defeat famine by storing animals and storing them for times when food would be unobtainable. Women taught men how to get skins to clothe themselves in the winter. Women, in fact, saved the human race from being destroyed.

Since she was not strong enough to kill her enemies or provide food and clothing, woman had to use her wits and employ cunning instead of force. Every labor-saving device we have to-day is descended from the early invention of a woman.

Altogether it seems that woman a thousand years ago ruled man in almost exactly the same manner that she does to-day!

Music the Best Antidote for Waywardness.

During the adolescent age the boys' and girls' tastes seem to be forming, and in many cases it is at this point that it rests with the parents whether the boys shall become interested in the higher pursuits or in pool, cigarettes, etc. Music is the best antidote for waywardness that I know. —Minard's Liniment for Corns and Warts

We all know how rapidly an idle brain deteriorates. Like the water in the brook which sparkles down the hillside becomes foul, muddy, and attracts all sorts of vermin when it ceases to work and stands idle in the bog at the foot of the hill, so the idle brain which keeps clear and limpid and pure when active becomes muddy and foul and attracts all sorts of vicious associations and deteriorating, dangerous tastes when idle.

One of the Best.

Miss Booklover—"One should be up-to-date! What are the six best sellers at present, Mr. Toper?"

Mr. Toper—"The six best sellers? I really can't say; but mine's one of them, I'll bet!"

chopped raisins; half cup of walnut meats; quarter teaspoon of vanilla. Boil sugar and water until it threads when dropped from the tip of a spoon. Pour on beaten egg whites and beat until it holds its shape. Add raisins, nuts, salt and vanilla. Mix well. Drop from a teaspoon on paraffin paper and let stand until cold.

A Dense Population.

A school-teacher asked her class in what part of the world the most ignorant people were to be found. A small boy volunteered quickly, "In London, England."

The teacher was amazed, and questioned the lad as to where he had obtained such information.

"Well," he replied, "the geography says that's where the population is most dense."

Johnny Scores.

Johnny hated his early bedtime. In the course of one of the nightly arguments his mother told him how all the little chicks went to sleep with the sun. For the moment he was silent, then he piped up: "But the old hen goes to bed with them, you know, mama!"

The extra half hour was conceded.

The Eternal Cause.

"What's the matter, little girl?" "Two boys were fightin' and I got struck by a stone."

"That's it; the innocent bystander always gets hurt."

"But I don't know as I was an innocent bystander. I was what they was fightin' about."

Of Course.

Flour Sifter—"You seem well fixed financially."

Rolling Pin—"Well, I gather a little dough now and then!"

Dye Any Garment or Old Drapery in Diamond Dyes

Buy "Diamond Dyes" and follow the simple directions in every package. Don't wonder whether you can dye or tint successfully, because perfect home dyeing is guaranteed with Diamond Dyes even if you have never dyed before. Worn, faded dresses, skirts, waists, coats, sweaters, stockings, draperies, hangings, everything, become like new again. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

In this world it is not what we take up, but what we give up that makes us rich.

A Certain Woman.

One might be with her year on year, and yet

Find always something new in her each day.

As a familiar landscape has a way Of changing so that one may quite forget

How well one knows each hill and rivulet;

Her sudden vagaries are challenging

As are the fragrant breezes of the spring,

And from her smiles one learns love's alphabet.

In fact, she is so many different folk, One never wearies of her comrade-ship;

Nor may a final judgment e'er invoke, So varied the opinions she lets slip,

And always, through what mood or phase she goes,

One catches poetry within her prose. —Charlotte Becker.

Raisin Fluff.

Two cups of sugar; half cup water; one stiffly beaten egg white; half cup

After Every Meal WRIGLEYS

In work or play, it gives the poise and steadiness that mean success.

It helps digestion, allays thirst, keeping the mouth cool and moist, the throat muscles relaxed and pliant and the nerves at ease.

FOR A BETTER SCORE

The habit of claiming as our own, as a vivid present reality, that which we desire with all our heart is a magnetic power which attracts the things we long for. The creative power exists in affirming the desire of the thing we long to be or to accomplish.

Minard's Liniment for Coughs & Colds

She wrote him a note which read: "Dear John—Meet me at the trying place at 6.30 this evening; without fail." And John answered: "In that lexicon of youth which fate has reserved for a bright manhood there is no such word as 'fail'."

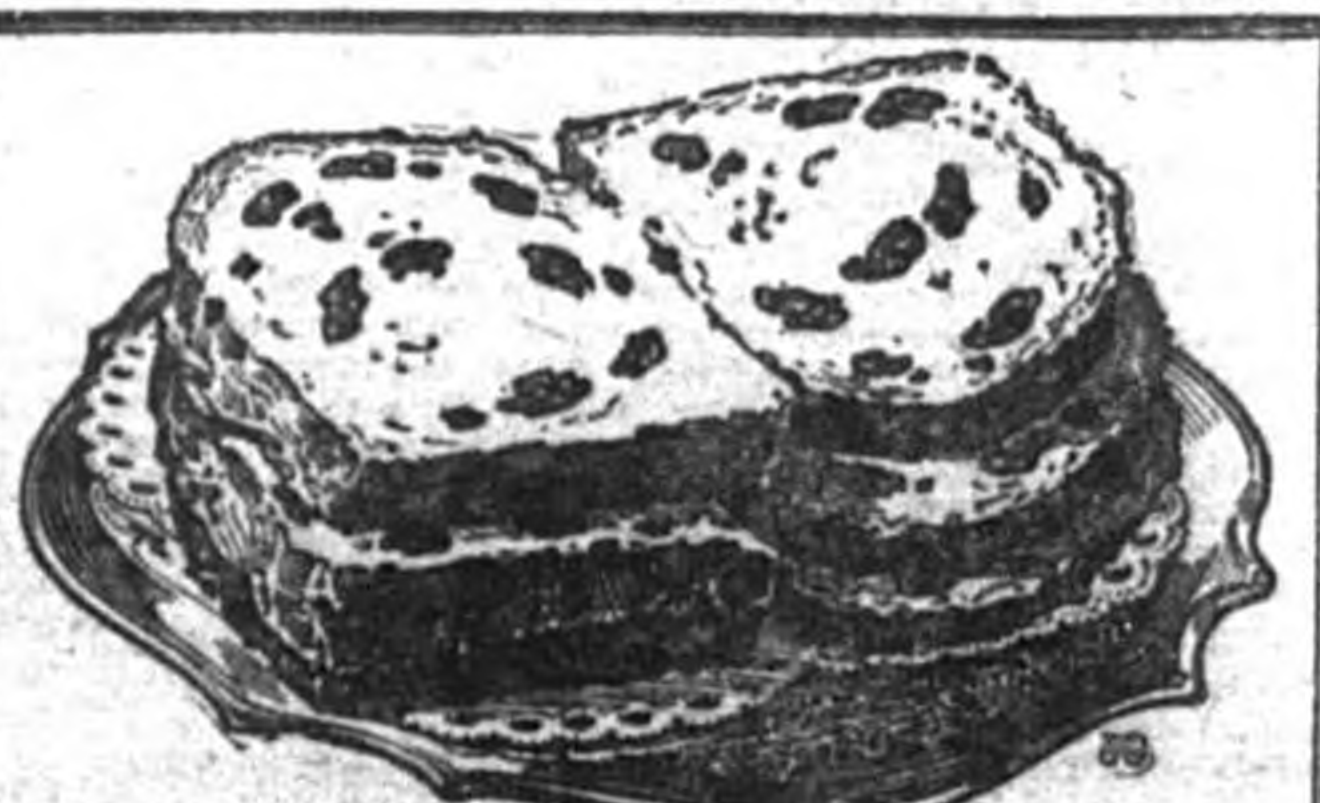

Campana's ITALIAN BALM

Prevents chapped hands, cracked lips, chilblains. Makes your skin soft, white, clear and smooth.

All druggists sell it

BLACK KNIGHT STOVE POLISH

Why Bake At Home when you can buy bread like it, ready baked?

COUNT the raisins—at least eight big, plump, tender fruit-meats to the slice.

Taste it—see how the raisin flavor permeates the bread.

No need to bake at home when we've arranged with bakers in almost every town and city to bake this full-fruited raisin bread.

Just 'phone and they'll deliver it—all ready to surprise the family tonight.

It comes from master bakers' modern ovens in your city. And it's made with Sun-Maid Raisins.

That's another reason for its superiority. A rare combination of nutritious cereal and fruit—both good and good for you, so you should serve it at least twice a week.

Use Sun-Maid Raisins also in puddings, cakes and cookies. You may be offered other brands that you know less well than Sun-Maid's, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested Sun-Maid recipes.

Climate and Character

By Fred James, Ottawa.

Too long have Canadians, caught between pride in their country and a desire to be reasonably truthful, compromised in their discussions of the Canadian climate with that phrase—"It's cold, but you don't feel it." Now the truth is, it is cold, and you do feel it. But the truth is, also, that instead of being a heap to progress and development, the sharp, bright, cold winters of Canada are among the greatest of her blessings. They may even, with fairness, be described as national assets.

Vilhjalmur Stefansson, the well known Arctic explorer, incidentally a Canadian by birth, has raised the question in his recent book, "The Northern Quest of Empire." "What is a good climate?" he has suggested that the same intelligence be applied to appraisals of climate as of, say, food. Now a good food is one which makes the consumer strong, healthy and happy. It is a very perverted judgment that would classify as good those rich and highly spiced concoctions which, however agreeable they may be to the palate, are destructive of the health and the digestion. So of the climate. A good climate is one which makes a man healthy, vigorous, energetic, alive; which fires him with the desire and, it may be, with the necessity, of accomplishment; which does not lure him to beds of ease and slothfulness, but fires him with ambition to be "up and doing, with a will for any fate; still achieving, still pursuing"—such a climate is a really good climate, and such a climate have we in Canada. I repeat, it is one of our greatest national assets.

Critics Answered.

If it is considered by critics of the Canadian climate that it is rather too severe during the winter months, they might remember that, like the good mother she is, she gives generous compensation for any severity. Throughout Canada, with the exception of certain territory adjacent to the coast of British Columbia, the country for about four months of the year is covered with a deep mantle of snow, and the soil beneath and the inland waterways are locked up tightly by frost. It is well for Canada that these things are so. Without the frost and the snow it would not be the great agricultural country that it is; the value of the forest resources would be less; the Canadians would not be an energetic and productive people as they now are. There is a country where nature gives a contribution of fifty per cent. and demands fifty per cent. human effort.

In more temperate climates nature's contribution is greater and the demand on human effort correspondingly less, with a consequent depreciation of the character of the people.

In some more southerly latitudes the opinion is still commonly held that Canada is a country of almost perpetual snow and ice. So far as Europe is concerned, the war served to dispel many of the erroneous ideas about Canada. An invasion of more than 500,000 young men and women, of splendid physique and of high moral purpose, from a country with a limited population carried a message of accurate information about the land from which they came.

Guadeloupe or Canada?

A rather curious incident was linked with that army. At the peace conference of 1763, following the war with France, England demanded from France, as part of the price of victory, the island of Guadeloupe. France objected to giving up Guadeloupe because it contained rich sugar plantations, and sugar was then regarded as an indispensable product in about the same way as oil is regarded to-day. England was offered Canada, but the English delegates to the Peace Conference had no enthusiasm for such a bargain. They did not want Canada. They could see very little value in it.

True, there were some fish off the banks of Newfoundland and some fur island, but on the whole they much preferred the small island of Guadeloupe. The French insisted upon retaining Guadeloupe but were willing to give up Canada, perhaps for the very reason that the English did not want it. After a prolonged deadlock England was persuaded to take Canada for political rather than economic reasons. After the Peace Conference, Voltaire, the famous French essayist and philosopher, remarked that France was well rid of her 15,000,000 acres of snow, meaning, of course, Canada.

Time and Fate.

But time and fate produce rather curious results. This country that England did not want has now become the chief source of the supply of breadstuffs for the people of the British Isles and a generous contributor of a variety of her products. It is the second largest wheat and oat producing country in the world; and it offers, as perhaps no other country offers, a means of escape from the crushing competition of England's own overpopulated country. From the 15,000,000 acres of snow half a million men had the privilege of fighting in France as comrades of Voltaire's countrymen in the successful effort to defend it—and the 15,000,000 acres of snow—from an enemy that, no doubt, had a more accurate appreciation of its present worth and ultimate possibilities. To-day Guadeloupe is rarely heard of, but Canada looms larger and larger against the world's sky-line, and if history may be taken as a guide the im-

portance of Canada in the affairs of the world is destined to become still greater and greater, for the path of progress and power still is moving northward. Civilized supremacy seems to be abandoning the warmer climates for colder regions, and it seems not unreasonable to suggest that in the logical sense of events supremacy will eventually be centred in Canada, or at any rate in the northern half of the continent of America. This is no idle conclusion. In the year 3400 B.C. the point of supremacy was in Upper Egypt, when the mean temperature was 76 degrees. Four centuries later it was in Lower Egypt, where the mean temperature is 70 degrees. As time went on the path of supremacy continued to ascend northward or coldward, and in the first century, Anno Domini, the centre of world power was in Rome, which has a mean temperature of 60 degrees. We now find that the point of supremacy is where the mean temperature is between 48 and 50 degrees, or in the latitude of London, Paris and New York. In the light of this evidence it is not unreasonable to assume that the Downing Street of the not too distant future may be Sparks Street, Ottawa, or Jasper Ave., Edmonton.

The Effect of Climate.

Supremacy, to be maintained, demands virility and perseverance, qualities which are not distinctive of a country with an enervating climate. Such climates are erroneously termed good climates. What we really mean is that they are good climates to loaf in. We know, after all, that when we go to a southern country in the winter we go not to get virility, but to loaf. "No climate can be considered good, though bananas and yams may flourish, if men decay," says Stefansson in his latest book. "Human energy, mental and physical, is developed to the highest degree in the northern climates."

But winter is the greatest asset to the Dominion because it has perhaps more to do with the development of the individual character of her people than any other season of the year. It is a time when they are compelled to spend more time in their homes. The hours of daylight are less and the opportunities for engaging in outdoor sports are not so many as they are in the spring, summer and early fall months. They have more time for introspection and contemplation, more time to spend around their own firesides and in the sanctity of their homes, where they may—and should—gain a greater respect for the eternal virtues.

A Swiss Municipal Forest.

In Switzerland, 67 per cent. of the forest area is held under own or some other form of communal ownership. In France, 23 per cent. of the forest area is so held, and in Germany 16 per cent. In Alsace-Lorraine, nearly two-thirds of the towns own communal forests.

Many of the communal forests in Europe have been under such ownership, with continuous protection and management, for many generations, in some cases for centuries. The city forest of Zurich, Switzerland, is a classic example. This forest, called the Sihlwald, has an area of 2,580 acres (about four square miles). The known history of this forest runs back to the year 853, since which time it has been under some form of protection and management, and has continued to supply forest products for the people. It became the property of the city in 1524. The records of the forest show that in 1460 the appointment of two foresters was authorized. It is interesting to note the comparative antiquity of forestry in Europe, in contrast with the youthfulness of his profession in America. Prof. R. S. Harmer, of the Forestry Department, Cornell University, records that the mill in the Sihlwald employs 30 men, and that 120 more are employed in the forest itself, so that this small forest alone comfortably supports a small community by itself. A city woodyard is maintained to supply citizens with fuel. Under normal conditions a substantial profit is derived from the forest, which assists to reduce taxation.

Wood is Indispensable.

How indispensable wood is we seldom stop to think. You cannot produce, transport or consume anything without wood. You cannot eat food, wear clothes nor live in houses without the help of the forest. Half the wood consumed in America is used on farms to produce our food. Without it our food would not be produced. One-fifth of all the lumber we consume goes into packages necessary in the transportation of food and goods. Even a concrete house cannot be built without wood.

OCCUPIED IN ANY CASE
"Germany is occupied in trying to pay her war debts."
"Well, it's either that or be occupied if she doesn't."

Every man must educate himself. His books and teacher are but helps; the work is his.—Webster.

—AND THE WORST IS YET TO COME

Recreational Uses of Forest Reserves.

It is natural that people should desire to make use of the forest reserves for recreational purposes, and, under proper supervision and regulation, this is desirable from the forest administrator's standpoint. People who spend their holidays in the woods, whether simply in camping or in hunting and fishing, get a good idea of the value of forest resources and thus become active agents for forest protection. In desirable locations along the shores of lakes in different forest reserves plots are leased to citizens on condition that they erect suitable houses and keep their surroundings in good order. The number of these cottages is steadily increasing, although progress in this respect has not been so rapid of late owing to the business depression. Fishing is one of the great attractions for tourists and cottagers, and the policy of the Forestry Branch is to maintain good fishing, by stocking the lakes with fish fry, when necessary, and by restricting the method of taking fish to angling. The efforts in this direction are meeting with success; and in the matter of fish and game protection the Forestry Branch acts in co-operation with the Dominion fishery authorities on the one hand, and the various provincial game wardens on the other.—Annual Report, Director of Forestry, Ottawa.

Corn Exposition.

Ecuador will hold a corn exposition, with numerous prizes, open to growers of all the Americas, at Quito, next October.

Canada's Mineral Production of Past Year

Despite the depressing conditions which prevailed in the Canadian mining industry during the later part of 1921, both production and value of practically all minerals during 1922 show an increase over the preceding year. According to a preliminary report issued by the Federal Bureau of Statistics, the output in 1922 was valued at \$180,622,000, as compared with \$174,315,655 in 1921, an increase of \$6,306,347. Of the total value, metals accounted for \$61,731,000, as compared with \$49,343,232 in the preceding year; fuels and other non-metallic dropped \$4,000,000 to a total of \$83,591,000; and the production of structural and clay products has been estimated at the same valuation as in 1921, namely, \$35,000,000. The value of the ten principal products, in order of value, were as follows:—Coal, \$68,349,500; gold, \$26,110,500; silver, \$10,633,500; nickel, \$8,884,000; copper, \$6,332,800; lead, \$6,141,553; asbestos, \$5,300,000; natural gas, \$4,658,400; zinc, \$3,091,000; and salt, \$1,531,000.

Gold Production Increased.

One of the most outstanding features of the mining industry during the period under review was the large increase in the production of gold, which amounted to over a million ounces, the first time since 1902, and was 31 per cent. above the production of the preceding year. Continued activity in the Northern Ontario gold fields resulted in many new mines being added to the producing list, while many of the older established companies increased their output by installing additional equipment. Hollinger still maintains the position of premier gold producer in the Dominion, and in addition is credited with being the largest producer of gold in the world. Reserves of ore blocked out on this property give good assurance for its future production.

A new Canadian gold field is in course of development in Western Quebec, where some promising prospects have recently been reported, and this territory will be served by a railroad now under construction northward from Kipawa.

Alberta Leads in Coal Production.

In spite of the serious labor troubles which affected the coal industry during the year, production of this product was very satisfactory, totalling 14,310,000 tons at an estimated value of \$68,349,500, compared with 16,057,493 tons, valued at \$72,451,655 in 1921. Alberta still holds the position of leading coal producer in the Dominion, with an output of 5,237,000 tons, followed closely by Nova Scotia with an output of 5,349,000 tons. Other coal producing provinces, in order of importance, were:—British Columbia, 2,926,000 tons; New Brunswick, 258,000 tons; and Saskatchewan, 250,000 tons.

Canadian coal exported amounted to 1,821,000 tons for the year, comprising about 1,000,000 tons from the Western Provinces and the balance from the Maritimes. In addition 4,000,000 tons of Canadian coal moved in interprovincial trade during the year, about 2,443,000 tons of which was bituminous, the balance being mostly lignite.

Silver Increases.

Silver production totalled 15,762,000 ounces, valued at \$10,633,500, being an increase of more than 2,000,000 ounces over 1921. Production was chiefly confined to Ontario, British Columbia and the Yukon, although a small amount was accounted for by Manitoba, Quebec and Nova Scotia. The mining activity in Northern Ontario resulted in a number of mines being developed, while those already established experienced a steady era of expansion. In this area the Nipissing Mining Corporation, Coniagas and O'Brien mines were most active, all accounting for increased production. The remarkable finds of silver and subsequent development of deposits at Mayo, in the Yukon, did much to bring that province to the fore as a producer of silver. In British Columbia the greatest increase was made in the Skeena district, where the new rate schedule of silver-lead-zinc ores issued by the Canadian Consolidated Mining and Smelting Company had considerable influence in promoting new development.

Lead Smelting Heavier.

Lead made an excellent showing during the year, production totalling 98,736,000 pounds, valued at \$6,141,553, as against 66,679,000 pounds, worth \$3,828,000, in the preceding twelve-month period, an increase in value and production of approximately forty-five per cent. The new rate schedule of the Canadian Consolidated enabled many small mines producing silver-lead-zinc ores to re-open on a paying basis. The Trail Smelter showed an increased output during the year, the receipts during the last few months of 1922 being in excess of the records for any previous period in the company's history. A small quantity of lead was produced at Notre Dame des Anges, Quebec, while the Caletta Smelter, in Ontario, produced about the same quantity as in 1921.

Zinc Increases.

An increase of approximately 1,000,000 pounds of zinc over the preceding year was recorded in 1922. In all some 54,000,000 pounds was produced, valued at \$3,092,000. Production was solely confined to British Columbia, and was accounted for by the Trail Smelter. This phase of the mining in-

Neglected Genius.

If you are the genius you think you are, don't be worried about being neglected, my friend. Everybody is looking for genius—that is, the genius that accomplishes things, the genius that gets things done, that puts plans through. There's a sign up at the entrance of every vocation in the world for such a genius as you think you are. So don't worry about being unrecognized, the whole world is looking for you.

You know what Emerson says—"If a man can write a better book, preach a better sermon, or make a better mouse-trap than his neighbor, though he build his house in the woods, the world will make a beaten path to his door." If you have the genius to provide people with some new thing that will add to their welfare, their comfort or enjoyment, you won't need to tell anybody about your genius, your work will speak for you; it will be your best advertisement.

It is said that Henry Ford usually has an advance sale on every car he can turn out. He doesn't have to advertise as other car manufacturers do, he only has to meet the great demand.

Now, if you have anything the world wants, you won't have to try all sorts of schemes and ingenious plans to let people know about it. It will advertise itself, as the Ford car has done everywhere. But if you only put out something that very few people want, and those people are scattered over the earth, you will have to do some very ingenious advertising to make it known, and even then you will not make much of a living or much of a success out of it.

Take heart, my friend. There are no neglected geniuses to-day. If you have anything it wants, even though you try to hide yourself, the world will find you out and make a beaten path to your door.—O. S. Marden.

Knew He'd Get Caught.

Doctor—"Your husband has hooked a worm, madam."
Wife—"The poor fish! I knew he'd get caught!"

A Plain Talk.

Many people seem to think that success comes in some mysterious way; that they cannot do very much in the way of bringing it about; that it is largely a question of luck, of just happening to be in the right place at the right time, of having pull, or influence, or outside capital.

The real truth is that these people haven't the grit to try. They are cursed with inertia; they are lazy; they are not willing to hustle; they are not willing to pay the price for success.

Multitudes go pinching along all their lives in mediocrity, pointing envious fingers at those who by industry and effort have won advancement and crying "Lucky dog!" "It's better to be born lucky than rich."

It isn't luck, but grit that controls success. The man or woman who forms the habit of waiting for something to turn up never succeeds.

No Soup or Pie, Thank You.

Life in the Russian armies to-day seems almost to be safer on the firing line than behind it. That at any rate is the impression you get from reading Mr. Ferdinand Ossendowski's account of the activities of the anti-Bolshevik general Baron Ungern, the "bloody baron."

I was at Urga, says Mr. Ossendowski, when one evening I was invited to the quarters of the chief of staff of the Russian military of the region. There I met many intelligent officers, and we were chatting animatedly when suddenly Sepalov, one of Baron Ungern's colonels, entered, singing to himself. The fellow was said to be mad, and dark, terrifying tales were current about him. The other guests at once became silent and under various pretexts slipped out one by one. Sepalov handed the chief of staff some papers and then said to us, "I shall send you for supper a splendid fish pie and some hot tomato soup."

As he went out the chief of staff clasped his head in desperation. "With such scum of the earth we are now forced to work after this revolution!"

A few minutes later a soldier from Sepalov brought us the fish pie and a tureen of soup. When the man had gone the chief of staff sat listening until the sound of steps had ceased. Then, "He is Sepalov's executioner," he whispered and to my amazement began to pour the soup on the ground beside the brazier. A few moments later, going out of the yurt, he threw the pie over the fence. "It is Sepalov's feast, and, though it may be tasty, it may also be poisoned," he explained.

Distinctly depressed, I returned to my house. My host, who was not yet asleep, met me with a frightened look. My friends were also there. "God be thanked!" they all exclaimed.

"What is the matter?" I asked.
"After your departure," explained my host, "a soldier came from Sepalov and took your luggage; he said that you had sent for it."

I at once understood the danger. Sepalov could place anything that he wanted to in my luggage, and afterwards could accuse me. I stared at once for Sepalov's, where the same soldier who had brought the supper to us met me. Sepalov received me immediately. In answer to my protest he said that taking my luggage was a mistake and, asking me to wait for a moment, went out.

I waited five, ten, fifteen minutes, but no one came. I knocked on the door, but no one answered me. Then I decided to go to Baron Ungern; but the door was locked. I tried the other door and found that that also was locked. I had been trapped! I was just going to whistle, when I noticed a telephone on the wall and called up Baron Ungern.

In a few minutes he appeared; Sepalov was with him. "What does this mean?" the baron asked Sepalov in a severe, threatening voice and, without waiting for an answer, struck him a blow with his tashur that sent him to the floor.

We went out, and the general ordered my luggage. Then he took me to his own yurt. "Live here now," he said.

Could but Wouldn't.

A Glasgow merchant recently purchased a fifteenth-century Highland castle, at one time the property of a Scottish earl.

He was showing an old acquaintance over his new home, and in course of time they arrived in the banquet hall. "This," he said, "is the largest banquet hall in Scotland. I can seat one hundred and eighty guests to dinner." He paused, and then added, fervently, "Heaven forbid!"

Something Sort.

"Well, so's realized his life's ambition—to live without working."
"How has he accomplished it?"
"Gotten a government job."

It is better to say, "This one thing I do," than to say, "These forty things I doable in."—Washington Gladden.

A Savings Account has a Two-Fold Benefit

A savings account in The Bank of Nova Scotia not only brings to you all the benefits of thrift and accumulated savings, but it establishes for you business relations with one of Canada's oldest and most substantial banks.

Such a relationship to a young man starting in business may prove to be one of his valuable assets.

Why not form a good banking connection by opening a savings account in one of our branches now?

EN PASSANT.

† † †

THE TRAGIC END of Lord Carnarvon has provoked a great amount of talk the whole world over. The deceased Egyptologist and explorer was the first to enter the tomb of the pharaoh Tutankhamen, in the valley of the Kings, in the pursuit of his favourite science, and it is recorded that during the explorations in or around the tomb which has been sealed up for 3500 years, he was bitten by an insect, and died of blood poisoning.

There are many superstitions people who see in this incident the fulfilment of a curse. A few weeks ago I wrote in this column on the subject of rifling tombs, and quoted the "curse" laid by Shakespeare's executors on the movers of his bones. In the back of what I am pleased to call my mind I had at the time a vague feeling that it would be a good thing for the "explorers" if nothing happened to them, as, in the event of anything untoward happening, it would easily be laid to the account of some retributive cause. Strangely enough, that is just what has come about. The leader of the exploration was bitten by an insect, and as soon as it became known people all over the world began to feel uneasy about it, and by degrees reached the stage where the announcement of a fatal termination gave them no cause for surprise; "Kismet," they said; "it is the fulfilment of fate," and wagging their heads they said meaningly "Why can't they leave the dead alone?"

† † †

AGAINST this fatalistic attitude there has arisen an attempt to return a verdict of death from natural causes. Rider Haggard says "All this business about poor Lord Carnarvon having been brought to his end by magic, is nonsense and it is not only nonsense, but dangerous nonsense. It is dangerous because it goes to swell the rising tide of superstition which at the present moment seems to be overflowing the world. Whenever we look there the new superstitions, and old ones are being revived. I don't think even in the darkest time of the Roman empire or in the Middle Ages, there was more superstition than exists at present in parts of Europe and America."

The incident which gives rise to these remarks carries us about three times farther back than what we call the "Middle Ages," into a civilisation of which we have little record. Chronological tables show these times to be "dawnings of history, disguised by traditional legends, mixed with fable." Now, it was computed by Herodotus that the pyramid of Cheops took 100,000 men 20 years to make. From the fact that Cheops himself was buried in it, we see that it was built during his lifetime. The lesser pyramids of Chephren and Mykerinos, and probably many other tombs, were prepared by their occupants, in advance, and besides this, they were dedicated to the Sun as similarly, among Mexican antiquities, the pyramidal "Houses of the Gods" (Teocallis) were dedicated. Worship was interwoven with these Chambers of the Pharaohs and Priest-Kings, and it is not beyond the scope of our modern conceptions of them to believe that these monarch-priests could, to preserve the sanctity of the tombs, give out a sort of "curse" to scare away irreverent marauders. Nor is it likely to have been beyond their zeal and ingenuity to contrive the secretion of a subtle poison in some of the articles of furniture, which, unknown to the pillager, would on contact act the part of the Mystic Avenger. We cannot undertake to say what those ancient Egyptians could, or could not do, but when we consider that the first man to enter the tomb of Tutankhamen, "got his", it makes us wonder if we know everything, especially when we find evidences of a civilisation long lost, and which we have difficulty in understanding. By a process of reasoning, we can imagine a Pharaoh, who took twenty years to build and furnish his temple-tomb laying a curse on the people, to keep it inviolate, and in the course of centuries that current scare or "curse" becoming a tradition, which eventually became swallowed in superstition.

Curses are originally intended to inspire fear, and fear is the foster-mother of superstition. Those wily Egyptians of ancient time probably knew that better than we know, and may have taken pains to lay their plans as well and truly as they did their wonderful pyramids, even going

the length of providing secret reprisals of a toxic nature and quality equal to the dimensions and calculated duration of the sanctity of the tombs.

† † †

IN THE ATTEMPT to prove other than supernatural causes we might also suggest that the tomb of Tutankhamen having been sealed for such a length of time, there may have developed at species of microbe, not met with in the outer air, or it might have been a last surviving representative of one of the old plagues of Egypt which laid Lord Carnarvon low: There were ten of them running riot in Egypt somewhere around the time that Tutankhamen was laid to rest, and there is no telling how some of their contagion might have managed to get secreted in the tomb.

If Lord Carnarvon had been washed from the deck of a ship in mid ocean it would have been just the same. The superstitious would say it was retribution, the fulfilment of a curse. You cannot change human nature, and if curses are not to be believed in, they must be cut out of religion, - a task which would make the assembly of Westminster Divines turn in their graves. Even then, and if the "Bell, Book, and Candle" anathema were relegated to past ages, there would remain that mystic fear of unseen things which mankind has always had. Rider Haggard is right; while new superstitions arise, the old ones revive.

A little insect, perhaps only a "pesky fly", flew out of a desecrated tomb, and bit a man: Probably it died in the act, but in its wake there followed a myriad of a bat-winged, monstrous superstitions, resurrected by the sound of the picks and shovels of the exploring vandals, and let loose upon a world already in the throes of the blind, groping, unquiet of spiritism.

† † †

IN THE NAME of all that is good and beautiful, slam the door of that dread place shut and come out into the green places of the earth! Let the hieroglyphic birds and beasts of ancient dynasties lie under their mountains of stone until the crack of doom: Come ye up to the hill tops, oh ye diggers of holes! and look towards the dawn: Listen to the song of the dayspring, and when your hearts are gladdened with the joy of life, read and decipher - not the curses of antiquity - but "Blessed are they" - "Rejoice, and be exceeding glad," the living words of The Sermon on the Mount.

THE LINKMAN.

AUCTION SALE

There will be sold by Public Auction at the Estate of
DUNCAN McTAVISH
Harrington East,
Tuesday, May 1st,

Eight milch cows, 11 heifers two years old 5 heifers one year old, 1 year old bull, 3 pigs, 1 fillet two years old, 1 mare seven years old, 1 express, 1 double cutter, 1 set of logging sleighs, 1 tumbler cart, 1 set of heavy harness, 1 set of single harness. 1 crank churn, 1 cooking stove, 1 box stove, 1 extension table, 1 sideboard, 1 rifle, a number of hens and many other articles.

Sale to commence at 10 a.m. sharp. Terms: \$10.00 and under cash, over that amount 9 months credit on furnishing approved joint notes. 5 per cent off for cash.

FARM FOR SALE.

FOR SALE.—Farm of 100 acres, also farm of 85 adjoining to be sold separate or together. Farm has good house with furnace and cistern, up to date buildings to accommodate 7 horses & 28 cattle, silo and all other buildings necessary. Running water for cattle all year. Farm situated about 1½ mile from Lochaber Station C.P.R., close to Church, School and Cheese-factory. Good terms to quick buyer. Apply to John T. Nesbitt, Lochaber Bay, Quebec.

FARM FOR SALE.—At Isle Aux-Chat, Ninety acres, with good bush. Apply to N. SMART, Carl ton, Quebec.

The Home Matches

The big, strong, homey matches in the bright blue box.

Different and better. Stronger and safer. Rats won't gnaw them. Withstand more moisture. Non-poisonous. When they are out they do not glow.

Fifteen cents' worth of full match value and safety all the time.

MAPLE LEAF MATCHES

The Funeral Bell.

—: in —:

Toll!—Thunders forth the bell, And silence lends it's aid, To deepen the deathly Knell; Whom for? May be some child is laid to rest, Without a stain or care, It's young life flown from earthly scenes,

Amid a mother's prayer. Toll!—Again it's funeral tone, Is wafted with the wind, To some saddened home; Whom for?

Some youth or maiden gone before, The usual span of life, A shortened journey on the earth, An end of painful strife.

Toll!—It's dismal muffled sound, Grates harshly on the ear, Reverberating around; Whom for?

A loving wife, Some faithful friend, Whose love-ties now must cease, Though passed inside, the Great Divide, God grant all rest in peace.

RYHOS—Brownsburg

† † †

FOR SALE.—Holstein year old heifers of high producing stock at Farmer's prices. Apply to F. J. Watson, Morin Heights, Argenteuil, County.

A Narrow Escape.

† † †

Thos. McCormick, of Louisa, had a miraculous escape last Monday evening when caught by the Westbound train from Montreal. Although several citizens shouted to warn him of the on-coming train, his horse bolted over the Simon crossing with the result that the engine caught the back of the cutter and threw the occupant clear, although he suffered several minor cuts and bruises.

Perfect Comfort on the Longest Tour

The "Master Six" Touring Sedan Model 23-41

This smart McLaughlin-Buick six-cylinder touring sedan offers unsurpassed comfort for country touring and city driving as well.

Long and low in appearance, it provides perfect riding ease for five passengers. Its well-knit chassis, new cantilever springs and strong frame take up the jabs and jolts of the country road.

Broad plate glass windows give a wide vision to all occupants while protecting them from chilling winds; added warmth is provided by a heater. Comfort for summer is assured by cowl ventilator and adjustable windows and windshield. The interior of the Fisher built body is finished in handsome plush with individual seats in front. Driving conveniences are assured by a longer steering column at a lower angle, complete instrument panel and longer gear shift lever.

The luggage trunk at the rear is both handsome and practical. It will carry a suitcase or small luggage as so as not to interfere with the convenience of the passengers.

There are 15 McLaughlin-Buick Models to Choose From

OBITUARY.

THE LATE MRS. SCOTT.

It is with deep regret we record the death of Margaret Anna Nicoll, eldest daughter of the late Mr. and Mrs. Thos. Nicoll, of Vide Sac, and beloved wife of Albert Scott of the Seigneurie, who passed away on Saturday last. Deceased lady had not been very strong for the past 2 years, but after an attack of La-grippe became worse and although all that medical care and skill was done, she gradually faded away. The funeral took place on Monday and was conducted by the Rev. Geo. McKinnon in the presence of a large number of sympathizing friends and relatives. Besides her sorrowing husband, she leaves 2 sisters, Mrs. Wm. Dolg and Mrs. R. Canning of Lachute and 2 brothers John Nicoll of Vide Sac and Jas. Nicoll of Galveston, Texas, to mourn her loss.

THE LATE MRS. COWAN.

There passed away on Sunday April 8th 1923, in her 88th year, Isabella, daughter of the late Francis Carson, of East Settlement and widow of the late Thomas Cowan of Beech Ridge. She leaves to mourn her loss three sons, James of Beech Ridge, Frank of Lachute, and Thomas, of Lachute Road. Her husband died 15 years ago and her daughter Mary died 11 years ago.

Deceased has lived in Beech Ridge ever since her marriage, over 60 years ago and had taught school in her younger days having been the first student, to be registered in the old McGill Normal School.

The funeral was held on Tuesday afternoon the Rev. A. G. McKinnon officiating.

The Pallbearers were Messrs. David Todd, Edward McGregor, L. M. Hooker, John Fraser, Wm. J. Rodger and John W. Funcheson.

CUSHING.

The Rev. W. H. Brokenshire, of Apple Hill, Ont., has been spending about ten days visiting old friends in Cushing.

Mr. W. Arnott, of Montreal, paid a short visit to Cushing on Tuesday of this week.

Miss Alice Davidson is spending a few days in Montreal this week.

Mrs. W. J. Warwick, of Mount Maple has been visiting her sister Mrs. Geo. Nicholls for a short time.

The Rev. Mr. Cruikshanks, of the Montreal Presbytery, occupied the pulpit of St. Mungo's Church last Sunday and will occupy it again Sunday the 15th, a large attendance is requested. From May 1st this charge will be filled for a year by the Rev. Mr. Usher.

Gentlemen having a general business knowledge to exclusively represent a large reliable Montreal Corporation in this territory dealing in Mortgages and money to loan. Experience unnecessary if you have a good clean past record. Hard worker and well acquainted locally. Preference will be given to man over thirty. Only those seeking permanent connection need apply. Full training to right man. In confidence give full particulars to Manager, Room 36, 232 St. James, Montreal.

SILVER WEDDING.

In Celebration of the twenty fifth Anniversary of the marriage of Mr. and Mrs. C. J. Stanforth a notable gathering of relatives and friends took place on Friday evening 6th. Mr. Stanforth is a very prominent man in the community, for, in addition to being a general merchant, on a large scale, he is Mayor of the Township, Sec.-Treas. of the School Board, a Justice of the Peace, ranks high in the Masonic Order, and is Warden of the County of Argenteuil.

Mrs. Stanforth is widely known for her Charitable and kindly acts, hospitality, and cordial manner, and therefore it is not surprising, that on this great occasion both she and her good husband were the recipients of very many hearty congratulations.

The Celebration took place in Stanforth's Hall which was beautifully decorated for the occasion, and the supper tables, especially, were much admired, being decorated with yellow daffodils, Tulips, carnations, and hyacinths, the tables were trimmed with silver, mauve and yellow, and lighted with twenty-five candles.

Mrs. Stanforth carried a bouquet of American Beauty roses, tied with silver ribbon.

Those assisting in receiving the guests as they arrived were: Miss Margaret Stanforth, Mr. Percy Stanforth, Mrs. G. H. Gagnon, Mrs. C. H. Winch, and Mrs. R. Padgett.

Those assisting at the Tables, the ladies being dressed in white, were: Miss Margaret Stanforth, Mr. Percy Stanforth, Miss Jennie Stanforth, Mr. Percy Stanforth, Mr. Coral Swail, Miss Margaret Rothwell, Mr. Gordon Cooke, Miss Jean Smellie, Miss Elsie Moncrieff and Mr. George Thomson.

When the guests had all been seated, Mr. Stanforth on behalf of Mrs. Stanforth and himself, made a neat speech of welcome, and was heartily applauded the guests rising and singing "For they are Jolly Good fellows."

The tables fairly "groaned" with the quantities of good things to eat, and full justice was done to them by all present.

Supper over, the Chairman and Toastmaster, Col. Joseph Seale, of Morin Heights, took up his onerous duties, which he carried out with great ability.

The following were the toasts which were interspersed with songs, music, and recitations:—

All rising and singing.

1. The King-The National Anthem.

2. The "Bride and Groom" responded to by Mr. C. J. Stanforth.

3. The Arundel School Board-Responded to by Mr. R. F. Williams, Principal and Mr. W. D. Graham.

Song by Mr. E. A. Bulley, Mrs. Bulley accompanying.

4. The Guests-Responded to by Mr. J. M. Nelson and Rev. Geo. H. Gagnon, M.A.

Recitation, Mr. Geo. Thomson.

5. Mayor and Council, responded to by Mr. W. W. Evans and Mr. Pierre Cantin.

6. The Ladies, responded to by Dr. Morrison, and Mr. Geo. Thomson.

Recitation, Mr. Geo. Thomson.

Song, Mr. E. A. Bulley.

Violin and Piano, Mr. and Mrs. D. Silvester.

"Auld Lang Syne."

GOD SAVE THE KING.

The presents which were on view, were very numerous and costly, and were greatly admired, and Mr. and Mrs. Stanforth received hearty congratulations, and the wish was universally expressed, that they might be spared to celebrate, not only their "Golden Wedding," but their "Jubilee."

Following were the guests, who were from Arundel unless otherwise shown:—

Col. and Mrs. Joseph Seale, Morin Heights; Mr. and Mrs. E. A. Bulley, Mrs. Winch, Montreal; Mr. Thomas Wilson, Rev. and Mrs. G. H. Gagnon, Rev. and Mrs. Johnson, Mr. and Mrs. W. D. Graham, Mr. J. M. Nelson, Mrs. John Thomson, Mr. Arthur Thomson, Mrs. William Thomson, Mr. and Mrs. James Riddle, Mr. and Mrs. A. B. Morrison, Mr. and Mrs. George Marshall; Mr. and Mrs. Robert Williams, Weir; Mr. and Mrs. J. W. Boyd, Mr. and Mrs. John Moncrieff, Mrs. Perry Morrison, Miss Jennie Morrison, Mr. and Mrs. Val Swails, Jr.; Mr. and Mrs. James Simon, Mr. and Mrs. W. W. Evans, Mrs. William, Smellie, Mr. and Mrs. Joseph S. Boyd, Mr. and Mrs. Thomas Graham.

Mr. Percy Stanforth, Mr. and Mrs. Roy Cooke, Mr. and Mrs. Walter Morrison, Mr. and Mrs. Joseph Scott, Mr. and Mrs. John Silvester, Mrs. Andrew Rathwell, Mrs. William Scott, Mr. R. F. Williams, Mr. James Cooke, Mr. and Mrs. Hugh Cooke, Mr. and Mrs. M. E. Davis, Mr. and Mrs. H. C. Cooke, Mr. Pierre Cantin, Weir; Mr. and Mrs. H. Loughren, Mr. and Mrs. W. H. Kerr, Mrs. William Morrison, Dr. and Mrs. William Morrison, Mr. and Mrs. David Silvester, Mont Rolland; Mr. and Mrs. Hugh Graham, Huberdeau; Mr. and Mrs. Thomas Bishop, Mr. Coral Swails, Miss Margaret Rathwell, Miss Elsie Moncrieff, Mr. George Thomson, Mr. Gordon Cooke, Miss Jean Smellie, Miss Margaret Stanforth, Miss Jennie Stanforth, Mr. R. Percy Stanforth.

Congratulations were received from the following:—Hon. Smeaton White, Montreal; Sir George and Lady Perley, Ottawa; Mr. and Mrs. Charles McBurney, Quebec; Mr. and Mrs. Harry Slater, Mr. and Mrs. T. Christie, Mr. and Mrs. John Hope, Lachute; Rev. Mr. and Mrs. F. H. Horton, Prescott; Mr. and Mrs. Thos. Raitt, Toronto; Mr. and Mrs. J. A. Pitt, New York; Mr. and Mrs. L. D. Taylor, Sault Ste. Marie; Miss McQuat, Mrs. William Wilson, Lachute; Mrs. Thomas Wilson, Miss Crissie Campbell, Miss Margaret Wilson, Miss Margaret Watson, Montreal; Mr. and Mrs. G. H. Stanforth, Lachute; Miss Carrie Morrison, Smith's Falls; Mr.

Why an Elephant is Afraid of a Mouse.

"Afraid of a mouse! S-s-s-s-s! Great big Elephant afraid of a little wee mouse!" hissed Mr. Python.

Jumbo swung his trunk savagely from side to side and strained at his chains and shackles. It was evident from the glitter in his eyes that he was getting pretty angry under Mr. Python's taunts. His keeper offered some tid-bit and tried to soothe his restlessness with a few quieting words, at the same time remarking to another attendant: "Jumbo's not feeling his best, probably a touch of indigestion." Little did the keeper suspect what was the real trouble.

"Blub, blub!" said Hippopotamus as he came up from a plunge, his stentorian voice ringing in the ears of the other animals. "Have a care, Mr. Python. You are entirely too free with your tongue this morning, and you are bound to make trouble if you don't be careful. You've been teasing someone all morning. Now, cut it out!"

"Well, well!" said Python, as he stuck out his tongue in derision. "When did you land, Old Submarine? You're so badly waterlogged that you can't think of anything original so you must come butting in with a moral lecture. I don't care a thing for your sermonizing. It's a funny thing that no one about here can take a joke good naturedly any more."

"You have a very wicked tongue in your head, Mr. Python," replied Hippopotamus, "and you are living up to your ancestral reputation of being very snaky. You carry your jokes too far and other folks can not, will not, stand for them; and although they may seem very funny to you; they may not be so funny to the other fellow. But, as to Jumbo, he is a fellow countryman of mine, so why shouldn't I defend him. That he is afraid of a mouse he does not deny, and if we but knew his story I feel sure that we should admit that he has good reasons for his fear."

"Oh, you make me sick with your moralizing," said Python. "You are all so touchy about every little thing."

"Thanks, friend Hippo," said Jumbo. "A friend in need is a friend indeed. I must confess that Python's remarks were getting under my skin even if I have a hide like a side of sole leather, as my keeper often tells me. But that is where the trouble lies, and what makes us elephants so sensitive and so easily frightened at a mouse. We seldom tell the story outside our own family; but, good friends, if you will promise not to laugh and never, never to repeat it, I will tell you why we are afraid of mice, and why we have such leathery looking hides."

"Some folks tell us that it is due to

climatic conditions and our mode of living, that we have no fur; still others say that once some disease attacked the elephant family, causing them to become bald, just like some of our keepers here in the zoo. These do not sound like reasonable explanations, for some animals from our native country have nice furry suits. But we have a superstition that has been handed down for many generations and we firmly believe it to be the very truth. Long, long ago when all elephants were wild and free they were covered with long black fur as soft as down and they were very proud of it. One especially large elephant, the leader of his herd, the grandfather of all elephants (I think his name was the same as mine), was very vain and took a deal of pride in his personal appearance and would not let other animals near him lest they disarrange his toilet. So if an insect, even a tiny fly, was to alight upon his glossy sides for an instant to rest its tired wings, swat would go his trunk to knock it off. In fact, he originated the slogan: 'Swat the Fly.' And every crawling, creeping thing that came near was apt to feel the weight of his ponderous foot. All had to suffer.

"Still everything might have been all right had it not been that one day, as he was resting in the shade of a great tree, a tiny mouse came running by, and grandfather promptly stamped it into the dust with his ever-ready and somewhat vicious forefoot. Imagine grandfather's surprise when, instead of the lifeless, shapeless mass that he had expected to see, a wrinkly, lumpy old man arose from the dust where the mouse had been and, pointing an accusing forefinger, cried in a squeaky voice, 'Vanity, vanity! Your vanity shall be your humiliation.'"

"Almost immediately grandfather's beautiful fur started to drop off and soon he was as bald as a boulder, and we have felt the humiliation ever since. We believe that the mouse was no other than the terrible enchanted Furkin; and we are afraid of mice, lest they put some other curse upon us. Now, that is the story as every mother elephant tells it to her babies in their native wild. And we believe it to be the only true explanation. Friends, I thank you!"

As the elephant finished his story, several large tears trickled down his furrowed face and splashed unheeded on the floor, but there was no one looking. Hippopotamus had again submerged and Python had coiled up for a nap in the sun, his tongue for once silent. There seemed to be a strange stillness and feeling of awe throughout the animal house; for, if you will take the trouble to find out, all animals are very superstitious and believe in fairies, and gnomes, and goblins, and everything.—B. L. Spence.

A YEAR OF GREAT INVESTMENT

Canada has much to expect of 1923 in the way of new foreign capital coming into her territory for the ordinary investment of surplus funds and to promote various industrial developments. The Dominion's popularity is increasing in the ascendancy with the United States as an outlet for surplus funds, whilst the wisdom and advisability of achieving industrial expansion by Canadian establishment is continuously being brought home to more American manufacturers. The year 1922 featured an awakening of industrial interest in the Dominion on the part of British industrialists, springing out of the gradual emersion of the British Isles from the post-war trade depression, and this will likely be followed up in 1923 by a substantial investment and industrial establishment, especially if sterling continues its upward trend towards par.

The year 1922 set up a new record for American investment in Canada. The total of Canadian bond sales in the United States was over \$261,000,000 or \$37,000,000 in excess of the previously highest figure reached in 1920. Add to this investments of a general nature other than those represented by the sale of bonds and it would not be difficult to account for well on to \$300,000,000. Only once, in 1913, has Canada received a larger amount of outside capital within a year, when the total value of Canadian bond sales in the United States and Great Britain was \$327,000,000, or approximately but \$60,000,000 more than the sales in the United States alone in 1922.

This illustrates in a very illuminating manner the change that has taken place in the currents of finance in so far as Canada is concerned, and how the reservoir of American wealth became available to Canada as soon as supplies from Britain were cut off. As an evidence of the change which has taken place, it may be noted that during the period 1908-1914 inclusive the total of Canadian bond sales in the United States was only \$173,000,000, or \$90,000,000 less than the aggregate for 1922.

Reliance in Canada's Future. This tremendous investment in Canada, on the part of the United States, has been built up upon a basis of faith

in the soundness and stability of all Dominion affairs resulting from a satisfaction in personal investigation to which the proximity of the two countries lends convenience. Reliance in the great future of Canada is unquestioned in the United States, and it is because investors or their agents there have so closely watched the trend of Canadian development that Canada is receiving their funds in such volume.

A yet more gratifying feature of American investment in Canada is that effected through the location of branch industrial plants. From judgment based upon observation during the year, in the absence of authentic statistics, the year 1922 must have been unprecedented. In this popular movement, the peculiar advantages of such establishment are more widely appreciated, the flow gathers momentum, and a conservative estimate of the number of Canadian branches of United States firms in Canada at the present time would place the number at between one thousand and twelve hundred as against a total of seven hundred in 1919. The year closed with many United States firms making inquiries for locations, and 1923 may be anticipated as yet another banner year in this form of American investment.

A Re-entry of British Capital.

All indications combine to suggest a re-entry of British capital on a large scale into Canadian development in 1923. The vanguard arrived in 1922 and there has since been a brightening of conditions in the United Kingdom. The emersion from the depression in the British Isles has been accompanied by a strong desire to strengthen trade ties with the Dominions, and material indications already evidence this as far as Canada is concerned. Not only may a greater amount of capital be invested in Canada from the British Isles this year, but the greater establishment of branch plants be looked forward to with confidence. In the opening days of the year came the announcement that three British grain brokerage houses would open branch plants in Vancouver.

Before the war the capital instrumental in fostering most Canadian development was overwhelmingly British. During the war and since, British capital has stood still and American capital increased, so that at the last computation it was estimated that the United Kingdom had about two and a half billions of dollars in Canada and the United States two billions,

making it merely a matter of time under present conditions before United States money should equal that of the British Isles and pass it in occupying the first place in Canadian development. There is no doubt but that in the readjustment of conditions, including the strengthening of sterling, British money will come back to Canada in its old volume. There is no reason to expect that United States investment will ever fall off, but the two come into good-natured competition. From the combination Canada should receive an unprecedented development.

I Was Made of This and This.

(I was made of this and this—An angel's prayer, a gypsy's kiss).

My mother bore me prayerfully And reared me sweet as a gift for God, And taught me to look shudderingly On ways my father trod.

He swore round oaths and drank black gin; He held four things to his heart's delight: The hills, the road, his violin, An open sky at night.

He told strange tales that were never true (They buried him long and long ago!) It always seemed the things he knew Were things it was wrong to know.

He scoffed at walls and a garden plot; He held three things to his heart's desire: The river's song, an open spot, The smoke from a driftwood fire.

I grieve for my mother's every tear, I weep for the hurt in my mother's breast, But ever and ever at bud o' year I love my father best.

—Gertrude Robinson Ross.

A Magnanimous Stranger.

An interesting incident in connection with Phillips Brooks is related by Rev. W. S. Rainford in his autobiography, "The Story of a Varied Life."

Many years ago, at a time when Rainford was still unknown, but when Brooks was at the very height of his career, Rainford had to deliver a speech before a large audience in Boston. For some reason, he was fagged out at the time and had a very bad headache; and when he got on his feet, he declared, "the world went black"; he could see nothing, neither his notes nor the audience; he could scarcely utter a word, much less fill up intelligently the twenty-five minutes allotted to him; he "mumbled and stumbled" for a moment or two, and then sat down in a cold sweat, his speech a dismal failure.

The greater part of the audience, one may imagine, was ready to jeer, but at least one man had the big-heartedness to try to encourage instead of to stifle the young preacher. Putting his hand gently on Rainford's shoulder, Bishop Phillips Brooks asked in a kindly voice, "Will you preach for me next Sunday morning?" That was Rainford's first meeting with Brooks, but it was the beginning of a devotion that was to be lifelong.

Tips on Tapioca.

What do you know about tapioca? Well, it is round; it is made of—of—Let Mr. Charles W. Mead help us out: In Natural History he describes how the Indians of Brazil manufacture the starchy, jellylike globules.

The Indian woman, he says, takes a large piece of bitter cassava root in both hands and rubs it back and forth on a board studded with hundreds of sharp pebbles until the root is reduced to pulp. When she has grated a sufficient quantity she presses as much water out of it as possible. For that purpose she uses as a press a long, narrow tube of basketwork called a tipiti, with a loop at either end. She forces the pulp into the press, which she then hangs up by one of the loops, through the lower loop she inserts a long, stout pole, which she runs under some convenient object, which serves as a fulcrum. Then she sits on the free end of the pole, and her weight stretches the press and forces the liquid through the interstices of the basketwork. The liquid is caught in a pottery vessel and is made into cassareep, the favorite condiment of the South American Indian.

The wet mass is taken from the press and spread on a large flat dish of pottery with a raised rim; under the dish a fire is built. If stirred rapidly, the preparation will not cake into large masses but will quickly agglomerate into small, irregular pellets, which are the tapioca of commerce.

BABY CHICKS

25 of them delivered free to every person who registers for Shaw's Goldbelt Poultry Course for Home Study. 234 people made the right start last year. You may have some of their testimonials. Write Shaw School, Poultry Department, 46 Bloor St. W., Toronto.

Pratts Buttermilk Baby Chick Food

—the original "Baby Food for Baby Chicks." No other food is required for the first few weeks. "Pratts" contains everything needed to build bone, muscle and feathers. It helps to prevent the deadly White Diarrhoea—insures rapid gain in strength and weight—costs about 2c per chick for 6 weeks' feeding.

PRATTS 51st YEAR OF SERVICE

The Canadian Pacific Railway

WILL FIND

Farm Help for Eastern Farmers

TO BE OF SERVICE to Eastern Canadian Farmers and help to meet their needs in securing competent farm help, the Canadian Pacific Railway is prepared to utilize its widespread organization to provide such help from a number of countries.

The CANADIAN PACIFIC Railway will now receive and arrange to fill applications for male and female farm help to be supplied from Great Britain, Belgium, Holland, Denmark, Switzerland and Norway, in all of which countries the Company has representatives who have farmed in and are familiar with Eastern Canadian conditions and who are now in touch with such men and women ready and anxious to come to Canada.

THE GOVERNMENTS of the countries above mentioned have expressed their willingness to aid the immigration of this class of their peoples. In order to fill such applications satisfactorily and bring the help to the farmer at the proper time and with a clear understanding of the requirements and obligations of each, a printed "Application for Help" form has been prepared which can be obtained from any of the offices listed below.

The Company will make no charge to the farmer for this service nor will the farmer be required to make any cash advance whatsoever towards the travelling expenses of his help to the nearest railway station. The information necessarily asked for in these application forms, which will be held in strictest confidence, covers the following points:—the kind of help wanted—male or female—married or unmarried; date required and for how long; nationality desired; monthly wages offered; kind of work offered, etc.

Surnames and Their Origin

GARNETT

Variation—Garnett.
Racial Origin—Welsh.
Source—A local name.

Here is a family name which, instinctively, you probably associate with the name of a semi-precious stone.

But the association of ideas here is misleading. That the family name could have come from the name of the stone is a possibility. All of the available records go to show, however, that it seldom, if ever, actually was a development of it.

For if you trace the name back a bit you come across the spelling "Garnedd" instead of Garnett. If you trace it still further back you are likely to run across the spelling "Garnedd" which (if you know that it is Welsh) more readily associates itself with the ancient Celtic word "cairn," indicating a pile of stones, or more specifically a structure of stone which was a Druid temple.

This would naturally be a local name found in almost any spot in England, or particularly of Wales, in which such ruins remained. It was exactly the sort of place name likely to become the surname of anybody living near it.

HUNGERFORD

Racial Origin—English.
Source—A locality.

Here is a family name which traces back to a given name through a local name. In other words, there was first a given name, from which was formed a local name. Then, at a later period when the given name had become obsolete, the local name was developed into a family name, being first a surname indicating place of residence.

The place name is the same as the modern family name, being one of those old English place names so ample of pronunciation that it has not changed through the course of centuries. The place is a market town in Berkshire, up the River Kennet.

From the ending in "ford" you might have guessed that it was a community on the bank of some river or stream.

Hungerford was originally "Hunger's Ford," and to get at the reason for the place being so named you have to delve back to that period in English history when the Danish hosts invaded Britain. One of the most famous of the Danish chieftains was named Hunger. But few who bear this name realize that, indirectly, they are named after a famous Danish leader who lived more than a thousand years ago.

MARCH WEATHER DANGEROUS TO BABY

Our Canadian March weather—one day bright, but sloppy, the next blustery and cold—is extremely hard on children. Conditions make it necessary for the mothers to keep the little ones indoors. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against these colds and to keep the baby well till the better, brighter days come along, a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. The Tablets are a mild but thorough laxative which never fail to regulate the stomach and bowels and thus they relieve colds and simple fevers and keep the baby fit. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Vegetation and Floods.

Attention has been invited to what is regarded as an important illustration of the sure results of deforestation in the Appalachians. Near a town in Tennessee the roasting and smelting of copper ores have entirely destroyed the vegetation over a considerable area and left the ground perfectly bare. Consequent surface erosion is rapidly removing the soil, the slopes are scarred with gullies, the waste from the steep slopes has buried the former surface along the streamlets, so that neither slope nor narrow flood plain is of any value for agriculture or grazing. Floods on these streams rise higher and more rapidly than in former times, while in dry seasons springs once perennial go dry and others almost cease flowing.

In the Wrong Room.

He entered the crowded room, took out a bundle of notes, and began to address the meeting.

The chairman made repeated efforts to interrupt the speaker, but he refused to be called to order. His oration lasted half an hour.

"Have you quite finished, sir?" the chairman asked.

"Yes—quite; but I defy you to deny the truth of my statements," he retorted.

"I have no wish to," said the chairman. "The gas company, of the management of which you complain, is holding its meeting in the next room. This is the Vegetarian Society."

"Cascarets" 10c

Best Bowel Laxative
When Bilious,
Constipated

To clean out your bowels without cramping or overacting, take Cascarets. Sick headache, biliousness, gases, indigestion, sour, upset stomach, and all such distress gone by morning. Nicest physics on earth for grown-ups and children. 10c a box. Taste like candy.

As You Were.

The young had just been popped, and the young colored belle was blushing a most delicate violet shade.

"Jeff," she murmured, "does you really love me or does you 'jes' think you does?"

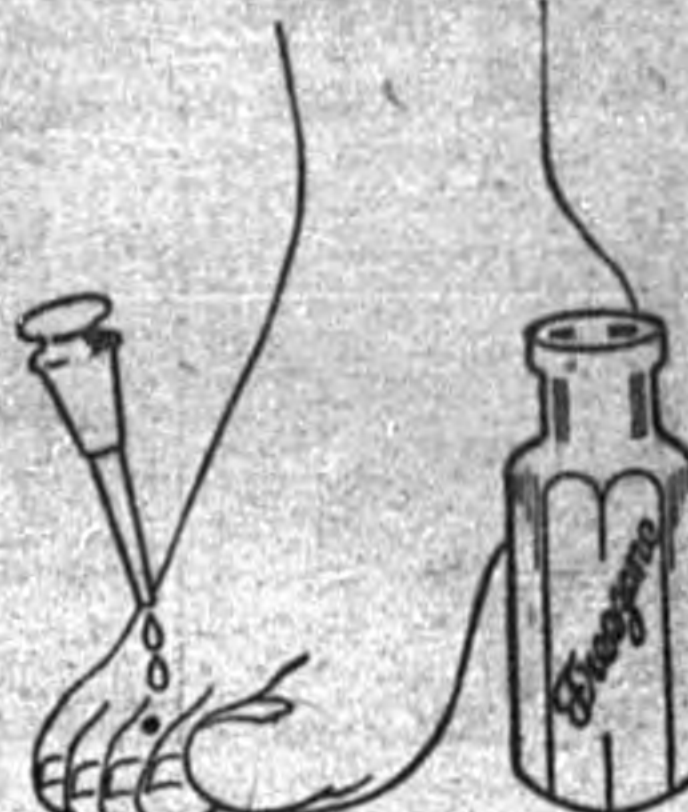

"Yes, indeed, Mandy," he replied. "Ah really loves you. Ah ain't done no thinkin' yet."

A Hint to Hens.

An Ottawa hen laid an egg daily for 107 days. There's a saying in every henhouse that an egg a day keeps the hatchet away.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! The teacher could stand it no longer. "Freezone," she called, "if you can get along without that gum for a while I would enjoy it."

Power Lawn Mower.

An inventor has developed a power operated lawn mower weighing only 125 pounds and which can be guided like a hand machine where cutting is difficult.

Minard's Liniment for sale everywhere

MRS. LEWIN SAYS IT'S WORTH \$1,000

Toronto Lady Values Tanlac Highly, Declaring It Ended Stomach Trouble—Gains Nine Lbs.

"I wouldn't take a thousand dollars for the good Tanlac has done me, for I would have given that much before I took this wonderful treatment to feel the way I do now," was the positive statement made the other day by Mrs. Matilda Lewin, 12 Strange St., Toronto, Ont.

"I suffered with stomach trouble, general run-down condition, and my nerves were so excited they nearly drove me wild. I ate scarcely enough to keep going, was dreadfully thin and weak, and often had to give up my housework to avoid a breakdown. Gas on my stomach bloated me till I could hardly breathe, I had to rush to the window for air, and seldom got a good night's sleep."

"If I live to be a hundred years old I will always bless the day I started the Tanlac treatment. I have gained nine pounds, am free of indigestion, nervousness and sleeplessness, and my housework is like play. Tanlac is simply grand."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

"Capable Fruit."

A young Irishman, shortly after coming to this country, was stopping with a friend of his boyhood now living in New York. One day the friend took him down to have a look at Washington market. Passing a fruitstand, they saw some grapefruit, which the new arrival's friend said were oranges.

"My, my," said the other, "but they're big fellows! I'll venture to say, now, it wouldn't take many of them to make a dozen."

How to Prevent Biliousness

Doctors warn against remedies containing powerful drugs and alcohol. "The Extract of Roots," long known as Mother Seigel's Curative Syrup, has no dope or strong ingredients; it cures away indigestion, biliousness and constipation. Can be had at any drug store. Get the genuine. 50c. and \$1.00 Bottles.

Sloan's

Keep it handy for bruises-strains

Sprains—bruises—painful turned ankles—stiff, sore muscles—no family can afford them.

That is why millions keep Sloan's handy.

You will soon find Sloan's is more useful than any other item in your medicine cabinet.

It breaks up the congestion that causes the pain.

Use Sloan's to protect you from pain as you would use an antiseptic to prevent infection. At your druggist's.

Made in Canada

Sloan's Liniment—kills pain!

For rheumatism, bruises, strains, chest colds

Wins Story Contest

Miss Jean McIlwraith, of Burlington, Ont., whose story, "The Little Admiral," has won a \$500 prize in a competition conducted by Holder and Stoughton. The story is based on an actual fact in the days of the conquest of Quebec.

MOTHER! MOVE CHILD'S BOWELS

"California Fig Syrup" is Child's Best Laxative

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little stomach is upset, tongue coated, or if your child is cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again. Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful to-day saves a sick child to-morrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Railway Seismographs.

An indication of the swift progress of the Japanese mind in practical science is afforded by Dr. Omori's report on the measurement of the vibrations of railway cars by means of seismographs. The primary purpose of the seismograph is to measure the oscillations of earthquakes. Japanese engineers use it for determining the proper balance of locomotives and the state of the permanent way on railways. Many practical advantages in the saving of fuel and the detection of faults in construction have thus resulted.

PUT STOMACH IN

ORDER AT ONCE

"Pape's Diapepsin" for Gas, Indigestion or Sour Stomach

Instantly stomach corrected! You never feel the slightest distress from indigestion or a sour, acid, gassy stomach, after you eat a tablet of "Pape's Diapepsin." The moment it reaches the stomach all sourness, flatulence, heartburn, gases, palpitation and pain disappear. Druggists guarantee each package to correct digestion at once. Ebb your stomach trouble for a few cents.

Hindus Have Many Castes.

The Hindus, who enormously outnumber all the rest of the population of India, are divided up into a multitude of castes, religiously separated from one another. In whatever caste a man is born, in that caste he remains until he dies.

BEFORE MY BABY CAME

I Was Greatly Benefited by Taking Lydia E. Pinkham's Vegetable Compound

Sydenham, Ont.—"I took your medicine before my baby was born, and it was a great help to me as I was very poorly until I had started to take it. I just felt as though I was tired out all the time and would have weak, faint spells. My nerves would bother me until I could get little rest, night or day. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and I only took a few bottles and it helped me wonderfully. I would recommend it to any woman. I am doing what I can to recommend this good medicine. I will lend that little book you sent me to any one I can help. You can with the greatest of pleasure use my name in regard to the Vegetable Compound if it will help others take it."—Mrs. HARVEY MILLIGAN, Sydenham, Ont.

It is remarkable how many cases have been reported similar to this one. Many women are poorly at such times and get into a weakened, run-down condition, when it is essential to the mother, as well as the child, that her strength be kept up.

Lydia E. Pinkham's Vegetable Compound is an excellent tonic for the mother at this time. It is prepared from medicinal roots and herbs, and does not contain any harmful drugs. It may be taken in safety by the nursing mother.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Genuine

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacturers of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

WHY MANY WOMEN SUFFER IN SILENCE

Do Not Realize That Their Trouble Is Due to Impure Blood.

A woman needs a blood building medicine regularly just because she is a woman. From maturity to middle life the health of every woman depends upon her blood. If her blood is poor she is weak, languid, pale and nervous. If the blood supply is irregular she suffers from headaches and backaches, and some women have grown to expect this suffering and to bear it in silence. They do not realize that if the blood supply is kept rich and pure, their troubles will disappear, but such is the case. In every woman's life a tonic blood-enriching medicine is needed and for this purpose nothing can help them so much as Dr. Williams' Pink Pills, which act directly on the blood, furnishing the elements necessary to make it rich and pure. Mrs. S. J. Watts, Kingston, Ont., gives her experience with this medicine as follows:—"My first experience with Dr. Williams' Pink Pills was while attending the Collegiate Institute at about the age of seventeen. I became very much run down, and could not go up stairs without resting half way. Finally I had to quit school and notwithstanding all that was done for me there were no signs of improvement until after I had begun using Dr. Williams' Pink Pills, under the use of this medicine I became well and strong. My next experience with this medicine was some years after I was married. After my baby boy was born I did not gain up as I should, so I at once started taking Dr. Williams' Pink Pills again. I took them all the time I was nursing baby, and you should have seen what a lovely, fat, healthy boy he was, and I was strong once more. Whenever I feel a bit run down Dr. Williams' Pink Pills are my tonic and I strongly recommend them to growing girls and all women."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

CANADA
PROVINCE OF QUEBEC
DISTRICT OF TERREBONNE
No. 2263

Notice is hereby given that this twenty-fourth day of March, one thousand nine hundred and twenty-two, there has been lodged in the office of the Prothonotary of the Superior Court, in the district of Terrebonne, a deed executed before David Stoches, notary, on the fourth of November, one thousand nine hundred and two, between Alphonse Alarie, farmer, of the same place, and Arthur Alarie, farmer, of the same place, being a sale by the said Alphonse Alarie, to the said Arthur Alarie, of the following immovables: "10. A farm situated at St. Jean, known at the plan and book of reference of the said parish, under number one hundred and thirty-seven (No. 137) with house and other buildings, three hundred and thirty (330). A lot of wood land situated in the Parish of Ste-Therese de Blainville, being part of number eight hundred and ninety-two, of the plan and book of reference of the said parish, Ste-Therese de Blainville, measuring eight perches and one of length, with width, on twenty acres of length, joining on the south at Filas Desjardins, on the north, to Thomas

Chartrand, on the west to Alfred Alarie, and on the east to Francis Giroux, representing Gilbert Courcelles", and possessed by the said Arthur Alarie, as proprietor for the three years now last past; and all persons who claim any privilege or hypothec upon the immovables immediately before the registration of the said deed by which the said lot was acquired by the said Arthur Alarie, are hereby notified that application will be made to the said Court of the district of Terrebonne, at Ste-Scholastique, the seventh of May, one thousand nine hundred and twenty-three, at ten o'clock in the forenoon, for the judgment of confirmation of title; and that unless their claims are such as the registrar is bound by the provisions of the Code of Civil Procedure to include in his certificate to be filed in this case, they are hereby required to serve their oppositions in writing, and file the same in the office of the said prothonotary, within six days after the said day in default of which they will be forever precluded from the right of so doing.
Ste-Scholastique March 24th, 1923.

the guest of her aunt, Mrs. W. Byrne.

Mr. and Mrs. W. Bradshaw are
spending a few days in Montreal with
her daughter Mrs. G. Clerihue.

Mrs. Harold Gill and family have
returned from Huberdeau, where they
spent the Easter holidays with her
parents.

Miss Vera Gauley spent the Easter
holidays here with her parents, Mr.
and Mrs. Jno. Gauley. She is attending
their High School in Montreal.

THE LATE MISS TRAINOR.

The funeral of the late Miss Mary
A. Trainor who passed away in the
Royal Victoria Hospital Montreal, after
weeks of intense suffering from
blood poisoning, took place from her
late residence here, to the Roman
Catholic Church, on Saturday after-
noon, March 31st. She was buried in
the R. C. Cemetery in The Bay. She
leaves to mourn her loss one brother:
Mr. M. Trainor and family.

THE LATE MRS. MORROW.

The funeral of the late Mrs. Geo.
Morrow, Sr. took place on Saturday
afternoon, March 31st, from her late
residence to St. Matthews Church, and
was very largely attended. The late
Mrs. Morrow had been in poor health
for some time, but was very patient
in her sufferings. She was a devoted
mother and one who rarely left her
home, and will be greatly missed by
her family.

We extend our heartfelt sympathy
to them. Four of her sons were her
pallbearers, Fred, Tom, Dand and
Willie. Her eldest son George resides
in Albert. Two daughters also are
left Mrs. Norton of Montreal, and
Miss Edna at home. The funeral service
was conducted by Rev. Mr. Ellis,
and she was laid to rest beside her
late husband in the English Church
cemetery, and her eldest daughter
Alice, who had passed away some
years ago. The floral offerings were
numerous and beautiful.

PUBLIC NOTICE is hereby given
that the undermentioned LANDS and
TENEMENTS have been seized, and
be sold at the respective times and
places mentioned below.

FIERI FACIAS DE BONIS ET
DE TERRIS.
Superior Court.

Canada } The Pack of
Provinces of Quebec } Nova Scotia;
District of Montreal } plaintiff: vs
No. 722 Hugh Leber, defendant.

As belonging to the said defendant,
the following immovables, namely:
1. A part of the lot of land known
under the number one hundred and
eighteen (118) of the official plan
and book of reference of the parish
of Saint-Jerome, said part measuring
two arpents in width by a depth
of nine arpents, English measure-
ments and more or less, and bound-
ed as follows: to the north, in front,
by the public road, in rear to the
south, by the Canadian Northern
Railway, on one side, to the east, by
the Canadian Pacific Railway and on
the other side, to the west, by the
number one hundred and eighteen
(118) of the said official plan and
book of reference.

2. That part of lot No. 118 of the
aforesaid official plan and book of
reference, said part being situated at
the north extremity of the lot No. 118
and which comprises that part or-
dinarily flooded in the spring; and
containing a superficies of about one
arpent and a half English measure-
ments, being about 150 feet in width
by 340 feet in depth. Said depth to
be measured from the line of the Canadian
Pacific Railway. That part of lot is
bounded as follows: to the east by the
Canadian Pacific Railway, to the north
by the lot No. 197, to the south and
west by the residue of the said lot.
To be deducted therefrom a certain
strip of land 40 feet wide, English
measurement, at the west extremity
of said lot, which was reserved by the
author of the defendant.

To be held at the door of the catho-
lic church in the town of Saint-Jerome,
district of Terrebonne, the SEC-
OND day of MAY, one thousand nine
hundred and twenty three, at TEN o'
clock in the forenoon. (Standard time)

Canada } La Con pag-
Province of Quebec } ne de Bois
District of Terrebonne } de la Riviere
Perdue, plaintiff: vs Canadian
Whiting Co., Ltd. defendant

As belonging to the said defendant,
to wit:

A piece of land measuring about
three arpents in width by three ar-
pents in depth, more or less, com-
mencing at a fence located at about
eight arpents from the public road,
running towards the depth of the land
situate at about two arpents from
the Adamson line and at the same
distance or thereabouts from that
of John Morrow, on the opposite side;
the said piece of land to be taken out
of the numbers twenty four-A (24-A)
and twenty three six (23-C) in the
seventh range of the township of
Wentworth, on the official plan and
book of reference of the said town-
ship of Wentworth, in the county of
Argenteuil, included in the present
sale a right of passage commencing
at the public road to communicate
with the said piece of land; included
also another right of passage for the
use of the defendant company, to be
taken commencing at a certain point
in the land acquired to communicate
with the land of Adamson, as such
right of passage exists and is present-
ly used by the company and the ex-
clusive and irrevocable right of ex-
ploitation for 99 years, for the benefit
of the defendant company, the white or
fire clay lying in the lake situate on
the lot known and designated on the
official plan and book of reference
of the said township of Wentworth,
as being the lot No. 24-A (twenty
four-A), in the seventh range of the
said township of Wentworth, subject
to the terms of an agreement regis-
tered by memorial at the Registry of-
fice of the county of Argenteuil, un-
der the number 34,000, and all other
rights appertaining to the said de-
fendant company and included in the
said agreement, with all the machin-
eries fixed used for the exploitation
of the said Canadian Whiting Co. Ltd.
in and with the buildings thereon
erected.

Report of the Illustration Stations at

Lachute, Que., for the year 1922.

Operator, E. S. Smith.

When the Illustration Station was established on the farm of Mr. E. S. Smith at Lachute five years ago, a four-year rotation was laid out. The soil is a sandy loam, and was badly infested with couch grass. Hence it was only with much labour that it was possible to produce clean crops of corn. The method now followed in preparing the land for the hood crop is to plough shallow, soon after the hay crop is taken off, roll, disc harrow and harrow sufficient to make a fine surface and to keep down all plant growth until autumn. Since the establishment of this station a number of varieties of corn such as Golden Glow, Wisconsin No. 7, Long-fellow and Leaming have been grown for ensilage purposes; of these varieties Leaming was Mr. Smith's choice.

The following table gives the results of the season's work:

"A" Oats, Banner and seeder, 40 1/2

bush yield at cost of 41c.

"B" Corn, Fodder, 12 1/2 tons yield

at cost of \$2.44.

"C" Corn, Ensilage, 12 1/2 tons yield

at cost of \$2.35.

"D" Pasture.

"E" Oats, Banner, 47 bush at cost

35c.

It will be noted that both fields "A" and "D" were in oats this year. This was due to the grass and clover in field "D" winter-killing, otherwise the crop would have been in clover hay. This field was ploughed shallow in the spring and on May 6th oats were seeded alone, and on August 3rd a forty-seven bushel crop was harvested. The land was then ploughed as soon as possible and seeded to fall rye and sweet clover on September 6th. This crop will be utilized for hay or pastured in 1923. Both crops looked very promising in the fall.

W. L. Chauvin, Supervisor.

Lost.—Between Lachute and Brownsburg, a light Rain Coat. Finder please leave same at Watchman Office.

LOCAL NEWS.

Mr. and Mrs. A. Bishop spent Tuesday in Montreal.

Mrs. Harry McIntyre is spending this week in Montreal.

Miss Germain Lemay spent this week visiting friends in Montreal.

Miss Edith Scott of Montreal is spending this week with Mrs. Mackie.

Mrs. Andrew Elliott spent last week with friends in Notre Dame de Grace.

Mr. Percy Sanford, of Montreal, was the week-end guest of Mrs. A. McPaul.

Mr. Reg. Henry, of McGill University, was the week-end guest of Mrs. Geo. Christie.

Mr. Robt. Barron and Miss Catherine Barron, of Montreal, were week-end visitors in town.

Mr. R. Harder, of Hamilton, was a welcome guest of Mr. W. Houston on Wednesday last.

Mr. Melville Stewart, of Toronto, was the guest of his mother Mrs. C. C. Stewart this week.

Rev. A. Mathews is in Montreal this week, attending the Wesleyan College Anniversary Meeting.

Mr. Wm. and Andrew Elliott attended the annual meeting of the Diocesan Synod in Montreal last week.

Mrs. W. Perry and infant, of Vancouver, are guests of Mrs. K. Hamilton this week. Mrs. Massie, of Montreal, was a week-end guest.

Miss Sadie Baldwin, who has been spending the winter with her father and other relatives, left for her home in Nanton, Alberta, on Saturday.

COAL.—Think how severe this winter has been and prepare early for the next by ordering your coal from T. McOuat & Son, Lachute Mills.

Congratulations are extended to Mr. A. O. Lloyd who won the "Joseph Anderson" prize in the Presbyterian College this year, for proficiency in the English Bible.

Mrs. K. Massiah has returned home after spending the winter in Montreal and Ottawa. Mr. Bert Massiah and Mr. J. Lockwood, of Montreal, were week-end visitors in town.

Mrs. D. A. McIntyre, of New York, who was called home by the death of her sister Mrs. Horace Davis, of St. Andrews East, is the guest of Mrs. Robt. McIntyre this week.

Mrs. Jos. Bernier was in Montreal, on Thursday and Friday of last week, at the Windsor Hotel as the guest of her sister Mrs. Elleen Burns of New York, who was in the city on a short visit.

A very enjoyable evening was spent by a party of the young folks, when on the 10th of April, the two Methodist C.G.I.T. groups, entertained their friends at a taffy party in the Sunday School room.

Mrs. Ducheneau, (next door to Filion's Bakery), invites the Ladies to her Spring Opening of Hats, Underwear, Dress goods, and everything pertaining to Women's wear. Call and inspect her Goods.

The many friends of Mr. Stirling Pollock, will be pleased to learn he has been transferred from Montreal to be Manager of the Dominion Bank at Oshawa, Ont. He was the guest of his parents Mr. and Mrs. Hugh Pollock over the week-end.

The annual meeting of the Ladies Aid Society of the Methodist Church was held last Thursday at the home of Mrs. Wm. Miller.

The Treasurer reported a very successful year. The Election of officers returned Mrs. M. Jones President. Mrs. J. D. Campbell Treasurer. Mrs. Drysdale Vice-Pres. Mrs. E. S. Morrison Sec'y. This live Society of Ladies are full of plans for the improvement of Church and Parsonage. Mrs. Miller served tea and a pleasant social hour was spent.

MORIN HEIGHTS.

Mr. and Mrs. Lackey left for Montreal Sunday evening.

Mr. Bonchard, Station Agent left for a two weeks vacation accompanied by his family.

Rev. I. H. Lackey and Mr. Norman Rogers attended the Diocesan Synod meeting in Montreal last week.

A Committee was elected towards fencing and otherwise arranging for improvements of Trinity Church Cemetery.

The members of the W. A. and friends met on Friday evening to welcome home Miss M. J. Jeckill after a six weeks visit in Montreal.

At Trinity Church Vestry meeting, at which the various officers were all re-elected, the C.W.'s report showed funds in good shape with marks of progress.

A number of the citizens under direction of Mr. J. E. Syvret are putting on an entertainment Saturday, in Davis Hall, proceeds towards cemetery fund.

ST. ANDREWS EAST

Mr. and Mrs. Halsey were among the visitors to Montreal this week.

Miss Mabel Rodger was the guest of Mrs. C. A. Hyde over Sunday.

Miss Lizzie Hendrie spent a few days in the city since the beginning of the month.

The Literary Club held their meeting at the home of Miss Davis on Tuesday evening.

The Weekly Cottage Prayer meeting was held at the home of Miss Cauton on Thursday evening.

Mrs. J. Burgess has taken over Mrs. Lamb's class in the Sunday School during her absence on holiday.

Rev. John Burgess attended Presbytery at Montreal, on Tuesday, and returned on Wednesday evening.

Heartfelt sympathy is extended to Mr. Horace Davis, and the Simpson family in their sad bereavement.

The Choir practice will be held at the home of Mr. Thomas Webster, Leader, on Saturday evening at 8 o'clock.

Miss Tita Wales has gone back to Beauharnois, for a short visit; and Miss Evelyn Wales has returned to Montreal.

Public service will be conducted in the Presbyterian Church, on Sunday, April 22nd, at 11 a.m. and 7:30 p.m. All are cordially invited. The Pastor, Rev. J. Burgess, will preach at both services. "O that men would praise the Lord for His Goodness."

BRIDGE BETWEEN HAWKESBURY AND GRENVILLE.

An important delegation in connection with the erection of an inter-provincial Bridge between Hawkesbury and Grenville, had an interview, Saturday last, in Montreal, with Prime Minister Taschereau and Hon. H. Mercer, Minister of Lands and Forests.

The delegation was presented by Sir Lomer Gouin representing Hon. Chas. Stewart, Minister of the Interior and our Federal Member.

From the arrangements proposed, the Federal Government will pay two-thirds; and the Provincial Governments of Quebec and Ontario will complete the balance. The approximate cost for the construction of that bridge, will be of about \$150,000.

It is understood that this Bridge is necessary for the development of the County of Argenteuil. It will be of a great utility not only for the commerce, but also for the tourists who come to visit this Province for its picturesque region.

It will be the first Bridge on the Ottawa River, between the City thus named and Perrot Island.

The delegation was composed of: Notary Z. N. Raymond, L. J. Legault, Advocate, Lachute; W. George Rodger, from St. Andrews East; Geo. Dansereau, Dr. MacKay, Macf. Pridham, of Grenville; Mr. Lawlor, Advocate and Dr. Pattee, of Hawkesbury. The delegates declared that they obtained quite a favourable answer.

CHURCH NOTES.

The I.O.O.F. will attend Divine Service at the Methodist Church, on Sunday morning next at 10:30.

Methodist Church Services for Sunday next will be conducted by the Pastor as follows: Lachute at 10:30, Annual Sermon to Oddfellows Laurentian Lodge No. 14. Evening Service at 7 p.m., Brownsburg Sunday School at 2 p.m., Public Worship at 3 p.m. You will receive a hearty welcome.

Presbyterian Church services will be held next Sunday, April 22nd, as follows:—Rev. A. George MacKinnon will conduct the services in Lachute at 11 a.m., and 7 p.m., and in Thomas' Gore at 3 p.m. Mr. A. O. Lloyd, the assistant, will conduct the services in Upper Lachute at 11 a.m., in East Settlement at 3 p.m. and in Brownsburg at 7 p.m.

At the Convocation and closing exercises of the Presbyterian College in Montreal, on Tuesday evening, April 17th, Rev. J. E. MacLeod, D.D., was present and occupied a seat on the platform as a member of the college board. In the absence of Rev. Dr. Hanson, moderator of Presbytery, Rev. Mr. MacKinnon was called on to officiate in licensing the members of the graduating class in theology, to preach the gospel.

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Question:—The opinion prevails in some parts of Canada that hogs of the bacon type are more expensive to grow than those of thick type. What do official experiments show in this regard? How do the different breeds compare in the production of exportable bacon sides?

Answer:—An experiment was carried on at the Central Experimental Farm at Ottawa in 1921, and recorded in the Report of the Animal Husbandry Division of the Experimental Farm for the year ending March 31, 1922, to compare pure-bred Yorkshires, Berkshires, and cross-breeds from these two breeds as economical producers of bacon. Four lots of hogs were used. The number of the hogs in the experiment consisted of two pens of cross-breeds, eight hogs in each, six hogs of Berkshires and seven Yorkshires. The experiment was carried on for 119 days with the exception of the Yorkshires which were fed for 133 days. Individual weights of pens were taken at the commencement of the experiment, at the end of each thirty-day period, and at the end of the experiment.

The food consisted of mixed grains, chopped, tankage and skim milk. The average daily gain was 1.29 pounds and 1.28 pounds respectively for the cross-bred pens, 1.11 pounds for the Berkshires and .98 pound for the Yorkshires. The average quantities of meat eaten per pound of gain was 2.52 and 2.59 for the cross-breeds, 2.51 for the Berkshires, and 2.42 for the Yorkshires. The amount of milk used per pound of gain was 5.66 and 5.68 respectively for the cross-breeds, 6.08 for the Berkshires, and 5.5 for the Yorkshires. The total feed per pound of gain was 8.14 and 4.83 cents for the cross-breeds, 4.95 cents for the Berkshires, and 4.69 cents for the Yorkshires. This shows that cross-bred swine are capable of making the maximum daily gain with the minimum of food consumed as compared with the Berkshire lot. It will be observed that the Yorkshires made the most economical gain of the four lots being fed, followed by one lot of the cross-breeds, the Berkshire lot, and the other lot of cross-breeds in the order named.

At the conclusion of the experiment the hogs were slaughtered and their sides compared from the standpoint of the Wilshire side type. The Berkshires were found to yield sides of the required weight, averaging 50 to 55 pounds a side, but they did not possess sufficient length or uniformity of fleshing to answer the bacon requirements. The cross-bred lot yielded sides averaging between 60 and 65 pounds. The sides were longer and otherwise superior to the Berkshires for manufacturing into Wilshire sides. The Yorkshires lot showed a marked superiority both in quality of fleshing and the uniformity with which the fat was distributed along the back and sides. Both from the standpoint of economy of feeding and quality of the sides, the Yorkshires surpassed either of the other lots.

Question:—Is it more profitable to allow fattening hogs to run at pasture or to supply grain feed in their pens?

Answer:—Much depends on the quality of the pasture. If it consists of luxuriant clover, it is, as a rule, more profitable to allow the hogs their

liberty, more especially during the early part of the fattening period. When this is done considerable labor is saved. As a rule, however, slightly better gains are secured when the hogs are housed. In an experiment conducted at the Central Farm at Ottawa in 1921 hogs fed at pasture made greater gains than those fed inside. The outside hogs were slightly older than the others. Twelve hogs were fed outside and ten in the piggery. The experiment was conducted for sixty days. Both received a mixture of chop and skim milk. The average daily gain made by the hogs on the pasture was 1.38 pounds and for those in the piggery 1.30 pounds. The quantity of meal eaten per pound of gain was 1.83 for those pastured and 1.85 for those fed inside. The quantity of milk consumed by the different lots per pound of gain was 5.83 for those on pasture and 4.75 for those enclosed. The cost of the feed per day per head was 6.34 cents for those on pasture and 5.05 for those in the piggery. The total feed cost per pound for the two lots was almost identical being 4.6 per pound of gain for those on pasture and 4.57 cents for those to whom the grain feed was carried. During the sixty days the enclosed hogs were given 950 pounds of clover.

Question:—Have there been any official experiments conducted to determine the value of the Bang system of tuberculosis control in cattle?

Answer:—The Central Experimental Farm at Ottawa carried on a segregated herd of reacting cattle for about five years. An account of the experience is contained in the Interim Report of the Dominion Animal Husbandman for the year ending March 31, 1922. In December, 1916, a number of the best cows of the main dairy herd that reacted to the tuberculin test were removed to a barn on an adjoining farm. During the following four years other reactors of high type were added to the herd. The cattle were housed and cared for in practically the same manner as the main herd at the farm. As the calves in the segregated herd were born they were removed to the main barn and many of them saved for future use. Out of 80 calves born 44 healthy specimens have been saved. Twenty-six of this number have been retained in the breeding herd and 19 sold. From time to time the cows in the Bang herd were slaughtered and examined. There was a decided lack of uniformity in the conditions found. Animals long in the herd continued profitable milk producers and, when killed, showed in some cases only slight traces of the disease. With others the disease progressed at a rapid rate. The conclusions reached by the Farm officials are that the practicability of adopting the Bang system depends upon whether the value of the progeny from the segregated cows would justify the extra expense of maintaining the second herd. If at any time the Bang herd would be justified it would be with the entry of the herd in the Accredited Herd System. The expenses of a segregated herd are unavoidably high. Charging the expenses of feed, bedding, rent, and labor against the value of the milk, calves, and manure, in the Central Farm experiment, left a profit slightly exceeding \$6,000 for the five-year period.

POULTRY

It is a good plan when running an incubator, to set one or two hens at the same time so as to make sure, should there be chicks dead in the shell, where the fault lies.

If the eggs under the hen hatch all right, then there is something wrong with the machine or its management. It may seem that there are more dead chicks when an incubator is used; but when the number of chicks hatched is taken into consideration, the proportionate loss is not much greater than with the hen.

It would seem, however, that a chick which is not in the best condition always stood a better chance of leaving the shell when under a hen than when in an incubator. One reason for this may be insufficient moisture in the incubator. This causes the membrane in the egg to become tough and the chick can not break through. Another reason may be improper ventilation in the incubator. This will cause the chick to die from suffocation, owing to lack of air, or a current of air may dry out and toughen the membrane surrounding the chick. It is well in this case to study the machine used, so as to remedy any defect, or try out another make of incubator.

Where chicks are found dead in the shell, both under the hen and in the incubator, it is best to look at once into the condition of the breeding stock. It is important that the fowls are not so closely related as to make inbreeding a cause, and at the same time it must be seen that they are getting sufficient exercise and the proper amount of the right kind of food.

DAIRY

Dairy experts have found that unless milking machines are given care, they are likely to become sources of bacterial contamination.

There are two methods of keeping milking machines clean and sterile. The most prevalent one is to thoroughly clean the machine in the ordinary way and then immerse the teat cup and milker tubes into some chemical solution, usually strong brine made by adding two pounds of salt to a gallon of water. The brine is kept sterile by adding hydrochloric solutions or chloride of lime.

Another effective method of keeping machines clean is to immerse the milking tubes and teat cups in hot water at a temperature of 160 to 180 degrees F. There is no doubt but what this keeps the machine clean, but certain makes have rubber parts that cannot withstand the high temperatures.

SHEEP

If you have an orphan lamb, by all means try to find a foster-mother in the flock. Perhaps some ewe lost her lamb about the time the orphan was born. To get her to claim the orphan, rub safflower oil or kerosene on the lamb and on the ewe's face and nose. If there is no ewe for the orphan, raise it on a bottle.

For the first week, the lamb should have ewe's milk. Feed little and often at the start—a tablespoonful or so every two hours. When two or three weeks' old feed three times a day, but let the lamb have more at each feed. When ewe's milk can not be had, use cow's milk. Some folks dilute cow's milk with an equal amount of water, but since ewe's milk is richer than cow's milk, this dilution isn't necessary. Have the milk to 100 degs F. and feed from a bottle.

Olive oil is good in many cases of bowel troubles in poultry, and should follow the dose of castor-oil. Olive oil is also useful in egg binding and in cases of scalded crops, and for dressing the combs of fowls to prevent frost bites.

The Selection of An Incubator.

Professor W. R. Graham of the Ontario Agricultural College, in a recent public address, declared that hatching by hens at the present day is economically unsound. Professor Graham was referring more particularly to the larger operator, that is to say those who raise hundreds of chickens in the year. It may be stated also that machine hatching is unsafe unless one has a good machine and operates it with intelligence. Mr. F. C. Elford, Dominion Poultry Husbandman, advises against buying a cheap incubator simply because it is cheap. The best, he states, is none too good, and cheap machines are usually dear at any price. In Experimental Farm Circular No. 2 entitled "Artificial Incubation," Mr. Elford gives advice on how to tell a good machine. He says, "Nothing but results are an absolute guarantee that a machine is good, but still there are certain marks that indicate the probable value of a machine for hatching. The first of these is the general appearance. It should be well made, good workmanship and good material entering into its construction. The doors should hang true and fit without friction, the glass large enough and neatly puttied or battened, the paint or stain applied evenly, and the machine should present the appearance of a finished piece of furniture. Good insulation also is absolutely necessary. See that the walls are double and likely to maintain a comparatively even temperature."

"There are, besides the above, many other points of more or less importance. The lamp should have a large enough bowl to last at least thirty hours, convenient to fill, easy to take out and replace, good workable burner and chimney, the mica opening so placed that the whole of the flame is readily seen when the observer is standing, the heater well insulated and made so that it can be cleaned. A reliable thermometer and thermostat, egg-trays that slide in and out without catching, and the height of the machine should be convenient for working."

This circular, which is obtainable through the Publications Branch, Department of Agriculture, Ottawa, also tells how to operate the incubator.

The Advance of Agricultural Teaching in Ontario Schools.

Every province has from time to time testified to the impetus given to agricultural education by the funds obtained from grants made under the Agricultural Instruction Act of the Dominion passed in 1913. Ontario being the most populous of the nine provinces naturally received the largest amount. In the January-February number of the Agricultural Gazette of Canada, Dr. Dandeno, chief superintendent of agricultural education in this province, gives an account of what he terms the "tremendous development in the schools of Ontario" during nine years of the ten that the grants under the Act have been forthcoming. During that time the allotment made by the Dominion to agricultural education in this one province has been \$263,000. That good work has been accomplished is exemplified by the fact that the attendance at the Ontario Agricultural College short courses of instruction for teachers increased from 146 in 1913 to 428 in 1921, and that the number of schools qualifying for grants in this connection increased from 159 to 1,804. A notable feature of the development that has taken place is the increase in the number of school and home gardens. In 1914 the numbers of these were, respectively, 208 and 56, whereas in 1921 they were 690 and 1,114.

It should be mentioned that the \$263,000 referred to is only a comparatively small proportion of the sum received by the province under the Act for the encouragement and promotion of agricultural knowledge in all its branches and the improvement of rural life, the amount so received in the nine years having reached a total of \$2,675,290.

The early bird gets the worm, but in poultry parlance, the early bird brings the profits. Moral: hatch early.

Farm Implements and Tools

With the advance of agriculture the increase in farm tools, implements, and machines has been great. A century ago, an ax, a scythe, a spade and a saw formed a large part of the equipment of many farms. These few simple tools were probably the most useful in working the small areas of land under process of clearing. The development of the farms brought improvement in tools and a gradual development toward the modern type of farm machines.

Tools were valued in the early days because such were hard to get. There was no waste of farm equipment then; the spade and the scythe were valued as much as the shotgun. Conditions have changed during the past century. The progress is now marked by an abundance of tools, implements and machines for every purpose in agricultural production and harvesting. An abundance of machines so great that we can waste on every hand—plows, tillage machines and harvesters neglected and exposed to the weather, rust and wear out before giving half service.

The waste of tools, implements, machines and articles of farm equip-

ment amounts to many thousands of dollars each year. Neglect to put machines under cover, to apply weather-proofing paint, to keep sharp all cutting parts, to oil or otherwise lubricate all bearings is reducing the efficiency and shortening the period of usefulness of equipment in which many millions of dollars of farmers' money has been invested. The machine or tool is not the only loss since the power, either horse, motor or man, is also reduced through having to work with a tool or implement not in the best condition. This double liability, while fully appreciated by the most efficient or business type of farmers, is a matter that should be appreciated by all who own or work with farm tools.

Weed Seed Collections in Schools.

It is not difficult to agree with a remark in a bulletin on "Weeds and Weed Seeds," for which the Dominion Seed Branch is responsible, that no subject in agriculture is better adapted for presentation to school children than the study of seeds. The collection, identification, and study of seeds gives scope for the training of a wide range of faculties, and the intrinsic value of the information so derived is of use in after life. The seeds of weeds constitute one division, and in this connection a collection of weed seeds for illustration purposes is most important. Unfortunately, as the pamphlet refers to further points out, it is not difficult to make a fairly large and representative collection of weed seeds in almost any district in Canada. There are a number of weeds that occur practically everywhere.

On the other hand, a great many are associated with certain crops, or with certain types of soil, or are limited to particular sections of the country. One of the weed seeds with which every child should be made acquainted is Lamb's Quarters. This weed occurs throughout Canada in gardens as well as in cultivated fields. Another common kind is Wild Buckwheat, a weed that is general in cereal crops. A third is Wild Oats, a noxious weed that is similar in shape to the cultivated oat but can be easily distinguished from it. A fourth is Wild Mustard, which is the commonest and one of the most injurious weeds belonging to the mustard family, of which the well known varieties are Hare's Ear mustard, and Tumbling mustard, and two less known, Indian mustard and Black mustard. All these and more than a hundred other weeds are described and illustrated, and methods of eradication in the bulletin referred to.

Cattle Export Arrangements.

The Live Stock Branch of the Department of Agriculture and the Department generally have been busy for some time past making arrangements for the export of beef cattle from this side under the changed conditions brought about by the removal of the British embargo. An export cattle section at each stock yard, separate from the accommodation of the general supply, is being provided, and a suitable method of tagging and veterinary inspection arranged for. An effort is also being made to arrange with the steamship companies for adequate carrying space on a regular schedule at rates consistent with the business that may be expected. Necessary publicity to the regulations under which matters will be conducted is being given along with advice as to the kind of cattle required. It is emphasized that unless shipping is undertaken with some sort of uniformity as to quality and supply, the trade will not develop to the extent necessary to make it of general benefit to the country's live stock industry.

Home Education

"The Child's First School is the Family"—Froebel.

Training for Unselfishness—By May E. Wilson

Not long ago I heard a very lovable woman say, "If my parents had realized when I was a child, they would have spared me many tears. I was allowed my own way in everything and grew up a disagreeable and selfish girl. Later, when I had to leave home and go among people I found I had to reform myself to be even tolerated. It was a long heart-breaking task, which I had to struggle through alone, overcoming habits which might easily have been kept from becoming habits if I had been guided wisely in my childhood."

Many parents seem to overlook or underestimate the importance of the first appearance of undesirable tendencies in their children which can be overcome, if properly treated while children are still young.

Ill-temper, selfishness, teasing, and fault-finding can be kept from becoming unlovely characteristics if a wise guide gives help at the right time.

At the root of wrong-doing one can always find selfishness. It besets the only child in a home where adults seem to exist to please and spoil him, as well as the little waif on the street where to "have," he has to "snatch." For either of these children, the kindergarten is a blessing. Here in happy surroundings he learns to share in work and play—to give as well as take.

Here a child learns to hang up his wraps; to care for his rubbers; to sit erect, overcoming a desire to slide in his chair; to obey the directions of the teacher, given sometimes by voice, sometimes by the piano; to yield his individual desire and do the thing that is right for him to do at that moment.

The child who at home makes no effort to help himself in putting on his wraps, who sticks out his feet for someone to put on his rubbers, is encouraged to try and do these things for himself, not only by the teacher, but most of all by the sight of the more independent children delightedly accomplishing the task of slipping on rubbers, putting on coats and struggling successfully with slippery buttons.

But perhaps the games help most to develop unselfishness. Early in life one needs to learn to share—to be a good loser—to relinquish smilingly to someone else, and for five days a week kindergarten offers a splendid opportunity.

In a large group of children, where each has equal rights, the selfish child comes to see the need of respecting those rights, which he does by waiting his turn and sharing with others.

And so the pictures, songs, stories, games and handwork open up to him the world about him and lead him from selfishness, out of himself, to unselfishness.

Forcing Rhubarb.

It is quite an easy matter to secure a succession of fine rhubarb from December to May, by which time garden rhubarb becomes obtainable. The following is the method adopted at the Invermere, B.C., Experimental Station: Old stools of rhubarb are broken up into sets in May and planted in well manured grounds during the summer. By autumn the crowns are in good shape, and are lifted and stored in a shed or cellar which is not frost proof. As needed, the crowns are taken and packed tightly in boxes, in moss, well watered, and placed in the furnace room of the basement where the shoots soon develop.

Another method of forcing rhubarb has been tried successfully at Kentville, N.S. Experimental Station. Clumps of rhubarb which had been two years planted from seedlings were forced under a bench in the greenhouse. These clumps are dug in the fall and allowed thoroughly to freeze before forcing. They were taken inside on January 16 and placed under the bench January 18. Some sand was scattered around the roots to hold moisture. Canvas was placed around the bench to exclude light. The first rhubarb was ready February 3rd and it was finished by March 30th. The area occupied was 22 square feet; the yield was 89.75 pounds, the yield per square foot being 4.07 pounds.

The Live Stock Market.

According to the Dominion Live Stock Branch weekly market reports, young calves are not being liquidated to quite the same extent as they were in 1922. The report on March 8, from Toronto, was that the demand for veal had lessened, and from Montreal, that the quantity of light unfinished calves on hand had lowered the prices of all grades.

The total sales of live stock this year up to date, compared with the same period last year at the principal markets, were reported as: 116,494 cattle against 93,533; 20,908 calves against 22,554; 209,164 hogs against 159,459; and 48,336 sheep against 45,835. It will be noticed that only calves show a decrease. Toronto, on March 8, reported the sale of ten loads of the best feeding steers in anticipation of the new store cattle export trade at from \$6.75 to \$7 per hundred in the yards. Winnipeg reports a liberal enquiry for stockers and feeders at values listing up well in line with the preceding week. Edmonton reports a much keener demand for stockers and feeders.

BABY CHICKS

25 of them delivered free to every person who registers for Shaw's Goldbelt Poultry Course for Home Bred. 25 people made the right study last year. You may have some of their testimonials. Write Shaw School, Poultry Department, 40 Bloor W., Toronto.

Corrugated Galvanized Steel Roofing

Direct from Manufacturers to Consumers. Write for Prices. Special Terms in Farmers. The Metallic Roofing Co. Limited. 1194 King St. W., Toronto.

Dollars Count!

It pays to fertilize your crops. \$1 invested in Fertilizer usually means \$4 to \$6 return in Bigger Yields of better Quality. Experiments in Truck Gardening showed that \$5 per acre spent in fertilizers increased the net value of the Tomato crop over \$85.00 per acre. Order GUNN'S SHUR-GAIN Fertilizers to-day. You can get analyses for farm crops or for truck crops. SHUR-GAIN Fertilizers are the product of long experience.

From High Grade Materials. Consult our Agent or write us. Agents wanted in territories where we are not represented. GUNN'S Limited. 204 St. Clair Street TORONTO.

Drinking fountains whose interior parts can not be reached, may be cleaned with scalding water and a big handful of shot. Fill the fountain about a quarter full of hot water and then pour in the shot. Shake the vessel briskly so that the shot will scrape along the bottom and sides of the fountain. This will remove the acum and make the vessel clean and sweet.

Dry feet will make a stranger of the doctor.

MINING STOCKS

BOUGHT, SOLD, QUOTED Orders Promptly Executed Inquiries Invited

F. G. Oke & Co.

Members Standard Stock and Mining Exchange. 34 King St. East TORONTO. Special long distance phone service for benefit of out-of-town clients.

Irrigated Farms in Southern Alberta

In the Famous Vauxhall District Now River Irrigation Project. An especially good location for mixed farming and dairying. Splendid opportunity for young men now living in districts where good land cannot be bought at reasonable prices. THIS IS NOT FLOODING! The first 10,000 acres are fully settled and another 10,000 acres now ready for settlement; maximum distance from railroad, seven miles. Good roads, telephone and schools. Easy payments, extending over 15 years. This is the Best Land Buy in Alberta. Write for further information to CANADA LAND AND IRRIGATION COMPANY, LIMITED. Medicine Hat, Alberta.

BRANTFORD Concrete Mixer

FARM SIZE MODEL FOR SMALL JOBS. The "B" mixer is the best value for your money. It will mix concrete, mortar, plaster, etc. The drum rotates into wheelbarrow or for in a. A hand-pumped outfit, made for hand or power, on wheels, with or without engine. We also make large mixers. Our business is free. Good! Shipley & Sons, Limited. 200 West Beaver St., Brantford, Ontario.

KEEP THEM WORKING

Kendall's Spavin Treatment is the old reliable, truly ready for all cases of spavin, curdy, hyaline, bony growth and tumours from other causes, known for more than thirty years as Kendall's Spavin Cure. It keeps the bones working—no jolting. What is true for others, it will do for you. Keep a bottle of Kendall's Spavin Treatment. A bottle may cost you a horse for you. It's worth while to be ready. Ask your dealer the next time you are in town. Test this treatment out on a roan, pinto, grey, etc. Get a free copy of "A Treatise on the Horse as your druggist, or write us. Register your horse treatment like "Baker" or "Horse" or "Horse". DR. E. J. KENDALL COMPANY, Kenosha Falls, Wt. U.S.A.

Bank Accounts for Farmers

Farmers find that doing business through The Bank of Nova Scotia has many advantages. It enables a farmer to keep track of all his dealings. His bank book is a handy record of all moneys received or paid out.

By depositing milk, grain and other produce cheques he has a complete record of receipts.

By paying all bills by cheque he has a record of all payments and runs no risk of loss by carrying money in his pocket or keeping it in the house.

In short, a Bank Account is a necessity in the conduct of farming operations on a business basis.

THE Bank of Nova Scotia

ESTABLISHED 1832
Paid-up Capital \$ 2,700,000

United States.

5 cts. a line for Poetry accompanying
Memorial Notices.

EN PASSANT.

Spring Notes.

".....And the voice of the auto-
mobile is heard again in the land,"
remarked Old George. "I don't mind
the voice so much: It is not exactly
so sweet as the song of the thrush,
and it certainly makes me want to
put the emergency brake on my nerves
at times, but what I do dislike
about automobiles is their distinctive
smell: There's nothing in nature like
it, and it won't blend like the scent of
mown hay. Speaking of automo-
biles reminds me that I saw in the pa-
per a paragraph which says that Cana-
da ships more automobiles to Great
Britain than all other nations combin-
ed. 76 per cent in Canada's propor-
tion as compared with 11 per cent
from the United States. How can
you account for that? It seems to me
that the shipment from Canada is no
guarantee that the goods are made
here. I just don't believe it! It looks
too much like a put up job to evade
duties and taxes."

"That isn't what I came to see you
about," remarked. "I don't know
much about automobiles: What I
want to know is, Has the winter just
passed, we hope, been the longest,
and the spring now opening, been the
latest within your recollection?"

"Not a bit of it," quickly cut in
Old George. "The papers may say
what they like, and tell you there has
been nothing like it for eighty years,
but don't believe it. Why, I remem-
ber....." (Held over) After he
had run down I seized my opportu-
nity and said "Well now, what are you
going to say about this?" and pointed
to a paragraph in the paper:

"No Seeding Begun Yet In The
West.

Regina 14th April:.....Half an
inch of snow fell on Thursday
night, and the weather continues
cold. It will be two weeks at
least before any seeding can be
done.

Edmonton (same date):.....No
indication of seeding yet.....
It will be some weeks yet before
the farmers get on the land."

"Hum," remarked Old George;
"Rather late, yes, but take no notice:
I tell you I have seen the best har-
vest results come after a late seed-
ing: Likely as not, things will come
on with a rush; Why, I remember....."
(Held over)

In another part of the paper I spotted
an item which read: "Permanent
Commission" - "The one general we
never want to put on the retired list
is General Prosperity."

"Yes, that's the fellow we want on
our side," said Old George. "He is a
good one to work with: No Grouching,
and your word regular; but don't
you think the country is uncommonly
prosperous already? I don't see much
room for complaint: Here in April
nearly through and, no annual coal
strike planned. Last year's harvest
was so big that it nearly broke the
farmer's hearts: They cried out be-
cause it was so good and they were
expected to pay everybody they owed
anything to. Hasn't the Canadian
dollar gone back to its face value
again, and hasn't unemployment de-
creased throughout the country? In
the old days, before every bit of pas-
ture was looked over as a probable
golf course, I remember....." (Held
over): Before City Hotels went up
to the tenth storey....." (Held
over): When farmer's sons could
plough as straight as a furrow as their
dada, and farmer's daughters did not
pine to be movie stars, General pros-
perity had an easier job than he has
now, and his tactics were supported
by the rank and file. The plan of
campaign is still the same: The sea-
sons come and go in the same old way,
and everything would be as merry
as a marriage bell if we would use
them the right way to extract the
hundred per cent value they contain
for us....."

I don't notice much difference in
the length of the winters nor the late-
ness of the springs. If anything, the
seasons are more favourable: I have
seen 24 feet of snow....." (Held
over): In fact I believe the Canadian
winter will gradually become milder.
The astronomers tell us there is a
perceptible difference every 25,000
years, and H. G. Wells says: "Our
world-to-day seems to be emerging
with fluctuations from a prolonged
phase of adversity and extreme con-
ditions (climate): 500,000 years hence
it may be a winterless world, with
trees and vegetation even in the polar
circles." - as it probably was before.
Now look at your paper again, page
21, top of the second column. Some-

body asks the Star where the Garden
of Eden was, and the answer says
it might have been at the North Pole.
Wells is most likely right; he says,
At present we have no certainty of
forecast, but later on, as knowledge
increases it may be possible to reckon
with more precision so that our race
will make its plans thousands of
years ahead, to meet the coming
changes.

Now, I hope this will be sufficient
notice to the Nova Scotia apple grow-
ers. Garden of Eden apples expressed
daily from the North Pole will put
them out of business if they are
not careful.

† † †

LETTER TO THE LINKMAN.

Dear Linkman, I enjoy very much
your En Passant remarks every week
and I wish I had kept them all from
the beginning as they are well worth
reading over and over again, but do
you not think you are too hard on
people like me who are superstitious
in little things that cannot do much
harm, like spilling salt and going un-
der ladders and sitting thirteen at
table and things like that. I know
it is supposed to be silly to be super-
stitious but some of us cannot really
help it. Yours truly, J. L.

(Not a bit too hard, J. L. I get a
trifle that way myself sometimes, and
you can't imagine the way I take
myself to task about it. There is not
a man alive who is quite free from
some sort of superstitions; In fact
I believe a little tincture of supersti-
tion in our composition helps to make
better men and women of us, but, like
the Irishman's hod, it can carried
too far. Linkman.)

THE LINKMAN.

The Prodigal's Return.

† † †

Along a road a man was seen,
Trudging with wearied gait,
His anxious look betrayed a sign,
He had returned too late.

His face was tanned, his beard was
long,
His clothes were worn and torn,
The staff he clutched could scarce
support.

His bowed and shrunken form,
No murmuring sigh escaped his lips,
Watching the fading light,
Praying for strength to reach his
home.

Before the warning light.
His shadowy form moved along
The well-remembered lane
He tried to pierce the evening gloom,
And see his home again.

"Not many yards" he murmured low,
"Divides me from the past,
The wish of years in lonely lands
May come to pass at last."

At length the old familiar sound,
The toll of Vesper bell,
Is wafted to his listening ear,
And slowly breaks the spell.

Continuing next week.

FARM FOR SALE.

FOR SALE.—Farm of 100 acres, also
farm of 85 adjoining to be sold
separate or together. Farm has
good house with furnace & cistern,
up to date buildings to accommodate
7 horses & 23 cattle, silo and all
other buildings necessary. Running
water for cattle all year.
Farm situated about 1 1/2 miles from
Lochaber Station C.P.R., close to
Church, School and Cheese-factory.
Good terms to quick buyer.
Apply to John T. Nesbitt, Loch-
aber Bay, Quebec.

Stock Farm For Sale.

Ideal stock farm with good sugar
bush and wood lot, large farm house
and farm buildings; 135 acres under
cultivation, 45 acres in bush. Situated
on bank of the North river 4 miles
from Lachute and 2 1/2 miles from St.
Andrews East. Daily School Bus to

FIRE AT HAWKESBURY

† † †

Guilbault Block Burned With Loss
of \$21,000

On April 15th, Fire destroyed the
Guilbault block there, with an esti-
mated loss of \$21,000, and temporarily
disorganized the Bell Telephone ser-
vice last Sunday morning. The tele-
phone office was situated in the de-
stroyed building, but linemen had the
long distance wires re-connected in
an adjoining building within an hour
and had reopened the service. The
switchboard and all equipment loss
was destroyed, at an approximate loss
of \$3,000. New equipment is being
rushed in and it is expected that the
complete service will be in operation
by next day.

Leon Guilbault's total losses
amounted to \$17,500, consisting of
\$15,000 for building, \$2,000 on furni-
ture and private belongings and \$500
on his store. He carried \$9,000 in-
surance. The Bell Telephone Co.
losses are covered by insurance. De-
fective wiring is believed to have caused
the fire.

COTTAGE FOR SALE.—At Lake
Louisa. Completely furnished 4
room cottage on Paul's Island. Can
be had on easy terms, write to
C. Sharpe, 419 St. James St. Mont-
real.

—The County Sheep Feeding com-
petition for 1923 is being organized
by Mr. Bothwell (County Agronomist)
under the Farmers' Club of the Town-
ship of Gore. Any farmer who owns
at least ten ewes and a purebred ram
may compete. Membership fee to
club \$1.00, Entry fee 50cts, payable
to the secretary.
A. Tomalty, Sec.-Treas., Lakefield.

Canada's Standard Four

McLaughlin Buick "Master Four" Touring 23-35 Special

IN beauty of appearance, dependability and economy of operation, this "Master Four" Touring has established an entirely new standard for four-cylinder cars. Sturdy, dependable, always ready to go, it is perfectly suited to the needs of the average family.

The seats are deep and low, with plenty of leg-room in both compartments. The steering column is in exactly the right position for driving comfort and the gear shift lever is high enough to prevent bending and reaching. Some of the many unusual refinements on a car of this class are transmission lock, windshield adjustable from the inside, nickelled bumper, walnut dash, rear vision mirror, combination tail and stop light, drum type head and parking lamps, crown fenders and scuff plates.

Built in Canada by Canadians for service under Canadian highway and climatic conditions. No "Four" on the market is so well suited for rugged use at so low a cost, both initial and upkeep, as the McLaughlin-Buick Master Four edition of "Canada's Standard Car."

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

THE CENTAUR COMPANY, NEW YORK CITY

OBITUARY.

It is with deep sympathy we record the death of little Martha Rowe, aged 8 years and 7 months, dearly beloved daughter of Mr. and Mrs. David Rowe, of Lousia. The wee girl had been sick with gripe during the winter and was thought to have quite recovered, but was taken seriously ill on Monday and despite all that loving care and medical skill could do passed away on Wednesday. The funeral will take place from her parents home on Friday afternoon. But let us not think of little Martha as dead, but as living, not as a flower that has withered, but as one that transplanted and touched by a Divine hand, is blooming in sweeter fragrance than those of earth. One less at home, one more in Heaven.

—:—

Mrs. Horace Davis.

—:—

Rev. Geoffrey May, M. A., conducted the funeral in Christ Church, St. Andrews, Que., on Saturday afternoon of Mrs. Jennie Davis, wife of Horace Davis advertising writer, who died Friday morning at her husband's home, "The Vines." The service was largely attended, and the floral offerings were unusually numerous.

Before her marriage, Mrs. Davis was Jennie K. Simpson, youngest daughter of the late George Simpson, one time superintendent of the Carillon-Grenville canals. In marrying Mr. Davis she united two families well known in the vicinity. Besides her husband she leaves six brothers, Herbert G. Simpson, Dr. Robert Simpson, Dr. Thomas C. Simpson, William H. Simpson, Geo. Simpson, Bernard Simpson, and an only sister, Mrs. D. McIntyre, Long Island, New York.

The funeral service was fully choral, accompanied by the organist, Geoffrey Simpson, nephew of Mrs. Davis. The cortege which proceeded to the family plot of St. Andrews East Cemetery was a long one, containing many friends of Mrs. Davis, her bereaved husband, and the members of her family. A warm tribute was paid to the late Mrs. Davis by Rev. May, in his few words from the pulpit, and many were the consoling messages received by Mr. Horace Davis before and after the funeral.

AUCTION SALE

—:—

There will be sold by Public Auction at the residence of

DAVID ROWE,

Three Miles North of Dalesville Store, Thursday, May 3rd, 1923

The following effects:—One work horse, 1 brood mare (with foal.) 13 milch cows (all freshened.) 1 bull 2 years old, 2 calves, 35 hens, 2 wagons, hay rack and wagon box, 1 buggy, 1 tumbler cart, 1 road cart, 2 sets bob-sleds, 1 set single sleds, 1 cord wood rack, 1 cutter, 1 snow plow, whiffletrees and caversers, 1 set double harness (new), 2 expresses, 1 milk wagon, 1 set express harness, 2 set light harness, set cart harness, 2 Moody mowing machines (almost new) Massey Harris rake (almost new), 3 plows, set spring tooth harrows, 1 stone boat, 1 "Sharples" cream separator, 4 factory cans, 1 Daisy churn, Singer sewing machine, 2 sets bed-room furniture, extension tables, 1 mahogany chest of drawers.

Who is he?

Who is the man in the private office?

He is—the man your salesmen are afraid to stop on the street;

—the man who is always "out" or "busy" when they call;

—the man who never replies to your letters making special offers;

—the man who ignores your telegrams.

Somebody has called him on Long Distance. He does not know yet who it is, but he is as polite as if he anticipated favors!

Long Distance gets in where salesmen fear to tread. Planned Long Distance campaigns get past every barrier.

WHY BABIES CRY

It's often hard to find the trouble—It may be teeth—it may be stomach—but oh! so often it is just a chafed irritated skin on which poor Soap has been used.

The remedy for this is so simple! Hours of suffering—night after night of disturbance—have been avoided by mothers, who have insisted on—Baby's Own Soap. Of course it costs a little more, a very little more, however—than what is often bought and used—but four generations of Canadian Mothers are there to vouch for its purity. For the soothing healing effect on Baby's delicate skin, for the lovely pure flower fragrance it leaves when Baby fresh and clean is taken from his bath.

Don't you think, Madam, it's worth paying the 16c. a cake, a little less if you buy a box (3 cakes) which your dealer asks for Baby's Own Soap. Adv.

SOMETHING TO THINK ABOUT

GOLDEN WEDDINGS.

Every little while the newspapers print pictures of an elderly man and an elderly woman, and underneath words to the effect that Mr. and Mrs. So and So are celebrating their golden wedding anniversary today.

And nearly always they are a good-looking, contented-looking, wholesome couple. It is fine to read about such people. Think of it! Fifty years married. A half a century, with the diamond wedding anniversary still stretching 25 years ahead of them!

Fifty years! What a lot of things have happened to the world and to them in that time. When married folks have lived together for so long, it is almost a certainty that "until death do us part" meant just what it was supposed to mean away back there when as young but happy people they stood up, were married, and went away "to live happily ever afterwards."

Young people, just married, and starting out on the long trail that leads to a golden wedding anniversary have a lot of anniversary milestones to pass before they reach it. First is the iron wedding, celebrated at the close of the first year of married life; then at the end of five years the wooden wedding; at the end of 10 the tin wedding; at the end of 15 the crystal wedding; at the end of 20, the china wedding; at the end of 25, the silver wedding; at the end of 30 the cotton wedding; at the end of 35, the linen; at the end of 45, the silk, and at the close of 50 the golden wedding anniversary. Beyond that the diamond wedding anniversary, to be celebrated at the end of the 60th, 70th, or 75th, as one chooses.

ROUGE RIVER IMPROVEMENT COMPANY

Schedule of Tolls for year 1923:

The improvements are divided into 15 sections and one-fifth of the amounts of Tolls has been apportioned to each section to facilitate the collection of same, as follows:

Red and White Pine, Tamarac, Spruce, Hemlock, square or waney board, per thousand cubic feet .10cts

OUT OF THE GOLDEN PACK

BY IDA M. EVANS.

PART III.

It was ten minutes before Lettice was back in her light silken motor car, nothing on her head but the silvery tulle scarf.

She took the wheel. Stephen looked at his watch. About three and a half hours to make some thirty-seven miles. Margin enough, he decided; the roads in and about Chicago are, for the most part, built for speed. At the same time, he wished that he were in his own car, with his hand on his own capable wheel. Jim Town's purchase was a lower-powered make.

However, power has taken on its own relativity of meaning in this speedy, paved age. He smiled to himself, recalling days not long ago past when all motor speed lay in the womb of the future. For men like Hammond Wettles these were more accommodating days!

Lettice caught the small, fleeting smile. Perhaps she misinterpreted it. She lifted her head happily and shot the car onward.

Five miles, on a superlatively even road, fell away. Five more. The two had not much to say, although Lettice Towne's silence may have been happily expectant. A silence can be that. But Stephen Bentlewin was not in the mood for chatter, and she fell in with his desire.

Perhaps she slowed down somewhat the next five miles. The speedometer responded to Stephen Bentlewin's glance toward it, however, and Lettice colored.

But she was honestly uncertain when presently she came to stop at a crossroads.

"To the left we'll get a mile or two of unpaved way," she said, meditatively. "But the right turn means a detour of six or seven miles."

He looked at his watch. It was Lettice who, flushing as if she suspected blame for herself in his attitude, took the initiative and shot the car toward the left road.

So that, three-quarters of a mile farther, it plowed heavily, impetuously, into a rain-soaked bed of clay and came to a disconcerting halt.

An engine spluttered, snorted, puffed futilely. "Chassis is too heavy for the motor," he commented briefly. "But I'm a fast walker."

"We may meet another motorist," "We may," he said doubtfully.

"But, come to think, we haven't passed many in the last few miles. Perhaps they've been warned off the road."

He strode off. A mile back a window showed down a side road.

They roused a sleepy truck-raiser. But he declined to bring his horses to pull a car from clay, and he declined to let them take his horses or his driver to complete their journey.

Three miles is not a long distance—given the right margin of time. Given the wrong margin—

Lettice Towne caught her breath till it was short and frightened in sound. She and Stephen Bentlewin faced each other in common incredulity. It seemed quite impossible that this could happen—that they could be so near and yet so far from all the aids and demands of their times!

"Is there any interurban car in this part of the country?" he curtly asked Lettice once.

"None. Several miles from here—" "Ah! Several miles!"

He stared grimly at the big motionless wheels, so competent but so useless now. The hubs might have leered at him above the clay which held tires and lower spokes. It is the irony of modern inventions that at times they can so stubbornly display their limitations.

Lettice gave another very short, frightened breath, and her two white, ungloved hands clenched at her sides.

"If—if the wheels won't leave the clay," she said, a little wildly, "perhaps the clay will consent to leave the wheels."

And, saying this, she dropped to her knees, regardless of her white silk dress, and began fiercely to pull the clay with her hand from the tire and the lower part of a hub. She flung her handfist to the side of the road.

"Lettice!"

"It's the only way!"

"This is preposterous! In the first place, it would take us hours—"

"I'll see!" One end of her tulle scarf fell in front of her. With a soiled hand she flung it back. "A clay bed five feet by, say, ten by eighteen inches deep—we'll hope it's no deeper—at the rate of two full handfists a second—"

"Lettice! Get up! I insist! Look at your gown, your scarf!" he was thoroughly angry, as at a silly and hysterical child. He took hold of her—

She wrenched from his hold. "No." Two fast, full hands clutched, tossed—her skirts pressed to their ruin in the mire that her knees had found.

A marvelous instrument is the human hand. Unbelievably swift and capable at times. Afterward Stephen Bentlewin never recommended the seat to other motorists—indeed, deemed it best not to strain their credulity by telling them what had been done.

Beside a second wheel he dropped to his knees, and began fiercely to disentangle a car with the best disentangler at hand.

Five minutes—ten—fifteen. Hard breathing, strenuous arms. Twenty—the rim of one wheel was free, resting on comparatively solid underclay. Thirty—another rim agreed to come out and be good. Forty—

Stephen sprang to his feet. "Pretty loose except the centre, I think," he said, breathing hard. "I'll try the motor again, all open—" He sprang into the front seat, applied power and was rewarded by a rebellious but effective puffing. He threw open a clutch—waited breathlessly—and the car backed slowly but surely out of its limited bed and on to good solid ground at the rear.

Lettice, who had waited with straining eyes and ears, climbed in breathlessly beside him. She was a soiled, grimy person. The white silk dress was forever ruined. Her slippers were mud carriers. Her fingernails were black and broken. Her delicate face was smeared out of all beauty of hue.

But Stephen Bentlewin did not waste much time inspecting her appearance. He looked at his watch once, then the car was turned snout about and was shooting back to the original crossroads, where, naturally enough, other headlights were belatedly gleaming now that their assistance was not needed.

A passing motorist, halted, reported that a washout had been repaired. "Sure—since noon." In silence Stephen shot down the road.

Lettice was sitting wearily in her seat when the hospital was reached at last. Stephen looked at his watch as he brought the car to an abrupt standstill. Eleven fifty-eight.

He jumped out, with a little nod at Lettice. Inside the door an attendant met him. "Is he here?" he asked the attendant. "Ten minutes." Swiftly, with professionally unmoved countenance, he made his way to an elevator.

From that elevator he emerged two hours later.

On a straight-backed chair, for the convenience of visitors, Lettice sat; a patient, soiled, drooping figure.

"You still here? Why in the world—"

"I wanted to learn—if he will be all right?"

"I think so. I've not been willing to leave until now. But unless unforeseen complications set in—"

"Then—then—" she tried bravely to hold a soft underlip steady—"you won't?"

"Won't what?"

"Blame me?"

"Why, in no case would I—"

"Oh, yes!" She said it quietly enough; with conviction. "You'd always have seen a dead man beside me—whenever you thought of me—"

Her dark blue eyes were lifted to his. Stephen Bentlewin brushed a hand across his own eyes. On her cheek there was a great splotch of clay. That served as a suggestive link, doubtless, as memory's slipper. But it was odd with what distinction he saw, not Lettice Towne in a miry roadbed, but a small, bent, wind-browned woman on a miry northern and hillside—one shaft of her old buggy had broken and she was out of her seat and trying patiently to mend it with a bit of twine found by the way. Odd that in two women's eyes there could be the same deep glow—an understanding.

He had the sensation of having built a long and unnecessary barrier against what was very good in life. With that tenderness which denotes a peculiar possession, he took out his handkerchief to wipe the clay from her face.

"At least enough to—" Before the wide eyes of a hospital doorman he put his lips to the wiped cheek. A little absently, too. Because of his heritage, he was pitying some other men—Bickings, Korfer, Graisy. He would find in his future what they had pitifully missed.

(The End.)

Bartol's Pleasantry.

Slowly—"I want you to repeat these trousers you made for me some time ago."

Tailor—"Very good, sir; but the bill for these trousers will have to be re-ceived first."

Minard's Liniment for Coughs & Colds

THE SAME STREET-CORNER GAME
—From the Providence Journal

Woman's Interests

KEEP YOUR SEWING-MACHINE IN ORDER.

The usefulness of a sewing-machine is surpassed only by the abuse it will stand. Yet it appreciates and pays, in prolonged service and greater ease in operation, for any care given it, and the sewing will be less of a task if the machine is in apple-pie order. gone over by an expert, but if such a person is not available, give the machine a good overhauling yourself, cleaning and oiling it thoroughly.

Kerosene will loosen any gummy substances which may form, a crochet-hook will enable you to remove lint, and a small paint brush will dislodge the dust. After the gum, lint and dust have been removed, oil the machine freely, using only the best quality of machine oil. After oiling, lift the presser-foot and run the machine long enough to spread the oil. The machine should then be allowed to stand without using until the oil penetrates to every part; overnight is not too long. Next day, start the machine again, with the presser-foot up at first, then drop the presser-foot with a piece of muslin under it, stitch back and forth over the muslin, which will receive the excess oil. Remove the excess oil from other parts with a soft cloth.

Once or twice a year oil the under parts of the head of the machine. To do this, throw off the belt, or strap, turn back the head, and oil holes will be found for bearings which could not possibly be reached otherwise. Put oil into all these holes.

A sewing-machine runs much more easily with a tight strap than with one which is loose. A strap which is but slightly loose can be tightened by applying a few drops of castor oil. A very loose strap should have a portion cut from each end and the ends can be joined by means of a slender wire drawn through the leather. An excellent belt for a sewing-machine can be contrived from covered copper wire, No. 18 insulated electric wire being the kind used. Secure the required length, scrape away the covering for an inch or so from each end. Bend the ends of the wire and hook them together, clamping each firmly in place. A sewing-machine will run more easily with a wire belt than with one made of leather.

Blunt needles interfere with efficient work and often injure the fabric as well. The points can be restored by means of an emery-wheel, which should be part of the machine equipment, or by stitching over a piece of very fine sandpaper.

Care in the use of the machine is as important as the thorough cleaning. Do not run the machine after getting to the end of a seam, for running the machine when there is no cloth under the presser-foot roughens the foot and blunts the feed burrs. Children enjoy running the machine when it is not in use; and because of the ease with which the feed burrs are destroyed, little folks should be denied this pleasure.

Cover the machine when it is not in immediate use and oil it when the day's work is over. On the next day, wipe off all the parts and you will not have any oil stains on your sewing.

Use fine thread on the machine, if you want beautiful and satisfactory work; the seams are not likely to give way, except on a garment subjected to great strain. The threads of the materials are far from strong, yet all the wear comes on them and the sewing usually outlasts the material.

A cover for the sewing-machine will keep the lower parts free from dust, the top from becoming marred and the children from opening the drawers; besides, a covered machine makes an attractive side-table where one can set the work basket or a few books. A fitted cover will require about five yards of cretonne or denim. Cut a piece to fit the top, lining it with old outing flannel. With the rest of the material make a valance, one edge of which is stitched to the top, falling the gathers somewhat at the corners. Turn up the bottom edge, so that the valance escapes the floor, and finish

with a hem. This cover can be taken off in a second when the machine is again required for use.

OUR PRETTY HOUSE.

We used to have a pretty house, before the children came, But now,—it may get over it, but will never look the same! For it's full of dents and scratches, and the marks of little feet; And let me work my hardest, yet I cannot keep things neat.

For here's a coat, and there's a cap, and there's a ball and bat; And on my best sofa cushion, lies a soundly sleeping cat, While here's a story book and shoe chewed by a frisky pup, And in my sewing basket is a little, broken cup.

Here stands a tennis racket, with a rakish hockey stick Beside an Easter basket holding one, lone, fluffy chick; A pair of dolls are occupying daddy's easy chair, While dolly's cradle rocks a woolly sheep and Teddy-bear.

When I shake the small boy's garments, I'm apt to find a snake Wrapped round an old tin whistle, or a mushy ginger cake; While on the floor of sister's room, I sometimes find a note With misspelled words and crosses, some smitten schoolboy wrote.

My darling bag is bulging with torn and holey socks, And it seems a useless job to try to fill the cocky crooks; There are always buttons to sew on, and hems to be let down, And bloomers to be mended, or new goods to make a gown,

Or little wounded fingers that must be tied up tight, If the bandages are not all gone for a tail for brother's kite. There is no end to duties, and there is no end to care, And there is no end to all the love we and the children share.

And when, at night, with prayers all heard, I've tucked them safe in bed, And given last drinks, and kisses, and the last goodnights are said, I tidy up a bit, and then I look at dad and smile, And we say, "O what a difference in such a little while!"

For we used to have a pretty house, before the children came, And now we fear we'll never have a pretty house again. But oh, no marble palace with a gaily gilded dome, Can be lovely as this battered house for now it is a home.

FRECKLES AND WRINKLES.

Winds are sure to produce a large crop of freckles which can be temporarily removed by peeling the skin. As freckles are due to an excess of coloring matter in the blood, they are sure to return.

Those who are willing to try the peeling process might try using a lotion made by dissolving one ammoniate mercury tablet in a pint of water. Apply before retiring. Allow lotion to dry on the skin and remain on overnight. The outside layer of skin which is freckled will peel off gradually. If the skin becomes tender, a non-irritating soap should be used. If no tenderness results, the peeling process may be hastened by using a bi-chloride soap.

Wrinkles may be due to age, to worry, or to defective vision. The perpendicular lines which appear on the forehead are not always an indication of age or the process of ageing. Squinting, the effort to see, will produce these lines on the face of a child. When lines of this sort appear, it is advisable to have the eyes examined so that proper glasses may be prescribed. If glasses are already being worn, the lenses may need changing. Worry is responsible for the larger number of wrinkles. Remember that the face does not betray its owner's

years until the mind gives consent, for the mind is the sculptor of the face, whether one is twenty or seventy. As a man thinketh in his heart, so is he. Men and women grow old by first thinking themselves old, by closing the door against new faces, new ideas, new enthusiasms. It does not pay to grow sour or embittered toward the world; it can do without us better than we can do without it, nor is it worth while to protest against new things; conditions have changed and most methods have improved. Look forward instead of backward.

Cannibal Plants Which Live on Neighbors.

Just as man is plagued by noxious insects, so trees and plants are subject to many parasites, both vegetable and animal.

One of the commonest causes of disease in plants is the fungus, which is one of the lowest of a great group of plants, and includes the well-known forms of the mushroom and toadstool.

They are spread by spores somewhat like microbes, and like these, they seem to prefer living tissue or decaying animal matter, though many thrive on dead vegetable matter.

It is those kinds of fungi which feed on living plants that are so important to man, for their power of destroying crops is enormous. Thus a form of fungus known as rust on wheat in the west, in the year 1917, caused an estimated loss of one hundred million bushels, worth at least \$125,000,000.

Rubber alone is affected by fifty different kinds of harmful fungi, of which all together some fifty thousand species are known.

It is only fair, however, to remember that many fungi are useful to man, such as the yeasts, which give us beer, wine, vinegar, and so on, and that other class, that plays so important a part in the ripening of cheese and fruits, and in curing tobacco. Even the distinguishing qualities of the best wines are due largely to the fungus which collects on the grape berries and is known as "bloom."

Dye Silk Stockings Blouse or Sweater In Diamond Dyes

"Diamond Dyes" add years of wear to worn, faded skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, fadeless colors into her worn garments or draperies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

You can get anything you want if you want it hard enough.

Minard's Liniment for Corns and Warts

A curious lake in Ireland has the power of petrifying any substance that falls into it. While the petrification is not absolute, the substance is coated with a layer of stone which is found dissolved in the lake, and the stone then hardens and forms a shell over the substance.

REGARDED ARTIFICIAL TESTS. Bridgework, or Old Gold wanted. ANY CONDITION. Cheques remitted upon receipt. Samuel Baker, 14 Stafford St., Toronto.

Children Love It and It's Good for Them

Nothing better for Children than delicious desserts made from McLaren's INVINCIBLE Jelly Powders. Absolutely pure and wholesome. Doctors prescribe them for invalids.

Costs only 1 cent a serving. One package serves eight people. At All Grocers. Don't say McLaren's—Specify McLaren's INVINCIBLE. Made by McLaren Limited, Hamilton and Winnipeg.

After EVERY Meal

give your digestion a "kick" with WRIGLEYS.

Sound teeth, a good appetite and proper digestion mean MUCH to your health.

WRIGLEY'S is a helper in all this work—a pleasant, beneficial pick-me-up.

The aim in handling timber on Dominion forest reserves is to protect mature timber and accelerate the rate of growth of growing timber, in order to have as large a supply as possible, both present and future, to meet the requirements of the surrounding settlements.

Mining Outlook in the Yukon

Optimism is the Prevailing Note—Stages of Development—Silver-lead Production.

Although in Ottawa, which is in constant touch with the outposts of the Dominion, information is always available, through the North West Territories and Yukon Branch of the Department of the Interior, of that most distant field, Yukon, the presence at the capital of official business of Mr. George P. MacKenzie, the Gold Commissioner, attracts to the territory and its affairs more than usual interest. Mr. MacKenzie is the chief executive officer of the Department of the Interior in the territory and is in touch with all its activities.

Great Natural Resources.

Yukon has great natural resources in her game and fur, and in recent years the agricultural development has been very marked. Fur farming is also becoming an important industry. These, however, are secondary or subsidiary to the metal mining industry, which originally attracted the attention of the world to the territory, and which now shows every promise of renewed activity.

Yukon Territory is now a recognized producer of gold, silver, lead, and copper. The total output of the territory to date may conservatively be given as follows: Gold, \$200,000,000; silver, 3,500,000 ounces, valued at \$2,100,000; lead, 3,500 tons, valued at \$400,000; and copper, 12,000,000 pounds, valued at \$2,700,000.

The principal placer field, the area within fifty miles of Dawson, has been intensively operated during the past twenty-five years. The life of the camp during that time may be divided into three phases in so far as the methods employed to recover the gold are concerned: (1) "the primitive," covering the period of wood fires and small open cuts; (2) "the mechanical," when although the operations were still conducted by individual operators, steam power was used operating certain types of machinery, the greater part of which was evolved in the territory to meet local conditions, and (3) what may be termed "the corporation" period, which entailed the formation of holdings extensive enough to warrant a very considerable capital expenditure on account of plant, by means of which results could be obtained much more efficiently and much more economically.

While there are quite extensive areas within the Klondike and other districts where ground can still be profitably operated by individual effort, up-to-date mechanical methods being employed, their life as fields of individual endeavor is largely dependent upon the day when the larger plants become available. It may, therefore, be considered that the placer areas immediately surrounding Dawson have passed through the first two phases. A part of this field has also received its final clean-up under the third and last phase of mining activity, but there still remains an area which will keep the available plants, both dredging and hydraulic, occupied for many years to come. It is not easy to forecast the life and gross results of these operations, but it is safe to say that they will continue for twenty years and should maintain or exceed the present annual output of something over one million dollars per year.

The copper areas of the Territory have not, during the past year, been active. This is due not only to the copper market but even more to the fact that these deposits have heretofore been operated entirely as "high grades," no capital expenditure which might put them in the market as standard producers, having been made.

Silver-Lead Ores.

Of the total silver output quoted above, over 2,000,000 ounces have been secured by a by-product in the refining of placer gold. During the year 1914-15, some 1,500 tons of silver-lead ores were shipped from the Mayo district. The property supplying this then stopped production and it was not until the discovery of new leads on Keno Hill in the same district that shipments were resumed. During 1921-22, about 5,000 tons of ore were shipped, yielding some 200 ounces per ton in silver and 12 per cent. of lead.

During the coming season not less than 7,000 tons of ore of as good or better grade than the above will be produced. Up to the present, by far the greater part of the territorial income has been derived from placer gold operations, and while there is no reason why these should fall below their average of recent years, there is very little doubt that the silver-lead areas will shortly develop the more important industry.

The Mayo District.

The Mayo district now appears to have all the factors that are necessary to the development of a high grade silver camp. Already over 1,500 claims have been taken up, many of which show well defined outcroppings of silver-lead ores. Upon three groups a considerable amount of development has been done and two of these are shipping high grade ore with every prospect of increasing their output to the capacity of the transportation system. At present, the ore is hauled some forty miles, by either horses or gasoline tractors, to the bank of the Stewart River, from which it is shipped by river and ocean boat via the mouth of the Yukon River, to Pacific coast smelters. Under present conditions, the cost of production, shipment and treatment is slightly over \$100 per

ton. This means that only the higher grades of ore can be handled at present, but the active properties, are blocking out much milling ore which it is hoped to either concentrate and ship, or alternately, reduce in a local smelter.

The camp is already served with good winter roads which can by a moderate expenditure be improved for summer use for all classes of traffic. The camp is easily accessible during summer by steamboat and during winter by stage from Whitehouse. The country affords sufficient lumber for general mining operations and it is also most fortunate in its power potentialities. Fraser Falls, on the Stewart River, the Canyon on Mayo River, and Janet Creek, all quite close to the operating properties, can be developed to produce ample power for all purposes, including the electrical reduction of the ores. It is also feasible to use the power already developed on the Klondike. This could be done by the construction of something less than 100 miles of transmission lines.

The views of the residents of the territory and all those interested in its mineral resources and production are now most optimistic. The life of the placer fields is anything but over, and now it appears certain that a period during which the silver-lead areas of the territory will equal or exceed the gold fields in the production of wealth has just been entered upon, while further gold, silver, and copper deposits may be said to be held in reserve awaiting the day when the world market calls them.

Story of the Typewriter.

It is almost impossible to point to an invention which has been of greater use in the business world than the typewriter.

Christopher Latham Sholes was the father of the typewriter, for it was in 1867 that he produced the first crude machine. Sholes, a native of Milwaukee, was a man of considerable abilities, and had won fame with a number of inventions before he evolved the typewriter. At various times he had been printer, editor, newspaper publisher, postmaster, and a member of the Legislature.

Sholes edited a newspaper the office of which was above the Milwaukee telegraph office. One day he went in to the telegraph office and asked the chief operator for a sheet of carbon paper.

In those days carbon paper was a curiosity, and when the operator asked what he wanted it for, Sholes replied, mysteriously: "Come to my office to-morrow at noon and I'll show you."

The next day, at the appointed time, the telegraph operator went upstairs. There he found Sholes displaying a strange contrivance, which comprised pieces of pine board, an old telegraph key, a sheet of glass, and other odds and ends.

Taking his borrowed sheet of carbon and a thin sheet of white paper, Sholes slipped them into the machine against the piece of glass. Moving the paper slowly with one hand, he tapped the telegraph key with the other. On the end of the telegraph key was the letter "a" cut in brass.

Sholes's device was a "writing machine." It wrote only the one letter over and over again, but the inventor was on the right track. After some months of experimenting he produced the first typewriter. On this machine the keyboard was like that of a piano, but otherwise it bore a close resemblance to the typewriters of to-day.

Good for Trade.

Applicant—"I'm an experienced barber, and I should like a job in your shop."

Barber—"You? You'd never do with that bald head. A customer would laugh if you asked him to buy a bottle of our celebrated magic hair restorer."

Applicant—"Yes, but I'd be the man who used the hair restorer that Jones sells in the shop round the corner."

Barber—"I never thought of that; you can start."

No Longer Handicapped.

James and Harry, the twins, were exactly the same size, and looked alike. They were often stopped by strangers, and spoken to about their striking similarity.

It so happened that James grew much taller than his brother.

One day a man met them and, rather puzzled, asked: "Are you boys twins?"

"Not any more. I outgrew the twins," proudly explained James.

An Early Migrant from the South.

First Bird—"Didn't you come north unusually soon?"

Second Bird—"Yes, I heard nests are going to be awful scarce."

The greatest shops in the world are to be found in Chicago, Philadelphia, and Toronto, according to a London expert.

—AND THE WORST IS YET TO COME

Radio-Telephones and Aeroplane Patrols

The use of the aeroplane to assist in the work of detecting and reporting forest fires, and in some cases even in the transportation of men and supplies to the scene of the fire continues to develop new possibilities. Aeroplanes have been used for the past two seasons by the Forestry Branch of the Department of the Interior in the provinces of Manitoba, Alberta, and British Columbia, as well as by various provincial services.

The Air Board of Canada recently conducted at Rockcliffe, near Ottawa, an interesting demonstration of the possibilities of the aeroplane, equipped with radio-telephone, in forest protection. An aeroplane, equipped with wireless transmitter, was flown over the city and vicinity at altitudes up to 5,500 feet, the plane being sometimes ten miles distant from the receiving station. Two sets of receiving apparatus were used. One of these was the regular receiving set of the station. The other was a simple receiving apparatus set up in a tent with a single wire aerial suspended between two light poles. By the use of either, the men on the ground could at all times hear every word of the observer in the plane, as he described what he could see and noted the location of imaginary forest fires. Messages can thus be sent by the wireless for distances up to fifty miles, and

even, under favorable circumstances, of one hundred and fifty miles. Thus news of a forest fire, with its exact location, approximate size, and the number of men required to fight it can be sent to a ranger immediately on its detection, and measures started to fight it at once.

Method of Operating.

According to a plan outlined for the equipment of a forest-fire-protection staff, the rangers would each be equipped with one of the light receiving sets, which could be sealed to prevent any interference. The ranger would thus not be able to use his set to communicate with the observer in the plane, but would be provided with a sheet which could be used to give signals to the flier. For instance, the ranger, by spreading his sheet on the ground, can signify to the man in the plane that he is ready to receive messages; when he has received the message, he takes up the sheet; if he wishes it repeated, he unrolls the sheet again, and so on. The preliminary operation would be the sounding of a klaxon by the observer in the plane. This type of service can be installed very cheaply.

The principal headquarters would be equipped with a large set of apparatus for both receiving and sending, and by this orders could be sent to all the rangers at stated hours.

Day After Day.

Little Willie was of an inquiring turn of mind. He was asking questions.

"Daddy," he asked one day, "is to-day to-morrow?"

"No, my son, of course it isn't to-morrow," was the reply.

"But you said it was," murmured Willie.

"When did I say to-day was to-morrow?" asked father.

"Yesterday," answered Willie.

"Well, it was. To-day was to-morrow yesterday but to-day is to-day, just as yesterday was to-day yesterday but is yesterday to-day, and to-morrow will be to-day to-morrow, which makes to-day yesterday and to-morrow all at once. Now, run along and play."

Pa's Joke.

Teacher—"William, can you tell me what makes the Tower of Pisa lean?"

Willie—"I asked pa that and he said it was probably built during the famine."

Summer was once the season of sickness, in comparison with which winter was healthful; but of late years June, July and August have been among the most healthful months, and the great flood of sickness has come in midwinter. A great deal of it begins with a "common cold," which most persons regard too lightly; they do not realize the danger to themselves of the likelihood of their passing the infection on to others.

Fret Not Thyself

(Paraphrase of the 37th Psalm)

By J. Lewis Milligan

Fret not thyself, O troubled soul,
Because some men of guile succeed;
Nor envy those who gain control
By cringing wile and crafty deed;
They shall be cut down like the grass,
And as the stubble they shall pass.

Trust thou the promise of the Lord,
Nor in His righteous service tire;
He will not fail to keep His word,
He shall give thee thy heart's desire:
Commit thy ways unto His will
And He shall all thy dreams fulfil.

God is the final judge of men,
And He shall bring the truth to light;
Go thou thy way in patience, then,
And still be true to what is right:
The Lord shall yet thy worth proclaim
And put thy enemies to shame.

Fret not, O tired and troubled soul,
Nor envy men of craft and guile;
Hold thou thine anger in control,
They flourish but a little while;
Yea, thou shalt look for them in vain—
The righteous only shall remain.

Stories About Well-Known People

Cheap at Any Price.

There is a story going round about Lord Balfour discussing the advisability of a tax on bachelors with Sir Robert Horne.

The proposal put forward was that the tax should increase proportionately for every ten years of unmarried life.

"Yes," remarked the chancellor of the exchequer, with that canny smile of his, "in your case you would have to pay about £40 a year."

Lord Balfour was quiet for a moment, and then replied: "I think it's worth it."

Woman Ship's Engineer.

The first woman to go to sea as a ship's engineer, Miss Victoria Drummond, recently completed a voyage from England to Australia and back, with the proud record of having misadvised only one watch. The Anches, Miss Drummond's ship, encountered rough weather, but the woman engineer carried on as efficiently as her male colleagues. She kept watch from four to eight every morning and afternoon.

Down below she wore the usual overalls, and messed with the other engineers. Off duty she wore a navy blue skirt and jacket and a peaked cap. Miss Drummond has had several years' experience on shore, and is a graduate of the Institute of Marine Engineers. After eighteen months at sea she hopes to get her certificate.

Boy Who Stopped the War.

The world is indebted to Sir Tom

Bridges, the Governor of South Australia, for this astonishing story.

"I was in Tiflis in 1919," said the Governor, "and got a telegram from the Control Officer at Erivan, the capital of Armenia, in sight of Mount Ararat, saying war had broken out between Georgia and Armenia for the possession of a large tract of rich country that belonged to neither of them."

"I asked who the Control Officer was, and they said he was only a schoolboy who had just come from England, where he had been in the cricket eleven at Eton and Sandhurst."

"I decided to give him a chance, and sent him a telegram to stop the war and delimit a neutral zone. He was alone there, with his servant and an interpreter, and I afterwards learned that, riding a mule and accompanied by an interpreter and his servant bearing a Union Jack, he visited the opposing armies and in the name of the British Empire ordered them to cease firing."

"He then ordered both armies back ten miles, summoned their chiefs, and delimited a zone about the size of Yorkshire, over which he made himself Governor. He enlisted police, appointed officials, and ran a first-class State for about six months, and only when we found that he was revising the marriage laws did we send an officer of more mature experience." The boy was Captain Archibald Sholto Douglas, of the Rifle Brigade, who is now twenty-six.

Tim O'Brien.

If the worst of sinners should end his life with a great and noble deed, will the Almighty forgive him? That was the theme of conversation of two old men who had just discussed the story of Tim O'Brien.

Many years ago Tim settled with his little family in a log cabin in the southern part of Ohio. Soon afterwards he got work in a distillery—an unfortunate thing, for love of strong drink was Tim's weak point. So it was not long before he was discharged. Then matters went from bad to worse until his little family in the log cabin, half starved, half clothed and freezing, gave way to a prevailing epidemic and were carried off one by one. Tim was the only member left.

The poor fellow had learned his lesson. He left the neighborhood of the distillery and went to a little village in northern Ohio where whiskey was scarce. There he apprenticed himself to a blacksmith. His genial nature and ready joke soon made him many friends, and when he started his own forge his shop was the most popular for miles round.

One day as he was shoeing a vicious horse he was kicked insensible. The owner of the animal hurriedly fetched the doctor, who administered a dose of whiskey. The fiery stuff revived poor Tim, but it also revived the love of drink in him. Not long after his accident he was dead drunk and remained so for more than a week.

The following Sunday he walked, not too steadily, toward the little village church, which was also the schoolhouse. Dog days had almost passed, but the weather was hot and sultry; all the windows were flung wide open—the door had long before fallen from its rusty hinges. While the preacher droned out his sermon certain vagrants of the feathered tribe walked aimlessly in and out of the doorway, pecked at the buttons of the people's shoes, held tournaments in the aisles and even stood on the window sill and crowed. Tim stumbled into the room and seated himself on a back bench. He had almost fallen asleep when a wild cry sounded outside. He sprang to his feet. Not two hundred feet away and running straight for the door came a large mastiff, mad! White froth was streaming from its mouth, and its bloodshot, bulging eyes were glaring. Frantic cries rose in the church.

"Keep quiet!" roared Tim. "I'll take care of the dog!"

Then he rushed at the brute. Over and over the two rolled, and for five awful minutes no one could tell which was winning. Then Tim rose; his neck and face were lacerated and his clothes were in rags. But the dog that might have caused the death of many lay dead.

Tim spent that night in forging a great chain, with which he fastened himself to his anvil. He suffered untold tortures before death took him, but to-day the old people love to talk of his courage.

A Secret for Centuries.

The recent discoveries at Luxor recall the story of the Rosetta Stone.

More than two thousand years ago Ptolemy V. was ruler of Egypt. His acts included the abolition of many taxes, and he made gifts of money and endowments to the temples. When Egyptian priests assembled at Memphis to celebrate the anniversary of Ptolemy's coronation, they passed a decree which provided for special festivals to be held in his honor. Finally it said, "A basalt slab on which a copy of this decree is cut shall be set up in the temple."

To-day, visitors to the British Museum can see an irregularly shaped slab of black basalt on which an inscription of the priests' decree was cut twenty-one centuries ago. It is the famous Rosetta Stone.

It was found near the mouth of the Nile, not far from the town of Raachid, or Rosetta, as it is now called. The discovery was made by an officer in Napoleon's army. Noticing the strange characters inscribed on the stone, which he thought might be writings, the officer saved it from destruction.

The inscription is in three forms. First, it is cut in hieroglyphs, the weird picture-writing used by the priests of ancient Egypt. Then it is carved in Demotic characters, a form of writing in use in the days of Ptolemy. The third form is in the Greek language.

When the stone was discovered, the various writings carved on the relics of ancient Egypt were unvoiced riddles. But it was realized that a translation of the Greek text cut on the stone would provide a clue to the meaning of the hieroglyphic characters.

The honor of making the first decipherment belongs to Champollion, a famous French scholar, who, in 1822, announced that he had lifted the veil which for centuries had enshrouded the life and history of Egypt.

The Still Country.

She—"The still condition of the country can be felt."

He (sniffing air)—"The still condition of the country can be smelt. I'm sure of that!"

Women Outnumber Men.

On the whole continent of Europe, according to the latest statistics, women outnumber the men by some 25,000,000.

Every square mile of the ocean has a population of 120,000,000 fish.

CANADA
PROVINCE OF QUEBEC
DISTRICT OF TERREBONNE
No. 2263

Notice is hereby given, that this twenty-fourth day of March, one thousand nine hundred and twenty-three, there has been lodged in the office of the Prothonotary of the Superior Court, in the district of Terrebonne, a deed executed before David Desroches, notary, on the fourth of November, one thousand nine hundred and two, between Alphonse Alarie, farmer, of St-Jovier, and Arthur Alarie, farmer of the same place, being a sale by the said Alphonse Alarie, to the said Arthur Alarie, of the following immovables: "10. A farm situated at St-Jovier, known as the plan and book of reference of the said parish, under number one hundred and thirty-seven (No. 137) with house and other buildings thereon erected."
20. A lot of wood land situated in the Parish of Ste-Therese de Blainville, being part of number eight hundred and ninety-two, of the plan and book of reference of the said parish of Ste-Therese de Blainville, measuring eight perches and one third, by the width, on twenty acres of length, adjoining on the south at Filas Desjardins, on the north, to Thomas

Chartrand, on the west to Alfred Alarie, and on the east to Francis Giroux, representing Gilbert Courcelles, and possessed by the said Arthur Alarie, as proprietor for the three years now last past; and all persons who claim any privilege or hypothec upon the immovables immediately before the registration of the said deed by which the said lot was acquired by the said Arthur Alarie, are hereby notified that application will be made to the said Court of the district of Terrebonne, at Ste-Scholastique, the seventh of May, one thousand nine hundred and twenty-three, at ten o'clock in the forenoon, for the judgment of confirmation of title; and that unless their claims are such as the registrar is bound by the provisions of the Code of Civil Procedure to include in his certificate to be filed in this case, they are hereby required to serve their oppositions in writing, and file the same in the office of the said prothonotary, within six days after the said day, in default of which they will be forever precluded from the right of so doing.
Ste. Scholastique March 24th, 1923.

ARUNDEL.

The Church Services on Sunday next, 22nd inst., will be as follows:—

Anglican.
Weir, 10.30 a.m.
Grace Church, Arundel, 7.30 p.m.
S. S. Grace Church, 2.30 p.m.
Rev. G. H. Gagnon, M.A., Pastor.
Arundel Union Church.

Rockway, 10.30 a.m.
Crystal Falls, 3.00 p.m.
Arundel, 7.00 p.m.
S. S. Arundel, 10.30 a.m.
Rev. Albert Johnson, Pastor.

The regular meeting of the Arundel Branch of the W.A. will be held at the residence of Mrs. Smellie, on Saturday afternoon, 21st inst., at 2 o'clock.

The meeting of the Girls' Branch of the W.A., held at Grace Church Rectory, on Saturday afternoon, 14th inst., was a very successful one, and was well attended.

Mrs. Winch, of Montreal, is the guest of Mrs. C. J. Stanforth this week.

SCHOOL TREAT.

Following the Celebration of the "Silver Wedding" of Mr. and Mrs. C. J. Stanforth, which was held in Stanforth's Hall, on the 6th inst., and recorded in our issue of last week, the Teachers and pupils of the Arundel Model School, eighty-five in number, marched from the school to the Stanforth Hall, when they were entertained at lunch by Mr. and Mrs. Stanforth.

All had an enjoyable time, and Master Gavin Graham, on behalf of the girls, and Master Maurice on behalf of the boys, in well chosen words, thanked the host and hostess for their kind hospitality, to which Mrs. Stanforth fittingly replied.

After the singing of the National Anthem, the gathering returned to the school.

On the same evening, Monday, 7th inst., Miss Jennie Stanforth and Master Perley Stanforth, entertained their school friends to the number of twenty-two.

The evening was spent in dancing and the playing of games, and all had a jolly, good time.

Hon. Smeaton White spent the weekend at his summer house here.

Mr. W. D. Graham, is on a visit to the City.

THE LATE MISS BATES.

The funeral of the late Miss Isabella Bates, daughter of Mr. and Mrs. J. H. Bates, who died in Hospital in Montreal, was held at Grace Church (Anglican), Arundel, on Thursday afternoon, 12th inst.

The deceased, who was in the seventeenth year of her age, was taken to Montreal, suffering from internal pain and nausea.

On examination it was found that at some time in the past, she had swallowed a coin, or something of that description, which around an abscess had been formed.

Unfortunately, it was found that the abscess had broken internally, and that the young girl was practically in a dying condition, no operation being possible.

Her death occurred on Monday, 9th inst., the body being brought here the same evening.

The funeral was largely attended, the church being filled with relatives and sympathizing friends.

Rev. G. H. Gagnon, M.A., Rector, conducted the service, Mrs. Gagnon presiding at the organ, and old suitable and familiar hymns were feelingly sung.

The interment was in the Cemetery adjoining the Church, and much sympathy is extended to Mr. and Mrs. Bates and their family, in their sad loss.

MAGGIE AND JIGGS AT THE GOLDEN GATE

St. Peter stood at the Golden Gate
With a solemn look and an air sedate
While up to the top of the Golden Stair
Maggie and Jiggs were ascending there.
They asked for admission and came to a stand
Expecting to be led in by the hand.
Low down they bowed with smiles to win
Maggie asked St. Peter to pass them in.
Maggie was tall and dark and thin
With a scraggy beardlet fringing her chin
While Jiggs was short and thick and stout
And his stomach was built so it rounded out
His face was pleasant and all the while
He wore a kind and genial smile.
The choir echoes in the distant woke
Jiggs kept silent but Maggie spoke.
Oh Thou who guardest the Gate said she
We two came thither beseeching Thee
To let us enter the Heavenly Land
And play our harp with the Angel band.
Of me St. Peter there is no doubt
There's nothing in heaven to bar me out
I've attended the church meeting three times a week
And almost always I'd rise and speak.
I've told the sinners about the day
When they'd repent of their evil ways
I've told my neighbors I've told them all
About Adam and Eve and the primal fall.
I've shown them all what they'd have to do
If they'd pass in with the chosen few.
I've marked their path of duty clear
And laid out the plan of their whole career.
I've argued and talked to them loud and long
For my lungs are good and my voice is strong.
So good St. Peter you'll clearly see
The gates of Heaven are open to me.
But for poor Jiggs I regret to say
Hasn't walked the narrow way.
He smokes and swears, and grave faults he's got
So I don't know whether he'll pass or not.
He never would pray with honest vim
Go to a revival or join in a hymn.
While I the sins of my neighbors bore
He gadded about with Dinty Moore.
He made a practice of staying out late.
Which is a fault all women hate.
But when at last he would come home
The Rolling Pin went, straight, for his dome.
I know him St. Peter I know him well
If he escapes from me he'll go to hell.
But good St. Peter I need him here
And hope the Golden Gate he'll clear.
On earth I bore a heavy cross
But give me in Heaven Jiggs to boss.
I've brought the rolling pin, plate and jars
To keep him dodging and seeing stars.
But say St. Peter it seems to me
This Gate isn't kept as it ought to be.
You ought to stand by the opening there
And not sit down in the easy chair.
And say St. Peter my sight is dimmed
But I don't like the way your whiskers are trimmed.
There cut too wide with an outward toss
They'd look much better narrow and straight across.
St. Peter sat quiet and stroked at his staff
In spite of his position he had to laugh.
Then said with a fiery gleam of his eye
Who's attending this Gate Maggie, you or I—
Then he rose in stature tall
And pressed a button upon the wall
And said to the Imp that answered the bell
Escort this female down to Hell.
Slowly Jiggs turned by habit bent
To follow wherever Maggie went.
While Jiggs was still standing there
St. Peter noticed the top of his head was bare.
He then called to poor old Jiggs and said
How long my boy have you been wed
Thirty years he said with a weary sigh
And then he thoughtfully added, Why?
St. Peter was silent with head bowed low down
But raised his hand and scratched his crown.
Then seeming a different thought to take
He slowly half to himself did speak
Thirty years you have lived with that woman there
Tis no wonder then that your head is bare
Thirty years he's lived with that tongue so sharp
Say Angel Gabriel, give Jiggs a harp.
A jewelled harp with a golden string
And place him near where the Angels sing.
Give him a seat up near the throne
With cushions where he can sit alone.
Order the Angels to sing their best
For Jiggs has certainly earned a rest.
See that on finest foods he feeds
He's had more Hell than any man needs.
It isn't just the right thing to do
To roast him on earth, and Hell too.
They gave him a harp with golden strings
A glittering robe and a pair of wings.
And Jiggs looking down from his high abode
Saw Maggie chasing the Devil down the road.

Mr. Belanger, near Hill's Store, St. Ward, Lachute, Que.

Oddfellows Celebrate their 104th Anniversary.

Some 56 members of Laurentian Lodge, No. 14, I. O. O. F., attended Divine Service in the Methodist Church on Sunday last when the Rev. A. Mathews, took for the subject of his discourse the story of Jonathan and David which exemplifies the true spirit of the Order as founded upon the principles of friendship, love and truth. The lessons were creative of highest ideals and Mr. Mathews paid tribute to the Brotherhood, urging upon them the necessity of renewed activity during the unsettled conditions and keen competition where there is such need for the helping hand.

The members of the Lodge met in regular session on Tuesday evening and the degree team exemplified the first degree, after which there was a splendid response to the appeal sent out that the night should be devoted to a "Get Better Acquainted" and "Roll Call." Inclusive of a number of letters from far away brethren, which proved most interesting in recounting memories of by-gone days, there were 85 who answered the roll. It was an occasion of much real pleasure, but there was a tinge of sorrow as immediately after the Roll had been called, Bro. H. Slater was asked to unveil a "Memorial Tablet" to two of the members who were unable to respond to their names Bros. Wm. Norman and John S. Menzies, who died of wounds in France during the World War. The tablet bears the pictures of the two brethren and is suitably inscribed.

LOCAL NEWS.

Mrs. Geo. Leggett spent the week-end in Montreal.

Mrs. Geo. Creswell spent the week-end in Montreal.

Miss Jean McGibbon is spending a few days in Montreal.

Mr. Fred Jordan, of Montreal, spent a few days in town this week.

Mr. Miller, of Montreal, was the week-end guest of Mr. Wm. Deacon.

Mrs. A. A. McOuatt and Miss Jessie Walker were recent visitors to the city.

Mrs. Reid Giles and son, of Ottawa, are the guests of Mrs. Harlow Giles this week.

Mrs. Stevens, of Montreal, is visiting her sister Mrs. J. H. McFaul this week.

Mrs. Chas. McPhail, of Fasset, was the week-end guest of Mrs. Archie McFaul.

Mr. Herbert Kearns and son Hugh were in town this week, the guests of Mr. Slater.

Messrs. E. F. Ayers, C. Tremblay and H. Tessier left for Boston on Wednesday morning.

Miss Jean Campbell and Mr. Dave Campbell, of Montreal, were week-end visitors in town.

Mr. Jas. W. Gall started construction of his new home on Bethany St. opposite the Post Office.

Miss Winnifred Bain and Mr. Donald Bain, of Montreal, were week-end guests of Mrs. Jas. Bain.

Mrs. Gardner and son returned home on Friday last after spending a month's visit in Huntingdon.

Miss Wilhelmina Shaw, of Montreal, spent the week-end the guest of her mother Mrs. R. E. Carstner.

Mr. W. Switzer, who has been spending the winter months in town, left for Lancaster, Ont., on Tuesday.

We have also Tweed Suits for boys for every day wear-low priced.

W. Banford & Son

Mr. J. P. Middleton, of Morin Heights, was in town on Wednesday leaving the same evening for Montreal.

Mr. J. E. Arnold has gone to Moncton, N. B., where he has opened a branch sales stable. Mrs. Arnold accompanied him.

Mr. and Mrs. Chas. McFaul, of Chute au Blondeau, and Miss Florence McGillivray of Montreal were week-end visitors in town.

Misses Jessie and Willow Lavery of Montreal were week-end guests of Mrs. Geo. Deacon, Miss Florence Anderson of Ottawa is her guest this week.

Mrs. Perry and infant son who have been spending the winter months visiting friends in Montreal and Lachute leave for their home in Vancouver, B. C., this week.

Messrs. Jas. Morris & Son have opened up a Cash Grocery in their property in the East Ward. They invite the public to buy with them and save money.

Mr. A. O. Lloyd, assistant Minister in the Presbyterian Church, will come this week to live among us for the summer months. He will reside as last year at Mrs. Flood's in Brownsburg.

On Wednesday evening April 11th, Mr. George Arthur Bigras and Miss Laura Laurin were married by Rev. A. George MacKinnon at the Manee. They will take up their residence in East Settlement on the farm belonging to Mr. Bigras.

Mr. Wm. Campbell who has been spending the winter visiting friends in Lachute and Dalesville, left for his home in Revelstoke, B.C., on Tuesday.

Mr. A. J. Dupuis, of Quebec, has been visiting his many friends in town, prior to leaving for Metapédia Valley where he will be road inspector for the summer months.

We are pleased to note that among the first to offer for the relief of the stricken town of Mansonville, was Nurse Annie McFaul, one of our Lachute girls. May God help these workers in their noble task.

Rev. Romeo Raymond, who, owing to ill health has been spending a couple of months in town with his parents Mr. and Mrs. Adolphe Raymond, left on Wednesday for a visit to Verner, Ont., where it is hoped he may fully recover from his illness.

Reader, when you are preparing to come to town to do some trading. Just pick up your home paper, glance at the advertising columns and see who wants the trade. We guarantee they will save your money. The man who advertises certainly has inducements to offer you or he would not ask you to call and see him before buying.

The Election of Officers for the Ladies Home and Foreign Mission Circle, and the Mission Band, of the Baptist Church, took place on Wednesday as follows:—Mrs. A. Beers, President; Mrs. J. S. Gilles, Vice-President; Mrs. W. Ball, Secretary; Mrs. Albert Morrison, Treasurer; Mrs. S. Goldworthy, Organist. Supt. Mission Band, Mrs. W. Ball; Leader, Miss Tomalty, Organist, Miss Lila Cruise; Treasurer, Miss Mary Cruise.

At the last meeting of the Board of Directors of the Bank of Nova Scotia Mr. Francis P. Starr, of St. John, N. B., was elected a Director of the Bank succeeding the late Mr. James Manchester, of the same city. Mr. Starr was a Director of the Bank of New Brunswick, at the time that Bank was amalgamated with the Bank of Nova Scotia, and will represent on the Nova Scotia Board the interests of the former customers and shareholders of the Bank of New Brunswick. He is also a Director of the Eastern Trust Co., Halifax.

ST. ANDREWS EAST.

Mr. Alec Lekey and Mr. N. Albright were in Montreal during the past week.

Mr. Bieson, of the Bank of Nova Scotia, was in Montreal on business, Friday evening.

Mr. Melville Balantyne, of Montreal, was the week-end guest of Mr. and the Misses Walsh.

Mr. Jolliott Shaw, of Montreal, spent the week-end with his parents Dr. and Mrs. G. H. Shaw.

The regular meeting of Christ Church W. A. was held at Mrs. W. H. Robertson's last Thursday.

Mrs. Sommerville, of Montreal, is the guest of her brother-in-law and sister Mr. and Mrs. J. J. Fraser.

Owing to the absence of the Rev. W. A. Howard, there was no service in Christ Church a week ago Sunday.

Miss Margaret Albright returned home Tuesday last after spending a few days with relatives in Montreal.

Col. Evans, the Messrs. W. and G. Simpson and W. Jeffrey, of Montreal, spent the week-end at their summer homes.

The departure of Mr. and Mrs. Alan Matthews is the "raison d'être" for a number of social functions in their honor. Mr. and Mrs. Matthews will be very much missed, but especially in Church and Social activities.

The Rev. Mr. and Mrs. Howard returned Friday after a pleasant visit with friends in W. Shefford and Waterloo. Mr. W. A. M. Howard, Montreal, accompanied them home, and spent the week-end with them at the Rectory.

Rev. Albert Matthews, Pastor.

Presbyterian Church Services will be held next Sunday April 29th, as follows:—In Lachute at 11 a.m., and 7 p.m. The Minister Rev. A. George MacKinnon will conduct the services. His morning subject will be "The Book of Ruth." Mr. A. O. Lloyd will conduct the services in Upper Lachute at 11 a.m., and in Brownsburg at 3 p.m. Everyone is made welcome to these services.

BIRTHS.

McCULLOUGH.—At Isle au Chata on Friday April 20th, to Mr. and Mrs. Proven McCullough, a son.

ARMSTRONG.—At Montreal Maternity Hospital, on Sunday, April 22nd, to Mr. and Mrs. Jas. Armstrong, (nee Violet Joss), a son.

IN MEMORIAM.

RODGERS.—In loving memory of our dear Norah, who passed peacefully away two years ago, April 19th, 1921.

Thinking of you dear Norah, Thinking of the past, Picturing you in our memory Just as we saw you last Inserted by her Parents and Sisters.

VARY.—At Brownsburg, Quebec, April 22nd, Sarah Jane Rowe, beloved wife of Campbell Vary, in her 65th year.

WALKER.—In loving remembrance of Gavin Melkie Walker, who died April 26th, 1922. Gone, but will never be forgotten. Inserted by his father.

FOR SALE.—Horse, harness and buggy. Apply to Alex Bothwell, Lachute.

Men's Ready-to-Wear!

Our New Suits for Men are now in stock at prices running from
\$12.00 to \$25.00

Choice patterns in Greys and Browns are in all sizes now.

We have a very full line of Indigo Blue Suits also.

These all are at prices that will surprise you considering the quality.

We are selling these goods at lowest profits in our history.

Come in and try one on.

THE MAGIC BILLIARD BALL

BY EDMUND SMITH MIDDLETON.

In the lull of an August afternoon Shaman Tuloc sat within the shaded doorway of his little shop contemplatively smoking. From time to time a thin brown hand slowly stroked his long gray beard, while his dark, melancholy eyes looked far away into the distance.

Presently a shadow darkened the doorway, as a well-dressed stranger halted uncertainly and gazed curiously within. The old merchant rose courteously and with a wave of his hand extended a silent invitation to enter. Seeing that the stranger still hesitated, Shaman said in a tone devoid of eagerness, "Would the gentleman care to step in? It is not necessary to buy."

An air of distinction in the old man's bearing, scarcely expected in such surroundings, excited the stranger's interest, and with an appreciative "Thank you, if you don't mind," he entered.

The merchant noted the young man's eyes as they swept over his wares with half-observant gaze, and saw that his face wore the unsatisfied expression of one who seeks something greatly desired.

"It is not merchandise the gentleman seeks to-day," said Shaman with kindly interest, continuing to search the other's face with his far-seeing eyes.

"Are you a fortune-teller?" asked the stranger eagerly.

"Not in the ordinary sense, my son," answered the aged merchant solemnly, "but much of the wisdom of the East is mine, and I have known the hearts of many men."

"If you help me," burst impulsively from the other's lips, "you may name your own price."

"I am listening, my son," responded Shaman with dignity, apparently unmoved by these glittering promises.

"My name is Philip Arden," began the young man in quick, excited tones, "and I am what people call rich. If my lot had been different, with my own way to make, I should doubtless have become a gambler, as the gam-

ing instinct is strong within me. At times I am consumed with a perfect fever to excel at games involving chance and skill."

"Why do you tell this to me?" demanded the old man.

"You shall see," answered Arden, meeting his glance fairly. "Being wealthy, the gambler's love of gain does not appeal to me. Instead, I have devoted myself to games of skill, playing as an amateur with men of my own class. After making a fad of one game after another, I have settled upon billiards, to which I have devoted myself, heart and soul, for two years."

Just then a soft rustle of silk in the back of the shop, a sudden trembling of awning curtains, and a quickly caught breath bespoke a listener in those regions. Shaman Tuloc never turned his head, although he heard Arden was too absorbed in his story to notice. One look at those curtains would have disclosed a pair of peering eyes that shone like midnight.

"Go on," said the merchant, calmly stroking his beard. "There is yet something to tell."

"No lover could have been more devoted to his mistress than I to my favorite game. I wooed her early and late, playing my way up through the ranks at the club, until last spring I defeated the strongest men and was hailed club champion. But alas! my joy was short-lived."

"Your hand lost its cunning?" suggested Shaman Tuloc.

"No, not so. A more subtle hand than mine entered the lists," explained Arden with a touch of bitterness in his tone. "While my laurels were yet fresh, a stranger joined the club, a tall, slender man, with sallow skin and coal-black hair, which parted over a narrow, contracted forehead. His black, bendy eyes were set close together over a long hooked nose, and his thin lips were shaded by a scanty black mustache. They say that those ratty, weasel-like eyes could look into the shining depths of any jewel and rightly prize its worth. Enough for me that he could play billiards like a fiend. His long slender hands controlled the balls like a magician. He defeated me once, twice, thrice—each time worse than before—in a word, ignominiously. Let me vanquish him! Help me to defeat him!" cried Arden, moved to the depth of his being, "and I will give you what you like."

Shaman Tuloc smoked a while in silence, then rose from his seat and drew a small casket from a secret recess in the rear of the shop. The box was of fragrant sandalwood, wrapped with cords and sealed in many places. Carefully removing these, he disclosed a small bundle of numerous layers of fine silk, concealing some object within. Very reverently the old man unwrapped the silken folds until there lay uncovered in his palm a small cylinder of ivory of wondrous quality, and without spot or blemish.

"My son, you behold a portion of the task of the Sacred Elephant of Siam, the most sacred of the holy herd. He went into the silence at the age of two hundred years and this relic possesses a mighty power. Listen to the words on the scroll. I will interpret." As Shaman Tuloc spoke he lifted from the casket an oriental scroll and reverently held it toward the light.

"To the pure and single of heart," he read in a low voice, "I will grant his wish."

"I will give any price, fulfill any conditions," exclaimed Arden in a choking voice, his whole form trembling.

"Look! What do you see?" the old man suddenly demanded, holding the ivory above his head.

"Only the ivory, nothing more," the young man answered.

"Look again!" cried Shaman Tuloc eagerly. "Look at the centre! What do you see now?"

"I see a delicate pink light shining through the ivory," answered Arden excitedly. "It seems to move and tremble like a rose swaying in the breeze."

"It is the soul of the sacred tusk!" cried Tuloc triumphantly, "the spirit, the life. Therein lies the power."

"What am I to do? Tell me!" demanded the young man.

"Bring from your club the finest ball you have. My hands shall fashion its mate in size and appearance from the sacred tusk. I will intrust the task to no other. In a week's time you shall have a ball endowed with the living spirit of victory."

That same evening Arden brought from the club the desired model and the next day Shaman Tuloc began his self-imposed task. As he wrought his labor of love, patiently, silently, with reverential skill, the slender, graceful form of his only daughter glided often through the parted curtains and hung over her father's shoulder with moist eyes and heaving bosom. More than once a rosy blush suffused her modest cheek as she recalled the young stranger's face and trembling voice. Then she murmured a silent prayer for her father's task and for the young man's victory.

On the eighth day the ball was finished, and to the instructed eye seemed to throb visibly with sentient life, as it lay, white and glistening, in the sandal casket.

"Take it, my son," said Shaman Tuloc, committing the box to him. "Let no other hand than thine use this sacred ball. Let no other interest divide your heart. Then victory will attend."

The report that Arden was to play his conqueror again filled the club house. An indefinable feeling was in the air that this game would possess unusual features—that it was a strife for mastery to an unusual degree.

The two men presented a remarkable contrast as they stood in evening dress at the end of the table ready to begin. One was the picture of cold, nervy cunning and calculation; the other, the best type of a gentleman player, brave, generous, skilled, eager for the fray. It was like night matched against the day—the powers of darkness arrayed against the powers of light.

To the surprise of his ferret-eyed opponent, Arden, playing with the sacred ball, won the bank. The balls were spotted and the game began. The style of play was fourteen-inch balk line, one shot in. Without effort, by graceful, easy play, Arden rolled off run after run. His ball was absolutely under control and the audience was with him to a man, following his game with frequent applause. But, do what he would, Arden could not shake off his opponent. He answered run with run and invariably finished a point or two in the lead.

Arden, however, never lost confidence for a moment in his ball or the outcome of the game. As the players approached the goal, the 300 mark, almost abreast, but the dark man still in the lead, the excitement grew intense. With only eight to go, the latter ran six and missed on his 299th shot. A hateful scowl showed on his face, but changed instantly to a triumphant smile, as he saw that Arden, who stood at 295, was left an impossible shot.

Arden's ball lay tight against the cushions in one corner, the red ball in the same position in the far corner on the same side, and his opponent's ball against the cushion along the rail half way between the other two balls.

It, indeed, looks to be an impossible shot, but Arden, with unruffled confidence played a masse whose like had never been seen on that or any other table. His ball, with a beautiful curve, spun to the ball half way down the rail, continued its journey in the same marvellously accurate fashion to the red ball, and counted, of course. The house fairly thundered its applause. The result of the shot was to leave the three balls lined up along the centre of the table. A second brilliant masse counted 297, and the remaining three shots were clicked off in rapid succession.

As Arden made the last shot, which meant victory for him, he felt his eyes drawn irresistibly across the table to the tier of seats opposite. His gaze rested on a pair of eyes shining with a radiance he had never seen before. As he felt himself yielding to their power and stared toward them, a strange thing happened. With a sud-

NURSES

The Toronto Hospital for incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three-year course of training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the school, a monthly allowance and travelling expenses to and from New York. For further information apply to the Superintendent.

begin. One was the picture of cold, nervy cunning and calculation; the other, the best type of a gentleman player, brave, generous, skilled, eager for the fray. It was like night matched against the day—the powers of darkness arrayed against the powers of light.

New Serial Next Week.

A young Canadian author, whose remarkable facility with the pen promises her a brilliant future in the realm of fiction, is Miss Pearl Foley of Toronto, whose story, "The Gift of the Gods," will begin in our next issue. This tale of exciting adventure and romance opens in China and is told in a delicate and masterly fashion. Watch for the opening chapter next week.

den click the wonderful ball, with which he had played and won, snapped asunder and parted into two pieces. As it fell apart, Arden saw an appearance like a delicate pink flame leave the ball, pass through the air toward the wonderful eyes, then over the head of Shaman Tuloc's beautiful daughter and away.

A minute later Arden was holding her by the hands and gazing at close range into those wondrous orbs. Tuloc hastened to the table and clasped the precious fragments of ivory to his breast.

Later that night, as he stood beside the beautiful Esther in her father's shop, Arden asked, "Why did the ivory ball snap and the pink soul flee away?"

"Because, my son, another love had come into your heart"—and then, as Shaman Tuloc looked on the young people, he raised his hands and said, solemnly, "The God of heaven bless you, my children!"

(The End.)

Bovril Limited Reports Good Business in 1922

The report submitted at the 26th Annual General Meeting of Shareholders of Bovril, Limited, in London, England, last month, was most satisfactory.

A net profit was shown of £305,709—out of which after payment of regular dividends or preferred stocks a dividend of 9% on the Deferred Shares—free of Income Tax—was voted.

Sir George Lawson Johnston is Chairman, The Earl of Erroll, Vice-Chairman, and Mr. Douglas Walker, Managing Director. Sir Cornwalter Rason, a former premier of Western Australia, has recently accepted the position of Secretary.

Bovril exports in 1922 exceeded those of 1921 by 22%, and 1923 shows every indication of still further growth.

The increasing amount devoted to various forms of advertising was one of the noteworthy features of the statement—and one to which perhaps much of the increased success of operations was due.

DIAMONDS AND ROSES.

Diamonds and houses do not reach the acme of perfection until in the proper setting. We cannot all have diamonds, but there are very few of us but can have the proper setting for our homes. In fact, a house is not a home complete until it has the proper setting. Be it perennial or annual flower gardens, shrubbery or roses, or a combination of all these, it matters not, if only there be the setting.

If there were generally known the ease with which roses could be produced, we would become a nation of rose growers. There are types of hardy roses adaptable to the most rigorous climate, that will give a wealth of beautiful bloom throughout the warm months.

Many are deterred from growing this wonderful flower because of the supposed exacting conditions required. True, roses reach perfection in clay soil, require a sunny spot protected from strong winds, and there are numerous bugs that like them so well they cannot resist eating them. But on the other hand, by using care in the selection of varieties adapted to needs of your particular locality, creating soil conditions and furnishing wind breaks, anyone can grow roses.

Here we grow the hybrid ever-blooming tea and hybrid perpetuals, grown on their own roots, not budded, and are very seldom troubled with disease. Our soil is a light clay loam, just ordinary good garden soil, and we have a succession of bloom from June until killing frosts. Our circular beds of tea are on the north side of the house, far enough away from the buildings to get the morning sun, but shaded from the heat of midday.

We built a lattice work fence to the north and west of these beds in the form of the letter L, planting alternately White Spirea and Crimson Rambler climbing roses. The wall of vines and the thick growth of the spirea have been sufficient protection, in spite of the fact that the position is a very exposed one away from the protection of adjoining buildings.

The hybrid perpetuals or bush roses are to the south of the house, in rows without any protection excepting that of the house, yet they thrive, grow and bloom every season. Unfortunately, our front yard is too shady to permit of growing any flowers.

Now to get back to soil conditions. If your soil be heavy clay or light

sand, it will produce an abundance of roses if properly handled. If you have heavy clay that hardens and packs during the drier months, in the early spring, spade in well rotted manure, the deeper the better, and mix thoroughly. If fine sand devoid of humus, use the same method, with the addition of plenty of fresh cow dung.

When the work is done, cover bed an inch thick with hydrated lime, raking it well into the soil. If soil is in the least dry at planting time, puddle the young plants, that is, add water and soil alternately until the consistency of thick mud, finishing the operation by hilling the young plant with dry dirt. Later, if any of your charges have a tendency to stand still or some are inclined to make poor growth, a tablespoon of bone meal worked in around the plant will give them a new lease of life and promote growth. Repeat this about once a month.

For all chewing and sucking insects, we spray with a solution composed of a heaping tablespoon of arsenate of lead and one-third of a teaspoon of black leaf No. 40, to a quart of water. If mildew appears we sprinkle dry sulphur on the bushes while the dew is on in the early morning. If black spot bothers we spray with potassium sulphide, one ounce to three gallons of water. We use an ordinary quart sprayer, the first spray being applied

SMART'S LAWN MOWERS

CANADA'S BEST!

It isn't possible to build a better lawn mower than SMART'S. Smart's Mowers have proved their superiority wherever grass is grown.

Easy running, keen cutting and absolutely guaranteed.

as soon as the leaves are out in full repeating as soon as the rain or dew has washed off the lead and nicotine. With the varieties we have named, you will have little trouble with mildew or black spot.

ESCALLOPED MEAT.

Three-fourths cup rice, one and half cup tomato juice, 1 cup bread crumbs, 3 tablespoons fat, 3 tablespoons flour, 1½ cup meat chopped or ground, salt and pepper. Cook rice until tender in plenty of boiling salted water. Prepare tomato sauce of the tomato juice, flour, fat, salt and pepper in the same manner as white sauce. (The stock could be used in place of the tomato.) Fill a baking dish with alternate layers of rice (or macaroni) and chopped or ground meat. Pour tomato sauce (or gravy) over each layer. Cover with buttered crumbs and bake until crumbs are brown.

Minard's Liniment for Coughs & Colds

Driven to Drink.

After Every Meal WRIGLEY'S

Top off each meal with a bit of sweet in the form of WRIGLEY'S.

It satisfies the sweet tooth and aids digestion.

Pleasure and benefit combined.

No Time.

Little Mary came into the house bedraggled and weeping.

"My goodness," cried her mother, "what a sight you are! How did it happen?"

"I'm sorry, mamma, but I fell into a puddle."

"What! with your new dress on?"

"Y-y-yes; I didn't have time to change it."

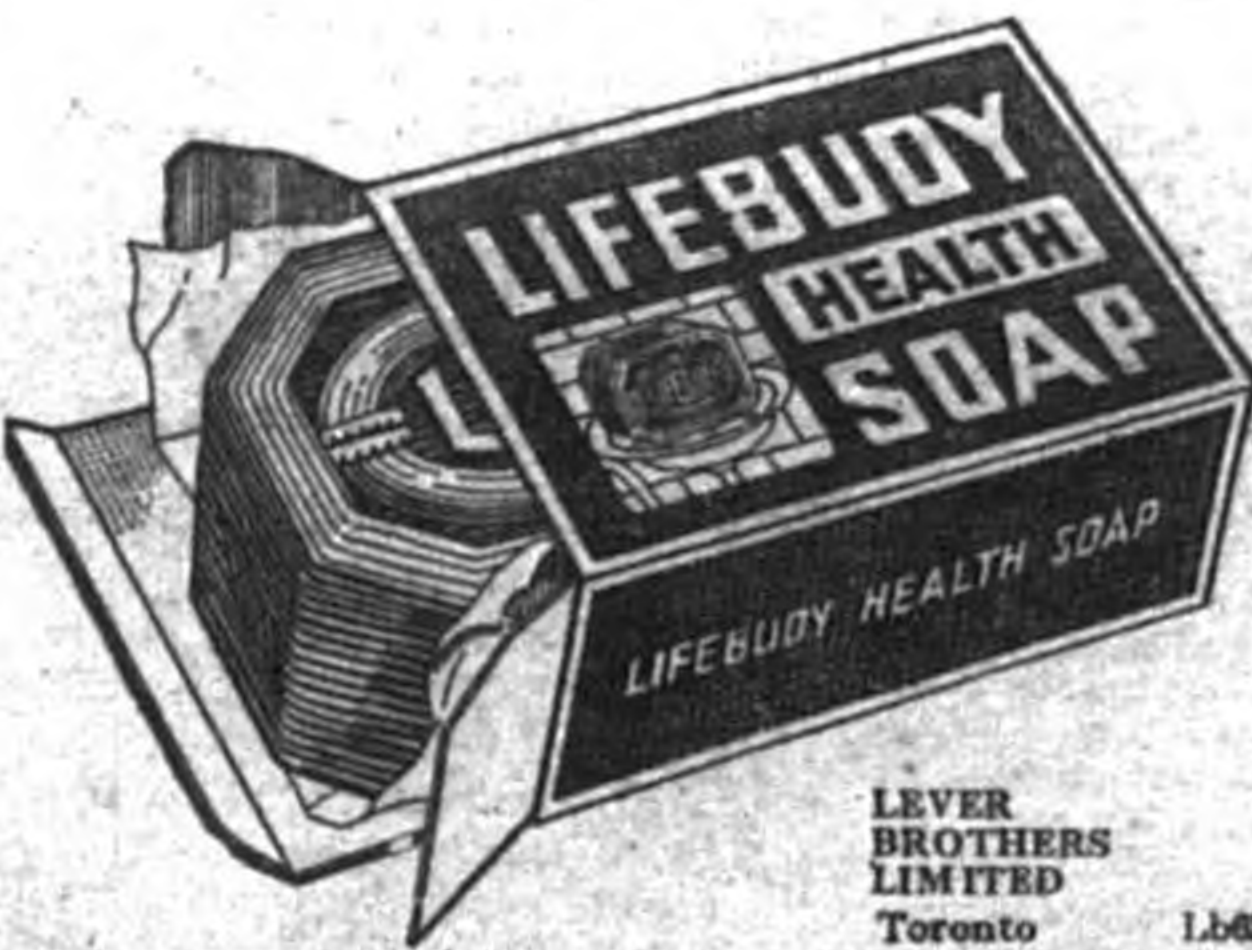

The darkest shadows of life are those a man makes when he stands in his own light.

"It feels good to feel clean"

The stains of toil cannot hold out against the big, creamy lather of Lifebuoy. The pure palm and cocoanut oils flush out the pores and bathe the skin with health and safety.

The health odour vanishes quickly after use.

Races Around the World

A race round the world has always been a popular theme with novelists. Jules Verne, for instance, wrote, "Round the World in Eighty Days," in which he described the record-breaking journey of one Phineas Fogg.

Wonderful performances have been accomplished by real people. The actual round-the-world record is held by an American, J. H. Mears, who, in 1913, circled the earth in thirty-five days, twenty-one hours, thirty-five minutes, and four-fifths of a second. Before this the record was held by Andre Jaeger-Schmidt, who performed the trip in thirty-nine days and rather less than twenty minutes.

Mears undertook the feat with the support of an important American newspaper, and the time allowed was thirty-five days, twenty-three hours, thirty minutes. Mr. Mears left New York for Paris on July 2nd. From there he travelled by the Trans-Siberian Railway.

At one point he was held up for eighteen hours by a flood. He managed to pick up nine of the lost hours by bribing the engine-driver, but the Russian officials threatened to throw him into prison if he continued this policy.

In all he covered 21,066 miles, averaged 587 miles a day. He arrived back in New York on August 6th, well inside his time limit. The total cost of the trip was only \$540.

Schoolboy's Wonderful Trip.

Two of the most notable record-breaking trips were those of Charles Fitzmorris, a schoolboy, who won a race organized by an American newspaper by travelling round the world in sixty days and thirteen and a half hours, and Nellie Bly, a woman journalist, who completed the journey in just over seventy-two days in 1889.

A Birthplace of Invention.

In the centre of the mining town of Redruth, Cornwall, stands a house which is intimately associated with two of the great inventions that made Britain the supreme industrial nation throughout the nineteenth century.

The owner of the house, William Murdoch, while experimenting in 1784 with coal gas, had one of those "happy accidents" that happen to clever and observant men.

To put out the gas flame he clapped his wife's thumb over the end of the pipe. As the smell warned him that gas was still escaping, he held a light to the thumb and was surprised and delighted to find that the tiny spurt of gas through a hole in the thumb gave a much brighter and steadier light than the stream of gas from the open pipe. Thus was born the gas-burner.

Murdoch also invented the pneumatic pump and two different kinds of valves for the steam-engine invented by James Watt, whose assistant he had been.

But it was in the cellar of the house that the greatest idea of all was born. There Murdoch had built a small steam-engine, which was then used solely as a pumping and stationary engine. Richard Trevithick, Murdoch's friend, saw the engine one day and had it explained to him. He went away thinking, set to work, and in due time built the first locomotive, the father of all railway engines.

Murdoch's house was partly destroyed by fire some months ago, but it is to be restored and preserved as a local memorial to the two inventors.

Honesty.

Whatever happens, go straight, go square, be able to hold up your head as a man of honor and you will be indomitable.

If you go down, if you become involved in financial or other difficulties, your very reputation for going square will put you on your feet again.

If you are true to this course, true to the principles of manhood, there is no power that can make you a failure.

If you have played fair and square, if you have not quailed before danger or bent the knee before Baal, if you have been a hard fighter for your ideals, a server of your fellow-men, a lover of your race, whatever may happen to your material fortunes, you are a success.

It doesn't matter whether you have money or not—that alone can never make a man a success—whether you live in Park Lane or in the slums, in a mansion or in the workhouse, if you have stood the test of man, you are a winner; you are the noblest creation of God—you are a Man.

More Profit in It.

The Hostess—"You play, don't you, Mr. West? Would you care to make a four at bridge?"

West—"No, I thank you. Your husband has just now invited me to his den where I think I can make a fifty at poker."

The earliest known trip round the world was that of the Magellan expedition in 1519-1522. These hardy adventurers took three years over their voyage.

It might be thought that, as ten years have elapsed since the present record was set up, a modern traveller might lower it. A journey round the world to-day would take considerably longer than thirty-five days.

The last three records were set up with the assistance of the Trans-Siberian Railway. This is not working now owing to the state of affairs in Russia, and a world traveller would have to use the route which the early record-breakers followed—that is, by the Mediterranean, Suez Canal, Indian Ocean, and China. Fifty-four days is the least time it would take to get round the earth to-day.

Three Months by Aeroplane.

A traveller starting from New York could get to London in six days by means of one of the fastest liners; then from London to Paris and from Paris to Marseilles he could use the regular air services, which take about a day. From Marseilles a P. and O. mail steamer could take him to Hong Kong in twenty-nine days. From Hong Kong to Yokohama would take five days, and the journey from there to Vancouver would occupy another nine. From Vancouver to New York by train would occupy four days.

By aeroplane the world could be circled in less than fifteen days—that is, if there were a machine capable of making the journey without a stop. But this is not possible, and when stops and so on are taken into consideration the time works out at nearly three months. At least this was the time allowed by Sir Ross Smith, who was preparing for a round-the-world flight when he met his death.

Where the Custom of Standing During the "Hallelujah Chorus" Originated.

W. F. Gates, the writer of a book entitled "Anecdotes of Great Musicians," gives us an interesting clue to the origin of the custom of standing during the singing of the celebrated "Hallelujah Chorus" from Handel's "Messiah." "The uninitiated," he says, who attend a performance of Handel's "Messiah" are frequently surprised when, at the first notes of the "Hallelujah Chorus," the whole audience rises to its feet. Some think this custom arose from the desire to pay homage to the words. But if that be the case, they might well stand during the whole oratorio. Others imagine that it was because of the intense enjoyment in the music some audience had a hundred and fifty years ago, which brought them to their feet.

But this is said to be the truth of the matter: At one of the early performances of this grand oratorio, the King of England, George I., was present. During the singing of this chorus, His Majesty, either greatly enjoying the music, or perhaps simply desiring to change his position, stood up; at once the courtiers and people followed suit, thus originating a custom which is quite pleasant in view of the physical relief afforded by the change of posture in a two-hour performance.

Short and Snappy.

"Why is he always so snappy?"

"Because he is always so short."

Horseshoes of Paper.

It has been proposed to make a paper horseshoe that shall for general purposes be the equal of the steel article in the following way: Parchment paper is cut in horseshoe form and built up to a suitable thickness by the use of a mixture of turpentine, Spanish white shellac and linseed oil treated with litharge, and the whole is placed under a hydraulic press. This produces very light and uniform pieces and it is an easy matter to stamp out the nail holes and grooves. Instead of nailing to the horse's hoof they can be applied with an adhesive composition whose principal part is a solution of rubber in bisulphide of carbon. Paper waste could also be moulded into the shape of a horseshoe by use of the press, but the result is not so good as with the above.

Why Are Americans Often Called "Yankees?"

When the first English people went to America, the Indians, unable to pronounce the word English, called the settlers Yengoes or Yangees, as the nearest they could get!

In course of time this Yankee or Yankoe became a slang term for "excellent," or the "very best." The British troops in the war of Independence picked up this word, and used it in derision of their opponents, calling them Yankoes, and so we first have the word in its modern sense.

—AND THE WORST IS YET TO COME

Mummies in the Making.

The world has awakened suddenly to an interest in all matters pertaining to the ancient Egyptians, and particularly to mummies.

The elaborate precautions taken to preserve the dead in those far-off days arose from humble beginnings dating back thousands of years, when the dead were dried in the sun and placed in a vault containing a few flat instruments and a pot or two of food for sustenance of the departed's soul on its journey.

It was found that this method did not prevent the body from decaying, and so the fashion for embalming started, the object being to preserve the features of the dead.

A king's tomb was prepared while he was still in his prime, and when he died he was embalmed with great religious ceremony.

When a person of importance died the embalming process was soon started. An incision was made with a stone knife—for some reason metal knives were never used—and the viscera was drawn out. The brains, too, were removed. The organs were preserved in jars, which were enclosed in a box and put into the tomb with the mummy.

Strong embalming fluids were poured into the body, which was then steeped in natron and left for seventy days. After this it was washed and bound with strips of the finest flax, strong gum being used to secure the wrappings.

The mummy was first placed in a wooden coffin. The latter was deposited in another coffin, which in turn was enclosed in a third shaped in the form of a human being.

The idea was that the soul was free to wander through the abodes of the dead for a period of about ten thousand years, after which it was supposed to return and look for its earthly body. Transmigration was imagined to have taken place if the body decayed or was disturbed.

What Sunlight Does.

According to a French scientist long residence in a city makes a person's eyes grow paler and his hair lighter in color because he is less in the sunlight.

The Advantage of An Education.

James Mulligan was the only man in the village who could be hired to saw and split wood or to use a lawn mower, and he never lost a chance to impress the fact upon a casual listener.

"I've got to get this job through for your ma quick as ever I can," he announced to the small son of one of his employers. "I'm losing sixty cents an hour right along every minute I'm here. There's three people waiting for me now, and I don't know how they are going to get along till to-morrow without me, any one of them."

"Why, Mr. Mulligan," said the boy respectfully, "I don't see how you are losing sixty cents an hour when mother pays you twenty, and you couldn't be in more than one place at the same time, and—"

"Have you got as far as geometry in your studies?" inquired Mr. Mulligan coldly, resting his arms on the handle of the lawn mower.

"No," admitted the boy.

"What you do you'll understand a good many things that's hid from you now," said Mr. Mulligan, resuming his leisurely progress over the lawn.

Magnetic Rotation.

Iono-magnetic rotation is the term given to a certain phenomenon. If a spark from a condenser of considerable capacity is sent horizontally through a gas and two small vertical planes of mica in the form of a cross are suspended in the middle of the discharge by a fine fibre attached to the centre of the cross the spark produces no rotation of the cross. If, however, a vertical magnetic field is established in the gas the cross rotates through a considerable angle if the gas is air and over a small angle in other gases.

This rotation is ascribed by some authorities to the bending of the paths of the ions or electrons and to the additional protection which the vanes afford each other against impacts from one side rather than from the other in these circumstances. The observed rotations indicate that the effects of the positive ions are in general greater than those of the negative.

A POLISH VIEW OF THE GOLD KING

Uncle Sam—"Why don't you quit worrying me about taking any more of Europe on my hands? Don't you see I am loaded down as it is!"

—From Murcha, Warsaw

Vimy Ridge, April 9, 1917

This is the living and the dead who fought for us,
Who fought and lived, and died for us on Vimy Ridge;
This is our living sons, our dead, who bought for us
Our greatest; held for us, with sword, the nations' bridge!

This is the men who sealed their faith in blood for us,
Who mocked for us at death; took up the challenge grim;
Who fought like warrior kings of old and flung for us
The gates of freedom wide, valiant of heart and limb.

The nations, rising, bring a homage rare to them
Who faced the thundering guns, the rush, the dire advance;
Who stormed the fearsome height, and breached the line for them,
And, dying, brought to death a sweet, a new romance.

Our living heroes! Rapturous praise we bring to them!
Theirs was the hour, at last, to conquer and to live;
What shall we render, humbly, in our love to them,
What wreathed incense shall the nation proudly give?

Nought we can bring, in pride, shall pay our debt to them
Who fought, and lived, or bravely fell on Vimy Height;
Yield we our all, our lives, in tribute free to them,
Who drove the darkness back for us—who brought the light.

Anna Durie.

Minstrel Show Programmes Should Not Contain Negro Spirituals.

The average Canadian, who loves the old negro melodies, will readily agree that the movement to preserve the negro spirituals from abuse deserves everyone's moral support. To make use of such places as "Go Down Moses," "Swing Low Sweet Chariot," or "I Ain't Going to Die Any More," at a minstrel show or in a turn on the vaudeville stage is just as irreverent and out of place as to make light of such world favorite hymns as "Lead Kindly Light," and "Nearer My God to Thee." This is because the spirituals are sincere religious outpourings of the negro heart that had their birth during troublous times of the slavery days in the South.

It is true that from a musical, theological and poetical standpoint, the spirituals may be considered outlandishly imaginative and even crude, but they are none the less sincere. No gentleman nor lady would use such pieces in a way to give offence to the negro people any more than they would make disrespectful use of the religious songs of any other race.

One is disposed to think that the use of negro spirituals as comic choruses for a minstrel show is almost always unintentional. Our Canadian young people are too courteous and well bred to knowingly give offence not only to colored people, but to all music-lovers and those who respect the feelings of others, by singing essentially sacred songs as funny minstrel stunts. A number of these songs are not labelled sacred in their titles, and it is only necessary to have our young people acquainted with the facts to guard against a misuse of negro spirituals.

Any person who has ever heard one of these numbers rendered by the Mendelssohn Choir or by the Fluke University Jubilee Chorus of over 200 voices in their home city, as the writer has done, will never fail to realize what the negro spirituals really mean.

Highest Dwelling in U.S. on Mount Rainier.

For the purpose of providing shelter for mountaineers who may be overtaken by storms, the United States government recently constructed a novel stone dwelling at an altitude of 10,000 feet, on the south side of Mt. Rainier, Rainier National Park. The location of the shelter is on a sand and pumice-stone ridge at the base of Gibraltar, a famous landmark in the park. The spot is known as Camp Muir, named after a famous explorer who ascended the mountain in 1858, and chose this place for a camp, because it is practically the only spot on the mountain sheltered from heavy winds. The shelter is built of stones gathered on the site, and the style of architecture resembles that of Indian dwellings of the Southwest. Constructed by the National Park Service at a cost of \$2,500, the building houses comfortably 25 persons.

Simple Perfume Making.

At first thought it might seem an impossible feat to collect the perfume of flowers after it has escaped into the air, yet it seems simple enough by this method.

Fresh, high scented blossoms are placed in an uncovered bowl filled with water and set near the "collector," which consists of a common glass funnel with the small end closed. The funnel is filled with a mixture of crushed ice and salt and suspended in an upright position. Moisture from the air of the room forms on it and unites with the emanations from the flowers. As the moisture collects it runs off the tip of the funnel into a receptacle. If this liquid is mixed with an equal amount of pure alcohol the perfume of the flowers is preserved indefinitely.

Permits for Radio.

While radio broadcasting has been begun in Brazil from stations in Rio de Janeiro the Government requires permits for the installation of receiving sets.

What the Clock Does.

Ma—"Is the clock running, sonnie?"
Sonnie—"No, ma; it's just standing still an' wagglin' its tail."

Queer Fashions in Engagement Rings.

Romance was not associated with engagement rings when they first came into fashion.

The engagement ring is said to have originated as an institution to hold the fickle and forgetful man to his bargain from the time he declared his passion until the wedding ceremony took place.

It was during the second century B.C. that women began to flash an engagement ring on the fourth finger of the left hand as a symbol of betrothal.

It was displayed on that particular finger because of the belief, prevalent at the time, that a special vein ran from that finger to the heart. Later this idea was scouted and other fingers became fashionable.

In Russia the ring was worn on the forefinger, and in France on the middle finger, while during the seventeenth century English women wore the ring on the thumb.

At one time the engagement ring consisted of three hoops looped together into what was known as a puzzle ring. On the wedding day one of these rings was given to the bridegroom, another to an intimate friend, and the bride kept the remaining hoop.

For many centuries the engagement ring did duty as a wedding ring as well. The wedding ring, also, was not given from sentimental motives, but was at the start an article almost as practical as a frying-pan! The wife was given a plain gold ring with a key attached, so that she, and she only, could have access to household goods.

The wedding ring was adopted by the Anglo-Saxons about A.D. 860. During the generations since then it has been alternately plain and elaborate. Very often the rings were inscribed in a puzzling fashion by interlocking the names of bride and groom.

Affecting the Fish.

"Doesn't dumping all this booze into the sea affect the fish?"

"To be sure it does—they're catching pickled herring everywhere."

Getting Butter from Columbia Fish.

Butter from a fish? Sounds ridiculous, but it is true. In March only the butterfish, or colichan, comes from the unknown depths of the Pacific up the rivers of British Columbia to spawn. It is almost pure oil, and it is to the Indians of the region where butter is to Anglo-Saxons and olive oil to southern Latin races. The Indians get a year's supply of the equivalent of life sustaining fats of other nations in three weeks. Then the fish is seen no more for another year.

The fish, from six to eight inches long, are taken in millions by Indians in nets, then thrown into rough cedar bins ashore to soften in the sun, the first of the fat rendering process. After a week or so in the sun, according to the weather, the fish are put in great cedar vats of boiling water, the water heated by dropping hot stones continually in. This, oddly enough, makes better colichan butter than boiling the white man's way. A parallel may be cited in old and new methods of producing maple sugar, the old much better of flavor. The oil is skimmed off into cedar box containers holding from ten to twenty gallons, and hardens to an appearance very much like lard. The cedar box containers are marvelous works of joining and are watertight. The colichan butter when well made is palatable and contains no strong fishy taste. Needless to say there are as many grades of good and bad colichan butter as corn.

The Imperfect Looking Glass.

Man—"What became of that mirror I bought for my wife?"

Maid—"The missus made me take it back, sir. She said it didn't do her justice."

Practition makes perfect—vice a well as virtues.

**Always
The Same—
Always The Best**

THE Quaker Flour motto means what it says. The Quaker standard is the highest in flour milling, and this standard is rigidly maintained in every bag. First comes the careful cleaning of the grain, then a milling process possible only with the most modern equipment, and finally the constant laboratory and baking tests.

"The happy baker uses Quaker"—because its consistent uniform quality guarantees unvarying success. Equally satisfactory for bread, cakes and pies.

Subscription \$1.50 in advance to points in Canada, and \$2.00 in the United States.

5 cts. a line for Poetry accompanying Memoriam Notices.

EN PASSANT.

"THE PA-PERS this week are full of warn-ings", said Old George, who talks in that hyphenated way peculiar to elderly people whose teeth are liable at any moment to play tricks on them: "Warn-ings concerning the a-waken-ing of Chi-na, the con-tin-ued occu-pa-tion of the Ruhr, the dan-gers of the com-mune in Russia, and the com-mun-ist-ic tend-enc-ies of the La-bour-ists in the Brit-ish par-li-a-ment. These are mat-ters out-side of us; the warn-ings don't affect us be-cause they have no di-rect bear-ing upon our own con-ditions. We read them be-cause they con-trib-ute to our gen-ral knowl-edge of cur-rent hu-man aff-airs. Such 'things are put in the pa-pers chiefly to show us how much bet-ter off we are here at home than any-body else un-der the sun. We get a glow of com-fort from them, and we throw an-other log into the stove with the feel-ing that wheth-er we a-do-pt day-light sav-ing or pre-fer to go on in the old way, we get more out of our lives than the in-hab-it-ants of the dis-turb-ed a-reas of other con-tin-ents."

Old George is a regular optimist in most things. I don't remember having formally introduced him to you. I apologise and hasten to correct the omission. I may have referred to him as "my friend" several times, and I do so again. He is. Any time I am short of ideas, and we all get that way sometimes, Old George is sure to start something. He "retired" from active work some time ago and has more time than I have to hunt up subjects for thoughtful consideration. If his history were compiled for a local "Who's Who," it would show that he is not anywhere near being an oldest inhabitant, although familiarly known as Old George. That name was evidently bestowed upon him because of his sage like appearance and remarks, and his deliberate manner of speech. When he retired, he simply gave out that beyond cutting down an occasional tree, laying in a few dozen cords of wood, shoeing a horse when the smith was busy, cutting a field or two of hay, giving a hand with the harvest, cultivating a few acres of his own land, looking after his two cows, and putting in a few days at a time on a neighbour's farm, he considered himself past work and was going to take a rest "be-sides which," he said, "I may start up a poultry farm this year or next." I don't know what he would call work.

A-MONG the warn-ings" continued Old George, "I see one which does ap-ply to us. On page 39, top of column 5, (he is great on chapter and verse) the Gen-ral Pros-per-ity we spoke about last week is again referred to: Prospects point to con-tin-ued pros-per-ity for the rest of the year, but the storm-cone signal is hoist-ed as a warn-ing a-gainst in-fla-tion. Ev-ery-thing has gone well for the last six months: La-bour has been fully em-ployed and pro-duc-tion has been at al-most ca-pa-c-ity: We can see clear sailing for at least six months a-head, but the dan-ger of in-fla-tion ex-ists."

"The dan-gers of in-fla-tion," said he, "are well known to the shrewd bus-ness men, but," he continued, looking over the top of his spectacles with a disconcerting fixity of gaze which always makes his words seem to have a close personal application, "there are other kinds of in-fla-tion be-sides the com-mer-cial va-ri-ety and the puff-ing up of rub-ber ty-res!"

The rest of Old George's remarks were as follows, I won't give it to exactly his own style lest our printer should run short of hyphens:

How to keep pace with relative values is always a problem which sound bus-ness men con-ceive to solve, mostly to their own advantage, until they caught by that idea of in-fla-tion which burst the frog, the frog that tried to reach to the size of the ox, according to Aesop. Prosperity is full of limitations which have to be respected. You cannot treat a rubber ball as if it were a steam cylinder: You have to regulate your pressure to the capacity of your con-tainer. Don Quixote had windmills in his head, as Sancho Panza said, but his condition was not one of glorious isolation. Every day you can hear the zip of some torn up victim of in-fla-tion, puffed up by themselves beyond their carrying capacity. Nothing you say, or I say, or the papers says, will stop the crop: They spring up like mushrooms, and I

am not so sure that we need worry about them, they are bound to explode sooner or later, and the place there-of will know them no more. We might as well deplore the sadness of the fact that butterflies wings cannot be made to serve some good purpose like ship sails or aeroplanes. Steady going folks don't try to raise the wind that way. They grow hemp instead.

THE LINKMAN.

MORIN HEIGHTS

Dr. Christie, of Lachute, visited Alex. Graves who for some weeks has been suffering from sciatica or kindred affliction.

Miss M. J. Jekill was taken to the General Hospital, of Montreal, where she is favorably progressing from effects of a paralytic stroke.

Mr. J. W. Seale and family are leaving Morin Heights this week having closed his bakery business here. His place will be hard to fill.

Mr. and Mrs. Earl, of Montreal, and Mrs. R. Ival and daughter, of Christieville, with Mr. and Mrs. M. A. Hystop were week-end guests with Mrs. R. Kennedy.

Rev. Osborne Lackey, lately Missionary of Baffin Land, and wife were week-end visitors at the Vicarage. He preached in Trinity Church Sunday at 11 a.m., and on Monday evening in Wood's Hall delivered a lecture on Life in Baffin Land to a large and appreciative audience.

One of the best entertainments ever seen in our town was put on in Davis Hall Saturday. Proceeds which are being donated to Cemetery fund amounted to over \$60.00. A number who could not be present on account of weather and roads have asked for a repetition in the near future. It is being staged in Shawbridge next week.

Those acquainted with Seale's store in Morin Heights will see a wonderful improvement in the general appearance of the interior, for it has all been renovated and fixed through in most up-to-date manner, with quartered oak counters, dry goods shelving, and Walker's Bin Outfit, all being finished in white enamel. Two large show windows make an added attraction as it is on the corner of the Montreal-St. Agathe highway.

GRENVILLE.

Mr. Hugh Cameron spent Sunday and Monday in Ottawa.

Mr. Fraser Carson has gone back north to resume his duties as culler in the lumber yards.

We are glad to report that little Paul Dumas, infant son of the C.P.R. Agent here, is home from the Hospital where he has been seriously ill. He is much improved in health.

Mr. and Mrs. James Stewart gave a miscellaneous shower for Miss Laura Trinneer, whose marriage to Mr. Victor McVicar, of McVicar's corners, took place on the 19th of April.

The many friends of Miss Reta Murray, of Ottawa, formerly of Calumet, youngest daughter of Mr. and Mrs. Willie Murray, are deeply grieved to hear of her death and extend our heartfelt sympathy to the parents.

"A JUDICIAL SALE."

Of the valuable property of the Estate of the late Wm. Robertson, of Lachute, Que., consisting of house and lot, on Main Street, will be held at the Court House, Ste. Scholastique, Que., at 10.30 a.m. Tuesday May 8th, 1923, and sold to the highest bidder.

FOR SALE.—Holstein year old heifers of high producing stock at Farmer's prices. Apply to F. J. Watson, Morin Heights, Argenteuil, County.

LOUISA.

The funeral of the late Isabel Rowe, aged only eight years seven months and seven days, was conducted on Friday afternoon, April 20th, at St. Aiden's Church, Louisa, by the Rev. Mr. Lummis, who spoke to the bereaved ones in tender and comforting words.

The funeral was largely attended by sorrowing relatives and friends who gathered together as their last token of respect to the little departed one, whose life on earth was short, but bright and full of joy.

Little Isabel was in her usual health until the afternoon of Monday, April 16th, when she was taken suddenly ill, and despite all that loving and medical help could do she passed quietly away on Wednesday, at 11 o'clock. She leaves her mother and father, and two little brothers, Franklin and Perry, her grandparents, Mr. and Mrs. Jno. Neill, aunts and uncles to mourn her loss. Our little treasure was taken from us very suddenly, but we must always remember that the Lord hath given and the Lord hath taken away.

We have fine line of boys Blue Serge Suits. All sizes now.
W. Banford & Son

—The County Sheep Feeding competition for 1923 is being organized by Mr. Bothwell (County Agronomist) under the Farmers' Club of the Township of Gore. Any farmer who owns at least ten ewes and a purebred ram may compete. Membership fee to club \$1.00, Entry fee 50c. payable to the secretary.
A. Tomalty, Sec.-Treas., Lakeside.

The Finest Model "45" McLaughlin-Buick Ever Built

The 1923 McLaughlin-Buick "45" Special took the country by storm. Always a favorite, this model reaches the highest pinnacle of value ever attained.

It is a beautiful car—it is luxurious—it is a mechanical masterpiece. Stand off and note the snappy lines, the higher hood, the full crown fenders, drum type head and bowl lamps. Then sit in the car. Here is comfort equalled only in the costliest automobiles.

Look about you—the upholstery and trimming are of the finest quality, the instrument board is equipped with richly-finished instruments, the control lever is at fingers' end, the cowl ventilator control and windshield wiper are within easy reach.

And the chassis shows far-reaching improvements. Even the famous McLaughlin-Buick Valve-in-Head Motor shows important changes. An inspection is cordially invited.

There Are 15 McLaughlin-Buick Models to Choose From

AUCTION SALE

There will be sold by Public Auction at the residence of

WM. DRENNAN,

Meikle St., Lachute.

Saturday, April 28th, 1923.

The following effects:—One parlor set, 1 parlor table, 1 organ, a lot of lace curtains and poles, clock, 3 rocking chairs, 1 sideboard, dining room table, 4 small tables, closet wardrobe, 1 lounge, kitchen range, box stoves, small Quebec heater, lot of stove pipes, clothes rack, 2 iron bedsteads and springs, 1 single bed, kitchen utensils, some dishes, knives and forks and spoons, lamps, garden tools, a lot of self-sealing jars and pickle bottles, buck saw, 2 flour cans, electric iron, bureau, and many other articles unmentioned.

Sale to commence at 1 p.m. sharp.

Terms: \$5.00 and under cash, over that amount six months credit on furnishing approved joint notes.

W. J. BOYD, Licensed Auctioneer.

AUCTION SALE

There will be sold by Public Auction at the residence of

GORDON M. SMITH

Beech Ridge,

Wednesday, May 2nd, 1923

The following effects:—Nineteen Ayrshire milch cows (all freshened), 1 Registered Ayrshire bull, (this herd have all been tested and clear of tuberculosis, by Dr. Touchette, Veterinary Surgeon), 1 horse eight years old weighing 1,350 pounds, 1 horse eight years old weighing 1,100 pounds, 1 colt two years old, 1 Moody threshing machine with blower, 1 tread power, 1 mower, 1 seeder, 1 gang plow, 1 cultivator, 2 buggies, milk waggon, heavy express, horse fork, 2 sets double harness, Ford Touring Car, and a lot of other harness, and many other articles too numerous to mention.

Sale to commence at 1 p.m. sharp.

Terms: \$10.00 and under cash, over that amount 8 months credit on furnishing approved joint notes. 4 per cent per annum off for cash.

W. J. BOYD, Licensed Auctioneer.

There will be sold by Public Auction at the residence of

DAVID ROWE,

Three Miles North of Dalesville Store,

Thursday, May 3rd, 1923

The following effects:—One work horse, 1 brood mare (with foal), 13 milch cows (all freshened), 1 bull 2 years old, 2 calves, 35 hens, 2 wagons, hay rack and wagon box, 1 buggy, 1 tumbril cart, 1 road cart, 2 sets bob-sleds, 1 set single sleds, 1 cord wood rack, 1 cutter, 1 snow plow, whiffletrees and eavens, 1 set double harness (new) 2 express, 1 milk wagon, 1 set express harness, 2 set light harness, set cart harness, 2 Moody mowing machines (almost new), Massey Harris rake (almost new), 3 plows, set spring tooth harrows, 1 stone boat, 1 "Sharples" cream separator, 4 factory cans, 1 Daisy churn, Singer sewing machine, 2 sets bed-room furniture, extension tables, 1 mahogany chest of drawers, sideboard, cooking and dairy utensils, Columbia Gramophone and records, and also articles unmentioned.

Sale to commence at 10 a.m. sharp.

All to be sold without reserve.

Terms: \$10.00 and under cash, over that amount 9 months credit on furnishing approved joint notes. 6 per cent annum off for cash.

W. J. BOYD, Licensed Auctioneer.

AUCTION SALE

There will be sold by Public Auction at the residence of

HARRY A. BOYD

Arundel,

Thursday, May 10th, 1923

The following effects:—1 Registered Ayrshire Bull, four years old, No. 44995, Champion Cow at Ormstown 1921 and 1922, and first prize cow at Toronto 1921. 8 Registered Ayrshire Cows, 25 Good grade Ayrshire Cows.

Sale to commence at 10 a.m. sharp

Terms: \$10.00 cash, 6 months credit on approved joint notes.

EDGAR D. A. BOYD,

Licensed Auctioneer, Morin Heights.

A Paper Written and Read by Mrs.

Leslie Bean of the Way's Mills

Institute.

Perhaps it would be a good start towards Economics for me not to tire my brain to write something that will tire your brain to read. However, I feel that Economics is as boundless as the ocean. We find that just as springs empty into brooks, brooks supply rivers and rivers sometimes enlarging into lakes, flow on to ocean so the right beginning in the home leads to better communities. This in turn leads to better towns, better cities, better laws and better nations a world-wide improvement.

In the first place all labour-saving devices should be adopted for the mother. She is the "Nation Builder". Where the means to arrange the home for mother's convenience is limited a thoughtful father and thoughtful sons and daughters can lighten her work by taking some of the steps that have to be taken day after day and not leaving all for mother to do. There are some who would take these steps for mother if she would ask them to, but usually mother keeps on doing as long as she is able asking help from no one. Some day she passes out never to return and, in the sorrow of our great loss, we begin to realize that mother did not have all the help from her family that she should have had. Girls do not mean to neglect their duty in this way but, never having had the work to look after, they do not realize how much mother has to do. If they wash the dishes and sweep the kitchen they think they have done it all for that day. It would disillusion some of them, to ask mother to keep her room for one whole day and let them do the work for her. Whichever day they took, be it washing-day, iron-day, baking-day, mend-

ing day, sewing-day or cleaning-day they would find plenty to do. Even if it were Sunday, that day of rest, there are the children to be get ready for church and Sunday school, and a good dinner to be prepared for them and the company which they often bring with them. If they conscientiously do all that mother does in any of these days they will think that they took the hardest day of the seven. It would be better yet to let them try the whole seven days. They might think also of all the extra duties which mother is called upon to perform during the year - housecleaning, canning of meats and vegetables, gardening, pickling, caring for poultry and many other things. There is usually, too, more or less illness which keeps mother busy day and night and, with all her aches and tired feelings, to say nothing of her anxiety, mother is expected to smile. As we come to

years of understanding we can realize and appreciate all that mother has done for us. We can remember many kinds things she taught us and understand that, had she had more help she would have had more time to teach and guide us so that we might have been better men and women. It seems to be that a mother loved and assisted by her sons and daughters is in a position, by the love they bear her to have the greatest influence upon their lives. She has so many ways in which to teach them to be good, noble men and women. Sons and daughters from loved and loving homes make good citizens. How many of our great statesmen have said, "All that I am I owe to my mother."

From the home the child receives his first impressions of life and living. Would that every mother fully realized what a power she has for good or evil. If the homes of the nations were all that homes might be the horrors of war would be eliminated. All that we can do is to try as we sometimes sing "to brighten up the corner where we are." If all do that frowns will be prevented, smiles will grow and the whole world will become more cheerful and lovable. It is in the homes that full reforms must begin. I feel that to keep mother as long as we can and make her as happy as we can is a long stride towards Home Economics, for who like a mother can guide the young. Home is not home when mothers are not there.

Mrs. V. S. Armitage,

Quebec Women's Institute,

Convenor, Publicity Committee.

7 reasons why you should demand them

1. Different and better

2. Stronger and safer

3. Contain no poison

4. Lists won't gnaw them

5. Withstand more moisture

6. Will not glow after use

7. Canadian made for Canadians

WHITE STAR-DOMINION LINE

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Question—What breeds of pigeons are best adapted for the raising of squabs for the market?

Answer—Bulletin No. 15 of the Department of Agriculture at Ottawa, dealing with the subject of pigeons, names three breeds suitable for squab production, the Homer, the Carneau and the Mondaine. The Homer is generally acknowledged to be one of the most profitable breeds for this purpose. It is a hardy breed, very active, prolific, and produces a good average weight squab. The Carneau, originated in Flanders, has been bred for food for many generations. This breed has the habit of remaining close to the home quarters when given its freedom. It is prolific and robust and the squabs develop rapidly. The Mondaine, bred originally in Switzerland, is a utility pigeon, and is stated in the bulletin to be rapidly gaining popularity on this continent. It is a very prolific breed, and the squabs are broad breasted and well fleshed.

Question—Are there any advantages gained from warming the drinking water of hogs during the cold weather?

Answer—An experiment carried on at the Central Experimental Farm indicated two things: First, that hogs make better gains when they have be-

fore them a constant supply of water for drinking purposes, and second, that in winter the gains are more pronounced when the water is given slightly warmed.

Stock Raiser, Durham Co.—The farmers in this district grew large quantities of peas many years ago, but the coming of the pea weevil led many of us to discontinue. We desire to sow a field this year and the seed we have has an occasional infested seed. Please advise me how to treat the seed to destroy these insects.

Answer—Coal oil has been found useful in destroying the pea "bug" in the seed. About a half gallon of coal oil is sufficient to treat about five bushels of peas. The idea is to thoroughly moisten every seed so that the oil will penetrate and kill the insects. For this purpose the seed may be placed on a floor, the oil sprinkled on, and the peas shovelled over thoroughly. The shovelling should be repeated every day for at least four days, the first shovelling to be done about two weeks before sowing. It would be well, if possible, to induce every farmer in your neighborhood to treat his seed peas this spring. If this is done thoroughly there should be no "bugs" in the crop in that neighborhood for several years.

Proper Time to Hatch Chicks

It is a confirmed fact that pullets must be thoroughly matured before egg production can be expected, therefore, they must be hatched early enough to have time to mature well before the time that egg production is desired. Under ordinary circumstances, any of the general purpose breeds, such as Plymouth Rocks, Wyandottes, Rhode Island Reds, etc., require on an average five and a half to six months to mature, thus, pullets intended to commence laying the latter part of October, would have to be hatched in the month of April, while the Mediterranean Breeds, such as Leghorns, Anconas, etc., being smaller birds, can be matured in slightly less time, and could be hatched a week or two later, and still be matured ready to commence producing in the latter part of October. The care which the young growing stock receive during the summer months has much to do with having them properly matured in time for winter eggs. One breeder may hatch his birds early in April, and yet by neglect in proper feeding and exercise, may not have them as well matured in October as another breeder who hatched his birds in May, but who gave them proper care while they were growing on the range.

Again, chicks hatched too early, besides being harder to take care of early in the year when the weather is more severe, can be forced to maturity and egg production about August and September, and will exhaust a certain amount of their strength by the time that cold weather comes, with the result that they very often go into a moult, stop laying, and owing to short days of feeding, cannot regain their strength sufficiently to produce until

after the most urgent demand for winter eggs is over.

A number of experiments conducted at the Lennoxville Experimental Station during the past two or three years, to ascertain the proper time to hatch stock required for profitable winter egg production, have given some interesting figures. For instance, from November 1, 1920, to March 1, 1921, 25 pullets, hatched between April 5 and April 12, gave an average profit of \$3.73 per bird over the cost of their feed; while 25 pullets, hatched between May 1 and May 10 gave an average profit of \$1.75 per bird over the cost of their feed. Experiments conducted during the following winter gave results that helped to strengthen the data already secured, viz.: From November 1, 1921, to March 1, 1922, 25 pullets hatched between April 7 and April 15, gave an average profit of \$2.83 per bird over the cost of their feed; while 25 pullets, hatched between May 1 and May 10, gave an average profit of only \$1.71 per bird over the cost of their feed. It was thought possible by some, that the later hatched lots would produce sufficiently more eggs in January and February to balance the profits of the earlier birds in November and December, but such has not been the case in any of the experiments to date. Given proper care and feeding during the summer months on a good range for exercise, the past results would justify the recommending of hatching chickens of the general purpose type, not later than the end of April, the first three weeks of April preferred, and of the Mediterranean classes, not later than the 24th of May, for the most profitable production of winter eggs in western Quebec.

Fertilizing the Orchard

Calculated from analysis an orchard producing 100 barrels of apples per acre would take from the soil 45 pounds of nitrogen, 121 pounds of phosphoric acid and 43.2 pounds of potash. It is found in actual practice that more phosphoric acid is required than is revealed by an analysis of the crop. Experimental results would indicate that a fertilizer carrying 30 pounds of nitrogen, 50 pounds of phosphoric acid, and 50 pounds of potash, should be furnished annually to the average orchard in bearing; one producing about 100 barrels per acre. To supply these requirements 200 pounds of nitrate of soda, or sulphate of ammonia, 300 pounds of acid phosphate, or slag, and 100 pounds of muriate of potash per acre—giving 30 pounds of nitrogen, 48 pounds of phosphorus and 50 pounds of potash, or approximately a 5-8-8 fertilizer (one containing 5 per cent. of nitrogen, 8 per cent. of phosphorus, and 8 per cent. of potash) applied at the rate of 600 pounds per acre is advised.

Of the above elements nitrogen is the most expensive, costing 22 cents per pound, valuing nitrate of soda (13 per cent. nitrogen) at \$68 per ton. Phosphorus, either in acid phosphate or basic slag, costs 7½ cents per pound, valuing acid phosphate or slag (16 per cent. phosphorus) at \$24 per ton. Potash in muriate of potash (50 per cent. potash), valuing it at \$20 per ton, costs 5 cents per pound. On this basis the fertilizer advised above per acre would cost for nitrogen \$5.60; phosphorus, \$3.60; and potash \$2.50, a total of \$11.70 per acre.

Nitrate of soda seems to be the most valuable nitrogenous fertilizer, due to the fact that it is quickly available and gives the fruit tree the needed nitrate early in the spring when growth should be most active and when available soil nitrates are less than at any other time. Experimental evidence supports the practice

of applying nitrate of soda early in May, and not later than the 15th, thus giving a vigorous start to the early spring growth. There is some evidence to show that 200 pounds per acre in the early spring may not be too large an application. It is possible, however, that this amount applied late may produce too active vegetative growth if used on soils in a good state of fertility, thus tending to carry too great a growth into the summer. This possibility of course would be largely overcome by a cover crop to take up the excess of plant food and bring about an earlier and better maturity of fruit and tree. When applying nitrate of soda to a mature orchard of 40 trees per acre, five pounds per tree is considered ample. If trees are variable in size and vigor judgment should be exercised, as, in order to bring about average vigor, some trees should be fed less and others more than that generally advised. It may be stated that an application of one ounce to a square yard is equal to 300 pounds per acre; and that if a pound of nitrate of soda is applied to a tree with a spread of 13 feet in diameter, the tree is getting this material at the rate of approximately 300 pounds per acre.

It is difficult to measure the influence of phosphatic and potassic fertilizers, their effect being less marked than that of nitrate of soda. However, it is well known from experiments with other plants that a properly balanced fertilizer ultimately gives the best product. There is no doubt that nitrogen is the most important factor in relation to fruitfulness, yet there is a possibility that nitrogen used to excess, with a shortage of potash and phosphorus, may result in a fruit product less resistant to the effect of handling and transportation. Nitrate of soda or sulphate of ammonia, acid phosphate

Serves Public Health.

Western University, London, is accomplishing good things through its faculty of Public Health, conducted under Professor H. W. Hill. Dr. Hill has been in charge of the Institute of Public Health since 1912, except for three years spent with the same faculty of the University of Minnesota.

and muriate of potash may be mixed together and all applied at the one time.

Two pounds of stable manure per square yard is equivalent to nearly five tons per acre. If the manure has been well preserved and is from well fed stock, the average farm yard manure will contain 10 pounds of nitrogen, 5 pounds of phosphorus and 10 pounds of potash in one ton. The five tons will contain 50 pounds of nitrogen, 25 pounds of phosphorus and 50 pounds of potash, and if applied annually per acre, would furnish the orchard with its requirement of plant food. It is not easy to apply five tons per acre evenly, particularly in the orchard. In most cases commercial fertilizers are depended upon, with cover crops, to supply the humus which is so necessary to produce a good mechanical condition in the soil. Stable manure if used should be applied early and in annual quantities rather than in a heavy dressing one year with none again for several years.

A Lantern That Will Not Tip Over.

A cement base cast on the bottom of a lantern will make it hard to knock over. Such a lantern will be very useful around the barn or shop. A form is made by bending a piece of sheet iron, the diameter being about three inches—larger than the base of the lantern. It is also about one inch higher. In casting, the form is set on a smooth flat board, about one inch of cement is placed in the bottom, then the lantern is set in the centre on top of the cement and the space around it is filled in. A cement mixture of about three parts screened sand to one of cement is about right.

Have You a Typewriter?

Too little importance is attached to the value of the typewriter on the farm. As one farmer put it when the subject was broached to him: "Never write a letter but once or twice a year, and then I guess I can use the elephant tracks I learned to make at school." Too many men are of the same mind. Sometimes it is this small matter of writing a few neatly-typed letters which takes away the farmer's 10 per cent., and part of his good living. It is excusable when a rebuilt typewriter may be bought for a small sum? Every man with a well regulated business owns and uses a typewriter. How about it? Is your business well regulated or simply haphazard?

Probably no other single factor pays such excellent returns on the farm as does investment in quality seed.

The Scale Situation

BY R. H. PETTIT, ENTOMOLOGIST.

The fact that lime-sulphur, which served in the past to control scale, seems inadequate to the task at present, has led some of our growers to believe that a resistant race of scale has been developed—a race capable of enduring the lime-sulphur wash without being killed. The situation seems to the writer to be due to an entirely different reason.

First—Lime-sulphur kills by depriving the insect under the scale of its oxygen and it is hard to conceive of any insect acquiring the ability to get along without oxygen, any more than one could conclude that a rabbit could become immune to a charge of shot.

Furthermore, we know through rearing experiments conducted by the department of entomology at the college that a number of native parasites have started to work on the scale. Now, the battle waged between any insect and its parasites is apt to go first one way and then the other.

Once more, if we look back a few years we will remember that owing to the reduction in the activity of the scale, and to the increased cost of spraying due to cost of materials and of labor, the winter spray of lime-sulphur was put on more dilute than formerly. Everything worked satisfactorily until the parasites "knocked off" for some reason or other, and the scale commenced to multiply—then it became apparent that dilute sprays

Markets and Requirements for Export Cattle.

Feeders of beef cattle may look with considerable assurance for a strong market for properly selected and finished export beef on the hoof during the latter part of April and the first weeks of May. No very great movement can take place before that time, for the terms of the cattle embargo removal, which become effective April 1st, stipulate that all cattle must be shipped from a Canadian port. Montreal is the logical economical port for these shipments but it will not be open until about the end of April. A few shipments may go by way of Halifax or St. John in the meantime, but, on account of the high cost of rail transportation, the bulk will be held for the opening of the port of Montreal. Present indications point to a heavy demand from the British market as soon as it can be supplied.

The statement "properly selected and finished" used above is used advisedly. The British consumer is a connoisseur of beef, and his palate is not likely to be satisfied with any second rate meat, consequently if we do not wish to land this prospective beef trade into the secondary position in which we now find our bacon trade, let us start right by sending over a well graded product. Grading should be done on the basis of breeding, size, finish and suitability for shipment. In the first place, an export steer should show sufficient good beef breeding that he will fill the eye of the prospective buyer on that score alone. First impressions are most lasting. Size is both for and against. Shipment being on the basis of so much per head, the heavier the animal the lower the cost of transportation. The demand, however, is for a medium sized animal. Selection should therefore be on the basis of weight for size and age, i.e., heavy little animals. The finish must be up to a fairly high standard, recently and uniformly put on. Here to a greater extent than is the case on our home market is where feeding to a high finish will be justifiable. Suitability for export shipment includes such factors as freedom from disease, or recently received blemishes; a degree of docile temperament; and last, but not least, an absence of horns, for deborning is practically imperative for export shipping. If these few factors are kept in mind at the start and nothing but Canada's best shipped over, a steady rather than a glutted market may be looked for.—Geo. Muir, Animal Husbandman.

Simple Battery Check-Up.

Some garage mechanics are careless and some are just plain ignorant, so after one has removed and replaced the storage battery on your car or truck, check him up to see whether he has put the battery in right. If he has done it wrong, an injured or ruined battery may result. As soon as the battery is connected up, and before the engine is started, simply turn on the lights. If the ammeter indicates "charge" instead of "discharge," as it would normally, the battery is on wrong. Have it reversed at once.

My Remedy for Horse Colic.

Here is a remedy I keep in a bottle for a horse that may take the colic. I have used this remedy for years and have never known it to fail. The bottle contains one pint of raw linseed oil, one-half ounce of laudanum, and one-half ounce of nitre. As soon as the horse shows signs of colic he should be taken into a good stall, his head held high and the mixture poured down his throat. A long-necked bottle is essential for this purpose. If the animal does not get relief in an hour, repeat the dose. I have had a horse to be relieved inside of thirty minutes.—W. O. N.

Maples or oaks generally indicate well-drained land. When you cut ham or bacon, to run lard over the exposed surface will guard it from mold.

Why I Use a Drill for Small Grain.

A field is more easily and more quickly sown with the grain-drill than by hand or wagon-box seeder, since there is no stepping-off and gauging to be done—nothing to do but hitch up and drive. With hand-sowing one must step off the desired width of a round and set flags to sow by, walk and carry the seed while he sows. The wind is bothersome when sowing grain by any of the methods except that of drilling, and a poor or streaked stand almost invariably is the result if there is a wind at sowing time. With the grain-drill, this trouble is avoided, and as even a stand is secured when the wind is blowing as when there is not the slightest breeze.

Grain put in the ground by a drill is all placed at exactly the same depth, and this is not true of another system of seeding. Where seeds are sown at uneven depths, germination is sure to be slower with some than with others. Those nearest the surface of the ground, if the weather turns dry, will not sprout at all, but shrivel up and are lost entirely. When all is said and done it is a matter of yields and profits. Seed planted with a grain drill yields more per acre than seed sown broadcast. That is reason enough for me to use a grain drill.—M. Coverdell.

Hot Boxes on Tractor.

Last winter I had trouble with hot boxes on my tractor. I found that they were caused by the oil getting so cold and stiff it didn't get to the bearings, and the bearings ran dry and got hot. I make a practice of getting my tractor thoroughly warmed up before attempting to do any work in cold weather. After starting the motor I walk around the tractor, inspect the different parts and see that everything is working smoothly before giving my attention to other matters.—Mark Underwood.

Using Oil in Incubator.

Those using a hot water type incubator with galvanized tank which has rusted can easily avoid the trouble by using cylinder oil in place of water. Unless oil is about blood heat or little warmer, do not fill tank as full as you would with water as the oil expands more when heated than water. I could not see but what the incubator hatched just as good as when using water. I find a light body oil works best.—N. F.

Irrigated Farms in Southern Alberta

In the Famous Vauxhall District, Bow River Irrigation Project. An especially good location for mixed farming and dairying. Splendid opportunity for young men. Good living in districts where good land cannot be bought at reasonable prices. THIS IS NOT PIONEERING, the first 10,000 acres are fully settled and another 10,000 acres now ready for settlement; maximum distance from railroad, seven miles. Good roads, telephones and schools. Easy payments, extending over 15 years. This is the Best Land Buy in Alberta. Write for further information to CANADA LAND AND DEVELOPMENT COMPANY, LIMITED. (Incorporated in Canada) Calgary, Alberta.

Surnames and Their Origin

HAWLEY.

Variations—Hawes, Haw.
Racial Origin—English.
Source—A locality.

Here is another of those English family names of the kind which sprang up in a great many sections of that country through the entire period of family name formation. These names were based upon local place names, mostly of the descriptive kind, in many instances known only to those who lived in the communities in which the names sprang up. Names like Hill, Dale, Ford, Woods, Cliff, Grove and the like.

Literally the name Hawley would mean a helged piece of meadowland, for it is a compound of the ancient Anglo-Saxon words "haeg" and "ley," the former being the word from which has come our modern word "hedge" as well as such names as Haig, Hedges, Hay and the like.

The forms Haw and Hawes, of course, are either shortened forms of

Hawley or else names derived simply from the old word "haeg."

GROSSBECK.

Variation—Broesbeck.
Racial Origin—Dutch.
Source—A locality.

Grossbeck is really the more correct spelling of this name, if it can be said that there is any better standard of spelling family names than the habit of the bearer himself.

Grossbeck is the Dutch way of spelling it. The other form, Grossbeck, is a changed spelling which has come about through the influence of the English language in instances where the name has been used for long periods either in America or England.

If you were to translate this name literally into English it would be simply "Bigstream." The word "groes" is nothing but the Dutch equivalent for the English word "gross" (or "great"), which is also to be found in both French and German, and "beck," meaning stream.

BABY'S HEALTH IN THE SPRING

The Spring is a time of anxiety to mothers who have little ones in the home. Conditions make it necessary to keep the baby indoors. He is often confined to overheated, badly ventilated rooms and catches colds which rack his whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will prevent colds, constipation or colic and keep baby well. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Farthest-North Radio Weather Station.

Jan Mayen Land, a tiny volcanic island north of Iceland, is in the track of arctic storms sweeping toward the coast of Norway, 600 miles distant. In order to obtain timely warning of the storms which peril its interests, the Norwegian government less than two years ago established on the island a radio station, the farthest-north station in the world. It is in charge of Akhard Ekerod, an American citizen. The operator and his assistants are the first permanent inhabitants of the island.

Minard's Liniment used by Physicians.

By means of airships, Bombay, India, could be brought within three and a half days' journey of London.

The Gardener.

So lovingly he holds within
His hand the tiny seeds and sees
A vision of bright fairy things,
That soon will flutter in the sun,
Like butterflies on flaming wings.

So lovingly he lays them down
In beds made soft and warm to sleep,
And carefully above their heads,
For fear of bitter wind and storm,
A magic coverlet he spreads.

So lovingly he waits until
Awakened by a thousand sounds,
With tender outstretched arms they rise,
And struggle to their feet, to find
An eager welcome in his eyes.

So lovingly he watches when
With quick response they do his will,
And in his garden, kneeling there,
With busy hands, care slips away,
And peace comes like an answered prayer.

—Lillian Howard Cort.

League of Nations to Urge Protection for Scientists.

The right of scientists to share in the benefits derived from the application of their discoveries has received official attention from the League of Nations Intellectual Co-operation Commission. A sub-committee assigned to go into the question has just concluded its studies, and a plan is now being drafted for the legal protection of scientific work. After approval by the commission, and then by the council of the league, the plan would serve as a basis for legislation in the parliaments of the different countries throughout the world.

SPRING IMPURITIES DUE TO POOR BLOOD

A Tonic Medicine a Necessity at This Season.

Dr. Williams' Pink Pills are an all-year-round tonic for the blood and nerves. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is no other season when the blood is so much in need of purifying and enriching, and every dose of these pills helps to enrich the blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give strength. In the spring the appetite is often poor—Dr. Williams' Pink Pills develop the appetite, tone the stomach and aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils—Dr. Williams' Pink Pills clear the skin because they go to the root of the trouble in the blood. In the spring anaemia, rheumatism, indigestion, neuralgia and many other troubles are most persistent because of poor, weak blood, and it is at this time when all nature takes on new life that the blood most seriously needs attention. Some people dose themselves with purgatives at this season, but these only further weaken themselves. A purgative merely gallops through the system, emptying the bowels, but does not help the blood. On the other hand, Dr. Williams' Pink Pills enrich the blood which reaches every nerve and every organ in the body; bring new strength and vigor to weak, easily tired men, women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

Sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Who Wrote the Words?

At a recent concert in Winnipeg, a gentleman said to his guest from the East, "I just notice that on this programme the names of the composers of the song lyrics are omitted. I wonder who is responsible for such an oversight?" It may be said at once that such omissions are not confined by any means to Winnipeg. Everywhere you go you will find programmes giving the names of the composers of the music, but the persons responsible for the texts are nameless. Sometimes the programme even gives in full the two or three stanzas of each of the texts without mentioning the writers' names.

Is it to save a few cents in composition at the printers? Is it just thoughtlessness? Or is it because the one responsible for the programme considered the words of no importance?

One of the foremost vocalists on this continent said the other day, "before I study a new song to add to my repertoire, I read over the words carefully and if they are not worth while, I wouldn't put any time on the song no matter how exceptionally fine the music was." Another singer, a famous tenor, said recently: "When I get a new song, I first familiarize myself with the text. If the words prove silly or sentimental, I throw the song aside. For no matter how good the music, a song is not worth singing unless the words are worth hearing. Words and music should constitute a harmonious union. For that matter I believe that the accompaniment to a song is just as much a part of it as the portion written for the voice."

The most successful composers lay great stress on the lyrics. There is absolutely no excuse for using the words of a song on the programme without giving proper credit to the writer of those words, and it would be good taste when listening songs to say words by so-and-so, and music by so-and-so. No music publisher would issue a song without the title page covering the name of the lyric writer in prominent type along with that of the composer of the music.

"Twentieth Floor, Please!"

New York is a city of skyscrapers. Highest of all these enormous buildings is the well-known Woolworth Building, headquarters of the world-famous stores, one of the founders of which has just died in London.

It is known as the "Cathedral of Commerce" because of its sham Gothic architecture. It is more than 800 ft. in height.

Next comes the "Equitable," in which 15,000 clerks are employed. It has a dining-room which seats many hundreds, and a roof-garden for the workers.

Then comes the Metropolitan Building, the home of the Metropolitan Insurance Company, with its five or six thousand employees.

These giant buildings are fitted with most wonderful lift systems, including several that stop at every twentieth floor or so.

One would have thought that the existing buildings are quite near enough to the sky as it is, but it is announced that one with 150 storeys is contemplated.

No Place Like Home.

When a native of Prince Edward Island had sailed forth to see the world, he engaged a room at a modest hotel in Boston, intending to remain there while he hunted for work.

"Will you register?" asked the clerk handing him a pen.

"Register?" said the traveler. "What is that?"

"Write your name."

"What for?"

"We are required to keep a record of all our guests."

The man wrote his name and was about to lay down the pen when the clerk added:

"Now the place, if you please."

"What place?"

"The place you came from. Where do you live?"

"I live on the island."

"Well, but what island?"

The other looked at him in amazement. Then he said, with an emphasis that left no doubt of his feelings, "Prince Edward Island, man. What other island is there?"

An Original Explanation.

They were having a botany lesson, and the children were asked by their teacher if they knew what made the leaves turn red in the autumn.

Up popped one hand—and only one.

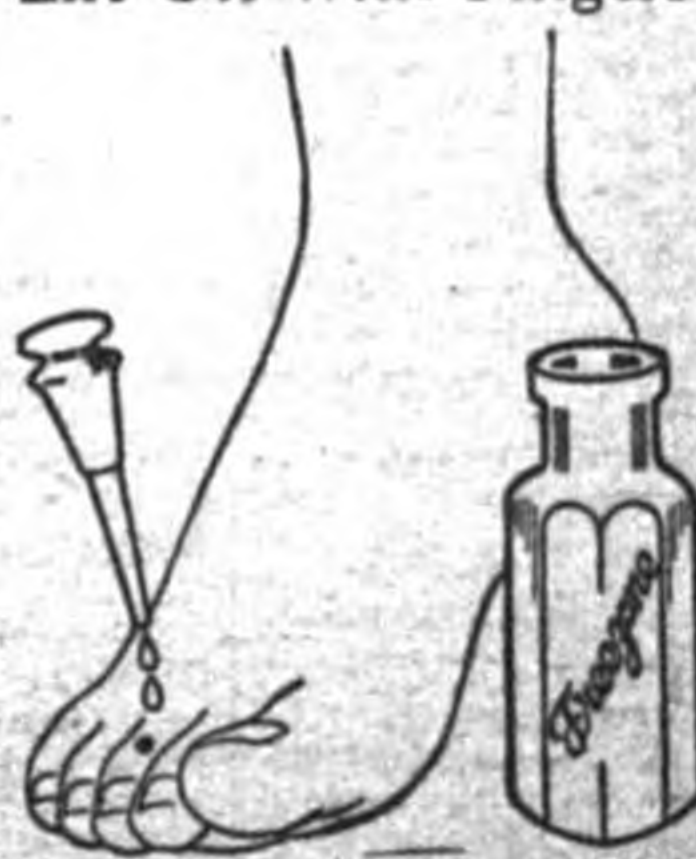

"Well, Johnny?" asked the teacher.

"Please, miss," replied Johnny, "they blush to think how green they have been all the summer."

Among the Eskimos, "conjurers," who have had a special training and may be of either sex, wield a great influence.

CORNS

Lift Off with Fingers

Doesn't hurt a bit. Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

WILLIAMS TELLS OF WASTED CASH

Spent Lots of Money, But Wife Got No Better Until Tanlac Ended Stomach Trouble.

"I never saw such a change as Tanlac has made in my wife and she says she is feeling like a girl of sixteen now," declared Harold Williams, a well-known shoemaker, of 28 Cornwall St., Toronto, Ont., recently.

"For years, she was so weak and rundown I often thought she would fall in her tracks. Nearly everything she ate disagreed with her and at times she was simply in agony. Her nerves were so unstrung the least little thing would worry and upset her for hours and she could scarcely get any sleep."

"Well, after spending hundreds of dollars on different medicines, I didn't have much hope that Tanlac would help her, but, it's a fact, when she finished the treatment, every ailment was gone. That was several months ago and since then her health has been splendid. Hereafter we will always pin our faith to Tanlac."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

Orient's Largest Building Nearing Completion.

The Marunouchi Building, now nearing completion in Tokyo, Japan, is said to be the largest office building in Asia. It is an eight-story structure built on a ground area 350 by 300 feet, and is 110 feet tall. The weight of 87,000 tons is supported on piling that extends nearly 100 feet below the ground line. It contains approximately 800,000 square feet of floor space that will be devoted almost entirely to office purposes, and is of fireproof construction throughout. Modern equipment, such as fire and ventilating systems, bathrooms, and other conveniences for the tenants, has been included, and the building houses its own power plant.

It would take a good counter, counting 24 hours a day, more than 9,512 years to count a billion.

TOOTHACHE

Place a piece of cotton wool saturated with Minard's in the cavity. Acts as a counter irritant and gives quick relief.

FACE A SIGHT WITH PIMPLES

Large and Red. Itched and Burned. Cuticura Heals.

"My face was itchy and broke out with large, red pimples. They were scattered all over my face and itched and burned so that I scratched which caused them to grow larger. I could hardly sleep at night. They were a real torture and my face was a sight."

"The trouble lasted about three months. I began using Cuticura Soap and Ointment and the first treatment stopped the itching and after using two cakes of Cuticura Soap and one box of Cuticura Ointment I was healed." (Signed) Miss Ora Goulette, R. F. D. 4, Box 55, Barre, Vt., March 24, 1922.

Use Cuticura Soap, Ointment and Talcum exclusively for every-day toilet purposes.

Sample Each Free by Mail. Address: "Lectures, 1100, 1110 & 1120 St. W., Montreal," and everywhere. Soap, Ointment and Talcum. Cuticura Soap shaves without razor.

The most wasted of all days is that on which one has not laughed.

Most adults will be toothless in another 200 years, according to one dental expert, who says that children today eat too many biscuits, cakes, potatoes, and other starchy foods.

Pimples Disappear

"You don't need mercury, potash or any other strong mineral to cure pimples caused by poor blood. Take Extract of Roots—druggists call it 'Mother Seigel's Carative Syrup'—and your skin will clear up as fresh as a baby's. It will sweeten your stomach and regulate your bowels." Get the genuine. 50c. and \$1.00 Bottles. At drug stores.

PUTS HEALTH AND VIM INTO WOMEN

So Says Mrs. MacPherson of Lydia E. Pinkham's Vegetable Compound

Brantford, Ontario.—"I was always tired and the least exertion would put me out for a day or two. I had a pressing pain on the top of my head, pain in the nape of my neck, and when I stooped over I could not get up without help, because of pain in my back. I did not sleep well, and was nervous at the least noise. I keep house, but I was such a wreck that I could not sweep the floor nor wash the dishes without lying down afterwards. A friend living near me told me what Lydia E. Pinkham's Vegetable Compound had done for her so I began to take it. With the first bottle I felt brighter and got so I could wash dishes and sweep without having to lie down. Later I became regular again in my monthly terms. I have taken ten bottles all told and am now all better. I can truly say that your wonderful medicine cannot be beaten for putting health and vim into a woman."—Mrs. JAMES H. MACPHERSON, 309 Greenwich St., Brantford, Ont.

If you are suffering from a displacement, irregularities, backache, or any other form of female weakness write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for Lydia E. Pinkham's Private Text Book upon "Allments Peculiar to Women."

See How Easy It Is To Learn Music This New Way

YOU know how easy it is to put letters together and form words, once you have learned the alphabet. Playing a musical instrument is not very much different. Once you learn the notes, playing melodies on the mandolin, piano or violin is simply a matter of putting the notes together correctly. The first note shown above is F. Whether you are singing from notes, playing the piano or banjo or any other musical instrument, that note in the first space is always F. The four notes indicated are F, A, C, E, to remain in order, because they spell the word "face." Certain strings on the mandolin, certain keys on the piano represent these same notes—and once you learn them, playing melodies on the instrument is largely a matter of following the notes. Anyone can now learn to play a musical instrument at home without a teacher. A new, simplified method of teaching reduces all music to its simplest possible form. You can now master instrument you wish right at home quickly, easily, without endless study and practice.

You don't have to know anything whatever about music to learn to play a musical instrument this new way. You don't have to pin yourself down to regular hours, to regular classes. You practice whenever you wish right at home quickly, easily, without endless study and practice. All the intricate "myrtles" of music have been reduced to a method of amazing simplicity—each step is made as clear as ABC. Thousands have already learned to play their favorite musical instruments this splendid new, quick way. You can play your favorite instrument at home today. If you are dissatisfied with your present work, let music at as a stepping-stone into a new career.

If you long for a hobby, a means of self-expression, let music be the new interest in your life. If you wish to gain popularity—choose your favorite instrument—and, through the wonderful home study method of the U. S. School of Music, play in three months from today.

You can do it. Youngsters of 10 and 12 have done it, and men as old as 60 have found new interest and enjoyment in learning how to play a musical instrument. You don't have to listen while others entertain any longer. You can be the centre of attraction, the talented person who holds the audience fascinated.

Free Book Explains New Method. Every one who is interested in music should send at once for our valuable book, "Music Lessons in Your Own Home." It not only explains the wonderful new simplified method of learning music but tells about a special short-cut now being made to music lovers.

Mail this coupon at once for your copy. Remember, it obligates you in no way whatever. It's free! But act now before the supply is exhausted. Please write name and address plainly so that there will be no difficulty in booklet reaching you. U. S. School of Music, 3304 Brunswick Bldg., New York City.

REGLEMENT No. 43.

Il est ordonné et décrété par règlement de ce conseil:
"Qu'il soit permis aux hôteliers licenciés de cette municipalité, de vendre dans leur établissement de la bière au verre, sans repas, et qu'un permis pour la vente d'icelle leur soit ainsi accordé par la Commission des Liqueurs de Québec. Le tout conformément à l'article 31 de la Loi des Liqueurs alcooliques, tel qu'amendé par la loi 12 George V, chapitre 31, section 6 et de nouveau amendé par la loi 13 George V, chapitre 14, section 5.

AVIS PUBLIC.

Aux habitants et électeurs municipaux de la municipalité du canton de Chatham.

Avis public est par les présentes donné par les seigneurs John Burk, ex-maire, et Albini Lamarche, secrétaire-trésorier de la municipalité du canton de Chatham, que le règlement ci-dessus sera soumis à l'approbation des électeurs municipaux de cette municipalité, qualifiés à voter sur le dit règlement, et en conséquence, une assemblée des électeurs

ARUNDEL.

The Church Services, on Sunday next 29th inst., will be as follows:—
Anglican.
Grace Church, Arundel 10.30 a.m.
Rockway 2.30 p.m.
Weir 7.00 p.m.
S. S. Grace Church 2.30 p.m.
Rev. Geo. H. Gagnon, M.A., Rector.
Arundel Union Church.
Crystal Falls 3.00 p.m.
Arundel 7.00 p.m.
S. S. Arundel 10.30 a.m.
Rev. Albert Johnson, Pastor.

The regular monthly meeting of the Arundel Branch of the Women's Auxiliary, was held on Saturday afternoon 21st inst., at the residence of Mrs. Smellie, when the following were present:—Mrs. Gagnon, President; Mrs. Simon, Sec.-Treas.; Mrs. Wm. Morrison, Mrs. W. H. Kerr, Mrs. Smellie, Mrs. Lutching, Mrs. Scott and Mrs. J. M. Nelson, P.H.S., there were also present, as guests, Rev. G. H. Gagnon, M.A., Mrs. Stone, Miss M. Stone, Miss Maude Beaton, Miss Jean Smellie, Miss Janet Smellie and Miss D. Kerr.

The meeting, was as usual, opened with prayer, after which the minutes of the previous meeting were read and the financial statement presented, and on motion of Mrs. Scott, seconded by Mrs. Smellie, the minutes and statement were accepted, as read. The Sec.-Treas. was authorized to forward the affiliation fees to the City by the 1st May.

The President read the M.D.W.A. notes for April, which proved very interesting.

A letter was received from the M.D.W.A. Dorcas Secretary, acknowledging the receipt from this Branch of a complete outfit for a girl of 11 years, and complimenting the members on their efficient work.

The serving of refreshments by the hostess, Mrs. Smellie, brought a very enjoyable meeting to a close.

Owing to the high temperature 70 in the shade, on Friday and Saturday of last week, the snow has almost entirely gone, and the making of Maple Syrup is progressing, as the sap is running pretty freely.

A very successful "Taffy Party," was held on Saturday evening last, in the Union Church Hall, the attendance was good, there was much good fun, and the financial result was satisfactory.

Séc.-trésorier, Albini Lamarche

PROVINCE OF QUEBEC
DISTRICT OF TERREBONNE
MUNICIPALITY OF THE TOWNSHIP OF CHATHAM.

BY-LAW No. 43.

It is ordained, and enacted by by-law of this council:

"That the licensed hotel-keepers of municipality be allowed to sell beer by the glass without a meal in their establishment, and that therefore, a permit be granted them by the Quebec Liquor Commission for the sale of beer by the glass without a meal in their establishment; the whole in conformity with article 31 of the Quebec alcoholic Liquor Act amended by Act 12 George V chapter 31 section 5 and again amended by Act George V, chapter 24, section 5.

PUBLIC NOTICE.

To the inhabitants and municipal electors of the municipality of the Township of Chatham.

Public notice is hereby given by the undersigned, John Burk, Mayor, and Albini Lamarche, secretary-treasurer, of the Municipality of the Township of Chatham, that the aforesaid by-law be submitted for adoption to the municipal electors of this municipality qualified to vote on said by-law; and that consequently, a meeting of the municipal electors of the Municipality of the Township of Chatham, will be held at St-Philippe d'Argenteuil, at Cyprien Lafleur's hall, the ordinary place of meeting of the sessions of the council of this municipality, on Friday, the 25th day of May next, 1923, at ten o'clock in the forenoon, in order to hold a poll to decide whether or not the aforesaid by-law, submitted for approval by the municipal electors of this municipality shall be adopted.

The vote shall be taken by secret ballot and will be held during two days, Friday, the 25th of May 1923, and the following day, Saturday, the 26th May 1923, from ten o'clock in the forenoon to five o'clock in the afternoon.

Dated at St-Philippe d'Argenteuil, this 23rd April 1923.
Mayor, W. J. Burk.

CUSHING.

Miss Jean Pinkerton spent a few days in Montreal last week.

Miss Pearl Dawson, of Stonefield Heights, spent the week-end with her sister Mrs. F. Watson.

Mr. and Mrs. S. Whelehan, of Valleyfield, and Mr. Eddie Whelehan, of Montreal, spent the week-end in Cushing.

Little Miss Ethel and Master Elbert Dowd, of Ottawa, are paying a visit to their grandmother Mrs. Jas. Watson.

Miss Christina Sime, of Montreal, is spending the week at Mrs. E. O. Keatley.

The Ladies Association of St. Mungo's held a very pleasant meeting on Thursday of last week at the home of Mrs. J. Watson.

Mr. E. C. McMurtrie, who has just returned from a tour of the Maritime Provinces, in the discharge of his duties as Dominion Poultry Inspector, spent Friday visiting friends in Cushing.

The crew of the Argenteuil are busily engaged preparing their boat for the opening of navigation which from present indications might not be so late as was expected.

The C. C. Club held a taffy-party at the Hall on Friday evening last. On the previous evening the usual programme of dancing at the club was varied by the introduction of some of the older (and more graceful) dances in vogue a few years back when some of the older members of the Club had their innings and gave an exhibition of grace and agility which was a pleasure to witness.

If you want Boots, don't forget the New Boot Shop next to the Moving Picture Hall on Main Street. Your fit in any line and quality. Also if you have any boots to be repaired, give us a trial and you will come again. We will save you money and give you the best value in town.

FOR FLETCHER'S

CASTORIA

FIERI FACIAS DE BONIS ET DE TERRIS.

Sommary Procedure.

Circuit Court, in and for the county of Terrebonne.

As belonging to the said defendant, the following immovables, namely:—

1. An emplacement situate in the town of Saint-Jerome, on the south side of Saint-Alexandre Street, known and designated as being part of the number three hundred and sixty three (Pt. No. 363), on the official plan and book of reference of the town of Saint-Jerome—with the buildings thereon erected, measuring, the said emplacement, fifty feet in width by one hundred feet in depth, English measurements and more or less; bounded as follows: to the north by Saint-Alexandre street, to the south by the residue of said lot No. 363, on one side by Joachim Neveu or representatives and on the other side by Saint-Jovite street;

2. Another emplacement situate at the same place and adjacent to the land above described, known and designated as being part of the said lot number three hundred and sixty three (Pt. No. 363), on the official plan and book of reference of the town of Saint-Jerome, measuring sixteen feet in width on Saint-Jovite street by one hundred feet in depth, English measurements and more or less, and bounded as follows: to the north by the emplacement above described, to the east by Saint-Jovite street, to the south by the residue of said lot No. 363 and to the west by the properties of Saint-Georges street—without buildings.

To be sold at the door of the Catholic church, in the town of Saint-Jerome, said district, the SIXTEENTH day of MAY, one thousand nine hundred and twenty three, at ELEVEN o'clock in the forenoon.
