for your little girl or boy? We are
giving a pair as a present to every-
one who makes a purchase of \$5.00
and over.

The Lachute Boot Store,
Paquin's Block, Main Street.

A quiet wedding was celebrated
at the Manse, Dalesville, Rev. Victor
Collins officiating, in that of Mr. Wm.
Tompkins and Mrs. Alice McAndrew
both of Mount Maple. They were
attended by Mr. and Mrs. Wm. Mott
of Brownsburg and after their mar-
riage went at once to their home in
Mount Maple.

TOWN COUNCIL

The regular meeting of Lachute
Town Council was held in the Town
Hall, on Wednesday evening, May
2nd, Mayor W. M. Scott presiding.
There were also present Aldermen
E. Jousse, P. Dobbie, A. Larocque,
G. Creswell, H. M. Gall, T. Dallaire,
W. Morrison, E. Charlebois, J. D. Le-
may and the sec-treas. Jno. A. Rice.
Minutes of last meeting were read
and confirmed.

Reports of Finance were received
and declared as read on motion of
Aldermen Dallaire.

Notary Valois appeared before the
Council with communications from
the Department of Public Works in
reference to the rounding off the
Post Office Corner on plans sub-
mitted, negotiations of which has been
conducted by him during his term
of office. The Mayor thanked Mr.
Valois for his continued interest in
finishing the work which he had un-
dertaken. A resolution was accord-
ingly adopted.

Mr. S. Bourgoing, appeared before
the Council, representing the Road
Department at Quebec, desirous of
knowing the wish of the Council as
to whether they would make the nec-
essary repairs to the roads or whe-
ther the Government would under-
take the same. It was the unanimous
wish, after due discussion, that the
town would undertake its own repairs
and charge half the cost up to the
Government in accord with their offer.

Application was made by Mr. Laur-
in for water service and it was agreed
to allow him \$75 to do the excavation
and filling, leaving the road in same
order.

Two letters were received from
Messrs. Wilson Limited and Ayers
Limited requesting the town on be-
half of its employees for daylight
saving. Discussion arose with much
argument when Alderman Creswell
moved, seconded by Alderman Mor-
rison that we adopt day-light saving.

Moved in amendment by Alderman
Dallaire, seconded by Alderman Dob-
bie that it be left over. The amend-
ment was put and those voting in
favor were Aldermen Lemay, Charle-
bois, Dallaire, Larocque and Dobbie.
Those in favor of the motion were
Aldermen Jousse, Creswell, Gall, Mor-
rison and the Mayor.

By-law No. 103 relating to water
mains on Bedard Boulevard was de-
clared read the first time on motion
of Alderman Gall.

Meeting was then adjourned.

From general appearance Lachute
is enjoying a good healthy boom.
Much property is changing hands and
sales speak of enhancing prices. Quite
a number of new houses are in pro-
cess of construction.

CHURCH NOTES.

The Sacrament of the Lords Supper
will be administered in the Methodist
Church on Sunday next, —Lachute at
10.30 a.m., Brownsburg 3 p.m. A
full membership is requested. Even-
ing service Lachute 7 p.m. The pas-
tor will preach at each of these ser-
vices.

Surnames and Their Origin

DEXTER.

Racial Origin—English.
Source—A locality.

Here is a family name which, from its ending, might appear to belong to that classification of surnames which have been derived from the names of occupations—names, for instance, such as Baxter, which originally was "Bak-eater" or "Baker."

As a matter of fact, however, it is a compound of a place name with the Norman-French prefix "de," meaning "of" or "from" and quite generally used in the early period of family name formation to indicate the locality from which the bearer of the name had come, or with which he was in some special way connected.

Earlier records of this name as "d'Exeter" and "d'Excester" show that in its original use it meant simply "of Exeter," the reference being to the

ancient city of that name in Devon-shire.
Exeter is located on a river known to the ancients as the Exe. The rest of the name comes from the Latin "castrum," meaning a camp, which the Anglo-Saxons called "caester," thus indicating "Excester" as the more ancient name of the city.

KELSO.

Racial Origin—Scottish.
Source—A place name.

There is such a similarity between the family names of Kelso and Kelsey, the latter of which was explained in the preceding article, that one might be pardoned for jumping at the conclusion that they are really but variations of the same name. They are not, however.

Kelsey is a name of Cornish origin. Kelso is Scottish. And though both are derived from place names, these place names are alike neither in spelling nor meaning.
Kelso, it was explained, came from the ancient place name of "Kelsye." Kelso comes from the place name of "Calchow," which was a corruption of the more ancient form of "Chalk-heugh."

Though Scottish, this name is Anglo-Saxon, being in Roxburghshire. Its meaning was "chalk-hill." Note how the North English speech maintained the initial "ch" as a "k," though the second "ch" became softened and finally changed into an "s."

Was Methuselah Really Old?

How old was Methuselah?
Nine hundred and sixty-nine years is the age with which we have always credited this patriarch. Now, however, scientific research has reduced the figure to 78½ years!

Experts point out that there has always been a certain amount of doubt concerning the great age supposed to have been attained by patriarchs, and many theories have been evolved to reduce Biblical records of this kind to something near man's normal span.

It is supposed that in the earliest times the month, or period of a moon cycle, was called a year. So that Adam's 930 years of life, calculating a year at 29½ days, the length of a lunar month, works out at 75½ years.

After the month-year there would appear to have come a five-month year, the limit of five being derived from the fingers of one hand, for primitive peoples used the fingers for purposes of calculation. On the five-month year basis, Abraham's 175 years shrink to 72, and Isaac's 180 to 74.

It is also pointed out that it is possible there intervened a six-month year, discovered by Jacob while watching Laban's flocks. Thus Jacob's 147 years work out at about 73.

The twelve-month year originated with the Egyptians, who saw that a complete period was made up of two "years," in one of which the days were longer than the nights, and in the other the nights were longer than the days.

Feared the Results.

Father—"That fellow you're going with is a bad egg."
Daughter—"I know it. I'd have dropped him long ago if it weren't for that."

Small Garden Implement Has Many Uses.

With its uses as spade, stirring fork, rake, and hoe, a new combination tool will prove a handy implement in the flower and kitchen garden. It is easily changed from one form to another by a locking plate.

Minard's Liniment used by Physicians.

The Work of Paul Peel.

A piece of sculpture by Paul Peel, the famous Canadian painter, whose picture, "After the Bath," has just been returned to Canada, purchased by Henry Pocock, of London, Ont., from the Hungarian government. The figure was presented years ago to the London library by Paul Peel's father.

NEW BLOOD NEEDED IN THE SPRINGTIME

Try Dr. Williams' Pink Pills as a
Blood-Improving, Health-
Restoring Tonic.

Every man, woman and child needs new, rich, red blood at this time of the year. That is a scientific fact. All doctors know it. The blood grows thin and poor in the winter; there is not enough of it and spring shows the effect. Take notice and see how many people are pale and sallow at this time of the year. They complain of being easily tired, their appetite is poor, and they are often depressed and low-spirited. That is mother nature urging them to improve their blood supply; but often their digestion is weakened so that they cannot turn food into blood without help. Here is where modern medical science comes to the rescue. Dr. Williams' Pink Pills have a direct action on the blood and enable you to get full use of the blood-making elements in your meals. You soon feel their effect—your appetite improves, your nerves are steadier, color returns to the cheeks and lips, you have more vim and energy and can work with less fatigue. The above statements are borne out by the experience of Mr. J. P. Gieschuk, Janow, Mass., who says:—"Very recently I found myself in a badly run down condition. My stomach was quite out of order; I could eat but little and what I did eat did not appear to nourish me. I did not seem to have enough blood; my hands and legs were blue, and I had no strength to work. I tried several medicines but did not get good results. Then one day reading our newspaper I read about Dr. Williams' Pink Pills and decided to try them. I used a half dozen boxes, and now I feel well and strong, have a good appetite, and can do my work with ease. Naturally I have great faith in this medicine as a blood-making tonic."

Whether you are seriously ill, or merely feel easily tired and out-of-sorts, you should try Dr. Williams' Pink Pills this spring. They are sold by medicine dealers everywhere, or will be sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Getting Even.

The foreman was going from one man to another with a sheet of paper in his hand. When he came to Sandy McKie he said:

"Sandy, this is a subscription to get a wreath for Jim Lomond, who died last week. All your workmates have given a shilling each towards it."
"Och, mon," replied Sandy, "that'll make me and Jim square now. He owed me a bob, anyway."

MONEY ORDERS.

The safe way to send money by mail is by Dominion Express Money Order.

New Devices.

Resembling a rubber hand stamp is a new device with which ink from a reservoir passes through stenoids that can be made by any one as it is pressed down.

Minard's Liniment for sale everywhere.

Poor Fannie.

Fannie was eating an apple, when she suddenly cried out in pain.
"What is the matter, darling?" asked her mother.
"I stepped on my tongue with my teeth," said Fannie.

"She—"George, do you love me for myself alone?"
He—"Yes, dear, but there's no use offending yer ma and pa by letting 'em know it."

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little one she would use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N.S., who writes:—"I have used Baby's Own Tablets for my children and from my experience I would not be without them. I would urge every other mother to keep a box of the Tablets in the house." The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; break up colds and simple fevers and make teething easy. They are sold by medicine dealers, or by mail at 25¢ a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Preventing Disease.

The modern aim of medicine to prevent disease rather than wait for it to declare itself is encouraging. In former days people used to remark with some amusement that among other "queer" customs of the Chinese—queer because contrary to our ideas or practice—was that of paying the doctor only so long as you were well; but nowadays we are beginning to think that the custom is perhaps not so funny after all. We have always been fond of saying, "An ounce of prevention is worth a pound of cure," but, curiously enough, we applied the maxim to almost everything except health. Now, however, we are coming to see that it applies to bodily life with special force.

The modern effort to prevent disease began with the doctors, who in spite of the good-natured, and the sometimes ill-natured, fun that is poked at them are true lovers of their kind. Since, with some few exceptions, we have not adopted the Chinese plan, the doctor earns his living solely by caring for the sick, and the fewer the sick the harder it is for him to earn his living. Nevertheless, he is working constantly to teach people how to keep well.

Societies have been formed for instructing the public how to avoid tuberculosis, cancer, heart disease and other great scourges of mankind. Moreover, associations of medical men have been established for considering the best means to promote public health and to prevent epidemics. But at bottom responsibility for health rests with the individual, who should form the habit of going to his physician for a clean bill of health, just as he goes to his dentist to ascertain the condition of his mouth.

The Lost Mother.

Old Lady (to a little girl who is lost)
"What is the matter, little girl? Are you lost?"

"Little Girl—"No, my mother is lost—she can't find me."

Copper is a leading product of western Canada.

MRS. J. GILMORE DISCUSSES CASE

Despaired of Ever Getting Well, But Tanlac Entirely Ended Stomach Trouble, She Declares.

"I was just hopeless of being well again, when along came Tanlac, and to-day I enjoy the best of health. I will praise this medicine as long as I live." This grateful statement was made recently by Mrs. Janet Gilmore, 73 DeGraaf St., Toronto, Ont.

"For seventeen months I led a miserable existence with stomach trouble. My appetite left me and anyhow I was afraid to eat. Gas on my stomach pressed around my heart till I thought I would smother, and my nerves were so excited even the noise of the children playing nearly drove me frantic. I could get no restful sleep and it was next to impossible for me to do any housework."

"Then I started on Tanlac and the first bottle convinced me I had the right medicine. I now feel like a new person, without a single ailment. Tanlac has no equal."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

Newsprint From Grass.

After four years of experimenting a Florida man has succeeded in making newsprint paper from native saw grass.

RHEUMATISM

Minard's Liniment is the old reliable relief for Rheumatism. Rub it in to the aching part and you'll see why two generations have crowned it King of Pain.

Made in Canada.

Sloan's Liniment—kills pain!

For rheumatism, bruises, strains, chest colds.

WEAK, RUN DOWN AND AILING

Lydia E. Pinkham's Vegetable Compound Brought Relief When Other Medicines Failed

Port Mann, B. C.—"I took Lydia E. Pinkham's Vegetable Compound because I was tired and run-down. I had headaches and no appetite and was troubled for two years with sleeplessness. I tried many medicines, but nothing did me any real good. While I was living in Washington I was recommended by a stranger to take Lydia E. Pinkham's Vegetable Compound. I am stronger and feel fine since then and am able to do my housework. I am willing for you to use these facts as a testimonial."—Mrs. J. C. GREAVES, Port Mann, B. C.

Feels New Life and Strength

Keene, N. H.—"I was weak and run-down and had backache and all sorts of troubles which women have. I found great relief when taking Lydia E. Pinkham's Vegetable Compound and also used Lydia E. Pinkham's Sanative Wash. I am able to do my work and feel new life and strength from the Vegetable Compound. I am doing all I can to advertise it."—Mrs. A. F. HAMMOND, 72 Carpenter Street, Keene, N. H.

Sick and ailing women everywhere in the Dominion should try Lydia E. Pinkham's Vegetable Compound.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Make old floors new again

Even when your floors are discolored with age you can make them fresh and new-looking by using Carmote Floor Varnish.

This varnish comes mixed with colors to match any woodwork. With one brush-stroke you can both stain and varnish. You can also get it clear—without coloring.

Carmote Floor Varnish hardens thoroughly and never becomes soft or sticky. It is recommended especially for all kinds of furniture.

5 cts. a line for Poetry accompanying Memorial Notices.

EN PASSANT.

† † †

ONE of the most pathetic figures in Europe, at the present time, is Eamon De Valera, a discredited patriot, wandering up and down among the mountains of his native land, an outlaw with a price upon his head, evading capture or death at the hands of his fellow-countrymen.

This century does not sympathize with patriot-outlaws of the Rob Roy and William Tell type. The heroes who withstood the usurping tyrant with a naked sword, live only in the pages of history; there is no place left for their reincarnated spirits in the present civilization. This may be attributed to the decline in the value of receding history, due to democratic ideas.

That an Irishman and a scholar like Eamon De Valera, should become inflated with crude republican ideas, is rather contrary to the current theory that the student of his country's history eventually grows full of the desire to re-establish kingdoms and dynasties fallen into decay, discounts modern methods of rule, and, like Moore, becomes the decay of Tara's Halls, and sighs, "So sleeps the pride of former's days, So glories thrill is o'er."

The modern demand for a republic in Ireland is not in keeping with tradition, and this is probably the chief cause of De Valera's failure. Formerly the Irish vision of happiness was to have a King over every faction, but the history of the country does not prove the happiness of the incumbents of the Kingly office.

The almost universal tradition of the East respecting the Flood, is that its water were boiling hot: The Talmud and the Koran say so: The native sovereigns of Ireland date from before the flood although their authentic records only begin about that time, but these records prove that the Irish Kings were continually in "hot water" ever since. The Irish antediluvian history is vague: All I can manage to trace so far, is that "before the deluge there were many princes".

† † †

ABSOLUTE certainty of the history of the Kings of Ireland begins with Heber and Hermon, Milesian princes from Galicia, in Spain, who conquered the Island in 1300 B. C., a time which, in contemporary history, places the Children of Israel as being still in bondage in Egypt, and 300 years before Solomon built the Temple.

From 1285 B. C. when Hermon died, down to the Christian era, there were 168 succeeding monarchs in Ireland, and only fifteen of them died comfortably in their beds: four died of the plague, or other pestilence, and the rest, 149 of them, were assassinated, killed in battle, or died other violent deaths. The first Irish king after the birth of Christ was Fearaidach-Fionnachta, "a most just and good prince," and he was slain by his successor Frachadh-Fion, who, 20 years later, met a similar fate at the hands of his successor Fiodach-Fionachta, and so on it went with little variety, through the lines of another 77 kings down to the time of Henry II of England, who conquered the country and became the first "Lord of Ireland," a title which continued until Henry VIII, who constituted himself king of Ireland.

Out of the 80 kings of Ireland between the years 4, and 1172 A. D. it is recorded that ten of them died natural deaths: Seven others became monks, not always voluntarily, and one died on a pilgrimage to Joppa. The ends of the others are largely stated to be as follows:

Doubtful	11.
Assassinated	22.
Slain in battle	13.
Slain by successors	13.
Poisoned by sister	3.
Drowned (thrown in)	1.
Killed by thunderbolt	3.
Choked (accident)	2.

The list is completed with Connor or Conchabhar who died in the year 837, of grief, because he could not redress the misfortunes of his country, and with Moal Conchlin II, who "resigned" on the election of Brian Boromhe, in 1002, but who was "restored" twelve years later, when Brian "a valiant and renowned prince" was foully assassinated in his tent, on Good Friday 1014, while in the attitude of prayer: The evening of the day he defeated the Danes in the memorable battle of Clontarf. The cause of the restored king's death is not reported, that event being con-

idently a minor detail compared to the importance of his restoration.

† † †

EAMON De Valera, however much or little he may be affected by Irish history, has missed the opportunity of his life. In his hands lay for a few months the destinies of the nation, but he has let them slip through his fingers like water. He could have become the national deliverer, but he listened to the harsh counsel of traditional hatred, the poisonous breathings of racial animosity, and now he must dree his weird.

None the less, he is a patriot of the first water, and as such he commands that higher admiration which the freest of all liberty loving peoples can bestow upon him. His fault is that he has missed the substance of a great free state in grasping at the shadow of an idealistic republic, and now that other hands have rescued the distressed country and are setting it up on a safe and solid basis, it is due to Eamon De Valera to recognize his efforts as a primary cause in the restoration of Ireland, although he himself has dropped back into the Slough of Despond. He was beguiled into it by a too visionary interpretation of the meaning of true freedom, and perhaps slightly by a lust for power, which the practice of dictatorial functions has provoked, or induced.

Before it is too late, and if true reconciliation can grow where wounds of deadly hate have pierced so deep, I sincerely hope he will come out of his retreat and honestly acknowledge fealty to the Irish Free State. He will be forgiven his excesses of zeal in the cause of freedom, and he could easily become a Colossus among the guardians of liberty. Now is the time for him to prove himself a gallant pilot of the new ship of state, and to give encouragement to the hope that he may live to die a natural death.

THE LINKMAN.

—O—

ST. ANDREWS EAST

—:—

Mr. and Mrs. W. Jeffrey and two children are settled in their summer home here.

Mrs. Rejal, of Montreal, was the guest of Mr. and Mrs. Alec Leroy last Monday.

The Prodigal's Return - Continued

Recalling now the merry peal, The sounds of joyous life, And greetings of his many friends, Welcoming his bride-wife.

And as these thoughts reflect his mind, His face beams forth with light, As if a ray of inspired joy, Had passed before his sight.

"It seems so strange, he murmured low,

"To see no signs of yore, To see no faces that I knew, No welcome open door.

Where are the old familiar friends? Where is their welcome Kiss? Perhaps their souls have taken flight, To realms of peaceful bliss."

"Soon forgotten is one poor wail, In this world of sorrow, The years we live, seem but a day, Alas! what tomorrow?

As the wanderer journeyed on, His way in thought mind, He passed the scenes of early life, The scenes he came to find.

Continuing next week.

Mrs. Dwyer, of Montreal, has sold her house in this village to Mr. Mahue, lately.

Mr. D. J. Byrne, of St. Philippe, attended the funeral of his cousin Mr. Johnston.

THE LATE MRS. CAMPBELL.

After a long illness Mrs. William Campbell, of Scotch Road, passed away on April 17th, at her late residence and was laid to rest in the Scotch Rd. Cemetery on April 19th. Previous to her marriage she was Miss Mary McArthur.

The funeral service was conducted by her pastor Rev. Mr. Martineau, Pres., and was largely attended. The hymns used being favorites of the deceased. "Rock of Ages, Jesus keep me near the Cross, and All people that on earth do dwell."

The pall-bearers were Messrs. W. Cole, Nephew; Arthur Campbell, Lachlan Campbell, Gordon Campbell sons; Campbell Cooke, nephew; and Robt. McIntyre.

Mr. John Johnston of the Rouge died suddenly at his residence on April 19th and was buried in the R. C. Cemetery Calumet, on April 23rd. The funeral service was held in the R. C. Church, Grenville, and was very largely attended. Mr. Johnston was a highly respected citizen. He leaves a widow who was Miss Nellie Cameron, of Avoca, and seven sons and four daughters to mourn his loss.

The pall-bearers were M. Owen, of Fulton, N. Y., a nephew; Messrs. Jno. Gill, John Grace, J. Davidson, Mason Barnes and R. McIntyre.

CHAPTER I.

"It's ripping fun, Uncle Weng." The words tumbled out gaily, and the girl paused in the act of batting an oncoming ball. "That's a foul, Lun. Try again." Her bat was poised easily and this time met the ball squarely, sending it in a straight, clean spin far into a distant thicket. "My word, Betty, that's a home run for you." Weng Toy looked about puzzled. "Where are the other players, Autumn Gladness? Did my approach banish them?"

"Lun is on one side and I'm the other. The rest are make-believes. We saw them playing the game yesterday at the Americans' on the opposite hill. They call it baseball."

"Indeed? And you like the Christian game?"

"I like the foreign game," corrected the girl, a teasing reprimand in her voice. She had dropped her bat, and now crossed to the bench, where the man was seated. Sinking into a graceful attitude at his feet, she looked up

at him with wide, serious eyes. "Uncle Weng, why do you hate the foreigners? The American girls on the opposite hill are so pretty. They laugh and run and dance. Yesterday I coaxed Lun to stand and watch them, and one girl came up and asked us in." "Did you go?" There was an easily detected anxiety in the man's voice. "No, no, of course not, without your permission; but if they ask me in today, may I?"

The girl's voice was wistful. Weng Toy looked down at the eager young face. Placing his hand under her chin, he questioned, "Are you growing dissatisfied with your old uncle's company, little Tu Hee?"

A quick, protesting shake was the answer, and the girl caught his hand, pressing it against her cheek. "You know that could never, never be, Uncle Weng. How could I be anything but happy, when you are so good to me? It's a wonder I'm not a stuck-up prig, the way you spoil me. But these girls, Uncle Weng, they look as happy as I. It is true they are perhaps a little boisterous, but when I hear them laugh and see them run and jump, little quivery thrills run all through me and I want to do the same. I could, too," she exclaimed, springing nimbly to her feet. "Poor things, they wear skirts—American skirts." She looked down with considerable satisfaction at her own silken trousers. Then with a gay laugh she darted away, disappearing like a nymph among the flowering bushes.

Tu Hee, or Autumn Gladness, had imbibed the subtle charm of her native hills of China. The cream of her skin, relieved by touches of rouge and daintily painted lips, gave her the appearance of a radiant tropical bird promising to unfold wondrous beauty. Her naturally arched brows were penciled into a fine line, while masses of black hair crowned her an oriental princess. Hoops of lustrous pearls shone softly from her ears and seemed to enhance the youth and mystery of her. Trousers and a loose coat of finest embroidered silk were the final clumps of the Old World on this maiden of the East. There was one part of her, however, which all the arts and incense offerings could not prevail on to blend with the oriental coloring. It was her eyes. They retained the deep, smiling blue of the skies.

Light as a thistle-down, she sped along the blossom-bordered path and threw herself, panting a little, on the bank of a large pool which barred her way. Two large willows drooped languidly over the water, casting it half in shade, and in and out of its shadow-flecked depths darted fan-tailed goldfish. Musingly Tu Hee trailed her gold nail shields in the water. Her reverie was of short duration, however. With a graceful bound she was on her feet again. Deftly she unbound the heavy braids of her hair, letting them fall in two long plaits over her shoulders. Gathering a handful of white blossoms from a tree beside her, she twined them over her ears and down the long, shining braids. Then, bending over the pool, she surveyed herself appreciatively in the watery mirror. Clapping her hands on the back of her head she swayed back like a graceful willow and smiled up at the white puffs sailing so airily across the blue of the sky. Then, spreading her arms like a bird its wings, she abandoned herself to the joy of mere living. Her small, satin-shod feet gleamed in and out among the flower beds. Her heart supplied the rhythm, and so perfect was the attunement that she forgot she was paying homage to life in a foreign way—forgot she was betraying her Chinese training.

She saw as in a mist her uncle and Lun approaching, but she could not stop. Her heart was too light to harbor even pity. Neither the rebuke in the mandarin's eyes nor the horror in her nurse's fascinated gaze touched her. The youth within her had called and she had had to obey. So she danced on and on until she flattered, a breathless heap, at Weng Toy's feet. It was only then the enormity of her offense rushed over her. Clapping her hands she dropped her head lower and lower until her forehead touched the mossy ground. A quiver shook her as she wondered if the Evil Eye had cast a spell on her while she gazed at the foreigners at play.

"Raise your head, Autumn Gladness. Do you not trust your Uncle Weng to know that youth and happiness cannot be curbed? Why that drop of shame in your eyes?"

Tu Hee looked up and her eyes were wide and questioning. "You think it not evil then to adopt so quickly the American play?"

"Youth mimics youth. Fret not yourself, child."

Gently he lifted her to her feet, but he could not banish the shadow that rested on her face. As they walked back to the house, where tea was ready on the verandah, Tu Hee was silent. She was musing over the strange rapture that for a few moments had changed her whole personality. She had no longer been the Gift of the Gods while she danced.

The fact confronted her, emphatic and undeniable, that during those brief moments she had been transported—nay, perverted—into a hazy foreigner with alien emotions stirring

NURSES

The Toronto Hospital for Incurables in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the school, a monthly allowance and travelling expenses to and from New York. For further information apply to the Superintendent.

every fibre of her being. What penalty should she exact from herself that would be sufficiently harsh? Incense-offering seemed a poor unguent for offended conscience. She would keep away from the foreign home on the neighboring hill for a month. Even as she resolved she was startled at the proportions her sacrifice assumed.

CHAPTER II.

Tu Hee kept her self-imposed promise faithfully. For five weeks her outings were in an opposite direction to the Americans. To-day, however, a social function compelled her to pass the shunned place. She had demurred at going, but Weng Toy insisted that she must not exile herself. He wanted her to be happy and gay and not mope around the house like a love-sick maiden, and Tu Hee shrank from telling him her true reason. She could not pain him by confessing what a magnet the foreigners still were to her.

Conflicting emotions crowded on her as Lun prepared her for Madam Hoy's function. When the last gold button was fastened and Lun pushed her in front of the long mirror to survey the loveliness that glowed from the mauve silk gown, her heart beat rapidly and her feet tilted, impatient to be out and away, her own carefree self again.

"Of course I shall enjoy Madam Hoy's party," confided Tu Hee to her nurse and maid, "but what I should like most of all would be a ride on a pony—not a meek little beast either, but one with an arch to his neck and fire in his eye."

Lun paused in the act of placing the big jade pin in her mistress's hair and peered wonderingly into her face. "But Missie Tu Hee never ride pony—mule maybe, but pony, no."

"Ah, but I've seen other girls ride them. And Lun"—here she dropped her voice, but her tones were emphatic—"I've envied the foreigners riding them, especially the English girls. They look so—so chic."

"Cheek—cheek—cheek is fowl. Missie Tu Hee. Tee hee—my, my—very funny! Just what Lun thinks—ungraceful, bad mannerly—just like cackling hens."

"No, no," laughed Tu Hee. "You do not understand. That word is French. It means smart and attractive looking."

"So?—h-m." It was evident that for once Lun openly disagreed with her child. Then, a lurking doubt in her tones, which she evidently wished to have banished at once, she questioned, "Missie Tu Hee happier than foreigners, eh?"

"I suppose." But Lun fancied the tone of her mistress lacked decision.

"Missie Tu Hee marry rich mandarin—have sons and happy right here in China. No go away or do like foreigners to make happy, eh?"

"Lun!" Tu Hee grasped the woman's hand. Her eyes were wide, and her face looked pale despite its make-up. "Who says I marry mandarin? Not Uncle Weng? No, no, I couldn't bear it."

"No, no." Lun was soundly frightened at her indiscretion, and hastened to reassure her mistress. "Only Lun say so. It not be if Missie Tu Hee say no. Course not." Lun patted the little hand she held, and her voice was so reassuring that Tu Hee grew calm again almost immediately, but her voice was a trifle sharp as she admonished, "Please, then, Lun, don't say such foolish things again." Then noticing the hurt look on the other's face she placed her arms around her and exclaimed impulsively, "I am happy with just you and Uncle Weng. I want no husband—unless—"

"Yes!" prompted the Chinese woman.

The girl's heavy lashes drooped shyly—"I fall in love."

Tu Hee peered happily from between the curtains of their rickshaw on the way to Madam Hoy's. The life of the thoroughfares never ceased to interest her.

There stood the old man in his customary corner dishing up ears of boiled green corn. A little farther along, surrounded by a group of children, was the candy man, delighting them by his deftness in turning out animals and birds, which formed mysteriously as he blew taffy from a straw.

An old beggar, ragged and dirty, prostrated himself as he saw the oncoming rickshaw, and Tu Hee tossed him a few cash as they sped past.

"We shall pass the Americans," I wonder if they will stop us to-day," Tu Hee mused aloud, but there was an eager thrill in her voice.

(To be continued.)

On With the Dance.
Bug (to sweetheart)—What an ideal dance dearest!

WANTED

Young ladies to take a Three Years' General Nursing Course in the Ontario Hospital, 889 Queen Street West, Toronto. \$25.00 a month with board, uniform and laundry for the first year, with increase each year afterwards. Applicants must be healthy, and under 30 years of age. Apply to Medical Superintendent, Ontario Hospital, Toronto.

Woman's Interests

GRANDMOTHER'S SHAWL.

In the days of our dear mid-Victorian grandmothers, when hoopskirts extended the proportions of those worthy ladies far beyond the confines of a coat, the shawl, of necessity, was an important article of dress.

Of the many varieties of these garments in vogue at that day there were two of distinct elegance, the cashmere manufactured in the beautiful Vale of Cashmere celebrated in song and story, and the Paisley from the ancient Scottish town of the same name. One or both of these lovely products of the hand loom were apt to be in the wardrobe of any lady of affluence a generation or two ago, and no bride's trousseau was thought to be complete without one.

The cashmere, examples of which are occasionally to be found in this country at the present time, were exquisite works of art—so soft and finely woven that although of enormous size, they could easily be drawn through a lady's finger ring. The wool for these shawls came from a certain breed of goats, from Thibet, said to be the most beautiful in the world. Only the finest of this—that lying next to the skin of the animal—was used in the manufacture of shawls. The lovely and intricate patterns for these garments were handed down from time immemorial, from an incredibly ancient Hindu ancestry, the originals of which were preserved as heirlooms in ancient castles and were regarded with almost sacred veneration.

The Harness Plaid.

The Paisleys, more frequently to be met with in our own country, while often exquisite in texture and of the same Asiatic designs, intricate and delicately lovely as old Venetian point, are, after all, but imitations of the incomparable cashmere. In the home of its birth the Paisley shawl, however, is not so designated, but is called a "Harness Plaid" (pronounced plaid), the word harness indicating the character of the design.

During the time of their manufacture, when 8,000 looms were kept busy all day long meeting the demand for them, three grades of the shawls were woven—that for ceremony, which was naturally the most lovely, that for every-day use, and the tartan worn by the men of the clans as a distinguishing insignia.

The shawl of ceremony, which was the finely woven one with Asiatic patterns, was never worn by an unmarried woman. On the Sunday following her marriage, however, when she was "kirked," she appeared for the first time in her "harness plaid." To be "kirked" meant simply that on the first Sunday after the marriage ceremony the bride and groom, with their attendants, appeared at church in a body.

Of great length—the garment measured three and one-half yards long by one and three-quarter yards wide—it was first folded in the middle, then across to form a triangle, the upper point perhaps a foot from the bottom one, and then thrown across the shoulders and fastened with a large pin made especially for the purpose. A silk bonnet tied under the chin with a big bow was worn with this, and quaint and coy indeed must have been the fair Scotch lassie so robed on her "kirk" day.

Favorite of Queen Victoria.

Queen Victoria, dear old lady of tradition that she was, loved the Paisley to her dying day, and every girl friend of her little Majesty knew well that on her wedding day a present of a rare one from her beloved sovereign would be hers.

Always expensive, now since their manufacture has ceased—some fifty years ago when the vogue for shawls of every kind had waned—the art has become almost a lost one, and their price consequently is above that of rubies. They are literally worth their weight in gold. Far above the price of rubies or their weight in gold, however, are they valued by those in whom is a deep-seated reverence for the past—for things hallowed by their contact with life's experiences.

Grandmother's shawl! What memories it evokes! What dreams are born from musing over its history! What stories it might tell! It is something more than a mere garment to be worn and discarded at will. It is a symbol. Romance clings to it. Love, tragedy, self-sacrifice, joy, breathe within its lavender-scented folds.

WHEEL TABLE IS BIG HELP.

It is nothing less than the effects ten wagon of the society novel that is made in a fashion big and strong to do the work of the farm wife, that is coming into high favor.

It has been found to save countless steps. Whole meals can be served with only one or two trips from the dining-room to the kitchen and it is just as useful in clearing the table afterwards. The dishes can be stacked on it as they are washed, and wheeled to the cupboard in one trip. The wheel table is also convenient for serving buffet lunches in any room of the house or on the porch. In time of sickness it is invaluable.

This wheel tray or table need not be expensive. If friend husband is handy with tools, he can transform an

old wash-stand or kitchen table to this use. It should be made of durable material and covered with a hard finish so that it can be washed to keep it clean and sanitary. Wheels from an old baby carriage, particularly if rubber tired, have often been found useful for these homemade wheel trays.

TO FILL THE CRACKS.

A good formula to follow in making a homemade crack filler is: One pint of linseed oil, one and one-half quarts of turpentine, one pint of whiting or cornstarch.

This will make a white filler. To darken for oak add one teaspoon of raw umber; for walnut, add one teaspoon of Venetian red, half teaspoon yellow ochre; for mahogany, add one-quarter teaspoon of yellow ochre, half teaspoon Bismarck brown, and a teaspoon of burnt senna.

WINGS AT DAWN.

Dawn is dense with twitter, And the white air swims and sings in rapid wings that glitter, And the flashing of wings— Delicate and fugitive shiverings. The dew curl up in haze, While the sun from his hive Like a giant bee ablaze Bursts dizzily alive— And through the glow a thousand swallows dive.

Light like a storm Deluges the grass, And birds in a swarm Wheel, dwindle and mass— And their wings are slit silver as they pass.

—Joseph Auslander.

POTATOES HASHED IN CREAM.

Cut warm boiled potatoes into small even pieces and add a half pint of boiled cream and a teaspoonful of salt. Heat slowly for ten minutes.

Minard's Liniment for Corns and Warts

Good Building Prospects for 1923

Everything points to the year 1923 being an exceptional one for building construction in Canada. The number contemplated projects announced at even this early stage is astonishing and quite beyond the ordinary level of Canadian building. This follows upon a year which saw a most pronounced revival of building in the Dominion and marked 1922 as an outstanding year in this regard. The impressive total of construction in Canada last year has been exceeded only three times in Canadian history.

The value of construction contracts awarded in Canada in 1922 was \$331,443,500 compared with \$240,133,300 in 1921, an increase for the twelve months of 29.5 per cent. The extent to which building construction has revived in Canada since the termination of the war is to be seen from a comparison of the figures of immediately previous years. Total value of construction in Canada in 1918 was \$99,442,100. In 1919 it amounted to only \$19,023,300 and in 1920 to \$255,605,500. The amount of work undertaken last year shows an increase of more than sixteen per cent over that done in the first year following the war.

Of the total value of 1922 construction, \$104,201,500 was accounted for in residential erections, \$81,385,700 in business establishments, \$25,755,800 in industrial work, and \$120,500,800 in engineering construction. The same total was divided over the Dominion as follows: Maritime Provinces, \$11,154,000; Quebec, \$103,291,800; Ontario, \$166,628,000; and the Western Provinces, \$50,770,000. The leading city in construction accomplished in 1922 was Toronto, which alone accounted for a tenth of the Dominion aggregate. Montreal, which in the previous year was on a practical parity with the Queen City, fell behind in 1922, though maintaining the second place. Following in order were Vancouver, Winnipeg, Ottawa, Hamilton, Quebec, Windsor, London, Edmonton, Calgary, Saskatoon, Halifax and Victoria.

It is doubtful if any phase of Canadian industry in 1922 can record so gratifying an achievement as building, and one has to go back to the prosperous pre-war years, 1911-1913, to find a parallel. During the year labor, capital and markets were all factors in contributing to healthy and sustained activity, and the promise of an even larger expansion to follow in 1923 is trustworthy. The month of December gave birth to \$52,472,400 worth of fresh projects, the largest monthly aggregate since April, 1913. This is sufficient indication of what 1923 will accomplish, and using building construction as the fairly accurate barometer it generally proves to be, there is an augury for Canadian industrial development in general.

Scientist Finds the Origin of Coal.

Prof. Barton Scammell, President of the Radium Institute at Dover, asserts that he has discovered the origin of coal. He has been engaged in research work with lava from Mount Vesuvius which is being used as fertilizer, and says this led to the discovery that the layers of "bit" — the mysterious substance found on the top and bottom of all coal seams — are identical in analysis with lava.

The bit contains lime, iron, magnesium, potash and other elements required by plant life, and when made radioactive with solutions of radio-phosphate of potash, it absorbs nitrogen from the air and forms a perfect fertilizer.

The origin of coal is thus explained by Prof. Scammell. It is a cellulose of trees and vegetable matter, carbonized by hot lava, thus forming coal, and sunk into the depths of the earth by disturbances of the earth's crust at a remote period.

He claims that conversion of the bit, now a waste product, into fertilizer, will enrich the mining and agricultural industries.

Small French Motor Attains High Speed.

Georges Barbot, winner of the gliding competition at Biskra, made four flights recently at Toulouse in a glider with a seven-horsepower auxiliary motor.

According to Rene Quinton, President of the National Aeronautical League, who has received a personal account of the feat, Barbot attained a speed of 90 kilometres per hour, which makes his performance unique. According to a noted French aeronautical authority, Barbot's glider has a sensationally flying range of 2,500 metres, and could travel 1,000 kilometres on 20 litres of gas.

"We are moving by great strides toward economical flying," Quinton declared. "Air navigation, which is most costly at present, is entering a new era, toward which we have been striving. It is going to become what the flight of the bird now is — the mode of locomotion least costly in effort."

Barbot's accomplishment frees gliding from the handicap of hillside take-offs, which has restricted experiments to a few localities.

Grazing Leases.

It has been decided to grant grazing leases of vacant Dominion lands unfit for agricultural purposes in the Provinces of Manitoba, Saskatchewan and Alberta and which are encumbered by seed grain and relief indebtedness, on the condition that the lease will contain a clause to the effect that it may be cancelled on one year's notice. The applicant, however, is given the option of paying the indebtedness and obtaining a lease without this cancellation clause. Formerly applicants were required to pay the indebtedness before obtaining leases.

Discretion.

Who seeks to pluck an apple hanging high
Keeps both hands free and lets the windfall lie.
—Nora R. Cunningham.

Experience.
She—"If you've never been in love before, how is it you're so clever at it?"
He—"I spent an afternoon with a widow last summer at the seashore."

Humility.

The bird that soars on highest wing,
Builds on the ground her lowly nest;
And she that doth most sweetly sing
Sings in the shade, where all things rest;
In lark and nightingale we see
What honor bath humility.

When Mary chose the better part,
She meekly sat at Jesus' feet;
And Lydia's gently opened heart
Was made for God's own temple meet;
Fairest and best adorned is she
Whose clothing is humility.

The saint that wears heaven's brightest crown
In deepest adoration bends;
The weight of glory bows him down
Then most, when most his soul ascends;
Nearest the throne itself must be
The footstool of humility.
—James Montgomery.

Her Father's Hands.

Two men met on the sidewalk. One was walking slowly and thoughtfully homeward. The other, who was on his way downtown, pushed a baby carriage in which was an infant girl. They spoke pleasantly in passing, and each said a word or two about the baby.

As they parted the one who walked alone carried a picture in his mind that stayed with him all the evening, and a lesson that remained to the end of his days. The baby as she lay in her carriage was looking up, not into her father's face, for that was too far away and she was not old enough to focus her eyes to see well, but at her father's hands on the handle of the carriage. She was watching them intently and seemed greatly interested in their movements. And as she watched she lay in quiet peace. Those were the hands that protected her, that lifted and carried her, that brought her what she longed for; those were the hands that expressed tender, loving care.

"She looks up at her father's hands," thought the man, "and is at peace, though she sees nothing else. Why, I wonder, do I not do that? I am so troubled many times because I cannot see God more plainly. I look, but am unable to look into his face. The eyes of my faith are too weak. Could not I, then, like that little one, learn contentment in watching the Heavenly Father's hands? They are the hands that protect me, that lift and carry me over the hard places, that bring me what I need; they are the hands that show the Heavenly Father's tender, loving care. Yes, but those hands sometimes carry me whither I would not go; they sometimes bring me what I do not want. But are they any less the hands of a loving Father? Do they not just as perfectly express the love of the Father's heart when they bring sorrow as when they bring pleasure? Surely, for 'whom the Lord loveth He chasteneth.' Yes, they are the hands of love, and I will learn 'in everything to give thanks; for this is the will of God in Christ Jesus concerning me. I will keep my eyes on my Father's hands and be at peace.'"

The Walking-Stick Barometer.

A weatherwise old gentleman whom the London Morning Post quotes says: "In my hall stand are a cherry-wood stick and an umbrella. Every morning when leaving home I put my hand on the cherry stick. If it's dry I take it with me. If it's cold and damp I take the umbrella." And the test is usually dependable.

Regulates Power.

Two Englishmen have invented an electro-magnetic clutch to automatically regulate the electrical output of a generator or the driving power of a motor.

Furnaces Afloat 250 Years.

After being afloat for nearly 250 years, the furnaces at a famous glass-works near London have been extinguished, as the factory is being removed.

—AND THE WORST IS YET TO COME

What the Old Squaw Knew.

A bear is afraid in the dark! The old squaw knew it and acted accordingly. She wanted bear for supper, and she got it. How she succeeded Mr. Arthur Heming tells in the World's Work. His story is notable among those that tell of the clever ways in which man has outwitted bruin.

The Indian woman and her eight-year-old daughter, he writes, were gathering moss on the shore of Great Slave Lake, when the mother, observing a clump of gnarled spruces not far off, sent the little girl there to see whether she could find berries. The child found instead a round hole that led into a cavern beneath the roots of the trees, which stood upon a little knoll. She called to her mother to come and see it.

On kneeling and peering within the mother discovered a bear. Turning swiftly round, she sat down in such a way that her body completely blocked the hole and shut out all light. Then she sent her child on the run for camp to fetch her father with his gun.

To anyone not versed in woodcraft the squaw would seem to be extraordinarily brave; but bravery did not enter into the act. The woman knew bears; that is all. She knew that so long as all light was blocked from the hole the creature would lie still.

When the father arrived he shot the bear—and a big fellow he was!

"Every little helps" is a proverb, and not an excuse for meanness.

Winds of Home.

We have gone down to the sea
With her brine on our fearless lips,
From her grasp we have laughed us free
When she raged for her tithe of ships;
Unmoved at the feet of death
We have fought her seething foam;
But now we choke with the quick-drawn breath,
We are rounding in towards home!

There's a light of gold in the southern sky,
And the luring spice winds croon,
From lands in a zone of sun that lie
In a golden afternoon;
But afar and away where the gray clouds frown
There's a harbor for sails that roam;
And sweeter than song the gulls scream down
The brine-buried winds of home.
—Edith Parry Dickens.

Eggs and Waylight.

Birds which habitually lay their eggs in the dark produce eggs that show an absence of pigment while those that lay their eggs in exposed places usually produce eggs which harmonize in some measure with their surroundings.

U.S. Eats to Sugar Record.

With a per capita consumption of 102 pounds the American people made a world record as sugar eaters last year.

Achievements That Helped Man To Live.

BY RANSOME SUTTON

Reviewing the works of the world it is quite apparent that mankind has not progressed uniformly; that many colossal mistakes have been made, and that the progress of the races may be likened to the progress of an individual who goes forward two steps and then takes one step back. Nations, as well as individuals, have embarked on disastrous enterprises, which sapped their resources and left them, like Germany to-day, exposed to their enemies. The energies of whole peoples have frequently been misdirected. What good, for example, has mankind derived from the Seven Wonders of the Ancient World, upon which so much labor was expended? Until Egypt began building the Pyramids the Egyptians were making rapid strides toward civilization. If their toil had gone into dams and irrigation systems their descendants would not now be dependent on other peoples. It is plain, therefore, that the work of the Pharaohs was misdirected.

Value of Human Achievements.

History teaches one lesson very plainly—human achievements, whether in the form of constitutions, or books, or battleships, or partitions, must be valued ultimately by the character of the influence they exert on the minds and habits of mankind. Hence all efforts are misdirected and all works, however stupendous, are worthless unless they tend to increase human efficiency.

The really great achievements which revolutionized the character of mankind and made civilization what it is have not been numerous; they can all be counted on our fingers. Nor were they spectacular performances; they attracted little attention at first. But they changed man from a savage into a cultured citizen. These achievements grew largely out of the faculty of invention.

What Distinguishes Man.

It has been said that man differs from other animals in fact he uses tools. Back of the tools, however, lies invention; so it is the invention of the

tools, rather than their use, that distinguishes man. Language cannot be regarded as the test, for many kinds of animals have ways and means of communicating with one another. R. L. Garner, who spent 120 days in a cage in an African jungle, claims to have learned chimpanzee. He also claimed to be able to exchange primitive ideas with monkeys in the zoo. Are not the clucks of a hen real words to her chicks? If language were the test many kinds of mammals would be men. And if the use of tools were the test trained apes which use saws and hammers would be men. No kind of creature but man, however, exercises invention, and because of his invention man has civilized himself.

The first epoch-making achievement of mankind probably was the shaping of a stick into a club. To do that would involve invention. Wild apes are said to use sticks and stones, but they do not shape them; they use them exactly as picked up in emergencies.

To grab up a stick and use it against a beast is very different from the act of preparing the stick before the attack in order that it may be used efficiently. To grab up and use a stick results from an impulse; to fashion a club expresses an idea in wood. Before clubs were invented our ancestors were at a great disadvantage against the claws and fangs of their enemies. The invention of the club gave them a better chance. But did it not mean more? Did it not mean that into the pre-human brain a new faculty, the faculty of invention, had appeared? And did not the anthropoid which first exercised invention then and there cross the line which separates man from other mammals? Viewed in this light, the invention of the club may be regarded as one of the greatest achievements of mind; it armed man against his enemies and started him on the road toward civilization.

While wielding clubs new made men discovered that inarticulate sounds could be rendered articulate and made to express ideas. This process also involved invention.

After inventing the club and language, savage genius invented ways and means for starting a fire. Without that achievement mankind would still be gnawing bones. Cooked food was good for the body and, rendering fish for the first time edible, enabled tribesmen to widen the boundaries of their hunting grounds.

Pulp and Paper Progress in Newfoundland

According to the terms of an agreement stated to have been reached between the Government of Newfoundland, the Trades' Facilities Board of the British Government and influential British business interests, Newfoundland is to have a large pulp and paper plant which in proportions and capacity will rival that erected some years ago by the Harmsworth interests. According to advices from England which have been substantiated by the Anglo-Newfoundland Development Co., Ltd., of Grand Falls, the British Government has offered to guarantee bonds to the extent of \$10,000,000 upon the proviso that the Government of Newfoundland guarantees a like amount, but what conditions are attached to the guarantees have not been made public.

The scheme talked of provides for the establishment of a paper mill of 400 tons daily capacity with surplus power for the aluminum industry. The projected work, which will give employment to a large number of men, consists in raising the waters of Grand Lake about 30 feet, and as the lake has a surface of 56 miles by 3 the storage by dam thus developed will be considerable. From Grand Lake the water will be carried for a distance of 7½ miles through a canal to Deer Lake with a head of 175 feet. From the proposed mill site at the head of Deer Lake, the manufactured paper will presumably be shipped at Humbermouth, Bay of Islands, via a railroad haul of 23 miles. On the other hand, the mill may be erected at Humbermouth on tide water and the power transmitted from Deer Lake to that point. The Reid Newfoundland Company are said to be putting their timber limits into the scheme.

Newfoundland has large areas of black spruce and other timber eminently suitable for manufacture of pulp and paper, and these areas are proving very attractive to European developers. The pioneer of the industry in the island was Lord Northcliffe's company, the Anglo-Newfoundland Development Company, whose plant was established at Grand Falls in 1909. The cost of the installation of this plant was about \$6,000,000; it has a permanent plant staff averaging 600 men and a winter logging staff of 1,500 men; about 120,000 cords of pulpwood are cut each winter. The Grand Falls mills have, since 1909, provided the paper for all the Northcliffe publications in England.

Considerable development followed in the wake of the entry of the Northcliffe company into the Newfoundland pulp field. A Norwegian company completed a plant for the manufacture of sulphite pulp at a cost of \$2,500,000. Another company with \$20 square miles of timber limits is operating mills at Bishop Falls. The output of the plant at Grand Falls is 200 tons of pulp per day, whilst, according to plans, that of the new company on the Humber River will be about half as much again. The annual value of pulp and paper exports from Newfoundland exceeds \$5,000,000.

Under Newfoundland law the export of unmanufactured pulpwood is prohibited, and from this basis the thriving pulp and paper industry of the island has been built up. In the last decade there has been a gratifying development in the industry, which will be considerably enhanced by the new establishment, but there is, nevertheless, room for much greater exploitation and the introduction of many more such plants, the establishment of which is encouraged and assisted in every possible way by the island government.

An Ancient Sacred Song.

No choir singer nor any lover of church music tires of the "Te Deum Laudamus" music. In answer to an inquiry about this music, the Musical Courier says: "The Te Deum Laudamus dates from A.D. 600, and Nicolas, Bishop of Remains, in Dacia, is said to be responsible for it. It is said that the greatest of the settings for it have been composed in England. The earliest one was written by Purcell for St. Cecilia's Day, 1694. His church music shows the original melody." In 1847 there was a revised publication of the Te Deum, which appeared as an Ode for St. Cecilia's Day.

"Dr. Blow was another Englishman who wrote church music, and he also composed an Ode for St. Cecilia's Day; he was organist in Westminster Abbey, wrote a Te Deum for the same instrument. The first sacred music that Handel composed to English words was the Utrecht Te Deum, the Mass, of which is dated January 14, 1712. There have been a multiplicity of Te Deums written."

If you wish to accomplish great things, busy yourself with what the mediocre refer to as "mere details."

An Eskimo's Love Mistake.

Between the cake of ice on which a youthful Eskimo sealer had erected his hut and the larger floe that was pre-empted by the parents of his sweetheart the cold had broken a crevasse some hundred feet or more in depth and twenty in width. Except for a single jutting fragment just thick enough to bear little more than his own weight, his home was completely cut off from the world about him. This practical isolation inspired him.

He began storing up in his humble quarters oil, blubber and other delicacies sufficient for the support of two persons for at least six months. He had resolved to steal his bride, and knew that if he gained his foe with her and broke down the bridge they were safe from trouble of pursuit for the winter season or until warmer weather moved the icebergs to closer contact.

Now the Eskimo, sleep on a raised snowbank on one side of the floe, or ice-house, inclosed in their sealskin nightgowns, with a huge protecting hood over the head and face, making them as comfortable as their nature requires.

The youth waited outside the girl's home until all within were asleep; then creeping through the narrow entrance he made his way toward the young woman. He seized the long bag-like mass in which her form was incased, bore it triumphantly across the narrow bridge to his stronghold and before pursuit was possible with his ax cut down the ice bridge and was safe.

Not wanting to hear the objections of those on the other side of the abyss, he knelt down beside her and dragged back the hood to catch a glimpse of her face.

He had stolen his intended father-in-law!

What Every Husband Knows.

Said the First Man—"I'm looking for a wife who has a good disposition; and who never loses her temper."

Said the Second Man—"I want a wife who knows how to keep house, and who stays home nights."

Third Man—"Give me a wife who can cook."

Fourth Man—"What I want is a girl who has a little money of her own, who is pretty good-looking, and has no relatives."

Fifth Man—"All I ask for is a wife I can show to anybody, no matter where I am, and I'm glad."

Then all the others gathered around him and with one acclaim shouted: "You win!"

Standard Floor Mats.

Rooms in Japanese houses always are built to fit a certain number of floor mats, which are of a standard size, about three by six feet.

Conserves Heat.

Belts made of linked aluminum plates have been invented to surround cooking utensils on gas stoves to conserve the otherwise wasted heat.

Under Control.
Aunt—"In reference to this young man, don't let your feelings run away with you—there may be heartbreak at the end."
Niece—"Don't fear, the heart-brake was applied at the beginning, auntie dear."

Cave Country Gossip.
Miss Painted Hair—"Have you heard about Sadie Sabertooth's engagement to young Multiskin?"
Miss Fewskine—"There's nothing in it. Her mother gave her that bump on the knob with a bone-cracker."

MUNICIPALITE DU CANTON DE

CHATHAM.

REGLEMENT No. 43.

Il est ordonne et decrete par reglement de ce conseil:

"Qu'il soit permis aux hoteliers licencies de cette municipalite, de vendre dans leur etablissement de la biere au verre, sans repas, et qu'un permis pour la vente d'iceile leur soit ainsi accorde par la Commission des Liqueurs de Quebec. Le tout conformement a l'article 31 de la Loi des Liqueurs alcooliques, tel qu'amende par la loi 12 George V, chapitre 31, section 6 et de nouveau amende par la loi 13 George V, chapitre 14, section 5.

AVIS PUBLIC.

Aux habitants et electeurs municipaux de la municipalite du canton de Chatham.

Avis public est par les presentes donne par les assises John Burk, exayer, maire, et Albini Lamarche, secretaire-tresorier de la municipalite du canton de Chatham, que le reglement ci-dessus sera soumis a l'approbation des electeurs municipaux de cette municipalite, qualifies a voter sur le dit reglement; et en consequence, une assemblee des electeurs municipaux de cette municipalite sera tenue a St-Philippe d'Argenteuil, a la salle chez Cyprien Lafleur, lieu ordinaire des sessions du conseil municipal du canton de Chatham, vendredi, le 25 mai prochain, 1923, a dix heures de l'avant-midi, afin de tenir un pol pour decider si oui ou non, le reglement ci-dessus, soumis a l'approbation des electeurs municipaux de cette municipalite, sera adopte.

Le vote sera au scrutin et durera deux jours, vendredi, le 25 mai prochain, et le lendemain, samedi, le 26 mai prochain, depuis dix heures de l'avant-midi jusqu'a cinq heures de l'après-midi.

Daté a St-Philippe d'Argenteuil, ce 23e jour d'avril 1923.

Maire. W. J. Burk.

Séc-tresorier. Albini Lamarche

PROVINCE OF QUEBEC
DISTRICT OF TERREBONNE
MUNICIPALITY OF THE TOWNSHIP OF CHATHAM.

BY-LAW No. 43.

It is ordained and enacted by by-law of this council:

"That the licenced hotel-keepers of municipality be allowed to sell beer by the glass without a meal in their establishment, and that therefore, a permit be granted them by the Quebec Liquor Commission for the sale of beer by the glass without a meal in their establishment; the whole in conformity with article 31 of the Quebec alcoholic liquor Act amended by Act 12 George V chapter 31 section 5 and again amended by Act George V, chapter 24, section 5.

PUBLIC NOTICE.

To the inhabitants and municipal electors of the municipality of the Township of Chatham.

Public notice is hereby given by the undersigned, John Burk, Mayor, and Albini Lamarche, secretary-treasurer, of the Municipality of the Township of Chatham, that the aforesaid by-law be submitted for adoption to the municipal electors of this municipality qualified to vote on said by-law; and that consequently, a meeting of the municipal electors of the Municipality of the Township of Chatham, will be held at St-Philippe d'Argenteuil, at Cyprien Lafleur's hall, the ordinary place of meeting of the sessions of the council of this municipality, on Friday, the 25th day of May next, 1923, at ten o'clock in the forenoon, in order to hold a poll to decide whether or not the aforesaid by-law, submitted for approval by the municipal electors of this municipality shall be adopted.

The vote shall be taken by secret ballot and will be held during two days, Friday, the 25th of May 1923, and the following day, Saturday, the 26th May 1923, from ten o'clock in the forenoon to five o'clock in the afternoon.

Dated at St-Philippe d'Argenteuil, this 23rd April 1923.

Mayor. W. J. Burk.

HYDRO-TORON

Where Else Can You Find Such a Guarantee?
10,000 Miles
Against Stone-Bruise, Rim-Cut, Blow-Out

Hydro-Toron tires escape the hidden defects that cause trouble, because they are made by the Internal Hydraulic Expansion Process.

Then there is the Toron-treatment of fabric, which gives the layers greater tensile strength, more

holding power, increased affinity for rubber and provides resistance against the damaging effects of water and weather.

Have you joined the army of users who are enjoying these unusual values? If not, say "Hydro-Toron" the next time you buy tires.

Ernest Thomas, at one time Pastor of the Methodist Church here, will be pleased to know that on Wednesday, May 9th, the honorary degree of Doctor of Divinity was conferred on him by Queens University. Rev. Ernest Thomas is now of the Evangelism and Social Service of the Methodist Church.

Fortunate indeed are those who are able to boast a mother's love, and to those whose dear ones have passed out into the great beyond, we would say, whether dead or living, Honor them on Sunday next, the day signally set apart for loving remembrance, by doing what you think they would like, and as we drop a tear, whether in joy or sorrow, let us be ennobled by the thoughts of "Mother" The dearest word on earth.

Mrs. Paterson, of Ottawa, is the guest of Mrs. Geo. Christie for the summer.

If you have anything to sell or wish to procure something that others might have, try a For Sale or Want Ad in this paper. It gets results.

If you want your car nicely painted and fixed up take it to the Western Garage, McQuat's Old Foundry. Repairs neatly and promptly executed, and prices right. Try us out.

Mr. D. Fournier, who has started in the milk business in town, is prepared to supply all customers with milk at 9c. Drop a postal to Mr. Fournier at Lachute and he will call on you.

The Annual Meeting of the Quarterly Official Board, of the Lachute Circuit, Methodist Church, was held on Tuesday, May 8th. Reports received from Lachute and Brownsburg, representing the various departments of Church Work were most encouraging. 17 new members were received into the Church during the year. \$894 raised for Missionary and Connectional Fund, reflect a genuine and loyal interest in the welfare of those beyond the local organization. The services of the pastor were recognized by a substantial and tangible expression of appreciation. Officers for the ensuing year were elected.

Ayrshire Breeders Meet.

The Annual Meeting of the Laurentian Ayrshire Breeders Club was held in Rodrigue's Hotel, on Tuesday evening last, May 8th. Some twenty members were present and elected their new board of directors as follows: C. R. Rodger, President; Jos. Pesant, Vice-President; Stanley Hamilton, Eddie Kettyle, Robt Morrison, Wm. McGrandle and J. Trepannier.

Mr. W. F. Stephen, of Huntingdon, was present and delivered an address upon the increased demand for pure bred and grade Ayrshire, specially in Western Canada.

The holding of an Ayrshire Field Day was brought under discussion and left for action with the new board.

The Secretary, Mr. A. Bothwell reported the Club had a most successful year, coming out with a balance to the good of \$11.66.

CHURCH NOTES.

Presbyterian Church Services will be held next Sunday, May 13th, as follows: In Lachute at 11 a.m., and 7 p.m., and in Upper Lachute at 11 a.m. The above services will be conducted on standard time.

The services in Brownsburg will be held at 3 p.m. (Daylight Saving Time) Rev. A. George MacKinnon will conduct the services in Lachute and Mr. Lloyd will conduct those in Upper Lachute and Brownsburg.

Last Wednesday evening Lachute was highly favored in having Rev. Dr. J. H. MacVicar, of Honan China, visit and lecture on the subject Old China justling the New. Those who heard him were deeply moved by the picture he presented of the great work and opportunity which challenges the church.

A Missionary Concert will be given in the Baptist Church, on Thursday, May 10th, at 8 p.m.

Missionary life and service will be exhibited in character and costume in "One Day in India" repeated by request. Don't miss seeing this. Other programme of music song etc. Admission 25cts. Children 10cts.

SEEDING NEW MEADOWS.

One of the interesting and successful features of the Illustration Station work is the comparison between heavy and light seeding of timothy and clover. When making surveys of many farms in each county where Illustration Stations are located it was found that most farmers were not sowing sufficient seed to give the best results. To illustrate the advantage of heavier seeding, particularly with clover, on each station a small portion of the field is sown to the usual amount used in the neighborhood, which is from two to four pounds of clover and eight to ten pounds of timothy, and the larger portion of the field sown with a mixture of clover and timothy amounting to twenty pounds per acre. Every illustration showed the heavier seeding to give the heaviest crops of hay. The difference in growth is so noticeable that farmers passing can see the line between the two lots to a foot. On several stations the clovers on the light seeded portions were winter killed, while the heavy growth formed a protection to the roots and usually withstood the severest winter and spring frosts. Several operators report one-quarter to one-third more hay on the heavier seeding and have a much better chance for a second crop of hay or seed the same season.

When seeding sandy or clay loams sow eight pounds of common Red clover; two pounds alsike and ten pounds of timothy per acre. In some cases it is advisable to sow two pounds of alsike in addition.

On heavy clay that is liable to be damp or on light, sandy soil sow eight pounds of alsike; two of Red clover and ten of timothy per acre.

On black muck or peaty soil sow eight pounds of alsike; two pounds of Red clover; eight pounds of timothy and two pounds of Red Top per acre. For a nurse crop on peaty soil, always sow barley.

SHEEP ON THE GENERAL FARM.

Sheep have one thing in common with poultry: a farmer is more likely to be successful with few than with many. In the beginning it is a very good plan to get only a few breeding ewes, and grow into the business as experience shows the way. One of the cheapest ways of starting a flock is to secure young western ewes and breed them to a purebred sire of the mutton breeds.

A purebred ram is relatively cheap, and without one a flock soon degenerates.

The early lambs are the most profitable, but the production of such lambs requires considerable experience and better equipment. It would probably be better for the beginning farmer to breed his ewes for late lambing.

Sheep are the natural prey of parasites, which flourish chiefly during the hot, dry months of summer. For this reason sheep should not be allowed to drink water from old stagnant pools, but should at all times be supplied with pure, fresh water.

Another summer precaution is to insure plenty of green feed. Pastures are likely to get scant in July and August, but the forehand farmer will have a field of rape ready for them about that time. In the fall, rape which had been seeded in the corn field

at the time of last cultivation, will also supply pasture at a time when the grasses are short.

The winter care of the flock is the most critical, however. Proper shelter is highly essential, but expensive buildings are not needed. Sheep want to be dry under foot, and they do not stand drafts. They are amply protected against cold weather, provided the rain, snow, and wind is kept out of their sheds.

Proper winter feeding of sheep is quite an art, as too heavy, as well as too light feeding is harmful. It is essential that the flock go into winter quarters in a good, thrifty condition. Clover or alfalfa hay of good quality, together with an occasional addition of corn fodder, is all the ewes will need until about a month before lambing. If the lambs are to be dropped before the ewes get into pasture.

No grain ration has given more satisfactory results in many experiments, than a mixture of whole oats and bran. Both are easily available on the average farm. Either half and half or two parts of oats to one of bran is satisfactory, and each ewe should receive about half a pound of this mixture a day. When other roughages are substituted for the alfalfa or clover, it is best to feed grain all winter long. Do not winter a flock by giving them the run of the straw stack.

To keep the digestive tract in good condition root crops or corn silage should be fed, in amounts not to exceed two to two and one-half pounds per day. This succulent feed, combined with plenty of exercise, is the best tonic in the world. In dry weather it is advisable to feed the roughage some distance from the barn or sheds, so that the ewes will be forced to walk around considerably.

The closest attention must be paid to the flock at lambing time. Many lambs and an occasional ewe can be saved if the shepherd remains on the job. Then, when the lambs are about a week or two old, some bright day the ram lambs should be castrated. A week or two later all the lambs should be docked.

Lambs should be weaned when they are about three or four months of age. Unless this is done they will nurse until late in the fall, and cause the ewes to go into winter quarters in poor flesh.

Sheep should be sheared as soon as the weather gets warm enough so that there will be no further danger of catching cold. About a week after shearing, the whole flock should be dipped, as the presence of lice and ticks keep the flock thin.

The following are excellent rules for the guidance of beginners in sheep husbandry:

1. Use good purebred rams.
2. Select young ewes. Yearlings, two-year-olds, or perhaps three-year-olds, are far more desirable for starting a flock than older ones.
3. Discard broken-mouthed ewes and ewes with bad udders.
4. Choose ewes having good size, desirable forms, and dense fleeces.
5. Feed the lambs especially well throughout the first year because a sheep makes his greatest growth during this period.
6. Give the flock good care throughout the entire year.

Why Farm Gardens Fail

BY P. F. ROCKWELL.

I used to wonder why so many good farmers who have well-kept farms never have gardens that amount to a row of pins. Some of these fellows I have in mind always plant good-sized vegetable gardens, but they don't get enough out of them to keep a pet rabbit from starving. Others don't know anything about gardening, and are too timid to give it a trial, or perhaps they aren't interested. Another sort of chap is the one who has tried having a farm vegetable garden, made a fiasco of it, and then quit in disgust and has never tried again. This latter class is much larger than you might suppose.

Probably some of these fellows never figured out their garden problem from the money standpoint.

To grow your own vegetables pays. It pays in dollars and cents which will show on the right side of your ledger at the end of the year just as surely as though you had received it for corn or hogs. The Department of Agriculture has made thousands of careful investigations in all parts of the country which have revealed that farm incomes depend to a very large extent on what farmers produce for their own use. When you stop to think a minute, you can see why this should be so. All the articles of food you buy you pay for at retail prices. All the articles of food you sell you part with at wholesale prices.

So it only takes ordinary common sense to figure out that all the articles of food you can grow, which will cut your buying just that much, will pay just as well and just as really as though you got retail prices for them. But the cash return is not the only advantage there is in growing all the vegetables the farm family can use.

The health experts say that much of the ill health found on farms—despite the fact that the farmer gets plenty of exercise and spends most of his time in the open air—is really due to lack of green vegetables in the average farm diet. Here again it seems to me that ordinary horse sense should have told us this long before the food experts found it out for us.

REASONS FOR FAILURE.

Sometimes the reason for garden failures is too little knowledge; but far more often it is the result of attempting too elaborate a garden, and as a result giving it up on the grounds that it was more bother than it was worth.

But no reason or excuse justifies any intelligent farmer from going ahead and having a successful garden. Any intelligent farmer can succeed the first season if he will give half the thought and study to it that he gives to his crops or animals.

It would be foolish to plant a garden on one farm that would perhaps be just the thing for the farm next door; and so, if you are going to have a garden, the very first step is to determine what type of garden will best fit the actual conditions which you have to face.

In trying to determine this, the first factor to consider is how much hand-work can be put into your garden.

Another thing to be given careful consideration is whether or not there is any local market for surplus vegetables.

The farm garden may pay a very handsome cash profit in addition to supplying the home table. In recent years the roadside automobile stands have made it possible to market many

A Barnyard Idyll

April sun is a-shining, south winds a-blowing soft,
Pigeons a-billing and cooing, up in the old barn loft,
Lambs playing tag round the feed racks, life is a merry joke,
Meadow lark's song from the meadow, down by the old lone oak.

Hens all a-cackling and singing, pigs by the straw-stack's sides,
Taking a morning sun-bath, warm on their fat black hides;
Indoors, the stanchioned cattle, drowsy and fast asleep,
Dreaming of soft green grasses, and brooklets cool and deep.

Cat on the window sill drowsing, keeping a wary eye
On the swallows a-sweeping by her, screaming their battle cry,
Calf looking out of the doorway, with foolish baby eyes,
Wondering just what life is, doomed to a sad surprise.

Cowls a-runnng and kicking, outside the barnyard wall,
Free from halter and blanket and prisoning gloomy stall;
Soon flock and herd will be drifting to pastures green and lush,
For winter's snows are vanished, and spring is in the flush.

—Raymond C. Rodger.

Nova Scotia's Prettiest Girl.

The Bluenose province recently set about to select from its young womanhood its prettiest specimen. The choice fell upon Miss Lillian Corbin, of Weymouth, in the Land of Evangeline. The Halifax Herald is arranging to have her portrait painted and forwarded to the Prince of Wales.

kind of surplus vegetables profitably, because the time does not have to be taken to make a long trip to town, and of course much higher prices will be obtained than could be had from the local retail merchants.

To repeat, the garden should be laid out in such a way that most of the cultivating can be done with a horse. For this purpose the "hoe harrow," or harrow-tooth cultivator, is very convenient. With it you can do finer work, closer to the plants, than with the ordinary horse cultivator. This implement is good not only for garden use, but equally as valuable for early cultivation of potatoes and other field crops.

PLANT FEW VARIETIES.

Another great danger to avoid in the planning of the practical farm garden is that of planting too many varieties. It is always a great temptation, when you are making out your seed order, to try this, that, and the other thing which is lauded to the skies. Don't do it. You may be tempted to get a lot of early, medium early, mid-season, main crop, and late varieties of each of a number of vegetables. But they all result in multiplying your work unnecessarily; and then, especially if you happen to have hot dry weather, you will find them all maturing at once.

For the practical farm garden I would say not over two varieties of bush beans, a green and perhaps a yellow; one of beets; an early and a late cabbage; one kind of chard; an early and a late sweet corn; one variety of cucumber; kohlrabi, which is very easy to grow and develops early in the spring; one loose-head and one butter-head lettuce; two or three kinds of muskmelon, if you have plenty of room; one kind of early white onion for summer use, and one yellow for fall and winter; a little parsley; plenty of prunips for an early spring sowing, and again in June for winter; plenty of peas, not over two or three varieties, dwarf or bush, according to how easily brush may be obtained to support the latter; pepper plants; a few radishes (usually altogether too many are planted); plenty of rutabaga for fall and winter use; plenty of spinach, which may be easily canned for winter; both summer and winter squash; tomatoes, early, and a main crop variety; turnips, extra early for spring, and a good winter variety for planting in July or early August; and maybe one or two kinds of water-melons.

In getting most of these things, order enough seed for two or three plantings. This, of course, does not apply to things like squash, muskmelon, onions, pumpkins, and water-melon; but of most of the others, two or more plantings should be made in order to give a continuous supply throughout the summer, and a large extra late planting of all the things which can be easily kept for winter.

such as beets, carrots, cabbage, parsnips, rutabagas, and turnips.

If you will follow this plan it will save you money in buying seed and much work in planting. Don't be tempted to try too many novelties. Stick rather to the standard varieties which have made good. If you do not know which the standard varieties are, you can easily get a pretty good idea by comparing the descriptions in three or four different catalogues. Those which you find recommended in all you can usually depend on.

PLAN YOUR GARDEN.

And one last, but by no means least, thing to do in getting ready for a worth-while but thoroughly practical farm garden is to plan your garden in advance.

This is the hardest thing of all to get the average man to do. He will buy a lot of seed without having calculated, in even the roughest kind of way, how much of each thing he needs or should grow, and when planting time comes stick them in. Two or three hours spent some evening, with a pencil and a piece of paper, making a rough plan of the garden, space it is to occupy, what is to be planted in it, how many rows of each thing will be wanted, etc., will save ten times that number of hours in useless planting, weeding, and cultivating all summer long.

Making a plan of the garden is really the first thing to do. I have purposely saved this until the last because I want you to be sure to remember it.

Plan to Plant Trees.

One of the finest contributions to the community in which we live is the proper ornamentation of our premises with trees. A tree invariably impresses itself as the supreme tribute. The humblest cottage surrounded by stately trees gives out to the passing world the beneficent influence of a pure home life. Every member of the family should be interested and plan to take part in tree-planting this year.

The best time to fertilize fruit trees is just before the buds show pink.

Spring tonic for mother: a nice new hat.

Twenty-six letters are the foundation of a great language. Less than twenty-six fundamentals are necessary for big successes.

Irrigated Farms in Southern Alberta

In the Famous Vauxhall District Now River Irrigation Project An especially good location for mixed farming and dairying. Splendid opportunity for young men now living in districts where good land cannot be bought at reasonable prices. THIS IS NOT PIONEERING, the first 10,000 acres are fully settled and another 10,000 acres now ready for settlement; maximum distance from railroad, seven miles. Good roads, telephones and schools. Easy payments, extending over 15 years. This is the Best Land Buy in Alberta Write for further information to CANADA LAND AND IRRIGATION COMPANY, LIMITED, Medicine Hat, Alberta.

Surnames and Their Origin

ARUNDEL
Racial Origin—English.
Source—A locality.

It is a matter of fact that the number of English family names in the classification of those which have been derived from the names of places is limited only by the number of place names which existed in England through the period of family name formation.

The name of virtually every city, town and hamlet at this period was likely to be taken not by one but by many individuals who moved away from it to some other place. Or rather, it was likely to have been conferred upon them by their new neighbors, for family names were more often a natural growth than the result of deliberate adoption, and a family's neighbors had more to say about the most

convenient designation than the members of the family itself.

HARTWELL
Racial Origin—English.
Source—A place name.

Hartwell is one of those family names which have been taken from place names, and it is to-day better known, perhaps, as the former rather than the latter.

In the period of family name formation, which in England lasted, roughly, from the eleventh to about the fifteenth century, place names formed one of the most usual sources from which surnames grew. Family names, of course, were seldom formed by arbitrary adoption. They were the outgrowth of descriptive surnames conferred upon an individual in an age when populations had become so large that there were not enough names to go around, and it was necessary to distinguish between two men of the same given name. A most natural method was to refer to the place from which a man had come.

Hartwell was a village in Buckinghamshire. Its name meant "the well of the deer."

Intensive Farming.

"How are you making out with that abandoned farm you bought?"

"Fine! I sold the quarry rights to one crowd, and rented the surface to another as a golf course. Now if I can lease the air to some wireless company I'll have about everything under cultivation. Who says intensive farming doesn't pay?"

She—"How long ought it to take you to teach me to skate?"
He—"I should say about all winter, but I can teach a homely girl in half an hour."

France's Sherlock Holmes.

The best-known detective in France at the present time is Edmond Bayle, a chemist whose laboratory is in the Palais de Justice in Paris. He is chief of the technical bureau of the Paris police department, and he has met with such success that the more meditated criminals look upon him as a dabbler in magic.

Dr. Bayle does not work on the British Sherlock Holmes lines. He pays no attention to the personality or psychology of the criminal, but confines himself to material things.

His workshop is equipped in accordance with this, and the numerous pieces of apparatus are designed for special purposes, such as examining forged money, the detection of bloodstains, and, in fact, the analysis of anything and everything that is picked up by those on the trail of a criminal.

In his records are registered the names of over eight million persons who have ever been involved in crime of any sort, and full particulars of any one of them can be produced at a moment's notice.

This extraordinary man has a theory that there is no crime that cannot be detected, and that every criminal, however clever, leaves traces behind him.

A GOOD MEDICINE FOR THE SPRINGTIME

Do Not Use Harsh Purgatives—
A Tonic is All You Need.

Not sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite fickle, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in the spring is a tonic that will enrich the blood and build up the nerves. Dr. Williams' Pink Pills do this speedily and surely. Every dose of this medicine helps to enrich the blood, which cleans the skin, strengthens the appetite and makes tired, depressed men, women and children active and strong. Miss S. L. McEachron, Nairn, N.B., says:—"I have been in the habit of taking Dr. Williams' Pink Pills in the spring and they keep me in the best of health. I think it is entirely due to the use of these pills that I always have such good health."

Sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Bread 2,500 Years Old.

It seems impossible that bread could survive for nearly 2,500 years, and yet that is the age of a loaf dug up not long ago.

The discovery was made by a French explorer in Syria, and he estimated that the loaf was baked in the year 550 B.C. In the shape of a bun, it was in excellent condition and was wrapped in a cloth in a tightly-sealed tomb.

Other ancient loaves have been found at Pompeii, in Italy. Unearthed in a well-preserved oven, they were slightly charred, but the baker's name was read quite easily.

Not so old as these, but still getting on in years, is a loaf which is preserved at Ambaston, in Derbyshire. It is over 700 years old, and was originally given to the Soar family with a grant of land made to them by King John.

MONEY ORDERS.

Achievement.

Two travelers halted on a mountain trail, Blocked by great pyramidal crags of snow.
"Beyond this point," said one, "no man can go!"
He who would climb those jutting towers must fall!
He would be flogged and frozen by the gale;
Lightning would scorch him, polar winds would blow;
And he would fall to icy caves below, Bleeding beneath the cliffs he could not scale!"

But while one wanderer thus invoked despair,
The other dug his spikes deep in the soil,
And inch on inch, by steady, straining toil,
He mounted that precarious, rock-strewn stair.

Hearing his fellow wall, "You are too weak!"
He stood, triumphant, on a starry peak!

Stanton A. Coblentz.

CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lanette, Immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Population of Palestine.

Palestine has a total population of 757,182, according to the figures of the census of three months ago. Ten per cent. of the people in Palestine are given as Christian, 11 per cent. as Jews and 79 per cent. as Mohammedans. The figures for Christians and Jews are regarded as about correct, but there was such strong opposition to the census on the part of the Mohammedans that their number probably is considerably under-estimated.

In two cities only is there a preponderant Jewish population, Jerusalem and Tiberias. In former, out of a total of 62,000, 34,000 are descended from Abraham and the balance are about equally divided between the followers of Jesus and the prophet of Mecca.

It is interesting to note that Bethlehem is the only town in the land in which Christians predominate. Here there are 5,338 of this faith, 818 Mohammedans and two Jews. Nazareth has a population of 7,424 of which roughly two-thirds are Christian, one-third Moslem, and only 53 Jews. The principal seaport, Jaffa, has about 47,000 people, of whom there are 20,000 each of Jews and Mohammedans, and about 7,000 Christians. The other large centres of population are very largely Mohammedan.

The Palestine Weekly, a Zionist organ, claims that according to Roman figures this country has supported a population of 7,000,000, but when one considers that the area of Palestine is about equal to that of Vermont and that it has about an equal amount of arable land, one questions seriously whether, with the highest development of her natural resources, it will be possible for Palestine ever to support a greatly augmented population. Vermont, in 1920, counted 552,423 people within the state.

Britain can speak by telephone to France, Belgium, Switzerland, and Holland. In America the range of the long-distance phone is over 4,000 miles.

Sloan's

**Stops Backaches
at once—so comforting**

A tiring day on your feet. Stooping, lifting, running up and downstairs—does your back feel tied in painful knots?

Apply Sloan's to those sore, tired muscles. That warm, penetrating glow brings immediate comfort. Almost before you realize it the pain and stiffness are gone.

Wherever congestion causes pain—use Sloan's. Sloan's is protection against pain. All druggists carry it.

Made in Canada
Sloan's Liniment—kills pain!

Veteran Real Estate Broker of Toronto Tells of Remarkable Restoration by Tanlac.

James Burns, 20 St. Albans Street, is still another man of prominence in Toronto to speak out in behalf of Tanlac. Mr. Burns is now seventy-three years of age, but says:

"No one takes me for seventy-three now, and I feel every bit as active as I did forty years ago.
"Before taking Tanlac my weight fell off from one hundred and sixty to one hundred and thirty pounds, and I had begun to feel the hand of 'Old Father Time' laying heavily on me. I seldom ate more than one meal a day and that caused me hours of misery. Nights I would pace the floor too nervous to sleep, and many days I felt too worn-out to dress and go out anywhere.

"I don't believe I could have ever pulled up to where I am now if it hadn't been for Tanlac. It has restored my health completely and built me up to one hundred and sixty-five pounds. Tanlac is the best investment I ever made."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

British boys will be sent across to Australia at the rate of 500 a month if a scheme of emigration, recently launched by the Australian Government proves successful.

Travelling by air from London to New York in twelve hours is prophesied by Major-General Sir W. S. Brancaster, Director of Civil Aviation.

Enliven Your Eyes through the daily use of Murine. The alluring sparkle of youth quickly returns to eyes which have become dull and lifeless. Used safely for many years. Sold by druggists everywhere.

For the Kidneys

Kidney troubles are frequently caused by badly digested food which overtaxes these organs to eliminate their irritant acid formed. Help your stomach to properly digest the food by taking 15 to 30 drops of Extract of Roots, sold as Mother Seigel's Curative Syrup, and your kidney disorder will promptly disappear. Get the genuine, 50c. and \$1.00 bottles.

HEADACHE?

Bathe the forehead with Minard's and inhale freely. It gives quick relief for every ache.

THEY TELL THEIR NEIGHBORS

Women Tell Each Other How They Were Helped by Lydia E. Pinkham's Vegetable Compound

Woodbridge, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for female troubles. I would have headaches, backaches, pains between my shoulders and under my shoulder-blades and dragging down feelings on each side. I was sometimes unable to do my work and felt very badly. My mother-in-law told me about the Vegetable Compound and I got some right away. It has done me more good than any other medicine I ever took and I recommend it to my neighbors. You are quite welcome to use this letter as a testimonial if you think it will help some poor sufferer."—Mrs. EDGAR SIMMONS, R. R. 2, Woodbridge, Ont.

In nearly every neighborhood in every town and city in this country there are women who have been helped by Lydia E. Pinkham's Vegetable Compound in the treatment of ailments peculiar to their sex, and they take pleasure in passing the good word along to other women. Therefore, if you are troubled in this way, why not give Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism

† † †

"No Accident Week - May 13 to 19."

A WHOLE WEEK of complete immunity from accident, if it comes off, is going to establish a precedent which will never cease from being quoted in the law courts, after the ratio of accidents returns to normal.

When first I met the headline in the paper I scoffed like anything. A week without an accident, thought I, is a human impossibility. Even if the whole community were to be put under the influence of an anesthetic for the week, to prevent them from meeting the usual sort of accident incidental to things in motion, somebody would be sure to die of heart failure which would be attributed to the careless administration of the dope, and the record would be spoiled.

I might believe it possible when the wind stops blowing down trees, when bananas grow without skins, when step-ladders cease from wobbling, when runaway horses are fixed up with automatic brakes, and when every child under the age of five years knows as much about traffic regulations as some magistrates expect all drivers to know.

But on second thoughts the beauty of the idea seemed to grow upon me, and I began to see that the mainspring of the whole plan was the prevention of accidents by ample forethought, and the cultivation of presence of mind in delicate situations.

Recognising great possibilities in the idea, and recollecting that Old George, my sage friend, was great on presence of mind, I hastened to his bungalow to consult him on the subject. "There is only one thing better than presence of mind at the time of an accident," he once said to me, "and that is - absence of body."

"Don't you think that this No accident idea should be more generally tried out?" I asked. "As far as I can see it is intended to apply only to automobile traffic. Now, I see no reason why it should not cover the home, the factory, the bank, the earth, the sea, the air."

"Steady up," said Old George. "You cannot completely suspend all animation like that you know. Try it on the automobile first and see what happens. Its this way you see, the fellow who started up the No Accident campaign knows what he wants: He understands human nature: He is an anti-automobilist, a motor-prohibitionist, and if the truth were only known, probably a horse dealer who started in the business during the war and is finding things a trifle slack. He knows very well that a week without an accident can only be accomplished by the complete suspension of all auto movement, and he is going to prove it by the number of accidents which will happen in the week the cars are running up on their good behaviour. When the figures come out he will turn round and say, 'There, I told you so, even with the exercise of special care you see what is going on,' and then he will rush off to parliament to have the province made 'dry' on automobiles, so as to give the horse trading industry preferential opportunities of recovering itself."

"Don't overlook the fact that anything is possible in this province. Are you aware that the Quebec government has decided to empower provincial revenue officers to collect fines on the spot, from drivers of automobiles alleged by such officers to have exceeded the speed limits? It's a positive fact. You go out for a ride in your car and are spinning along nicely at about sixteen miles an hour, at peace with the world, and drinking in the beauties of the fair land, when suddenly from behind a hedge out pops a revenue officer and holds you up. He says quite casually, 'Speed limit on this road ten miles... ten bucks please... thank you... good morning... after you pass the bridge down there you can go 20 miles.' Well then, you go on for a bit at the same pace as before, when from behind a hedge out pops another revenue officer who holds you up again and says, 'Speed limit on this road 15 miles an hour... 15 bucks please... thank you... good morning... and so on it goes until necessity compels you to sell your car and buy a horse and buggy, and the chances are 99 in 100 that you buy them from them the cousin or the uncle of the revenue collector! It's a great game! Did you see what the Star says about it?—

It is devoutly to be hoped that the Quebec Government will reconsider its decision to empower provincial

revenue officers to collect fines on the spot from drivers of automobiles alleged by such officers to have exceeded the speed limit. This is arbitrary legislation of a most unwarranted character. It violates the elementary principles of British justice, which provides that no man may be condemned without first being heard in his own defence. It would pave the way for all sorts of graft, corruption and bribery, and it would place in the hands of unscrupulous parties a powerful weapon of vindictiveness.

While all sane citizens are agreed that it is not only desirable but imperative to put a stop to speeding by automobile drivers, at the same time it is not less obvious that the measures to be employed in this connection must be such as will leave the offender any reasonable ground for a legitimate charge of prejudice or unfairness. But if Quebec is to introduce so dangerous a principle into what has hitherto been regarded as a fair and impartial administration of justice, this province will unquestionably be recognized as a place where the automobile tourist is unduly penalized, and from which he had better stay away.

THE LINKMAN.

ST. ANDREWS EAST.

Miss Madeleine Neve spent Monday and Tuesday of last week in Montreal.

Mr. and Mrs. Howell, of Montreal, are spending this week at their summer home here.

M. Alan Jones, of Montreal, spent the week-end with his parents Mr. and Mrs. Robt. Jones.

Mrs. A. LeRoy returned to town Friday afternoon after spending several days with friends in Montreal.

Mrs. and Miss Tonger have opened up their house for the summer, after having spent the winter in Montreal.

Amongst others who were in Montreal on business, during the past week, were Mrs. Jeffrey, Mr. E. Neve and the Rev. W. A. Howard M.A.

A good many out of town people attended the Auction Sale at The Mill and home of the Messrs. A. C. and Alan Matthews on Saturday afternoon.

The Rev. E. G. May M.A., of Hull,

spent a day in town as the guest of Mr. Alex Leroy. While in town he called on some of his friends and former parishioners.

The regular meeting of Christ Church W.A. was held at Miss Dewars last Friday. A goodly number of members were present, and a profitable and pleasant afternoon was spent.

A goodly number of Mrs. A. Matthews friends were at the station Friday afternoon to wish her and her little daughters, Helen and Ruth, Bon Voyage and all manner of good wishes for every success and happiness in her new home.

Lachute Lawyer in New Legal Firm.

The many friends throughout the town of Lachute and the county of Argenteuil of Jno. MacNaughton, Barrister, who has opened a law office here, were pleased to read in the city dailies that he has formed a legal firm in Montreal under the name of MacNaughton, Goodstone and Michaud. The partners are Jno. MacNaughton, Albert Goodstone and J. H. Michaud, all well known members of the Montreal Bar. Mr. MacNaughton has carried on an extensive general practice in Montreal, but paying particular attention to the organization of corporations. Mr. Goodstone is a member of the Bars of Quebec and British Columbia, being widely known as Canada's foremost linguist. He was censor of foreign publications during the war and is an expert on various phases of law, particularly international questions. Mr. Michaud was the efficient secretary of the Montreal Bar for the past year. He has had much experience and is generally regarded as one of the leaders among the junior members of the bar, being formerly associated with the Hon. E. L. Patenaude. The firm has opened offices on the fourth floor of the Bank of Ottawa Building, 224 St. James St., Montreal. The "Watchman" wishes Mr. MacNaughton every success with his new firm.

Province of Quebec,
Municipality of
Parish of St. Jerusalem.

To the inhabitants of the aforesaid Municipality

PUBLIC NOTICE

IS HEREBY GIVEN by the undersigned, J. W. Gall, Secretary-Treasurer, of the aforesaid Municipality; That the work of constructing or making the Water Course forming parts A and B, of the process verbal on the Robertson water course homologated on the fifth day of September 1922, will be sold at public auction to the lowest and last bidder offering security for the execution of the work on Friday the 18th day of May 1923 at 2:03 p.m. standard time on the premises, starting from Mr. R. Davis, Jerusalem road.

Part A to be sold in three sections, first section starts on lot No. 109 to the west line of lot No. 52, second section from the line of Vide Sac, to east line lot No. 176 and third section from latter point to junction with water course from East Settlement.

Part B to be sold in two sections, first section from the point of beginning to the public road, and second section from the public road to the junction with part A, including the subsidiary ditch from East Settlement, the whole according to the specifications described in the said process verbal which may be seen at the office of the undersigned.

J. W. Gall, Sec.-Treas.

WHITE STAR
DOMINION LINE

The Prodigal's Return - concluded.

† † †

At length he reached the village church, Unchanged from days of yore, Reverently bowing his head, He entered the open door.

Looking around, no head is turned, To note his presence there, Their thoughts are far away from him,

And lifted up in prayer.

He sees the old place where he knelt, Pledging his lovely bride, He kneels, and buries deep his head, His flowing tears to hide.

The voices swell in thankful praise, To him, the Lord of all, He hears the good-man tell the tale, To heed the Master's Call.

And as the last 'Amen' was heard, He slowly raised his head, No sign of grief was on that brow, But joy, was there instead.

"My Journey's o'er" he feebly cried, "My earthly days are run, O God! receive my troubled soul, Forgive thy erring son."

The wanderer's wish, was gained at last, His long-sought, lonely quest, He safely reached his earthly home, In time for heavenly rest.

PUBLIC MEETING!

Under the auspices of the
Presbyterian Church Association
will be held in the
Victoria Hall, Lachute, Tuesday, May 15th,
8.30 p.m.

SUBJECT:— CHURCH UNION.

Speakers:—Rev. R. W. Dickie, Knox Crescent Church.
Dr. W. D. Tait, McGill University.
Rev. Malcolm Campbell, First Presbyterian Church.

All Interested are Invited to Attend.

A FLAT DENIAL.

With glare headlines announcing that "Worshippers left Church in Anger" the Montreal Gazette, through the Rev. Malcolm Campbell, lets the public at large know that the Presbyterians are not one in the matter of Union and that trouble is brewing before they will quickly submit to the dictates of the Presbytery. The report says of the meeting on Sunday:—
Soothing syrup, with more than a modicum of chloroform, deliberately administered, is the way Rev. Dr. R. W. Dickie describes the manifesto which was issued by the Montreal Presbytery's Committee on Church Union to be read in the churches last Sunday. But in Lachute, where a zealous upholder of union read it withunction to his congregation, an influence other than soothing was excited. Indignation so filled the breasts of several sitting there that they gasped, then rose and walked out, so Rev. Malcolm Campbell reported last evening, at a meeting held in Alfred Joyce Hall, Outremont, under the auspices of the Women's League, Presbyterian Church Association.

The above statements have been given flat denial by the Rev. Mr. McKinnon who says "I have read with great surprise the statement reported to have been made by Rev. Mr. Campbell," said Rev. Mr. McKinnon today. "According to the newspaper report, it is stated that 'indignation so filled the breasts of several sitting there that they gasped, then rose and walked out,' when this communication of the Presbytery was read on Sunday morning in my church. I want to say that when this document was read there was absolutely no indication in any part of the church of it being unfavorably received, and nobody walked out of church during the service, of which I was in charge. Immediately after the service there was a meeting of the session, and there was no disposition in that meeting on the part of any of the officers to express disapproval of the letter and of its reading, and that session represents the minds of the congregation. Although in favor of union myself, I have never, as minister of the church, spoken on the question. I cannot understand how a brother minister will so publicly offer as fact assertions for which there is no foundation whatever."

ST. ANDREWS EAST

The Literary Club will meet at the home of Miss Davis on Tuesday evening May 15th at 8 o'clock.

The Choir Practice will be held next Saturday evening at 8 o'clock at the home of Mr. and Mrs. Tom McAdam, St. Hermas.

The Weekly Prayer meetings will be held in the Presbyterian Church on Thursday evening at 7.30 p.m. until further notice.

Public worship will be held in the Presbyterian Church on Sunday, May 13th, at 11 a.m. and 7.30 p.m. This is "Mother's Day," and an appropriate Sermon will be preached. Sunday School in the Church 10 a.m. to 11 a.m. The pastor Rev. J. Burgess will preach at both services. "Thy Word was unto me the joy and rejoicing of my heart."

The Womens' Missionary Society met last Tuesday afternoon at the home of the Misses Hibbert. Mrs. McClure of Spokane, Washington, gave an interesting talk on "China," reading several personal letters from missionaries working in China, thus supplementing her subject with material written from the fruits of personal experience in that vast continent.

"NAT" COPELAND,—Killed in wreck

Word has just reached Lachute of the death of Nat. Copeland, who was killed in a train wreck on the Casper Railroad, Wednesday, April 16th. The accident was caused when two horses ran out to a trestle in front of a logging train, causing the locomotive to plunge over the trestle, the logging cars to jump the track and the logs to pile up.

Copeland, who was the engineer, told his companions to jump, but he was crushed between the tender and boiler.

"Nat" was one of Argenteuil's Boys, and a son of "Nat" who for many years was caretaker of Lachute Academy who will always be remembered by those who knew him for his kindly manner as he was always a favorite with the little ones.

Deceased was born in Hill Foot 35 years ago, but had resided in California for many years where he was well and favorably known, being a member of the Redmen, Druids and Elks. The funeral took place on Sunday the remains being interred in the Fort Bragg Cemetery. A widow and six children, one brother and four sisters survive.

CHAPTER II.—(Cont'd.)

"You like be friends with foreign-ers?" questioned Lun.

Tu Hee did not answer at once. When she spoke her voice was hesitating. "They sort of fascinate me, Lun. They show their teeth so often—smile I mean, and look so friendly and beaming at you. Then again they appall me by their shamelessness. Just think of it, not a vestige of paint to cover their naked faces!"

"Ah, see, is it not wonderful?" Tu Hee pointed in delight at the beauty they were in the midst of. The busy streets had been left behind, and they were now being borne swiftly up a narrow path on the hillside. Gurgling streams tumbled over moss and stone and then ran on, disappearing in the cool mysterious shadows; flowers, the colors of which would have rivalled a rainbow, were everywhere; and the sun wrapped all in a warm, golden embrace, like a mother guarding her children into youth and happiness. The path grew wider, and finally merged into a road which stretched broad and fairly smooth into the thor-oughfare on the other side.

The rickshaw came to a sudden halt. The women inside gave the incident not even a passing thought. Did it not occur whenever the carriers shifted the weight of the equipment to another shoulder? But when sufficient time for the process had elapsed and their vehicle still remained stationary, Tu Hee became impatient.

"Lun, you, what keeps you?" she called, putting her head out of the enclosure.

Cautious whisperings came to her: "What is it, Tu? Why the delay?"

Tu for reply glanced at the other carriers and they at him and then each at the other. When the circuit was completed their gaze shifted up the road. Tu Hee's eyes took the same direction and she saw that a large automobile, a touring car, was blocking the way.

"Ah, a breakdown. Some foreign-ers have had trouble with their car." A little pleasurable thrill was in her voice again and her eyes glowed with the sparkle of adventure. Then, her glance returning to the carriers, she demanded a little impatiently, "Why stand there, foolish ones? Why not offer your assistance? It's not likely

they will permit you to climb with us over the car. Go and see what is the matter and—"

But here Tu Hee perceived she was talking to deaf ears. Her indignation, however, gave place to curiosity and her heart beat quickly, whether from fear or excitement she couldn't have told, perhaps a little of both. But whichever it was she forgot to withdraw her head, forgot what had been drilled into her from babyhood—that it wasn't meet for a Chinese maiden to show her face boldly to the opposite sex. The men who were approaching in long strides were foreign, too—American, Tu Hee decided. A mere glance betokened that.

They took no notice whatever of the three servants, but approached Tu Hee. The girl was too startled at this bold effrontery to withdraw. Instead, she gazed at them with wide, indignant eyes. They looked at Tu Hee severely, and the taller and younger of the two raised the lapel of his coat, displaying a badge. Tu Hee's education had not been neglected. Instead, it had been well rounded out. Weng Toy had made as much of a confidant of her, and taken as much pride in the development of her mind, as if she had been an adopted son, so she quickly recognized that the men confronting her had to do with Government affairs. Her training bade her withdraw her face at once, but her curiosity induced her to stay and see what the bold, ill-mannered foreigners meant by such effrontery to a mandarin's niece.

The servants by this time were pressing threateningly between the men and their mistress. A few whispered words and a second display of the badge had an electrical effect on them, however. They stood as if petrified, and the younger man addressed Tu Hee: "Are you going to come quietly, or is there to be a fuss?"

"Go with you?" gasped Tu Hee. "Go where? I'm a Chinese maiden, niece of the great Weng Toy."

A sardonic smile twisted the man's lips. "Those stories will do for afterwards. We have our instructions, madam, to take you to the American Hotel. They must be obeyed. I advise you to come without making a disturbance. It will be best for you. If not—" He shrugged his shoulders meaningly.

Mingled outrage and bewilderment kept Tu Hee silent. What did it all mean? What would Uncle Weng say if she were forced to go with the foreign devils?

"My uncle, the mandarin, will kill you."

It sounded childish and weak to her ears, and her excitement had caused her to use broken English. She saw the men exchange amused smiles, and her fury increased.

But here Lun came on the scene. Scornfully she ignored the foreign devils. Scathingly she lashed the willowy-backed carriers with hot words and ordered them to return down the hill. The servants slunk to their places, but an immediate halt was called by the officials. A revolver covered the three of them instantly, while a voice ordered Tu Hee to come out.

Tu Hee refused to move, and calmly told them they could shoot her if they wished, but from her rickshaw she would not stir.

The younger man then told her if she refused to walk to their car they would be compelled to use force. They would give her two minutes to decide. This opened a new phase to her terrible plight. Death she would not shrink from. No true Chinese woman would, but for these foreign devils to touch her—She shuddered. That would leave a lasting blot on her. There was only one thing to do. Slipping from the rickshaw she gazed resolutely with head erect to where her servants were standing, glowering but helpless. "I shall go with these foreign devils to the American Hotel. Lun will come with me and you must return quickly to my uncle and tell him I have been kidnapped by two foreigners. Go!"

The servants hesitated, glancing apprehensively at their mistress, but the light in her eyes and the erect self-confidence of her bearing decided them. Even Lun gasped at her darling's sudden step into womanhood. Ignoring the threatening weapon, the carriers turned, leaving the rickshaw in the road, and tore down the hill with lightning speed.

The man who had had them covered pocketed the revolver, shrugged his shoulders, muttering: "Excellent bluff. We shall see, young lady, if you are a real Chinese mandarin's niece. If you are you're the first one I've seen with blue eyes."

Lun gulped with rage. Her hands fumbled against each other nervously. Fear also clutched at her heart, and she peered searchingly and with consternation into the man's face. Had the spirit of evil fallen on them after all these happy years?

The hood of the car was down and Tu Hee leaned far back. The thought of escape did not enter her head. Fatalism had been her constant companion through childhood and youth, and she accepted her present position as ordained. She was thankful that Lun on one side and her hated persecutor on the other prevented any one obtaining a glimpse of her. A dry sob settled in her throat. What had she done that the gods permitted such an outrage?

The carriers sped toward home at a rapid gait. Their lithe, slim bodies, made agile through daily practice, would have rivalled the Roman champions of amphitheatre days. The perspiration stood out like glass beads on their copper faces and throats, the muscles of which were taut. They worshipped their young mistress, and the calamity that had overtaken her filled them with dark, superstitious fear. Why had the foreign devils kidnapped the Gift of the Gods? Rumor

had whispered that the mandarin's niece had strange blood in her veins, but nevertheless everyone strongly asserted she was a daughter of China, a divine gift. But now the gods had permitted the foreign devils to take her. What did it mean?

Breathless they sought Weng Toy's apartment, but were told by his boy that he was out, and would not return for an hour. A telephone search began, but he might have been on the other side of the world for all the success they had in locating him. They must sit with folded hands for an hour, and in that time what might not happen to their young mistress?

As the news spread through the house that the Gift of the Gods had been seized by foreigners, consternation ran tumultuous and mountains high. When an hour had passed and still the mandarin did not return, the older servants took the initiative and organized a rescue party. Weng Toy's servants were many and they started out two hundred strong to demand or force back the Gift of the Gods. The last of the purposeful column were leaving the outer gates when Weng Toy's chair appeared in view. He surveyed the long line in amazement. What in the name of all the powers did it mean?—his servants deserting his house en masse!

The boy accompanying him was sent after the eager marchers with the peremptory order to halt. Chagrined, the leaders knew their only course was to obey, and in explaining lost many precious minutes. Simultaneously relief and eager hope appeared on some of the faces. Their master would be strong like thunder and lightning. Nothing could stop

the great Weng Toy. He would override the hated foreigners as only a Chinese noble could. So they watched him closely as the news was given to him.

But Weng Toy did not rage. It was as if a cyclone had wrenched every ounce of energy from his body and mind. Horror and despair took hold of him. In dead tones he bade them disperse.

Slowly and reluctantly they turned back through the gates, and for the first time Weng Toy was surrounded by sullen, unwilling servants.

After ordering the car to be brought around he shut himself in his apartment. Nervously he paced back and forth. His brain refused to function rationally. Fear, hatred, fear, and his heart—fear for himself, no. Weng Toy was no coward, but fear for the girl he worshipped as his own child. It caused his face to blanch and his shoulders to droop like an old man's. He dared not answer the question even mentally that nagged his brain. His nervous pacing halted in front of a tapestry, a dainty, water color affair, that Tu Hee had contrived herself. The colorings were delicate, all pinks, gold, and mauve, but the subject was sinister, grim, with the reality of the East. The central figure was that of a young girl turning away from the ancient rites of the old world to the new, the western world, glimmering on the horizon. A great longing and despair shone from her eyes, but a chain of gold, almost invisible, encircled one ankle, pulling her on. The climax of the pictured story was a phial of opium half way to her lips.

(To be continued.)

sense of food combinations, and are very good judges of the fitness of the dish.

MOTHERS.

Mothers are the queerest things! "Member when John went away, All but mother cried and cried. When they said good-bye that day, She just talked and seemed to be Not the slightest bit upset— Was the only one who smiled, Others' eyes were streaming wet. But when John came back again On a furlough, safe and sound, With a medal for his deeds, And without a single wound, While the rest of us hurrahed, Laughed and joked and danced about, Mother kissed him—then she cried, Cried and cried like all git out!

—Edwin L. Sabin.

The price of radium has dropped from \$120,000 per gram to \$70,000 per gram. Large deposits of radium ore have been discovered in Luishishi and Kolsolo, Africa. The State of New York and the City of Philadelphia each own two grams of radium, bought for the use of their citizens.

Ananias died nearly 2,000 years ago, but the man who tells us that quack-grass can easily be killed still lives.

Friendship is better than wealth. To possess the love of a true heart, the sympathy of a noble soul, is better than to be a desolate millionaire. —Dr. Johnson.

Woman's Interests

HELPFUL HOUSECLEANING HINTS.

Housecleaning time! Speak those two words to husband and see how quickly he has some pressing duty to do out by the barn. When the general cleaning begins, the regularity and routine of the home is so very much disturbed that it is a task for each member of the family to keep calm and composed in the midst of the disorder. But there is a great feeling of satisfaction to all when we sit down at an evening, knowing that the house is clean from cellar to garret.

Nothing is better than gasoline to clean badly spotted hardwood floors. Wet a piece of soft cloth with gasoline and rub the surface of the floor vigorously, changing the cloth as soon as it becomes much soiled.

To remove wall paper use a heap- ing tablespoon of saltpeter to one gallon of hot water and apply to the paper with a brush. The water should be kept hot and applied several times. The paper will loosen and can easily be pulled from the wall.

When you are ready to clean floors take a piece of board large enough to hold pail and bore holes near the corners and insert casters, set your pail on this and it will save a lot of lifting.

To clean gilt frames apply the white of an egg with a soft brush. When dry rub gently with a soft cloth.

A little turpentine poured into corners of wardrobes, trunks and chiffoniers will keep moths away.

Try using a solution of alum on your rugs and carpets. You will be surprised how it will brighten them up.

To remove marks made by scratching matches on a painted surface rub with a cut lemon.

To clean rugs or carpets beat on a set of bed springs or sprinkle a spot of grass as large as rug, then turn rug upside down and beat. Move to another dampened spot and beat on the right side.

To remove ink spots from varnished surface use equal parts of vinegar and linseed oil, well mixed, and apply with soft cloth.

Try this good furniture polish: Two parts paraffin oil, one part gasoline, mix well and add a tablespoon of turpentine to each quart of liquid.

To dust wicker furniture and ironwork, dip old shaving brush in oil. It reaches in places difficult to reach with a cloth.

To repair a chair seat when cane gives out, cut a piece of inlaid linoleum two inches larger than opening in chair, paint a leather brown on top and edges, let dry for two days, put on with upholstering tacks.

To size rugs: Take one gallon hot water and one quart of powdered dry glue: keep on stove until glue is dissolved. Stretch the rug or carpet and tack wrong side up on the floor. With a whitewash brush go over it with the hot solution, being careful to wet it evenly, especially the edges.

Paper should be put under the edges of the rug, to protect the floor. Leave rug tacked until dry.

An old ingrain or brussels carpet can be made new by a few packages of dye. Dissolve the dye in a gallon of hot water to one package, and while hot put on the carpet with a brush.

THE USE OF THE KNIFE AND FORK.

I have gathered certain excerpts from an old playlet given about 1615, tending to show the agitation over the use of the fork. "Goodly breeding belongs to a gentleman. Beshink ye, then, of manners, my Lord, for 'tis more like a Plamand boor than

ought else to sully the napkin with the grease of the knife."

Table manners have ever been the cachet of one's social position, and dainty eating the sign of gentle rearing. A noted French diplomat remarked, after dining with some foreigners, in London, "They behave in a strange and indecorous manner, and their table manners are most distasteful to refined people."

Sixty years ago in France the use of the knife at dinner was taboo, and the guest was expected to divide the food with a fork. Long habit has made this nation very clever with the uses of the fork and other dainty table appointments.

The wise mother to-day will insist on correct deportment at the table. It is also wise to allow the family to invite special friends to dinner, without formal notice to the housewife, allowing them to take pot luck as it is called. This not only prevents the housewife from becoming careless and getting into a rut, but it is also well to keep the family on the qui vive.

The happy busy housewife seldom has time for nerves and spells of inertia, and is busy gathering about her the chums and friends of her family, as well as a few choice ones of her own, and takes pride and real pleasure in planning a dinner party with perhaps music or cards, a supper dance, or just an old-time gathering of a few friends for an evening. When there are lads and lassies in the family, train them into helping, and even inveigle dad himself into lending a hand, for you know men have a keen

Free—A Short Story of Absorbing Interest

HAVE you read "A Financial Courtship"? It's the fascinating romance of two charming women and their legal adviser. The sisters through the death of their father, found themselves face to face with an acute financial problem without knowing anything about the ways of investments.

Through it all there runs a romantic interest, and one finds himself (or herself) actually "living the story" as they read.

It's the kind of story you and your family will enjoy reading on a winter's evening—particularly if you are ever faced with the problem of investing an inheritance.

If you would like a copy of "A Financial Courtship," send us your name and address and we will forward one to you free of charge. Please mention the name of this paper as a matter of record.

Before you invest, consult us.

Try these Bakers' Raisin Pies —save baking at home

THERE are luscious raisin pies just around the corner, at your grocer's or a bake shop.

Baked to a turn—a flaky crust filled with tender, tempting raisins, the rich juice forming a delicious sauce.

Once try these pies that master bakers bake fresh daily in your city and you'll never take the trouble afterwards to make raisin pies at home.

Get a pie now and let your men folks taste it. Made with tender, thin-skinned, meaty, seeded Sun-Maid Raisins.

Raisins furnish 1560 calories of energizing nutriment per pound in practically predigested form.

Also a fine content of food-iron—good food for the blood. Use raisins frequently, therefore, which are both good and good for you, in puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested Sun-Maid recipes. Learn what you can do with luscious raisins.

SUN-MAID RAISINS The Supreme Pie Raisin

Sun-Maid Raisins are grown and packed in California by Sun-Maid Raisin Growers, a co-operative organization comprising 14,000 grower members.

Indians Advance in Farming

(Prepared under the direction of Dr. Duncan C. Scott, Deputy Superintendent General.)

When the bison disappeared from the western plains of Canada, the Indians, about thirty thousand in number, became a charge on the people of Canada. There were some persons who held that nothing better was to be expected than that the redmen would have to be rationed and cared for by the Government as long as any of them remained. The Department of Indian Affairs, however, believed that, given opportunity and training, the Indians would in time become self-supporting, and thus an asset instead of a liability of the Dominion.

In the nearly forty years that have passed since the Indians of the Prairie Provinces had to change their mode of living, the officers of the department have steadily labored to bring this about, often in the face of misunderstanding and discouragement. However, the efforts of the Indian industrial schools and the training given by the farm superintendents on the reserve have had their effect and today the outlook is most encouraging.

The Indians in the West are not dying out, but are very gradually increasing in numbers and the results of their farming operations in 1922 show how far they have advanced in the way of self-support and independence. In the three Prairie Provinces of Manitoba, Saskatchewan and Alberta, Indian farmers harvested 745,569 bushels of grain. This grain was about equally divided between wheat and oats. In addition to this total of well up to

Duncan C. Scott, Deputy Superintendent General, of Indian Affairs, three-quarters of a million bushels of grain, the Indians produced more than 70,000 bushels of potatoes and 47,820 tons of hay. They also summer-fallowed so much old land and "broke" so much new land that it is expected that they will have a larger area under crop this year than last. In the way of live stock, they own 18,000 horses and have over 28,000 head of cattle. They leased 200,000 acres of land for grazing purposes.

Large as these figures are in the aggregate, they are all the more important when it is remembered how short is the time which the Indians have been farming. These gratifying results are both a reward of the faith of those who planned and carried out the training system and also a promise of still greater things in the future.

When Hon. Charles Stewart, Minister of the Interior, who is also head of the Department of Indian Affairs, and Dr. Duncan C. Scott, the Deputy Superintendent General, visited a number of the western reserves on a tour of inspection last autumn, harvesting was in progress and they were struck with the big crops being garnered and also with the efficient farming methods used by many of the Indians, especially those who had been trained in industrial schools. They felt sure that the final returns would show good results for the season's operations, and the figures given above amply confirmed their expectations.

Two "Good Scouts"

TWO "GOOD SCOUTS"

"You're a good Scout," said Sir Robert Baden-Powell as he bade an revoir to Mr. G. D. Fishwick, R.N.R., purser of the Canadian Pacific liner "Marloch" at St. John. The "Chief Scout" came to Canada primarily to attend the National Conference on Education and Citizenship in Toronto at Easter, but Scout officials and organizations throughout the country are anxious to bring themselves once more under the eye of the originator of the Boy Scout movement, and he has ample opportunity of seeing some of the far-reaching effects of his work in this connection. Baden-Powell was accompanied on the "Marloch" and to Toronto by Lady Baden-Powell, and Sir Michael and Lady Sadler, who are also well known authorities on matters pertaining to education. Lady Baden-Powell is accompanying him on a tour of the Dominion.

Cheaply Earned Fame.

A person who speaks English is reasonably sure of being understood in any good hotel on the Continent. Sometimes, however, the rule fails, and then one's native ingenuity and resourcefulness are put to the test. George Bernard Shaw is a man of varied acquirements, but, it is said, a knowledge of Italian is not among them.

Nevertheless, a report got currency that he could speak Italian fluently, and a representative of the Giornale d'Italia came to interview him in consequence. This is the explanation which the great man is said to have given for the genesis of the report:

"Once I was in Milan with a party of English folk. We were dining at a restaurant and our waiter knew no language other than his own. When the moment came to pay we were unable to make him understand that we wanted not one bill, but twenty-four separate ones.

"My friends insisted that I must know Italian; so to act as interpreter I racked my memory for chips from the language of Dante, but in vain.

"All of a sudden a line from the opera, 'The Huguenots' flashed through my mind—'Ognuno per se; per tutti il cielo.' ('Every man for himself; and Heaven for all'). I declared it. The army of waiters was doubled up with laughter; my friends applauded wildly, and my fame as an Italian scholar has been on the increase ever since."

Stamp Machine.

French postal authorities have installed a machine that prints 3,000 sheets of 100 stamps, perforates, numbers, cuts, counts and makes them up into bundles in an hour.

She—"Why is it you prefer a rusty old pipe to cigarettes?"
He—"Can't afford cigarettes. The girls graft 'em all."

Water for Rock Blasting.

There has been more or less employed a hydraulic contrivance for blowing up rocks and reinforced concrete foundations that is based on the principle of the hydraulic press. By means of a pipe-line pressure is transmitted to a cylinder 85 millimeters in diameter, in which are eight pistons that telescope, one within another. The cylinder is inserted in a hole drilled in the rock that is to be broken, and the pistons are driven home, one after another, by the water pressure. The machine has proved useful in mines and quarries where the use of explosives would be dangerous.

Over 500 tons of flowers are sent annually from the Scilly Islands.

The Banff-Windermere Highway

Wonders of This New Scenic Route Through the Rockies, Grand Circle Tour.

An attractive pamphlet is just being issued by the Canadian National Parks Branch of the Department of the Interior describing the new Banff-Windermere highway traversing Banff and Kootenay national parks, which will be officially opened for travel on June 20 next. The road, which was built by the engineering division of the Canadian National Parks Branch, is important because it is the first highway across the central Rockies and also because it forms the last link in the great 6,000-mile Circle Tour, a system of motor highways which extends down the Pacific coast from Seattle to southern California, returning via the Grand Canyon, the Yellowstone and the United States Glacier national parks to the Canadian boundary. The booklet does not profess to be a complete guide but tells in an interesting way the story of the construction of the road and gives a brief description of some of the attractive points along the route.

The Vermilion Pass.

It is interesting to note that so long ago as 1858, Sir James Hector, geologist to the Palliser Expedition, who explored this region in connection with his search for a suitable pass for a railway, pointed out the feasibility of the route for a road. "Of all the passes traversed by our expedition," he wrote, "the most favorable and inexpensive to render available for wheeled conveyance would be Vermilion Pass, as the ascent to the height of land is the most gradual of them all." After Hector's discovery of the Kickinghorse pass and its selection for the route of the Canadian Pacific railway, the Vermilion pass was practically forgotten, but when the project of a transmontane motor highway was formulated in 1912 the low elevation of this pass at once suggested

Every Mile a Surprise.

The booklet is illustrated with 23 half-tone engravings which indicate the beauty and grandeur of the scenery through which the road passes. One of the most striking of these is Sinclair canyon, where the road has been blasted through towering walls of red rock. "To one who has not known them," says the writer, "it is impossible to describe the delights of the new motor highway. From the eastern wall of the Rockies to the Columbia valley is a little more than 125 miles, and every mile is a surprise and an enchantment. It does not matter whether the motorist enter by the eastern or western gateway, he is swept at once into an enchanted world. The magnificence of the mountain ranges and the immensity of the scale on which they have been laid out, refuse to be put into words. Something is left out in every picture or photograph. Only the eye can gather the sense of height and vastness, the infinite serenity and majesty, which thrill the beholder on his first glimpse of the Canadian Rockies. The endless succession of ranges billowing off to the distance as far as the eye can see, the countless variety of forms, peak after peak rearing its glorious bulk more than a mile up into the radiant blue, the shifting play of light and shade, the indescribable variation of color, yes, the very opulence of the sunshine itself, are a joy and a revelation."

Copies of the pamphlet may be obtained upon application to the Commissioner of the Canadian National Parks, Department of the Interior, Ottawa.

The Coming Holocaust.

By Dr. C. D. Howe, Dean of the Faculty of Forestry, University of Toronto.

Some day in Canada there will be a forest disaster indeed. The rain will not always lend its protecting influence. Not only in the colonizing areas are conditions ripening, but throughout the forested areas as well. In fact, there never has been so much slash and debris in the forests awaiting a prolonged drought to convert them into highly inflammable tinder. Lumbering operations every year are becoming more highly intensified; more trees are cut on a given area and more slash is left on the ground. Larger openings are made in the forest and the dull and litter on the forest floor are more rapidly and more thoroughly dried out—often so dry that they crumble to powder when taken in the hands. This highly dangerous condition is augmented a thousandfold by the ravages of the bud-worm and other death dealing parasites. It is estimated that the bud-worm alone has killed over 30,000,000 cords of balsam in Eastern Canada within the past few years. This means that more than a half billion trees will go to the ground in the next few years and will increase by just so much the inflammability of the forest.

The rain will not always intervene. Some day there will be a holocaust indeed. The extent of the devastation in Eastern Canada will not be enumerated in thousands of acres, nor in townships, but in whole districts and regions. The loss in human life, in farm and mill property, in commercial timber, in game and in falling water-powers will stagger the imagination. At the first shock we shall be startled and gaped with horror; upon meditation we shall be bowed down with shame and self-reproach.

This is no time for captious criticism. This is no time for evasion of responsibility. We must spread the knowledge of public ownership in crown forest lands and we must develop the responsibility of trusteeship which this ownership involves. We must gain the co-operation of all who use the forests for business of pleasure.

We must support our forest protection service with all the intelligence and all the means at our command. Conditions must be made safe for the pioneering agriculturist.

Our lumbering interests, our pulp and paper business—all our wood-using industries, must not only live, but must grow in stature and wealth-producing power, or else Canada declines and becomes a weakling in the great family of nations that look up to one flag.

No obligation of citizenship rests more firmly on our shoulders than the protection of our forests from fire.

Gypsum Buttons.

Buttons are being made of powdered gypsum, which is pressed in molds and moistened with water to make it harden.

Thinking of the absolute good, the absolute peace, the absolute perfection of everything that God has made, and contemplating God's world of perfection, tends to bring the mind into tune with the Infinite Mind.

How Canada's Lands Are Divided for Use.

Of the total area of Canada, eighty per cent. is non-agricultural and except where timber is growing very little of this great non-arable section is producing any considerable wealth.

In France, Switzerland, Sweden, Norway and others of the more experienced countries, the so-called waste lands are set to work producing timber and forest crops which are taken off year by year without depreciating the "capital stock" of the forest itself, account largely for the prosperity of those lands. Sweden and Norway maintain a high average of personal income and yet one half of the whole national area is permanently under timber and all of scientifically operated. No one in Sweden is permitted to operate for lumber or pulp except under the guidance of a trained forester whose business it is to look after the reproduction of the forests.

In many parts of France and Switzerland the pieces of forest, owned by the "communes" or municipalities, pay all the taxes and furnish the local population with wood requirements with practically no costs of transportation.

Science Allows Us Only Four Tastes.

A good deal of our "tasting" is done by smell! The organs of smell convey to the brain their opinion of our food before true "tastes" operate at all. We actually taste, however, with the tongue. This has on it a number of tiny "pimples," and one of their purposes is to taste for us. They contain cells which are connected with nerves through which a message can be passed to the brain.

Scientifically, there are only four real tastes—sweet, bitter, acid, and salt; and the cells whose job it is to report the presence of any one of these tastes lie in different parts of the tongue. The "sweet" cells are mostly towards the tip, the "bitter" cells to the back, and so on.

Each group of cells, on touching food that stimulates it, sends its report to headquarters, really as Nature's warning, and so we say we "taste."

Sycophancy.

There is a story of a chemist who was lecturing before a European sovereign who had professed a curious interest in that branch of science. At a critical moment in an experiment the chemist announced with a low bow to the king:

"Sir, these two gases will now have the distinguished honor to combine in the presence of your majesty."

Which they accordingly did!

Unheeded Advice.
"This grand piano has gone wrong."
"I advised you to get an upright one, you know."

The Belfry of Mons.

At Mons there is a belfry tall
That chimes from noon to noon;
At every quarter of the hour
It scatters forth a lovely shower
Of little notes that from the tower
All flutter down in tune.

At Mons from out the Market Place
The streets rise up the hill
Where ring the chimes that year by year
Cry out, "Look upward, lads, and cheer!"

For God's own Kingdom now and here,
And peace and right good-will."

At Mons there lie a mort o' lads
A-row and underground.
That shall not hear the belfry ring
Nor human voice nor anything,
Until at the last summoning
They bear the trumpet sound.

—Wilfrid Thorley.

Mining With a Feather.

Placer mining in Mongolia is a primitive process compared even with the American pioneer method of washing out gold in a pan. The Mongol—so Dr. Ferdinand Ossendowski tells us in his book, *Beasts, Men and Gods*—lies flat on the ground, brushes the sand aside with a feather and keeps blowing into the little excavation so formed. From time to time he wets his finger and, picking up on it a small bit of grain gold or a diminutive nugget, drops it into a little bag hanging under his chin. In that way he collects about a quarter of an ounce, of five dollars' worth, of gold a day.

On His Last Trip.

"Extravagant chap—always traveling on board ship! Wonder where he's going now?"
"On his last journey—in a receiver-ship."

The Forests of the Empire

At a time when authorities all over the American continent are giving careful consideration to the necessity of developing a more rational forest policy, it is most appropriate and fortunate that Canada should have been selected as the place of meeting for the 1923 Empire Forestry Conference. The first conference of this character was held in London in the summer of 1920, and was attended by foresters from nearly every part of the Empire. Representatives from the United Kingdom, Canada, Australia, New Zealand, India, South Africa, Newfoundland, and the Crown Colonies took part, and frankly discussed the forestry problems presented to the individual constituents of the Empire and the Empire as a whole.

From the statistics presented at the conference it was quite clear that, if the forests be adequately protected and properly managed, there is every assurance that the Empire will be made entirely self-sustaining, so far as timber supply is concerned, for all time. It was evident, however, that to place the Empire on the desirable basis suggested, very much more care must be given, in all parts of the Empire, to the protection and management of the forest resources. Particularly in those quarters where the pioneering stage has not been passed, there is still a dangerous tendency to regard the forest as a "timber mine," rather than as a crop capable of being perpetuated. The reproductive power of the tree is its most important and

most valuable characteristic, and the whole object of forestry is to take full advantage of this regenerative power, and through it to provide timber supplies for this and succeeding generations without diminution in woods capital.

Canada, so far as the Empire is concerned, is recognized as the one large source of coniferous timber, that is the soft woods, therefore, in viewing this subject, Canada has to take into consideration the home demand, the demand from the different parts of the Empire, and the general export trade, and in doing this the information furnished by the deliberations of this gathering will be of great value.

Empire Timber Supplies.

The Empire Forestry Conference which is to be held next summer will go carefully into the question of Empire timber supplies; the forest policies of all constituents will be carefully reviewed, and definite conclusions reached, as to where improvements may be effected. The business meetings of the Conference will be held in Ottawa, but a tour is being arranged to give the delegates an opportunity of studying forest conditions and observing forest industries in the various provinces of the Dominion. A unique opportunity will thus be afforded to Canadian lumber and pulp manufacturers to demonstrate their commodities and processes of manufacture, and assist in removing some of the prejudices which have so far operated to restrict, in a measure, our Empire trade.

Arundel 7.30 p.m.

S. S. Arundel 10.30 a.m.

Rev. Albert Johnson, Pastor.

Mr. Elliot has returned to his home in Westmount, while here, he was the guest of Mr. Nelson.

Messrs. F. J. Elliot and J. M. Nelson spent a few days last week at Bark Lake, and enjoyed the outing.

On Saturday evening, 12th inst. the Ladies of Grace Church Congregation, are having a Concert and Social in Stanforth's Hall, which bids fair to be up to the high Standard of former entertainments.

The Programme will be an excellent one, and Local Talent, as well as paid entertainers from the City, will contribute to it, and there will also be an Illustrated "Travelogue," Songs, Music, etc.

Refreshments will be served during the evening, and Home-made Candy will be on sale. Everybody should make it a point, to be present at this concert, and spend a thoroughly enjoyable evening.

Admission to the Hall will be, for Adults 50 cts., and for Children under 12 years of age 25 cts.

On Thursday evening, 24th inst., "Victoria Day," the Ladies Union of the Union Church will hold a Supper and Concert in Stanforth's Hall, and a very enjoyable time is looked forward to. As usual, the supper will be a good one, and will be served from 7 to 9 p.m., after which an excellent programme will be carried out.

Admission, including supper, will be for Adults 50 cts., Children under 12 years of age 25 cts.

OBITUARY.

THE LATE MRS. A. SHUTES.

The deceased, wife of Mr. Archibald Shutes, and daughter of Mr. John Biggerow, of Rockway, died at her home in Verdun, after a long illness, on Friday, 4th inst.

At the time of her death, Mrs. A. Shutes was in the 30th year of her age and leaves a husband and one child, a boy four years old, to mourn the loss of a loving wife and mother.

The body was brought up to Arundel, from the City on Monday evening's train, and the funeral took place on Tuesday afternoon, 8th inst. interment being in the family lot, in the Cemetery adjoining Grace Church, Anglican.

Rev. Mr. Gagnon, M.A., conducted the service, and preached a very comforting sermon, which could not fail to help those in trouble and distress. Mrs. Gagnon presided at the organ, and the old familiar hymns, "Jesus Lover of my Soul," "Safe in the Arms of Jesus," and "Peace, perfect Peace," were feelingly sung by the many friends and relatives present in the Church.

The Pall-bearers were the Messrs. Gordon Gray, Edward Gray, Carmen Gray, Geo. Williams, and L. Moore.

The Casket was completely covered by beautiful floral offerings, notably a large wreath from the employees of Messrs. Walker and Campbell, in whose employ Mr. Shutes has been for over 20 years.

A large number of fellow-employees accompanied the Casket from the home to the Railway Station.

Sympathy is extended to Mr. Shutes, in the loss of his wife to Mr. Biggerow in the loss of his daughter, and also to all the relatives of the deceased young woman.

HYDRO-TORON

Where Else Can You Find Such a Guarantee?
10,000 Miles
Against Stone-Bruiise, Rim-Cut, Blow-Out

Hydro-Toron tires escape the hidden defects that cause trouble, because they are made by the Internal Hydraulic Expansion Process.

Then there is the Toron-treatment of fabric, which gives the layers greater tensile strength, more

holding power, increased affinity for rubber and provides resistance against the damaging effects of water and weather.

Have you joined the army of users who are enjoying these unusual values? If not, say "Hydro-Toron" the next time you buy tires.

George Hardie, Dealer - Brownsburg.

Make old floors new again

"Save the surface and you save all"

Even when your floors are discolored with age you can make them fresh and new-looking by using Carmote Floor Varnish.

This varnish comes mixed with colors to match any woodwork. With one brush-stroke you can both stain and varnish. You can also get it clear—without coloring.

Carmote Floor Varnish hardens thoroughly and never becomes soft or sticky. It is recommended especially for all kinds of furniture.

LACHUTE MILLS, QUE.

The Standard of Comparison

A High Quality Car at a Modest Price

Master Four 23-38 Touring Sedan

In addition to its smart appearance, the trunk is useful for samples and papers, and for shopping bundles, as well as luggage when touring.

For the man or woman who seeks a refined, handsome closed car for business or pleasure—one that provides complete protection in all weather—this four-cylinder touring sedan meets every requirement. The design of the beautifully finished Fisher-built body gives the intimacy of a coupe with the carrying capacity of the sedan. The interior fittings are harmonious and tasteful.

Provision for samples, parcels, luggage, etc., is made in the handsome trunk, carried outside at the rear.

And the price of this fine closed car makes it a value without comparison.

end at 16 Island Lake.

Mrs. T. Christie is spending a few
days in Montreal this week.

Miss Gladys Shaw of Montreal was
a week-end guest of her mother.

Mr. and Mrs. John Mackie, of Mont-
real, were week-end visitors in town.

Miss Jessie Cruise of Montreal was
a recent guest of her parents for
a few days.

Mrs. MacNeill returned home last
week after spending a pleasant visit
in Montreal.

Mr. and Mrs. A. Bishop and Miss
M. Buchanan spent Sunday with friends
at St. Lambert.

Mr. and Mrs. J. R. Parris and son
are spending the week at their sum-
mer home, Lake Fraser.

Mrs. Geo. Hunter and daughters, of
Montreal, are spending this week the
guest of Mrs. A. MacArthur.

Mr. Harold Hunt, who has been
visiting friends in town left for his
home in New York on Wednesday.

Mr. and Mrs. Stewart and little
daughter Pearl were guests of Mr.
and Mrs. J. S. Giles for the week-end.

Mrs. Robt. Miller and family were
in Montreal on Tuesday, attending
the wedding of her nephew Mr. Jas.
Beech.

\$3.50. Saturday and Monday only.
Real Bargains. We do all kinds of
Repairs and prices right.

The Senior C.G.I.T. of the Pres-
byterian Church held a most success-
ful tea and sale of ice cream on Sat-
urday afternoon last, in aid of the
Crippled Children. The tables and
booths were prettily decorated with
blue and gold bunting, and looked
most dainty and inviting. The girls
were encouraged by the proceeds of
\$25.00.

Mr. Russel McKimmie, who is Sec-
Treas. of the Mabel and Ogdensburg
Telephone Company, received a most
delightful surprise on Thursday of
last week, when a number of the
subscribers with their wives visited
him and presented him with an ad-
dress of appreciation and a beautiful
oak writing desk. A very pleasant
social evening was spent. Mr. and
Mrs. Russel McKimmie, while thank-
ing those who were present, wish to
thank all others who contributed but
were unable to come refreshments
served.

St. Simeon's Girls Branch of the
W. A. will give a Dorcas Tea at
Victoria Hall, June 2nd, 3.30 p.m.
(Standard Time.)

Mrs. Ferrabee, Diocesan President,
will address the meeting, and 16 girls
from the Various Montreal Branches
of the W.A. will give a play entitled,
"The W.A. Impersonated."

All are cordially invited. If you
have not received an invitation, you
may get one as you enter the hall.
Admission according to your waist
measure 1c. per inch.

The School room of the Presby-
terian Church was well filled on Friday
evening last, with an interested au-
dience when the girls of the Pres-
byterian's Gymnasium Class, of which
there are 46, gave a review and dis-
play of their work during the past
year. Each item on the programme
was well rendered and received with
well merited applause. Miss Verda
Kettyle who has faithfully trained
the girls was presented with a beau-
tiful basket of carnations and the
proceeds which amounted to \$25.50
will be used for apparatus for the
coming year.

Mr. R. E. Carkner is spending this
week with friends at Ste. Agathe.

Principal Nichol, of Buckingham
High School, was a week-end visitor
in town.

—:—
Sunday School Convention.

The public is requested to remem-
ber the Sunday School Convention
to be held in the Presbyterian Church
on Saturday, May 29th, beginning at
10 a.m. (Standard time.)

A good programme has been pre-
pared and distributed to the various
Sunday Schools through the hands of
the ministers, who have been request-
ed to announce the convention to their
people.

Rev. Mr. Reid, of Montreal, will dis-
cuss the "Organization of Our Sun-
day Schools," with regard to the work-
ing of the graded lessons.

Mr. John L. Hodgson will discuss
the "Sunday School Programme for
the Teen-Age Pupil."

Rev. T. W. Jones, of Montreal, will
speak on "Our Privilege and Opportu-
nity in Our Work for the Young."

A collection will be asked to each
session to defray necessary expenses.
Parents, Young people and Sunday
School teachers are especially request-
ed to attend.

Town Council

A special meeting of the above
Council was held in the Town Hall
on Wednesday last at which all the
Council were present. The Session
was presided over by Mayor W. M.
Sepp.

The question of daylight saving
was again brought under discussion,
and after much deliberation it was
decided to abide by the former action
of the Council and remain at the old
time, those opposed to daylight sav-
ing being Councillors Dallaire, Charle-
bois, Lemay, Dobbie and Larocque.
Those in favor of daylight saving were
Councillors Gail, Jousse, Creswell and
Morrison.

Complaint was made to the Coun-
cil of the unsanitary condition of a
house in the lane off Clyde Street,
and the proprietor was notified to
have same immediately remedied or
an appeal would be made to the
Provincial Board of Health.

MORIN HEIGHTS

A number of the Lake Echo Cot-
tages are already occupied.

Mr. W. J. Pollock, of Mille Isle, is
busily engaged in town this week.

Rev. H. Jekill and family are to
spend the last half of this week in
Morin.

Mr. F. Watson, the new proprietor
of the Strathcona House, is erecting
a commodious hall on his grounds.

Messrs. Syvret and Hunting have
rented the Boyd's restaurant and have
started the sale of ice cream and etc.,
this week.

The Laurentian Rest Building is
nearing completion of enlargement
in anticipation of accommodating a re-
cord number of summer guests.

There are rumors reimportant
moves in the near future by our An-
glican Clergyman but as they are
not verified will not be reported for
the present.

Representatives of the Presby-
terian Social Service Work of Montreal
were in town lately looking for a
site for a children's camp. They
were much pleased with the locality,
and are reported as being success-
ful in their quest.

The three fold play given here a
month ago, was repeated in Davis
Hall Saturday evening, and was keenly
enjoyed both by those present
for the second time as well as the
first. A full house at Shawbridge
enjoyed the same programme Friday
evening.

CHURCH NOTES.

Services in the Baptist Church, La-
chute, on Sunday, May 27th, will be
at 11 a.m., conducted by Mr. James
McDermott, and at 7.30 p.m., con-
ducted by Rev. G. Victor Collins (fare-
well sermon.) Sunday School at 9.45
a.m. All Daylight Saving Time.

Presbyterian Church Services will
be held next Sunday, May 27th, as
follows: In Lachute at 11 a.m., and
7 p.m., and in Brownsburg at 3 p.m.
(The above on Daylight Saving
Time) and in Upper Lachute at 11
a.m. (Standard Time.) Rev. A. Geo.
MacKinnon will conduct both services
in Lachute. Mr. A. O. Lloyd will
conduct those in Upper Lachute and
Brownsburg.

A congregational meeting of the
Presbyterian Church has been called
by the session for Tuesday evening,
May 29th, at 8 o'clock (Standard
Time) in the Church to discuss the
present situation with regard to
Church Union. Rev. D. Dickie and
Rev. M. Campbell, of Montreal, have
been invited to present the situation
from the point of view of those op-
posed to Church Union, and Rev. S.
T. Martin and Rev. Dr. George Han-
son also of Montreal have been in-
vited to present the other side. All
members and adherents of the con-
gregation urged to be present.

VITAMINES FOR DAIRY COWS.

It is known that milk contains in abundance those mysterious, little understood, vital principals called vitamins, which seem to have so much to do with life itself.

So essential are these vitamins that lower animals, like rats, rabbits, guinea pigs, etc., soon die if a sufficient quantity is not contained in their ration. So vital are these vitamins that it was observed in the great war that soldiers having a ration containing butter recovered from their wounds much sooner than those deprived of butter. Hence it is, that dairy products are becoming more universally used in our diet than ever before.

Now it is learned that cows' milk has a greater number of vitamins in summer than in winter, presumably due to the fact that they have greater access to sunlight in summer than in winter, and that they have more green leaves of plants in their rations. From this fact it is to be observed how very essential it is to have a well-lighted stable, one with plenty of windows to let in the sunlight. Also, how important it is to secure forage crops for winter feeding in such a manner as to preserve the green leaves, as in clover and alfalfa hay and the corn plant for silage and to be fed in the dry state. Some people have seemed to think that the leaves of plants, because they did not weigh very much, were of little importance to the ration; but now we know they contain these vital principals.

Just recently it has been shown that if cows are given cod liver oil in their ration in winter, the number of vitamins in the milk is greatly increased. Cod liver oil contains these vitamins in abundance, the cod getting them from the green leaves of sea weed. Hence the vitamins can be maintained

in milk during the winter by adding the oil to the cow's ration.

But it will be much better and more economical to furnish the vitamins to the cow in her regular food than to feed her cod liver oil. Certainly if the practice should become common, the price of the oil would so advance that it would become prohibitive.

The first thing to do is to have the stable well lighted and well ventilated. This allows the cow to function normally.

The next thing is to prepare forage crops that they will retain their leaves.

If clover is cut and allowed to lie in the swath in the hot sun until nearly all the moisture evaporates, the leaf and stem become very brittle and when handled the majority of the leaves drop off. But, if raked soon after it is cut while only in a wilted state and put in cocks immediately and allowed to cure in these cocks, even if it takes several days, the leaves are tougher and adhere to the plant more tenaciously and are saved.

If one has hay caps to cover the cocks with they have ideal conditions. However, if the clover is put in cocks before it dries too much, it will settle down more compactly so it will shed rain more readily and in case of wind will not blow over to be exposed to the weather.

When the clover, or alfalfa, is in proper condition to cut, it should be cut at once, whether you have five acres or forty, and immediately put in cocks. Then when cured it can be drawn into the barn with the least loss of leaves. This gives the hay the greatest degree of palatability, the largest percentage of digestible nutrients, and, not of the least importance, an abundance of those essential vitamins.

Then we will not have to feed cod liver oil to get normal milk.

Building Up Bee Colonies.

It is essential that every beekeeper should have all his colonies in the best of condition, i.e., strong in bees of the right flying age at the commencement of the main flow in order that the largest possible crop may be harvested.

The first step, then, in building up should be taken toward the end of the honey flow, about the last week in July or first in August, when the beekeeper should see that each colony is headed by a vigorous young queen so that plenty of young bees may be reared for the winter. Should no nectar be coming in, it might be necessary to stimulate brood rearing by feeding; especially is this necessary for nuclei.

Later, he should see that all colonies contain an abundance of wholesome stores, and that the bees have adequate protection from the cold, in order that they may winter with as little loss as possible.

Despite the best of preparations for winter, it will sometimes be found when the colonies are removed from their winter quarters that they are low in vitality and vary greatly in strength.

To conserve their vitality cellar-wintered colonies should when brought out be protected where possible, also they should be shielded by some sort of windbreak.

Unless lots of stores are present in the spring colonies will build up but slowly. It will, therefore, be necessary early in the season to see that all have sufficient stores of honey. In most localities there is ample pollen. Combs of honey should be placed, after breaking the cappings, one on each side of the brood nest. Should spring flowers fail it might be necessary to feed to prevent brood-rearing being curtailed. In localities where pollen is not abundant, combs containing it should be saved and given in the spring.

The problem of the beekeeper, then, is to bring the medium colonies up to the strength of the strong ones. This may be done by uniting weak colonies to them or by giving a comb of sealed brood with adhering bees.

If desired, a weak colony may be built up by placing it above a strong colony with an excluder between them. No entrance is provided above. This is best done in the evening. First remove the cover and allow the cool air to cause the bees of the strong colony to recede. The weak colony is then gently placed above without the use of smoke. Three weeks later the upper colony, now quite strong, is removed to a new stand.

Water is required early in the spring for brood rearing until new honey is coming in, and unless a natural supply is near the apiary it should be furnished.

That the queen be not crowded for room in which to lay, an extra super should be given when the bees are filling all the spaces between the frames in the brood chamber. The bees also should be made as comfortable as possible by giving them ample space in which to store.

Should increase be desired, the colonies may be divided as soon as the hives are full of bees.

Warm the Tar-Paper Before Putting on Roof.

Some years ago we had occasion to repair a shingled roof with tar-paper and, as the weather was somewhat cool, a few rolls of paper were placed near the stove to warm them so that they could be more easily handled. In the haste to finish the work, however, some of the rolls were used without

A Cloak for Brides.

Something entirely new for the bridal trousseau is a cape of hyacinth pink baronet satin with tinted peonies under its draped bolter collar.

this precaution, and to-day the difference in the wearing qualities of the two is plainly visible. The rolls of paper that were applied while warm are in good condition while the others are buckled, checked and cracked in many places.

As an explanation of this, the workman who did the repairing says the warm paper shaped itself to the rough surface beneath before hardening. Also, that the paper applied while cold and stiff naturally cracked more or less in handling; and, since it did not accommodate itself to the surface of the old roof, it was subject to further wear from the wind and weather.

—G. E. H.

Poultry Record of Performance.

A correspondent wants to know what he shall do in order to enter the Record of Performance for poultry, established and conducted by the Poultry Division of the Dominion Live Stock Branch, Ottawa. First, he must send to the Division for entry forms and a copy of the rules and regulations. He can do this without placing any stamp on the envelope containing the application. He also wishes to know how many eggs a bird has to lay so as to qualify for a certificate. For an R. of P. certificate she must lay 150 eggs in 52 consecutive weeks and for an advanced certificate 225 eggs in 52 consecutive weeks. The eggs must be up to the grade "specials" in the Canadian standards, and after April 1, must average over two ounces in weight.

Spring paint on old furniture covers a multitude of sins.

COMMON DISEASES OF THE STRAWBERRY AND THEIR CONTROL

Leaf spot, leaf blotch, etc. There are two fungus diseases causing a spotting or blotching on strawberry foliage. One is called leaf spot; the other a leaf scorch. The leaf spot is readily recognized in the field by the small circular areas scattered over the leaves. At first these are purplish but later become greyish or brownish in the centres shading to reddish brown towards the margin. The margin itself remains purplish.

The leaf scorch disease is first observed as small reddish purple spots appearing on the leaves, petioles and fruit pedicels. On the leaves these areas gradually increase in size and finally coalesce to form irregular blotches, sometimes covering the entire leaflets. They remain dark in the centre and hence are easily distinguished from the leaf spot which has a light grey or brown centre. On the petioles and fruit pedicels, sunken lesions are formed which frequently girdle these parts and thus weaken if not kill them.

Control. These two diseases are controlled by the same operations. When setting out a new patch, old leaves showing symptoms of either disease should be removed. If all the foliage is affected it is better to discard the plants. As soon as the first symptoms of either leaf spot or leaf scorch appear in the field spray immediately with Bordeaux mixture, using a 4-4-40 or a 4-6-40 preparation. Keep the plants well covered with spray throughout the season; spraying every two or three weeks if necessary. The following season spray thoroughly with the same material before the blossoms open, in order to protect the plants until after picking. Then apply another covering of Bordeaux at

that time so that the young developing leaves may be given every protection. It is essential to keep the leaves comparatively free from disease in order that they may function properly and store up food for the crop of fruit the following season. The second year if either of these diseases is present, spray before the blossoms open and again after the fruit is picked. The plants are usually plowed down after the second crop.

Powdery Mildew. During the early part of the summer another disease is found affecting the strawberry foliage. This is also a fungous disease—powdery mildew. The symptoms are a curling upward of the margin of the leaflet along the mid-rib so that the under surface is exposed to the sun. Following this a white, powdery fungous growth appears on the under surface of the leaves. The growth thus formed produces reproductive bodies throughout the remainder of the season which are carried by the wind to other leaves and plants, thus spreading the disease.

The best means of controlling mildew is to dust with sulphur, using an 80-20 mixture, as soon as the first symptoms of the disease are observed. Repeat the applications every week or ten days if necessary. This dusting will also aid in the control of the sawberry weevil which proves troublesome in some districts.

Root Troubles. There are various diseased conditions of the roots encountered in strawberry culture. Included among these are winter injuries as well as root rots. As yet no satisfactory means of control have been found but a good winter mulch has proven useful to decrease materially the losses from such troubles.

There's time in the package

Time to do the many things ordinarily put off on wash-day. For Rinso does not keep you standing over the wash-tub, rubbing until your back aches and your hands are red and sore.

Rinso, an entirely different kind of soap, soaks clothes clean. Rubbing and boiling are unnecessary. The big soapy Rinso suds gently loosen the most ground-in dirt without weakening a single thread.

THE CHILDREN'S HOUR

TO THE GREAT CITY.

Once there was a little gray pony which longed to go to the great city and see all the sights. He had often set out in gay spirits, prancing this way and prancing that way, but he had never gone anywhere near the great city.

One day when he was prancing this way and prancing that way he heard a great sound. For an instant he stopped and listened. The sound came from the swaying branches of an oak tree.

"Where do you want to go, little gray pony?" it asked.

"To the great city to see all the sights," replied the little gray pony and began to prance again.

"Very well," said the great oak tree. "Stop prancing this way and that way and go straight ahead. Then you will surely find the great city and see all the sights."

"Thank you," said the little gray pony. "I will do it."

But he didn't do it at all. He kept right on prancing this way and that way, and so of course he didn't reach the great city that day or see any of its fine sights.

A second day the little gray pony heard another great sound as he was prancing this way and that way. He pricked up his ears and stopped again. Was he hearing sounds from the great city? No, it was the great voice of the sea as its waves splashed noisily on the shore.

"Where do you want to go, little gray pony?" it asked.

"To the great city to see all the sights," replied the little gray pony.

"Very good," answered the great sea, "but you must stop prancing this way and that way and go straight ahead. Then you will certainly come to the great city and see all the sights."

"Thank you very much," said the little gray pony. "I will do it."

But he didn't do it at all. He kept right on prancing this way and that way, and so of course he did not reach the great city that day or see its wonderful sights.

A third day the little gray pony was prancing this way and that way when again he heard a sound, this time, gentle and soft, the voice of a child. The little gray pony stopped prancing to listen.

"Oh, where are you going, you dear little gray pony?"

"I am going to the great city to see all the sights," said the little gray pony, beginning to prance this way and that way again.

"That would be fine," answered the child, "but don't you know you can never reach the great city by prancing this way and that way? Let me get on your back and I will guide you straight ahead, and then we shall surely come to the great city."

So the little gray pony let the child climb upon his back, and together they went straight ahead until at last they reached the great city and saw all the wonderful sights.—Mary L. T. Tufts in Youth's Companion.

Valuable Bull Died from Eating a Nail.

The recent death of a \$50,000 bull from this cause ought to provide food for thought for the man who persists in leaving loose nails scattered around his farm. Nails are mighty useful things, but their usefulness ceases when they are left scattered around the granary or feeding room. Nails may be kept to advantage in a box with compartments. The compartments make it possible to have the nails sorted all the time. The time it takes to install a nail storage is amply repaid when you want nails of a certain size in a hurry.

Children often scatter nails about; if they know they ought to keep the nails in order, they will do so and not only save a great deal of trouble, but also learn habits of orderliness.

The best time to get rid of the scrub bull is to-day.

It is not true, as sometimes is said, that acid phosphate increases soil acidity.

To the lover of nature the wild flowers of the Canadian National parks are a constant source of delight. Strange as it may seem the flora of the higher altitudes is among the most beautiful in the world.

OLD CHUM

The Tobacco of Quality

Surnames and Their Origin

COSGRAVE
Variations — O'Cosgrave, Cosgreve, Cosgreave.
Racial Origin—Irish.
Source—Given Names.

If your name is Cosgrave, and the name comes down to you from "the old sod," you may be a scion of either one or two of the Irish clans, for two entirely different Irish clan names have been Anglicized into the form Cosgrave.

One of these, like the Hogan clan, was a branch of the more ancient O'Briens, being founded, in fact, by the grandfather of the chieftain from whom the Hogans took their sept or clan name. This chieftain, the grand-sire of "Ogan," was called "Cosgrach."

The other clan, which bore the name of "O'Cosgrighe," had no connection at all with the O'Briens and the Ho-

gans, but derived its name from its founder, a chieftain named "Cosgar."

DURKIN
Racial Origin—Irish.
Source—A given name.

Here is a family name which you might be pardoned for taking as English, for it has a truly English sound to it. Possibly it would not look so English to you, however, if you saw it spelled "O'Dubharcon."

But you won't find the sounds so different if you pronounce the Gaelic form of the name as it should be pronounced, with a silent "bh."

This clan name, derived at some period in the Middle Ages from the name of the chieftain under whose leadership the clan formed, is but the regular development from the given name of "Dubharcon."

The Durkins were a branch of the more ancient Macnamara clan.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning Mrs. Mollie Cadotte, Makamik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Eyes of the Blind.

I have a friend, the sweetest friend That ever you could find, And though he lights the way for me, They tell me he is blind.

But, oh! I know my friend can see More than I or you; We are the sightless; he is blessed With visions ever new.

So quiet, so serene his face, His smile so quick, so bright— He sees beyond the things we touch And needs no earthly light.

His spirit bears him on, although He knows not night from day; The shining beauty of his soul Lights all the darkened way.

Our fleshly eyes that have not seen The glory yet to come, Can never follow such as he When he shall reach his Home.

The joys to us so new and strange, The radiance and the song, To him will be but old-time things That he has loved so long.

Soul blind and groping for the peace That he—who sees—has won, We know when we would guide his steps 'Tis he who leads us on.

—Ella Grandam Smith.

Instructions for Hens.
Mistress—"If you want eggs to keep they must be laid in a cool place."
Biddy—"Oh! mention it to the hens at wanst, mum."

Pretty teeth make a smiling woman.
Minard's Liniment used by Physicians.

Old Gloucestershire.

The lanes of Gloucestershire are sweet With hawthorn bloom to-day; The larks are nesting in the wheat Where Severn winds her way, And ancient men are whetting scythes Ere comes the time of hay.

Oh, Gloucestershire and Canada are many miles apart, But the old songs of Gloucestershire are singing in my heart.

The hills of Gloucestershire are white With sheep now it is May; Where gleamed the Legion's armour bright.

The Cotswold yeannings play, And daisy-spangled is the sward Above the Roman way.

'Tween Gloucestershire and Canada vast waters rise and fall, But a cuckoo calls at sundown its old familiar call.

Great ships come into Gloucester town And safe at anchor lie, And little boats with sails of brown; And seagulls wheel and cry Around the spires of Gloucestershire When wind and wave are high.

O Gloucestershire, in Canada thy children think of thee, And heart to heart is calling across the northern sea.

He—"Marie told me you were afraid I was going to try to kiss you."
She—"Nothing of the sort. I was afraid you wouldn't."

An Old Law.
Pupil—"What keeps us from falling off the earth when we are upside down?"
Teacher—"The law of gravity, of course."
Pupil—"Well, how did folks stay on before the law was passed?"

Another Question.
Mother—"Don't ask so many questions, Elsie. Don't you know that curiosity killed a cat?"
Elsie—"What did the cat want to know, mother?"

Britain's Strangest Colony.

One of the strangest colonies in England is that of South Shields, where, in a part of the town near the river, a large number of Arabs have found a permanent home.

The colony stretches for a considerable distance along the docks, and there are several hundred alien inhabitants. To walk through the principal street is like visiting an Eastern city. There are Arabian butcher shops, lodging-houses, and eating-houses, while most of the pedestrians are Arabs.

Arabic signs adorn many of the shops and houses, while here and there a sign has been "done into English" with comical results. Then there is one notice to the effect that Mr. Said Hassan's premises are a "licensed seamen's Arab lodginghouse."

Most of the Arabs came to this country as seamen during the war, and since then many of them, unable to find berths, have found themselves stranded in various parts. There are large numbers of them in Glasgow, Liverpool, and Cardiff.

At South Shields the colony has its own ministers, and at marriages or funerals the strange ceremonials of the East are observed. In the case of funerals, the mourners execute a solemn "death dance" in memory of its departed.

Betrothals and births are signalized by rejoicings, which in some cases extend over several days.

The colony has been considerably depleted recently, as many of the men have succeeded in getting ships and returning home. In some cases, however, the Arabs have settled down with their wives and families, and have found various ways of earning a livelihood.

TO AVOID PAINS OF RHEUMATISM

This Trouble is Located in the Blood, and Relief Comes Through Better Blood.

Rheumatism comes with thin, impure blood, and can only be driven out of the system by enriching and purifying the blood.

The chief symptom of rheumatism is pain. The most successful treatment is the one that quickly banishes this disagreeable symptom. Many rheumatic people suffer pains that could be avoided by building up the blood. The value of Dr. Williams' Pink Pills in rheumatic troubles is proven by the testimony of Mrs. A. Bryson, Arthur, Ont., who says:—"I was so used up with rheumatism in my shoulders and neck that I could not turn in bed without the help of my husband, and the pain at times was almost unbearable. I took doctors' medicine which did me little or no good. Then I began taking Dr. Williams' Pink Pills and have since been free from rheumatism. I can also recommend the pills to young mothers, as in my own case I found they are unexcelled. I may also add that I recommended Dr. Williams' Pink Pills to a neighbor who took fainting spells at the change of life, and who could not walk any distance. She took the pills for nearly three months and they made her a strong well woman."

You can get Dr. Williams' Pink Pills from any dealer in medicine or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Flames Can't Destroy Writing.

Even the careful criminal, who destroys, as he thinks, all traces of evidence against him by burning documents that prove his guilt, is not safe from the long arm of the modern scientific detective; for documents charred in the fiercest fire can now be made to give up their secrets.

A short time ago a document of vital importance was thrown by mistake into the fire. When its loss was discovered it was nothing more than a blackened fragile thing containing not a single word that was decipherable.

An expert was called in, though the owner of the burnt paper had little hope that he could be of any use. Four weeks later the expert returned and handed the owner a clear photograph of the document, with every word as easy to read as on the day it had been written.

The expert knew that photographic plates are acted upon by other things besides light. The ink of the original writing contained chemicals, and even though they had been in the heart of the fire he felt that some of their potency must remain.

He placed the paper between two ultra-sensitive plates and left it for a week. Then he looked to see if there was any result: a few faint marks appeared on the plates, but that was all. Undeterred, he next gave a three weeks' exposure, at the end of which period he was able to deliver the perfect photograph.

It is rather interesting to compare the price per pound of automobiles with the price per pound of other light machinery. Some cars sell for as little as fifteen cents a pound.

MRS. A. HARBACH GAINS 24 POUNDS

Declares Tanlac Restored Her Completely When Health Was Practically Destroyed.

"The Tanlac treatment restored my health and strength and increased my weight twenty-four pounds two years ago, and I am one of the happiest women in Canada, for I have been feeling fine ever since," declared Mrs. Alice Harbach, highly esteemed resident of 28 Dundas St. W., London, Ont.

"I was so nervous I trembled like one with the palsy and feared a complete breakdown. I couldn't relish my food, many days I didn't eat a thing, and lost weight until my clothes were way too large for me. I had piercing headaches, was so weak I would give out before the middle of the day, and at night just seemed to hear the clock strike every hour. I suffered more agony than tongue can tell."

"But Tanlac ended all my troubles, and if I had my say I would put a bottle in every home. It has won my everlasting gratitude, and I will always praise it."

Tanlac is for sale by all good druggists. Take no substitute. Over 37 million bottles sold.

Chilly Work.
The dear old gentleman got into conversation with a young man. "And what is your job, sir," he asked, "if I may make so bold as to inquire?"

"I travel in underwear," was the reply.

"How curious!" said the old man, rubbing his spectacles. "And—what a cold job it must be in the winter."

Minard's Liniment for sale everywhere.

Stockings Wear Long.
Visitor—"Good morning, Martha, how busy you are, always knitting. Do you find the stockings wear longer if knitted by hand?"

Martha—"Wear longer? Yes, of course, mum. Perhaps you wouldn't believe it, but this pair of my old man's socks I knitted five years ago, and I've knitted new legs to 'em twice, and new footed 'em five times! And, seems to me, they'll never wear out!"

Fish That Sit Down.
Nature never produced a more remarkable creature than the Japanese goldfish.

Though they are called goldfish, their scales range in color from pink to bronze, blue, black, and orange, in shades such as human craftsmen have never succeeded in copying. They have wonderful tails that remind one of bridal veils or fans, and they sit down on these whenever they feel tired.

Nature has provided them with a strange means of defence. Their eyes are telescopic. That is to say, the fish can manipulate them in such a way that they can see what enemy is chasing them, rear or flank. No other creature has such a wide range of vision.

The Japanese goldfish is of considerable value, some of them selling for four or five pounds, and quite a large trade is done. They are imported in specially-built aquariums, heated and ventilated in such a way that the occupants are not affected by changes of climate.

The Source of Thorinaite.

It is said that the mineral thorinaite, now largely used in the manufacture of the mantles for incandescent gas lamps, is at present not known to occur elsewhere than in the island of Ceylon. Its discovery was due to the operations of the Ceylon Mineral Survey. It is exported to Europe and America.

Not Perfect.
An argument between man and wife had been going on for some time, and at last she exclaimed: "I suppose you think I am a perfect fool?"

"None of us, my dear," came the soft answer that does not turn away anger, "is perfect."

MONEY ORDERS.
When ordering goods by mail send a Dominion Express Money Order.

Not a Fit Place to Visit.
Little Ella—"I'm never going to Holland when I grow up."
Governess—"Why not?"
Little Ella—"Because our geography says it's a low, lying country."

There are 40,000 lakes in Newfoundland. Don't be afraid of truth; she is no invalid.—Emerson.

While it is well known that Aspirin means Bayer Manufacture, it is not so generally known that the Tablets of Bayer Aspirin will be stamped with their general trade mark, the "Bayer Cross."

The Gateway to Opportunity

To-day not all young people are aware of the value of a savings account as the foundation of future security and prosperity.

A savings account not only provides for the proverbial "rainy day," but very often it is the open gate to an opportunity to get into business, to buy a home or to make a lucrative investment.

No other provision for the future is so sure of results in security and contentment as a savings account.

Why not start an account now in The Bank of Nova Scotia?

EN PASSANT.

"NOTHING MUCH in the paper to-night, George," I remarked in a casual way. I had skimmed over the headlines without being stopped in my flight by anything of arresting importance. Indeed, if the truth is to be told, I did not seem to care whether I got the paper first, last, or in sections, as usual in some families where the alleged head of the house has to take his, or her, turn and be thankful. There are times when I would rather have a smoke and chat with Old George, on his doorstep, than sit down in the peaceful atmosphere of a splendid isolation, to read anything, from Homer's Iliad, to the comic section of the Boston Herald, and, goodness knows, there is plenty in between, to choose from.

"What puts that idea into your head?" said George, looking at me intently over the top of his spectacles. "Oh, ah, I see, well, I think it would be quite safe to put them in now! The danger of severe night frost is most likely past; I set mine a week ago and nothing has happened to them. Yes, I would take the chance if I were you: If they come to any harm, it will not be too late to put in others, and if they get along all right, you will have that grand and glorious feeling that comes when you get a handful of good cards and know when to play them. It's all the same, whether the game is poker, or planting out tomatoes; when you take risks, and win, you feel good, and when the game goes the other way, it isn't your fault, oh, no, it is only your condemned bad luck!"

AFTER a short silence, during which George turned over a few pages of the paper, and seemed to be calculating something, he looked up, and up, and said: "I don't know where you get the idea from that there isn't much in the paper. There's 40 pages containing approximately 420,000 words, four hundred and twenty thousand. Now that should carry something for everybody. It would take me seven working days to read it all through, in my natural tone of voice, and yet you come along and say there's nothing much in it. Passing over this great array of verbiage, just take a look at this little item of only three lines:

It says:— The Queen of Siam is said to have the most valuable thimble in the world:— One made of pure gold, and studded with diamonds." Isn't that the apotheosis of needlework! During the war, the women of the Red Cross did a vast amount of sewing, yet I don't suppose there was one gold thimble set with diamonds amongst them. The Queen of Siam has it, and most likely she has no time to use it. It will be tucked away in a velvet lined casket under a glass shade, with her engagement ring, while she is in the kitchen washing up the dishes, or sitting in the parlour eating bread and honey. No sir, the best tools are not always given out to the best workers. That gold and diamond thimble, or a replica of it, was earned in sentimental value by every Red Cross worker who sewed as much as the neckband of a shirt. The dazzle of diamonds was replaced by the light of loving kindness, as their nimble fingers plied their tasks, and yet the canonised emblem of needlework lies under a glass shade in Bangkok, while the King, Chulalongkorn, may have to fix up his collar with a pin."

"THE BEST tools do not belong to the best workmen, I know a man who sports a gold mounted fountain pen. You can see it sticking out of his pocket at church, and he carries it around with him when he goes fishing, yet when he writes his name to a receipted bill, you have to make a marginal note of who signed it. The eighteen carat gold nib also spells very badly, and it makes mistakes in adding up a little column of figures. I know another man who writes with a pen like a rusty nail, yet it writes like music flowing, spells the biggest words accurately, arranges them grammatically, and can add up a yard long column of figures in a jiffy without a single error.

Up the creek, there, one day, a man was fishing, with a fine steel rod fixed up with a grand reel. He had a nifty basket slung over his shoulder and a beautiful landing net on the grass at his feet. A little farther up the creek a bare-legged little fellow was also fishing. His outfit consisted of a four-foot stick broken from a choke-cherry tree, and a piece of string he got at the grocery store.

When they came away the man had a couple of fine trout in his basket, and the little boy had none, but he held in the palm of his hand a nice half-dollar piece, and his face wore the look of one quoting poetry about "A Silvery Brook."

THE LINKMAN.

R.M.R. GOING TO CAMP

Will Be Under Canvas at Carillon Starting June 1

The Royal Montreal Regiment, under the command of Lt.-Col. C. B. Price, D.S.O., D.C.M., will again go into camp at Carillon this year. An advance party of the regiment will leave on Friday, June 1, and pitch camp on land loaned by Brig.-General C. J. Armstrong, C.B., C.M.G. The following programme has been arranged: Saturday, June 2, the regiment will detain at St. Andrews East and march to Carillon in time for the mid-day meal. The afternoon will be devoted to sports for which a sports programme has been arranged, trophies being offered for competition. Sunday, June 3: Capt. Rev. H. S. Laws, regimental chaplain, will hold a church parade. Following the service, trophies won in the previous day's sports will be presented by the commanding officer. In the afternoon members of the regiment will be free to visit local places of interest, a further sports event having also been arranged. Monday, June 4: His Majesty's birthday falling on Sunday, June 3, this day will be observed as a holiday. Camp will be struck in the afternoon and the regiment will embark at Carillon for its return to Montreal by boat. After the arrival in Montreal the regiment will march to 91 Stanley Street, where it will be dismissed. This trip, the second of its kind, has been arranged by a group of friends of the regiment, headed by Brigadier-General W. O. H. Dodds, C.M.G., D.S.O., its honorary colonel.

Here and There

Nova Scotia has adopted the "drive to the right" rule of the road, the bill providing the change having received the assent of the administrator of the province.

The year 1922 was a banner year for Montreal in the number and tonnage of ships which came to the port, a total of 5,983 ships of 13,089,999 tons arriving, as compared with 5,341 ships of 9,735,450 tons in 1921.

Canada led the world in 1922 in the export of raw furs to the United States. The total fur catch for that year was over 4,000,000 pelts, valued at \$16,000,000. While the general price of furs shows a downward trend, the total catch shows a remarkable increase.

Four of the Canadian Pacific "Empress" liners, the Britain, the France, the Scotland and the India, are to load grain at Quebec during the 1923 season, and new berths have been provided for these vessels near the grain conveyors, at a cost of \$300,000.

When she was alighting from a street car in Vancouver, Mrs. Rose McLaren received injuries which prevented her from concentrating and temporarily did away with her earning power as a spiritualist or psychic reader. She was awarded \$1,250 against the railway company.

The addition of the 17,000-ton "Montaurier" to the Canadian Pacific "Munro Class" fleet marks an important development. Not only is she the largest one-class-cabin ship sailing to and from Canadian ports, but she is the largest in her class on the Atlantic. Her length is 613 feet and breadth 65 feet. Because of her size she will sail to and from Quebec.

Approximately 8,000 tons of silver ore are waiting shipment from the Keno Hill, Yukon, mines. This quantity represents the winter haul. Another 2,000 tons may be moved this summer, making the total silver shipments ten thousand tons for 1923. Such an output is worth about \$3,000,000, high grade ore running from \$250 to \$300 per ton.

"The greatest feat of steam transportation to my knowledge," said C. E. Stockhill, of the Canadian Pacific Railway, recently, "was the movement of the grain crop of 1922." From Sept. 1 to Nov. 31, a period of 91 days, the Canadian Pacific Railway loaded and shipped an average of 1,205 cars per day. This requiring the dispatching of a train every 45 minutes during that entire period, carrying more than 1,000,000 bushels daily. This movement exceeded even that of the bumper crop year of 1915.

One of the many instances of the splendid work carried out at the Liverpool docks is afforded by the Canadian Pacific liner "Metagama." On a recent arrival at that port she started the discharge of her cargo and coaling at 6 o'clock in the morning. Allowing for the usual dinner hour, she took on board in her side bunkers 1,000 tons of coal, which was completed by 2.45 the same afternoon. At the same time she discharged 1,700 tons of cargo, the greater part of which consisted of package freight, completing this operation by 7.15 the same evening.

We have fine line of boys Blue Serge Suits. All sizes now.
W. Banford & Son

ST. ANDREWS EAST.

Mr. W. Lamb spent Sunday and Monday in Montreal.

Mr. A. C. Mathews, was a welcome visitor in our town on Wednesday.

Mrs. Jeffrey and Miss May Neve were in Montreal for a day or so recently.

Miss Walsh spent a day or two in Montreal, last week, the guest of Mrs. (Dr.) Aylen.

Miss Cowper with her friend Mrs. Russell, of Montreal, were week-end guests of Miss Dewar.

Among others who were in Montreal during the past week, were Mrs. W. Bradley and Mrs. W. Jeffrey.

Mrs. Jennings and two little daughters, of Montreal, spent Saturday in town the guest of Mr. and the Misses Walsh.

Invitations are out for a Dance, to be given in the Town Hall, Wednesday evening, May 23rd, under the auspices of the Y.P.D.C.

Mrs. Patterson, widow of the late Rev. Dr. Patterson former Pastor of St. Andrew's Presbyterian Church, is the guest of Miss Harrington.

Mr. and Mrs. W. Jeffrey entertained at four tables of 500 on Saturday evening, the prize winners being, Mrs. N. F. MacGregor and Mr. Hill.

The Ladies Aid, of the Presbyterian Church, met at the Manse, and Christ Church W.A., at the Rectory last Thursday afternoon. Inclement weather and bad roads kept a number away from both of these meetings.

Economical—Dependable Comfortable—Beautiful

The "Master-Four" Touring Model 23-35 Special

The McLaughlin-Buick "Master Four" Touring is its own best advertisement. Every car sold means a new friend made. Its all-round goodness commends it to everyone and its thorough dependability insures its staying sold with its owner.

A close inspection of its construction, finish and equipment and a comparison with other cars of its price will convince anyone of its unusual value. But its value does not end here, as it is continually making new records in operation cost and low cost of repairs.

It is a car that is always ready to start—and to keep going. It has proven its dependability under the hardest conditions in all parts of the world. It has the beautiful, graceful lines that grow on one and in comfort of riding and ease of operation it leaves nothing to be desired, as a ride in it will quickly prove.

Standard equipment includes massive crown fenders, drum type head and cowl lamps, bumper, combination tail and stop light, scuff plates, transmission lock, etc.

HYDRO-TORON

Where Else Can You Find Such a Guarantee?
10,000 Miles
Against Stone-Bruise, Rim-Cut, Blow-Out

Hydro-Toron tires escape the hidden defects that cause trouble, because they are made by the Internal Hydraulic Expansion Process.

Then there is the Toron-treatment of fabric, which gives the layers greater tensile strength, more

holding power, increased affinity for rubber and provides resistance against the damaging effects of water and weather.

Have you joined the army of users who are enjoying these unusual values? If not, say "Hydro-Toron" the next time you buy tires.

George Hardie, Dealer - Brownsburg.

Sail to Europe on the NEW DORIC Sister of the famous REGINA

The excellent service on these new cabin steamers, the largest sailing from Montreal, compares favorably with that of a fine hotel. They are the choice of travellers who demand service and comfort at moderate cost. Ask for Booklet and rates.

J. S. GILES, Agent, Lachute.

WHITE STAR-DOMINION LINE

R. L. Calder Named as Crown Prosecutor.

The Watchman and its readers extend congratulations to Mr. R. L. Calder on his being appointed as Crown Prosecutor. The honor is well deserved and the Montreal Gazette gives the following account:-

R. L. Calder, K. C., has been named crown prosecutor of the district of Montreal. He will be associated for the crown in the conduct of cases before the King's Bench with Crown Prosecutors J. C. Walsh, K. C., and Jos. Archambault, K. C.

Mr. Calder is a lawyer of 17 years' experience in Montreal, except for an interregnum of over four years when he served overseas, and even during that time he had some court martial work, which involves legal procedure. As an old militia officer, he held the rank of major, joined one of the local French-Canadian units early in the war, and ultimately fought with the 13th Battalion, Royal Highlanders of Canada in France. He was awarded the Military Cross for conspicuous bravery in action. He was with his battalion at Cologne during the occupation of the Rhine districts, immediately after the armistice.

Mr. Calder has also had a varied experience in political life. The pressure of work in the King's Bench, due to the growth of the city, has rendered necessary the appointment of an additional crown prosecutor.

During the last term of the King's Bench, Mr. Calder, by special appointment of the attorney-general, prosecuted in the case against Frank Dunn, who was found guilty and sent to the penitentiary for a term of three years.

Mr. Calder is a member of the law firm of Bercevitich, Calder and Gardiner. For many years he has had a reputation of being a fluent and convincing speaker in both the English and French tongues.

ST. ANDREW EAST.

Mrs. Dave Taylor is improving and was able to attend Church on Sunday.

Mrs. D. Patterson, of Ottawa, is the guest of Miss L. Harrington at present.

Miss Allison Rodger has recovered from an attack of measles and is able to be around again.

The Choir Practice was held at Mr. and Mrs. Henry McQuat's on Saturday evening, May 19th.

Miss Mabel Rodger was the guest of Rev. and Mrs. J. Burgess at the Manse on Thursday evening last.

"Meditate therein day and night... make thy way prosperous, and thou shalt have good success." Joshua 18

The Choir Practice will be held next Saturday evening at 8 o'clock at the home of Mr. and Mrs. S. A. Hyde.

Rev. J. Burgess attended a meeting of the Synod's Committee on Synod's arrangements for Retreat etc at Lachute last Friday afternoon.

Public Worship will be held in the Presbyterian Church on Sunday, May 27th, at 11 a.m., and 7.30 p.m., the pastor Rev. J. Burgess will preach at both services. Everybody cordially invited. Sunday School from 10 a.m. to 11 a.m.

WILD ANIMAL LIFE in JASPER NATIONAL PARK

Famous for its ever-fascinating natural beauty, Jasper National Park has other claims to distinction. It is the largest wild animal sanctuary in the world. It is marvellously rich in plant life, its streams and lakes abound in fish, and a great variety of birds are found there. The grandeur of its mountains—there are over 100 lofty peaks in its area—the sheen of its glaciers, the glory of its woodlands and its valleys, the flashing brightness of its waters, all combine in allurements of eye and mind, not found elsewhere in Canada.

All the main animal families of this country are found in Jasper National Park. The list of them reads like a section of a work on natural history. There are the Big Horn Mountain Sheep, Mountain Goats, Wolves (black and grey), Coyotes, Foxes, Mule Deer, Moose, Caribou, Elk, Lynx, Cougars—or as many call them Mountain Lions—Beaver, Martlets, Musk-Rats, Squirrels, Rab-

bits, Porcupines, Weasels, Ermines, Minks, Martens, Fishers, Otters, and Grizzly, Black and Cinnamon Bears.

Some of these have grown accustomed to mankind and accept its presence without fear. Hence black and brown, or cinnamon bears, do not hesitate to come near the lodge and the camps in search of dainties which add to the variety of the diet nature provides for them. Deer, Elk, Beaver, Rabbits and Porcupines are also frequent visitors to points where they are readily observable, or are permanent residents in places easily reached by those who do not care about hunting, but are yet interested in animal life.

With all this prodigality of wild animal life, it is assuring to know that no poisonous snakes or reptiles have ever been found within Jasper Park, and that the greater part of the area is almost entirely free from mosquitoes and insect pests.

The bird life of Jasper National

Park is another attraction that every visitor appreciates. No less than seventy different species of birds have so far been recognized.

Outside of the Park confines there is plenty of hunting for those to whom the chase is as the wine of life. There are many trails to the areas where big game abounds, and the hunters who scorn "easy killing" may have all the thrills and excitement they desire. Experienced guides are always available for hunting and exploring parties, or for those who simply desire to wander leisurely through a never-ending succession of scenic beauties.

With its majestic mountains, Mount Edith Cavell being the highest (11,933 feet) its numerous glaciers, its beautiful stretches of woodland, valleys, streams and lakes, and its unrivalled wild animal life, Jasper National Park is an alluring prospect alike for the seeker for health, the searcher for recreation, the angler or the hunter of big game.

WHY BABIES CRY

It's often hard to find the trouble—it may be teeth—it may be stomach—but oh! so often it is just a chafed irritated skin on which poor Soap has been used.

The remedy for this is so simple! Hours of suffering—night after night of disturbance—have been avoided by mothers, who have insisted on—Baby's Own Soap. Of course it costs a little more, a very little more, however—than what is often bought and used—but four generations of Canadian Mothers are there to vouch for its purity, for the soothing healing effect on Baby's delicate skin, for the lovely pure flower fragrance it leaves when Baby fresh and clean is taken from his bath.

Don't you think, Madam, it's worth paying the 15c. a cake, a little less if you buy a box (5 cakes) which your dealer asks for Baby's Own Soap, Adv.

—If you want your car nicely painted and fixed up take it to the Western Garage, McQuat's Old Foundry. Repairs neatly and promptly executed, and prices right. Try us out.

We have at school twenty-six girls, which is a gain of fourteen in the past four months. Increased accommodations are needed and rooms in attic are now being finished off. Work on the new barn, given by the Kiwanis Club of Montreal, will be started this month.

PLANT SHRUBS FOR THE BIRDS.

In setting out shrubs this spring keep the needs of the birds in mind. It is a wise policy to provide them with early berries whose attractions keep them away from garden cherries and small fruits, for they prefer wild fruits.

The Dogwoods and the Honeysuckle family, including the Elders and the Viburnums, possess every characteristic to commend them to the landscape gardener and the fruit grower, and the cultivator of the "back yard." There are both herbs and shrubs and trees in the Dogwood family. All contribute their white blossoms to the glory of spring time, while their fruits come in assorted colors and range through bright scarlet, dark blue, light steel blue, bluish white and pure white. Cornus Alba (white fruited Dogwood) has blood-red stems and twigs throughout the winter, deepening in color towards spring. The great Canadian favorite, Redosier (cornus stolonifera) bears its fruit up to March.

The Elders are prime favorite with both bird and gardeners. The family is one of the choicest among native shrubs. It is deplorable that farmers destroy the elders, dogwoods, pasture roses, sumachs, etc., growing by fences and waysides. Canadian fence lines might be as beautiful as English hedgerows by the exercise of some forbearance in uprooting native shrubs in many instances. Redosier spreads by underground shoots and soon forms of itself a hedge which is a joy to the eye the year round. The American or Sweet Elder bears a pleasantly-flavored purple berry in June, July and August, while the red berried Elder is still earlier, and even more ornamental.

Another attractive member of the family is the Arrow-wood, or Maple leaved Viburnum, which carries its deep purple berries all winter and is an object of beauty into late autumn. Its coloring, shading from dull red into creamy white.—Laura B. Durand.

DIET.

The individual himself is the only person who can have an exact knowledge of what foods agree with him and what others disagree. If he has not acquired this information by the time he reaches thirty years of age, he is either unintelligent or he has a stomach like an ostrich. In the latter case it matters not what he eats or when.

Every adult should learn, in the due course of living, the particular limitations and vagaries (kinks) of his own body in relation to food.

There are certain facts in regard to the specific action and uses of food, which the average person has no occasion to learn, but the knowledge of this is of service to medicine.

Growth determines the food needs in childhood. Food here must be selected with regard to their body building capacity.

Few children in this country need to suffer from any prolonged lack of the kind and variety of food needed to assist growth, preserve health, and furnish adequate heat and energy.

Mr. Man—

You feel Lifebuoy's healthiness right down into the pores.

After Lifebuoy—you feel cleaner than you have ever felt before.

The delight and comfort of using Lifebuoy are famous around the world.

The colour restores itself after use.

LIFEBUOY
HEALTH SOAP

Early adult life makes drafts on vitality, energy, and heat-producing functions of the body and a diet capable of restoring the daily expenditures and maintaining such balance is required. This varies with body weight, climate, and body condition—whether lean or stout. The active adult has functions increased and eliminates wastes more easily than those engaged in occupations which impose a great deal of sitting. In feeding due allowance must be made for these conditions.

MEASLES.

Few individuals reach adult age without having had an attack of measles. It is generally considered a disease of childhood but adults also suffer from the malady. It is not so often contracted by adults because an attack in early life has made them measles-proof.

As most experienced mothers know, and as the inexperienced should learn, an attack of measles begins just like a common cold, with a cough, slight sore throat and running of the nose. It is only after three or four days of these symptoms that the rash comes out on the skin and the doctor is called to see the child.

The measles germ has never yet been seen but observation and experiments in monkeys teach that it is present in the discharges of the nose and throat of the patient and may be passed on in the tiny droplets sprayed out in coughing and sneezing. When such droplets, loaded as they must be with these germs, are breathed in and settle in the air passages of one who has never had measles, the germs quickly make themselves at home. They find their way into the blood, increase rapidly in numbers, and at the end of about ten days the sufferer begins to cough as if with a cold. In reality, it is the beginning of an attack of measles. The disease is passed along from one to others by the discharges of the mouth and nose.

The measles germ is present in the secretions of the throat and nose from the very start of what may be called the measles cold, which, as already mentioned, begins about three or four days before the measles rash begins to break out.

As we feel sure that the germ is passed along in the tiny droplets of liquid sprayed out in coughing and sneezing it would seem to be a simple matter to prevent the spread of the disease. In reality health officials are almost as helpless in preventing it as they are with the "flu" for the same reason that the damage is done before the true nature of the beginning "cold" is suspected. The best that can be done is to keep children with colds from mingling with others at home, in school or in public places.

This is one of the diseases which each man and woman must help in preventing. Learn how the disease is spread and apply the knowledge in daily life.

Those actually sick should be kept away from other people until the rash has all gone. This is best done in a somewhat "darkened" comfortably warm room, the air of which should be kept moist and soothing to the air passages by means of pans of water or by wet sheets or blankets which may advantageously be hung across doorways.

MUSIC HELPS THE MIND.

Says a leading educationist concerning the value of music:

"I cannot think of an ideal home without music, for it would surely be very incomplete without it. To me, the beauty of music cannot be described in words. There seems to be no state of mind that one can be in in which music is not welcome. Even in the Bible we read that David played on the harp for Saul to quiet his troubled mind. We need music every day in our home more than in any other place for the good of our mind and body.

"The benefits of music are also reaching the hospitals, the homes of the sick, and busy people after a hard day's work find it refreshing to come home and hear its soothing strains.

"We also enjoy music in our homes of learning—the schools. The school orchestra and the songs we sing in assembly makes us feel more like starting out on the day's study in an excellent mood."

CHAPTER III.—(Cont'd.)

"You will think me a harping boor, but when I think of those boys, Grace, the finest the world has produced, living and dying in that hell over there for lack of men with an ounce of grit in them, while I'm out of it forever, a useless rascal so far as the war is concerned, I tell you a man needs to get a mighty tight grip on himself to stand it."

"David, I'll bite you with words in another minute. How can you talk so! You know your mission here is important. It may lack the danger of actual warfare, but the path isn't clear for all that. German snipers are ready even here to get you. Be patient with yourself just for awhile, dear boy. It's the reaction after trench life. Let me give you another cup of tea. The Chinese are past masters in this art, to say nothing of their culinary talents. I'm ravenous whenever I think of their savory dishes."

"By the way, David, I'm beginning to think Fate has interposed on your behalf after all and turned mamma into a hard-hearted parent for your sake, for you certainly need looking after."

"Yes, it's a lucky thing for me she chose China as your place of banishment. Tough luck on you, though." Grace smiled reminiscently, as she dropped the second lump of sugar in David's tea. "Poor mamma, she has forced herself to come to this heathen land to enable my heart to mend, when the fact of the matter is it hasn't even a crack in it and never had to my knowledge. All my protests that Rowen Langton and I were only pals fell on deaf ears. So, behold, here I am whirled to the other side of the world and enjoying the change, while poor mamma believes this is her purgatory."

David joined in her laugh, and Grace saw to it that the seriousness did not creep back to his eyes for the next half hour at least.

"Have you noticed that feather-footed porter, David? He's been providing me with no end of amusement the last ten minutes. If we weren't so matter of fact I'd say he took us for lovers. Poor chap, he doesn't know we are merely prosaic first cousins."

David turned ruminating eyes on her. It dawned on him that he had a very pleasing, nay, ravishing, picture opposite him. The brown eyes were glistening teasingly, and the breeze was twining the stray tendrils of hair into soft curls. The blush of health glowed warmly under the tan, and two dimples lurked tantalizingly, one in the left cheek and the other in the round chin. A sense of something missed dawned on him at the same time as the realization of her beauty.

"David, for mercy's sake are you trying to count the freckles on my nose? I haven't had such a close inspection since the mumps."

"Ah—er—the fact is, I was just thinking, Grace, in England it is quite customary for first cousins to marry, you know."

A distressed flush crept over the girl's face, and to David's surprise she jumped from her chair and stood with her back to him, looking over the balcony railing.

David rose. Crossing to her side he covered the small hand resting on the railing with his own. "Forgive me, Grace, dear, I wasn't speaking lightly. You are the best little pal a fellow ever had, and I'd consider myself the luckiest chap in Christendom if—"

"Stop, please, David, stop. You don't realize what you are saying. You are just lonely and unsettled after your terrible experiences over there. I'm not the girl for you. No," as David took her arms and turned her towards him.

"Grace, I am lonely, desperately lonely. Will you marry me?"

A sudden glow lit up the girl's face, which as suddenly faded, but it crept into and made tender the brown eyes, as she answered: "Dear boy, I missed the real foundation of your proposal, then, the words 'I love you.' Loneliness isn't love, David, dear. No, don't say it. You may think you do, but a girl usually knows the signs of the fatal malady. As you say, I'm a good pal. Let me remain that always."

"You don't care, then?" There was a hurt, anxious note in David's tone. "Not yet, thank heaven. Please help me to keep from caring, David, dear." Turning from him she pointed across the street: "There's mamma with Major Bennett on her bait. Poor mamma, neither one of us will have any peace 'til she has me in the net." A discreet cough caused them to turn.

turn. A Chinese servant bowed before them and apologetically announced that the master was wanted in his sitting-room.

"Who wants me, Meng?"

"Tallee man, black hair lip and glasses. Chinese lady wid she." When the servant had disappeared, after much profuse kowtowing for the cash he had received, David turned to Grace. "It looks as though Creighton is going to draw me into some secret service work. Word has come from England that a German spy in the guise of a Chinese woman is at large here, after doing some dastardly work in Europe. I wouldn't be surprised if he has landed something. There may be some excitement. Perhaps you hadn't better come up."

"Oh, please, David, have pity on my life of inertia! I'll promise not to scream or use profane language, even though my fury urges me to scratch the creature's eyes out. Don't deny me an opportunity to see a domineering Hun become crestfallen."

"Come then. Hang it's being a woman, though."

CHAPTER IV.

As the car drew up in front of the foreign hotel, Tu Hee's stoical calm broke a little and she shrank back when the door was opened for her to alight.

"Come, miss, our time is valuable. Act peacefully and it will be better for you in the long run."

Grasping Lun's hand tightly she accompanied the men through the crowds at the entrance. Ashamed and bewildered, she kept her eyes downcast. Poor child, suddenly and without any preparation, she had been thrust into a strange world. The net was closing tighter on her every minute. She dared not think of the outcome. Was it only this morning, she wondered, that she had breakfasted with Uncle Weng, after which they had walked so gaily in the garden? A mist over her eyes warned that tears were very near. That would be a sign of weakness. Whatever the gods will must be met with fortitude.

A familiar voice fell on her ears. "Why, Rod, if it isn't Tu Hee, the mandarin's niece! What in the world can she be doing here?"

Tu Hee glanced up quickly. Her heart gave a big leap as she recognized in the stylishly dressed woman near her the American from the neighboring hill. "Please, please," she began, but her captors, impatient at her slow progress, hurried her forward to the inner corridor. Here she and Lun were thrust into what looked to be a big bird cage, and shot mysteriously up through space. A queer sensation of falling swept over her. She felt Lun's hand close tightly on her wrist, but her voice sounded far away. "It's the devil's spell they're casting on us." And then the hated foreigners brought her back to vivid, fearful reality.

"This way, Miss." Tu Hee found herself on the level with the floor again.

"Hurry, darlin'," cried Lun, "before the bewitched floor goes up again."

Lun crowded against her mistress as she spoke, and they moved mechanically along the corridor, a guard in front and behind them.

The room they entered was large and richly furnished. Tu Hee saw at a glance it was a typical Western sitting-room. The younger man summoned a servant by pressing a button.

After instructing him in a low voice he turned to Tu Hee. "Take a chair. I guess we won't deny a woman a little comfort, even if she is an enemy."

But Tu Hee might have been a statue for all the heed she paid to him. "Damn clever acting," he muttered.

Lun, who had been standing close to her mistress, her hands working nervously, now approached the official, and shaking her clenched hand, cried shrilly: "No actress—Miss Tu Hee belong great Weng Toy family. You all be killed. He great man—hundreds of them, steekee you through."

Lun's excited harangue provoked loud, hilarious guffaws from the two men, which, however, became suddenly hushed as the door opened. Standing erect, they saluted the young British officer, who entered, accompanied by a girl.

The younger man, as usual, was the spokesman. "We have captured the mysterious Fraulein Kleiser, sir. You will find her acting superb. Her innocent demeanor would hoodwink the devil himself, beggin' your pardon, miss," and he apologetically bowed to the girl.

HOW CANADA ADVERTISES

Part of the staff of expert photographers, employed by the Canadian Government Motion Picture Bureau at Ottawa, to photograph all phases of Canadian industrial and agricultural life and development. The Laboratories at Ottawa are the finest in the Dominion. The pictures, especially a series of "Seeing Canada," are shown in all the countries of the world, thus advertising Canada's exportable products and promoting international trade.

Reluctantly David Marsden approached the captive. Tu Hee was standing with her back to him. She had not moved a muscle since entering the room. David was a little nonplussed at the stiffness of her attitude. He wondered if he were diplomat enough to deal with a graven image. As he paused in front of the slight, girlish form he gave a perceptible start. "Why, Creighton, what do you mean? This is a mere child."

"Wonderful make-up, sir."

Embarrassment and a sort of humiliation grew on David as he noted the beauty and youth before him. His eyes dwelt fascinatedly on the long curling lashes, and sudden impatience seized him to see what the drooping lids concealed. Innocence, he felt instinctively, would leap at him could he but induce those white lids to flutter back. His impatient desire mastered him, and impulsively he leaned towards the motionless form, "Won't you please look at me?"

The white lids fluttered, and David looked into two eyes, the blueness of which dazzled him. He had seen many blue eyes, had received softest smiles and sauciest sparkles from them and had turned away lightly and unconcerned, but these were different. He wanted to look and keep on looking, and mixed with his desire was a baffling feeling that he might gaze and search forever and still never fathom their depths.

Was an electric current attaching itself to Tu Hee also? At first, humiliation that a man dared look at her with manner so unabashed swept over her and dwarfed every other feeling. She felt powerless to look away, however. The piercing grey eyes held her open against her will. Then fear gripped her. An impulse she had never experienced before, and yet seemed to have belonged to her for aeons, took possession of her, and with a little cry she dealt the brown face so near her own a stinging blow.

She paid no attention to the startled cry of the foreign woman who sprang forward. A sense of savage pleasure parted her lips, as she saw the trickle of blood discoloring the brown of the face, where her jewelled nail shield had broken the flesh. She was seized roughly by the two officials, but she was no longer afraid. She had struck a hated foreigner. Why had her nail shield not been poisoned? Oh, why did they torture her so? Her wrist was caught as in a vise. The taint of their touch would never wear off. Would they kill her, or would they give her time to do it herself and enter eternity purified?

And then a clear voice reached her ears. She wasn't heeding, but somehow this voice, musical and resonant, reminded her of temple bells, soothing, deep, and clear. It was the foreign officer. He was in front of her again. He was angry too, but not at her. How strange! He was ordering the men to release her. Tu Hee peered more closely. The blood on his face fascinated her. What a deep gash she had made. Her head seemed queer—the foreign officer was swaying away from her. He might bleed to death. Fumbling in her dress she held out a tiny piece of embroidered silk. But he had gone. Everything was black—perhaps she was dying.

(To be continued.)

In the Highlands.

In the highlands, in the country places Where the old plain men have rosy faces.

And the young fair maidens quiet eyes, Where essential silence chills and blesses.

And for ever in the hill recesses Her more lovely music Broods and dies—

O to mount again where erst I haunted, Where the old red hills are bird-enchanting.

And the low green meadows Bright with sword; And when even dies, the million-tinted And the night has come, and planets glisten.

Lo, the valley hollow Lamp-blessed.

O to dream, O to awake and wander There, and with delight to take and render.

Through the trance of silence, Quiet breath!

Lo, for there among the flowers and grasses,

Only the mightier movement sounds and pauses;

Only the winds and rivers, Life and death.

—Robert Louis Stevenson.

French Cut Forests Ancestors Planted.

By a strange trick of fate the French are now cutting down a forest in the Rhineland which was planted more than a century ago by their ancestors. When during the revolution the Rhine provinces were occupied by French armies they cut down the timber in the privately owned forests of Hanstruck, Elfel and Haardt which later became a part of the Reich's holdings.

The French on taking possession of the left bank of the Rhine found it necessary to replant these devastated areas and imported large quantities of Norwegian pines and similar trees from Savoy and the Pyrenees. Before the world war the Germans considered cutting down these trees planted by the French, but the forestry experts advised waiting until 1920, when they would be fully matured. According to the latest estimates this delay cost the German empire at least 500,000,000 francs.

He who can take advice is sometimes greater than he who can give it.

Hold yourself responsible for a higher standard than is expected of you. Never excuse yourself. Never pity yourself. Be a hard master to yourself—and be lenient to others.

Minard's Liniment for Coughs & Colds

After Every Meal

WRIGLEYS

In work or play, it gives the poise and steadiness that mean success.

It helps digestion, allays thirst, keeping the mouth cool and moist, the throat muscles relaxed and pliant and the nerves at ease.

FOR A BETTER SCORE

Mixing Up the Baby.

The inventor of a new feeding bottle for infants sent out the following among his directions to mothers:

"When the baby is done drinking it must be uncrowded and laid in a cool place under the hydrant. If the baby does not thrive on fresh milk, it should be boiled."

Britain's Expenditure.

During the year ending March 31, 1921, Britain spent £28,000,000 on National Insurance, £78,000,000 on Education, and £31,000,000 on Poor Relief. Thirty years ago Education and Poor Relief cost together about £18,000,000.

"So the town is going to starve you in a rampart next summer? I suppose you had to convince him you could act the part?"

"No. His wife convinced him."

Ninety-one periodicals are published by the Salvation Army in forty-eight languages.

Less Planting --- More Culture

By Hilda Richmond

Since we plant less ground in garden and cultivate the smaller patch more carefully and more frequently we enjoy more fruits for our labor. Time was when in common with other farmers we had to have a "truck patch" that was really a small field. Into that truck patch went everything that everybody else raised, without regard to likes and dislikes, and also without regard to the ability to cultivate it. But the war, which taught so many lessons, eliminated all the vegetables we do not like and made us more careful about plowing up a big expanse of soil to grow up to weeds and sickly vegetables. We never cared a great deal for cabbage, yet we always expected to put out several hundred plants, trusting to the survival of the fittest rather than to any great care, simply because we did not crave cabbage. Now we plant no cabbage at all, but buy a few heads when the cabbage nation strikes us once in a long time.

The spring garden consists of frequent plantings of lettuce, spinach, onions, early peas, beets, radishes and snap beans. These with the permanent asparagus are enjoyed until the middle of July, when the next beans, peas, beets, pickles, tomatoes, roast ears, kohl rabi and such things come in quick succession. Of course, the fall brings a wealth of richness in the garden, but it also brings the last planting of snap beans, peas, lettuce, radishes, onions and beets as well as the cultivation of the celery of which we are very fond. More time and energy are put on the corn, tomatoes and celery than anything else because we depend upon them more for canning and for winter use. This season we used the last celery in January and, of course, the canned things last until fresh ones come.

By having the smaller garden it does not become a drag, but is a real pleasure. Formerly we felt that we must have at least twice as many tomato plants as we needed in order to have plenty to give away to friends.

but we have more to give away with the small patch than with the large one. Also we have more time to try new varieties. The vines are pruned just as trees are pruned, and while we do not use the stakes we think so that they can have plenty of light and air. The same might be said of lima beans. We used to have poles and poles to care for, but now a smaller bed with better care yields more than in other years.

There is less trouble with weeds now than in the big patch. When the early peas, lettuce, radishes and such crops are done the ground is cleaned out and made ready for endive, later plantings of onions, the fall radishes, spinach and all the other things that must be sown in July or August. If there is a place not needed for those crops it is promptly sown to turnips, as turnips will drown out weeds and can be fed to stock. The fertility of the soil for the two or three crops is kept up with well-rotted manure, but really it is less trouble and expense to do that than to fertilize a big field once. The soil is as mellow as ashes and if weeds do appear they are very promptly used as green fertilizer.

It may sound like a fairy story to some folks to say that you can get twice as much off a small plot well tended as a big one skimmed over, but it is true. We even plant fewer potatoes and cucumbers and such things as formerly, though these crops go out in the field rather than in the garden proper. The Japanese with their wonderful gardens, depend upon small plots and we may learn a lesson from them as they fertilize and cultivate. With help so hard to get, and the farmers rushed to death, the proposition of a small garden with better and more vegetables should appeal strongly, for the ladies and children like to work in a well-kept truck patch when they abhor a big weed grown field. Cut the garden in half and see if you do not increase production without increasing work. We know, for we have tried it.

Floating Lands for Home Sites in Holland.

Of all the countries of Europe, Holland affords, perhaps, the best example of how the topography of a country affects the habits of its people, and influences their lives. A considerable portion of the Low Country lies below the level of the sea, and it was to resist its cruel invasions that the gigantic levees, or dikes, were built. Nevertheless, some of the flooded regions, periodically inundated by the sea, have been water-logged for centuries, and one of these is the province of Overijssel. Perhaps its quaintest spot is the village of Giethoorn. Taking advantage of the condition of the soil, the hardy Dutchmen have learned how to cut away sections of turf, and float them to the spot where they are wanted. Considerable skill, of course, is necessary to escape a ducking, because the footing is uncertain and slippery, and the marshland deceptive and treacherous. Poles, about 2 feet in length, are employed to drive off the floating home sites, which are cut away beyond the village limits and then guided to town. Some 10 men follow this work exclusively, and, naturally, are very adept at the handling of their poles and the "balks" in their charge. Giethoorn has been built up in this manner.

A Mere Amateur.

Mrs. Strongwonder: "I hope you'll overlook my language, little boy. I shouldn't have said what I did."

The Caddy: "That's nothin'." You just ought to hear what my old lady says when the old man holds out his pay on her."

Gold cannot rust.

A Royal Recognition.

His Royal Highness the Prince of Wales has graciously added his contribution to the progress of forestry in Great Britain and the Empire generally. In his acceptance of the office of President of the Empire Forestry Association, he presided on March 1st at the annual meeting of the Association, which was held at the Guildhall, London, England. In moving the adoption of the annual report of the Council of the Association, he said in part: "We had, the last three years, unlimited opportunities of realizing the timber resources of our Empire and of actually visiting lumber mills in Canada and Australia. Without a supply of timber, any progressive community must face disaster. With regard to the many needs we have for timber in everyday life, for a regular and cheap supply is essential. This, however, can be secured only by close attention to forestry at all its aspects."

If we are to accept the evidence of those who have made a study of the rate of consumption of timber, the world within the next twenty years will be faced with a timber shortage, not an actual famine. No time must be lost in making provision for future supplies. Steps must be taken to reforest the vast forest areas devastated during the war, estimated in Great Britain alone at one million acres, of which probably not five per cent. have been replanted.

The need for systematic forestry is not more fully realized and the practice of self-regeneration of forests longer relied on as the sole means of propagation."

Novel Boat.

A novel boat is both propelled and steered by jets of water ejected from a motor-driven pump in any direction desired by the navigator of the craft.

Insulating Material.

Wool and cotton are pulverized in a mill for insulating material, to which solutions difficult to filter and some other purposes.

—AND THE WORST IS YET TO COME

Goats in Alberta.

Goat statistics are not to be found in the livestock figures of the Dominion of Canada as the raising of these animals in Canada has never reached a status warranting its inclusion. The only province where goat raising has become thoroughly established and where it has arrived at undoubted success is British Columbia. Here there are approximately 5,000 of these animals, which have increased to these proportions from an original herd of 200 head imported from the United States in 1917, whilst a goat breeders' association in the province formed in the same year with a membership of 176, now has more than 400 adherents.

With its favorable conditions in many sections there seems no good reason why the Prairie Provinces should not have a flourishing goat industry, especially since this pursuit has proved so profitable in the province across the mountains. Alberta has at length its pioneer in W. A. Schroeder, who came from Switzerland and settled near McLeod, and has since been engaged in proving the feasibility of the goat-breeding industry in Southern Alberta and the profit to be found therein, which he would seem to have done conclusively.

He has one hundred goats, and with this substantial herd is following along the same principles of domestic dairying that have for generations been so successful in Switzerland. He is making fifty pounds of butter and

cheese every week, which he sends to the McLeod and Calgary markets, where it sells on even terms with the ordinary dairy brands. An advantage in this industry lies in the claim that one gallon of goat's milk will make as much cheese as two gallons of cow's milk, and each animal averages a quart at a milking.

Goats are easily raised in Alberta, according to Mr. Schroeder, who first experimented with sheep, especially on hilly or broken land such as is found in certain sections of the province. They are economical to keep because they feed largely on brush and weeds, the snow offering no deterrent to rustling, whilst they seldom fall victims to coyotes. The meat of the goat comes under the class of wild game, and from ten to twelve pounds of tallow are produced from each carcass. The pelts when well tanned are waterproof and have a good commercial value.

Mr. Schroeder's experiments have been watched with a good deal of interest throughout Alberta and his present herd is in rather general demand for foundation stock for other herds. Some have gone as far north as the Peace River country, where a miniature goat-dairying industry is in process of being established. Now that it has secured its start and certain proven advantages have been proven for it, there is every possibility of the goat-raising industry becoming established on the prairies of Western Canada.

Canadian Trade With Italy

Following the recent trade treaty concluded between France and Canada and as another phase of the preferential trade program arranged for in Europe by Canadian ministers, the terms of a similar favored nation treaty between the Dominion and Italy are announced. Though the clauses are brief they are extremely full and comprehensive, and apparently all that either country could desire to foster a mutual expansion of trade. Canada's export trade with Italy has undergone a surprising expansion, especially since the outbreak of the war, and the treaty is calculated to further stimulate this traffic, and at the same time, through facilitating the entry of Italian goods to Canada, augment the volume of the Dominion's imports from that country. The effects of the new treaty are generally summed up in the concluding clause, which states that in all matters governing the import, export and transit of merchandise Italy grants to Canada and Canada grants to Italy the treatment of the most favored nation. Articles, the produce or manufacture of Canada, imported into Italy and similar Italian commodities imported into Canada, shall not be subjected to higher or other duties than those paid on the same commodities from other countries, and similarly no prohibition or restriction shall be mutually imposed which is not equally extended to other countries. Articles from either country passing in transit through the country of the other shall be reciprocally free from all transit duties

whether they pass through direct or are unloaded.

In the last fiscal year Canada's total trade with Italy amounted in value to \$16,723,188, of which exports amounted to \$15,325,518 and imports to only \$1,397,670. Almost the entire volume of exports was attributable to vegetable products, consisting mainly of grain and flour, which had a value of \$14,543,767, whilst the other two important items were animal products, which totalled \$671,214, and non-metallic minerals, totalling \$105,625. Curiously Canada's greatest item of import was in vegetable products, amounting to \$747,480, followed by fibre and textiles to the value of \$322,088 and non-metallic minerals worth \$117,904.

A survey of Canadian-Italian trade in the last fifteen years or so discloses the fact that whilst Canada's import trade has remained more or less at a standstill there has been a surprising increase in the volume of the Dominion's export trade. In the year 1910 the total volume of Canadian-Italian trade was \$1,774,751 in value, of which Canadian imports accounted for \$945,243 and exports \$829,508, giving Italy a small favorable trade balance. By 1915 imports from Italy had increased to \$1,507,548 and exports to \$1,840,910. By the year 1920 imports had declined to \$999,040 and exports increased to the surprising total of \$16,959,557. While in 1921 there was only a relatively small increase in the value of imports, export value had increased by more than three times and amounted to \$57,758,343.

Splendor in Excess.

"The first carpet ever seen in a Nevada town," says an old-timer, "was in a person's house. One day a little money came from the preacher's home folks back East. With it the person bought the carpet; his wife spun it, had it woven and painted over in oil colors, with a gay border around the edge and groups of flowers in the centre."

"When the carpet was laid, the people were astounded at the magnificence of the preacher's parlor. One old chap, stopping at the door, was afraid to enter."

"Walk in," said the parson.

"I can't," said the old fellow, "without steppin' on it. Do yo' think," he added, in wondering admiration, "ya kin have all that and heaven, too?"

Reassuring.

Anxious Old Lady (on steamer): "I say, my good man, is this boat going up or down?"

Surly Deckhand: "Well, she's a leaky old tub, ma'am, so I shouldn't wonder if she was going down. Then, again, her b'ilers ain't none too good, so she might go up."

Different Names.

The star group Usa Major is known in this country as the Great Dipper, in England as the Plough and in Germany as the Wagon.

Hopeless Struggle With An Irregular Plural.

A young woman who lives in Washington recently returned from abroad. She was describing her experiences in mountain climbing to a friend who is in the diplomatic service.

"Ah, mess," said the foreign diplomat, "so you climb at mountain. Zat was a lot to be proud of!"

"Pardon me, count," said the American girl. "I think you mean 'feet.'"

"O-oh," exclaimed the count with fresh admiration. "So you climb him more than once?"

Up But Not Ready.

Companion: "Get up, Clara, get up at once. A man has broken into the house!"

Miss Fanny: "I'm up, my dear, I'm up! But what have you done with the rouge box, I'd like to know?"

Canadian Hydro Development in 1923

The Dominion of Canada, with a total of 13,255,000 horse power available under conditions of ordinary minimum flow and 22,076,000 horse power dependable for at least six months of the year, takes second place to the United States in her possession of available water powers. In the amount of power available per capita of population, the Dominion occupies the second place, following Norway, and fills the same relative position in respect to that country in per capita power development. Canada's water-power development is substantial and in the main adequate to the country's requirements, but by reason of the Dominion's vast available resources, amounts to only seven per cent. of such present recorded water-power resources.

In the past ten years the yearly increment of new power made available has averaged 180,000 horse power. In the year 1922 Canada developed three million horse power of electrical energy from its water powers, considerably over the decade average. This was divided as follows:—Ontario, 1,330,000 h.p.; Quebec, 1,100,000 h.p.; British Columbia, 210,000 h.p.; and the remainder among the other six provinces. It has been estimated by the Federal Water Powers Branch that at the end of the last year the horse-power development in Canada per thousand of population was 337, the total capital invested in development \$620,653,731, and the estimated revenue from development \$51,600,000.

Increasing Industrial Demands.

The exceptional amount of new power development in 1922 was made necessary by the great demand arising from industrial establishment, and for the same reason, the year 1923 is from all indications to be an outstanding year. The present year promises to make a record in the location of new foreign industries, and new electrical development must keep pace with industrial progress. Canada offers many inducements to manufacturers in other lands to locate within her confines, and one of the greatest is that of cheap and dependable power. Thus the city of Winnipeg has achieved the distinction of providing manufacturers with electrical power at a lower rate than any other city on the continent, and

rates throughout Canada can generally be stated to compare very favorably with those of other countries. To maintain this prestige much development will be undertaken in 1923.

Among the larger hydro developments undertaken in the past year or previously, which will be continued in 1923, are the Queenston-Chippewa in Ontario and the Great Falls in Manitoba. The main work of the Queenston project, which is part of the Niagara development, which with its 600,000 horse-power capacity, will be the largest electrical plant in the world, was completed in 1922, but the facilities are to be continually extended to the utilization of the maximum power.

The development progressing at Great Falls, on the Winnipeg River, is the largest hydro undertaking west of Niagara, with an ultimate capacity of 163,000 horse power and to cost ten and a half million dollars.

New Development.

A new corporation, financed by American capital, the St. Maurice Power Company Limited, is to develop the Gros Falls and Gabelle Rapids on the St. Maurice River, in Quebec Province, having obtained

leasehold power rights to these. The total installed capacity of the development is placed at 120,000 horse power and the capitalization of the company is in the neighborhood of \$10,000,000.

Another Quebec development will be undertaken on the Riviere des Prairies where 50,000 horse power of electrical energy is to be developed by the Back River Power Company, at a cost of from six to seven million dollars. The Provincial Government has recently granted a sixty-year lease on the river rights to the company. Through arrangements completed between the Quebec Government and the Quebec Development Company, Canadian and American capital will combine in the building of a great dam at Grand Discharge from Lake St. John, the headwaters of the Saguenay River. With an initial unit of 200,000 horse power it is expected the project will eventually be developed to produce 1,000,000 horse power. Further hydro development in Quebec Province will be accounted for by the Southern Canada Power Company, which is initiating another large power development on the St. Francis River, which will produce 30,000 horse power.

The Great Northern Power Company Ltd. has been organized in Ontario to furnish the gold mining industries of the northern part of the province with power and assist in the general development of the territory. The company has under way the initial unit of a plant on the Montreal River, and it is expected that this first power unit of 2,150 horse power will be ready for distribution early this year.

Further Probable Development.

An important project which may materialize, is the development of Great Falls, the largest single water power in New Brunswick. It is estimated that with the minimum expenditure which could be made in harnessing the falls there would be available about 30,000 horse power. By adding storage facilities the power would be increased to 50,000 horse power, and by taking advantage of storage facilities at the headwaters of the St. John, the power output could be increased to 80,000 or 85,000 horse power. Preliminary investigations have been under way by the Provincial Government for some time and the

year may see actual development started.

In 1923 large property holdings along the shores of the Gattineau River were acquired by the Hull Electric Company, which intends establishing a hydro-electric power plant this year with an ultimate capacity of 150,000 horse power, the cost of construction of which is estimated at \$10,000,000. This is to be completed in two years. In the Province of Alberta there is a proposal by the Alberta Hydro-Electric Company to construct a plant at the Bow River, east of Calgary, to consist of four dams, the first of which will cost half a million dollars.

There are several new power developments projected in the province of British Columbia. Canadian Westinghouse is said to be planning the building of a great power plant at Benson Lake, to sell power to a proposed pulp and paper plant, and to Seattle power consumers. Contracts have been signed for the installation of a 5,000 horse-power addition to the existing hydro-electric facilities at the Anox smelter of the Granby Consolidated Mining, Smelting and Power Company, to cost in the neighborhood of \$200,000.

While the developments here noted comprise only some of those of which notice was given prior to the conclusion of the past year, and there will doubtless be many more projects initiated in the course of the coming months, they are sufficient to indicate that the year 1923 will be an outstanding one in hydro-electric development. As new electric development means the exhaustion of available supply within sight, the new undertakings on such an extent are a fairly accurate gauge upon which to measure Canada's industrial progress. With such an expansion to electrical power being effected, an unprecedented development of the Dominion's industrial enterprises is confidently anticipated on all sides.

Perfectly well-meaning Old Lady: "Thank you so much for your song, my dear. It took me back to my childhood days on my father's farm. When I shut my eyes and listened to your singing I seemed to hear the dear old gate creaking in the wind."

A GOOD SETTING.

John McFaul & S

Abraham Martin Honored

Monument to First Scottish Settler,
First King's Pilot On the St.
Lawrence, and First Farmer
On the Plains of Abrah-
ham Unveiled.

A Quebec recently the Hon. Athanasius David, Provincial Secretary in the Quebec Cabinet, officiated at the unveiling of a monument erected by the Canadian Pacific Railway Company in memory of Abraham Martin, who was the first known Canadian of Scottish descent and the first King's pilot on the St. Lawrence River. The Plains of Abraham received their name from him, he receiving a grant of the land from Champlain in 1617. The unveiling of the monument, a handsome granite shaft seven feet high surmounted by a globe supported by thistles, was an important event and was attended by a large number of prominent citizens and political representatives.

The sturdy pioneer is further acclaimed by Andrew Patterson, who says:—

ABRAHAM MARTIN.

Auld Scotland many a hero boasts
From John o' Groats to Wigton's
coasts,
Both Lowland lads and Highland
hosts

That wear the tartan;
But now another seeks your toasts,
Old Abrah'm Martin—

But what pretence has he to fame,
That we should celebrate his name,
And thus in stone and bronze pro-
claim

His style and story?
A threefold plea can Martin claim
To all this glory.

The first of Scotia's sons was he
To cross Atlantic's stormy sea—
True pioneers of liberty,
Giving their best

That this Dominion fair might be
Blessing and blest.

See in his wake the glorious band,
MacKenzies, Frasers, foremost stand,
MacDonalds, too, in high command,
And James McGill,
Mountstephen and Strathcona grand—
'Twould pages fill.

The first was he to till this plain,
Now sacred to that fierce campaign
When heroes fell, but not in vain
In glorious strife.

O Canada, thine was the gain,
Renewed thy life!

He was the first to mark the tides,
The rocks, the shoals St. Lawrence
hides—

The mariner in him confides

And bans his fears;

"The ship," he cries, "in safety rides
When Martin steers."

Though fate 'mong strangers cast his
lot

He ne'er forgot he was a Scot,
Thrifty and shrewd he was, I wot,
Canny and gaudy.

Proud of the nickname that he got,
"Abrah'm l'Ecosais."

Let us whate'er our race or creed,
This ancient Scot's example heed,
And give the best that's in our breed
That ours may be

A Canada in word and deed
High-souled and free.

—A. Patterson.

More Hebrideans Canada Bound

Waving farewell to loved ones on the Metagama.

fate was not more kind to them after they had settled here. Forty-five of their number were carried off by fever in the first year and the war of 1812 wiped out the settlement, homes, stock and crops.

In 1812 Lord Selkirk's agent, Colin Robinson, of the Isle of Lewis, persuaded a number of his fellow islanders to whom the abolition of the Clan system had brought high rents and misery, to settle in the Red River district. This party encountered the hostilities of the Indians and, through their industry and progression, the jealousy of the white traders. When the settlement was wiped out on one occasion and many of them wiped out, the remainder were forced to leave. However, they returned in time to harvest the first western wheat crop and many attribute to this fact that Winnipeg stands where it does to-day.

Life will not be a bed of roses for those who have newly arrived and they will have to work, and hard; but this they can do. They are the descendants of the "lords of the isles" who by strength of arms repulsed the invasions of the Scandinavians and Scots. Social and industrial development was retarded to a great extent by the clan system, but those who have adopted Canada are well educated and a simple life of toil in adversity through generations has given them a splendid physique and simple dignity. Although forced by hard times to leave their homes to make new ones, most of them are in sufficient funds and not a few families aboard the Metagama were possessed of over £1,000. Some have stopped in Ontario but the larger proportion of them have gone to Red Deer, Alberta, where they will form a small colony.

Stock Farm For Sale.

LOCAL NEWS.

Mr. Chas. Miller spent the week-
end at 16 Island Lake.

Mrs. T. Christie is spending a few
days in Montreal this week.

Miss Gladys Shaw of Montreal was
a week-end guest of her mother.

Mr. and Mrs. John Mackie, of Mont-
real, were week-end visitors in town.

Miss Jessie Cruise of Montreal was
a recent guest of her parents for
a few days.

Mrs. MacNeil returned home last
week after spending a pleasant visit
in Montreal.

Mr. and Mrs. A. Bishop and Miss
M. Buchan spent Sunday with friends
at St. Lambert.

Mr. and Mrs. J. R. Parria and son
are spending the week at their sum-
mer home, Lake Fraser.

Mrs. Geo. Hunter and daughters, of
Montreal, are spending this week the
guest of Mrs. A. MacArthur.

Mr. Harold Hunt, who has been
visiting friends in town left for his
home in New York on Wednesday.

Mr. and Mrs. Stewart and little
daughter Pearl were guests of Mr.
and Mrs. J. S. Giles for the week-end.

Mrs. Robt. Miller and family were
in Montreal on Tuesday, attending
the wedding of her nephew Mr. Jas.
Beach.

Mrs. Geo. Leggett and children and
Mrs. Geo. Graham left this week by
S. Ship Melita to spend the summer
in England.

Mrs. V. Collins and daughter left
on Friday for a two weeks visit in
New York. Rev. Mr. Collins and son
accompanied them to Montreal.

Mrs. Lamb and children, of Buck-
ingham, and Mr. Keith Christie and
Miss Norah Christie of Montreal were
week-end visitors of Mrs. G. Christie.

In the Albert Hall, showing Wed-
nesday, May 30th. "The Half-Breed"
in 6 reels. A beautiful Western and
Indian Play. Admission 22 and 27c.

Congratulations are extended to
Mr. Stewart Campbell, who has been
appointed District Deputy Grand Mas-
ter of the I.O.O.F., for the coming
year.

Mr. E. Fairbanks, of Ottawa, who
has been spending the past week as
the guest of his daughter Mrs. P.
Monette, returned home on Sunday
last.

Mrs. J. R. McOuat and Miss Gladys
McOuat returned home from a pleas-
ant visit to Montreal on Monday and
were accompanied by Miss Morrison
who is their guest this week.

day only — Men's Military Working
Boots, all guaranteed solid leather,
regular price \$4.50 at sale price of
\$3.50. Saturday and Monday only.
Real Bargains. We do all kinds of
Repairs and prices right.

The Senior C.G.L.T. of the Pres-
byterian Church held a most success-
ful tea and sale of ice cream on Sat-
urday afternoon last, in aid of the
Crippled Children. The tables and
booths were prettily decorated with
blue and gold bunting, and looked
most dainty and inviting. The girls
were encouraged by the proceeds of
\$25.00.

Mr. Russel McKimmie, who is Sec-
Treas. of the Mabel and Ogdensburg
Telephone Company, received a most
delightful surprise on Thursday of
last week, when a number of the
subscribers with their wives visited
him and presented him with an ad-
dress of appreciation and a beautiful
oak writing desk. A very pleasant
social evening was spent. Mr. and
Mrs. Russel McKimmie, while thank-
ing those who were present, wish to
thank all others who contributed but
were unable to come refreshments
served.

St. Simeon's Girls Branch of the
W. A., will give a Dorcas Tea at
Victoria Hall, June 2nd, 3.30 p.m.
(Standard Time).

Mrs. Ferrabee, Diocesan President,
will address the meeting, and 16 girls
from the Various Montreal Branches
of the W.A. will give a play entitled,
"The W.A. Impersonated."

All are cordially invited. If you
have not received an invitation, you
may get one as you enter the hall.
Admission according to your waist
measure 1c. per inch.

The School room of the Presby-
terian Church was well filled on Friday
evening last, with an interested au-
dience when the girls of the Pres-
byterian's Gymnasium Class, of which
there are 46, gave a review and dis-
play of their work during the past
year. Each item on the programme
was well rendered and received with
well merited applause. Miss Verda
Kettye who has faithfully trained the
girls was presented with a beauti-
ful basket of carnations and the
proceeds which amounted to \$25.50
will be used for apparatus for the
coming year.

Mr. R. E. Carkner is spending this
week with friends at Ste. Agathe.

Principal Nichol, of Buckingham
High School, was a week-end visitor
in town.

— : —
Sunday School Convention.

The public is requested to remem-
ber the Sunday School Convention to
be held in the Presbyterian Church
on Saturday, May 29th., beginning at
10 a.m. (Standard time.)

A good programme has been pre-
pared and distributed to the various
Sunday Schools through the hands of
the ministers, who have been request-
ed to announce the convention to their
people.

Rev. Mr. Reid, of Montreal, will dis-
cuss the "Organization of Our Sun-
day Schools," with regard to the work-
ing of the graded lessons.

Mr. John L. Hodgson will discuss
the "Sunday School Programme for
the Teen-Age Pupil."

Rev. T. W. Jones, of Montreal, will
speak on "Our Privilege and Oppor-
tunity in Our Work for the Young."

A collection will be asked to each
session to defray necessary expenses.
Parents, Young people and Sunday
School teachers are especially request-
ed to attend.

Town Council

A special meeting of the above
Council was held in the Town Hall
on Wednesday last at which all the
Council were present. The Session
was presided over by Mayor W. M.
Scott.

The question of daylight saving
was again brought under discussion,
and after much deliberation it was
decided to abide by the former action
of the Council and remain at the old
time, those opposed to daylight sav-
ing being Councillors Dallaire, Charle-
bois, Lemay, Dobbie and Larocque.
Those in favor of daylight saving were
Councillors Gail, Jousan, Creswell and
Morrison.

Complaint was made to the Coun-
cil of the unsanitary condition of a
house in the late off Clyde Street,
and the proprietor was notified to
have same immediately remedied or
an appeal would be made to the
Provincial Board of Health.

MORIN HEIGHTS

A number of the Lake Echo Cot-
tages are already occupied.

Mr. W. J. Pollock, of Mille Isle, is
busily engaged in town this week.

Rev. H. Jekill and family are to
spend the last half of this week in
Morin.

Mr. F. Watson, the new proprietor
of the Strathcona House, is erecting
a commodious hall on his grounds.
Messrs. Syvret and Hunting have
rented the Boyd's restaurant and have
started the sale of ice cream and etc.,
this week.

The Laurentian Rest Building is
nearing completion of enlargement
in anticipation of accommodating a re-
cord number of summer guests.

There are rumors reimportant
moves in the near future by our An-
glican Clergyman but as they are
not verified will not be reported for
the present.

Representatives of the Presby-
terian Social Service Work of Montreal
were in town lately looking for a
site for a children's camp. They
were much pleased with the locality,
and are reported as being success-
ful in their quest.

The three fold play given here a
month ago, was repeated in Davis
Hall Saturday evening, and was keen-
ly enjoyed both by those present
for the second time as well as the
first. A full house at Shawbridge
enjoyed the same programme Friday
evening.

CHURCH NOTES.

Services in the Baptist Church, La-
chute, on Sunday, May 27th, will be
at 11 a.m., conducted by Mr. James
McDermott, and at 7.30 p.m., con-
ducted by Rev. G. Victor Collins (fare-
well sermon.) Sunday School at 9.45
a.m. All Daylight Saving Time.

Presbyterian Church Services will
be held next Sunday, May 27th, as
follows: in Lachute at 11 a.m., and
7 p.m., and in Brownburg at 8 p.m.
(The above on Daylight Saving
Time) and in Upper Lachute at 11
a.m. (Standard Time.) Rev. A. Geo.
MacKinnon will conduct both services
in Lachute. Mr. A. O. Lloyd will
conduct those in Upper Lachute and
Brownburg.

A congregational meeting of the
Presbyterian Church has been called
by the session for Tuesday evening,
May 29th, at 8 o'clock. (Standard
Time) in the Church to discuss the
present situation with regard to
Church Union. Rev. D. Dickie and
Rev. M. Campbell, of Montreal, have
been invited to present the situation
from the point of view of those op-
posed to Church Union, and Rev. S.
T. Martin and Rev. Dr. George Han-
son also of Montreal have been invit-
ed to present the other side. All
members and adherents of the con-
gregation urged to be present.

VITAMINES FOR DAIRY COWS.

It is known that milk contains in abundance those mysterious, little understood, vital principals called vitamins, which seem to have so much to do with life itself.

So essential are these vitamins that lower animals, like rats, rabbits, guinea pigs, etc., soon die if a sufficient quantity is not contained in their ration. So vital are these vitamins that it was observed in the great war that soldiers having a ration containing butter recovered from their wounds much sooner than those deprived of butter. Hence it is, that dairy products are becoming more universally used in our diet than ever before.

Now it is learned that cows' milk has a greater number of vitamins in summer than in winter, presumably due to the fact that they have greater access to sunlight in summer than in winter, and that they have more green leaves of plants in their rations. From this fact it is to be observed how very essential it is to have a well-lighted stable, one with plenty of windows to let in the sunlight. Also, how important it is to secure forage crops for winter feeding in such a manner as to preserve the green leaves, as in clover and alfalfa hay and the corn plant for silage and to be fed in the dry state. Some people have seemed to think that the leaves of plants, because they did not weigh very much, were of little importance to the ration; but now we know they contain these vital principals.

Just recently it has been shown that if cows are given cod liver oil in their ration in winter, the number of vitamins in the milk is greatly increased. Cod liver oil contains these vitamins in abundance, the cod getting them from the green leaves of sea weed. Hence the vitamin can be maintained

in milk during the winter by adding the oil to the cow's ration.

But it will be much better and more economical to furnish the vitamins to the cow in her regular food than to feed her cod liver oil. Certainly if the practice should become common, the price of the oil would so advance that it would become prohibitive.

The first thing to do is to have the stable well lighted and well ventilated. This allows the cow to function normally.

The next thing is to prepare forage crops that they will retain their leaves.

If clover is cut and allowed to lie in the swath in the hot sun until nearly all the moisture evaporates, the leaf and stem become very brittle and when handled the majority of the leaves drop off. But, if raked soon after it is cut while only in a wilted state and put in cocks immediately and allowed to cure in these cocks, even if it takes several days, the leaves are tougher and adhere to the plant more tenaciously and are saved.

If one has hay caps to cover the cocks with they have ideal conditions. However, if the clover is put in cocks before it dries too much, it will settle down more compactly so it will shed rain more readily and in case of wind will not blow over to be exposed to the weather.

When the clover, or alfalfa, is in proper condition to cut, it should be cut at once, whether you have five acres or forty, and immediately put in cocks. Then when cured it can be drawn into the barn with the least loss of leaves. This gives the hay the greatest degree of palatability, the largest percentage of digestible nutrients, and, not of the least importance, an abundance of those essential vitamins.

Then we will not have to feed cod liver oil to get normal milk.

Building Up Bee Colonies.

It is essential that every beekeeper should have all his colonies in the best of condition, i.e., strong in bees of the right flying age at the commencement of the main flow in order that the largest possible crop may be harvested.

The first step, then, in building up should be taken toward the end of the honey flow, about the last week in July or first in August, when the beekeeper should see that each colony is headed by a vigorous young queen so that plenty of young bees may be reared for the winter. Should no nectar be coming in, it might be necessary to stimulate brood rearing by feeding; especially is this necessary for nuclei.

Later, he should see that all colonies contain an abundance of whole-some stores, and that the bees have adequate protection from the cold, in order that they may winter with as little loss as possible.

Despite the best of preparations for winter, it will sometimes be found when the colonies are removed from their winter quarters that they are low in vitality and vary greatly in strength.

To conserve their vitality cellar-wintered colonies should when brought out be protected where possible, also they should be shielded by some sort of windbreak.

Unless lots of stores are present in the spring colonies will build-up but slowly. It will, therefore, be necessary early in the season to see that all have sufficient stores of honey. In most localities there is ample pollen. Combs of honey should be placed, after breaking the cappings, one on each side of the brood nest. Should spring flowers fail it might be necessary to feed to prevent brood-rearing being curtailed. In localities where pollen is not abundant, combs containing it should be saved and given in the spring.

The problem of the beekeeper, then, is to bring the medium colonies up to the strength of the strong ones. This may be done by uniting weak colonies to them or by giving a comb of sealed brood with adhering bees.

If desired, a weak colony may be built up by placing it above a strong colony with an excluder between them. No entrance is provided above. This is best done in the evening. First remove the cover and allow the cool air to cause the bees of the strong colony to recede. The weak colony is then gently placed above without the use of smoke. Three weeks later the upper colony, now quite strong, is removed to a new stand.

Water is required early in the spring for brood rearing until new honey is coming in, and unless a natural supply is near the apiary it should be furnished.

That the queen be not crowded for room in which to lay, an extra super should be given when the bees are filling all the spaces between the frames in the brood chamber. The bees also should be made as comfortable as possible by giving them ample space in which to store.

Should increase be desired, the colonies may be divided as soon as the hives are full of bees.

Warm the Tar-Paper Before Putting on Roof.

Some years ago we had occasion to repair a shingled roof with tar-paper and, as the weather was somewhat cool, a few rolls of paper were placed near the stove to warm them so that they could be more easily handled. In the haste to finish the work, however, some of the rolls were used without

A Cloak for Brides.

Something entirely new for the bridal trousseau is a cape of hyacinth pink baronet satin with lusted peonies under its draped bolter collar.

this precaution, and to-day the difference in the wearing qualities of the two is plainly visible. The rolls of paper that were applied while warm are in good condition while the others are buckled, checked and cracked in many places.

As an explanation of this, the workman who did the repairing says the warm paper shaped itself to the rough surface beneath before hardening. Also, that the paper applied while cold and stiff naturally cracked more or less in handling; and, since it did not accommodate itself to the surface of the old roof, it was subject to further wear from the wind and weather.

—G. E. H.

Poultry Record of Performance.

A correspondent wants to know what he shall do in order to enter the Record of Performance for poultry, established and conducted by the Poultry Division of the Dominion Live Stock Branch, Ottawa. First, he must send to the Division for entry forms and a copy of the rules and regulations. He can do this without placing any stamp on the envelope containing the application. He also wishes to know how many eggs a bird has to lay so as to qualify for a certificate. For an R. of P. certificate she must lay 150 eggs in 52 consecutive weeks and for an advanced certificate 225 eggs in 52 consecutive weeks. The eggs must be up to the grade "specials" in the Canadian standards, and after April 1, must average over two ounces in weight.

Spring paint on old furniture covers a multitude of sins.

COMMON DISEASES OF THE STRAWBERRY AND THEIR CONTROL

Leaf spot, leaf blotch, etc. There are two fungus diseases causing a spotting or blotching on strawberry foliage. One is called leaf spot; the other a leaf scorch. The leaf spot is readily recognized in the field by the small circular areas scattered over the leaves. At first these are purplish but later become greyish or brownish in the centres shading to reddish brown towards the margin. The margin itself remains purplish.

The leaf scorch disease is first observed as small reddish purple spots appearing on the leaves, petioles and fruit pedicels. On the leaves these areas gradually increase in size and finally coalesce to form irregular blotches, sometimes covering the entire leaflets. They remain dark in the centre and hence are easily distinguished from the leaf spot which has a light grey or brown centre. On the petioles and fruit pedicels, sunken lesions are formed which frequently girdle these parts and thus weaken if not kill them.

Control. These two diseases are controlled by the same operations. When setting out a new patch, old leaves showing symptoms of either disease should be removed. If all the foliage is affected it is better to discard the plants. As soon as the first symptoms of either leaf spot or leaf scorch appear in the field spray immediately with Bordeaux mixture, using a 4-4-40 or a 4-6-40 preparation. Keep the plants well covered with spray throughout the season; spraying every two or three weeks if necessary.

The following season spray thoroughly with the same material before the blossoms open, in order to protect the plants until after picking. Then apply another covering of Bordeaux at

that time so that the young developing leaves may be given every protection. It is essential to keep the leaves comparatively free from disease in order that they may function properly and store up food for the crop of fruit the following season. The second year if either of these diseases is present, spray before the blossoms open and again after the fruit is picked. The plants are usually plowed down after the second crop.

Powdery Mildew. During the early part of the summer another disease is found affecting the strawberry foliage. This is also a fungus disease—powdery mildew. The symptoms are a curling upward of the margin of the leaflet along the mid-rib so that the under surface is exposed to the sun. Following this a white, powdery fungous growth appears on the under surface of the leaves. The growth thus formed produces reproductive bodies throughout the remainder of the season which are carried by the wind to other leaves and plants, thus spreading the disease.

The best means of controlling mildew is to dust with sulphur, using an 80-20 mixture, as soon as the first symptoms of the disease are observed. Repeat the applications every week or ten days if necessary. This dusting will also aid in the control of the strawberry weevil which proves troublesome in some districts.

Root Troubles. There are various diseased conditions of the roots encountered in strawberry culture. Included among these are winter injuries as well as root rot. As yet no satisfactory means of control have been found but a good winter mulch has proven useful to decrease materially the losses from such troubles.

There's time in the package

Time to do the many things ordinarily put off on wash-day. For Rinso does not keep you standing over the wash-tub, rubbing until your back aches and your hands are red and sore.

Rinso, an entirely different kind of soap, soaks clothes clean. Rubbing and boiling are unnecessary. The big soapy Rinso suds gently loosen the most ground-in dirt without weakening a single thread.

THE CHILDREN'S HOUR

TO THE GREAT CITY.

Once there was a little gray pony which longed to go to the great city and see all the sights. He had often set out in gay spirits, prancing this way and prancing that way, but he had never gone anywhere near the great city.

One day when he was prancing this way and prancing that way he heard a great sound. For an instant he stopped and listened. The sound came from the swaying branches of an oak tree.

"Where do you want to go, little gray pony?" it asked.

"To the great city to see all the sights," replied the little gray pony and began to prance again.

"Very well," said the great oak tree. "Stop prancing this way and that way and go straight ahead. Then you will surely find the great city and see all the sights."

"Thank you," said the little gray pony. "I will do it."

But he didn't do it at all. He kept right on prancing this way and that way, and so of course he didn't reach the great city that day or see any of its fine sights.

A second day the little gray pony heard another great sound as he was prancing this way and that way. He pricked up his ears and stopped again. Was he hearing sounds from the great city? No, it was the great voice of the sea as its waves splashed noisily on the shore.

"Where do you want to go, little gray pony?" it asked.

"To the great city to see all the sights," replied the little gray pony.

"Very good," answered the great sea, "but you must stop prancing this way and that way and go straight ahead. Then you will certainly come to the great city and see all the sights."

"Thank you very much," said the little gray pony, "I will do it."

But he didn't do it at all. He kept right on prancing this way and that way, and so of course he did not reach the great city that day or see its wonderful sights.

A third day the little gray pony was prancing this way and that way when again he heard a sound, this time, gentle and soft, the voice of a child. The little gray pony stopped prancing to listen.

"Oh, where are you going, you dear little gray pony?"

"I am going to the great city to see all the sights," said the little gray pony, beginning to prance this way and that way again.

"That would be fine," answered the child, "but don't you know you can never reach the great city by prancing this way and that way? Let me get on your back and I will guide you straight ahead, and then we shall surely come to the great city."

So the little gray pony let the child climb upon his back, and together they went straight ahead until at last they reached the great city and saw all the wonderful sights.—Mary L. T. Tufts in *Youth's Companion*.

Valuable Bull Died from Eating a Nail.

The recent death of a \$50,000 bull from this cause ought to provide food for thought for the man who persists in leaving loose nails scattered around his farm. Nails are mighty useful things, but their usefulness ceases when they are left scattered around the granary or feeding room. Nails may be kept to advantage in a box with compartments. The compartments make it possible to have the nails sorted all the time. The time it takes to install a nail storage is amply repaid when you want nails of a certain size in a hurry.

Children often scatter nails about, if they know they ought to keep the nails in order, they will do so and not only save a great deal of trouble, but also learn habits of orderliness.

The best time to get rid of the scrub bull is to-day.

It is not true, as sometimes is said, that acid phosphate increases soil acidity.

To the lover of nature the wild flowers of the Canadian Nation parks are a constant source of delight. Strange as it may seem the flora of the higher altitudes is among the most beautiful in the world.

OLD CHUM

The Tobacco of Quality

Surnames and Their Origin

COSGRAVE
Variations — O'Cosgrave, Cosgreve, Cosgreave.
Racial Origin—Irish.
Source—Given Names.

If your name is Cosgrave, and the name comes down to you from "the old sod," you may be a scion of either one or two of the Irish clans, for two entirely different Irish clan names have been Anglicized into the form Cosgrave.

One of these, like the Hogan clan, was a branch of the more ancient O'Briens, being founded, in fact, by the grandfather of the chieftain from whom the Hogans took their sept or clan name. This chieftain, the grand-sire of "Ogan," was called "Cosgrach."

The other clan, which bore the name of "O'Cosgrighe," had no connection at all with the O'Briens and the Ho-

DURKIN
Racial Origin—Irish.
Source—A given name.

Here is a family name which you might be pardoned for taking as English, for it has a truly English sound to it. Possibly it would not look so English to you, however, if you saw it spelled "O'h-Dobharcon."

But you won't find the sounds so different if you pronounce the Gaelic form of the name as it should be pronounced, with a silent "h."

This clan name, derived at some period in the Middle Ages from the name of the chieftain under whose leadership the clan formed, is but the regular development from the given name of "Dubharchu."

The Durkins were a branch of the more ancient Macnamara clan.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Mollie Cadotte, Makamlik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Eyes of the Blind.

I have a friend, the sweetest friend That ever you could find, And though he lights the way for me, They tell me he is blind.

But, oh! I know my friend can see Much more than I or you; We are the sightless: he is blessed With visions ever new.

So quiet, so serene his face, His smile so quick, so bright— He sees beyond the things we touch And needs no earthly light.

His spirit bears him on, although He knows not night from day; The shining beauty of his soul Lights all the darkened way.

Our feeble eyes that have not seen The glory yet to come, Can never follow such as he When he shall reach his Home.

The joys to us so new and strange, The radiance and the song, To him will be but old-time things That he has loved so long.

Soul blind and groping for the peace That he—who sees—has won, We know when we would guide his steps

"Tis he who leads us on."
—Ella Grandom Smith.

Biddy—"O'll mention it to the hens at wanst, mum."

Pretty teeth make a smiling woman.

Minard's Liniment used by Physicians.

Britain's Strangest Colony.

One of the strangest colonies in England is that of South Shields, where, in a part of the town near the river, a large number of Arabs have found a permanent home.

The colony stretches for a considerable distance along the dockside, and there are several hundred alien inhabitants. To walk through the principal street is like visiting an Eastern city. There are Arabian butcher shops, lodging-houses, and eating-houses, while most of the pedestrians are Arabs.

Arabic signs adorn many of the shops and houses, while here and there a sign has been "done into English" with comical results. Then there is one notice to the effect that Mr. Said Hassan's premises are a "licensed women's Arab lodginghouse."

Most of the Arabs came to this country as seamen during the war, and since then many of them, unable to find berths, have found themselves stranded in various parts. There are large numbers of them in Glasgow, Liverpool, and Cardiff.

At South Shields the colony has its own ministers, and at marriages or funerals the strange ceremonials of the East are observed. In the case of funerals, the mourners execute a solemn "death dance" in memory of the departed.

Betrothals and births are signalized by rejoicings, which in some cases extend over several days.

The colony has been considerably depleted recently, as many of the men have succeeded in getting ships and returning home. In some cases, however, the Arabs have settled down with their wives and families, and have found various ways of earning a livelihood.

TO AVOID PAINS OF RHEUMATISM

This Trouble is Located in the Blood, and Relief Comes Through Better Blood.

Rheumatism comes with thin, impure blood, and can only be driven out of the system by enriching and purifying the blood.

The chief symptom of rheumatism is pain. The most successful treatment is the one that quickly banishes this disagreeable symptom. Many rheumatic people suffer pains that could be avoided by building up the blood. The value of Dr. Williams' Pink Pills in rheumatic troubles is proven by the testimony of Mrs. A. Bryson, Arthur, Ont., who says:—"I was so used up with rheumatism in my shoulders and neck that I could not turn in bed without the help of my husband, and the pain at times was almost unbearable. I took doctors' medicine which did me little or no good. Then I began taking Dr. Williams' Pink Pills and have since been free from rheumatism. I can also recommend the pills to young mothers, as in my own case I found they are unexcelled. I may also add that I recommended Dr. Williams' Pink Pills to a neighbor who took fainting spells at the change of life, and who could not walk any distance. She took the pills for nearly three months and they made her a strong well woman."

You can get Dr. Williams' Pink Pills from any dealer in medicine or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Flames Can't Destroy Writing.

Even the careful criminal, who destroys, as he thinks, all traces of evidence against him by burning documents that prove his guilt, is not safe from the long arm of the modern scientific detective; for documents charred in the fiercest fire can now be made to give up their secrets.

A short time ago a document of vital importance was thrown by mistake into the fire. When its loss was discovered it was nothing more than a blackened fragile thing containing not a single word that was decipherable.

An expert was called in, though the owner of the burnt paper had little hope that he could be of any use. Four weeks later the expert returned and handed the owner a clear photograph of the document, with every word as easy to read as on the day it had been written.

The expert knew that photographic plates are acted upon by other things besides light. The ink of the original writing contained chemicals, and even though they had been in the heart of the fire he felt that some of their potency must remain.

He placed the paper between two ultra-sensitive plates and left it for a week. Then he looked to see if there was any result: a few faint marks appeared on the plates, but that was all. Undeterred, he next gave a three weeks' exposure, at the end of which period he was able to deliver the perfect photograph.

It is rather interesting to compare the price per pound of automobiles with the price per pound of other light machinery. Some cars sell for as little as fifteen cents a pound.

Our Longer Life.

Some little creatures have so short a life
That they are orphans born—but why should we
Be prouder of a life that gives more time
To think of death through all eternity?

Time bears us off, as lightly as the wind
Lifts up the smoke and carries it away;
And all we know is that a longer life
Gives but more time to think of our decay.

We live till Beauty falls, and Passion dies,
And sleep's our one desire in every breath;
And in that strong desire our old love, Life,
Gives place to that new love whose name is Death.

—W. H. Davies.

Fish That Sit Down.

Nature never produced a more remarkable creature than the Japanese goldfish.

Though they are called goldfish, their scales range in color from pink to bronze, blue, black, and orange, in shades such as human craftsmen have never succeeded in copying. They have wonderful tails that remind one of bridal veils or fans, and they sit down on these whenever they feel tired.

Nature has provided them with a strange means of defence. Their eyes are telescopic. That is to say, the fish can manipulate them in such a way that they can see what enemy is chasing them, rear or flank. No other creature has such a wide range of vision.

The Japanese goldfish is of considerable value, some of them selling for four or five pounds, and quite a large trade is done. They are imported in specially-built aquariums, heated and ventilated in such a way that the occupants are not affected by changes of climate.

The Source of Thorinaite.

It is said that the mineral thorinaite, now largely used in the manufacture of the mantles for incandescent gas lamps, is at present not known to occur elsewhere than in the island of Ceylon. Its discovery was due to the operations of the Ceylon Mineral Survey. It is exported to Europe and America.

Not Perfect.

An argument between man and wife had been going on for some time, and at last she exclaimed: "I suppose you think I am a perfect fool!"

"None of us, my dear," came the soft answer that does not turn away anger. "Is perfect."

MRS. A. HARBACH GAINS 24 POUNDS

Declares Tanlac Restored Her Completely When Health Was Practically Destroyed.

"The Tanlac treatment restored my health and strength and increased my weight twenty-four pounds two years ago, and I am one of the happiest women in Canada, for I have been feeling fine ever since," declared Mrs. Alice Harbach, highly esteemed resident of 26 Dundas St. W., London, Ont.

"I was so nervous I trembled like one with the palsy and feared a complete breakdown. I couldn't relish my food, many days I didn't eat a thing, and lost weight until my clothes were way too large for me. I had piercing headaches, was so weak I would give out before the middle of the day, and at night just seemed to hear the clock strike every hour. I suffered more agony than tongue can tell.

"But Tanlac ended all my troubles, and if I had my say I would put a bottle in every home. It has won my everlasting gratitude, and I will always praise it."

Tanlac is for sale by all good druggists. Take no substitute. Over 37 million bottles sold.

Chilly Work.

The dear old gentleman got into conversation with a young man.

"And what is your job, sir," he asked, "if I may make so bold as to inquire?"

"I travel in underwear," was the reply.

"How curious!" said the old man, rubbing his spectacles. "And—what a cold job it must be in the winter."

Minard's Liniment for sale everywhere

Stockings Wear Long.

Visitor—"Good morning, Martha, how busy you are, always knitting. Do you find the stockings wear longer if knitted by hand?"

Martha—"Wear longer? Yes, of course, mum. Perhaps you wouldn't believe it, but this pair of my old man's socks I knitted five years ago, and I've knitted new legs to 'em twice, and now footed 'em five times! And, seems to me, they'll never wear out!"

EXCRUCIATING PAINS, CRAMPS

Entirely Remedied by Lydia E. Pinkham's Vegetable Compound

Eberts, Ont.,—"I started with cramps and bearing-down pains at the age of eleven years, and I would get so nervous I could hardly stay in bed, and I had such pains that I would scream, and my mother would call the doctor to give me something to take. At eighteen I married, and I have four healthy children, but I still have pains in my right side. I am a farmer's wife with more work than I am able to do. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and I feel that it is helping me every day. My sister-in-law, who has been taking your medicine for some time and uses your Sanative Wash, told me about it and I recommend it now, as I have received great relief from it."—Mrs. NELSON YOTT, R. R. 1, Eberts, Ont.

Lydia E. Pinkham's Vegetable Compound is a medicine for ailments common to women. It has been used for such troubles for nearly fifty years, and thousands of women have found relief as did Mrs. Yott, by taking this splendid medicine.

If you are suffering from irregularity, painful times, nervousness, headache, backache or melancholia, you should at once begin to take Lydia E. Pinkham's Vegetable Compound. It is excellent to strengthen the system and help to perform its functions with ease and regularity.

RED PIMPLES ALL OVER FACE

Itched and Burned. Face a Sight. Cuticura Heals.

"My face came out all over in little red pimples and then it would itch. I would rub and scratch it and little eruptions would come. They itched and burned and at night would bother me. My face was a sight. I tried different remedies without success and then began using Cuticura Soap and Ointment which completely healed me in two weeks." (Signed) Mrs. Eva M. Toothaker, Cundy's Harbor, Maine, March 13, 1922.

Use Cuticura for every-day toilet purposes. Bathe with Soap, soothe with Ointment, dust with Talcum.

Sample Soap Free by Mail. Address: "Cuticura," Dept. 464, P.O. Box 61, W. Montreal, "Sold every-where." Soap, Ointment 15c each. Talcum 5c. "Cuticura" Soap shows without cost.

The Gateway to Opportunity

To-day not all young people are aware of the value of a savings account as the foundation of future security and prosperity.

A savings account not only provides for the proverbial "rainy day," but very often it is the open gate to an opportunity to get into business, to buy a home or to make a lucrative investment.

No other provision for the future is so sure of results in security and contentment as a savings account.

5 cts. a line for Poetry accompanying Memorial Notices.

EN PASSANT.

"NOTHING MUCH in the paper tonight, George," I remarked in a casual way. I had skimmed over the headlines without being stopped in my flight by anything of arresting importance. Indeed, if the truth is to be told, I did not seem to care whether I got the paper first, last, or in sections, as usual in some families where the alleged head of the house has to take his, or her, turn and be thankful. There are times when I would rather have a smoke and chat with Old George, on his doorstep, than sit down in the peaceful atmosphere of a splendid isolation, to read anything, from Homer's Iliad, to the comic section of the Boston Herald, and, goodness knows, there is plenty in between, to choose from.

"What puts that idea into your head?" said George, looking at me intently over the top of his spectacles. "Oh, ah, I see, well, I think it would be quite safe to put them in now. The danger of severe night frost is most likely past. I set mine a week ago and nothing has happened to them. Yes, I would take the chance if I were you. If they come to any harm, it will not be too late to put in others, and if they get along all right, you will have that grand and glorious feeling that comes when you get a handful of good cards and know when to play them. It's all the same, whether the game is poker, or planting out tomatoes; when you take risks, and win, you feel good, and when the game goes the other way, it isn't your fault, oh, no, it is only your condemned bad luck!"

AFTER a short silence, during which George turned over a few pages of the paper, and seemed to be calculating something, he looked up, and up, and said, "I don't know where you get the idea from that there isn't much in the paper. There's 40 pages containing approximately 420,000 words, four hundred and twenty thousand. Now that should carry something for everybody. It would take me seven working days to read it all through, in my natural tone of voice, and yet you come along and say there's nothing much in it. Passing over this great array of verbiage, just take a look at this little item of only three lines:

It says:- The Queen of Siam is said to have the most valuable thing in the world: - One made of pure gold, and studded with diamonds." Isn't that the apotheosis of needlework! During the war, the women of the Red Cross did a vast amount of sewing, yet I don't suppose there was one gold thimble set with diamonds amongst them. The Queen of Siam has it, and most likely she has no time to use it. It will be tucked away in a velvet lined casket under a glass shade, with her engagement ring, while she is in the kitchen washing up the dishes, or sitting in the parlour eating bread and honey. No sir, the best tools are not always given out to the best workers. That gold and diamond thimble, or a replica of it, was earned in sentimental value by every Red Cross worker who sewed as much as the neckband of a shirt. The dazle of diamonds was replaced by the light of loving kindness, as their nimble fingers plied their tasks, and yet the canonical emblem of needlework lies under a glass shade in Bangkok, while the King, Chulalongkorn, may have to fix up his collar with a pin."

"THE BEST tools do not belong to the best workmen. I know a man who sports a gold mounted fountain pen. You can see it sticking out of his pocket at church, and he carries it around with him when he goes fishing, yet when he writes his name to a receipted bill, you have to make a marginal note of who signed it. The eighteen carat gold nib also spells very badly, and it makes mistakes in adding up a little column of figures. I know another man who writes with a pen like a rusty nail, yet it writes like music flowing, spells the biggest words accurately, arranges them grammatically, and can add up a yard long column of figures in a jiffy without a single error.

Up the creek, there, one day, a man was fishing, with a fine steel rod fixed up with a grand reel. He had a nifty basket slung over his shoulder and a beautiful landing net on the grass at his feet. A little farther up the creek a bare-legged little fellow was also fishing. His outfit consisted of a four-foot stick broken from a choke-cherry tree, and a piece of string he got at the grocery store.

When they came away the man had a couple of fine trout in his basket, and the little boy had none, but he held in the palm of his hand a nice half-dollar piece, and his face wore the look of one quoting poetry about "A Silvery Brook."

THE LINKMAN.

R.M.R. GOING TO CAMP

Will Be Under Canvas at Carillon Starting June 1

The Royal Montreal Regiment, under the command of Lt.-Col. C. B. Price, D.S.O., D.C.M., will again go into camp at Carillon this year. An advance party of the regiment will leave on Friday, June 1, and pitch camp on land loaned by Brig.-General C. J. Armstrong, C.B., C.M.G. The following programme has been arranged: Saturday, June 2, the regiment will detain at St. Andrews East and march to Carillon in time for the mid-day meal. The afternoon will be devoted to sports for which a sports programme has been arranged, trophies being offered for competition. Sunday, June 3: Capt. Rev. H. S. Laws, regimental chaplain, will hold a church parade. Following the service, trophies won in the previous day's sports will be presented by the commanding officer. In the afternoon members of the regiment will be free to visit local places of interest, a further sports event having also been arranged. Monday, June 4: His Majesty's birthday falling on Sunday, June 3, this day will be observed as a holiday. Camp will be struck in the afternoon and the regiment will embark at Carillon for its return to Montreal by boat. After the arrival in Montreal the regiment will march to 91 Stanley Street, where it will be dismissed. This trip, the second of its kind, has been arranged by a group of friends of the regiment, headed by Brigadier-General W. O. H. Dodds, C.M.G., D.S.O., its honorary colonel.

Here and There

Nova Scotia has adopted the "drive to the right" rule of the road, the bill providing the change having received the assent of the administrator of the province.

The year 1922 was a banner year for Montreal in the number and tonnage of ships which came to the port, a total of 6,983 ships of 13,089,699 tons arriving, as compared with 5,541 ships of 9,735,450 tons in 1921.

Canada led the world in 1922 in the export of raw furs to the United States. The total fur catch for that year was over 4,000,000 pelts, valued at \$16,000,000. While the general price of furs shows a downward trend, the total catch shows a remarkable increase.

Four of the Canadian Pacific "Empress" liners, the Britain, the France, the Scotland and the India, are to load grain at Quebec during the 1923 season, and new berths have been provided for these vessels near the grain conveyors, at a cost of \$300,000.

When she was alighting from a street car in Vancouver, Mrs. Rose McLaren received injuries which prevented her from concentrating and temporarily did away with her earning power as a spiritualist or psychic reader. She was awarded \$1,250 against the railway company.

The addition of the 17,000-ton "Montanrier" to the Canadian Pacific "Mono Class" fleet marks an important development. Not only is she the largest one-class-cabin ship sailing to and from Canadian ports, but she is the largest in her class on the Atlantic. Her length is 613 feet and breadth 63 feet. Because of her size she will sail to and from Quebec.

Approximately 8,000 tons of silver ore are waiting shipment from the Keno Hill, Yukon, mines. This quantity represents the winter haul. Another 2,000 tons may be moved this summer, making the total silver shipments ten thousand tons for 1923. Such an output is worth about \$2,000,000, high grade ore running from \$200 to \$300 per ton.

"The greatest feat of steam transportation to my knowledge," said C. E. Stockhill, of the Canadian Pacific Railway, recently, "was the movement of the grain crop of 1922." From Sept. 1 to Nov. 31, a period of 91 days, the Canadian Pacific Railway loaded and shipped an average of 1,265 cars per day. This requiring the dispatching of a train every 45 minutes during that entire period, carrying more than 1,000,000 bushels daily. This movement exceeded even that of the bumper crop year of 1915.

One of the many instances of the splendid work carried out at the Liverpool docks is afforded by the Canadian Pacific liner "Metagama." On a recent arrival at that port she started the discharge of her cargo and coaling at 6 o'clock in the morning. Allowing for the usual dinner hour, she took on board in her side bunkers 1,000 tons of coal, which was completed by 2.45 the same afternoon. At the same time she discharged 1,700 tons of cargo, the greater part of which consisted of package freight, completing this operation by 7.15 the same evening.

We have fine line of boys Blue Serge Suits. All sizes now.

W. Banford & Son

ST. ANDREWS EAST.

Mr. W. Lamb spent Sunday and Monday in Montreal.

Mr. A. C. Mathews, was a welcome visitor in our town on Wednesday. Mrs. Jeffrey and Miss May Neve were in Montreal for a day or so recently.

Miss Walsh spent a day or two in Montreal, last week, the guest of Mrs. (Dr.) Aylen.

Miss Cowper with her friend Mrs. Russel, of Montreal, were week-end guests of Miss Dewar.

Among others who were in Montreal during the past week, were Mrs. W. Bradley and Mrs. W. Jeffrey.

Mrs. Jennings and two little daughters, of Montreal, spent Saturday in town the guest of Mr. and the Misses Walsh.

Invitations are out for a Dance, to be given in the Town Hall, Wednesday evening, May 23rd, under the auspices of the Y.P.D.C.

Mrs. Patterson, widow of the late Rev. Dr. Patterson former Pastor of St. Andrew's Presbyterian Church, is the guest of Miss Harrington.

Mr. and Mrs. W. Jeffrey entertained at four tables of 500 on Saturday evening, the prize winners being, Mrs. N. F. MacGregor and Mr. Hill.

The Ladies Aid, of the Presbyterian Church, met at the Manse, and Christ Church W.A., at the Rectory last Thursday afternoon. Inclement weather and bad roads kept a number away from both of these meetings.

MAIL CONTRACT.

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 22nd June, 1923 for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 6 times per week on the route between LACHUTE & LAKEFIELD from the 1st October, 1923 next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Offices of LACHUTE and LAKEFIELD, and at the office of the District Superintendent OFFICE OF THE DISTRICT SUPERINTENDENT, POSTAL SERVICE.

Economical—Dependable Comfortable—Beautiful

The "Master-Four" Touring Model 23-35 Special

The McLaughlin-Buick "Master Four" Touring is its own best advertisement. Every car sold means a new friend made. Its all-round goodness commends it to everyone and its thorough dependability insures its staying sold with its owner.

A close inspection of its construction, finish and equipment and a comparison with other cars of its price will convince anyone of its unusual value. But its value does not end here, as it is continually making new records in operation cost and low cost of repairs.

It is a car that is always ready to start—and to keep going. It has proven its dependability under the hardest conditions in all parts of the world. It has the beautiful, graceful lines that grow on one and in comfort of riding and ease of operation it leaves nothing to be desired, as a ride in it will quickly prove.

Standard equipment includes massive crown fenders, drum type head and cowl lamps, bumper, combination tail and stop light, scuff plates, transmission lock, etc.

HYDRO-TORON

Where Else Can You Find Such a Guarantee?
10,000 Miles
Against Stone-Bruise, Rim-Cut, Blow-Out

Hydro-Toron tires escape the hidden defects that cause trouble, because they are made by the Internal Hydraulic Expansion Process.

Then there is the Toron-treatment of fabric, which gives the layers greater tensile strength, more

holding power, increased affinity for rubber and provides resistance against the damaging effects of water and weather.

Have you joined the army of users who are enjoying these unusual values? If not, say "Hydro-Toron" the next time you buy tires.

George Hardie, Dealer - Brownsburg.

J. S. GILES, Agent, Lachute.

WHITE STAR-DOMINION LINE

R. L. Calder as Crown Prosecutor.

The Watchman and its readers extend congratulations to Mr. R. L. Calder on his being appointed as Crown Prosecutor. The honor is well deserved and the Montreal Gazette gives the following account:-

R. L. Calder, K. C., has been named crown prosecutor of the district of Montreal. He will be associate for the crown in the conduct of cases before the King's Bench with Crown Prosecutors J. C. Walsh, K. C., and Jos. Archambault, K. C.

Mr. Calder is a lawyer of 17 years' experience in Montreal, except for an interregnum of over four years when he served overseas, and even during that time he had some court martial work, which involves legal procedure. As an old militia officer, he held the rank of major, joined one of the local French-Canadian units early in the war, and ultimately fought with the 13th Battalion, Royal Highlanders of Canada in France. He was awarded the Military Cross for conspicuous bravery in action. He was with his battalion at Cologne during the occupation of the Rhine districts, immediately after the armistice.

Mr. Calder has also had a varied experience in political life. The pressure of work in the King's Bench, due to the growth of the city, has rendered necessary the appointment of an additional crown prosecutor.

During the last term of the King's Bench, Mr. Calder, by special appointment of the attorney-general, prosecuted in the case against Frank Dunn, who was found guilty and sent to the penitentiary for a term of three years.

Mr. Calder is a member of the law firm of Bercovitch, Calder and Gardiner. For many years he has had a reputation of being a fluent and convincing speaker in both the English and French tongues.

St. ANDREW EAST.

Mrs. Dave Taylor is improving and was able to attend Church on Sunday.

Mrs. D. Patterson, of Ottawa, is the guest of Miss L. Harrington at present.

Miss Allison Rodger has recovered from an attack of measles and is able to be around again.

The Choir Practice was held at Mr. and Mrs. Henry McQuat's on Saturday evening, May 19th.

Miss Mabel Rodger was the guest of Rev. and Mrs. J. Burgess at the Manse on Thursday evening last.

"Meditate therein day and night... make thy way prosperous, and thou shalt have good success." Joshua 18

The Choir Practice will be held next Saturday evening at 8 o'clock at the home of Mr. and Mrs. C. A. Hyde.

Rev. J. Burgess attended a meeting of the Synod's Committee on Synod's arrangements for Retreat etc at Lachute last Friday afternoon.

Public Worship will be held in the Presbyterian Church on Sunday, May 27th., at 11 a.m., and 7.30 p.m., the pastor Rev. J. Burgess will preach at both services. Everybody cordially invited. Sunday School from 10 a.m. to 11 a.m.

WILD ANIMAL LIFE in JASPER NATIONAL PARK

Famous for its ever-fascinating natural beauty, Jasper National Park has other claims to distinction. It is the largest wild animal sanctuary in the world. It is marvellously rich in plant life, its streams and lakes abound in fish, and a great variety of birds are found there. The grandeur of its mountains—there are over 100 lofty peaks in its area—the sheen of its glaciers, the glory of its woodlands and its valleys, the flashing brightness of its waters, all combine in allurements of eye and mind, not found elsewhere in Canada.

All the main animal families of this country are found in Jasper National Park. The list of them reads like a section of a work on natural history. There are the Big Horn Mountain Sheep, Mountain Goats, Wolves (black and grey), Coyotes, Foxes, Mule Deer, Moose, Caribou, Elk, Lynx, Cougars—or as many call them Mountain Lions—Beaver, Martlets, Musk-Rats, Squirrels, Rab-

bbits, Porcupines, Weasels, Ermines, Minks, Martens, Fishers, Otters, and Grizzly, Black and Cinnamon Bears.

Some of these have grown accustomed to mankind and accept its presence without fear. Hence black and brown, or cinnamon bears, do not hesitate to come near the lodge and the camps in search of dainties which add to the variety of the diet nature provides for them. Deer, Elk, Beaver, Rabbits and Porcupines are also frequent visitors to points where they are readily observable, or are permanent residents in places easily reached by those who do not care about hunting, but are yet interested in animal life.

With all this prodigality of wild animal life, it is assuring to know that no poisonous snakes or reptiles have ever been found within Jasper Park, and that the greater part of the area is almost entirely free from mosquitoes and insect pests.

The bird life of Jasper National

Park is another attraction that every visitor appreciates. No less than seventy different species of birds have so far been recognized.

Outside of the Park confines there is plenty of hunting for those to whom the chase is as the wine of life. There are many trails to the areas where big game abounds, and the hunters who scorn "easy killing" may have all the thrills and excitement they desire. Experienced guides are always available for hunting and exploring parties, or for those who simply desire to wander leisurely through a never-ending succession of scenic beauties.

With its majestic mountains, Mount Edith Cavell being the highest (11,033 feet) its numerous glaciers, its beautiful stretches of woodland, valley, streams and lakes, and its unrivalled wild animal life, Jasper National Park is an alluring prospect alike for the seeker for health, the searcher for recreation, the angler or the hunter of big game.

WHY BABIES CRY

It's often hard to find the trouble—It may be teeth—it may be stomach—but oh! so often it is just a chafed irritated skin on which poor Soap has been used.

The remedy for this is so simple! Hours of suffering—night after night of disturbance—have been avoided by mothers, who have insisted on—Baby's Own Soap. Of course it costs a little more, a very little more, however—than what is often bought and used—but four generations of Canadian Mothers are there to vouch for its purity, for the soothing healing effect on Baby's delicate skin, for the lovely pure flower fragrance it leaves when Baby fresh and clean is taken from his bath.

Don't you think, Madam, it's worth paying the 15c. a cake, a little less if you buy a box (3 cakes) which your dealer asks for Baby's Own Soap. Adv.

PLANT SHRUBS FOR THE BIRDS.

In setting out shrubs this spring keep the needs of the birds in mind. It is a wise policy to provide them with early berries whose attractions keep them away from garden cherries and small fruits, for they prefer wild fruits.

The Dogwoods and the Honeysuckle family, including the Elders and the Viburnums, possess every characteristic to commend them to the landscape gardener and the fruit grower, and the cultivator of the "back yard." There are both herbs and shrubs and trees in the Dogwood family. All contribute their white blossoms to the glory of spring time, while their fruits come in assorted colors and range through bright scarlet, dark blue, light steel blue, bluish white and pure white. Cornus Alba (white fruited Dogwood) has blond-red stems and twigs throughout the winter, deepening in color towards spring. The great Canadian favorite, Redosier (cornus stolonifera) bears its fruit up to March.

The Elders are prime favorite with both bird and gardeners. The family is one of the choicest among native shrubs. It is deplorable that farmers destroy the elders, dogwoods, pasture roses, sumachs, etc., growing by fences and waysides. Canadian fence lines might be as beautiful as English hedgerows by the exercise of some forbearance in uprooting native shrubs in many instances. Redosier spreads by underground shoots and soon forms of itself a hedge which is a joy to the eye the year round. The American or Sweet Elder bears a pleasantly-flavored purple berry in June, July and August, while the red berried Elder is still earlier, and even more ornamental.

Another attractive member of the family is the Arrow-wood, or Maple leaved Viburnum, which carries its deep purple berries all winter and is an object of beauty into late autumn, its coloring, shading from dull red into creamy white.—Laura B. Durand.

DIET.

The individual himself is the only person who can have an exact knowledge of what foods agree with him and what others disagree. If he has not acquired this information by the time he reaches thirty years of age, he is either unintelligent or he has a stomach like an ostrich. In the latter case it matters not what he eats or when.

Every adult should learn, in the due course of living, the particular limitations and vagaries (kinks) of his own body in relation to food.

There are certain facts in regard to the specific action and uses of food, which the average person has no occasion to learn, but the knowledge of this is of service to medicine.

Growth determines the food needs in childhood. Food here must be selected with regard to their body building capacity.

Few children in this country need to suffer from any prolonged lack of the kind and variety of food needed to assist growth, preserve health, and furnish adequate heat and energy.

CHAPTER III.—(Cont'd.)

"You will think me a harping boor, but when I think of those boys, Grace, the finest the world has produced, living and dying in that hell over there for lack of men with an ounce of grit in them, while I'm out of it forever, a useless clog so far as the war is concerned, I tell you a man needs to get a mighty tight grip on himself to stand it."

"David, I'll bite you with words in another minute. How can you talk so! You know your mission here is important. It may lack the danger of actual warfare, but the path isn't clear for all that. German snipers are ready even here to get you. Be patient with yourself just for awhile, dear boy. Let me give you another cup of tea. The Chinese are past masters in this art, to say nothing of their culinary talents. I'm ravenous whenever I think of their savory dishes."

"By the way, David, I'm beginning to think Fate has interposed on your behalf after all and turned mamma into a hard-hearted parent for your sake, for you certainly need looking after."

"Yes, it's a lucky thing for me she chose China as your place of banishment. Tough luck on you, though."

Grace smiled reminiscently, as she dropped the second lump of sugar in David's tea. "Poor mamma, she has forced herself to come to this heathen land to enable my heart to mend, when the fact of the matter is it hasn't even a crack in it and never had to my knowledge. All my protests that Rowen Langton and I were only pals fell on deaf ears. So, behold, here I am whirled to the other side of the world and enjoying the change, while poor mamma believes this is her purgatory."

David joined in her laugh, and Grace saw to it that the seriousness did not creep back to his eyes for the next half hour at least.

"Have you noticed that feather-footed porter, David? He's been providing me with no end of amusement the last ten minutes. If we weren't so matter of fact I'd say he took us for lovers. Poor chap, he doesn't know we are merely prosaic first cousins."

David turned ruminating eyes on her. It dawned on him that he had a very pleasing, nay, ravishing, picture opposite him. The brown eyes were glinting teasingly, and the breeze was twining the stray tendrils of hair into soft curls. The blush of health glowed warmly under the tan, and two dimples lurked tantalizingly, one in the left cheek and the other in the round chin. A sense of something missed dawned on him at the same time as the realization of her beauty.

"David, for mercy's sake are you trying to count the freckles on my nose? I haven't had such a close inspection since the mumps."

"Ah—er—the fact is, I was just thinking, Grace, in England it is quite customary for first cousins to marry, you know."

A distressed flush crept over the girl's face, and to David's surprise she jumped from her chair and stood with her back to him, looking over the balcony railing.

David rose. Crossing to her side he covered the small hand resting on the railing with his own. "Forgive me, Grace, dear, I wasn't speaking lightly. You are the best little pal a fellow ever had, and I'd consider myself the luckiest chap in Christendom if—"

"Stop, please, David, stop. You don't realize what you are saying. You are just lonely and unsettled after your terrible experiences over there. I'm not the girl for you. No," as David took her arms and turned her towards him.

"Grace, I am lonely, desperately lonely. Will you marry me?"

A sudden glow lit up the girl's face, which as suddenly faded, but it crept into and made tender the brown eyes, as she answered: "Dear boy, I missed the real foundation of your proposal then, the words 'I love you.' Love isn't love, David, dear. No, don't say it. You may think you do, but a girl usually knows the signs of the fatal malady. As you say, I'm a good pal. Let me remain that always."

"You don't care, then?" There was a hurt, anxious note in David's tone. "Not yet, thank heaven. Please help me to keep from caring, David, dear." Turning from him she pointed across the street: "There's mamma with Major Bennett on her bait. Poor mamma, neither one of us will have any peace 'til she has me in the net." A discreet cough caused them to

turn. A Chinese servant bowed before them and apologetically announced that the master was wanted in his sitting-room.

"Who wants me, Meng?"

"Tallie man, black hair lip and glasses. Chinese lady wid she."

When the servant had disappeared, after much profuse kowtowing for the cash he had received, David turned to Grace. "It looks as though Creighton is going to draw me into some secret service work. Word has come from England that a German spy in the guise of a Chinese woman is at large here, after doing some dastardly work in Europe. I wouldn't be surprised if he has landed something. There may be some excitement. Perhaps you hadn't better come up."

"Oh, please, David, have pity on my life of inertia! I'll promise not to scream or use profane language, even though my fury urges me to scratch the creature's eyes out. Don't deny me an opportunity to see a domineering Hun become crestfallen."

"Come then. Hang it's being a woman, though."

CHAPTER IV.

As the car drew up in front of the foreign hotel, Tu Hee's stoical calm broke a little and she shrank back when the door was opened for her to alight.

"Come, miss, our time is valuable. Act peaceably and it will be better for you in the long run."

Grasping Lun's hand tightly she accompanied the men through the crowds at the entrance. Ashamed and bewildered, she kept her eyes downcast. Poor child, suddenly and without any preparation, she had been thrust into a strange world. The net was closing tighter on her every minute. She dared not think of the outcome. Was it only this morning, she wondered, that she had breakfasted with Uncle Weng, after which they had walked so gaily in the garden? A mist over her eyes warned that tears were very near. That would be a sign of weakness. Whatever the gods willed must be met with fortitude.

A familiar voice fell on her ears. "Why, Rod, if it isn't Tu Hee, the mandarin's niece! What in the world can she be doing here?"

Tu Hee glanced up quickly. Her heart gave a big leap as she recognized in the stylishly dressed woman near her the American from the neighboring hill. "Please, please," she began, but her captors, impatient at her slow progress, hurried her forward to the inner corridor. Here she and Lun were thrust into what looked to be a big bird cage, and shot mysteriously up through space. A queer sensation of falling swept over her. She felt Lun's hand close tightly on her wrist, but her voice sounded far away. "It's the devil's spell they're casting on us." And then the hated foreigners brought her back to vivid, fearful reality.

"This way, Miss." Tu Hee found herself on the level with the floor again.

"Hurry, darlin'," cried Lun, "before the bewitched floor goes up again."

Lun crowded against her mistress as she spoke, and they moved mechanically along the corridor, a guard in front and behind them.

The room they entered was large and richly furnished. Tu Hee saw at a glance it was a typical Western sitting-room. The younger man summoned a servant by pressing a button. After instructing him in a low voice he turned to Tu Hee. "Take a chair. I guess we won't deny a woman a little comfort, even if she is an enemy."

But Tu Hee might have been a statue for all the heed she paid to him. "Damn clever acting," he muttered.

Lun, who had been standing close to her mistress, her hands working nervously, now approached the official, and shaking her clenched hand, cried shrilly: "No actress—Misses Tu Hee belong great Weng family. You all be killed. He great man—hees servants, hundreds of them, stickes you through."

Lun's excited harrangue provoked loud, hilarious guffaws from the two men, which, however, became suddenly hushed as the door opened. Standing erect, they saluted the young British officer, who entered, accompanied by a girl.

The younger man, as usual, was the spokesman. "We have captured the mysterious Fraulein Kleiser, sir. You will find her acting superb. Her innocent demeanor would hoodwink the devil himself, beggin' your pardon, miss," and he apologetically bowed to the girl.

Reluctantly David Marsden approached the captive. Tu Hee was standing with her back to him. She had not moved a muscle since entering the room. David was a little nonplussed at the stiffness of her attitude. He wondered if he were diplomat enough to deal with a graven image. As he paused in front of the slight, girlish form he gave a perceptible start. "Why, Creighton, what do you mean? This is a mere child."

"Wonderful make-up, sir."

Embarrassment and a sort of humiliation grew on David as he noted the beauty and youth before him. His eyes dwelt fascinated on the long curling lashes, and sudden impatience seized him to see what the drooping lids concealed. Innocence, he felt instinctively, would leap at him could he but induce those white lids to flutter back. His impatient desire mastered him, and impulsively he leaned towards the motionless form. "Won't you please look at me?"

The white lids fluttered, and David looked into two eyes, the blueness of which dazzled him. He had seen many blue eyes, had received soft smiles and sauciest sparkles from them and had turned away lightly and unconcerned, but these were different. He wanted to look and keep on looking, and mixed with his desire was a baffling feeling that he might gaze and search forever and still never fathom their depths.

Was an electric current attaching itself to Tu Hee also? At first, humiliation that a man dared look at her with manner so unabashed swept over her and dwarfed every other feeling. She felt powerless to look away, however. The piercing grey eyes held her open against her will. Then fear gripped her. An impulse she had never experienced before, and yet seemed to have belonged to her for aeons, took possession of her, and with a little cry she dealt the brown face so near her own a stinging blow.

She paid no attention to the startled cry of the foreign woman who sprang forward. A sense of savage pleasure parted her lips, as she saw the trickle of blood discoloring the brown of the face, where her jewelled nail shield had broken the flesh. She was seized roughly by the two officials, but she was no longer afraid. She had struck a hated foreigner. Why had her nail shield not been poisoned! Oh, why did they torture her so? Her wrist was caught as in a vise. The taint of their touch would never wear off. Would they kill her, or would they give her time to do it herself and enter eternity purified?

And then a clear voice reached her ears. She wasn't heeding, but somehow this voice, musical and resonant, reminded her of temple bells, soothing, deep, and clear. It was the foreign officer. He was in front of her again. He was angry too, but not at her. How strange! He was ordering the men to release her. Tu Hee peered more closely. The blood on his face fascinated her. What a deep gash she had made. Her head seemed queer—the foreign officer was swaying away from her. He might bleed to death. Fumbling in her dress she held out a tiny piece of embroidered silk. But he had gone. Everything was black—perhaps she was dying.

(To be continued.)

In the Highlands.

In the highlands, in the country places Where the old plain men have rosy faces,

And the young fair maidens quiet eyes, Where essential silence chills and blesses,

And for ever in the hill recesses Her more lovely music Broods and dies—

O to mount again where erst I haunted, Where the old red hills are bird-enchanted,

And the low green meadows Bright with sword; And when even dies, the million-tinted

And the night has come, and planets glinted, Lo, the valley hollow Lamp-bestarr'd.

O to dream, O to awake and wander There, and with delight to take and render,

Through the trance of silence, Quiet breath! Lo, for there among the flowers and grasses,

Only the mightier movement sounds and paces; Only the winds and rivers, Life and death.

—Robert Louis Stevenson.

French Cut Forests Ancestors Planted.

By a strange trick of fate the French are now cutting down a forest in the Rhineland which was planted more than a century ago by their ancestors. When during the revolution the Rhine provinces were occupied by French armies they cut down the timber in the privately owned forests of Hanau, Eifel and Haardt which later became a part of the Reich's holdings.

The French on taking possession of the left bank of the Rhine found it necessary to replant these devastated areas and imported large quantities of Norwegian pines and similar trees from Savoie and the Pyrenees. Before the world war the Germans considered cutting down these trees planted by the French, but the forestry experts advised waiting until 1920, when they would be fully matured. According to the best estimates this delay cost the German empire at least 500,000,000 francs.

He who can take advice is sometimes greater than he who can give it. Hold yourself responsible for a higher standard than is expected of you. Never excuse yourself. Never pity yourself. Be a hard master to yourself—and be lenient to others.

Minard's Liniment for Coughs & Colds

After Every Meal
WRIGLEY'S

In work or play, it gives the poise and steadiness that mean success.

It helps digestion, allays thirst, keeps the mouth cool and moist, the throat muscles relaxed and pliant and the nerves at ease.

FOR A BETTER SCORE

Mixing Up the Baby. The inventor of a new feeding bottle for infants sent out the following among his directions to mothers: "When the baby is done drinking it must be unscrewed and laid in a cool place under the hydrant. If the baby does not thrive on fresh milk, it should be boiled."

Britain's Expenditure. During the year ending March 31, 1921, Britain spent £28,000,000 on National Insurance, £76,000,000 on Education, and £31,000,000 on Poor Relief. Thirty years ago Education and Poor Relief cost together about £18,000,000.

"So the boss is going to star you in a vamp part next summer? I suppose you had to convince him you could act the part?"

"No. His wife convinced him."

Less Planting--More Culture

By Hilda Richmond

As we plant less ground in garden and cultivate the smaller patch more carefully and more frequently we enjoy more fruits for our labor. Time was when in common with other farmers we had to have a "truck patch" as we had to have a small field. Into that truck patch went everything that everybody else raised, without regard to likes and dislikes, and also without regard to the ability to cultivate it. But the war, which taught so many lessons, eliminated all the vegetables we do not like and made us more careful about plowing up a big expanse of soil to grow up to weeds and sickly vegetables. We never cared a great deal for cabbage, yet we always expected to put out several hundred plants, trusting to the survival of the fittest rather than to any great care, simply because we did not crave cabbage. Now we plant no cabbage at all, but buy a few heads when the cabbage notion strikes us once in a long time.

The spring garden consists of frequent plantings of lettuce, spinach, onions, early peas, beets, radishes and snap beans. These with the permanent asparagus are enjoyed until the middle of July, when the next beans, peas, beets, pickles, tomatoes, roasting ears, kohl rabi and such things come in quick succession. Of course, the fall brings a wealth of richness in the garden, but it also brings the last planting of snap beans, peas, lettuce, radishes, onions and beets as well as the cultivation of the celery of which we are very fond. More time and energy are put on the corn, tomatoes and celery than anything else because we depend upon them more for canning and for winter use. This season we used the last celery in January and, of course, the canned things last until fresh ones come.

By having the smaller garden it does not become a drag, but is a real pleasure. Formerly we felt that we must have at least twice as many tomato plants as we needed in order to have plenty to give away to friends.

but we have more to give away with the small patch than with the large one. Also we have more time to try new varieties. The vines are pruned just as trees are pruned, and while we do not use the stakes we thin so that they can have plenty of light and air. The same might be said of lima beans. We used to have poles and poles to care for, but now a smaller bed with better care yields more than in other years.

There is less trouble with weeds now than in the big patch. When the early peas, lettuce, radishes and such crops are done the ground is cleaned out and made ready for endive, later plantings of onions, the fall radishes, spinach and all the other things that must be sown in July or August. If there is a place not needed for those crops it is promptly sown to turnips, as turnips will drown out weeds and can be fed to stock. The fertility of the soil for the two or three crops is kept up with well-rotted manure, but really it is less trouble and expense to do that than to fertilize a big field once. The soil is as mellow as ashes and if weeds do appear they are very promptly used as green fertilizer.

It may sound like a fairy story to some folks to say that you can get twice as much off a small plot well tended as a big one skinned over, but it is true. We even plant fewer potatoes and cucumbers and such things as formerly, though these crops go out in the field rather than in the garden proper. The Japanese with their wonderful gardens, depend upon small plots and we may learn a lesson from them as they fertilize and cultivate. With help so hard to get, and the farmers rushed to death, the proposition of a small garden with better and more vegetables should appeal strongly, for the ladies and children like to work in a well-kept truck patch when they abhor a big weed grown field. Cut the garden in half and see if you do not increase production without increasing work. We know, for we have tried it.

—AND THE WORST IS YET TO COME

Goats in Alberta.

Goat statistics are not to be found in the livestock figures of the Dominion of Canada as the raising of these animals in Canada has never reached a status warranting its inclusion. The only province where goat raising has become thoroughly established and where it has arrived at undoubted success is British Columbia. Here there are approximately 5,000 of these animals, which have increased to these proportions from an original herd of 200 head imported from the United States in 1917, whilst a goat breeders' association in the province formed in the same year with a membership of 176, now has more than 400 adherents.

With its favorable conditions in many sections there seems no good reason why the Prairie Provinces should not have a flourishing goat industry, especially since this pursuit has proved so profitable in the province across the mountains. Alberta has at length its pioneer in W. A. Schroeder, who came from Switzerland and settled near McLeod, and has since been engaged in proving the feasibility of the goat-breeding industry in Southern Alberta and the profit to be found therein, which he would seem to have done conclusively.

He has one hundred goats, and with this substantial herd is following along the same principles of domestic dairying that have for generations been so successful in Switzerland. He is making fifty pounds of butter and

cheese every week, which he sends to the McLeod and Calgary markets, where it sells on even terms with the ordinary dairy brands. An advantage in this industry lies in the claim that one gallon of goat's milk will make as much cheese as two gallons of cow's milk, and each animal averages a quart at a milking.

Goats are easily raised in Alberta, according to Mr. Schroeder, who first experimented with sheep, especially on hilly or broken land such as is found in certain sections of the province. They are economical to keep because they feed largely on brush and weeds, the snow offering no deterrent to rustling, whilst they seldom fall victims to coyotes. The meat of the goat comes under the class of wild game, and from ten to twelve pounds of tallow are produced from each carcass. The pelts when well tanned are waterproof and have a good commercial value.

Mr. Schroeder's experiments have been watched with a good deal of interest throughout Alberta and his present herd is in rather general demand for foundation stock for other herds. Some have gone as far north as the Peace River country, where a miniature goat-dairying industry is in process of being established. Now that it has secured its start and certain proven advantages have been proven for it, there is every possibility of the goat-raising industry becoming established on the prairies of Western Canada.

Canadian Trade With Italy

Following the recent trade treaty concluded between France and Canada and as another phase of the preferential trade program arranged for in Europe by Canadian ministers, the terms of a similar favored nation treaty between the Dominion and Italy are announced. Though the clauses are brief they are extremely full and comprehensive, and apparently all that either country could desire to foster a mutual expansion of trade. Canada's export trade with Italy has undergone a surprising expansion, especially since the outbreak of the war, and the treaty is calculated to further stimulate this traffic, and at the same time, through facilitating the entry of Italian goods to Canada, augment the volume of the Dominion's imports from that country. The effects of the new treaty are generally summed up in the concluding clause, which states that in all matters governing the import, export and transit of merchandise Italy grants to Canada and Canada grants to Italy the treatment of the most favored nation. Articles, the produce or manufacture of Canada, imported into Italy and similar Italian commodities imported into Canada, shall not be subjected to higher or other duties than those paid on the same commodities from other countries, and similarly no prohibition or restriction shall be mutually imposed which is not equally extended to other countries. Articles from either country passing in transit through the country of the other shall be reciprocally free from all transit duties

whether they pass through direct or are unloaded.

In the last fiscal year Canada's total trade with Italy amounted in value to \$18,723,185, of which exports amounted to \$15,335,815 and imports to only \$1,387,370. Almost the entire volume of exports was attributable to vegetable products, consisting mainly of grain and flour, which had a value of \$14,548,767, whilst the other two important items were animal products, which totalled \$671,314, and non-metallic minerals totalling \$103,628. Curiously Canada's greatest item of import was in vegetable products, amounting to \$747,480, followed by fibre and textiles to the value of \$322,088 and non-metallic minerals worth \$117,804.

A survey of Canadian-Italian trade in the last fifteen years or so discloses the fact that whilst Canada's import trade has remained more or less at a standstill there has been a surprising increase in the volume of the Dominion's export trade. In the year 1910 the total volume of Canadian-Italian trade was \$1,774,751 in value, of which Canadian imports accounted for \$145,243 and exports \$829,508, giving Italy a small favorable trade balance. By 1915 imports from Italy had increased to \$1,507,548 and exports to \$1,840,310. By the year 1920 imports had declined to \$399,040 and exports increased to the surprising total of \$16,359,557. While in 1921 there was only a relatively small increase in the value of imports, export value had increased by more than three times and amounted to \$57,738,343.

Floating Lands for Home Sites in Holland.

Of all the countries of Europe, Holland affords, perhaps, the best example of how the topography of a country affects the habits of its people, and influences their lives. A considerable portion of the Low Country lies below the level of the sea, and it was to resist its cruel invasions that the gigantic levees, or dikes, were built. Nevertheless, some of the flooded regions, periodically inundated by the sea, have been waterlogged for centuries, and one of these is the province of Overijssel. Perhaps its quaintest spot is the floating village of Gleihoorn. Taking advantage of the condition of the soil, these hardy Dutchmen have learned how to cut away sections of turf, and then float them to the spot where they are wanted. Considerable skill, of course, is necessary to escape a ducking, because the footing is uncertain and slippery, and the marshland deceptive and treacherous. Poles, about 12 feet in length, are employed to shove off the floating home sites, which are cut away beyond the village limits and then guided to town. Some 8 or 10 men follow this work exclusively, and, naturally, are very adept in the handling of their poles and the "islands" in their charge. Gleihoorn has been built up in this manner.

A Mere Amateur.

Mrs. Strongwords—"I hope you'll overlook my language, little boy. I shouldn't have said what I did."

The Caddy—"That's nothin'! You just ought to hear what my old lady says when the old man holds out his pay on her."

Gold cannot rust.

A Royal Recognition.

His Royal Highness the Prince of Wales has graciously added his contribution to the progress of forestry in Great Britain and the Empire generally, in his acceptance of the office of President of the Empire Forestry Association. He presided on March 1st at the annual meeting of the Association, which was held at the Guildhall, London, England. In moving the adoption of the annual report of the Council of the Association, he said in part: "I have had, the last three years, unparalleled opportunities of realizing the vast timber resources of our Empire and of actually visiting lumber mills in Canada and Australia. Without a cheap supply of timber, any progressive community must face disaster, having regard to the many needs we have for timber in everyday life, for which a regular and cheap supply is essential. This, however, can be secured only by close attention to forestry in all its aspects."

"If we are to accept the evidence of those who have made a study of the rate of consumption of timber, the world within the next twenty years will be faced with a timber shortage, if not an actual famine. No time must be lost in making provision for future supplies, steps must be taken to replant the vast forest areas devastated during the war, estimated in Great Britain alone at one million acres, of which probably not five per cent. have been replanted."

"The need for systematic forestry must be more fully realized and the doctrine of self-regeneration of forests no longer relied on as the sole means of propagation."

Novel Boat.

A novel boat is both propelled and steered by jets of water ejected from a motor-driven pump in any direction desired by the navigator of the craft.

Insulating Material.

Wool and cotton are pulverized in France for insulating material, to clarify solutions difficult to filter and for some other purposes.

The Dominion of Canada, with a total of 18,255,000 horse power available under conditions of ordinary minimum flow and 32,076,000 horse power dependable for at least six months of the year, takes second place to the United States in her possession of available water powers. In the amount of power available per capita of population, the Dominion occupies the second place, following Norway, and fills the same relative position in respect to that country in per capita power development. Canada's water-power development is substantial and in the main adequate to the country's requirements, but by reason of the Dominion's vast available resources, amounts to only seven per cent. of such present recorded water-power resources.

In the past ten years the yearly increment of new power made available has averaged 180,000 horse power. In the year 1922 Canada developed three million horse power of electrical energy from its water powers, considerably over the decade average. This was divided as follows:—Ontario, 1,330,000 h.p.; Quebec, 1,100,000 h.p.; British Columbia, 310,000 h.p.; and the remainder among the other six provinces. It has been estimated by the Federal Water Powers Branch that at the end of the last year the horse-power development in Canada per thousand of population was 337, the total capital invested in development \$620,558,731, and the estimated revenue from development \$81,600,000.

Increasing Industrial Demands.

The exceptional amount of new power development in 1922 was made necessary by the great demand arising from industrial establishment, and for the same reason, the year 1923 is from all indications to be an outstanding year. The present year promises to make a record in the location of new foreign industries, and new electrical development must keep pace with industrial progress. Canada offers many inducements to manufacturers in other lands to locate within her confines, and one of the greatest is that of cheap and dependable power. Thus the city of Winnipeg has achieved the distinction of providing manufacturers with electrical power at a lower rate than any other city on the continent, and

rates throughout Canada can generally be stated to compare very favorably with those of other countries. To maintain this prestige much development will be undertaken in 1923.

Among the larger hydro developments undertaken in the past year or previously, which will be continued in 1923, are the Queenston-Chippewa in Ontario and the Great Falls in Manitoba. The main work of the Queenston project, which is part of the Niagara development, which with its 600,000 horse-power capacity, will be the largest electrical plant in the world, was completed in 1922, but the facilities are to be continually extended to the utilization of the maximum power. The development progressing at Great Falls, on the Winnipeg River, is the largest hydro undertaking west of Niagara, with an ultimate capacity of 165,000 horse power and to cost ten and a half million dollars.

New Development.

A new corporation, financed by American capital, the St. Maurice Power Company Limited, is to develop the Gies Falls and Gabelle Rapids on the St. Maurice River, in Quebec Province, having obtained

leasehold power rights to these. The total installed capacity of the development is placed at 120,000 horse power and the capitalization of the company is in the neighborhood of \$10,000,000.

Another Quebec development will be undertaken on the Riviere des Prairies where 50,000 horse power of electrical energy is to be developed by the Back River Power Company, at a cost of from six to seven million dollars. The Provincial Government has recently granted a sixty-year lease on the river rights to the company. Through arrangements completed between the Quebec Government and the Quebec Development Company, Canadian and American capital will combine in the building of a great dam at Grand Discharge from Lake St. John, the headwaters of the Saguenay River. With an initial unit of 200,000 horse power it is expected the project will eventually be developed to produce 1,000,000 horse power. Further hydro development in Quebec Province will be accounted for by the Southern Canada Power Company, which is initiating another large power development on the St. Francis River, which will produce 30,000 horse power.

The Great Northern Power Company Ltd. has been organized in Ontario to furnish the gold mining industries of the northern part of the province with power and assist in the general development of the territory. The company has under way the initial unit of a plant on the Montreal River, and it is expected that this first power unit of 2,150 horse power will be ready for distribution early this year.

Further Probable Development.

An important project which may materialize, is the development of Great Falls, the largest single water power in New Brunswick. It is estimated that with the minimum expenditure which could be made in harnessing the falls there would be available about 30,000 horse power. By adding storage facilities the power would be increased to 60,000 horse power, and by taking advantage of storage facilities at the headwaters of the St. John, the power output could be increased to 80,000 or 95,000 horse power. Preliminary investigations have been under way by the Provincial Government for some time and the

year may see actual development started.

In 1922 large property holdings along the shores of the Gattineau River were acquired by the Hull Electric Company, which intends establishing a hydro-electric power plant this year with an ultimate capacity of 150,000 horse power, the cost of construction of which is estimated at \$10,000,000. This is to be completed in two years. In the Province of Alberta there is a proposal by the Alberta Hydro-Electric Company to construct a plant at the Bow River, east of Calgary, to consist of four dams, the first of which will cost half a million dollars.

There are several new power developments projected in the province of British Columbia. Canadian Westinghouse is said to be planning the building of a great power plant at Seaton Lake, to sell power to a proposed pulp and paper plant, and to Seattle power consumers. Contracts have been signed for the installation of a 5,000 horse-power addition to the existing hydro-electric facilities at the Ansox smelter of the Granby Consolidated Mining, Smelting and Power Company, to cost in the neighborhood of \$200,000.

While the developments here noted comprise only some of those of which notice was given prior to the conclusion of the past year, and there will doubtless be many more projects initiated in the course of the coming months, they are sufficient to indicate that the year 1923 will be an outstanding one in hydro-electric development. As new electric development means the exhaustion of available supply within sight, the new undertakings on such an extent are a fairly accurate gauge upon which to measure Canada's industrial progress. With such an expansion to electrical power being effected, an unprecedented development of the Dominion's industrial enterprises is confidently anticipated on all sides.

Perfectly well-meaning Old Lady: "Thank you so much for your song, my dear. It took me back to my childhood days on my father's farm. When I shut my eyes and listened to your singing I seemed to hear the dear old gate creaking in the wind."

Abraham Martin Honored

Monument to First Scottish Settler,
First King's Pilot On the St.
Lawrence, and First Farmer
On the Plains of Abrah-
am Unveiled.

At Quebec recently the Hon. Athanase David, Provincial Secretary in the Quebec Cabinet, officiated at the unveiling of a monument erected by the Canadian Pacific Railway Company in memory of Abraham Martin, who was the first known Canadian of Scottish descent and the first King's pilot on the St. Lawrence River. The Plains of Abraham received their name from him, he receiving a grant of the land from Champlain in 1617. The unveiling of the monument, a handsome granite shaft seven feet high surmounted by a globe supported by thistles, was an important event and was attended by a large number of prominent citizens and political representatives.

The sturdy pioneer is further accorded by Andrew Patterson, who

ABRAHAM MARTIN.

Auld Scotland many a hero boasts
From John o' Groats to Wigtown's
coasts,
Both Lowland lads and Highland
hosts

That wear the tartan;
But now another seeks your toasts,
Old Abrah'm Martin.

But what pretence has he to fame,
That we should celebrate his name,
And thus in stone and bronze pro-
claim

His style and story?
A threefold plea can Martin claim
To all this glory.

The first of Scotia's sons was he
To cross Atlantic's stormy sea—
True pioneers of liberty,
Giving their best
That this Dominion fair might be
Blessing and blest.

See in his wake the glorious band,
MacKenzies, Frasers, foremost stand,
MacDonalds, too, in high command,
And James McGill,
Mountstephen and Strathcona grand—
'Twould pages fill.

The first was he to till this plain,
Now sacred to that fierce campaign
When heroes fell, but not in vain
In glorious strife.
O Canada, thine was the gain,
Renewed thy life!

He was the first to mark the tides,
The rocks, the shoals St. Lawrence
hides—
The mariner in him confides
And bans his fears;

"The ship," he cries, "in safety rides
When Martin steers."

Though fate 'mong strangers cast his
lot
He ne'er forgot he was a Scot,
Thrifty and shrewd he was, I wot,
Canny and gaucy.

Proud of the nickname that he got,
"Abrah'm l'Ecosseais."

Let us whate'er our race or creed,
This ancient Scot's example heed,
And give the best that's in our breed
That ours may be
A Canada in word and deed
High-souled and free.

—A. Patterson.

SPECIAL ATTENTION!

... respectfully call attention to our customers & friends that we have complete equipment for doing any kind of French cleaning, and specialize in Ladies Silk Gowns, Blouses etc.

Our Spring Suitings Assortment is now complete and we ask you to bear in mind that we use only HIGH-CLASS GOODS.
Suits made to order from \$22.00 and upwards.

Waving farewell to loved ones on the Metagama.

fate was not more kind to them after they had settled here. Forty-five of their number were carried off by fever in the first year and the war of 1812 wiped out the settlement, homes, stock and crops.

In 1812 Lord Selkirk's agent, Colin Robinson, of the Isle of Lewis, persuaded a number of his fellow islanders to whom the abolition of the Clan system had brought high rents and misery, to settle in the Red River district. This party encountered the hostilities of the Indians and, through their industry and progression, the jealousy of the white traders. When the settlement was wiped out on one occasion and many of them wiped out, the remainder were forced to leave. However, they returned in time to harvest the first western wheat crop and many attribute to this fact that Winnipeg stands where it does to-day.

Life will not be a bed of roses for those who have newly arrived and they will have to work, and hard, but this they can do. They are the descendants of the "lords of the isles" who by strength of arms repulsed the invasions of the Scandinavians and Scots. Social and industrial development was retarded to a great extent by the clan system, but those who have adopted Canada are well educated and a simple life of toil in adversity through generations has given them a splendid physique and simple dignity. Although forced by hard times to leave their homes to make new ones, most of them are in sufficient funds and not a few families aboard the Metagama were possessed of over \$1,000. Some have stopped in Ontario but the larger proportion of them have gone to Red Deer, Alberta, where they will form a small colony.
