Surnames and Their Origin

COLQUIT
Variations—Colquite, Colquait.
Racial Origin—Cornish.
Source—A local name.

Here is a family name of Cornish origin. That is to say, it is a family name which developed as such in Cornwall though it might just as well have been borne in the first instance by those of Anglo-Saxon or Norman blood as by those of Cornish-British blood. For by the period in which family names were formed in that section of England, Cornwall was by no means exclusively inhabited by descendants of the original Celtic inhabitants.

It is simply one of those family names which became such in the first place as a reference to a place of habitation.

The local geographical name is a combination of the Cornish-British words for the neck of a hill, or promontory and for woods. The meaning was "the woods on the promontory." The first of these two words was "col" and the other "quit."

It was natural in the period when most men bore but one name, to distinguish one from another of the same name by reference to the locality in which he lived, and so such family names as these were built up in the course of time.

DUNDAS
Racial Origin—Scottish.
Source—A locality.

Most of the family names of Scotland, particularly those of the Highlands, are but more or less modernized clan names or derivatives originally from given names.

In many instances, however, for reasons of convenience or necessity, families of Highland origin have dropped their clan names and substituted names which originally were descriptive of the individual or family by reference to the former place of residence of that individual or family.

Dundas is one of these Scottish place names which has become a family name.

HISTORIC FORT WILL BE PRESERVED.

One department of the Dominion Government is quietly accomplishing a splendid work for the Dominion which may not be fully appreciated at present but for which future generations will thank its officials. It is the Historic Sites branch of the Department of the Interior. Old Fort Wellington, near Prescott, has just passed into its hands for preservation. It has an inspiring history dating back to 1812, when it was the main point of communication between Kingston and Montreal. From it went forth a force in 1838 which repelled an invasion. It was garrisoned again in 1866 at the time of the Fenian Raids and in 1886 at the time of the Northwest Rebellion. The upper picture shows the entrance to the fort and the lower picture part of the wooden stockade. It remains much the same as when it was built.

NERVOUS TORTURES

Irritation by Day and Sleeplessness at Night the Result.

There is no torture more intolerable than nervousness. The sufferer starts at every noise, is shaky and depressed. The least thing produces a feeling of irritation, and nights are often sleepless. Often although in a completely exhausted condition, the patient is unable to sit or lie still. The nerves are in this jaded condition because they are being starved by poor, watery blood and to restore them to a normal condition the blood must be made rich, red and pure. For this purpose no other medicine can equal Dr. Williams' Pink Pills. They act directly upon the blood; they bring to it the elements necessary to enrich and purify it, thus bringing new health and strength to run-down, nerve-worn people. There is no doubt about this; thousands have testified to the blood-improving, nerve-restoring qualities of these pills. Among these is Mrs. Aubrey Caldwell, Melancon, N.S., who says:—"I was badly run down and my nerves were in a terrible condition. I would start at the least sound and often faint away. I could not sleep at night, and only those who have been in a similar condition can tell what I suffered. At my mother's request, I began taking Dr. Williams' Pink Pills, and after taking them for several months I am surprised at my present condition of good health. My nerves are as sound as ever; I can sleep well and eat well, and have no more 'stinging' spells. I can only say that I cannot praise Dr. Williams' Pink Pills too much for what they have done for me."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Water North of Alaska.

The chief object of the Arctic expedition which not long ago returned to Copenhagen was to settle the question whether there is land or a deep sea to the north of Alaska. A sledge expedition was made in March over the ice. Fifty miles from the coast the party found crevices through which they sounded to a depth of 2,640 feet without reaching bottom. Sixty miles further on the result was the same. Turning then toward the southeast they found the edge of the continental shelf. The conclusion is that deep water exists north of Alaska, at least to a great distance.

Running No Risks.

Ronnie, aged four, had grown tired of blowing bubbles, so he asked his mother to read him the story in the Bible about the city with the golden streets.

"Very well, dear, but have you taken the soap out of the water?" she asked. "I'm pretty sure I have," said Ronnie, who was a little short-tongued. When she reached the words: "And there shall in no wise enter into it any that maketh a lie," he slid from her knees and said: "I don't like go and there about that soap."

"Children who drink a glass of milk or more daily are taller, heavier, and more advanced in schoolwork than those who drink none," says an American health expert.

Rice-Field Waste Benefits Sugar Refining.

From the fibrous rice materials—the hulls, straw, and fibers—which formerly cost money to dispose of, now is being made a product that not only brings a return to the planters and the mills, but finds a ready use as an economical substitute for boneblack in refining sugar. The fact was discovered by accident when a chemist, who was experimenting with the paper-making qualities of rice waste, left some of it in his drying oven for several days. He found that though the waste had become thoroughly carbonized, it had not shrunk or lost its shape, which indicated it to be a porous material of clarifying properties. He mixed some with molasses and there was no change, but when he boiled it with caustic soda to remove the silica, and then mixed it with molasses, the mixture cleared up at once.

As a decoloriser it is mixed with a sugar solution in the proportion of one-half pound to 100 pounds of sugar, heated in a suitable tank, and filtered. The material still possesses considerable coagulating properties and gun-absorbing power, and is used for clarifying impure cane juice.

Feeling the Boss.

Casey—"You're a hard worrucker, Dooley. How many hods o' mother have you carried up that ladder th' day?"

Dooley—"Whist, man—I'm foolin' the boss; I've carried this same hodful up an' down all day, an' he thinks I'm worrucker."

How It's Done.

Mistress—"I wish you wouldn't have so much company. Why, you have more callers in a day than I have in a week."

Maid—"Well, mum, if you tried to be a little more agreeable, perhaps you'd have as many friends as I've got."

CORNS

Lift Off with Fingers.

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

SAYS IT'S WORTH WEIGHT IN GOLD

Mrs. Matthews Pays High Tribute to Tanlac for Ending Stomach Trouble.

"I am so thankful for the wonderful benefits I have received from the Tanlac treatment I just want to tell everybody in Toronto about it," declared Mrs. Ellen Matthews, 104 Eastryn Ave., Toronto, Ontario.

"I suffered so terribly with stomach trouble and a run-down condition that I feared nervous collapse. My appetite almost deserted me and even the little I did manage to eat disagreed with me, and I bloated with gas till my heart palpitated and I was dreadfully short of breath. I couldn't get a good night's sleep and as so worn out I couldn't even do my errands to the store."

"I heard so much praise of Tanlac I finally bought a bottle, and it was worth its weight in gold. Six bottles have made me perfectly well, without a sign of the old troubles I had suffered with for seven years, and my weight has been increased, too. I consider it a duty to recommend Tanlac."

Tanlac is for sale by all good druggists. Accept no substitute. Over \$7 million bottles sold.

Widespread Fear of Timber Famine.

A report just issued by the British Forestry Commissioners says the measures which are being adopted by various foreign countries indicate the existence of widespread apprehension of a timber famine at no distant date, and also expresses the opinion that the results of such a famine would be more disastrous for the United Kingdom than for any other country.

The demand, continues the report, is constantly increasing, and virgin forests are being worked out far more rapidly than was expected, and added: "There can be little doubt that the Government will in the near future have to choose between a resumption of a full planting program adopted by Parliament and taking a risk which no other country is prepared to take."

Not Ambitious for Father.

A New England man who had at various times been a candidate for public office has a small son about six years of age.

On one occasion this lad, who had been meditating upon the uncertainties of kingly existence, asked his mother:

"If the King of England should die, who would be king?"

"The Prince of Wales."

"If the Prince of Wales should die, who would be king?"

His mother endeavored to explain, but the lad, with a deep breath, said: "Well, anyway, I hope dad won't try for it."

Borrow trouble for yourself if that's your nature, but don't lend it to your neighbors.—Mr. Rudyard Kipling.

CUTICURA HEALS BABY'S BLISTERS

Head Covered With Eruptions. Hair All Fell Out. Got Little Sleep.

"When baby was a week old a fine rash broke out on his forehead and scalp, which later formed small blisters. The blisters soon spread and when he was three months old his head was covered with eruptions. He cried and rubbed his head and his hair all fell out. He got but very little sleep."

A friend recommended Cuticura Soap and Ointment. After using he got relief and in two months he was healed. (Signed) Mrs. Allan R. Caldwell, R. F. D. 2, Auburn, Me., Jan. 12, 1922.

Daily use of Cuticura Soap, Ointment and Talcum helps to prevent skin troubles.

Sample Book Free by Mail. Address: "Cuticura," Dept. 1, 144 St. Paul St., W. Brunswick, N.J. Write for free booklet "How to Use Cuticura." Cuticura Soap always without soap.

WANTED—YOUNG LADIES WITH GOOD education to take as secretaries. Three-year course. Apply Williams' Hospital, St. Catharines.

OWN A FARM ON LAKE ERIE IN WESTERN Ontario, the Florida of Canada. Good for full information and our special step day after of free return trip! Grow the big money crop: Fruit, tobacco, corn, beans, etc. In addition to general interest farming. Phone East State, Hamilton, Ont.

Real Irish.
Two Irishmen were working at a quarry, and one fell over the edge. The other, alarmed, came to the margin of the hole and called out: "Arrah, Pat, are ye killed entirely? If ye're dead, shpake."

Pat reassured him from the bottom by saying: "No, Tim, I'm not dead, but spachless."

MONEY ORDERS.
Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Too Sore.
"Why didn't you study your French lesson last night?" demanded Harry's teacher when that hopeful gave no evidence of being prepared in this relation.

"To tell you the truth, sir," said Harry, "My throat was so sore that I could scarcely speak English."

These persons are the most unhappy who believe that happiness is their due.

For the

Boys and Girls

A Wren House in a Post.

Although we put out ten new nesting boxes in the spring for the birds of our garden, we soon found that we were lacking in sufficient accommodations for the wrens. These tiny members of the feathered tribes display here, as they do the world over, a habit of building both false and true nests. They constructed their rough little nurseries not only in the boxes designated for them, but in many others as well, even usurping an apartment in the martin's flat-building. We knew they could not occupy them all.

Yet, realizing their fondness for a goodly number of homes as we never had before, we soon found an opportunity for supplying them. This came about with the construction of a fence between the lawn and the vegetable garden. The supporting posts for the lattice panels were square in shape, and hollow from the top rail upwards. So in some half dozen of the posts we converted this space into private apartments for the wrens, making the openings on the east, or garden side.

It is needless to say that one of these apartments do luxe was soon occupied by a pair of little brown tenants. In due time it sheltered the second brood of wren babies. False nests were promptly built in two of the other flats, but they were never entirely completed, nor at any time occupied, so far as we know. We noted with some degree of satisfaction that these tenants of ours obtained their food almost entirely from the garden, making constant warfare on the many insect pests to be found there during the season. In fact they proved so desirable that we were only too glad to supply them with a private bath on the roof free of charge.

—Frances Higgins.

The Locket in the Pocket.

Mary Alice had come to spend two weeks with her little cousin Cornelia on the farm. Oh, such fun as they had! Especially Mary Alice, for never before had she romped the liveliest day in the beautiful outdoors. She grew as brown as a berry and slept like a top at night. As for chubby little Cornelia, never before had she had such a happy time. Think of having a playmate all day long and some one to sleep with and hug up at night!

"I hope it doesn't rain a single teeny tiny drop the whole time I am here," said Mary Alice one day, as she came in from picking berries.

"See here, Mary Alice," spoke up Uncle John. "Don't you go to making any such wishes, as badly as the crops need a drink of water."

One morning before she opened her blue eyes Mary Alice heard a pitter-patter, pitter-patter, on the tin roof. In two winks she hopped out of bed and ran to the window and saw that the rain was coming down in a torrent.

"Rain, rain, go away!" she cried.

But Cornelia, who was truly a farmer's daughter, clapped her chubby hands and cried, "O goody! Now father's corn will grow!"

Poor Mary Alice did not share Cornelia's enthusiasm, and at breakfast she presented a woeful face.

"I tell you what," said Aunt Flora, "suppose you children go up to the attic and play this morning. Mary Alice, your mamma and I loved to play up there on rainy days."

"That will be jimsy," cried Cornelia, hopping up and down. "May we dress up in those funny clothes in the old green chest?"

"Yes, indeed," answered her mother.

So Mary Alice's countenance gradually changed, and after they had tidied their room they set off in hilarious spirits for the attic. Such quaint-looking old dresses, festooned and ruffled and beribboned, as they found in that old green chest! And such a happy time they had dressing up and playing "ladies" and "social."

About the middle of the morning Aunt Flora's voice came from the foot of the stairs, "O children, come down. Hot cookies and milk for a little party!"

"Goody!" cried Cornelia delightedly.

"Goody, goody!" cried little Mary Alice.

There was a shuffling to get out of the funny dresses. Of a sudden while Mary Alice was struggling with her beruffled dress her hand went into a pocket.

"Cornelia!" she exclaimed. "Here's a deep pocket—and, my goodness, there's something in it!"

Mary Alice, still wearing the beruffled dress, ran down beside Cornelia.

"Aunt Flora! Aunt Flora!" she cried. "Do please look; it's a gold locket—I found it in the pocket."

"Mary Alice!" exclaimed Aunt Flora, reaching for the gold locket.

"Why, you've found the gold locket your mother lost when she was a little girl. It's just too lovely that you should have found it. You see, your grandmother gave us each a locket, and your mother lost hers. Our names were engraved on them; here's Mary Alice, your mother's name. See it, child?"

Mary Alice gave a little squeal of delight and clapped her hands and cried, "My name too!"

"Of course," laughed her aunt.

"But, Aunt Flora," began Mary Alice, "how do you suppose it ever got in the pocket of this funny old dress?"

Aunt Flora looked down at the little figure in the quaint dress, and then of a sudden a light darted over her face.

"Child, I know!" she cried softly.

"Why, it seems like yesterday; your mother and I were playing in the attic, just as you and Cornelia were playing there to-day, and I suppose your mother was afraid she might lose the locket, and she took it off and slipped it into the pocket of this dress and never remembered a thing about it after that."

Uncle John poked his head in the door and cried in his funny way, "What's this? Is Mary Alice going to a masquerade party?"

The little girls just shouted with laughter. Then Mary Alice told him all about the locket in the pocket, and Uncle John said, "Ho, now, you were the little person who wished it wouldn't rain; and if it hadn't rained you wouldn't have gone to the attic to play."

"And then I shouldn't have found the locket in the pocket," said Mary Alice softly as she fondled the locket at her neck.—Linda Stevens Almond, in Youth's Companion.

MOTHER! MOVE

CHILD'S BOWELS

"California Fig Syrup" is

Child's Best Laxative

Even if cross, feverish, bilious, constipated or full of cold, children love the "fruity" taste of "California Fig Syrup." A teaspoonful never fails to clean the liver and bowels. In a few hours you can see for yourself how thoroughly it works. All the souring food and nasty bile out of the stomach and bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful to-day saves a sick child to-morrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. **Mother!** You must say "California" or you may get an imitation fig syrup.

MINING IN CENTRAL BRITISH COLUMBIA

BRIGHT FUTURE AS A MINERAL REGION.

Experts Predict for Province a Formidable Rivalry to Ontario in Gold Production.

A striking feature of the general revival exhibited in Canadian mining affairs in 1922 was the progress achieved by the Pacific Coast province and the general stimulus given to all phases of mining in British Columbia. Not only was work pressed on existing mines, but abandoned works re-opened, new ones developed and a host of new discoveries made. In a survey of the situation, Fred A. Starkey, Commissioner of the Associated Boards of Trade of British Columbia, finds reason for unbounded optimism and faith in the future of the interior of British Columbia as a mineral region.

He points out that the Province of British Columbia can boast of having the most wonderful world smelter which is owned and operated by the Consolidated Mining and Smelting Company of Trail and is equipped with the largest electrolytic zinc plant in the world. It provides facilities for the treatment of silver-lead-zinc, gold, copper, refining of copper, treatment of iron ores, manufacture of lead pipes, sheet lead and zinc, copper rods, sulphates of copper, etc.

The same company owns the Le Roi, Center Star, War Eagle, and other properties in the Rossland camp which have to their credit a value production of some \$90,000,000. It is a known fact that these mines are capable of producing for many years to come. In the Sullivan mines, Kimberley, is the largest lead-zinc property in the world, it being estimated that there is sufficient ore in sight to last fifty years. The value of the ore bodies has been estimated at a round figure of \$181,000,000. At the present time the company is constructing a concentrator with a daily capacity of 2,000 tons.

Demand for Silver and Lead.

In the Portland Canal district is the Premier Mine, which in its short three years of life has paid \$2,400,000 in dividends from December, 1921, to June, 1922, equivalent to three-quarters of its capital. The ore gives high value in gold and silver, the present estimated value of the ore in sight being \$50,000,000.

The Granby, with its large fields of ore bodies, the Britannia, and the Copper Mountain mines have tens of millions of ore reserves and, combined, may safely claim the distinction of being the largest copper producers in the British Empire. With normal prices for the metal it would not be too much to forecast an annual production of 100,000,000 pounds of copper for British Columbia.

With the revival of silver and lead prices many silver-lead mines which have not been operated for some two years are now under steady development, and many leases have been granted on properties hitherto idle.

The "Daughters of the Sea"

For the purpose of making more comfortable and pleasant the hours spent in their home ports by the masters, mates, and pilots of the Pacific, and developing radio broadcasting to their ships while at sea, wives, daughters and sweethearts of mariners living at Seattle have formed an organization called the "Daughters of the Sea."

The Daughters of the Sea plan to bring the home closer to the ship, and the radio will be their chief means toward that end. The club has undertaken the fitting up of quarters on the top floor of one of the city's tall buildings, and in furnishing them with a library, comfortable chairs, smoking accessories, and marine glasses, so that seafarers may watch from the windows the ships making and leaving port.

A powerful radio sending and receiving apparatus is to be installed on the roof of the building, and entertainments, concerts, etc., held in the club rooms will be broadcasted to the ships at sea. The personnel of vessels in any storm area will be cheered by the voices of loved ones at home. A practical service also will be maintained; the location of all ships from the home port will be recorded from day to day. The plans also include the entertainment of visiting captains from other parts of the world. There will be a committee supplying all arriving ships with flowers; and seamen strangers will be provided with comfort and entertainment.

Eventually, it is expected, the Daughters of the Sea will extend their work to all countries by establishing branch chapters.

Changes in Arctic Weather Conditions Affect the Entire Globe.

Arctic regions seem to be warming in certain portions and cooling in others; and as conditions there affect weather all over the earth, experts of the Weather Bureau at Washington are endeavoring to solve the mystery.

In the Greenland Sea, north of Europe, milder weather with less ice than ever before has prevailed during this winter, while in the Bering Sea, and in the regions north of America, unusually heavy ice has been reported. The cause of the unusual conditions has not been fathomed by meteorologists.

The Gulf Stream, which circles around the Gulf of Mexico, passes through the Straits of Florida and sweeps northeastward across the Atlantic and between Iceland and Norway, has been traced by one oceanographic expedition as a warm surface current beyond the 81st parallel of latitude, which would be some 2,500 miles north of Hammerfest, Norway. This expedition sailed as far north as 81 degrees 29 minutes 'n ice-free waters.

Arctic conditions are said to be exceptional in this particular region, and many old landmarks are so changed as to be unrecognizable. Where formerly great masses of ice were found, there are now often accumulations of earth and stones. At many points where glaciers formerly extended far into the sea about the Island of Spitzbergen, 2,000 miles north of Norway, they have disappeared.

The change in temperature has brought about great changes in the flora and fauna of this portion of the Arctic. Former great shoals of whitefish have disappeared from Spitzbergen waters and the seal catch is far under the average. Herring and swelt, however, are now found in great numbers.

In contrast to these mild conditions, the unusually heavy ice in the Western Arctic regions north of Alaska and in the Bering Sea has caused the Weather Bureau to forecast famine conditions in Northern Japan this year.

A Bit Late.

One day on the golf course, says an English paper, Field Marshal Haig asked his caddy what service he had seen during the war.

"One of my brothers," the caddy replied, "was in the infantry, one in the artillery and one was in the engineers."

"But you?"

"Well, I didn't do anyfink," replied the caddy. "But I'm going to do my bit now. I'm going to carry your bloomin' clubs for nuffink!"

Bakers Bake It For You

—no need to bake at home

HERE'S your old-time favorite—full-fruited raisin bread with at least eight tempting raisins to the slice—already baked for you by master bakers in your city.

Simply 'phone your grocer or a neighborhood bake shop and have a fresh loaf for lunch or dinner to delight your folks.

We've arranged with bakers in almost every town and city to bake this full-fruited raisin bread.

Made with big, plump, tender seeded raisins. The raisin flavor permeates the bread. You've never tasted finer food. Order a loaf now and count the raisins.

Raisin bread is a rare combination of nutritious cereal and fruit—both good and good for you. Serve at least twice weekly to get the benefits.

Use Sun-Maid for home cooking of puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid's, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested "Sun-Maid Recipes."

TURKS SEND NEW COUNTER-TREATY, ULTIMATUM DEMANDING ACCEPTANCE

British Cabinet Takes Serious View of the Situation But Will Oppose Any Further Concessions and Refuse Consent to a New Conference.

London, March 4.—The Turkish Government has virtually decided to send a new counter-treaty to the Allies, with an ultimatum demanding acceptance.

The ultimatum will fix a certain date and if the Allies have not swallowed the new treaty by that time, or agreed to call an entirely new peace conference, the Mudania armistice agreement will be denounced. Turkey will then resume a technical state of war with Greece and the Allied powers.

Such is the startling turn which the debate on the Lausanne treaty has taken. Information to this effect is contained in confidential messages reaching official quarters to-night.

The Cabinet takes a most serious view of the situation. Premier Bonar Law and most of the other members of the Cabinet, with the backing of the Admiralty and Colonial Office, have decided finally to take a most firm position. They will oppose any further important concessions, and under no condition consent to a new full conference.

The Ankara messages convey the information that Fevzi Bey, Turkish Chief of Staff, who is dominating the debate, announced in the Grand National Assembly that the General Staff had ordered large military movements and preparations in the direction of the British position at Mosul.

Foreign Secretary Curzon is less positive in his attitude and there are signs he would go further than the

Premier in future dealings with the Turks. However, the Foreign Secretary finds little or no support in the Government for weakening in the face of the Turkish manoeuvres.

Of course, there are all kinds of ultimatums, and the Allies have come to look upon the Turkish variety as less dangerous than the others because the Turks have a habit of changing their minds at the last minute. Nevertheless the new ultimatum in preparation is taken much more seriously because of the latest details of the Ankara discussions.

Ismet Pasha, chief delegate at Lausanne, has been reduced to the rank of a mere expert on territorial and military questions. The voice of the moderate party has been drowned out by the extremists. That portion of the Lausanne delegation which favors war is in the ascendancy, while the treaty advocates are in the background.

Riza Nur Bey, the strongest opponent of the Armenian National Home, has been left to deal with the minorities' problem. The famous lawyer, Tahir Bey, has argued against any special judicial regime for foreigners. Hasman Bey declared Turkey would settle all questions of concessions and economic privileges with separate treaties with the powers.

Officials here explain the Turkish propensity for mind changing may modify this new ultimatum or bury it altogether, but the whole trend of the Turkish Government is now toward a more warlike position.

THE U.S. SHIPS GOLD BACK TO BRITAIN.

It must have been a cheerful sight for Britain to see the incident above. Gold bullion is again being shipped back across the Atlantic to Great Britain. The dock-workers shown in the picture are handling solid gold bricks, which are on their way back to the money centre of the world, London. In spite of the efforts made to wrest that position from the British capital, financiers are satisfied that London's position is as secure as ever it was in relation to the commerce of the world.

POINCARÉ ADOPTS THREE METHODS OF DEALING WITH RUHR DIFFICULTY

A despatch from Paris says:—Premier Poincaré has decided upon three important measures to subdue the Ruhr. They involve:

1. Infliction of the death penalty—by arrangement with the English—upon all Germans responsible for fatal railroad accidents.
2. Imprisonment of all defaulters of the 40 per cent. coal tax until they pay.
3. Movement of "colored" as distinct from "black" troops into the Ruhr.

These steps have not been decided upon without grave deliberation, and the decision regarding colored troops is said to be due to the insistence of Marshal Foch that the colonials have been absorbed to such an extent in the French army that there is no reason why Moroccans and Annamites should not be used for purposes of occupation.

Several of the Ministers have suggested that keeping the 1922 class with the colors will be sufficient, but this idea has been out-voted, and the alternative presented was either par-

tial mobilization or use of colored troops. Partial mobilization would imperil the Poincaré Ministry, in view of the Premier's statement on the day the Ruhr was occupied that no soldier or railroadman would be mobilized, so colored troops are apt to be used.

A despatch from Düsseldorf says:—Two decisions having an important bearing on the administration of the Rhineland and the Ruhr by the Allies are announced at French headquarters here. The first is the final step in giving necessary powers to the French and Belgian commanders to administer the German railroads and the second provides for the collection of an internal revenue tax on tobacco and alcoholic beverages.

In the decree promulgating these decisions the Inter-Allied High Commission's right to operate the railroads along the left bank of the Rhine is turned over formally to the army authorities, partly as a precautionary measure to guarantee the safety of the troops of occupation. The Cologne bridgehead area occupied by the British is not included in this order.

French General Issues Proclamation

A despatch from Cologne says:—General Degoutte issued a proclamation that all Germans in the Ruhr who obey the orders of the French military authorities, and pay the taxes being levied upon them, will be protected from charges of treason by the German Government.

It is also proclaimed that the Allies will not leave the Ruhr until all penalties for obeying the occupational forces have been revoked.

France Receives Coke From Czechoslovakia

A despatch from Vienna says:—One thousand tons of coke are being shipped from Czechoslovakia over Austria to France daily, and the Austrian Government has ordered railroads to expedite the shipment. It is said Austria fears sabotage by railroad men would lead to unpleasant complications.

Czech miners who were being transported to France, and who were held up in Austrian territory, were allowed to pass upon the Government's order. Should Austria provoke them to it, the Czechs might cut off her coal supply.

Miss Muriel Corkery, of St. John, N.B., was admitted to the bar before the Court of Appeals recently. Miss Corkery enjoys the distinction of being the only woman barrister practicing law in the province, her predecessor, Miss Mabel P. French, who was admitted as a barrister in New Brunswick on November 21, 1907, having since removed from the province to British Columbia.

Natural Resources Bulletin

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

The area of Ontario is 407,262 square miles, of which 366,880 square miles is land and 41,382 square miles is water. The province's population in 1921 was 2,933,662, of whom 1,226,379 were rural residents and 1,707,283 were urban. The population represents an average of 8.02 per square mile. There are in the province 25 cities of 10,000 and over and 46 cities and towns of 5,000 and over. In 1921 of a total immigration into Canada of 148,477, 43 per cent, or 62,572 settled in Ontario. There were, in 1920, 686,344 pupils attending public schools, and \$30,626,435 was expended on education in schools under public control.

Two Members of Famous Light Brigade Dead

A despatch from Belfast says:—Thomas Finlay, who as bugler sounded "charge" for the gallant Light Brigade at Balaclava, and thus started the wild ride immortalized by Tennyson, died on Tuesday at Drogheda. Finlay's death follows closely that of Thomas Shaw, a member of the famous brigade, who died at London, Ont., Sunday night.

CANADA ATTAINS STATUS OF NATION WITHIN THE BRITISH EMPIRE

Signing of International Fisheries Treaty With the United States by Canadian Minister, Apart from British Ambassador, Marks a New Departure in the History of Canada as a Self-Governing Dominion.

Washington, March 4.—The treaty between Canada and the United States to control halibut fishing in North Pacific waters was ratified by the United States Senate to-day just before adjournment. It had been blocked temporarily last night by Senator Jones, Republican, Washington, but was approved to-day with an amendment by Mr. Jones providing that its restrictions against Canadian halibut fishermen should apply to all other British nationals.

The treaty establishes a closed halibut season from November 15 to February 15 and creates a joint commission to regulate North Pacific halibut fishing.

When Hon. Ernest Lapointe, Canadian Minister, signed with United States Secretary of State Charles Evans Hughes the international fisheries between Canada and the United States a new constitutional departure was made, under which Canada takes a position of autonomous nationhood within the British Empire. Heretofore such treaties and conventions have been attested also by the British Ambassador.

It is understood that the decision

to have the treaty signed by the Canadian Minister was reached after several official communications passed between London and Ottawa and Washington. It is known the original expectation was that the treaty would be signed on the part of Canada by both Ambassador Goddard and Minister Lapointe.

On Mr. Lapointe's arrival in Washington he was met by representatives of the British Embassy, and proceeded at once to a conference with the British Ambassador, where, it is believed, communications from the British Government were awaiting him authorizing him to be the sole signatory on behalf of Canada. United States Secretary Hughes likewise paid a visit to the White House, and conferred with President Harding in relation. It is understood, to British messages announcing that Canada would deal directly with the treaty through her own Minister.

As this is a change in the attitude heretofore followed by the British Colonial Office, it is interpreted by officialdom here as marking a new departure in the history of Canada as a self-governing British Dominion.

United States Navy Owns Biggest of Zeppelins

A despatch from London says:—The construction of the new Zeppelin ordered by the United States Navy, will be finished soon at the Zeppelin works at Friedrichshafen, according to a despatch from Berlin. The airship will be the largest ever constructed and will start from Berlin for Chicago early in June. It will fly under the American flag, but operated by German mechanics and airship experts. The trial flight will begin in April and several over the Alps are proposed. When everything is perfected the airship will start for Berlin, where the final preparations for the trans-Atlantic flight will be made.

Century Old Man Has Had Only 25 Birthdays

A despatch from Winnipeg says:—Although technically he has had only twenty-three birthdays, J. S. Stevenson of Winnipeg has entered his hundredth year hale and hearty. Mr. Stevenson was born February 29, 1824, and has been cheated out of about 75 birthdays. He even skipped a leap year, because the day was rightfully his in 1900, when by a quirk of the calendar he was missed again. Mr. Stevenson came to Canada when he was nine years old, and forty years ago moved from Ontario to Manitoba.

Buy "Quest" for Canada. Capt. Bernier, the famous Canadian explorer, has purchased Shackleton's famous ship, "The Quest," and thus indicates that Canada is once more to enter into Arctic exploration. He will bring the ship to Canada in the spring.

When a college graduate thinks he is an educated man, he ought to stay in his college until he gets over it.

Hogs, selects and good quality butcher hogs, \$11; thick fat corn-fed hogs, \$9.50.

FRANCE OCCUPIES THREE MORE CITIES

Karlsruhe, Mannheim and Darmstadt Taken Over as Counter-Sabotage Move.

Paris, March 4.—Three great German cities with nearly 1,000,000 inhabitants—Karlsruhe, Mannheim and Darmstadt are now as good as occupied by a French expeditionary force. At the Foreign Office this afternoon the correspondent was informed the advance was a counter-sabotage move.

The Darmstadt railway centre and the Karlsruhe and Mannheim ports were taken over yesterday, although the cities themselves had not been occupied.

Troops headed by armored automobiles and cavalry moved forward at dawn across the Rhine, meeting only a chilly, sleepy welcome. Not more than 1,000 soldiers were engaged for the occupation of each strategic point.

The occupation of the cities themselves, demanding the use of at least two divisions, can be only a matter of time. In order to fill the gap behind, as these troops are brought up, colored soldiers are likely to be moved in.

In some quarters it is asserted the new French advance has not got so much to do with turning the thumb-screw on Germany, as with checking the reiterated refusal of General Godley, British commander, at Cologne, to allow the French to use the main left bank Rhine railway through the British area.

It is stated that with the further move forward to Marburg it will be possible for the French to organize a direct railway system on the right bank of the Rhine from Essen to Strasbourg, via Frankfurt. But to do this it will be necessary to occupy Frankfurt.

It is reported here French and Belgian Governments have agreed on a settlement with Germany which would render the Versailles Treaty null and void, at least as far as France, Germany and Belgium are concerned.

German Ambassador Lunches With British Sovereigns

A despatch from London says:—For the first time since the war, the German Ambassador, Dr. Gustave Stahmer, and his wife, luncheoned with the King and Queen at Buckingham Palace on Thursday.

Six Million for Agriculture. Hon. W. R. Motherwell, Minister of Agriculture, has had estimates totaling \$6,085,560 passed in the Dominion House for his department.

H. H. Stevens, M.P.

In reply to queries in the House at Ottawa made by Mr. Stevens, Dr. Beland stated that Canada has 9,500 drug addicts. Prince Edward Island is the only spot in the Dominion free of drug peddlers and addicts. Thirty Chinamen have already been deported and two hundred more are in custody charged with handling drugs.

CIVIL WAR CEASES CRIME WAVE FOLLOWS

What London Express Correspondent Found to Exist in Ireland.

A despatch from London says:—Civil war in Ireland has ceased and given place to a widespread orgy of crime without political significance which the forces of law are steadily crushing. This is the substance of a lengthy survey of the situation in Ireland sent by the Dublin correspondent of the Daily Express. He says the Government has the rebel forces completely on the run and is likely to keep them so until the trouble ceases. He describes them as merely scattered-roving bands under robber chiefs and robber gang organizations. No district, adds the correspondent, can long be termed a rebel stronghold and the Government grows stronger daily.

Ice-Shooting Started in Niagara Gorge

A despatch from Niagara Falls, Ont., says:—Ice-shooting for the spring has commenced in the Niagara River gorge. Employees of the Niagara Gorge Railroad Company started their annual work of dislodging overhanging ice from the walls of the gorge.

The ice during the early thawing weather is dangerous to traffic on the trolley tracks at the foot of the cliff, and all masses that appear to be loosened are shot with a heavy charge of explosives.

Residents at the north end of the city consider the shooting one of the best signs of spring.

Hawaii's Sugar Harvest Largest for Eight Years

A despatch from Washington says:—Hawaii's sugar cane harvest during the year ended last September 30 was the largest in eight years, according to an estimate by the Department of Agriculture. Production for the year was placed at 1,184,000,000 pounds, or 13 per cent. more than that for the previous year, and larger than the average for the previous ten years.

EN PASSANT.

"O TEMPORA! How is it?" I asked. "How is it, George, that there is so much diversity of opinion about daylight saving?"

"The people who have adopted the earlier hour seem quite enthusiastic about it, and I notice, that when you speak to the old-timers about their opposition about daylight saving, they simply go berserk, they foam at the mouth, and display other indications of mental rabies: The very mildest of them suddenly look savage, and snap like angry bow-wows, when the subject is mentioned. I cannot understand it. What can be the underlying cause of their unreasoning dislike? Can you solve the problem?"

Old George shot at me, over the top of his spectacles, one of his searching glances, and then I knew that he knew I wasn't exactly pulling his leg, but only "just talking". "H'm," he said, "h'm, if your work is done, and time is hanging heavy on your hands, you may sit down and reason it out for yourself; then," he added, "you can begin again, and you'll get no nearer a solution of the mystery, than when you started."

"When you consider problems like this, and Church Union, you will need plenty of time and leisure; more time than the extra hour in the morning gives you, and when you use up a few gallons of midnight oil, you will begin to realize that the days are altogether too short for you to undertake saving so much wood; it's a job that would beat Joshua, and he could fix things to suit himself."

I daresay you have read about him: It is on record that he was an early riser. He rose at dawn and walked round the town blowing a ram's horn, which I take it, was the forerunner of that bleating instrument we now call a saxophone. I prefer the old name, being less disguised. Joshua was the first Daylight Saver on record, and he went the whole hog. What was an hour or two, more or less, to him? "Sun, stand thou still!" he said, and is not this written in the book of Jasher? "So the sun stood still in the midst of heaven, and hastened not to go down, about a whole day; and there was no day like that, before, nor after it."

OPPOSITION to any change is as much a first principle with many, as a desire to reorganise, and to be for everlastingly tinkering with things, is a sort of religion with as many others.

Innovations do not seem to be to penetrate their encrusted habits. Even the obvious advantage of saving an hour's light bill, per diem, does not arouse them out of their moss-grown antiquity. Some even allege that moving forward the hands of the clock an hour is an interference with actual time. They have grown into the habit of regarding time as a rigid fact, instead of a mere mark, a relative measure of duration, as in the rotation of the earth of its axis. If there is anything wrong in saying it is twelve o'clock when it is only eleven, we are equally as much in error when we standardise sidereal time. We reckon 24 hours to a day, when there are really only 24 hours, 56 minutes, and 4,038 seconds. It would be as reasonable to mark time according to the Montreal bye-laws. Montreal says that barbers shops shall not open until seven o'clock, and that stands, although it is eight o'clock with the man who wants a shave. An improvement here suggests itself which would insure uniformity. Let seven o'clock be the beginning of the day, and call it one o'clock; Noon would then be at 6 - the middle of the day, and midnight would be at the next 6 - the middle of the night. Sounds all right doesn't it? You would have the day hours from 1, to 12, and the night hours similarly marked to 1 to 12. If some go-ahead towns, like Boston or Lachute, were to set their clocks that way, the rest of the world would have to follow, and all would be peace and concord. There would be no doubt about standard time, nor overtime, nor milking time, nor any time at all, except the time it takes some folks to see a joke.

IF SOME of our Councillors and Aldermen, the guardians of our going and coming, object to our changing the name of the hour, they cannot reasonably object to our earlier rising if we want to. They ought to encourage us rather. Yet the enterprising barber who opened at 7, d.s. was fined. That is one of the gross travesties of justice which cry aloud for the repeal of grandmotherly legislation, and the curbing of aldermanic tendencies to misuse self-made

authority. The fossilised bye-law is law, and must be obeyed though the heavens should fall.

Those pre-historic lawmakers have been spending their lives like Simeon Stylites, the pillar hermit; out of touch with the rest of the world, and like the famous, but misguided Syrian, they are in danger of losing their power of locomotion.

Simeon Stylites, according to his rather colourless history, spent thirty seven years on the top of a pillar only four feet square, and seventy feet up in the air. Some say it was only 66 feet high, but anyway, he saw fit to live there. It became his world, and he had the dickens of a job to keep on it. He objected to living on the common plane of his fellowmen, and became the martyr of his habit of seclusion. Like the objectors to D.S. he had a giddy time in maintaining his position, but it didn't amount to much in the end. Simeon passed into history, like lots of other cranks, and all that is worth remembering about him is that he beat us all in his economy of shoe leather and gasoline."

THE LINKMAN.

A movement is under way to protect the game of this section by enlisting the aid of sportsmen in shooting game destroying animals and birds before they have an opportunity to cause destruction during the nesting and mating season. Plans are being made to have every sportsman interested in game protection, spend some time ridding woods, field and marsh of predatory hawks, owls and crows, weasels and others who annually kill ten times as much game as all gunners combined. It has been stated that the red squirrel alone will kill 200 birds a season, while the great horned owl destroys annually coveys after coveys of quail. Special efforts are being made to enlist the aid of game lovers against the crow who is described as destroying individually more birds of all kinds, more birds' eggs and young poultry than any other bird that ever flapped a wing.

All game destroying animals and birds are classed by sportsmen and game lovers as vermin, and it is expected that vermin hunting clubs can be organized here and that members of established gun clubs will join in the movement by going into the woods and shooting as many game destroyers as they can find.

ST. ANDREWS EAST.

Mr. Bission, of the Bank of Nova Scotia, spent Victoria Day in Montreal.

Victoria Day brought a number of people out from Montreal for the holiday.

Dr. MacIntyre, of Vankleek Hill, was a caller at the Rectory, Sunday afternoon.

Mr. and Mrs. G. Muredy, of Montreal, were week-end guests of Mr. and Mrs. W. Jeffrey.

Mr. and Mrs. E. A. Lammoth and children, of Ottawa, spent a few days at their summer home here last week.

The dance held in the town hall, Wednesday evening, (Victoria Day) under the auspices of the Y.P.D.C., was very successful.

Miss B. Robertson, with her neices, the Misses A and B. Barclay, Montreal, spent the holiday and week-end, with her parents, Mr. and Mrs. H. W. Robertson.

Mr. W. Shaw and Mr. W. A. M. Howard, of Montreal, were also holiday and week-end guests of their parents, Dr. and Mrs. G. F. Shaw and the Rev. W. A. and Mrs. Howard.

Mr. and Mrs. Geo. Simpson and two children, of Montreal, are now settled in their summer home here; while Mr. Powell and his niece, Miss Dennison have opened their summer home.

The funeral service, of the late Mr. Kingsbury, who passed away on Saturday afternoon, May 26th, was held in the Christ Church, Sunday afternoon, the Rev. W. A. Howard officiating. Most heartfelt sympathy is extended to Mrs. Kingsbury in her bereavement.

The Artful Friar - Continued

Next morning after early prayers, He admonished them one by one, About their foreign Rotterdam ways, And the mischief they had done, Such doings as the previous night, Upon his hallowed head, He objected to a china crown, Especially a watershed, It might well suit a Baptist, Who delights in whole submersion, But not to a holy Roman, Who thrills at slight immersion. For conduct so distasteful They must bow to his decision, By doing penance at his will, And show their true contrition. In future they should mend their ways, From which they must not falter By studying well the precepts, Of the Rubrics in their Psalter, So when their footsteps slide or glide, From the true path of the altar They would not be easily led, By Satan and his halter. Their punishment he had considered, That they walk to town and back, With hard pen in their shoes.

RYHOS-Brownsburg

CARS FOR SALE.—One McLaughlin 1921 Coupe, in perfect condition, run about 5,000 miles. This machine is just as good as a brand new one, five cord tires, one never on, Battery new. Price is \$1,500 and is a genuine bargain and we guarantee this machine. Also a Hudson Super-Six 7 passengers, in good conditions for \$800.00. Apply to E. M. McGregor, Ormstown, Que.

The Late Robert Ness.

Robert Ness passed away at his home in Howick, Que., on May 24.

In the passing of Mr. Robert Ness Canada has lost one of its foremost live stock breeders, and a man who has well served the nation in this respect. He was born in Renfrewshire, Scotland, in 1853, and at the age of 13 came to Canada with the family and settled at Howick.

When quite a young man he gained a nationwide reputation as an importer and breeder of high-class Clydesdale and French coach horses and Ayrshire cattle. He exhibited at all the leading shows, and every fall could show a string of first prizes which testified to the place which he held in this regard. Perhaps one of his most successful winnings was that at St. Louis World's Fair in 1904, where he won a prize for the best herd of Ayrshires bred by their owner. As a judge of horses and cattle he had few equals, and his services were sought for far and wide. He established the "Woodside" Stock Farm, near Howick, and with the aid of his sons as they grew up and worked with him made a great success of the live stock business. There is hardly a horse-man or cattleman on the continent, and even in Scotland, who was not acquainted with the late Mr. Ness.

Church Union Meeting

Question discussed by
Dr. Dickie and Rev.
A. G. McKinnon.

There was considerable interest manifested in the meeting held in the Presbyterian Church last Tuesday evening which had been called for the purpose of hearing the presentation of the Church Union situation. The Rev. Mr. McKinnon in opening the meeting read a portion of scripture from Ephesians 4., after which he announced that the speakers who were to have conducted the discussion had failed to put in an appearance with exception of Dr. Dickie, so that it was necessary for him to vacate the chair in order to uphold the stand in defence of Church Union. But before retiring from the chair I wish Dr. Dickie to answer a statement made at the meeting recently held in the Town Hall, in which Dr. Dickie gave out the impression that I had been assisting in conducting meetings in the Churches of Montreal in the interests of the Union movement, and to which I gave denial. I ask him now to withdraw that statement or name the church.

On retiring from the chair the Rev. Mr. McLeod was asked by the meeting to preside, and without further preliminaries he called upon Dr. Dickie to present the church union situation from the point of view of those opposed to the union.

Dr. Dickie thought when coming to the anti-union meeting recently that he had done nothing unethical because many meetings of like kind had been held in the city, and as Mr. McKinnon was a member of the Union Committee he thought those in opposition had interests in common and were quite justified in holding the meeting.

At this point Mr. McKinnon pressed Dr. Dickie to answer the statement as to his having assisted in Union meetings in the city, but he was unable to name any church and thus corrected the wrong impression then formed.

Dr. Dickie then gave many reasons why he wished to defeat the Union Movement if possible, the first reason being given that it would mean the abolition of the Presbyterian Church. This, said the speaker, is the opinion of one of the best legal councils, that of Eugene Lafleur of Montreal. The Presbyterian Church has stood for a great deal in Canada. There may have been some rather regrettable streaks in our life, but it has made a real contribution to the life of Canada. I believe the Church has grown up in the Spirit which has lived for four centuries and is still full of vitality.

I am a disbeliever in organic union because it is a bold experiment that will end in confusion. The Church Union has received an impetus to break old institutions and put new ones in place. Modernism is abroad in the new church. The Church Union has not the right ideals. If logical, why are they only striving to effect this Union in Canada, why not the whole world? I have not much confidence in righteousness that is made by legislation.

There are many places where there are several churches of same denomination. Why not bring them together and so prevent duplication.

Local bodies are autonomous. Both churches may be independent but they are both struggling. The same thing applies to our colleges. We have 6 or 8 colleges in Canada where two could do the work.

Too much store is being set by organization. What we need is the simple faith and simple devotion of Jesus Christ. All the machinery cannot get us anywhere if we have not the true spirit.

Speaking of the argument used that the assembly had gone so far they were unable to turn back Dr. Dickie thought the wisest of men sometimes put their pride in their pocket and as we don't believe in papal infallibility they could acknowledge their mistake. The Rev. Mr. McKinnon thanked Mr. Dickie for the kindly spirit he had manifested in the discussion of the subject and then launched out in a resume of the 23 yrs during which the Union has been under consideration. He traced back to the first committee then formed for the purpose of economizing in the Western fields, where he himself had personally labored and knew their needs as well as many whom the previous speaker had quoted as authorities. Many times we travel hundreds of miles in which services have been held in rooms and kitchens and we have been followed by Methodists and others preaching in the same homes etc, and it was to avoid the continuance of this state that the union was sought.

The movement has gone on step by step and every meeting held has been conducted with splendid cordial spirit. The question to discuss is the Draft Bill. As far as Union is concerned there is going to be Union for the people have said so and the people are the great majority who have not been cajoled or rushed into the Union but have calmly, prayerfully and considerably entered into this great movement for the greater good.

I wish for peace and harmony and I love my church as do others and while I give every one their rightful opinion, I will not take second place. I'm favorable to Union because I love the Church, and when the false-

hood was circulated in the papers, which has not yet been recalled by Mr. Campbell, although I wrote him as to the facts, that gentleman claims he doesn't mind the union but he wants to hold on to the name Presbyterian.

Well, if that's all, let us lose the name as long as we hold on to the name of Jesus Christ which is the name above every name. We have a problem no people have ever had before, and that is to Christianize the people with 110 different languages and 79 different religions. We won't abolish Presbyterians even if Eugene Lafleur does say so. We have equally legal authorities that have carefully considered the matter from all points and as loyal Presbyterians we must abide by the decisions of the general assembly who have taken their mandate from the people.

When the minority dominates the majority then we are being led on to autocracy. We can't prevent the great split which leaders of the minority are endeavoring to bring about.

There are now 1200 union congregations who are already worshipping as one because the Assembly in 1916 agreed upon union and from that day co-operation went into effect and is still going strong.

Confusion follows when the minority doesn't care what the Assembly says and goes on to the work of undermining the action of the Assembly by appointing a key-man in the varied congregations, and they had theirs in a church of mine, although I was not aware of it.

We have 400 families in this Church and I do not know what the Membership of the Methodist Church may be, but of this I can assure you that we shall remain as we are for some time to come. It all depends on the desire of the congregations and where we are strong enough there is no question. What we want is greater spirit of harmony. If our Lord were here in the flesh do you think he would pray that we might all be one and at the same time tell us that we must not unite.

We are uniting because conditions are compelling us. Dr. Dickie has used figures to say how many will leave the Church, but don't be frightened by figures, nobody knows yet. It was reported that several left this Church when the letter was read, but there was only one. It's comparatively easy to get notoriety these days by jumping into the press in opposing union, but there is no more a question of Presbyterianism being abolished in the union than a woman is abolished when married to her husband.

Our present duty is to trust our leaders and go forward in the Spirit of prayer to advance the interests of our Church and I feel we are doing that when we are supporting Union.

The chairman in closing, wished to assure the congregation that the draft bill that was going before the Assembly would be dealt with according to the dictates of the delegates, all of whom were privileged to amend and amend such clauses as would be of greater interest.

CUSHING.

Mrs. Frank Douglas, of Montreal, and Miss Mildred Douglas have been the guests of Mr. B. Noyes for a short time.

The Misses Ruth V. Dobbie, and Ivy Graham spent the 24th and weekend holidays at their respective homes.

The ever busy stork paused at the home of Mr. and Mrs. Bryce-Barrington early last Saturday morning and left them a baby boy.

Chalmers' Settlement House Officers have once more decided to locate for the summer months in Cushing, having chosen for their residence this year the empty Schagel house now the property of Mr. F. Graham.

Mrs. Franklin Hodgson, of Montreal, and daughters Lucille and Gwyneth were guests of Mr. and Mrs. Frank Fuller over the week-end.

Registered Percheron Stallion.
HIAWATHA 9540

Hiawatha is a beautiful dark dappled grey, 5 five years old, weighing 1,700 pounds. This horse will stand at the stables of Mr. James Clark, of Upper Lachute, every Saturday during the month of June, and the balance of the season at the proprietor's stables.

NOTICE! This horse is Government Inspected Class 1.

We have fine line of boys Blue Serge Suits. All sizes now.
W. Banford & Son

ST. ANDREWS EAST

Mr. Bert Jones was the week-end guest of Mr. and Mrs. Charles Pease. The Literary Club will meet on Tuesday next at 8 o'clock at the home of Mr. and Mrs. W. Pitcairn.

Mr. and Mrs. Munday, of Montreal, were the guests of Mr. and Mrs. W. Jeffrey over Saturday and Sunday.

A very successful Ladies Aid was held at the home of Mrs. Norman F. MacGregor on Thursday afternoon. The Choir Practice will be held on Saturday evening at 8 o'clock at the home of Mr. and Mrs. Tom Webster.

The Religious Education Association have decided to hold their next year Convention at St. Andrews East. (D.V.)

Rev. J. Burgess attended the Convention at Lachute on Saturday under the auspices of the Religious Education Association.

Mr. and Mrs. George Rorke, of Montreal, and daughter Ruth, were the guests of Mrs. G. Jeffrey and Miss Hendry over the week-end.

Mr. and Mrs. Charman spent the week-end and entertained Miss Ritchie, Miss Hopper, and Miss Jean Clendinning as their guests.

Mrs. G. Kilgour and family from Beaumont were the guests of Dr. and Mrs. B. N. Wales on Sunday, having motored over. Miss Tita Wales accompanied them back as far as Montreal, where she spent a couple of days with her sister Evelyn.

Among those who visited Lachute to hear the views on the Church Union question were: Dr. B. N. Wales, Mr. and Mrs. W. J. Pitcairn, Mr. and Mrs. C. A. Hyde, Mr. W. J. Rodger, Miss Mabel Rodger, Rev. and Mrs. J. Burgess, Mr. and Mrs. W. Bradley, and Mr. and Mrs. J. P. Bradley.

Public Worship will be held in the Presbyterian Church next Sunday, June 3rd, at 11 a.m. and 7.30 p.m. The Pastor Rev. J. Burgess will preach at both services, Sunday School 10 to 11 a.m., in the Church. Everybody welcome. "The law of the Lord is perfect, converting the Soul; the testimony of the Lord is sure making wise the simple." Ps. 19-7

LAKEFIELD

The Lakefield Women's Institute held a very successful pie social for the school-closing on Saturday evening, May 19th, in the Church Hall. The programme consisted of recitations by several of the school children, songs and instrumental music by: Duet, Rev. Mr. Mount and Ruth Todd, Violin selection, Mr. Owen C. Todd, Quartet, Messrs. Robt. Tomalty, Huntley Buchan, Douglas and Owen Todd. Solo and Duet Owen and Douglas Todd, Chorus, Miss Grace Copeland, Grace Mount, Valma Tomalty, Ruth Todd also Rev. Mr. Mount, Messrs. Naylor Mount, Robt. and Roy Tomalty. Recitations by the Chairman, Rev. Mr. Lummis, received loud applause.

Prizes were presented to the pupils of the school by the chairman. The special prizes for progress in Scripture given by Rev. Mr. Lummis, and the punctuality prize were won by Oscar Tomalty. Prizes for Neatness was won by Myrtle Evans.

A pleasing feature of the evening was the presentation by Rev. Mr. Lummis to Miss Ruth Todd of a beautiful silver bar-pin set with rhinestones, from the Institute, to which Miss Todd expressed her sincere thanks for the lovely gift and kindly remembrance.

The Auction Sale of Pies, conducted by Mr. Tomalty and Miss Sherritt, created much excitement and amusement. Tea and sandwiches were served by the ladies. Proceeds amounted to about \$28.00.

If you want your car nicely painted and fixed up take it to the Western Garage, McQuat's Old Foundry. Repairs neatly and promptly executed, and prices right. Try us out.

GOLDEN WEDDING

An interesting event took place at the home of Mr. and Mrs. Duncan McKiddie, Brownsburg, Que., Saturday, May 26th, 1923., when they entertained in honor of the fiftieth anniversary of the marriage of Mrs. D. McKiddie's parents, Mr. and Mrs. James Tomalty.

The happy couple were married fifty years ago in Alpena, Michigan. Mrs. Tomalty being Miss Grace Jane Green, formerly of Harrington, Que. Nine children blessed this union, two daughters and seven sons, five of whom are still living. Mrs. McKiddie, William and David of Brownsburg, James of Montreal and John of Hoozier, Sask. They have also fourteen grandchildren.

All the family were present at this happy re-union with the exception of one son, who with his family moved to Hoozier, Sask., five years ago.

The Rev. J. G. Poitras in congratulating the bride and groom spoke of their past useful lives and how glad he was to be with them on this great occasion and hoped they would live to enjoy many more happy years, he then offered up a prayer of thanksgiving.

Supper was then served and a very enjoyable social time spent.

Guests from a distance included Mr. and Mrs. Joseph Tomalty of Montreal, the only surviving brother,

Gathering of S.S. Workers.

The Annual Convention of the Argenteuil District Branch of the Religious Education Association was held last Saturday in the Presbyterian Church with President J. W. McQuat in the chair. The attendance was not as large as anticipated, but a profitable time was spent as the Rev. A. S. Reid dealt with "The Organization of the Present Day Sunday School with regard to the grading of lessons."

At the afternoon session two very interesting addresses were given by Rev. W. T. Jones on "Our Privilege and Opportunity in our work for the young," and Mr. Jno. L. Hodgson spoke on the "Sunday School Programme of the Churches for the Teen Age Pupil."

The meeting decided to hold its next convention in St. Andrews East.

Women's Institute Meetings

Miss Roach, Supt. of Women's Institutes and Miss McQuat, Demonstrator, will give demonstrations on School Fair work on the following days: Monday, June 4th, in Jerusalem School house, at 2 p.m.; Tuesday 5th, Lakefield School house, at 2 p.m.; Wednesday 6th, St. Andrews Model School, at 2 p.m.; also Miss Roach will hold institute meetings, Monday evening, 4th in Upper Lachute, 8 p.m.; Tuesday evening, 5th, Hillhead, at 8 p.m.; Thursday June 7th, the Argenteuil Co. Executive will meet in McArthur's Hall, Lachute at 2 p.m. Miss Roach will be present. All Institute members are requested to be present. Refreshments will be served. All meetings on Standard Time.

Care of Flock at Lambing Time.

Breeding ewes should be put in a good thriving condition and kept in that condition throughout the winter up to lambing time, care being taken to have them neither too fat nor too thin. Ewes that carry excessive flesh usually develop a good deal of fat inside, which prevents the proper development of the lamb and very often is the direct cause of so many litters at lambing time. On the other hand, ewes that are too thin have not sufficient nourishment for the proper development of the young, either before or after birth. A good ration for breeding ewes is a mixture of one and one-half parts of oats to one part of good wheat bran, fed at the rate of one-half pound per ewe per day along with two pounds of good roots and two to three pounds of good clover hay per day. Roots should be reduced in the feeding ration one month previous to lambing time.

At weaning time the shepherd should keep a watchful eye on the flock both night and day for, very often a little careful attention to the newly born lambs means an extra one added to the flock. This is particularly true with the young mothers and in cases of twins or triplets. Very often one of these is weaker than the other, and should it become chilled may die before it gains sufficient strength to take nourishment from the mother.

When the lambing season is early a comfortable lambing pen is essential; in fact it is profitable at any time, for very often ewes with twins or triplets when left in the flock will drown their lambs. Furthermore, ewes after lambing require more generous feeding, and the lambing pen makes this possible. A careful watch to assist the weak ones will reduce the number of losses. In cases of heavy milkers, milk fever may occur. In such cases the udder should be bathed in warm water, thoroughly dried and rubbed with pure hog lard as hot as the eye can stand. If their teats become sore from lambs biting them, two or three applications of vasoline per day will help them. All wool on the udders that prevents the lambs from feeding properly should be clipped off with the shears.

It has been noticed that lambs soon begin taking a little of the grain mixture fed to their mothers, therefore it is advisable to have a small run made at one end of the pen into which the lambs only may go and be fed separately. A good grain mixture for lambs is two parts of wheat bran, one part of crushed oats, one part of finely ground corn meal and from one-quarter to one-half part of oil-meal. Whole oats will do, but the former is preferable. Should a ewe not have sufficient milk for her young, the lamb may be materially helped out by giving it two or three feeds per day of cow's milk.

All lambs should be marked a few days after birth, thus saving trouble later on. All ram lambs that are undesirable as breeders should be castrated and all lambs docked at the age of two or three weeks.

As many of the failures in the sheep industry can be attributed to carelessness and negligence during the breeding and lambing seasons, it is most essential that careful study and attention be given to the flock at this time if success is to be assured.

Keep the Cow Comfortable.

The dairy cow, to give a large yield of milk of high butter-fat per cent.,

must be made comfortable. Most dairymen stable their cows most of the time during the winter. I find that on an average, my cows are stabled twenty-three out of every twenty-four hours. Mild days I allow my cows to remain in the yard from one to two hours, but in chilling weather they are in the yard just long enough for watering. I believe daily outdoor exercise adds to the health and comfort of the dairy cow.

My cows are tied with swinging stanchions. These stanchions are suspended on a short chain about six inches long and are also fastened at the bottom with a short chain about the same length. I like this stanchion as it gives the cows a great deal of liberty, yet they are properly tied. I do not like the rigid stanchion. For years we tied our cows with chains about the neck, attached to a vertical bar. This tie was far ahead of the rigid stanchion from the standpoint of comfort of the cows, but the swinging stanchions are the most satisfactory of all.

To stable cows comfortably, a properly arranged and constructed stall is essential. We have used plank floors, cobblestones and block floors in our stable, but the cement floor is the most satisfactory, beyond all question. It is easy to keep clean and sanitary and because of this there is no unpleasant odor about the stable. I consider foul gases about the stable as injurious to the health of the cows as to the dairymen himself. I believe a smooth, tight floor an important factor in the sanitary stabling of cows.

The stable should have plenty of windows on all sides, if possible, and especially on the south side. During winter the days are short and many days are cloudy. Unless there are plenty of windows the stable will be very dark and gloomy. The dairy cow, like a human being, enjoys sunshine. My cows are stabled along the south side of my barn so that the sun can shine directly upon the cows.

Good ventilation is absolutely necessary to the health and comfort of the cows. Few farm barns are equipped with an adequate system of ventilation. However, fresh air may be brought into the stable in various ways if care is exercised to avoid direct drafts. One or more windows may be raised several inches and a board fitted across the opening in such a manner as to allow fresh air to come in without draft. A door may be left partly open on the side opposite the prevailing winds. Abundance of fresh air is essential for the health and comfort of the dairy cow.

To consume her food profitably the dairy cow must have a comfortable bed to lie on. Plenty of clean, dry bedding not only provides comfort but assists in keeping the cows clean, and the stable sanitary. I like to use all the bedding I possibly can in my stable as it not only keeps my cows clean and makes them comfortable, but materially increases my manure supply.—Leo C. Reynolds.

Study the Individual Cow.

From various experiments in feeding dairy cattle, and from observation made through the records of cow-testing associations, it has been found that good feeding will increase the milk flow of the average cow from 25 to 50 per cent., says Mr. A. H. White, Chief Dairy Promoter of the Dominion Dairy and Cold Storage Branch, in his recently issued pamphlet on cow-testing. To bring this increase about, it is not sufficient for the dairymen to know the requirements of his herd as a whole; he must know the necessities of each individual cow in order that she may produce the most. This knowledge can be obtained only by keeping records of each cow; but, as Mr. White points out, where there is a milk sheet, it is an easy and simple matter to apperceive the grain ration according to each animal's production. It is a uncommon thing to find dairy cows being fed a ration of silage, hay and straw with a little oat chop and no grain at all. Yet they are expected to produce milk profitably! As the author further says, protein is a necessity and should be supplied either in good alfalfa or clover hay or in such concentrates and grains as all meal, cotton seed cake, gluten meal, bran, oat chop, and other meals.

Small Profit in Scrub Stock.

To secure quality and early maturity in beef animals (and it might be added for economy), a good pure-bred bull is essential. With present prices it would pay most farmers to buy such an animal now, or if not, to set about making arrangements for the use of a pure-bred bull in the spring. If there is no animal of the kind near, the Dominion Live Stock Commissioner has arrangements for overcoming the difficulty, and will furnish information on request.

Died Bald.

The pupils had been writing a history essay, and when the teacher was correcting the papers she was puzzled to find this remark in one of them: "King John died bald."

On being questioned, the boy who had written this said: "Well, teacher, you said he died without helmet!"

TO WREST WEALTH FROM THE HINTERLAND.

When geologists, mineralogists and prospectors all agree that Northern Quebec has the richest bit of wealth producing land yet untapped in Canada, it can be readily expected that there will be the next great gold rush. In spite of intense winter weather thousands of gold seekers are already in Rouyn Township seeking the precious metal. An unprecedented rush is predicted for the spring when the waterways open up. It lies just east of the Quebec border and not far distant from the rich ore fields of northern Ontario. The water route to the new field will be by a chain of lakes and rivers from the head of Lake Temiskaming.

HOGS

The feeding value of alfalfa for hogs has been demonstrated in numerous instances, but it would not seem amiss at the present time to offer a brief discussion on the matter. Because of its suitability in a variety of forms, it has proven to be a boon to the hog raiser.

When used in the form of green feed either as a sole or pasture crop, when cured and used as hay, or ground into meal, it has been found that almost invariably this feed has taken a foremost place when compared with the other legumes.

In the cured state as hay it is particularly well adapted to meet the requirements of mature hogs as a roughage. The hogs consume only the finer portions of the stems and the leaves, and it is, therefore, very important when harvesting this crop to preserve as many of the leaves as possible.

Analysis shows that alfalfa contains upwards of 16 per cent. of crude protein and about 8.5 per cent. of mineral matter or ash. Both these constituents are relatively important and in the case of the former, forms one of the most expensive constituents of the ration. When thus procured from alfalfa hay, which is a

relatively inexpensive source, it permits of a material reduction in the cost of the ration of mature stock.

There is little advantage to be gained from chopping alfalfa or grinding it into meal, except for young pigs, because of the fact that the increased value has not proven sufficiently great to offset the additional cost. In the case of young pigs, however, which are incapable of handling any appreciable quantity of roughage, alfalfa can be used in the form of meal to good advantage.

Because of the peculiar limitations of the hog in the handling of roughage, this class of stock cannot make substantial gains on alfalfa pasture alone without the addition of concentrates. Some form of meal is necessary in order to produce economical gains. Experimental results have shown that when on alfalfa pasture the most economical as well as the most rapid gains are realized when from 2½ to 3½ pounds of corn or barley meal are supplied for every pound gain in live weight. It was further found that the most economical gains on alfalfa pasture are obtained from hogs which weigh in the proximity of 100 pounds when placed on the pasture.

It is a generally accepted fact that somewhat greater gains may be ob-

A Mad March Hare Party

Here is a rather novel idea for an entertainment, known as the March Hare's Party. If you are well acquainted with Alice in Wonderland, you know all about March Hare.

The invitations are written on cards and pasted on the top of each card is a little brown rabbit, running. A few touches of the pen make the eyes and whiskers, and then we have a hare on a mad chase. Beneath the picture is the verse:

Will you come to the March Hare's party
And be as mad as mad can be,
And with the Hatter and the Dormouse
Sit down for a cup of tea?

He has invited only a chosen few,
And hopes that you will be there;
Come March twenty-seven at eight o'clock
And please the Mad March Hare.

The rooms are arranged as hatter-skelter as possible: Pictures upside down, an old umbrella blown inside out over the door; pussywills scattered about in confusion. In each of the guest rooms is a basket containing a rabbit surrounded by little bows of various colors, each bow having a mate in another basket. A card containing this rhyme is given to each guest:

Please go upstairs and take off your hat,
And while up there get a bow;
But do not stop to have a chat,
You can do that later, down below.

Each guest accordingly selects a bow, and after all are assembled downstairs finds a partner wearing a bow to match. They talk for five minutes, then separate, each to write a description of the other in three, not more than four lines. The assembled guests then read their verses and the winner of the one voted the best receives a large rabbit with a yellow bow about its neck.

Each guest is next invited to take a sheet of large paper and crayons, and to draw the best March Hare he can. A prize is given for the best.

The game affording the most fun comes next. All sorts of little favors and funny objects have previously been wrapped up in bundles of various shapes and sizes. Each guest is given a bag containing twenty-five beans, and when all are seated, the auctioneer reads:

The Mad March Hare brought with him to-night

These bundles, which seem so queer to me;
He says there are wonderful things inside,
But that we must bid and see.

He tied them up with paper and string
And wrote on each its name
For he said he thought they might get wet
In case it began to rain.

For each he brought a bag of beans,
With which to bid high or low,
These being very much better, it seems,
Than the stuff that men call "dough."

So please the Hare and bid on these things,
And we hope they will make you glad;
But if you should find them silly or wild,
Remember the March Hare is Mad.

Then the bidding begins and a lot of fun will follow. Someone will bid most of his beans on a package labeled A Pair of Slippers, only to find himself, when he has opened it, the proud possessor of two banana peels. Another package marked The Most Important Part of a Dog will prove to be a piece of bark. Most of the articles should make nice little favors. Then distribute small cards reading:

The Hatter and the Dormouse
Are just now drinking tea;
The March Hare too has joined them
And that's where you should be.

"No room, no room," they may cry out,
But do not let that matter;
Just push right in, and like Alice
shout,

"There's plenty of room, Mr. Hatter."

The dining-room can be strewn with pussywills and little rabbits. Crepe paper with brown rabbits can probably be obtained. Use for the centre-piece a tea table mounted on a box covered with a yellow crepe paper. Have at it the Hatter, a Dormouse and a Mad March Hare drinking tea. These little figures can be procured at a five-and-ten-cent store. Use little cups and saucers, and around the base of the box have rabbits.

The place cards should be written upside down and backwards, and at each place should be a verse from Alice in Wonderland which can be read aloud during supper.

tained where a system of selling is practiced than when hogs are pastured, but the not inconsiderable additional labor and expense involved in the cutting and hauling of the crop has resulted in the production of pork by this method being fully as expensive when compared on the basis of cost per pound of gain in live weight.

Grading of Eggs.

The only exported farm produce, excepting fruit, in which we do any grading worth mentioning at the present moment is eggs, and when it comes to eggs Canada ranks highest, next to the home article or the Holland article, which of course, reaches Britain inside of twenty-four hours. Thirty dozen crates, "Canada Firsts," were quoted some shillings higher than American selected eggs, Americans being naturally our greatest competitors," testified the Deputy Minister of Agriculture of the Dominion in a delivery on his return from a personal investigation of the British market. In connection with this statement it is interesting to note that Canada is the only country in the world with egg standards based on the actual quality of the egg. These standards are based on weight, size of air cell, visibility of yolk, firmness of the white, and cleanliness. In the standards, eggs are divided into three classes—fresh, storage and preserved, cracked and dirty. The class for fresh is again divided into the grades, specials, extras, pullet extras, first and seconds, and the class for storage and preserved into the grades, extras, firsts, and seconds. If, inspected eggs are intended for export and are up to grade, they receive the Government mark, consisting of a maple leaf design bearing the words "Canadian Eggs" "Government Inspected."

A system of inspection for imported eggs has also been adopted and came into effect on October 7, 1922, since which time inspectors working under the Dominion Department of Agriculture have been able to report an improvement in eggs from the United States compared with shipments earlier in the season. In ad-

dition, the selling and purchasing of eggs for home consumption by grade has been encouraged, and retailers report complete satisfaction in the method of grading adopted. An advertising campaign with this object in view has just been concluded by the Department, covering the significance of grading and the culinary uses in which the different grades may be put. A provision in the regulations relative to grading requires wholesalers and retailers to live up to any grade names they may adopt, and to be sure that the eggs sold under those names meet the requirements and definitions when candled.

Safety first, and all the time. Harnesses in good repair are accident insurance.

Brantford Concrete Mixer

Add Concrete Improvements to Your Farm
The farmer of to-day realizes the advantages of concrete-built silos, troughs, fence posts, etc. The "Brantford" is the biggest value farm silo mixer. Loads and unloads from either side. Made for hand or power. On wheels, or mounted on trucks, with or without engine. Write for booklet. (Good Shipley & Muir Co., Ltd., 200 Wellington St., Brantford, Ont.)

A MOTHER'S HEALTH NEEDS GREAT CARE

Care of Home and Children Often Causes a Breakdown.

The woman at home, deep in household duties and the cares of motherhood, needs occasional help to keep her in good health. The demands upon a mother's health are many and severe. Her own health trials and her children's welfare exact heavy tolls, while hurried meals, broken rest and much indoor living tend to weaken her constitution. No wonder that the woman at home is often indisposed through weakness, headaches, backaches and nervousness. Too many women have grown to accept these visitations as a part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple and relief at hand. When well, it is the woman's good blood that keeps her well, when ill she must make her blood rich to renew her health. The nursing mother more than any other woman in the world needs rich blood and plenty of it. There is one way to get this good blood so necessary to perfect health, and that is through the use of Dr. Williams' Pink Pills. Mrs. W. T. Riley, R.R. No. 1, Apple Hill, Ont., has proved the great value of Dr. Williams' Pink Pills to mothers, and tells her story as follows:—"Two years ago, after the birth of my boy, I became very weak and run down. Gradually I lost weight and energy until I was unable to do my housework. I could not sleep, my nerves would twitch and jump so that I arose in the morning with heavy aching limbs and head. Indigestion helped to make the misery worse, and my heart would palpitate terribly. I doctored steadily for a year without getting better, but just dragged along, feeling that I would never be well again. But one lucky day, on the advice of a friend, I began treatment with Dr. Williams' Pink Pills. I have taken only six boxes, but I wish you could see the difference. I am now able to do my work, go about and enjoy myself. I feel so entirely like a new woman that I advise every weak or ailing woman to try Dr. Williams' Pink Pills and I know they will get beneficial results."

If you are ailing, easily tired or depressed, it is a duty you owe yourself and your family to give Dr. Williams' Pink Pills a fair trial. What this medicine has done for others it will surely do for you. You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

To My Mother.
Deal gently with her, Time; these many years
Of life have brought more smiles with them than tears,
Lay not thy hand too harshly on her brow,
But trace decline so slowly on her brow
That like a sunset of the northern clime,
Where twilight lingers in the summer time,
And fades at last into the silent night
Ere one may note the passing of the light.
So may she pass—since 'tis our common lot—
As one who, resting, sleeps and knows it not.

—John Allen Wyeth.

A crowd of a million persons standing in comfort would cover seventy acres.

Londons have lost the knack of laughing, according to a German business man who has been in the metropolis for the first time since 1914.

TOO EASY

"It's altogether too easy to get a divorce."
"Well, maybe if it wasn't so easy to get something to get a divorce from it wouldn't be so easy."

Three Wishes.

If a fairy came to me
With the gift of wishes three,
First, I'd have a home (quite small)
With roses on the southern wall,
Four red chimneys, leaded lights,
And shutters for the winter nights.

Then, I'd have a garden, too,
Where the old world flowers grew;
Lavender in misty beds,
Flaming scarlet poppy heads,
Fruit for jam, a kitchen plot,
Wallflower and forget-me-not.

Last, a white fence and a gate—
Where the One Beloved could wait,
Watching the long road for me,
Looking outward tenderly,
—And it's a pity, so I say,
That fairy folk have passed away!

—V. Arlett.

Neither Seen Nor Heard.

A small girl was at her first grown-up dinner party, and being wedged in a corner of the table, she was quite overlooked.

She suffered in silence for some time, until at last, during a lull in the conversation, a pathetic little voice piped up: "Does anyone want a clean plate?"

Surnames and Their Origin

EBERLEY

Variations—Eberly, Eberle.
Racial Origin—Welsh or Cornish, German, possibly Scottish, English.
Source—A locality, a given name, a characteristic.

Here is a family name with several possible sources, which certainly may be assumed to have developed from more than one of them.

Unfortunately it is unusually difficult to get track of it in the Middle Ages, but from known data, considered in the light of linguistic development, the following explanations present themselves.

As a German family name it may be considered the development of a nickname indicating a personal characteristic, from "eber," a "board," and meaning "boardlike," figuratively "stern" or "bold." Or it may have come from the given name indicating this characteristic.

As Welsh or Cornish British it would be the development of "aber-lee," indicating a marshy place where two or three streams come together.

The Gaelic equivalent for this would be "eabar," and the name, developing in the section where highlands and lowlands of Scotland fuse, might be due to unconscious redundancy. Those speaking English coming across the locality known as "Eabar" might conceivably add their own descriptive word "lea" to it, not knowing that the meaning of the two words were virtually the same.

As an English family name it may be a development of a Saxon given

Secret.
I know a thing that no one knows
Save only one and I.
So frail it is, a thread of life,
So great, it moves the sky.

I dare not tell it if I would,
And would not if I dared.
It is so shining even gold
Is only dull compared.

But he must tell it—I must wait,
As modest maidens do.
My little heart, will be glad
To find I know it too!

—Helen Frazee Bower.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this, the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels, and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

MAN OF LETTERS THANKS TANLAC

Canadian Writer Declares He Never Saw Its Equal for Building One Up.

"Tanlac is a faithful old friend that never fails me," declared James A. Brain, 671 Gerrard St. E., Toronto, Ont., recently. Mr. Brain is one of Toronto's best known citizens, and in addition to being a successful business man, has written many poems and songs that have gained wide popularity.

"I've been taking an occasional treatment of Tanlac for four years, and it keeps me in fine condition. Why, right now, I feel like I could hold ground in a foot race with any man my age in Canada."

"Before taking Tanlac, I was all run-down, had little appetite, and was suffering from indigestion. I wasn't sleeping well and was often so weak and nervous I couldn't attend to business."

"Well, sir, all these ailments disappeared with my first treatment of Tanlac, and to this good day I've been eating, sleeping and feeling fine. In all my seventy years, I've never seen the equal of Tanlac, and I just wouldn't be without it."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

ITCHY PIMPLES ALL OVER FACE

And Shoulders. Burned Badly. Cuticura Heals.

"My trouble started with pimples breaking out all over my face and shoulders. The pimples were large and red and itched so badly that I could not sleep. They were very sore and my clothing aggravated them."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample which helped me. I purchased more, and after using four cakes of Cuticura Soap and three boxes of Cuticura Ointment I was healed." (Signed) William C. Steen, 39 Peabody St., Buffalo, N. Y.

Use Cuticura for all toilet purposes.

Opened Solomon's Pools.

In its solution of the vexed problem of a water supply in Jerusalem the Department of Public Works in Palestine has contrived to combine utility with romance, writes the Jerusalem correspondent of "The London Morning Post." In the days of the Roman occupation, when the population of the Holy Land was no smaller, apparently, than now, Jerusalem was well supplied with water. It has occurred to the department to make use of the Roman reservoirs and aqueducts, of which the ruins can still be seen.

Thus the Pools of Solomon, so called from being near the Gardens of Solomon, and of second century date, three large reservoirs, with a total capacity of 40,500,000 gallons, situated some eight miles from the capital, are again, after centuries of disuse, supplying Jerusalem with water. Some difficulty was found in repairing leaks, but two of the pools have already been sufficiently cleared out and restored to fulfill their original purpose.

The department has even found it possible to use the surface aqueduct and tunnels, which the Romans made, so as to secure connection between the pools and their main source of supply, a spring rising in a cavern named Bir Darash. This was effected after the removal of much silt and stones. So history is repeating itself at Jerusalem.

Petroleum in Spain.

The Spanish Government will drill two 2,000-metre wells in a search for petroleum in provinces where it is believed to exist.

When a dog barks at night in Japan the owner is arrested and sentenced to work for a fixed time for the neighbors whose slumber may have been disturbed.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, soon shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

BACK ACHED TERRIBLY

Mrs. McMahon Tells How She Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for a run-down condition after the birth of my baby boy. I had terrible pains and backache, and was tired and weak, not fit to do my work and care for my three little children. One day I received your little book and read it, and gave up taking the medicine I had and began taking the Vegetable Compound. I feel much better now and am not ashamed to tell what it has done for me. I recommend it to any woman I think feels as I do."

—Mrs. J. R. McMahon, 152 Harvey St., Chatham, Ont.
Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has for nearly fifty years been restoring ailing women to health and strength. It relieves the troubles which cause such symptoms as backache, painful periods, irregularities, tired, worn-out feelings and nervousness. This is shown again and again by such letters as Mrs. McMahon writes, as well as by one woman telling another. These women know, and are willing to tell others, what it did for them; therefore, it is surely worth your trial.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women." O

Sad Fatality at Beech Ridge

Little 5 year old "Patricia" Burnt to Death.

Child Burned to Death.

Just around the noon hour on Wednesday the home of Mr. and Mrs. Funcheon of Beech Ridge, was destroyed by fire and their little five year old daughter Patricia was burned to death. How the fire started is not known, but Mrs. Funcheon, on hearing the cries of the two children who had been sleeping, rushed upstairs and found the hall and bedroom all ablaze. Escape was impossible through the house and Lyle rescued Mrs. Funcheon and one child through the window, and on making the second attempt to rescue little Patricia

he was driven back by an out burst of flame. The house being a double one Lyle ran into the old house and broke his way through the partition only to be barred by the fierceness of the blaze, and nothing further could be done. It took but a short time for the large homestead to become a mass of smoldering ruins consuming in its merciless fury the dear little tot who had been the pride and joy of the home but a few hours before. Mrs. Funcheon was badly burned and removed to the Montreal Hospital where she lies in a critical condition.

ARUNDEL.

Church Services, on Sunday next, 3rd June, will be as follows:—

Anglican.
Laurel 10.30 a.m.
Glen 3.00 p.m.
Weir 7.30 p.m.
Grace Church, Arundel 7.30 p.m.
S. S. Grace Church 2.30 p.m.
Rev. Geo. H. Gagnon, M.A., Rector.

Arundel Union Church.
Owing to the absence, at Conference, of the Pastor, Rev. Albert Johnson, there will be no services.

S. S. Arundel, as usual 10.30 a.m.

The Girls Branch of the W.A. will meet on Saturday, 2nd June, in Grace Church, Parish Hall, and a good attendance is requested.

The Supper and Concert, by the Ladies Union of the Union Church, held in Stanforth's Hall, on May 24th Empire Day, was a decided success.

An excellent Supper was served from 7 to 9, and a large number sat down to a hearty meal, afterwards, an excellent programme of songs, choruses, Recitations, etc., was carried out and all present had a jolly good time.

A moose was seen in the vicinity of this village, by several people, on Sunday last. It had been driven here, no doubt, by the bush fires.

Mr. John Hope, Jr., of Lachute, is the guest of Mr. and Mrs. C. J. Stanforth.

Mrs. Wm. Gass, of Boston, is on a visit to her parents, Mr. and Mrs. Jas. Riddle.

One more automobile has been added to the large number here, a new car having been secured by Mr. A. J. Morrison, Agent of the C. N. Ry's.

The property of Mr. Walter Moore, here, has been rented by Dr. Wm. L. Morrison, V.S., where he proposes operating an extensive Poultry Ranch.

Messrs. Perley and Dennis Stanforth, and Mr. Carl Waldron, have returned to Lachute, after spending the week-end here.

Amongst the Cottages at Bark Lake occupied for the week-end, were those of Messrs. Bulley, Beaugie, Jarvis, Reeve, Kingham, Cope, Silver, Walker, Adams, Pardy and Wothington.

Mr. and Mrs. Peterson, and baby boy, of Montreal, are the guests of Mr. and Mrs. W. H. Kerr.

A very narrow escape from destruction by fire on Saturday, May 26, occurred at the farm of Mr. H. F. Ronald. He was at some distance from the house engaged in sowing, when a spark from the house chimney lodged in the shingle roof of the Grainary, which is within 10 feet of the house.

Before Mr. Ronald could arrive on the scene, the roof was blazing furiously, and a high wind was blowing. However, having a plentiful supply of water, close by, by active work the fire was put out.

CUSHING

Miss Lottie Bryerton was a guest of Miss Wheelahan for a few days last week.

Mrs. E. and Miss Pearl Dawson were guests of Mrs. Fraser Watson on Tuesday.

Mrs. Jas. Watson spent a week recently the guest of her daughter Mrs. Norman Dowd at Ottawa.

Owing to Rev. Mr. Usher's suffering from a very bad cold, no service was held in St. Mungo's on Sunday.

Mr. Leonard Young and Mr. Frank Rowan spent the latter part of the week at Mr. Young's bungalow at Sandy Bay.

A very largely attended meeting of the St. Mungo's Ladies' Association was held at the residence of Mr. Walter Smith on Thursday last.

Mr. and Mrs. Geo. Bromby and two little daughters motored up from the city and spent the latter part of the week as guests of Mr. and Mrs. T. Weir Sr.

GRENVILLE.

Miss Laura Cousins spent the week-end in Lachute.

Miss Gladys Grey, of Montreal, is spending her vacation with her parents, Mr. and Mrs. Thos. Grey, of Grenville Bay.

The Misses Ayers, of Lachute, were Sunday guests of their aunt, Mrs. Dumas, at the C.P.R. Station here.

Mr. and Mrs. Carson spent Empire Day in Point Fortune.

Miss Eva White, of Ottawa, was the guest of her parents several days last week.

Miss Mabel Pridham, of Montreal, has been visiting her brother and his family at her old home the past week.

Master Edwin Pridham has also been spending his holidays with his parents.

Mr. Dan Morrow, of Montreal, visited his sister, Miss Edna Morrow and his brothers here last Sunday.

Mr. Alex. McPhee, of Montreal, was the guest of Mr. and Mrs. Chas. Steele here several days last week.

IN MEMORIAM

In loving remembrance of a dear husband and father, George B. Carpenter, who departed this life May 31st, 1922.

A Precious one from us has gone
A voice we loved is still.
A place is vacant in our home
Which never can be filled.

Inserted by his loving wife and family.

IN MEMORIAM

In loving memory of Norman Leonard Reilly, who departed this life May 31st, 1922.

Mother and Father

How our hearts with anguish quiver
Never will his memory fade
And our thoughts will always linger
Round the grave where he is laid.
Oh! our home is sad and lonely
How we miss his tender foot-steps
And the voice we loved so well.

Mabel and Willie

Fire at St. Agathe.
A terrible fire broke out at Ste. Agathe last Saturday resulting in the loss of some 150 homes. This is the second big fire in Terrebonne County as it was only last December that the town of Terrebonne was visited by a great conflagration.

SEALED TENDERS, addressed to the Postmaster General, will be ready, the 22nd June, 1923 for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 6 times per week on the route between LACHUTE & LAKEFIELD from the 1st October, 1923 next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Offices of LACHUTE and LAKEFIELD, and at the office of the District Superintendent OFFICE OF THE DISTRICT SUPERINTENDENT, POSTAL SERVICE.

VICTOR GAUDET,
Acting District Superintendent,
Montreal, 8th May, 1923.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

ANNOUNCEMENTS.

The marriage of Miss Agnes Margaret Hay, daughter of Mr. and Mrs. John Hay, of Lachute, to Dr. Harold S. Hooper, eldest son of Mr. and Mrs. F. H. Hooper, of Brownsburg, is taking place quietly on Tuesday evening, July 3rd, at eight o'clock. (Daylight Saving Time).

Mr. and Mrs. Charles Stewart announce the engagement of their eldest daughter, Mary Ethel Hawkins to Mr. Ernest Erratt Baldwin of Lachute. The marriage will take place on Saturday, June 23rd, at Methodist Church, Brownsburg, Que.

The guests of Mr. and Mrs. W. H. Scott on Sunday were Mr. and Mrs. D. Hodgson and son Keith of Comoy and Miss Betty and Helen McConnell of Montreal.

Mr. and Mrs. Robt. Hamilton and daughter Shirley, Mrs. Alex. Pollock, Miss Hannah Smith, and Mr. Edmund Smith, were at MacDonald College on Thursday to attend the closing exercises and distribution of Diplomas, Prizes and Medals.

Mr. Col. Keefler, on Friday last inspected the Cadet Corps of Lachute High School in physical drill, signalling and shooting of the corps, all of which was pronounced especially good. It is to be hoped that the Cadet Corps will be carried on as the physical development is a great asset to the young lads.

We are very proud of our Argenteuil young people who have been attending McDonald College, who all have received Model Diplomas as follows: Katie Silversen, Dalesville; Hugh Simon, Arundel. Blanche Smith, Lachute; Mary Rodger, Lachute; Ruby McPaul, Brownsburg; Bernice Rodger, St. Andrews East; Lillian Hamilton, Lachute, and Isabel Owens, Lachute.

Owing to the inclement weather, the two hours of fun by the children, of Brownsburg, was not so successful as had been expected. Those however who were at the Victoria Hall, on Tuesday evening, could see much time and labor had been spent in preparing for the splendid programme of songs, drills, and playettes. Those taking part were G. Golpin, V. Golpin, A. Monk, A. Fletcher, L. Fletcher, L. White, W. White, E. McGibbon, E. Highfield, and J. E. McQuaig.

FOR SALE.—A large touring car, in good condition. For further particulars. Apply to Watchman Office.

FOR SALE.—A farm wagon in good repair, will sell with or without box, also a large stone boat, suitable for road work. Will sell cheap to quick buyer. Apply to J. W. Scott Carter, Main St., Lachute, Phone 182 r 3.

Watch and Clock Specialist.
Bring your repairs to Mr. Joseph Belanger who will do all your work in prompt order, but he wishes to say that he will be in his shop on Thursday, Friday and Saturday only of each week, so you will please take note.

LOCAL NEWS.

Miss Mabel Reilly is visiting friends in Montreal this week.

Mr. W. A. Reilly motored to St. Amede on Tuesday last.

Miss Georgina Baldwin was in Montreal on Tuesday last.

Mr. and Mrs. R. Golpin and son David spent Monday in Montreal.

Miss Ida Patterson of Montreal was a week-end visitor in town.

Misses Frances and Wilma Jess spent the week-end at Clear Lake.

Mrs. Keeman, of Montreal, was the guest of Miss E. Creswell this week.

Mr. Reg. Henry, of Montreal, was the week-end guest of Mrs. Geo. Christie.

Miss Gladys Shaw of Montreal was the guest of her parents for the week-end.

Mr. Albt. Conley, of Avoca, spent a few days in town this week visiting friends.

Miss M. Harkins and Miss Winnie Silversen of Montreal spent the week in Lakefield.

Mrs. A. Mathews left on Tuesday to attend the W.M.S. Convention at Smith's Falls.

Miss Ethelwyn Wright of Montreal was the week-end guest of Mrs. Stuart McPaul.

Mrs. Crabbe, of Montreal, was the week-end guest of her daughter Mrs. Geo. Creswell.

Mr. and Mrs. Geo. F. Bowden, of Montreal, were visiting friends in town this week.

Mrs. Geo. Calder and sons, Geo. and James were week-end guests at 16 Island Lake.

Miss Lily Hampton returned on Tuesday from a pleasant visit spent with friends in Montreal.

Messrs. Jas. Combie and Sam Guenette left on Monday to take a position in Three Rivers.

Mrs. W. F. Hynes and Mr. G. W. Hynes, of Montreal, were guests of Mrs. W. Duncan this week.

Mr. Dan Bates and Mr. Robt. Stewart and sons of Montreal were week-end visitors at Lake Louise.

Mrs. R. McArthur and daughters Gertie and Ruby, of Rockway Valley, are visiting friends in town.

Mrs. Robert Scott, of Raven, Alta., was the week-end guest of her sister Mrs. A. Steele of Brownsburg.

Mrs. A. Steele, of Brownsburg, left on Saturday to spend a week or two with her son Mr. A. Steele in Ottawa.

Mr. and Mrs. Albert Cote, Mr. and Mrs. Albert Vincent, and P. P. Vinet of Montreal were visiting friends in town.

Rev. C. H. Schutt, M.A., B.D., of Toronto, was the guest of the Misses McGibbon while in Lachute on Monday of this week.

We are pleased to congratulate Miss Catherine Burwash on having received her degree of B.A. from the University at Toronto.

Mrs. Mitchell and infant daughter, Miss Marion Gail and Miss Kathleen Bradley of Montreal were week-end guests of Mrs. R. J. Bradley.

The Misses Eva and Annie McCluskey and Mr. Stanley Scarf, of St. Amede, and Miss Annie Combie were Sunday guests of Mrs. H. Reilly.

The Lachute Baptist Sunday School annual Pic-nic is being arranged to be held on Saturday afternoon, June 16th, in Mr. E. M. Patterson's grounds.

Mrs. MacIlhagga and son, Mr. and Mrs. Moore and H. Moore Jr., and Miss Ina Hutcheon motored through from Montreal to the former's summer home in Dunany.

CARD OF THANKS.—Mr. and Mrs. Godfrey Dixon, Dalesville, and Mrs. A. Smith of Arundel, and family wish to thank all those who were so kind during their recent sad bereavement.

Dr. Willis M. Hooper, accompanied by Mr. and Mrs. Ernest Hay and Miss Cully, motored from Rome, N.Y., to attend the McGill Convocation where Dr. Hooper received his degree of D.D.S.

Messrs. L. L. Legault, H. Ayers and Notary Gaetan Valois, trustees of the French School Board, were in Montreal on Tuesday in connection with the project of erecting a new school in the West End to replace the old French School near the St. Julien Church.

Fishing stories are generally discounted about 50 or 75 p.c. just about this time, but Messrs. T. Miller and James Yelland have just returned from a fishing trip at Lac des Isles. Ten pounds were among the catch and several friends in town can testify who generously received a share of the spoils.

Mrs. R. McArthur is spending this week at Norway Bay.

Mr. F. Sanford spent the holidays visiting in Montreal.

Mr. J. B. Letourneau spent a few days in St. Hyacinthe last week.

Miss Houston of Ottawa was the week-end guest of Mrs. Houston.

Mr. Thos. Fraser spent the week-end visiting his daughter in Ottawa.

Mrs. Harlow Giles is spending a few weeks visiting her son in Ottawa.

Mr. and Mrs. John Mackie, of Montreal, were week-end visitors in town.

Mrs. J. D. Murray, of Ottawa, was the week-end guest of Mrs. Wm. Deacon.

Miss Muriel Walker of Huntingdon was the week-end guest of Mrs. Geo. Deacon.

Miss F. Roe of Ottawa spent the week-end visiting friends in Brownsburg and Lachute.

Mr. Ian McLaren, of Montreal, was the week-end guest of the Misses S. and E. McGibbon.

Dr. A. Stewart and Miss Bessie Stewart, of Montreal, were guests of Mrs. T. Christie over Sunday.

The Ottawa Dairy had their stables replenished this week with another consignment of Ayrshire Cattle from East Settlement.

Mr. Sterling Pollock, of Cedardale, Ont., and Miss Lottie McAllister of Montreal were guests of Mrs. Hugh Pollock this week.

Mr. Jos. Gagnier is back on his old homestead at Lake Louise again. He is preparing to entertain summer visitors in a royal way and is keeping regular boarding house and hotel.

The Misses Dorothy and Muriel Scott and Harold Smith, of Dixie, and Mr. Roland Tucker, of Cote St. Paul, were guests of Mrs. H. Scott on Sunday.

Mr. and Mrs. Jno. Thorburn and family, of Montreal, also Mr. and Mrs. Grace, Mr. Hampton and Mr. Gilmore, of Rosemere, were the week-end guests of Mrs. Jno. Thorburn.

Mr. Duncan Paul, of Saranac Lake, spent a few days at his summer home in Lake Louise last week and also visited friends in town. On his return he was accompanied by Mr. Jas. Pollock who will visit him for a few weeks.

Montreal W.A. Visit Lachute.

Under the careful training of Mrs. Loiselle, of Montreal, sixteen young ladies came out last Saturday at the invitation of the local branch of the St. Simeon's Church Girls W.A. and a splendid gathering of friends in the Victoria Hall were very appreciative of the manner in which they presented the play "The W.A. Impersonated".

Mrs. Ferrabee, W.A. President of the diocese of Montreal gave a most interesting address in which she explained the history of the organization and its wondrous growth since it was started by seven women in the city of Ottawa 30 years ago. She outlined briefly its four-fold object of Prayer, Influence, Work and Gifts and gave a real inspiration as she unfolded the many ways in which the W.A. was assisting the advancement of God's Kingdom.

A pleasing social hour was afterwards spent when refreshments were served and then the young ladies left for a nice motor drive around the town winding up at Mrs. Robt. Miller's where they were royally entertained until time for their return to the city.

A unique feature of the invitations was adopted by the use of small aprons in which those attending were expected to deposit the size of their waist at the modest price of 1 cent per inch. By this means the sum of \$40.00 was realized.

CHURCH NOTES.

Rev. C. H. Schutt, M.A., B.D., of Toronto, Superintendent of Home Missions of the Baptist Convention of Ontario and Quebec, visited Lachute, Brownsburg and Dalesville on Monday of this week, in connection with the work of the local Baptist Churches.

Arrangements have been made whereby the Dalesville Church will be served by a student-pastor, who is expected to arrive shortly.

Services in the Baptist Church, Lachute on Sunday next, June 10th, will be at 11 a.m., and 7.30 p.m., conducted by Pastor Jos. McDermott.

Sunday School at 9.45 a.m., all Daylight Saving Time.

Service in the Baptist Church, Brownsburg, on Sunday next, June 10th, will be at 3 p.m., conducted by Pastor Jos. McDermott of Lachute.

Presbyterian Services for June 10th, Lachute at 11.00 a.m., and 7.30 p.m. Please note change of hour for evening service.

Rev. N. Waddell will preach Upper Lachute at 11.00 a.m. (Standard Time.) Brownsburg at 3 p.m. (Daylight Time.) Special Children Service. Rev. A. O. Lloyd will preach.

For the Boys and Girls

PLEASURES OF SPRING.

The meadows are thrilled
With the robins so gay.
The orchards are filled
With the blossoms of May.
The little boy's laughter
By the brook on the hill,
Makes mother call in rapture,
But no answer from Bill.
Then at last little footsteps are heard,
Trudging along on the creaking old
bridge,
Nearing the house with a voice like a
bird,
Plucking the flowers that grow on
the ridge.

When bedtime has come
And his prayers are said,
Spring is his hum
As he tumbles in bed.
—Francis L. Lee.

A DOG'S LIFE.

My neighbor's dog is dead.
So ends a tragedy of captivity that
afflicted the kindly animal all the
days of its joyless life. A prisoner it
was born, and a prisoner it died, with
none, I think, but I to see that it was
suffering.
I remember, ten years ago, when
Parkinson spoke to me over the garden
fence, telling me he had seen a
litter of pups in a friend's house. "I
want a big dog," he said, "and I've
asked for one of those pups."
He got it. He was delighted, and
so was his wife. They kept it closely
guarded in the house, for fear, they
said, that anybody should run off with
it while it was young.
They trained it to take its food
obediently out of a tin, and to be
"clean," and as it got older they beat
it because it became a nuisance when
its bark grew loud.
Then it tried to run about the house

and it knocked things over and fright-
ened the children. So it was called a
nuisance again, and then Parkinson
began to think of the time when it
would be put outside in a kennel to
guard the house by day and by night.

That time soon came. Meanwhile
Parkinson never took his growing
captive for a walk. He said it was
too strong for him, and he dared not
release it on its own for fear it might
not come back.

One day when I was leaving for
work I saw the bright new dog-house.
A new chain and a protruding bit of
fur told me that the animal was in-
side it.

Well, there was the hound-dog on a
chain. Parkinson was a bit afraid of
it, but he thought it all the better
that it should be ferocious in the job
he was putting it to.

When it howled, like a hungry wolf,
Parkinson would remind us, clearly,
about its wolverine ancestry. But I
have been out to it at such times and
seen agony in its eyes. I have fed it
and it has licked my hand in grati-
tude. But I never told Parkinson. He
would have thought I was softening
the animal.

It got older and its walk went more
slowly, its howl more mournfully.
Parkinson talked of having it de-
stroyed.

But he was saved that effort. He
had destroyed it by his thoughtless-
ness, and one morning his wife found
it dead, lying half in and half out of
the dog-house.

That was the day before yesterday.
Parkinson buried the dog in the gar-
den. "A fine dog? ah! such an intelli-
gent beast!" he said. I withheld
comment.

And to-day a new dog has the kennel.
Already I see he treats the shiny
path his unhappy brother dog made.
He is also on the chain.—W. L. D.

with no spoken comment, though, they
say, one poor wounded fellow who was
brought in dying, saluted toward the
dog.

After the war was over, someone
took the dog back to England and sent
him to Omsby's old home. I knew the
rest of his story only through Derrick,
whom I happened to meet in London
two years later. "By the way, what
became of that strange dog of Oms-
by's?" I inquired.

"Who owns him now?"
Derrick looked at me with the
glance of one who had expected better
comprehension as he replied briefly:
"No one 'owns' him. He is Omsby's
dog, as he always was."

Then, as though thinking better of
his brusqueness, he added: "Old Chap
never stayed with Omsby's people after
he was taken to them, though he
visits Omsby's mother nearly every
day. Curiously enough he has taken
up his permanent residence with a girl
who lives in a cottage not far from
the Omsby estate. She is a quaint,
rather childlike person, with an odd
kind of beauty, and the dog seems to
have adopted her without any persua-
sion."

"No," said Derrick, answering an in-
quiring glance of mine, "Omsby never
had anything to do with her so far as
anybody knows, though she used to
come in to help his mother serve tea
sometimes. However, she doesn't
'own' Old Chap as you would say, for
he goes his way independently of her.
Sometimes he hunts through the
morning, and often he goes looting
across the hills over the course his
master had ridden so often. Once he
came in to London, and went to Oms-
by's favorite club, where he slept out-
side the room his master had always
used, and claimed as his old privileges,
until some of the servants threatened
to leave because he made them ner-
vous. But they didn't dare to turn him
out, for he left of his own accord the
next morning, and has never been back
since."

Derrick stopped as abruptly as he
had begun. "You think—" I hesi-
tated, after the silence would bear an
interjection.

"No," Derrick replied, "I never
'think.' As soon as a man 'thinks,'
some blooming scientist comes along
to tell him he's wrong. What's the
use!"

A Friend of Goats.

The goat in Europe has long had a
bad reputation as a destroyer of vege-
tation. It has even been alleged that
the goat is responsible for the con-
tinuous sterility of the steppes of Asia
and of Central Africa, since it devours
the shoots of all plants and is able to
live where almost any other kind of
animal would starve. But one investi-
gator holds that the goat has been
misunderstood and misrepresented, and
that its good qualities so far outweigh
the bad that a systematic effort should
be made for the "recapitulation" of
Europe. One of the strongest argu-
ments for the goat is the excellence
and abundance of its milk, which pos-
sesses the great advantage over cow's
milk that it is not affected with tuber-
culous infection and can safely be
used in a fresh state by children and
invalids.

No Time for a Joke.

"Halloo, Jimmy, what's the matter?
Fallen off your bike?"
"No! I was trying to reach a top
shelf by standing on some dictionaries
and they gave way."
"I see—words failed you."

Sees Race Develop Hatchet Face Man.

According to Sir Arthur Keith, a
prominent anthropologist, changes are
taking place in the human frame more
rapidly than at any other period, but
there are no signs of a coming race of
supermen, says a London despatch. He
says one of the most notable changes
is facial. He asserts a long narrow
type of face is being evolved, which he
describes as the "adenoid" type, un-
known in prehistoric times.

Sir Arthur finds, however, that
brains are not increasing but this is
nothing calamitous because, he says:
"I should say most of us have more
brains than we know what to do with.
I don't think one person in fifty of the
present population uses his brains to
half their capacity."

But, while man is not working his
brains overtime, Sir Arthur says he is
not giving his "innards" a square deal.
"We give our digestive tracts no rest,"
he complains. "When we are not whip-
ping them up with patent sauces, we
are seeking to soothe their rebellions by
treating them with patent pills."

Although Sir Arthur predicts the
evolution of the hatchet faced man, he
sees no alteration in his average sta-
ture. During the war it was learned
that this was five feet six inches—the
same as it was in the Neolithic age.
Professional men average five feet
eight.

A King's Iron Crown.

Among the treasures of the King of
Italy figures an historic relic of almost
unparalleled interest. This is the fam-
ous Iron Crown of Lombardy, one of
the most precious heirlooms of the
Italian Royal House.

The crown is made partially of iron.
Tradition declares that it was made
from one of the nails used at the
Crucifixion. This was beaten out in-
to a thin rim of iron, which was set in
gold and adorned with jewels.

Pope Gregory the Great bestowed it
upon Queen Theodolinda, under whom
the Lombards first changed their Arian
faith for the Catholic. Charlemagne
was crowned with it, and so were
Henry of Luxemburg and succeeding
Emperors.

It was also used at the coronation
of Napoleon I. The Emperor of Aus-
tria restored it to the King of Italy in
1866.

Royal Gold Plate.

The plate at Windsor is valued at
nearly \$10,000,000. It includes a gold
service, ordered by George IV., for 140
persons, and one of the finest wine-
coolers in the world, added to the col-
lection by the same monarch; a shield
formed of snuff-boxes, worth \$45,000,
and thirty dozen plates worth \$50,000.

There is also a variety of pieces
brought from the Colonial and Eastern
possessions. The latter include a pea-
cock made of precious stones of every
description, worth \$150,000, and Tip-
po's footstool, a tiger's head with crys-
tal teeth, the tongue being a solid in-
got of gold.

Among the Royal plate at Windsor
Castle is a knife which was presented
to George IV. by the cutlers of Shef-
field. It has over 100 blades.

Her Chief Tool.

Mr. Newbywood—"I've had a hard day
at the office, dear, and I'm hungry as
a bear. Is dinner ready?"
Mrs. Newbywood—"No, love, I'm
afraid we'll have to go to a restaurant
to-night. I've broken the can opener."

Dissolve in
boiling water

Use enough to get
a big lasting suds

Big lasting suds—one
secret of Rinso's amaz-
ing power to dissolve
dirt. If you don't get
lasting suds, you have
not used enough Rinso.

Soak an hour
or more Overnight
(Colored clothes only half an hour)

After soaking, only the most soiled clothes need
a light rubbing with dry Rinso.

Your clothes don't need boiling if you use Rinso.
But if you like to boil your white cottons, use
enough Rinso solution to get the suds you like.

Rinso is made by the largest soap makers
in the world to do the family wash as
easily and safely as LUX does fine things.

HIS MASTER'S DOG

By Alice M. Sanderson

He had no name so far as any one
knew; Omsby always called him "Old
Chap," and the rest of us just referred
to him as "Omsby's dog." When the
war broke out and Captain Omsby
went to France, he took the dog with
him as far as Paris, and the dog took
himself to camp, for he would not be
left behind. His only severe punish-
ment was necessary to teach him that
he must not follow his master into
action, and no one doubted that his
was the hardest task when he stood at
"Attention!" and watched his master
lead the men forward where he could
not go.

Neither Omsby nor the dog were de-
monstrative, and the return was taken
quietly on the part of both, but on-
lookers always felt that there was a
curious bond between the two which
made expression unnecessary. Oms-
by's men regarded Old Chap as a mas-
cot, but no one ever became very fa-
miliar with him. He met all advances
in a friendly spirit, but stopped short
of actual friendship, and the boys
watched his dignity with respect.

Apparently Omsby cared little for
outside support, but more than once
during a seemingly hopeless attack

someone heard him mutter, "Well, we
must finish this and get back to the
Chap." Finish it they usually did, and
an almost uncanny chance nearly al-
ways brought the leader out unscathed.
Once he was wounded, and with
no permission nor invitation, his dog
found him before the ambulance driver
could locate him. Doubtless the en-
suing days in the hospital were the
brightest of Old Chap's war experi-
ences.

Finally, the inevitable happened, and
Omsby was killed. A shell exploded
and his share of the war was all over
except for the soldier's burial of a
form, few save his dog, could recog-
nize. Old Chap's heart was broken,
though he stayed with the company
and watched silently out toward the
battle front. Omsby's friend, Derrick,
was the only one who could persuade
him to eat, but that was so sparingly
that he was little more than the shell
of a dog.

Then, three weeks after Omsby's
passing, when the men came back after
a skirmish, Old Chap rose to "At-
tention!" as he had so often done on
his master's return. With a far-away
look in his eyes, he resumed his life
as he had lived it before his tragedy.
The men accepted the strange change

Will They Find Ark of Covenant Under City of David?

Archeologists Plan to Drive a Tunnel Into the Very Heart of Jerusalem and Hope to Find Even Greater Historical Treasures Than Those Which Greeted the Eyes in the Tomb of King Tutankhamen.

THE sunshine of the Bible land
beats hot. On the banks of a
clay trench groups of Bedouins
from the desert sprawl them-
selves and watch. Brown-skinned men
in bright-colored turbans dig steadily
in the light gray soil. Slender girls
dressed in short-skirted garments walk
with grace and carry filled baskets on
their dark, picturesque heads.

This is the work of archeology. The
busy fellahin in the trenches are dig-
ging up material evidence of the his-
torical truth of the Scriptures. Science,
which led men away from God by ma-
terial findings, oddly enough now leads
men back by the same findings.

Spring this year finds learned men
all over the Bible lands in the act of
combining ruins of ancient cities—a
truly amazing program of archeology
when you put all the pieces of it to-
gether and stop to think about it.

In Mesopotamia experts of the British
Museum and the University of
Pennsylvania Museum are digging at
Ur of the Chaldees, famous as the an-
cestral home of Abraham. Only the
other day men in all parts of the world
were stirred at news of the discovery
there of the oldest temple in the world—
the temple of the god of the moon,
mentioned many times in Biblical writ-
ings.

Close on the heels of this work in
Egypt and Southern Mesopotamia
comes the invitation from the Pal-
estine Administration to the nations of
the earth to come to excavate the City
of David that has slept for its thou-
sands of years beneath the yellow clay of
Mount Ophel, just south of the existing
wall of Jerusalem. The palace of David
rests somewhere in these ruins. The
tombs of the Kings of Judah lie there
untouched, too. It has been conceiv-
ed that perhaps in this heroic

search to be made by all countries
there may be unearthed the Ark of the
Covenant, lost to men forever except
through tradition and said to be buried
somewhere in ruins outside the walls
of Jerusalem. In the ark hidden some-
where it is possible that the tablets on
which the Ten Commandments were
written will be found.

Excavating Near Gethsemane.

Near the Garden of Gethsemane and
the Mount of Olives, so closely as-
sociated with the life of Christ, the
new excavations in Jerusalem will
take place. There is a little garden
watched over by Fra Julio, a Franci-
can monk, birds sing and the flowers
of a million bright colors bloom in
memory of Him who spent His hours
of agony there. Inside the city, where
carts clatter and people bump into
each other, laugh and quarrel or make
bargains—in the midst of all this rises
the Church of the Holy Sepulchre, held
by Roman Catholics and Oriental
churches to be over the exact spot
where Christ was crucified and where
He was laid in the tomb. Since the
year 326 A.D., when St. Helena, the
mother of Constantine, discovered the
three crosses, there has been a con-
stant favoring of this site on which
the Church of the Holy Sepulchre
stands. But of late years another tra-
dition has contended that the hill north
of the modern Damascus gate above
Jerusalem's grotto was the real Gol-
gotha. Near it is a rock with a rock-
hewn tomb, where Protestants have
given the same sort of devotion tend-
er by other churches to the shrines
within the city church itself. To the
south of all this lies the other city—
that ancient City of David precisely
hidden with its wealth of Old Testa-
ment history, buried in dust and clay.

The City of David is about thirteen
acres in area. Its location has been
disputed, but, according to the work
of Dr. George A. Barton, of the Uni-
versity of Pennsylvania, on Archeol-
ogy and the Bible, Scripture confirms
the inference that a primitive people
would have chosen the site nearest
the spring below the eastern hill.

Buried Through the Centuries.

The rewards are rich and worth the
striving. The Ark of the Covenant?
What would it mean to the world to
have this raised from its place of an-
cient burial? About the size of an or-

dinary cedar chest but rich with its
gold rings and sacred memories, some-
where this has slept through the cen-
turies. The Israelites carried the ark
in their journeys, but what finally be-
came of it is unknown. Perhaps, some
contend, it was captured in Nebuchad-
nezzar's siege of Jerusalem. Three
precious articles this ark contained—
the pot of manna, Aaron's rod that
budded and the tablets of the Ten
Commandments. Back in those ancient
Bible days only appointed hands with
proscribed reverence were permitted
to touch this sacred carrier. Death
came smiling from the heavens to

those who violated this law of the Ark
of God.

When the British entered Jerusalem
in 1915 and flung from its walls the
banner of a Christian nation which
had not waved there since 1344,
Charles R. Ashbee, noted English
architect, was put in charge of Jerusa-
lem. Since that time the walls have
been beautified with gardens and
marble benches. Ancient spots of filth
have been cleared out, and flowers
made to grow where all was rankness
before. Tile making and other indus-
tries have been introduced among the
women. Bit by bit houses backing
against the walls of the city are being
removed and in the place of all this
comes Mr. Ashbee's promise of the
most beautiful park in all the world to
surround Jerusalem.

Restoring Sacred Places.

The Dome of the Rock with its ex-
quisite blue and green tile work has
been repaired. This is the church
which contains the sacrificial altar
where once Abraham sacrificed Isaac.
Other restorations have been made.
British engineers have reopened the
conduit originally built by Herod. And
to a British engineering company has
just been granted a concession to con-
vert the waters of the sacred River
Jordan, famous in Biblical history
from the time of Joshua to the time
of Christ. Within five years the company
expects to throw a dam across the Jor-
dan at its outlet from the Sea of Gal-
ilee and parallel the river with canals
and laterals to water the plains of
Sharon and other land familiar to
every Bible reader. And this genera-
tion may yet see this ancient city with
street cars, great industrial plants,
telephones and all the other modern
inventions which feats of hydraulic
engineering bring.

A UNIQUE MEMORIAL TO PIONEERS

Galt, Ontario, possesses one of the most unique memorials in Canada in
its pergola erected by the local Daughters of the Empire to its pioneer
dead. The old church, Kirkmichael, meaning 'The Church on the Hill,' was
founded in 1832, but with its surrounding graveyard has gone into oblivion,
the cemetery being converted into a park. Its old tombstones were disap-
pearing when the D.O.E. stepped in and by careful search recovered them
all and incorporated them into the fine pergola seen in the picture. It is
now the pride of Galt.

1 1 1

"East is East, and West is West,
And never the twain shall meet.....
But there is neither East nor West,
Border, nor Breed, nor Birth,
When two strong men stand to face,
Though they come from the ends of the earth."

Kipling.

THE FORMER British Minister, Lloyd George, who now writes a weekly article for a newspaper syndicate, says he is frankly delighted that the negotiations continue between Lord Curzon, who represents Britain, and M. Krassin, who stands for Soviet Russia.

These negotiations, he says, seem to indicate a genuine desire on the part of both parties to establish a more satisfactory understanding between Britain and Russia.

I am tickled with the "Seems to indicate" phrase. According to the mild-mannered ex-Minister of Munitions, turned journalist, a dog-fight ought to delight us because it "seems to indicate" a desire to reach a satisfactory understanding. We may witness the fight with keen enjoyment being assured that the vital question of which is going to be top dog will be amicably decided when the "negotiations", which seem to indicate the genuine desire, have progressed further. I cannot imagine a more copious name for a dog-fight than that word "negotiations". The bone of contention, and incidentally an ear or two, may be lost sight of during the progress of the genuine desire to reach a satisfactory understanding, but these details ought not to detract from our pleasure in the negotiations, which I take it, means that the under dog shall concur in the decision of the canine that comes out on top.

A newspaper report of the diplomatic intercourse is printed on the same page which gives prominence to Lloyd George's "United Feature" contribution, and calls the negotiations by the suggestive name of the "The Curzon-Krassin Dispute." According to this report the negotiations between the British bulldog and the Russian wolf-hound have degenerated into a spectacular affray. It says, every time they meet (Curzon and Krassin) it is announced that they have come nearer to an amicable agreement, and then one or the other of them makes an attack on the other. Lord Curzon issued a statement attacking Krassin for violating their agreement of secrecy and allowing the alleged summary of the British reply to the last Russian note to appear in the Daily Herald, and Krassin countered by declaring that he is responsible neither for the Herald nor the Daily Telegraph, which also published the summary.

"I have been expecting you," said Old George, when I carried the papers across to see what he had to say in the subject, and about things in general. "There are two things on your mind," he added, with uncanny prescience, "two of your most admired old friends are disturbing you. Lloyd George and Conan Doyle, the one with his open avowal that Soviet Russia must be taken as a partner in trade affairs, and the other with his broadcasted interview with the spirit of the press - Northcliffe, who departed this life some time ago and who continues to manifest his ruling passion for directing earthly affairs. Now, if Northcliffe were to do his psycho-radio work with Curzon or Lloyd George as his medium, either of them would be better able to give effect to his communications than Conan Doyle, who is not what public opinion would class as a practical propagandist. The wave of spiritual reform, which Northcliffe vaguely indicates, could be started by Curzon at the Soviet Conference, or Lloyd George, the consistent apostle of universal peace, could throw himself into the breach, and with his facile pen dipped in Celtic ardour would perform wonders for the movement."

When you come to think it over, there is always something missing in these spirit communications, something which makes the little we get seem fragmentary, and so confused that we cannot make head nor tail of them. What sort of spiritual reform could Northcliffe seem to indicate? What is spiritual reform anyway? and how can mankind accomplish it? Seems to me this word "Wisdom," used in the Doyle-Northcliffe spirit billet, needs explaining. "Wisdom is lost in the scramble for material progress," it says, and again, "when men lose wisdom they invite disaster". According to Webster, wis-

dom is knowledge practically applied to the best purpose: It means prudence and skill in affairs, it may also mean piety. The French equivalent, sagesse, is more to my liking.

Acquired Knowledge and Natural Sagacity constitute Wisdom in the same proportions and the same way as H. O. form water. Solomon in his Proverbs says "Wise men lay up knowledge", and one of the poets says "If thou kiss Wisdom's cheek and make her thine, she'll breathe into thy lips divinity", all of which we readily believe to be true, but academic, spirituelle, and somewhat beyond the average man. The sum total knowledge and human wisdom cannot take us one step beyond the practical philosophy of life. That is where we come to the gulf between the material and the spiritual, where our poor souls are in danger of suffering shipwreck, and where warnings like this one broadcasted by Conan Doyle are as the voices of the ocean and cannot be translated by any known code.

Spiritual Reform may come to us naturally, after we have exhausted all the available opportunities of reforming our mundane conditions, and Heaven help us! they are many.

Perhaps, some day, international conferences with limited and private aims, may give place to conferences of intellectual giants, with worldwide views, gathered from all nations creeds, and pursuits, into one established Parliament of Wisdom.

Oh speed the day! I want to see Truth fished up from that dank, damp, dangerous, location of her's at the bottom of a well.

THE LINKMAN.

ST. ANDREW EAST.

Christ Church W.A., is meeting this week at Mrs. Buchanan Robertson's.

Miss Bellnap of Montreal was the week-end guest of Mr. and Mrs. Alex. Leroy.

Mr. and Mrs. Sleeth and little son of Montreal, were the week-end guests of Mr. and Mrs. W. Jeffrey.

Miss M. Ginnis and Mr. W. A. M. Howard, of Montreal, spent the week-end with Rev. W. A. and Mrs. Howard.

Mr. and Mrs. Lang and Miss Henderson of Montreal were week-end guests of Mrs. Geo. Jeffrey and Miss Henry.

The sunshine and warmth brought a number of Montrealers to this nature beauty - for the week-end. Boarding houses and summer homes were well filled.

The Ladies Aid of the Presbyterian Church met at Mrs. N. F. MacGregor's on Thursday afternoon last. There was a good attendance and much work was accomplished.

Mr. and Mrs. Neve went in to Montreal on Saturday, the former returning the same evening, while Mrs. Neve remained for a few days visit with her daughters Mrs. Hodgson and Mrs. C. Say.

Mrs. Robt. Jones, who was a guest at the Merritt - Dutton wedding in Montreal on Friday afternoon, returned Saturday with her son Mr. Allen, and Miss Helen Seton who was her guest over the week-end.

For Mr. and Mrs. P. Funcheon, especially the deepest regret is felt in the loss of their little daughter, Patricia and all hope for a complete restoration to health of Mrs. P. Funcheon, who is still seriously ill in the Gen. Hosp. Montreal.

The most heartfelt sympathy of the whole community is offered Mr. and Mrs. Funcheon Sr. Mr. and Mrs. Percy Funcheon and Mr. Lyle, in the irreparable loss they have sustained, through the recent destruction of their homes by fire.

St. Andrews Paper Mills.

1 1 1

R. W. Barclay, president of the Western Quebec Paper Mills, Limited, who is also president of the Western Quebec Power Company, states that the financing of the Western Quebec Paper Mills at St. Andrews, Quebec, is progressing rapidly. This company is issuing bonds which are guaranteed as to principal through insurance, and which have other features which make them attractive to the investor because of their elements of safety. The preparations for the opening of the plant are progressing, but it is not expected that the mills will be producing before October.

Bad Spill at Staynerville.

1 1 1

A bad spill occurred at the C.P.R. Brownsburg siding on Tuesday evening when six cars were derailed. The accident was occasioned by a neighboring horse becoming frightened and taking to the tracks it was caught under the leading car which literally ground it to pieces. One of the cars was loaded with detonators and it bears tribute to the care exercised in the packing of same or there would have been serious consequences; the only injury being received by Mr. Carriere who sustained a fractured limb. Fortunately the detonator car was thrown to the one side of the track and the other five piling up on the opposite side, otherwise there would have been something doing. Carriere took a flying shunt of about 45 feet through the air, but considers himself fortunate he is not still snoring as he might have been if the detonators hadn't behaved themselves.

LAKEFIELD

1 1 1

Miss Annie Cooper spent last week visiting in Lachute.

Mr. Charlie Andrews has gone to Montreal to spend the summer.

Mr. James Baker, of Montreal, has opened up Marbella Cottage for the summer.

Mrs. Tom Copeland returned home after spending a few days visiting her many friends in Lachute.

Mr. and Mrs. J. H. Gales, Mr. Wilfred and Master James Gales of Montreal, arrived on Saturday at their cottage on Long Lake to spend the summer.

Much sympathy is felt for Mr. and Mrs. Hebert Baker in the loss of their sister Miss Lulu Labell of Montreal whose sudden death occurred on Tuesday, May 29th, at their summer home at Long Lake.

CARS FOR SALE.—One McLaughlin 1921 Coupe, in perfect condition, run about 5,000 miles. This machine is just as good as a brand new one, five cord tires, one never on, Battery new. Price is \$1,500 and is a genuine bargain and we guarantee this machine. Also a Hudson Super-Six 7 passengers, in good conditions for \$800.00. Apply to E. M. McGregor, Ormatown, Que.

TOWN COUNCIL

The regular meeting of above Council was held in the Town Hall on Wednesday last, there being present Mayor W. Scott and Aldermen E. Jousse, P. Dobbie, A. Larocque, G. Creswell, M. Gall, T. Dallaire, W. Morrison, J. D. Lemay.

Reports of minutes were read and confirmed and the report of Finance Committee was also read and accounts ordered paid.

A largely signed petition was presented to the Council asking that Grace Street should be opened through the West End. The matter was left in the hands of the Road Committee to secure necessary information and report at next meeting.

Letter was read from the Canadian Fire Underwriters asking for the abrogation of their business tax or they would be compelled to advance their rates on all business done in town.

The question of granting a bonus for the Fire Brigade was brought forward and in consideration of the good work already done, the Council granted the sum of \$300 per year which allows \$25.00 per man and \$50.00 for fire chief Deacon.

Representatives of the Imperial Oil Co. were present at the Council when the question of the completion of road work was discussed. It was finally decided to purchase the Imperial Asphalt Binder B., and that the work be proceeded with at once.

MORIN HEIGHTS

Mr. Thos. Smith was home for a short time this week.

Mrs. H. E. Webster spent a couple of days in Morin last week.

The Misses Carrie and Laura Davis have been visitors at the family home.

Mr. L. Hunting's brother from Sherbrooke, was a visitor here this week.

Mr. J. W. Seale, baker and wife, left for their new home in Caporol last week.

The Argenteuil Lumber Co., are beginning their sawing operations this week.

Farmers and others are wearing a broad smile over Tuesday's much appreciated rain.

Miss Enid McCullough spent the week-end and King's birthday with his friends in Ottawa.

Rev. H. Jekill and family with a number of guests spent the week-end at the Laurentian Rest.

Work has been begun on the foundation of the Roman Catholic Church to be erected here this summer.

The motor bread van of James Aird, of Montreal, is a regular thrice-weekly visitor to Morin Heights.

Mr. and Mrs. J. P. Middleton are enjoying a visit from their daughter with her two children from Western Canada.

Trinity Church Vestry have purchased an addition to Cemetery from Mr. A. Stapleton, and a cemetery committee are busy in much needed work in connection with the grounds.

Members of L.O.L. 2818 with their lady friends met at a surprise party at the home of Mrs. J. Davis last Monday evening to say farewell to Mr. and Mrs. Howard Davis who are leaving for California this week where Howard has secured an important position with his uncle.

An address was read by the W.M. and a handsome memento presented by his brethren.

Mr. and Mrs. J. Martin are leaving at the same time but for a more southern part of the State.

ST. ANDREWS EAST

Mr. Timberlake, of Montreal, was the week-end guest of Mr. R. E. T. Pringle.

Mr. J. B. Dawson spent the week-end as the guest of Mr. and Mrs. Jas. Burwash.

Mrs. W. Jeffrey entertained Mr. & Mrs. Sleeth, of Montreal, as guests over the week-end.

Among the visitors to Montreal this week were Mrs. G. Jeffrey and Mr. C. W. Lamb.

Mr. and Mrs. Charman and her sister were among the summer visitors over the week-end.

Mrs. Alwyn, of Montreal, has been the guest of Mr. and the Misses Walsh for a few days.

A meeting of the Literary Club was held at the home of Mr. and Mrs. W. J. Pitcairn on Tuesday evening.

Mrs. G. Jeffrey entertained Mr. and Mrs. Cecil Laing and Miss G. Henderson, of Montreal, over the week-end.

Mr. Leonard Pollock and Miss Lily Pollock were visitors from Mille Isles, and attended both services at Presbyterian Church on Sunday last.

Friends will be glad to learn that the news of Mrs. Percy Funchions condition in the Montreal General Hospital is very encouraging.

Sympathy is extended to Mrs. D. Bishop and her daughter, Mrs. C. S. Wales on the death of Mrs. Jones which took place in Montreal early Monday morning.

Public Service will be held in the Presbyterian Church Sunday June 10, at 11 a.m. and 7.30 p.m. (Standard Time.) Sunday School 10 to 11 a.m. in the Church. The pastor Rev. J. Burgess will preach at both services.

Mr. and Mrs. Sheppard, of London Ontario, visited Mr. and Mrs. John Funchion and family last Saturday. Mr. Sheppard left for home on Monday afternoon, while Mrs. Sheppard will spend a few weeks with her parents before returning.

Children Cry FOR FLETCHER'S CASTORIA

ARUNDEL

The Church services on Sunday next, 10th inst., will be as follows:—

Anglican.
Weir 10.30 a.m.
Rockway 2.30 p.m.
Grace Church, Arundel 7.30 p.m.
S. S. Grace Church 2.30 p.m.
Rev. Geo. H. Gagnon, M.A., Rector.

Arundel Union Church.
Crystal Falls 3.00 p.m.
Arundel 7.30 p.m.
S. S. Arundel 10.30 a.m.

Rev. Albert Johnson, Pastor.

The June Meeting of the Arundel Branch of the Woman's Auxiliary, will be held on Thursday afternoon, 14th inst., at the residence of the Sec.-Treas., Mrs. Jas. Simon.

The Ladies' Guild of the Church of the Redeemer, Weir, held their regular meeting, on Monday afternoon, at the residence of Mrs. L. McAdam, and was well attended.

Two new names were added to the roll of Members, the Guild is steadily growing and good work is being done.

THE LATE MRS. FILION

Margaret Milway, wife of the late Mr. A. B. Filion, formerly Crown Lands Agent, and who predeceased her by about nine years, died on Saturday morning, 2nd inst., at the residence of her son-in-law, Dr. E. Turcot, Huberdeau. The deceased who was one of the first settlers in this Township, was very well known and highly respected by all. She had a prolonged illness, which was borne with great patience.

Those of her family, left to mourn her loss, are:—Mrs. Turcot, of Huberdeau; the Messrs. S. A. Filion, of Grenville, James and Adolphus, and Rev. John Filion, S.J., of Montreal, Arthur, of Sault Ste. Marie, Mrs. Leahy, of Buckingham, Mrs. Keenan, of Winnipeg, and a brother and sister.

The funeral took place on Tuesday 5th inst., from the residence of Dr. Turcot, to the Parish Church, Huberdeau, and was very largely attended.

The service was conducted by the deceased's son Rev. John Filion, S.J., assisted by Rev. Fathers Gueneff and Lemmans.

The pall-bearers were, the Messrs. Thos. and John Milway, nephews; James and Adolphus Filion, sons, and Mr. Leahy and Dr. Turcot, sons-in-law. Interment was in the Cemetery adjoining the Parish Church, Huberdeau. The sympathy of all in the community is extended to the family in their sad loss.

Stock Farm For Sale.

Ideal stock farm with good sugar bush and wood lot, large farm house and farm buildings; 135 acres under cultivation, 45 acres in bush. Situated on bank of the North river 4 miles from Lachute and 2½ miles from St. Andrews East. Daily School Bus to St. Andrews Model School, also Rural Telephone Line and Rural Mail Route. Easy price and terms to responsible man. Apply to McCulloch, Lachute, R. R. 2, Que.

WEDDING BELLS.

LAVIGNE — LAVIGNE

On Monday a very pretty wedding took place in Ste Anastase Church when Miss Jeanne E. Lavigne was united in marriage to Notary J. Pillien Lavigne. The bride looked charming dressed in white charmerese silk, her veil was arranged with orange blossoms, her bouquet was of white roses and lily of the valley. Rev. C. W. Lalonde, uncle of the groom officiated assisted by Rev. J. Marsolais and Leon Lavigne. The wedding march was played by the Misses T. and B. Ayers, Pauline Paquette, G. Lacasse and Mr. P. Vinet of Montreal. Mrs. Perreault sang "Le Noël du Mariage". The Misses Paquette sang a duet, the other pieces were rendered by the young ladies choir.

Notary Lavigne and his bride left for a trip to the Thousand Islands, accompanied by the good wishes of all their friends. A reception was held at Mr. and Mrs. E. Lavigne, father of the bride. On their return they will reside in the town.

HOWELL—PALLISER

At half-past four o'clock on Tuesday afternoon, at St. Stephen's Church, Westmount, with the Rev. Dr. Charters officiating, the marriage took place of Ellice Janet Sanderson, youngest daughter of Mr. Joseph Palliser and the late Mrs. Palliser, of Lachute, Que., to Mr. Norman H. Howell, son of Mr. and Mrs. Alfred Howell, of Bayle Street, Montreal. The bride was given away by her brother, Mr. C. C. Palliser, of New York, and wore a gown of white brocade crepe de chine, with sleeves of white georgette, and a hat of white silk, trimmed with an ostrich ornament, and carried a shower bouquet of Ophelia roses and lilies-of-the-valley. Miss Catherine MacGibbon was bridesmaid, and wore a gown of orchid flat crepe with a hat to match, and carried a shower bouquet of mauve and pink sweet peas. The best man was Mr. Ben. Howell, brother of the groom. Mrs. Chapman, sister of the bride, wore a gown of coons brown flat crepe, with a beige colored hat. Following the ceremony a reception for the immediate family was held at the home of the bride's sister, Mrs. A. T. Chapman, Olivier avenue, and later Mr. and Mrs. Howell left by boat for their wedding trip, which they will spend at Quebec and other points. They will reside in Moncton, New Brunswick.

"SALADA" TEA

"The most Delicious Tea you can buy"

SALADS AND SALAD DRESSINGS.

Salads suit all times and seasons, but are especially palatable in the spring. The salad may be used as a garnish for meat or fish, often eking out a scant amount of such food, or it may be attractively arranged in a bowl, or the separate portions arranged on the serving plates. Almost all vegetables, many fruits and a large variety of meats and fish can be attractively served in salad form. Lettuce, endive and romaine form the background or foundation of most salads, but when they are unavailable an agreeable foundation for salad can be made of cabbage which has been crisped in cold water, drained, then finely chopped or shredded.

POTATO SALAD is quickly made thus: Cut boiled potatoes in very small pieces. Add an equal quantity of celery cut in quarter-inch lengths, and a generous amount of minced parsley. Green peppers cut in small pieces may be added. Season with onion salt or salt and minced onion. Add French dressing and mix thoroughly. If allowed to stand in a covered dish for half an hour or more before using, the flavor will be improved.

FOR BEET SALAD: Cook six beets, peel, and when cold cut a slice from the end of each, so that they will stand firmly. Remove a portion from the centre of each beet and chop this portion finely. Add to the chopped beet an equal amount of finely chopped cabbage and three tablespoonsful of chopped walnuts. Season lightly with salt and paprika and moisten with a boiled dressing. Fill the beet cups with this mixture and set each in a nest of lettuce leaves or chopped cabbage. Canned beets can be served in the same way.

MOLDED VEGETABLE SALAD makes such a nice company dish that we repeat the recipe. To make the salad dissolve one tablespoonful of gelatin in one-fourth cupful of cold water. Then add one-half cupful of boiling water, one tablespoonful of sugar, two tablespoonsful of vinegar, two tablespoonsful of lemon-juice and one teaspoonful of salt. Strain and cool and when it begins to thicken, add one cupful of celery cut in small pieces, one cupful of shredded cabbage and one-half cupful of green sweet pepper, cut in fine strips. Pour into individual molds, set on ice, and when hard turn out on lettuce leaves. Serve with any preferred salad dressing.

SALAD DRESSING can be made with ham fat or bacon fat instead of olive oil or cream. Stir together until smooth two tablespoonsful of flour and four tablespoonsful of boiling hot fat. Add three tablespoonsful of vinegar and half a cupful of water. Add a little salt and a dash of red pepper. Place over the fire, stir and allow to boil for a few minutes, then pour it gradually over a beaten egg. Set the vessel in a double boiler and return to the fire, stirring until the egg is slightly cooked.

MAYONNAISE SALAD DRESSING is quickly made thus: Put in a bowl the yolks of two eggs, one cupful of oil, juice of one lemon, one level teaspoon-

ful of mustard, two level teaspoonsful of salt and a dash of paprika. Cream together one-third of a cupful of flour and butter the size of a walnut, place in a double boiler, add one cupful of hot water and bring mixture to boiling point. Take from fire, and add to the mixture in the bowl, then beat rapidly for a few seconds. The whites of the eggs may be beaten to a stiff froth and added to the mixture if desired. These quantities will make a little less than a quart of salad dressing, which will keep indefinitely if placed in a covered jar and kept in a cool dark place.

HOT WEATHER HELPS FOR HOUSEWIVES.

With the return of spring the farm wife faces a trying period, for in addition to her usual routine she has to consider the care of the garden, the preservation of fruit and vegetables and the possibility of providing for a larger family. With the spring sewing and housecleaning out of the way, the mistress of the house should draw a long breath before beginning further activities and during this short rest, she might take account of stock.

FIRST OF ALL, SWAT THE FLY.

Breeding places for mosquitoes and flies should be abolished, and the door and window screens should be repaired and placed in position. Perfectly fitted sliding screens and well-hung screen doors, covered with copper wire screening would naturally be first choice. Adjustable screens come next, but the linen or cotton mosquito bar (or net) tacked over a window frame is very satisfactory. If a fitted screen door is not obtainable, make full curtains of the net, two to a doorway, hang so they will lap over each other and fasten a strip of wood along the bottom edge of each curtain. When the curtains are lapped these strips of wood lie side by side on the floor and hold the curtains in place. A screened porch adjoining the kitchen and a comfortably furnished porch where the family can gather for rest and recreation should be part of every farm home.

HELPS IN COOKING.

Cooking in hot weather is not an easy task, so all possible helps should be provided. If gas or electricity is not available, a good oil stove, a fireless cooker (either commercial or home-made) and such improved cooking utensils as the family purse can buy, will lighten the burdens of the housewife. If the tank of the oil stove is located outside of the house, with the oil piped through the wall on a gravity feed, it will prove a great help. The tank can be filled from the outside without greasing up the kitchen floor.

The care of food in hot weather is a problem which can be solved by means of a good refrigerator or ice-chest, but either one requires a certain amount of care. If possible, place the refrigerator so it can be filled with ice from the outside of the house. Those who have cleaned up after the ice was carried through a spotless kitchen can appreciate the convenience of such an arrangement. If ice is not obtainable, make an iceless refrigerator.

If harvest hands are to be fed, the housewife's store of kitchen utensils, china, glass and silver should be looked over. Nickel-silver knives, forks and spoons are excellent for extra occasions. They come in good shape, wear well, are very inexpensive and are easily kept clean. A steam pressure cooker will be found invaluable both in preparing meals and in canning. Another great help is the waterless cooker. Such a cooker has an aluminum body and a steel bottom with an asbestos pad between. The waterless cooker will cook food evenly, without burning or drying out, does not need to be watched, makes tough meats tender, and saves fuel.

GET READY FOR CANNING.

The supplies for canning and jelly making should be examined and replaced. Besides the jars, cans, glasses and rubber rings there should be a plentiful supply of spoons, paring-knives, squares of cheesecloth, and large bowls, preferably those of enamel or granite. Fruit and garden stuff must be preserved when ready, they can not be kept over for a convenient season or until supplies are replenished.

Preparedness oils the machinery of the household and by providing the things which make for comfort and efficiency, many seemingly impossible tasks can be accomplished.

The Gift Of The Gods

BY PEARL FOLEY.
(Copyright.)

CHAPTER V

The blue of the June sky beamed over New York as brightly as it did over China. There was not the least doubt of it in Nell Culver's mind as he stepped from his car and crossed to Tung Yung's curio store. Yes, he decided as he stood at the window surveying a sample of the marvels within, New York was the one place in the world—but still China had a way of beckoning you that was hard to resist. Then a shadow crossed his face, as the tragedy of the past touched him. With an effort he shook it off and stepped into the store.

Tung Yung came forward beaming and bowing profusely, acting the part of the courteous, well-bred proprietor in a way to send Yen, his assistant, off to another customer with joyful heart. Yen was a perfected pattern of his master—an exact counterpart, so far as actions went, of the obsequious Tung Yung.

"Well, Mr. Tung Yung, I see you still pay us the compliment of displaying all your goods before our eyes instead of leading us, as they do in your native land, from one cubby hole to another before showing us your choice tidbits."

"Ah!" Tung Yung beamed appreciatively. "Americans good taste and pockets as good."

Culver laughed. "I suppose you are contemplating retiring. Lucky man. You will go back to China and live like a mandarin, eh?"

A wistful look crossed the man's face. He shook his head. "Not yet."

Culver laid a hand on the Chinaman's sleeve. "Don't wait too long, Mr. Tung Yung. Money buys but an infinitesimal part of this world's wealth, after all."

Tung Yung looked at his customer sharply. Personal enquiries being considered the height of Chinese politeness, and, as stated before, Tung Yung was an adept in this art, he questioned, "The foreign healer lose his great happiness in China?—never recover one so great again?"

Culver shook his head sadly. "No. It is said time is a healer, but our wound has never healed."

The Oriental looked sympathetic. "Very sad, very sad, but your adopted son, he great comfort to the healer and his madam?"

"Yes, he has more than fulfilled all expectations."

"He great man?—graduate of Yale?"

"Harvard," corrected Culver. "Yes, he came off with high honors and now he is doing his bit for civilization over in Europe."

The Chinaman's eyes narrowed. "Very dangerous—risk life!"

Culver's face was grave. There was a slight break in his voice as he replied, "He has offered his life. Whether it will be taken rests with Providence."

"Yes, may the gods protect him."

"Thank you, Mr. Tung. That is all we can do now—pray."

"He win medal, not so?"

"Yes, Paul has been awarded the Victoria Cross. He's a wonderful lad."

"He come from great house," asserted Tung Yung, satisfaction in his tones.

"Ah, you have heard about his adoption?"

The Chinaman looked at his customer warily. "Rumor travels like the four winds, Dr. Culver."

"To be sure," assented Culver. "Perhaps you have also heard of the great honor your own countrymen have conferred on him in recognition of his work in the world war?"

Tung Yung shook his head. Then, tilting it sideways, smiled blandly and expectantly, waiting for Culver to continue.

"As you say, news, even the best, travels quickly, and word of Paul's award evidently reached China with lightning speed, for he immediately received a congratulatory cable from Prince Tsao in which he requested that Paul accept as a token of older China's appreciation the famous sacred ruby of the Chow dynasty."

"Eh?" For an instant the bland civility of the man dropped from him. Amusement and incredulity held him dumb.

His strange silence passed unnoticed by Culver, however, who smiled reminiscently into the case of curios before him.

With an effort Tung Yung forced his lips to separate, but it was rather a weak smile, and a person who was not wrapped in the past would have at once discerned a note of anxiety in his voice as he questioned, "You mean the sacred ruby of the house of Woo Wang, the great emperor, leave China—leave the place where the gods placed it?"

Culver raised his head. "You know about the stone? It is evidently an heirloom of considerable antiquity?"

The mask of subtlety slipped into its accustomed place as the Chinaman replied, "Who not know about the great sacred ruby of the Chow dynasty? For a moment, sir, I was startled. I was thinking you, a foreign healer, was to own the stone, but it goes to your adopted son, Paul Hing Kwong."

Tung Yung looked apologetic but his voice was firm as he added—"A direct descendant of the great emperor himself. That's as it should be, of course." And he waved his hands in a sweeping bow.

Culver was now awake to the undercurrent of dissatisfaction his announcement has set in motion. As he looked into the oblique eyes peering so sharply into his own, he pondered on the tenacity of the hold this race kept on the past.

"Has it ever occurred to you, Mr. Tung Yung, that nothing can stay the evolution of the race? That not even

a nation such as China, with her four hundred millions, can clutch forever the skeleton of the past?"

"Skeleton? No. We yet have the substance, but excuse me, sir, the foreigner will put the shroud on us."

Culver smiled. The old indicator, tradition. And after all, he asked himself, "What would a country amount to without it?"

"They send the ruby to this country, sir?" The man's voice was still uneasy.

"That hasn't been decided yet. The East has been calling Mrs. Culver and myself for some time now, and I'm afraid we shall have to obey very soon. If so, we'll safeguard the sacred ruby there, instead of here, until my son's return."

"Safeguard—yes—you say it well." "Why, Mr. Tung Yung, you don't anticipate trouble for us in connection with the jewel, do you?" An amused flicker showed in Culver's eyes as he watched the Easterner's serious face.

"Maybe no—maybe yes." He shrugged his shoulders and waved his hands as he added, "If for Mr. Paul Hing Kwong, why? I ask. But if for a foreigner, maybe I say."

"Ah, I see. Well, as Mr. Paul is the sole owner, fear and caution may as well be dismissed." Then jestingly Culver questioned, "But have you no antidote for any possible evil, Mr. Tung Yung?"

The Chinaman's eyes narrowed, but the obsequious smile showed the white teeth as he replied: "No antidote break Chinese will, but here something guard jewel from robbers."

He beckoned and Culver followed him to an inner room.

Old-time memories rushed over him as he stood viewing the all-pervading East glowing there. Rich tapestries hung from the walls, relieved by panels of weird but beautiful design, while furniture of the most exquisite carving was strewn luxuriously about. The subtle aroma of incense pervaded the room and soothed Culver's tired nerves into pleasant relaxation mingled with agreeable expectancy. The ever-present Goddess of Mercy reigned supreme from a small alcove banked on each side with flowering plants of the East.

A gratified smile glimmered on Tung Yung's face as he watched his guest's unconcealed appreciation. His steady tact forbade him to disturb the foreigner, so quietly slipping from the room he left Culver alone with his memories.

Culver walked from one to another of the rare, beautiful furnishings, touching each piece softly as if afraid of awakening harshly the slumbering past. He smiled tolerantly, and perhaps a little cynically, as he stood before the household god, the God of Wealth. The rising incense evinced that homage had but recently been paid the expressionless, stony-eyed deity. He ran his hands over the teakwood furniture and felt he was greeting old friends. Instinctively his steps paused before the Goddess of Mercy. Here also incense was still being offered up, and the goddess accepted the homage as stoically and unmoved as the race who worshipped her. But now memory sharp and quick cut into Culver's reveries. A tiny grave back in the hills of China cast a dark, sinister blot over the pleasant musings. Grief had enclosed him tightly in her dark cloak, yet a ray of light had penetrated and beckoned him back to the land where joy and grief had locked hands. Irma was right. He would accede to her request and return to the East if but to say farewell to the past. Relief that his mind was made up surged through him as Tung Yung appeared in the doorway, closely followed by a servant carrying a tray.

The Chinaman bowed. "I take the liberty of asking the foreign healer to drink tea with me. It gives great pleasure to see your pleasure." And he waved his hands significantly towards the treasures spread so lavishly about.

Culver's bow was almost Eastern as he replied: "You have done me a great service, Mr. Tung Yung. In showing me this wonderful room of yours. This glimpse of the East has decided me to see China once more before I die."

Tung Yung waxed confidential over tea, telling Culver he too would very soon return to China, but not to stay, though, he added, "No, no, business here too good for that." However, his own affairs didn't occupy him too much to prevent him asking Culver pointed and personal questions. The latter, believing himself a connoisseur on the Chinese mind, answered unreservedly and good-humoredly.

"Now for antidote," exclaimed Tung Yung, when the servant had carried away the tray of empty dishes.

"I suppose you have it concealed here as a weapon of defence for your collection?"

Tung Yung replied by a shake of the head. He was carefully moving his fingers along the under edge of the small teakwood table at which they were sitting, and the crease between his brows betokened he was not doing it for a pastime. Culver watched him curiously as he repeated his finger movements several times. Bending his head, the Chinaman inspected closely the top edge of the table. Then taking a small magnifying glass from an inner pocket he peered through it. Almost instantly he emitted a grunt of satisfaction. Turning to Culver he explained, "This table is a perfect deception."

Culver nodded, secretly wondering if his host were developing madness. "I will have to trouble you to move, Dr. Culver. The glass tells me I am working on the wrong side."

"Certainly," assented Culver, rising and moving to one side.

(To be continued.)

Minard's Liniment for Coughs & Colds

Mountains Under the Sea.

Largely owing to the operations of cable-laying and cable-repairing ships, our knowledge of the geography of the ocean bed increases every year.

Not many people know, however, that just as there are mountains on dry land, so there are mountains beneath the sea, some of them as high as the peaks in the Alps and the Andes.

One of the biggest of these submarine mountains is Laura Ethel, situated in mid-Atlantic. It is over 12,000 feet high, its summit being less than 200 feet below the surface.

So often has this mountain been explored by oceanographers, with the aid of sounding apparatus, that its characteristics are as well known as those of Ben Nevis or Snowdon, although it has never been seen.

In the same locality is another great sea mountain, Mount Chaucer, first discovered seventy years ago. Its summit is only just over 100 feet below the surface, while its height is 10,000 feet. The summit of another peak, Mount Placentia, is only 30 feet below the surface.

A mountain range whose peaks are named after members of the Royal Family is another little-known feature of the Atlantic bottom. Every one of its ten peaks is higher than Snowdon.

The real "Davy Jones's locker" is to be found at the foot of the Faraday Hills, in the South Atlantic. It is estimated that at the base of the highest peak in the range, Sainthill, there lie no fewer than five thousand wrecks.

Dr. McMurphy Honored.
Dr. Helen McMurphy was the only woman included in the group to be honored by the University of Toronto with honorary degrees this year. She received the only honorary degree of Doctor of Medicine which was bestowed.

Fisherman Who Caught Himself.

A certain doctor who had had nervous prostration was heard to remark that the breakdown was of inestimable value to him; it gave him an insight which he had never before possessed. He was not inclined thereafter to scorn the whims and follies of overworked patients. A New England man, with a fondness for fishing, had a somewhat similar experience, which perhaps did wonders in developing his sympathies. He was angling for grayling.

He cast his red spinner over a big fish that had just risen in midstream, but the fish declined the offer. Again it came up, and again the fisherman dropped the spinner on the point of its nose, but still he declined.

The man was perhaps a little flustered at this contempt. He drew up hastily, and as he did so his foot slipped in a hole. The consequences was that a gust of wind blew him and all in a confused bang into his face. He threw it out again, with the impression delicately conveyed to the ears by the swish of the line, that the fly was off.

"Lost your fly?" cried a fellow fisherman, looking curiously into the other's face. "Why, it's sticking in your nose!" and he burst into a roar of laughter.

Then the other, wondering, put his finger to the tip of his nose, and there, to his astonishment, his horror and, it may be added, his terror, he found the hook firmly imbedded in cartilage. When he made the roost he must have driven the hook deeply into the nose and far below the barb. Yet he had never felt the slightest pang or twitch.

Of course the two knocked off fishing at once and solemnly and slowly marched home, the wounded fisherman covering his face with a handkerchief whenever he met any one upon the road. When he reached his house he examined his nose in a mirror and he confessed to having felt woefully discouraged. The barbed betrayer was there, firmly fixed, and he saw there was nothing for it but to send for the doctor.

The latter came in due course with his lancet and the hook was removed, but the fisherman would be a sorry man if he thought that, he should ever angle for himself with such good result.

No Nickel Mines in United States.

It appears that there are no nickel mines in the United States and that the output of nickel from domestic ores is merely a by-product from electrolytes of the copper refineries. Salts and metal equivalent to 328 short tons of metallic nickel were saved in domestic refineries in one year from both foreign and domestic ores. Nickel ore "imported for consumption" is mostly from the Canadian deposits.

After Every Meal

WRIGLEYS

Top off each meal with a bit of sweet in the form of WRIGLEY'S.

It satisfies the sweet tooth and aids digestion.

Pleasure and benefit combined.

The Interpreter.

Andrew McAndrew and his daughter Janet came on a visit to relatives in London recently. Day after day Janet and her father went sightseeing—always together.

Janet's aunt noticing this, suggested that she should let her father go out alone occasionally, saying jokingly: "Men do not like to have women always tagging along."

"Ay Auntie, but he wahnts me," explained Janet, earnestly. "He canna thole to stir out o' the hoose his lane. We wadna believe hoo fasht he is onywhere wi'out me. Ye see, father takes the brail Scotch that stranger folk dinna ken what it's a'boot, an' I hae tae gang wi' him tae dae the conversing."

Excessively Honest.

The newly wedded young woman had an interview with her milkman concerning the quality of his wares.

"Mrs. Jones," she remarked, "tells me that there's lots of cream in her milk bottles every morning. Why is there never any in yours?"

"Well, lady," explained the milkman, "I'm honest—that's why. I fill my bottles so full there ain't no room left for cream."

Minard's Liniment for Coughs and Warts

JAPANESE IRIS FROM SEED.

If you have patience to raise Japanese iris from seed, you will be well rewarded. We did not get ours to bloom for several years, for every one who came to work in the garden seemed to owe these seedlings a grudge. We would tell the men to look out for them, but they would either tread them into the ground or dig them up, thus killing many of the plants. However, when they did bloom, we were well rewarded. Last year we had pure white, single and double, a lovely amethyst, and the "gold-bound"—double white with a gold band through the centre of the petals. They are wonderful; try them.—Clara A. Abbott.

MOWERS

Lifebuoy is the real way to a healthy skin. It cleans not only the surface but the pores. It softens with its pure palm and vegetable oils. It is delightful to use.

Stories About Well-Known People

A Royal Retort.
When King Gustavus of Sweden was playing tennis with Miss Lengien against Hunter and Miss Ryan recently, he frequently sent the balls too much to the right.
His partner hesitated to remark on this at first, but finally her love of tennis overcame her hesitation at correcting a king, and she suggested, "More to the left, your Majesty."
King Gustavus showed that he had accepted the hint by sending a ball well to the left, but his answer was an unexpected one. "That is exactly what Branting (the Swedish Socialist Prime Minister) tells me every day," the King replied.

Lovely Princess Worked a Miracle.
Not every loyal subject has his warts charmed away by the Queen of England. Yet it is in this human role that Queen Alexandra, the Queen Mother, is shown in a recollection of Lord Ernest Hamilton in his new book, "Forty Years On," which is the fruit of many years of travel and a mind that has seen and heard much in English social and political life.

One of Lord Ernest's most interesting stories is this about Queen Alexandra, who, as Princess of Wales, visited the author's father at Dublin Castle in 1867:

"My small, and probably dirty, hands were at that time badly disfigured by warts. The application of caustic to these warts had turned them brown, which cannot have added to their attractiveness."

"Hill took the most solicitous interest in my complaint, and examined my repulsive little hands with the tenderest care. After listening to a recital of my woes—for my warts were

a source of great shame and distress to me—she promised that she would charm them away for me. A certain rite was gone through, to the best of my recollection with hazel twigs, but, be that as it may, the fact remains that from that day on my warts began to disappear and have never shown any tendency to return. It is not to be wondered at that I worshipped with a lasting adoration the lovely Princess who had worked this Hans Andersen miracle on me."

Fourteen years later the Queen remembered the incident and inquired about the warts. The cure was permanent.

Why the Keeper Blushed.

The British Minister of Health, Mr. Neville Chamberlain, tells an amusing story of a visit his father, Mr. Joseph Chamberlain, once made to the Zoo. The famous statesman paused before the hippopotamus, and asked the brute's name.

The keeper blushed scarlet and looked rather embarrassed, but made no reply.

"Come, come," said Mr. Chamberlain, "what do you call the beast? You have a name for it, haven't you?"

"Yes, sir," stammered the man. "Then what is it?" asked Mr. Chamberlain.

The man seemed to be laboring under great emotion.

"I don't like to say it, sir," he replied.

"Why not?"

"You—you wouldn't like it, sir."

"Oh, never mind that," Mr. Chamberlain replied. "Tell me its name."

"The man sighed helplessly. "You really won't like it, Mr. Chamberlain, sir. We call 'im Joe."

—AND THE WORST IS YET TO COME

A Chanted Calendar.

First came the primrose.
On the bank high,
Like a maiden looking forth
From the window of a tower
When the battle rolls below,
So look'd she.

And saw the storms go by.
Then came the wind-flower
In the valley left behind,
As a wounded maiden, pale
With purple streaks of woe,
When the battle has roll'd by
—Wanders to and fro,
So totter'd she.

Dishevel'd in the wind.
Then came the daisies.
On the first of May,
Like a banner'd show's advance
While the crowd runs by the way,
With ten thousand flowers about them,
They came trooping through the fields.

As a happy people come,
So came they.
As a happy people come
When the war has roll'd away,
With dance and taper, pipe and drum,
And all make holiday.

Then came the cowslip,
Like a dancer in the air,
She spread her little mat of green,
And on it danced she.
With a fillet bound about her brow,
A golden fillet round her brow,
A golden fillet round her brow,
And rubies in her hair.

—Sydney Dobell.
The greatest known depth of the ocean is eight and three-quarter miles.

THREE KINDS OF GAS SHELLS

If the war had continued for another two years it is likely that poison gas would have become the deadliest weapon in use. This is made clear by a new volume of the official medical history of the war, issued by the British war office.

One of the most striking features of the volume is the description of the way in which the Germans employed gas shells of various composition for bombardment.

Broadly speaking, three kinds of gas were used—green cross, blue cross and yellow cross. Green cross shells contained acute lung irritants. Blue cross contained sneezing and tear gases. Yellow cross contained "mustard gas," which not only possessed a delayed poisoning power, but was a blistering agent.

First Two for Harassing.

The first two types of shell were used for general harassing or neutralizing purposes, or in preliminary bombardment; while the use of the yellow, or mustard gas, was intended to be restricted to areas which there was no intention of occupying or advancing over, but where there was a likelihood of causing a number of casualties and rendering battery or other important points untenable.

The reason for this was that mustard gas lies for a long time on the ground, and troops occupying ground over which mustard gas had been distributed might themselves have been affected for days afterwards.

Last Link in 6,500-Mile Highway Completed

With the official opening of the Banff-Windermere Highway in the Canadian Rockies scheduled for the near future, the last link in a 6,500-mile chain of scenic roadway will have been welded into place, making an unbroken circuit from California to Canada and return. It passes through Grand Canyon Park, Yellowstone National Park, Glacier Park, and the Shuswap Indian Reserve in western Canada, and traverses part of a most picturesque country. From Macleod, in southeastern Alberta, a "rectangular" route can be covered, including the beautiful 93-mile link from Banff to Windermere, just completed. One side of the rectangle runs north from Macleod, crossing many streams, through Parkland and Midnapore to Calgary. Here the road makes a great winding turn in a

generally westerly direction toward the wonderful country surrounding Banff. After leaving this latter town the road soon begins to run south, ascending steadily past Sinclair Pass, which divides the Banff and Stanford ranges. Vermilion Pass, the highest point on the trip, is just ahead with an altitude of 5,375 feet. The fourth, or southerly side of the rectangle begins after Fort Steele is passed, near Elko. Here the Highway swings sharply to the north, as if it had lost its sense of direction, but, recovering at Michel, it turns east, making a sharp "corner" again at Pincher, and reentering Macleod, the starting point, from the southwest. Every part of this 587-mile circuit passes through regions of great natural beauty, and the motorist cannot but feel well rewarded after making the round trip.

tard gas lies for a long time on the ground, and troops occupying ground over which mustard gas had been distributed might themselves have been affected for days afterwards.

Consequently, the Germans only bombarded the flanks of their attacks with this harassing gas, and employed only the more lethal gases, blue and green gas, over the areas which they were attacking with a view to occupation.

Mustard Gas at Ypres.

The potentialities of mustard gas were revealed when, for the first time, the Germans bombarded Ypres with that type of shell in July, 1917, and inflicted hundreds of casualties. It was the turning point of the war as far as gas warfare was concerned. Poison gas was no longer considered a matter of clouds to be sent over from cylinders when the wind was favorable. It was raised to its proper place as an adjunct to high explosive, and practically in every bombardment thereafter a rain of gas shells descended on valleys and ravines in which the vapor could drift.

The question raised by the book is whether more powerful, more deadly, and more effective kinds of poison gas will make future wars inconceivable in their horror.

Turnable Fire Ladder Extends from Truck.

An effective fire-fighting unit is seen in a new extension ladder of English manufacture which is considered remarkable for its great "reach." The ladder is built to reach heights of 80 to 90 feet and upward, and is mounted on a turnable carrier over the rear axle of a motor truck. It can be used either for life-saving or as a water tower.

Foolish Question.

The Passerby (to motorist at roadside who is red in the face and popped from pumping up a tire)—"What's the matter? Have a puncture?"

Motorist (after counting ten)—"No, I just thought it would be a good idea to change the air in this tube."

Although it has a huge tongue, the whale has very little sense of taste.

"I Am the Unimproved Highway"

By H. G. Andrews

The feet that pattered in primal slime gave me birth.

Unchanged while through ages past I have endured, time has but served to increase my infinite variety. Earthborn, and without a soul, yet have I lived. From the beginning I have been man's enemy.

I have snared caravans that left bleaching bones in lands now desert.

Empires have fallen because of me.

I have turned victories into routs; I have tramped mighty leaders and have crushed armies. To-day I am fair to look upon, to-morrow a steaming bog. I add difficulty to distance.

With isolation do I inspire to unjoint the endeavor of men. I tug at the wheels of the grain cart that bread may be dear. I hamper those who would feed the race. I am an enemy of church and school. I mire the healer on his rounds and delay his coming that little ones may die.

I am a disrupter of home. I speed the firstborn to the cities when I am fair to see, and when he would return I face him with my forbidding depths.

When men plowed with a crooked stick I was there. When the ancients covered me with stones I slipped away to other lands. I am the oldest foe that lives to-day. Men count me cheap. I know the price they pay who count me so.

I am the highway—the unimproved highway. My name is mud.

True genius requires centuries of family tradition before it can blossom into flower. No great literature has been achieved without ancestry.—Mr. St. John Ervine.

How Some Famous Authors Work

Gone are the days when authors worked furiously in garrets on green tea and black coffee, and finished one book in a week and slaved at another for ten years. The author now works as efficiently and regularly as any professional man, says an English writer.

Arnold Bennett plans his work for months ahead. He devotes so much time to novels, so much to journalism, and so much to play-writing. He uses a pen, and once tried to save labor by dictating, but found he couldn't manage it.

H. G. Wells uses pen and pencil alternately. He is a five-hours-a-day man, but when he is in a work he will put in eight or nine hours, and get up in the middle of the night to jot down happy thoughts. He works "in bits," which are typed and afterwards pieced together.

Typewriters in the Woods.

Phillips Oppenheim writes about 4,000 words a day. Oddly enough, he does not plan his work, but starts a book carelessly at the first chapter, and relies on his ingenious invention to carry him through.

Both Ethel M. Dell and Marie Corelli write furiously in the heat of the inspiration, and both would probably be scandalized if one suggested that they should compose direct on to a typewriter.

Many American writers disdain the pen, and carry about a portable typewriter, on which they tap out their thoughts while they are in the woods or while sitting on the banks of streams.

Stephen McKenna takes long holidays to clear his brain in intervals of novel-writing. When he has a book mapped out, he shuts himself up, refuses all invitations, and works unrelentingly, only going out for an hour's walk each day.

Gilbert Frankau is an amazingly rapid and efficient worker. He dictates until he is tired; the result turned over to him in typescript; goes through it, re-writes, polishes, throws it back; and so the polishing process goes on until he is satisfied.

Like Flaubert, George Moore works slowly and painfully, and thinks he has had a great day's work if he finished 1,000 words.

Lever, the Irish writer of rollicking novels, would have scorned that. He got up at five and wrote until seven, taking off 250 words every fifteen minutes. After that, he didn't do another stroke all day.

Open-Air Devotees.

Just after the success of "If Winter Comes" I found A. S. M. Hutchinson in his Malda Vale flat, working in his shirt-sleeves at "This Freedom." He was not so absorbed in that work but he could break off and talk for an hour. By the advice of his friend, Hugh Walpole, he works only four hours a day.

Robert Hickeys likes to work in the open. He wrote "The Garden of Allah" on a cliff in Sark. Conan Doyle also works much in the open air, and E. F. Benson reserves his best effort for a "holiday" in Switzerland.

Conrad, Hardy, and Barrie are all normal writers, without tricks or peculiarities; and so is Shaw, who writes speedily.

Galsworthy likes to work to music, and another famous and prolific novelist uses a dictaphone and employs three secretaries.

To rude words the best attitude is deaf ears.

Sensitive to Colored Light.

Ever since Bell and his colleagues made it possible for us to telephone to distant points, experimenters have been striving to perfect some method of sending pictures over the ether. The one strong clue for such investigators has been the fact that the electrical resistance of the metal selenium varies with the intensity of the light falling on it, so that by using a number of little selenium parts successively in a circuit they can reproduce the light and shade effects at some distant point.

Crude as this basis may seem, it has led to promising results, but even if developed in practice it could not transmit colors, as the selenium does not distinguish between them. It was Prof. Jager of Amsterdam who found a mineral which also varies in its electrical conductivity with the light falling on it, but which does this in a much different degree according to the color of the light. Green has only a slight effect, red rays act much more strongly, while violet light reduces the electrical resistance to about one two-hundredth of what it was in the dark. Consequently we not only have a substitute for the selenium but if we keep the intensity of the light the same the use of stilbite may enable us to tell colors at a glance.

Translating The Bible Into Strange Tongues

BY ARTHUR CHAPMAN.

ONE of the world's great achievements, which has been going on steadily for many years, is the translation of the scriptures into various languages and dialects.

It is estimated that there are 1,000 of these tongues, and such has been the determination and patience of the translators of the Bible that at least some portion of the Scripture has been translated into no fewer than 770 of these mediums.

The whole Bible has been translated into 158 of these languages, the New Testament into 142, at least one complete book of Scripture into 425 and parts (that is, only chapters or verses), into 48.

Tremendous Difficulties.

Translators of the Bible have overcome tremendous difficulties, which are little realized by the general public. Also they have brought to light many odd and interesting facts concerning the complexities of language and the part which nature has played in hindering the mental vision of certain peoples. For instance, in translating the Bible into Eskimo it was found impossible to convey the meaning of the word "lamb" to the natives, who had never seen such an animal. So the Eskimo Bible used "Baby seal," where the English Bible uses "lamb," that being the nearest equivalent of the word which the natives could comprehend, an instance being, "Behold the Baby Seal of God, who taketh away the sin of the world." It is said to have taken 250 years to translate the Eskimo Bible on account of the difficulty in accurately expressing the Scriptures to people who live amid perpetual snow and ice.

In China to-day it is necessary to publish two editions of the Scriptures, because the words used to designate the Deity could not be agreed upon.

Instead of a union version, two versions of the Chinese Bible were issued, one more elegant in style, and the other more accurate in rendering. Neither could be accepted by all the missions. Perhaps because the Chinese themselves have thought the Supreme Being too far above man to be men-

tioned excepting by suggestions, the Chinese term to be used where "God" is named in the Bible is still unsettled.

Accurate Renderings.

In India there were differences which for a time looked to be irreconcilable. For instance, a literal rendering of the text, "Be thou faithful unto death and I will give thee a crown of life," was criticized by Indian pundits because they said it meant, "Be ye faithful up to, and not beyond, the time when you die." The actual version had to take this longer form, "Up to the point of giving your life remain faithful and I will give you a crown

of life." This satisfied India's critics.

The hairy Ainu, an aboriginal race in Japan, are dying out, and their translation of the Scriptures is dying with them. Archdeacon Batchelor has labored for forty years among the Ainu, who, when he settled among them, had no written language. He mastered their tongue and translated the Ainu New Testament and Psalter, and now he is seeing the effect of his lifelong work slowly lost through the gradual dying out of the Ainu people. To-day his version of the Scriptures is practically extinct, as the people have forgotten their own speech. The new

generation understands only Japanese, and Archdeacon Batchelor never speaks Ainu except when he is talking to persons more than fifty years old. The Ainu people themselves are dwindling in number and there are now fewer than 17,000 left. While the work among them are rapidly dying off, the strong are just as rapidly mixing with the Japanese, by whom they are being assimilated.

One of the most remarkable feats in translation was accomplished by Dr. Hiram Bingham, translator of the Marshall Islands and Gilbert Islands Bibles. Despite the paucity of the native language, which was merely a succession of guttural sounds, Dr. Bingham persevered until he had brought the Scriptures to the comprehension of the islanders. In this case the translator literally had to create an alphabet and teach the people to read and write their own language. There have been other instances, notably in Africa, of the creation of a "talk language" into written language. The task is a colossal one.

Among the American Indians remarkable work has been done in Bible translation. There are between fifty and sixty linguistic stocks among the Indians north of the Mexican border. The tongues differ so radically that the language of one is unintelligible to the others. These languages are structurally so varied that they may be described as differing as widely in character as English and Russian.

Thirty-five Indian Languages.

The Bible in whole or in part has been printed in thirty-five languages of the Indians. In five of these languages the whole Bible is in print, the Mohican or Massachusetts, the Dakota or Sioux, the Cree, the Eskimo of Labrador and the Tukuth-kutchin—a tribe of the northern Yukon Territory. In nine other languages the New Testament entire and in twenty-one additional languages one or more books of the Bible have appeared.

The reticence of the Indian and his reluctance to speak in the white man's language, even when he is more or less familiar with it, and his stolidity, which is so often interpreted as stu-

—Philadelphia Ledger.

Heatless Electric Light Invented by Parisian.

An engineer of Paris, M. Risler, has made a discovery which, it is believed, will cause a revolution in methods of illumination. At present most electric lamps use up 70 per cent. of their energy in giving out heat rather than light. Risler has constructed a lamp which gives out light without heat. He makes use of a vacuum tube through which a phosphorescent material is passed. As soon as the electric current is passed through this a light is produced which is brighter than that of the largest lamps now in use.

The consumption of energy is only 15 watts an hour in a tube six meters long and seven millimeters in diameter.

Hens Register Eggs With New Device.

Hens may now "write" their own egg-laying records by means of a device recently invented. It consists of a trap nest inclosed in a sheet-iron box, 36 inches long, 14 inches wide, and 30 inches high. The recording attachment is a rubber stamp bearing the hen's name or number, which is fastened to its back by wire loops. When the hen enters the nest, the stamp rubs against the ink pad. As the hen advances a few inches farther, the stamp makes an impression on a strip of paper running upon two rolls.

X-Rays for Plants.

A London scientist uses X-rays to study and diagnose plant diseases.

PROVINCIAL BANK

OF CANADA

PIERRE DESORMEAUX, plaintiff; against EUGENE ETHER, defendant.
No. 57.

As belonging to the said defendant, the following immovable, to wit:

A lot of land situate in the town of Saint-Jerome, county and district of Terrebonne, designated on the official plan and book of reference of the said town of Saint-Jerome, under the number nineteen, of the official subdivision of the original number forty nine (lot 19-49)—with the house thereon erected.

To be sold at the door of the Catholic church, in the town of Saint-Jerome.

ARGENTEUIL BOY DROWNED WHILE LOGGING.

It is with deep regret we record the death of the late John Arnold, who was drowned at Croghan, near Louville, N. Y., at 4 p.m. on Tuesday, May 29th, of which the Utica Times reports:

John Arnold, 31, was drowned in Beaver River Tuesday three miles above this village near the head of Taylorville Pond.

He was a river driver in the employ of St. Regis Co., and in company with John Fredenburg was engaged in loosening a log jam when he met death.

How the accident occurred no one knows. Fredenburg saw him at 4.05 p.m. and five minutes later he saw Arnold's hat floating on the water.

The body was recovered an hour later and brought here to Nott's undertaking rooms and Arnold's mother Mrs. A. Smith of Arundel, Quebec, Canada was notified.

John Arnold was born in Quebec and came to the United States to reside 20 years ago. He was a citizen and responded to the draft in 1918 and was trained at Camp Dix later going overseas where he served in the A.E.F.

During the Memorial day services at Utica, Wednesday, June 30th, the members of the Urban Karcher Post of the American Legion halted in rooms, where the body lay draped in an American flag. Taps were sounded and three volleys fired by the firing squad, before the parade continued on its way.

On arrival of the telegram at Arundel on Wednesday morning his mother, Mrs. Archie Smith and his sister Olive D. Arnold, of Montreal, left at once for Croghan, returning on Saturday with the remains which were taken to Edina for interment in the family plot. The funeral service being held on Sunday afternoon, conducted by the Baptist Student of Lachute, Mr. McDermott, who spoke most feelingly to the comfort of those gathered, the remains being borne to their last rest place on the shoulders of his five cousins and step-brother, Messrs. J. Biglow, J. Mahon, J. Craig, Wm. Craig, Edward Gauley and J. Smith. Besides his sorrowing mother he leaves two sisters and two brothers, Mrs. Godfrey Dixon of Dalesville, Miss O. D. Arnold, Montreal, Mr. Geo. Arnold of Calumet, and Samuel Arnold of Donald, B.C.

Amongst those who sent floral tributes were Mr. and Mrs. E. J. Johnson, a wreath, Miss Rice of Utica, a spray, from Mr. and Mrs. H. Biny of Denemark, N.Y., and the family wreath, both of American beauty roses.

DEATHS

FUNCHEON.—At Hill Crest, Beech Ridge, on Wednesday, May 30th, Patricia, eldest daughter of Mr. and Mrs. Percy Funcheon.
God's will be done
Our darling is at rest
We loved her well
But Jesus loved her best.

IN MEMORIAM

CARD OF THANKS.—The undersigned desires to acknowledge with deepest gratitude the many acts of kindness and benevolence extended to us in our loss of property which is nothing as compared to the loss of our loved one. However the gifts of kind that will help us to replenish our home destroyed and the good will extended by so many is indeed cherished by us and we take this opportunity of extending our deepest gratitude.
J. W. Funcheon and family and Mr. and Mrs. P. Funcheon.

In loving memory of Sarah McAdam, beloved wife of James O'Brien, and daughter of Mr. D. McAdam, of Chatham, who died June 6th, 1912. Still in our memory Sarah as the day you passed away, and her loving mother, formerly Matilda Blair, wife of D. McAdam, who died Dec 10th, 1883. Sleeping side by side in Ogdensburg Cemetery awaiting the judgment call they are looking down from the golden land upon their loved ones. They have done their work, borne their cross and will receive their promised crown. Inserted by Husband and Father D. McAdam.

WOOL

The Argenteuil Wool Growers and Sheep Breeder's Association will load wool as follows:—
Grenville, C.P.R. Station, June 9
Arundel, C.P.R. Station, June 11
Lachute, C.P.R. Station, June 13 and 14.
Pres., Wm. Hay; Treas., J. W. Gall; Sec., Alex. Bothwell.

CUSHING.

Mr. Leonard Young spent the latter part of the week in Ottawa.

Mr. and Mrs. Maguire, of Montreal, are again occupying their cottages in Cushing.

Miss Alice Davidson left this week to visit Rev. and Mrs. Brokenshire at Apple Hill, Ont.

Miss Lillian Crookes of Grenville has closed a very successful term of teaching in No. 2 School.

Mr. and Mrs. Geo. Burton, of Montreal, were guests of the latter's mother Mrs. Cleland over the week-end.

The Misses Nora and Eileen Smith of Montreal spent the week-end and King's birthday at Mrs. E. O. Keatley's.

Miss Katherine Flood also K. and Mr. Eddie Wheelahan, of Montreal, spent the week-end and holiday at Mr. E. Wheelahan's.

Miss Florence McGillivray and Miss McLaren of Montreal spent the week-end with Mr. and Mrs. C. J. McFaul at Chute-au-Blondeau.

J. E. ARNOLD & SON PURCHASE MORE HORSES

The following information has been received from J. E. Arnold, Moncton, N.B., that he has purchased a beautiful standard bred stallion "Saxon Aubrey 2759 - 65272, sire" Captain Aubrey 1274 - 48050 by Peter the great 28955.

It is not necessary to comment on his breeding, as those familiar with standard bred history know his ancestry is unsurpassed.

Mr. Arnold is shipping him from Moncton on June 2nd, to their barns at Grenville for the season, for further information communicate with Gilbert E. Arnold, see add later with terms for this horse and the Percherons and Belgians of their new importation.

Saxon Aubrey - 2759-65272 is a beautiful bay six year old Standard-bred stallion weighing about 1100 lbs. He is sired by Captain Aubrey 1274-48050 by Peter the Great 28955.

Percheron (11619) 150817 is a black five year old Percheron, weighing 2160 lbs. He is the real draft type and the kind that will sire market toppers.

Brune 3201-11596 is a black four and a half year old Belgian, weighing 2000 lbs. This is an excellent show horse and for quality of field legs and real show action he is hard to excel.

Mastoc (11622) 171860 is a grey two year old and weighs 1600 lbs. This is very promising show colt that we are offering for light service only. All these horses are Gov't inspected and have No. 1 Highly recommended certificates.

TERMS.—\$12.00 and \$15.00 to insure a foal payable March 1st. All mares at owner's risk.

J. E. ARNOLD, GRENVILLE.

Creamery Butter For Sale.
For Good Pasturized Creamery Butter. Apply to Wilfrid Desforges, St. Philippe, P.O. Box 21, Quebec.

PROPERTY FOR SALE.—Good 6 room frame house, well, stable. Frontage 318 ft., depth 67 1/2 ft., on Dalesville Road. Cash \$3,500. Write to Neil McQuig, Box 122, Brownsburg, Quebec.

WANTED.—To rent for the summer, camp at Lake Louise, address Louis Fitch, P. O. Box 884, Montreal.

NOTICE.—Kindly bear in mind that in future all pay notices, births, deaths, memorials, etc., must be accompanied by cost of insertion or same will not be published.

LATHS.—Just received a carload of wood laths, good quality. Reasonable prices for any quantity.

Mrs. J. Cottingham,
Phone 29, Lachute, Que.

WANTED AT ONCE.—A canoe in good condition. Apply to Watchman Office.

FOR SALE.—A Square Piano. Apply to Mrs. Mackie, East Ward.

FOR SALE.—Used Ford car in good running order for sale cheap. Apply to Camille Couvrette, at Philias Masson's, Lachute.

FOR SALE.—A light runabout buggy, rubber tires, made by McLaughlin, used very little. Apply to Dr. Higginson, Hawkesbury, Ont.

TEACHER WANTED.—For the St. Canute, Protestant School. Apply to Garrison MacAdam, R.R. No. 3, Lachute, Quebec.

Mr. A. Lamarche wishes to inform the public that he is agent for the Canada Cement Co., and any persons wanting cement will do well to call up A. Lamarche, St. Philippe, or Telephone 156r1-3. A car load just in.

PACKAGES CONTAINING FRUIT FOR SALE.

E. S. C. Welland Co.—What are the Dominion regulations regarding the packing of fruit for sale?

Answer—You had best send to the Fruit Branch, Department of Agriculture, Ottawa, for a copy of the orders and regulations, but, briefly, they are as follows: Every package, either open or closed, containing fruit intended for sale, has to be marked with the initials, surname, and address of the packer, the name of the variety, and the grade of the fruit; if the package is repacked it must be so endorsed and by whom; "immature fruit," which is fruit not ripe enough for dessert, must be so described on the package; the package must be well and properly filled; old marks, if any, on the package must be obliterated.

SIZE OF BERRY BOXES.

Fruit Grower, Niagara—What are the requirements of strawberry boxes regarding size and capacity?

Answer—The regulations read: Every box of berries or currants packed in Canada for sale in Canada, and every berry or currant box manufactured and offered for sale in Canada shall contain when level full as nearly as practicable one or others of the following quantities: (a) four-fifths of a quart; (b) one pint, and shall be 4 1/2 by 4 1/2 inches at top and bottom and 1 1/2 inches deep; (c) two-fifths of a quart.

FARM DRAINAGE.

The drainage of farm lands should receive increased attention. Many farms and even whole districts are not as fertile and productive as they would be if drained. A drainage system is essential in this humid, temperate zone of heavy rainfalls. Fortunately, throughout the greater part of Eastern Canada there is adequate natural drainage. The land is rolling or hilly. The surface formation is more or less porous and water, even after the heaviest rains of summer, disappears within 24 hours from the surface of the soil.

There are many farms that have fairly good natural drainage, but not sufficient to remove the water quickly after heavy rains and spring freshets. These can usually be greatly improved by a system of surface drains including the plowing of fields in lands so that each dead furrow may be a drain with a definite outlet.

Heavy soils and lands that lie so that the natural drainage cannot easily be determined usually require underdrainage. A soil is frequently cold and wet on account of an impervious subsoil. Other soils are of very little agricultural value because of seepage. The tile draining of such as these is a valuable permanent improvement to the farm. It will enable the farmer to seed his crop earlier and to grow healthier and much larger crops. It will be better than insurance against drought and spring frosts. It will increase profits and save valuable fertilizing ingredients from being washed from the surface of the soil.

For any drainage work a sketch or map is essential. On it should be placed the data obtained from a survey of the farm, contours marked and

drains located; then it serves as a permanent record and will save time and labor in future drainage work. A number of permanent landmarks should be located and measurements marked on the map from these to the underdrains.

In laying out systems of tile it is important to keep the slope or fall as uniform as possible. It should not be less than 2 inches per 100 feet, and where changed suddenly a tilt basin should be built. Three-inch tile is the smallest profitable size, and as the volume of gathered water increases so the tile should be increased until the main drain for a twenty-acre field having a fall of 5 inches per hundred feet should be laid with six-inch tile. The distance between tile drains is governed largely by the depth at which they are laid. Much tile has been laid from 2 1/2 to 3 feet below the surface. The present tendency is to lay tile shallower. At these depths for field crops it is usually sufficient to place drains 100 feet apart. Then, should it be found necessary, others can be laid between, making them 50 feet apart.

The efficiency of all drains depends largely upon a satisfactory outlet. It must be large enough for the purpose and be low enough to drain the tile dry when they are flowing.

LOOK BEFORE YOU LOAD LIVE-STOCK.

Inspection of 700 arriving cars of stock at seven of the large markets by supervisors of the Packers and Stockyards Administration, United States Department of Agriculture, has shown that shippers would do well to make careful examination of cars before loading them.

"The railroads maintain satisfactory car-inspection service at the large markets, but not all cars sent to country shipping points have moved directly from the terminals. As a consequence many cars have defects that may cripple animals or even cause their death. Of the cars inspected in this investigation 7 had holes in the floors, 91 had projecting nails in the walls, and 88 had cleats that might, and probably did, cause bad bruises. Eighty-two of the cars were without bedding, a large factor in the safety and comfort of animals in transit."

"No matter who is responsible for the condition of cars, it is to the interest of the shipper always to make an inspection of his own, and most certainly it is up to him to see that the right kind of bedding is provided. Frequently, partitions are used in stock cars, and because of this a careful examination must be made for projecting nails and cleats that may have been left when these partitions were removed. The floor is the most important part of the car. It should be gone over thoroughly and any holes patched. Doors must be in good repair and when the cattle or other livestock are loaded, securely fastened."

"Last year at one middle-western market 1,700 cattle and more than 2,000 hogs were found crippled in cars. In December more than 1,000 crippled hogs were received at one of the eastern markets. These numbers are small in comparison with total receipts, but they look mighty large to the shippers who owned the animals."

Killing Weeds With Brains

By Mrs. E. P. Harling

If only a "Saint Patrick" would banish the weeds! It takes many efforts, long continued and well directed, even to control them, much less exterminate them, and perhaps, on second thought, we would not be quite willing to banish them from the face of the earth. Many of them are so lovely that if they were rare they would be almost priceless; as for instance, the Mexican poppy, or Queen Anne's Lace, with its delicate, lacy white flowers.

But if you give them an inch, they'll take an ell. As a class, weeds have a long black list against them. They rob the soil, thus defeating the very end for which the farmer strives—that of giving his crop plants the very best possible chance to make good growth. They retard the work of harvesting. They increase the labor of cleaning the seed at threshing-time. Some of them injure stock, as for example, the needle-grass, squirrel-tail grass, etc., the awns of which get into the gums and nostrils and even into the eyes of the stock while they are eating. Some weeds, such as hemlock, loco and many others, poison stock, thus causing serious loss of time and money. These and many other sins are laid at their door, and few are the good qualities with which to offset them.

WEEDS INCREASE COST OF FARMING.

There is no possible doubt that weeds greatly increase the cost of production. Without them labor would be almost cut in two. The fields which have been kept clean from weeds for the longest time cost least to up-keep and yield larger returns. As a rule, one need not go far from his own farm to find proof of this.

ence. If for any reason the weeds have been allowed to come into full bloom, then the quickest and surest way to kill the seeds already formed in the flowers is to gather the weeds and burn them.

CULTIVATE, CULTIVATE, CULTIVATE.

The greatest task is in the fields containing row crops and forage and small grain crops. Almost all farmers recognize the need of keeping the ground between the rows free from weeds, but not all are awake to the urgent need of taking care of the particularly bad spots by themselves; of clearing out in the rows and keeping the ends and edges and fence corners clean.

Weeds have tremendous seedling powers, and it requires no more than a moment's thought to make us realize that the neglected or overlooked weeds left in a field can furnish more than enough seed to cover the entire farm with a luxuriant growth of weeds. These out-of-the-ordinary places are so extremely important that particular pains should be taken to destroy the weeds on them. Such weeds should be gathered and burned, if they have been allowed to come into full bloom, to kill the millions of seeds they carry.

When you come right down to it, there is no excuse for weeds taking such toll from farmers' profits, for they can be exterminated. The trouble with us is that we want a sort of "get-rich-quick" method. We aren't willing to be more thorough each time; and yet it is just this little bit of extra effort which spells the difference between positive success and mediocrity.

Go out and take a look at the nearest patch of bindweed, for instance, whose roots are sometimes found six feet or more in depth and whose tops have runners anywhere from one to twenty feet long. Does any one think he can kill out such a plant by an occasional chopping or plowing through it? There would be just about as good chance for success by such methods as a man weakened by long indoor life would have of thrashing Jack Dempsey. You have got to use the right method and keep at it.

A sand-bur ripens more than 42,000, and a foxtail will mature more than 100,000 seeds. The chickweed which grows all over the place produces five generations a year, and each plant is capable of bearing 3,000 seeds. No wonder it takes such incessant hoeing to get rid of it after once it gets started. And just for a "big-gest fish" story, let's stop with the humble purslane, or "pussley," which is credited with 1,250,000 for a single plant. Nor are these cases exceptional. Hundreds of the plants we know

the best will do quite as well and some do better.

WEED SEEDS LIVE MANY YEARS.

"But," you object, "I don't let the weeds grow all summer long anywhere on my farm. I always mow them off once anyway." Yes, but once isn't enough. And what do you do with the cuttings? To mow after plants have begun to bloom and let the cuttings lie where they fall is evidence of the lack of thoroughness for which this plea is made.

In the first place, plants often begin to bloom, and therefore mature seed, long before most people suppose; and in the second place, after they have once started blooming, many plants have sufficient vitality to ripen at least part of their seeds even after the plants have been mowed or chopped off, as witness the dandelion. Seeds of these chopped off plants fall into the soil where Nature wraps them up carefully, apparently preparing for the possible "seven lean years."

The stubble of these mowed or chopped-off weeds nearly always sends up new branches which bloom and bear seed. Sometimes these branches will lie almost on the ground, below the usual reach of a mowing-machine, and it is frequently a fact that unless properly done, mowing may actually increase weeds.

There seem to be two different methods of mowing when the object is to kill weeds. First, very frequent cutting to prevent blossoming. Second, cutting just as the majority of the weeds are beginning to bloom. This is the time when plants are using their maximum strength to put forth seed, and if they are cut at this time, they are caught when they are most exhausted and their stubble takes longer to send up new branches. Cutting at this time is the better if the cuttings are burned, or thoroughly destroyed in some other way. It is absolutely essential that the seeds just forming should be destroyed, and fire is certain destruction. Dry material of some sort should be piled with the cutting and the pile lighted at once. Delay gives opportunity for the seeds to be scattered, and many thousands of them will be ripe the day after the plants were cut. The cuttings will perhaps be too green to burn up entirely, but the big point is to heat the seeds enough to kill them. If this is done, their mischief is ended.

The stubble of annual weeds can be plowed under; also many seedlings in spring and fall can be killed this way. Plants called perennials must be treated differently. If you don't know what your plants are, dig up some of each kind, taking the entire

Wage War on the Enemy

We must be early and eternally ready to outwit the insects and diseases that lie in wait for our gardens.

The best methods of handling insects and diseases are preventative methods, such as: encouraging a vigorous and resistant growth by proper tillage, rotating crops and groups of crops closely related; destroying all garden refuse and weeds, and plowing in fall to kill some insects. Spraying is effective in combating some insects and some diseases while for others it is of no value at all.

TWO CLASSES OF INSECTICIDES.

There are two general classes of insecticides (insect spray materials). They are, poison or stomach insecticides and contact insecticides.

Poison or stomach insecticides are used for insects having biting mouth parts such as cabbage worms and striped cucumber beetles. Insecticides of this class most commonly used are Paris green and arsenate of lead. Sometimes helioth and London purple are used but they are less effective. For young potato beetles, cabbage worms and similar insects, 1 ounce of arsenate of lead paste per gallon of water or 2 1/2 to 3 pounds per 50 gallons will be sufficient. With arsenate of lead powder or Paris green one-half of these amounts of poison are used. When old potato bugs are to be killed these amounts may need to be doubled. Arsenate of lead is the most desirable of this class, as it sticks to the foliage better and does not burn it nearly as much. Paris green can be made to stick better by adding soap to the solution and the danger of leaf burning can be reduced by using a little more lime, by weight, than Paris green in the solution. Calcium arsenate is a comparatively new insecticide which can be used the same way as lead arsenate.

CONTACT DESTROYERS.

Contact insecticides are used for insects having sucking mouth parts. They kill the insects by the material actually getting on the insect and corroding its tissues or by strangling it. The most common of these insects are the aphids or plant lice and the squash bug. Insecticides of this class are soap solutions, kerosene emulsion and tobacco decoctions. The kerosene emulsion is made by dissolving one-half pound of soap in 1 gallon of hot water then mixing with this 2 gallons of kerosene, till the whole is thoroughly emulsified. This stock solution is then diluted from 15 to 20 times. A number of tobacco extracts are on the market which are very effective and more convenient than kerosene emulsion. They should be applied at the rate specified on the package they come in.

When several materials are applied in one solution, each material should

be thoroughly dissolved in a small amount of water before mixing. It is most important in spraying to spray as soon as the first insects appear and before they become a serious pest.

Some of the poison sprays can be applied in powder form. If applied in this form on a still and preferably damp morning, they are very effective. Dust sprays should be used cautiously as some people are poisoned when applying them.

The most convenient device for applying spray solutions to the garden plants is a hand compressed air sprayer. As spray materials will corrode metal, the solution left over should always be thrown out and the sprayer rinsed before setting it away.

CONTROLLING CUT WORMS.

Cut worms, wire worms, white grubs and stalk borers give frequent trouble. All of these are controlled to some extent by fall plowing and the destruction of all garden rubbish and weeds. Cut worms can be killed with poisoned bran mash, made in the proportion of 1 quart of bran, 1 teaspoonful of Paris green, 1 tablespoonful of molasses and enough water to moisten. This mixture should then be scattered along the rows or near the plants. When this is used, all poultry should be kept away from the garden. When stalk borers are found in a garden, the best thing to do is to destroy the attacked plants as soon as they are noticed and to be sure and clean out and destroy all weeds and plant remains in fall.

Most vegetable diseases can be controlled by proper preventative measures previously enumerated for the control of insects, especially by crop rotation and rubbish disposal. For some diseases as leaf blight, forms of which attack cucumber, tomatoes and potatoes, Bordeaux mixture is a good remedy.

Bordeaux mixture is made by dissolving 4 pounds of copper sulphate in 4 gallons of water, slacking 4 pounds of stone lime and adding enough water to make 4 gallons. When needed, add enough water to each solution to make 25 gallons and mix the two solutions. This should be applied immediately as it deteriorates rapidly. It is important always to have a little more lime in the solution than copper to prevent foliage injury. An excess of copper can be detected by dipping a clean knife blade into the mixture. If in excess, a coating of copper will be precipitated on the knife blade. An excess of lime can be detected by blowing one's breath over some of the mixture in a porcelain cup, in which case a thin scum will be formed on the surface of the water. After the plants are badly diseased, spraying will help very little, but if a garden or locality is troubled with one of these diseases, it can be held in check by proper preventative spraying.

Home Education

"The Child's First School is the Family"—Froebel.

Importance of Keeping Promises—By Edith Lochridge Reid

To the child a promise is as serious and binding as a promissory note to a banker. Not all notes are paid, it must be admitted; neither are all promises kept that are made by mothers. Sometimes a child gets noisy at a club or public meeting, and in order to restore peace, mother whispers that if Johnny will keep still he can have a nice big box of candy afterwards. So although it is mighty hard work for the tot to control his energy, he does manage to calm down and behave with the thought of this unusual reward. Then the meeting is finally over, it is late and when Johnny begins to clamor for payment due as promised, mother dodges her obligation by saying that it is near supper time and she must get home, and there isn't any store near by where candy can be purchased and won't Johnny PLEASE be satisfied if she'll promise to pop him some corn when she gets supper. Is it any wonder that Johnny sits down on the sidewalk and wails and kicks his heels and makes a scene? No doubt passers-by remarks what an ugly disposition that child has and how hard it must be to manage him. Now this mother made two mistakes. First, she never should have made a promise that was really a bribe. Probably little son was too small to take to such a long meeting and remain quiet. But bribe or no bribe, once she had promised to get that box of candy she should have done so if the family had nothing but sandwiches for supper, because she was trailing a candy shop,

Another thoughtless mistake mothers make is keeping promises half-heartedly. Mary comes out in the kitchen just as mother is kneading bread and begs for a story. "Run along a little while, dear, and when I'm not so busy we'll read a nice long story." So Mary in all good faith plays quietly and contentedly on the strength of this promise, and after what seems ages to her, she once more approaches mother, who is now at the sewing machine. "Oh, I'm so anxious to finish this dress, and as soon as I do I'll read you a story if you're very, very good until then," says mother. Then a caller comes and after that it's mealtime again and Mary's confidence in promises goes flickering. She stamps her little foot and points, as mother says, "Well, if you're going to act naughty and worry mother, I'll read; bring your book here." Then without any spirit of sympathy or enjoyment she reads the shortest story she can find in order to appease Mary's tantrum, and she considers she has kept her promise.

So our first thought as mothers must be not to make too many promises. Better a surprise now and then, than a promise broken. And second, once a promise is made, never fail to fulfill it, not from the viewpoint of mother and her interest, but entirely from the child's attitude of expectancy. It is difficult and inconvenient at times, but not nearly as difficult as it is to regain the lost confidence of the child, for if there is a keyword in successful discipline it is CONFIDENCE.

plant including blossoms or seeds, and send them to the Experimental Farm to be named, and ask for special directions if any are needed. In other words, make intelligent efforts to control or kill the weeds on your farm. Don't lose your work and time and shrink your crop by going at it haphazard. It will cost more the first year to do it thoroughly, but far less the second. Even two seasons' work of this thorough-going kind will bring surprising results.

Egg-Laying Records.

The progress made by the Record of Performance for purebred poultry, conducted by the Poultry Division of the Live Stock Branch at Ottawa, is indicated by Report No. 3, which has just been issued. The report covers the record year 1921-22, and shows practically the same percentage of birds qualifying for the 150-egg certificate and the 225-egg or "advanced" certificate as the year previous.

British Columbia leads in the Record with a percentage of 47.8 qualified for R.O.P. certificates and 12.3 qualified for advanced R.O.P. certificates. Ontario with the largest number of entries had a qualification of 22.3 per cent. R.O.P. and 3.5 per cent advanced R.O.P. Saskatchewan and Nova Scotia had a better percentage in qualification but their combined entries were not an eighth of those of Ontario. In both British Columbia and Ontario Leghorns were to the fore, but Wyandottes and Plymouth Rocks figure prominently in the entries from the latter province. Quebec figures largely with Plymouth Rocks and easily led the van with Rhode Island Reds. From Alberta, Saskatchewan and the Maritime Provinces, Plymouth Rocks took the lead in the number of entries, but Manitoba was numerically strongest in Leghorns. The Ontario Agricultural College had the largest number of individual entries, nominating 788 Barred Plymouth Rocks, 450 Single Comb White Leghorns and 12 White Plymouth Rocks. The University of British Columbia made a uniform entry of 115 each of White Wyandottes, Barred Plymouth Rocks, and Single Comb White Leghorns, the foremost layer being one of the last mentioned with 305 eggs. The highest layer at the Ontario Agricultural College was a Barred Plymouth Rock with 294, but a White Leghorn came close with 288.

An interesting outgrowth of the work is the fact that during the year Record of Performance associations were formed in British Columbia and Alberta by the breeders themselves.

The Farmer's Paint Pail.

Ready-mixed paints save money for the farmer who knows how to use them. Most farms have buildings which need a touch of paint every season. The house, the garage, the ice-house, the granary, the big barn or the wagon house—all call for their share of attention. It is well to arrange it so that not all of these will come due to be painted the same year, thus dividing up the expense.

Brushes are high now. We have the bill for one flat brush that amounts to \$2.75. For that reason it pays to take care of brushes. It is easy to leave a brush all soaked with paint until it hardens and is spoiled. Thousands of dollars are wasted that way every year. As soon as a brush is out of its job, it ought to be washed with soap and soft water. When leaving brushes overnight, let them hang in linseed oil.

"Kosher" means for Jewish consumption must be "clean" in the Old Testament definition of the word as opposed to the ritually "unclean." The word in Hebrew means "clean," "right" or "fit."

Preparing Lambs for the Top Price.

In the annual review of the live stock market and meat trade situation for 1922, officials of the Federal Live Stock Branch point out that a noticeable feature of the lamb market was the absence of docked or castrated lambs. Whenever an odd load of docked and castrated lambs was offered for sale, the price realized was well above that of ordinary lambs and they were always the object of keen competition. These statements were made more particularly with reference to the Toronto market, which is supplied from the banner live stock province of the Dominion.

In the bulletin "Sheep Husbandry in Canada," the author quotes the views of sheep buyers who state that the neglect of castration is the most prominent defect in the sheep raising industry. That it should continue to be so is astonishing because the operation is simple, quickly done, and carries very little risk of loss. Long tails are regarded as an evidence of poor shepherding. When they mean lower prices, they become a sure sign of poor business. Whether it be horses, cattle, hogs or sheep, or even a basket of fruit, it is always profitable to present them for sale in attractive condition. If lambs are to make a good impression next autumn, the surgical operations must be done this spring, and the earlier the better after a lamb is ten days old. Pamphlet No. 9 of the Sheep and Goat Division of the federal Live Stock Branch describes the operation.

My Remedy for Lice.

I have found a remedy that will kill lice on dairy cows or any infested stock. Calves, especially, will not do well if troubled with lice. I have tried other treatments, but have used this one altogether since testing it. The mixture is: one part Persian insect powder, one part sabadilla seed, six part flowers of sulphur.

Our local druggist has so much call for this mixture that he keeps it ready-mixed. It retails at present at 30 cents per pound. I applied this powder to a saddle mare that got pretty well plastered with lice on winter when she was not used much. In a minute or two I could see every louse in her hide start climbing out toward the ends of her hairs with the greatest enthusiasm. When they arrived at the end of the line they seemed to be no place to go, so they stayed there for a while madly waving their feet. Then they dropped off for keeps.

One more application to catch any nits that possibly hatched out finished her up. I have since used it on all sorts of stock, and always with the same success.—A. H. D.

Seemed So, Anyway.

Mrs. Chatterton—"This philologist says there are six hundred thousand words in the English language." Her Husband—"Is that all? I never kept count but I'm sure I've heard you use more than that."

Many men seek fortune in order to be independent; they should rather seek character, the only true source of independence.

Surnames and Their Origin

O'HARA
Variations—O'Hara, O'Hora.
Racial Origin—Irish.
Source—A given name.

Sometimes the change in spelling between the real Irish form of a name and its Anglicized version is so great as to throw you completely off the track. O'Hara is one of these names. Few persons would think of associating it with the name which in the Gaelic is spelled "O'Éadhraídh."

But you will note that when the two "ah" compounds are pronounced, the difference is not great, and that the diphthong "ea" takes more of the "a" than of the "e" sound, like this: "O'É(É)adhraídh"; you see there really isn't much left to it but O'Hara.

This clan name is derived from the given name of "Eadhraídh." The O'Hara clan was settled in Kluhne. It was a branch of the O'Carroll's of Ely, and the clan must have come into existence about the time of Brian Boru or a trifle later, for in the clan record of a long line of chieftains there is mentioned in the year 1067 one "conalag O'Éadhraídh," who was a lecturer at Clonmacnoise. The O'Haras were a strong clan until the time of Oliver Cromwell's invasion of Ireland.

PAIN AFTER EATING

Proof That the Stomach is Weak and Needs Toning Up.

Generally speaking, a person in good health can digest most foods. If not, and there is pain after eating, the stomach has lost tone and is too weak to do its work. In that case your stomach needs strengthening and the way to do this is to build up your blood with Dr. Williams' Pink Pills.

There cannot be good digestion without a sufficient supply of good red blood, and there is nothing better than Dr. Williams' Pink Pills to renew and enrich the blood. That is why they have proved so successful in thousands of cases of indigestion. Mr. D. J. Shaw, Selkirk Road, P.E.I., has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says: "I suffered from indigestion for a number of years. My case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot to me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but without much faith, after so many failures, I decided to try them. After taking three boxes I noticed a change for the better. Then I got three boxes more, and found I had a genuine remedy. I continued the treatment, took moderate exercise, could take good plain food without suffering as formerly, and proved that these pills make good blood, and that this good blood will restore the stomach and nerves. Anyone suffering from stomach or nerve troubles will make no mistake in giving Dr. Williams' Pink Pills a fair trial."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Suez Canal took thirteen years to construct.

A new Canadian soprano has appeared in the person of Miss Blanche Archambault of Montreal, who is giving concerts in the Eastern States. She sang recently before a large audience at Holyoke, Mass.

Attractive Proposition

For men with all round weekly newspaper experience and \$400 or \$500. Apply Box 24, Wilson Publishing Co., Ltd., 75 Adelaide Street West.

Richest Spot on Earth.

The greatest gold mine in the world is at Timmins, 500 miles north of Toronto.

Thirteen years ago an outcropping of rock lay unknown in the heart of a wild bush country. A man came struggling through the bush, his belongings packed on his back. He saw the rock. "Gold!" he muttered.

The man was a young prospector named Ben Hollinger. To-day the Hollinger mine covers more than 400 acres; below its surface run 45 miles of tunnels and an electric railway system; its great mills roar ceaselessly; and \$1,000,000 in gold leaves its refinery every month.

The Hollinger mine has become the greatest in the world. For two years it has been running neck and neck with its nearest rival, the great New Modderfontein of the Rand, South Africa. The most recent figures, however, show that while the output of the Transvaal mine has declined, the Hollinger is forging ahead.

What does the world's richest treasure chest look like? To be truthful, it looks like anything on earth but a gold mine. It looks like a boiler factory, or a pork-packing plant, or anything unromantic.

Hollinger produced \$12,000,000 in 1923. This year it is planned to mill 7,000 tons of ore per day, instead of 4,300, the present daily average. Yet for years to come Hollinger will be using only a fraction of the mine's resources.

Hollinger at present employs 2,300 men, of whom 1,800 work underground. They are arranged in three shifts. For eight hours a day they work in a cavern of gold, and never see it, for the greatest gold mine in the world displays no yellow metal until the refinery has done its work.

WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones she would not be without them. They are the ideal home remedy for the baby; being guaranteed to be absolutely free from opiates or other harmful drugs. They are a gentle but thorough laxative and have been proved of the greatest aid in cases of constipation, indigestion, colic, colds and simple fevers. Concerning them Mrs. Ernest Gagne, Beaumont, Que., writes: "I have used Baby's Own Tablets for constipation and colic and have found them so successful that I would not be without them. I would strongly recommend every mother to keep a box in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Fine Specimens of Buffalo Hides.

Several fine specimens of buffalo hides and heads have recently been received by the Canadian National Parks branch, Department of the Interior, Ottawa. These were secured from animals killed in Buffalo National Park during the winter and are of excellent quality. The robes, dressed, measure eight feet wide and twelve feet long and the hair is long and glossy. The manes on the heads are also exceptionally long, measuring from fourteen to sixteen inches.

NOT SICK ONCE IN FOUR YEARS NOW

Mrs. Smith Declares Health Has Been Perfect Since Tan- lac Ended Stomach Trouble.

"For ten years hardly a day passed that I didn't suffer from stomach trouble, but I took Tanlac four years ago and haven't had a sick day since." Is the remarkable statement made recently by Mrs. Thamar Smith, 85 McGee St., Toronto, Ont.

The little I managed to eat simply tortured me with pains in the pit of my stomach, and gas pressed around my heart, causing it to skip beats until I thought it would stop altogether. I was as nervous as a witch, and lost so much sleep that I was dark and swollen under my eyes. I was so weak and run down I could hardly walk a block or do my housework, and was almost in despair.

"Tanlac certainly was a godsend in restoring me to such perfect health, and I think it's the greatest medicine ever made. Nearly everybody else on McGee Street seems to have used the treatment, and are praising it too."

Tanlac is for sale by all good druggists. Accept no substitute. Over \$7 million bottles sold.

The Afternoon Tea Rite.

Mr. Gordon Selfridge, the Chicago merchant who invaded and conquered London, is revisiting the United States, and touches on some piquant contrasts between his native and adopted countries. He has the advantage of a double standard of comparison, of seeing the British through American eyes. To an interviewer he lays amusing emphasis on an English social rite, afternoon tea, which is the subject of mild derision on the part of visitors to the tight little island—until they succumb to it. Mr. Selfridge thinks that if Americans would similarly relax in the middle of the afternoon's work they would gain a peace and calm they really need and lose none of their famous "pep." When he opened his departmental store on Oxford Street thirteen years ago it was the custom of his salespeople to snatch tea as best they could. Instead of discouraging it he accepted it as a national institution, and gave a tea interval to each of his 3,000 employees, and "since everybody else in the country does it, no time or business was lost." He is quoted further:

"Tea is brought around at matinees and movies, on railway trains and boats. Lords and commoners pause for it in parliament. You cannot enter any office, editorial den, public library, factory or shop in Great Britain between four or five without stumbling over cups and tea things."

Mr. Selfridge confessed that, personally, he did not like tea, but he likes what it stands for—a friendly getting together, a relaxing pause in the day's work, a slowing down of the American's relentless push, not to a point of becoming less active, but more balanced. The American has a breakdown at 50, he added, but the Englishman was swinging a wicked golf club at 65.

Afternoon tea has become a social function on this side of the Atlantic, but it has not seriously penetrated the market place. After all, it is not the tea hour that gives the Briton poise and calm. It is merely one expression of his unhurried habits and ways of living and of looking at life. Before work slows down in offices, factories and shops on this continent in the presence of the tea-cups, there will have to be a radical change in the mental as well as the physical habits of the business community.

For Fascinating Eyes

Cuticura Soap shaves without razor.

Ideas Regarding Beauty.

What is your idea of a beautiful woman? Must she be fair or dark? short or tall? slender or stout? Tastes certainly differ. A Chinese belle must be fat, have small eyes, short nose, high cheeks, and feet which are only a few inches long. In the Labrador islands no woman is beautiful who has not black teeth and white hair. Some nations squeeze the heads of children between boards to make them square, while others prefer the shape of a sugar-loaf as the highest type of beauty. It is a funny old world, isn't it?

KENDALL'S SPRAIN TREATMENT

Keep Kendall's always in the barn. A strained muscle, a sprung tendon, a jolt or a knock demands immediate attention. A few hours' delay will result in a long lameness—perhaps in the loss of the horse. Kendall's Spavin Treatment has saved more horseflesh than all the other known remedies. Under the name of Kendall's Spavin Cure, it is the forty-year-old standby of horsemen, farmers and veterinarians.

Get a bottle of Kendall's today. Ask, too, for the Free Book or write for it to

MRS. BUDGE SO WEAK COULD HARDLY STAND

Tells How Lydia E. Pinkham's
Vegetable Compound
Restored Her Health

River Desert, Que.—"I used to have a severe pain in my side. I would be unable to walk fast and could not stand for any length of time to do my ironing or washing, but I would have to lie down to get relief from the pain. I had this for about two years, then a friend told me to try Lydia E. Pinkham's Vegetable Compound as she had had good results. I certainly got good results from it, too, as the last time I had a sore side was last May and I have not had it since. I am also glad of having good nursing for my baby, and I think it is your medicine that helped me in this way."—Mrs. L. V. BUDGE, River Desert, Quebec.

If you are suffering from the tortures of a displacement, irregularities, backache, headaches, nervousness, or a pain in the side, you should lose no time in trying Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Private Text-Book upon "Allments Peculiar to Women" will be sent you free upon request. Write for it to the Lydia E. Pinkham Medicine Co., Lowell, Ontario. This book contains valuable information that every woman should know.

Genuine ASPIRIN

SAY "BAYER" when you buy. Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-three years and proved safe by millions for headache, colds, toothache, neuralgia, lumbago, rheumatism, neuritis, and for pain in general. Accept only "Bayer" package which contains proper directions. Handy boxes of twelve tablets cost few cents. Drug-gists also sell bottles of 24 and 100.

EN PASSANT.

ANCIENT statistics are only vaguely interesting: They are usually done up in round figures which do not show any decimal fractions, and which therefore do not fit in with the modern computations of output. We work down to fine points now, and with microscopic factors, so that when we read a picturesque description of the Taj Mahal at Agra, and run across a statement that over 20,000 men were occupied for over 20 years in its erection, we gather no proportionate idea of comparison with modern cost of area. We do not know what was the cost of white marble at the time Shah Jehan decided to build the mausoleum in memory of his favourite wife, nor do we know what rates of wages the various operative societies and unions juggled with during the 20 years of construction. There are also no records of labour disputes, strikes, arbitration awards, nor suspension of operations from any stated causes. History is silent on these points, although it is quite natural to suppose that the employers and contractors in those far off days had troubles of their own which unduly drew out the period of construction, and got them in wrong with their customers.

If we were to summarise our records as the ancients did, and were to give out, to be handed down to future generations, that the Welland Canal, about fifty miles long, took 10,000 men 25 years to construct, wouldn't these same future generations put it down as a fish story?

There is the story of the Cheops Pyramid, too: We are told this pyramid, only 480 feet high and 764 square at the base, took 100,000 men 20 years to put up. Behind that statement there must be a lot of figures we want to write off a certain percentage to cover strikes, feast days, fast days, Empire and Dominion days, King's birthdays, Queen's birthdays, Labour days, Saints days, Christmas and New Year days and also the Egyptian equivalents for any other excuse for shutting down, in addition to the six weeks they took to celebrate the six festivals in honour of the moon, Isis, the sun, the goddess of night, and the god of war. Then, so far as we know, the pyramid builders had no electric light, and as they were a long way from the Texan oil wells and the Montreal refineries, we are induced to suppose that they worked only in daylight: Besides it would be necessary to find out how many hours a day the Egyptian Working Man worked, when he did anything, and how early in the morning the whistle blew.

WE ARE APT sometimes to think we get too many statistics, and that round figures would serve us quite well. It suffices the most of us to know that a square meal at breakfast time approximates half a day's work, without worrying ourselves about the caloric values contained in the viands we partake of, and how much power is exerted in chewing them. Such knowledge is disregarded by the young, and when we do in any way begin to respect it, we are so old that we would rather have a new set of teeth than all the information it is possible to acquire on the subject. That reminds me that yet another statistician has come along, bringing with him a new instrument of torture. He is the president of a Dental College, and he has invented a machine for testing the power of our jaws. He calls it a "Gnathodynamometer". At first glance, the jaw test would appear to lie in the name of the thing, but that is not the test. The inventor has tried the instrument on the teeth of a thousand people, and he gives it out that the average power of molars is 170, point something, pounds, but much less for incisors and bicusps. Now where is this knowledge going to take us? and will it in any practical way prevent anybody from biting off more than they can chew?

That machine, and another one for testing the speed at which some people's chins can wag, would be about the statistical limit: but then on the other hand, consider what an advantage it is going to be to the manufacturers of chewing gum! They will be able to compound the articles with scientific exactitude, and to control its tensile resistance to a millionth part.

If the same principle could be made to apply to the average beefsteak, then we would say the inventor of the gnathodynamometer had done something worth while. The idea is not

hopeless, although I "hae ma doots" about its efficacy in the case of young housewives, who are usually a trifle touchy about their cooking, and who might object to the inclusion of this new instrument in their regular outfit.

THE LINKMAN.

The Artful Friar-Concluded

So all in set time, the Abbot was there,
Calling the name of each Brother,
And many a smile and knowing wink,
Was passed from one to another.
They started fair, at a pretty good pace,

With Bernardo well in the van,
Some remarking how easy it seemed,
Others laughed as their penance began.

A few miles ahead the pace became slow,
And some their courage did lose,
With many a word not found in prayers,

Was called at the peas in their shoes,
Bernardo was the exceptional one,
Who displayed no signs of dismay,
To all he passed, he made some remark,

And wished them all a "good-day!"
With moistured brows and laboured gait,
Some plodded along on their way,
And many a one went stumbling on,
While others began to pray.

But "Pater Nosters" were no good,
To soften the hardened peas,
And wriggling and turning, dancing and squirming,

Some tried any old way to get case,
As the strange procession moved on,
No more decrepit a lot could have been,

So unsaintly a set of saints they said,
By laymen had ever been seen,
We all have read of the Pilgrims of old,

Moving slowly along on their knees,
That was decorous, and not so curious,
As a walking penance on peas.

Everything comes to an end they say,
Paradoxically this race was run,
Bernardo the sinner, an easy winner,
Surprisingly enjoying the fun.

The Brothers were wild, the Brothers were mad,
At Bernardo outwitting them well,
Plying him with questions, hinting suggestions,

And asked him the secret to tell.
He took each a side, in their ear did confide,
Exactly small tokens as fees,

"It's quite simple you see, to walk like me,
But be sure you first boil your peas".

WOMEN'S INSTITUTE

The county executive of the Women's Institute for Argenteuil County met at McArthur's Hall on June 7th, with representatives present from the five branches, —Lakefield, Hillhead, Upper Lachute, Jerusalem, Bethany and Argenteuil.

The following officers being elected, —Pres., Mrs. D. Todd, Vice-Pres., Mrs. J. Boyd, Sec-Treas., Mrs. H. Pollock.

Convener of Child Welfare, —Mrs. R. Bradley.
Convener of Home Economics, —Miss G. McQuat.

Convener of Agriculture, —Mrs. A. Tomalty.
Convener of Publicity, —Mrs. H. Scott.

After the business part was finished, Miss E. M. Roach, Superintendent of Quebec Women's Institutes outlined the duties of conveners and gave many helpful suggestions.

A very interesting and instructive meeting was brought to a close by serving refreshments. Miss Roach and Miss G. McQuat visited each of the Institute branches during the week; demonstrating to the girls on School Fair Work.

The Lakefield Women's Institute will meet at the home of Mrs. Albert Tomalty on Saturday, June 16th, at 7.30 p.m.

PLANTS FOR SALE, —Cabbage, Cauliflower, Tomato, Celery, etc. Give us your order and don't be disappointed.

R. F. Gammon, R.R. No. 3, Lachute.

SALE BY AUTHORITY OF JUSTICE.

Shall be sold for cash by a Bailiff of the Superior Court by public auction and adjudged to the highest and last bidder, at the Court-House at Ste. Scholastique, District of Terrebonne, on the Twenty-sixth day of June, 1923, at 12 o'clock noon; standard time, the hereinafter described moveable property belonging to the Estate of the late William Robertson, namely:

"The sum of \$948, being made up of nine yearly payments of \$100, each and one last yearly payment of \$48, of which four yearly payments of \$100, each are overdue and unpaid and the balance is unmatured, the whole due and owing to the said late William Robertson by Joseph Maisonneuve, his heirs or representatives, under Deed of Sale passed before Joseph E. Valois, N.P., on the 25th February, 1898, being the balance of the price of the property therein more fully described."

The said sale will be made and the present notice is given in virtue of and in accordance with the terms of a Judgment of the Superior Court for the District of Terrebonne dated the 11th day of June, 1923.

For further particulars and conditions apply to Brown, Montgomery & McMichael, Attorneys for the Executors, or to Grignon & Fortier, Prothonotaries, Ste. Scholastique.
MONTREAL, 11th June 1923.

IN MEMORIAM

In loving remembrance of Mrs. Paul Leishman, who died June 14th, 1922. Gone, but will never be forgotten. Inserted by her husband and family.

IN MEMORIAM.

In sad and loving memory of Norman Leonard Reilly, who departed this life, May 31st, 1922.

How our hearts with anguish
Never will his memory fade
And our thoughts will always linger
Around the grave where he is laid.

Mother and Father.
Oh our home is sad and lonely
None but God alone can tell
How we miss his tender footsteps
And the one who loved so well.

Mabel and Willie.

ST. ANDREWS EAST

Mrs. Martin Albright spent a few days with friends in Montreal recently.

Dr. and Mrs. Dorion, of Montreal, were among those who were here for the funeral of Mr. W. Dorion.

Dr. and Mrs. Dorion, of Montreal, were among those who were here for the funeral of Mr. W. Dorion.

We hear that the Ladies Aid of the Presbyterian Church purpose holding a sale of work etc., July 10th.

Mr. and Mrs. R. Burgess, of Montreal, motored out to spend the week-end with Mr. and the Misses Walsh.

Mr. and Mrs. R. Burgess, of Montreal, motored out to spend the week-end with Mr. and the Misses Walsh.

Congratulations are due, Mr. Irvin Centre, who has successfully passed his final year in Medicine at McGill.

Mrs. H. W. Robertson went to Montreal last Friday to spend a few days with her daughters, Mrs. R. Barclay and Mrs. Mount.

Miss A. Dorion, Nurse in training at R.V.M., Montreal and Mr. K. Dorion, of Stonefield, were called home on Friday on account of the serious illness of Mrs. W. Dorion.

Mr. Geoffrey Simpson, Montreal, with Mr. W. A. M. Howard were here week-end guests at the Rectory, the former with his father, Dr. R. Simpson having come out for the funeral service of Mr. W. Dorion.

A company of Girl Guides, of Montreal, purpose going into camp here again this summer. Miss B. Simpson with other officers, were here on Saturday, making arrangements to go under canvas the latter part of this month.

Miss Dewar and Miss Madeleine Neve were also in Montreal last week. Christ Church W.A. met at the home of Mrs. Buchanan Robertson on Thursday afternoon when it was decided to hold their usual Annual Summer Sale on Saturday, July 28th.

The whole community was greatly shocked to hear of the death of Mr. W. Dorion, on Friday afternoon, after a few weeks illness. The most heartfelt sympathy is extended to his father and mother, Mr. and Mrs. O. Dorion, his sisters Miss Adrica and Mrs. F. Robertson and his brother Mr. K. Dorion. The funeral service was held in Christ Church, Sunday afternoon, the Rev. W. A. Howard officiating.

GRENVILLE.

Mr. Willie Gill has purchased a new automobile.

Mr. Harold Gill spent the week-end with his family here.

Miss Annie Matthews is spending the summer months here.

Mrs. W. Skelcher is spending the summer at her home in this place.

Miss Alice Gaudry of Ottawa is visiting Mrs. Bradshaw in this village.

Mr. W. Skelcher and son Willie, also Mr. Vol. Kirke spent a few days here recently.

Mrs. (Rev) Tucker, of Quebec City, is the guest of her father, Mr. John Gill of Grenville Bay.

Rev. Mr. and Mrs. Currie, of Hawkesbury, spent Tuesday with Mr. and Mrs. Carso of Grenville Bay.

Mr. and Mrs. Stephen Arnold, of Calumet spent the week-end with Mr. and Mrs. Isaac Arnold of our village.

Mr. Weymouth P. Gaudry and daughter Sylvia of Greenfield Park were recent guests of Mrs. A. B. Gaudry in this place.

The ordinance of baptism was administered to several candidates on Sunday, June 10th, in the Grenville Baptist Church at the close of the morning service. The church was filled with friends and relatives and the pastor Rev. Sanders gave an impressive sermon.

Mr. and Mrs. McPhail, of Lachute, attended and Mr. McPhail assisted in the service.

Mrs. W. Eaton and Miss Ellen Steele of Montreal, also Mrs. W. Steele and family, of Hawkesbury, attended the funeral of their brother Mr. George Steele which took place on Saturday, June 9th. Service was held in the Grenville Methodist Church and was largely attended. We extend our sympathy to his aged mother and brother and sisters.

CUSHING

Mr. and Mrs. W. Candlish, of Montreal, and the Misses Dorothy Gray, Margaret and Helena Graham were Sunday guests of Mr. and Mrs. Archie Graham.

Miss Alberta Cleland spent the latter part of this week in Montreal.

Mrs. C. F. Wilkins, of Montreal, was the guest over Sunday of her parents Mr. and Mrs. Walter Smith.

Mr. A. Starnes spent the week-end with his wife in their new home in Cushing.

Miss Elsie Graham has finished her studies in Hawkesbury for this term and spending her vacation at home.

JOHNSON's great failing was acute absent-mindedness. He was always forgetting appointments or keeping them at the wrong place or else at the right place at the wrong time. He was always up to most extraordinary antics; his friends never knew what to expect next.

One day he came out of his house, walked to the edge of the pavement and threw his right leg into the air with such violence that he overbalanced and sat on the ground.

"What are you doing?" asked his neighbour.

"Oh," replied Johnson, "I thought I was mounting my bike. I forgot it wasn't there."

"That's nothing," replied his neighbour; "my brother is worse than you. Only last night he got up and struck a match to see if he had blown out the candle!"

CASH-IN-ADVANCE TALK

We wish every subscriber thought enough of this paper to pay his or her subscription strictly in advance. Many of them do, but some do not. We think a great deal of our subscribers. There is nothing within the bounds of reason we would not do for them. But some thoughtless souls overlook some facts concerning this paper which we now bring to their attention.

Subscriptions do not sustain this paper. It takes lots of advertising to make up the deficit the cost of making up the deficit between the cost of running this paper, and the subscription revenue.

It costs money, time and effort to secure subscribers and keep them renewed. That cost must be passed on to subscribers and advertisers. The losses in the business must be absorbed by the profits, if there are any.

Certain credit arrangements are essentially necessary in any business. We have been pleased to extend a reasonable credit on subscriptions to subscribers who needed credit. But we cannot believe that all who accept credit really need it. Certainly credit should not be considered for an indefinite period.

Our subscription list is a permanent asset of this paper. Many subscribers have been listed for years and years. They are like old friends to a publisher. If we had to go out and renew every subscriber, our subscription costs would be prohibitive. We are striving to furnish a high class publication at lowest cost. Your cooperation in the matter of subscription payments is earnestly requested.

CARILLON

Miss Ethel Bradley returned home on Sunday evening after visiting her friends in the Laurentians.

Mr. William J. Pollock and son Leonard, of Mille Isle, spent the week-end visiting their friends here.

Mr. Colin Barclay, of California, is spending his holidays with his brother Mr. H. P. Barclay at "The Hill."

OBITUARY

Fortified by the Holy Rites of the Church, resigned to the Will of God, and comforted by the presence of husband and daughters, Bridget Carlin beloved wife of Martin Dwyer of Calumet, peacefully expired at her home on Wednesday, May 30th, at the age of seventy eight. Deceased had been ill but a short time previous to last illness, hope of her recovery had not been abandoned, until, shortly before death. The late Mrs. Dwyer was born in Connaught Settlement in 1846, came to the Rouge at the age of twenty nine, where she had lived for forty nine years, then she was called away by the Angel of death. Funeral left her late residence on Friday morning, the long corteges that followed the body to Grenville Church showed the esteem by which the deceased was held. Mass being performed by Rev. Father Limoges. Thence the remains were taken to Grenville Cemetery for interment. The pall bearers were Messrs. James Garland, William Hall, M. McTague, Anthony Hall, son-in-law of deceased, D. Davidson, M. M. Avoys.

Many braved the inclemency of the weather by coming a distance to pay their last respects to the mortal body. She leaves to mourn her loss, a loving husband, two daughters, Mary at home, and Mrs. Anthony Hall of Dalesville, nine grandchildren; besides a very large number of friends and acquaintances. Her only son predeceased her seven years ago.

We miss thee from our home dear, We miss thee from thy land, A shadow o'er our life is cast, We miss thy willing hand.

CARD OF THANKS.—We wish to sincerely thank our many friends, who by their charitable works, greatly helped in our recent and bereavement.

Inserted by Family.

Registered Percheron Stallion.
HIAWATHA 9546

Hiaiwatha is a beautiful dark dappled grey, 5 five years old, weighing 1,700 pounds. This horse will stand at the stables of Mr. James Clark, of Upper Lachute, every Saturday during the month of June, and the balance of the season at the proprietor's stables.

NOTICE! This horse is Government Inspected Class 1.

TERMS: \$8.00 to insure payable March next. All mares disposed of before foaling time, the original owner will be held responsible for insured rates. All accidents at the risk of owner of mares.

Jas. H. Murdoch, Staynerville.

"The most Delicious Tea you can buy"

HOW I MADE DOLLARS FROM DELPHINIUMS.

I had always loved fussing about with flowers, so when I needed some extra money I decided to utilize my gardening experience. I invested \$2 in seeds of perennials, including favorites, such as hollyhocks, delphiniums, columbines, and so on, all of which are easily raised from seed. I ordered the seeds from a first-class house, for skimping in seed-buying is folly.

I sowed them early in shallow boxes, where I could shade and water them better than if they were in the open ground. When the seedlings were ready they were transplanted into rows, and kept weeded and cultivated. Early next spring I had a stock of vigorous young plants ready for sale.

In addition to my own stock I had the chance to buy very cheaply a large quantity of gladiolus bulbs of ten different varieties. These I sorted over and put three or four varieties together, offering them thus assorted by the dozen. In addition I already possessed a stock of violets, chrysanthemums, arabis, daisies, polyanthus, and the like, which I had divided at the proper time and multiplied into a number of thrifty young plants, with the result that I had a fair variety of reliable garden flowers.

That season my plants yielded \$25.00, simply through selling among the neighbors in the district. The gladiolus realized about half as much again over the \$10 they cost. In addition I had rows and rows of them for my own pleasure and for stock for the following year.

The \$2 worth of seed grew into over \$20, the remainder of my \$25.00 coming from plants which, by division, I had supplied from my own stock. The outlay in time was small, by far the larger proportion being spent in selling rather than in growing. The selling was the part I liked least. A woman with a turn for business should easily make more than I did.

I found it pays to have the plants well-grown. If you are near a large town you may have to sell a little below regular prices. I don't expect early orders. People just naturally won't order early while plants are dormant. I allow the plants to remain in the ground until they are wanted. I lift and place them side by side in a shallow trench and rake earth over the roots. I mark each trench as to variety, color and name. It is then easy to take out the plants when wanted, and lifting retards growth, so that they are in a better condition for late planting.

I think that in every community there is room for at least one person to make considerable pocket money by getting ready plants that other people like and want, yet never raise for themselves, either from not knowing how to do it or from lack of time. It is surprising how many people will buy plants if they know they can get them when they want them.—M. Forrest, Victoria, B.C.

LABOR-SAVERS.

"What is the greatest labor-saver that you have in your home?" was asked at a home improvement meeting. Here are some answers: Using

and give your stomach a lift.

Provides "the bit of sweet" in beneficial form.

Helps to cleanse the teeth and keep them healthy.

The Gift Of The Gods

BY PEARL FOLEY.

(Copyright.)

CHAPTER V.—(Cont'd.)

The Chinaman seated himself where Culver had been, and repeated the same finger movements. This time the result was a slight click, and Culver's mystified gaze saw the top of the table fly back, disclosing what appeared to be the inside of a large jewel case. But instead of the delicate tints on which jewels usually rest, the inside of this was padded with black satin, and on its centre, in rather singular contrast, rested a box of green jade about five inches square. Tung Yung touched another spring and the square of glass protecting the box slid back like a panel, leaving just enough space for it to be lifted out. He then took from another drawer in the table a small glass jar with a perforated top, from which he dusted his hands with a fine yellow powder.

Culver, impatient at what he considered unnecessary ceremony, bent over the green box. He was about to reach out a finger to run over the smooth surface of this strange piece of antiquity, when a hoarse cry rang through the room and he was roughly brushed aside. He straightened up, looking at the Chinaman in surprise. Tung Yung was livid, and Culver noticed the hand which still grasped his arm trembled.

"You touch that box, you die!"

The man's shuddering tone made clear he was stating an undoubted fact rather than a threat, but Culver justly interpreted the latter.

"I see you prize the jewel box highly, Mr. Tung Yung," he replied lightly, "but I assure you my desire for it isn't out of legitimate proportions."

But the Oriental didn't smile. Instead, it was in awe and impressive tones he explained: "You not understand me, Dr. Culver—you would laugh at me. That jewel protector deadly. A man touch it and he die unceasingly. No, that not the word. You scare my English away. What I want to say is, he die for sure. It was meant to be that way. It thousands years old—and killed hundreds people."

Culver listened in amazement to the man's statement. The old weird, mystic influence of the East seemed all at once to fill the room, and his eyes rested on the piece of jade as though they were watching a sleeping reptile. "This box," continued Tung Yung, "once belonged to the Empress Woo Wang. My family its custodian for thousands years."

"Rather a disturbing article to have lying about. How do you hypnotize its deadly influence, Mr. Tung Yung, if I may ask?"

"This gold powder is the antidote. So long as I have this on my hands I can handle it as much as I please." As he spoke, the Chinaman lifted the case and turned it about for Culver's inspection. Suddenly both hands closed over the box and he leaned towards his interested spectator and whispered impressively in his ear: "What I just tell you, Dr. Culver, is great secret. Only possessors of the two sacred rubies must ever know. You soon to be custodian of my country's great relic, so I tell you, see?"

Tung Yung, apparently satisfied with Culver's murmur of appreciation, once again turned his attention to the box. Culver watched interestedly as the Chinaman touched a concealed spring, at which the top of the box flew back, disclosing softly thined green satin on which the dragon with a thousand eyes was embroidered in pure gold.

"It's a wonderful piece of work, Mr. Tung Yung," conceded Culver, "but in this case it is true that beauty is only skin deep. It is almost too gruesome a thing to live with."

"You not care to have it?" questioned the Oriental.

Culver shook his head. "Too deadly a weapon for the worst thief."

"Ah, you no understand. You take this box to China—news spread—robbers keep away from sacred ruby, see? They say thousand devils in this box. They scared—not one dare come near. But I see you not like, Dr. Culver." So saying, the Chinaman placed the green jade box back in its black and gold bed, wiped the gold dust from his hands and covered the weird weapon out of sight with the teakwood table top. "Maybe in China," he continued, "the foreign healer change his mind. Then come to Tung Yung, eh? Who know? All future dark mystery."

Culver looked in surprise at the serious face of the usually urbane dealer. Tung Yung's smile had slipped off. Standing there with his long, slim fingers groping nervously over the mysterious, centuries old heirloom, he seemed to embody all the dark superstitions and paganism of the East.

As Culver walked home from Tung Yung's store, the spell of China was still on him. He could no longer blind himself to the fact that the East was where the real years of his life, short as they were, had been lived. Resolutely he had kept his eyes on the road ahead. Fear of weakening had kept him from even glimpsing the past. But now, in spite of all his earnest striving, in spite of the fame that had crept on him unawares, he knew these years were but bracketed milestones. Destiny was bidding him close the bracket and beckoning him forward to continue the past before the period was put into his sentence of life.

Sixteen years before, with determined purpose, he and his wife had taken up new duties and aims in life. For society's sake they made their motto:

"Act—act in the living Present! Heart within, and God overhead!" Culver had plunged into the very heart of hospital work. His reputation grew, and surgical fame swept over him. Still he dared not pause. Instead of humanity reaching out its arms to him, the reverse happened.

He pleaded to be of greater use. Especially to little children was the genius of the man devoted. In time, work and acquired philosophy lightened the road with the soft if dim light of resignation.

At first Paul, an atom of the East, had been but small balm for the loss of his own child. He watched him grow and develop as a scientific experimenter might observe some new development in his laboratory. But the deep, staunch affection of the little Easterner, combined with unusual intelligence, made secret inroads into the hearts which had adopted him, and Culver and his wife discovered one day that they were bound to the boy with chains of iron.

They followed with personal pride his amazing progress through college, while his keen grasp of world problems sometimes made them hold their breath and wonder if he was not destined to hold up the torch for the Old World, the pagan world of China. But their creation of future ideals was clouded when in the Spring of 1915 this youth, who was destined for great things, stood before them and calmly announced that his place was on the soil of France, where he would do his infinitesimal part to stop the hordes of evil from engulfing the world.

Neither Neil Culver nor Irma murmured against his decision, but the mother hunger in Irma's eyes could not be concealed. As she looked at the slim, clear-eyed youth, and saw high resolve and duty to the death written on his face, terror of the inevitable gripped her, and turning bewildered to her husband she cried: "Neil, Neil, why does God covet our very best? It is cruel, cruel!"

For the next few weeks, artificiality, that human mask, hated above all things by the Culvers, reigned supreme in their household. Sometimes they even succeeded in deceiving each other with it. Paul's gaiety appeared so spontaneous, his Western wit so ready, that his foster-parents congratulated themselves that the anguish their souls were undergoing was known only to themselves.

Irma watched over the boy those last days as though he were her baby of three again. When Paul had voiced his resolve it seemed the second death knell to her hopes had been sounded. The uselessness, the inanity of trying to live to oneself came stronger upon her as she looked into the wide brown eyes, in whose depths glimmered the beacon light of already thousands of the world's youth, and the barrier of inevitable sacrifice stretched before her.

But the months passed and Paul's young-life had not been laid on the altar of sacrifice. Instead, the news had now come that he had gone smiling and with head erect into the very jaws of death, which had not closed on him—had covered the retreat and saved the lives of his comrades. France had invested him with her highest honor and Britain's King had pinned the Victoria Cross on his breast. China herself had thrilled at the news, while her old regime tossed its most precious heirloom at his feet—the sacred ruby of the East.

Irma began to hope again. Like the majority of frail humans, who believe their possessions have in some mysterious way the special guardianship of Providence, she let reasoning and philosophy slip away and placed her step daringly into the misty, uncertain future, forgetting that hollowness and disillusion lay under the soft white covering.

As Culver stepped into the hall, his wife's laugh floated out to him from the library. A smile passed over his face; laughter had been very rare of late. Upon entering the room, a tall form rose from the depths of an easy chair and advanced to meet him. His hands were taken in a vice-like grip and a familiar voice cried, "Here I am again, old chap, bobbing up after ten years of India."

Culver returned the grip, genuine welcome glowing on his face, as he exclaimed: "Just the way I thought you'd be cropping up, Chess Reynolds. Turning native for ten years and then walking in as casually as though you were our next-door neighbor!"

"Well, the fact is, Neil, where you are concerned I think I've overcome my abhorrence for the pen, but Sutherland, whom I ran across out there, told me you and Mrs. Culver had gone off on another globe jaunt."

"He was misinformed. We haven't put a foot off America soil for sixteen years, not promising the spell will last," he added, glancing at his wife. "Jupiter! how time flies, and youth too, but in the opposite direction."

(To be continued.)

Forest Research Imperative.

The farmer is already finding that agricultural research lies at the very foundation of the maintenance of soil fertility and crop production. This appreciation on the part of the farmers in Canada and the United States is forcing the employment of literally thousands of men trained in agricultural research. Much of our land is useful only for the production of timber. It is just as essential for our well-being, for our industrial and economic life that this land be organized and managed for enduring timber production as it is that our agricultural land be organized and managed for enduring agriculture.—Prof. J. W. Toumey.

Where Earth's Ways Are Laughter.

Oh, I am going back to bide where all earth's ways are laughter. Laughter of sunlight on the hills, of valley and of stream. Of cool green winds that fleet across the smiling meadows after The prometting butterflies that dart and soar and gleam.

Oh, I am going back to stray where all earth's ways are gladness. Gladness of little leaves that dance upon the maple bough. Of feathered folk whose melodies are never touched with sadness. Of ringing song that follows down the field behind the plow.

Oh, I am going back to be where all earth's ways are glowing. With happiness, where one keeps step with joy the whole day through. What wonder that my heart's a thrill with a high hope in knowing That I am going back to walk May's shining paths with you? —Elizabeth Scollard.

Transfer of the Seven Oaks Monument, Winnipeg.

The Lord Selkirk Association of Winnipeg has agreed to transfer the site and monument of the Seven Oaks memorial at Winnipeg to the Department of the Interior for historical memorial purposes. The site is about two miles from the city hall, Winnipeg, directly north, on Main street, and one mile south from Kildonan Park. The monument was erected in 1891 by the Manitoba Historical Society through the generosity of the Countess of Selkirk, on the site of the encounter at Seven Oaks in 1816 between the men of the Northwest Fur Company and the Selkirk settlers when Governor Robert Semple and twenty of his officers and men were killed. The Selkirk settlers came out from Scotland in 1812-14-15. They were not welcomed in the northwest by the hunter and the fur trader. The fur company persuaded about two-thirds of the colony to return to Eastern Canada and in order to prevent their return destroyed their houses and property. In the same year Lord Selkirk sent out a third party in charge of Governor Semple, who took possession of Fort Douglas. The settlers expected to find friends and welcome but found only a few huts and tents on the ashes of the homes that had been built for their predecessors and in the face of winter suffered great distress. They located at Pembina and built huts for the winter, hoping to make a home on the Red River in the following spring. Trouble, however, arose with the Northwest Company which ended in the unfortunate battle of Seven Oaks. In 1817 Lord Selkirk, with a company of disbanded soldiers, recaptured Fort Douglas and established his settlers on the Red River. This celebrated encounter led to the fusion of the two great rival fur companies.

The parish priest of a small village near the Pacific Coast of Mexico has a flock of pure-bred chickens that literally fell out of the skies. The hens were on their way from San Francisco to Lima, Peru. Off the Mexican coast a waterspout swept so close to the vessel that was carrying them that it sucked the chickens aloft, crate and all, and carried them to shore.

EDDY'S MATCHES

The leading hotels, clubs, restaurants, railroads and steamships use EDDY Matches, because of their efficiency and economy.

ALWAYS ASK FOR THESE BY NAME.

Only a Thought.

"Only a thought, but the work it wrought. Could never by pen or tongue be taught; But it ran through a Life, like a thread of gold, And the Life bore fruit one hundred-fold."

—Ella Wheeler Wilcox.

Who's Safe?

Old Mother Hubbard went to the cupboard To take just the tiniest awig; She heard a loud noise, Thought it only some boys— But found 'twas a raid by the League.

Minard's Liniment for Corns and Warts.

Use Even for Musical Doo.

A certain organist was so proud of his degree that he wrote "Mus. Doo," after his name on every possible occasion.

NEW DEVICE REDUCES SURVEY COST

Automatic Time Switches for Signal Lamps Successfully Introduced by Geodetic Survey of Canada.

The rate at which the natural resources of a new country are developed depends to no inconsiderable extent on the progress and accuracy of its surveys. Whatever be the business of the pioneer—lumbering, mining, ranching or farming—he always proceeds with greater confidence and energy when he feels that his property boundaries are accurate, and the fruits of his labor thus secure, than when this matter is in doubt. Canada has one of the finest systems of survey in the world and the officers charged with its operation are ever seeking to make the work more efficient and economical. Many new devices have been introduced with this end in view and the recent adoption of automatic time switches by the Geodetic Survey of Canada in connection with electric signal lamps used by triangulation parties has resulted in a substantial saving. Where this apparatus can be used efficiency is so increased that the number of employees on these parties may be reduced by from four to seven men.

Measurements Made at Night.

The angular measurements of the triangulation of the Geodetic Survey are made at night, as this practice proves more economical and accurate than making them in the day time. Instead of pointing on targets, as one may in daytime, it is necessary to point on lights, and various types of lights have been used from time to time. First railway signal oil lamps with condensing lenses were used; later, acetylene lamps, somewhat similar to the old-style automobile headlight but much larger—were found to be a great improvement. Each lamp is tended by at least one lightkeeper and in some districts by two, from 5 to 8 lamps being necessary for each party. As the triangulation lines are long—often being 40 to 100 miles—and as haze or fog often makes it impossible to see the lights described above at these distances, it has been the constant aim to increase the strength of the lamps, and hence increase the number of nights on which observations can be made.

In 1920 electric lamps were introduced. Automobile headlights were

specially mounted and proved much stronger and more economical, both in initial cost and in operation, than the acetylene lamps. Two sizes of special miniature bulbs are used (depending on the length of line), while current is provided either by dry cells or storage batteries. The old-style acetylene lamp has also been adapted to use electric bulbs, and this change has greatly increased its efficiency.

Saving in Operation.

The latest improvements to the electric lamp makes possible an important saving in operation. A time switch is placed in the circuit and, when the lamp has been properly lined, the clock wound and the "on" and "off" dials set, the switch will automatically turn the light on and off at pre-arranged hours. In this way several lightkeepers may be dispensed with, only one lightkeeper with a light motor truck being attached to the party to move the lights when necessary and to wind the clocks once a week.

During the season of 1922 this equipment was used by a triangulation party working along the 49th parallel in Saskatchewan. It has been found that a saving of approximately \$20 per day was achieved during the season. The coming season's operations in this vicinity will show further saving as the time switches are as good as new; moreover, a lighter and more economical truck will be feasible.

It is to be noted that this equipment will, in general, be found feasible only where transportation is easy and the triangulation stations comparatively close together. Its use would be limited on the mountains of the British Columbia coast, for example, on account of the time which would be lost moving all the lamps, but even in such cases a saving is possible by employing only a minimum number of lightkeepers and using the automatic switches where more men would be needed occasionally.

Several other operations of the Geodetic Survey with which this equipment can be economically used are anticipated, and it is felt that a large step forward has been made in the economical handling of triangulation operations.

—AND THE WORST IS YET TO COME

UNLOCKING SECRETS OF ELUSIVE COMPASS

VAST FIELD FOR SCIENTIFIC RESEARCH.

Canadian Engineers Work to Get the Most from Vagaries of This Instrument.

It is unnecessary to point out the part the magnetic compass plays in the development of a new country, especially a country of such great distances as Canada. Contrary to general belief, the compass needle does not point directly north, but more or less to the east or west in different parts and is forever wavering and forever changing in its direction, though ever so slightly, with the passage of time. To-day it may point in one direction; ten years hence at the same place its direction will undoubtedly be different. The greatest measure of usefulness, as a direction-finding medium, is obtained from it by a careful examination and compilation of magnetic observations. These are studied by magnetic experts in practically every country of the world; expeditions are sent every where for this purpose. The seven seas have been traversed by non-magnetic ships that have amassed untold information with regard to the vagaries of the compass on the oceans.

In Canada, it has for the last forty years been studied by Dominion Land Surveyors in the employ of the Topographical Branch, working in the territory stretching from the Pacific ocean to Hudson bay, from the International boundary north, a territory comprising prairies, forests, mountains, wildernesses, and barrens. With every facility for taking observations upon the magnetic needle during the regular course of their work, the surveyors have studied it on all sides and sent it to the head office at Ottawa the results of their observations, until now over 20,000 observations have been taken. Charts showing the variation of the compass in Western Canada and other magnetic information are available upon request.

Secrets of Magnetic Needle.

But the magnetic needle still has secrets in spite of all that has been done. Elusive earth currents and stubborn static still claim the right of highway to hold up the telegraph, the wireless, and the radio. We know that they are related in some sort of way with the dancing northern lights, with the magnetic storms that twist and slake the magnetic needle, and with the black cyclonic sun-spots that try to rob us of our light and heat. But beyond this we know very little and here a vast field is opened for scientific research, once the vagaries of the magnetic needle are fully understood.

tific research, once the vagaries of the magnetic needle are fully understood.

Romance of the Rug.

The Turks and Persians are the most celebrated rug-makers in the world, and many wonderful specimens also come from India.

Formerly Persians and Turks were nomads, and they first used the rugs they made to hang over the openings of their tents. Also they were used much as we use chairs. Mohammedans have special prayer rugs, and rugs are also used at funerals.

In parts of Turkey and Persia rug-making is still carried on in a very primitive way with a loom made by driving two poles into the ground parallel to each other, the distance between the two determined the width of the rug. Each family has its own design, and the weaving is done by many hands.

Oriental makers use a knife, a pair of scissors, and a comb-like instrument to bathe down the pile. "Tying" is done with the same primitive cleverness of native fingers at our own time as it was in olden days, with the village women sitting astride simple looms stretched between pegs in the ground.

The dyeing of the wool is considered a fine art and the tribal dyer is regarded as a person of great importance.

The most famous rug in the world, worth about £50,000, is in the South Kensington Museum. It is known as the Ardabil rug, as it was made in a little town of that name. This wonderful carpet measures 34ft. by 17ft. and contains thirty million knots. It took sixteen years to make.

Rugs made with the Turkish knot the yarn is tied in such a way that the two ends which make the pile of the rug alternate, necessitating a somewhat long pile in order that they may overlap and cover the warp threads.

In Persian rugs the knot is tied so that between every strand of the warp a strand of yarn intrudes.

Water Clocks.

The Egyptian Government's gift to the Science Museum at South Kensington of casts of two ancient Egyptian water clocks, one of which is 3,000 years old, recalls an old water clock still in use in Canton.

This was first erected about A.D. 1324. It has a history full of incident, and though it has been destroyed many times during invasions from without and riots from within the city, it has always been restored. To-day, in spite of the advances made in mechanical methods of measuring time, the old clock is still put to practical use.

At intervals during the day the (more or less) correct time is exhibited on a board outside the building which houses it, and the native Cantonese are quite content to pin their fate to this unique servant of old Father Time.

WHERE THE DUKE AND DUCHESS OF YORK SPENT THEIR HONEYMOON

The lovely Surrey home of Hon. Mrs. Richard Greville, where the Royal bridal pair spent their honeymoon. It is Poleston Place, near Dorking. It is rumored that Mrs. Greville, who is an intimate friend of the Queen, is to make the Duke of York heir to a considerable part of her very great fortune.

Changing the Earth's Face

Some remarkable figures are given by Dr. R. L. Sherlock in "The Geographical Journal" as to human agency in altering the face of the earth. Many years ago Sir Archibald Geikie calculated that erosion by the elements was denuding the surface of the British Isles at the rate of 2.72 inches in 2,000 years. Such reduction in the height of the land and consequent shallowing of the seas is of vast importance in time as reckoned by geologists, but is unlikely to disturb human beings who plan their future in decades. Dr. Sherlock states that the quantity of rock removed by man in various kinds of excavation in Great Britain is about 40,000 million cubic yards, of which approximately half has been taken out at the surface and half mined.

By far the greater part of this gnawing of the earth's crust has taken place in the last century, and it spread over the whole area uniformly would equal a denudation of nearly 4 inches. In other words, human agency in modern times is at least five times as active in denudation as all natural agencies combined. The effects, however, are far from evenly distributed, and where they are concentrated they are producing rapid and sometimes serious local changes.

Where the excavation is subterranean it may produce subsidence on a large scale. In the Black Country of Staffordshire over 230,000,000 cubic yards of waste have been dumped on an area of twenty-two square miles—that is to say, a mass larger than was excavated from the Panama Canal. But

the ground level has been lowered because the subsidence due to excavation has more than overbalanced the superficial deposition of refuse. In other cases the refuse rises in gigantic mountains of slag and ashes, comparable in size and appearance with volcanic cones, or has been used to retrieve land from the sea, as in Liverpool, where what was formerly St. George's Dock is now built over.

Still more curious is the case of cities which are gradually rising on their own waste, the average elevation in London being a foot in the century. But there are local variations, and when sewers were being taken across the city Walbrook was found to stand on thirty feet of the debris of centuries. The changes produced in the natural circulation of water are even more striking. Pumping out the brine in the salt areas of Cheshire is causing local disturbances, but is also sinking large areas below the level of the sea, and near Middlebrough, in Yorkshire, the danger point is being reached. Over the country generally rivers have been diverted or deepened, marshes and lakes drained, or floods produced which are turning dry soil into marsh-land.

It is well that there should be competent geographers and geologists able to note and record the results of the fretting activities of man, for at present, although these are subject to various kinds of localized legal and executive control, there is no authority to guard the general interests affected by local changes.

About Tapioca.

How the Indians of Brazil manufacture the starchy, jelly-like globules called tapioca is described by Mr. Charles W. Mead in "Natural History."

The Indian woman takes a large piece of bitter cassava root in both hands and rubs it on a board studded with hundreds of sharp pebbles until the root is reduced to pulp. When she has grated a sufficient quantity she presses as much water out of it as possible.

For that purpose she uses as a press a long, narrow tube of basketwork called a tipiti, with a loop at either end. She forces the pulp into the press, which she then hangs up by one of the loops.

Through the lower loop she inserts a long, stout pole, which she runs under some convenient object, which serves as a fulcrum. Then she sits on the free end of the pole, and her weight stretches the press and forces the liquid through the interstices of the basketwork.

The liquid is caught in a pottery vessel and is made into cassareep, the favorite condiment of the South American Indian. The wet mass is taken from the press and spread on a large flat dish of pottery with a raised rim, while under the dish a fire is built. If stirred rapidly, the preparation will not cake into large masses, but will agglomerate into small, irregular pellets, which are the tapioca of commerce.

Nothing Left to Heaven.

Skipper Noah—"We're approaching land, Mr. Monk. Have you heaved the lead?"

Mr. Monk (the Mate)—"I guess so. During the storm last night I heaved everything I had."

World's Smallest Book.

What is believed to be the smallest book in the world is preserved in an out-of-the-way corner of the British Museum.

This miniature volume is not so wide as a man's thumb; but despite its microscopic dimensions it is beautifully finished, and is a wonderful specimen of the printer's art.

It consists of the 100 pages of extremely thin paper, and the engravings, highly creditable pieces of work, are printed in colors.

The exact size of the book, taking the measurement of the outside covers, is 1/4 in. by 1/4 in. It bears the date 1839, and is therefore eighty-four years old. The title of this curiosity is "Schlorr's English Bija Almanac."

Ships Have Style in Names.

The big steamship companies usually favor a particular style of name, for their vessels, or else a particular ending. The White Star Line, for instance, always chooses names ending with "ic"—the Celtic, the Majestic, etc. The Cunard line is equally faithful to the termination "ic," and gives us the Mauretania, Lusitania, Carmania, and so on.

The ancient Egyptians made coffins of cork.

Success is usually due to holding on, and failure to letting go.

It is estimated that nearly 70,000,000 wild animals are killed yearly for the sake of their fur.

A Convert to Christianity.

The greatest convert of the age is Giovanni Japini, an Italian who a few years ago wrote, "The Memoirs of God," which were declared to be the last word in blasphemy. Since then he has been converted and has written a "Life of Christ" which is now hailed by churchmen as one of the greatest of its kind ever written.

Telling Fortunes by Tea-Leaves.

Telling fortunes by means of tea-leaves is a polite form of sorcery with which we are all familiar.

Having drunk your tea, turn the cup upside-down in the saucer and whirl it around three times. Turn the cup again and examine the leaf fragments clinging to the bottom and sides. There, say the superstitious, lies your future!

In this magic rite we have a combination of two ancient systems of divination, hydromancy and ceromancy.

Hydromancy was practiced in ancient Egypt. A bowl or cup was filled with water and a boy gazed into it until he became hypnotized and "saw things." The strolling magicians of North Africa perform the same trick to-day by means of a drop of ink in a boy's hand. When Joseph sent his messengers to find his silver cup in Benjamin's sack, he instructed them to say: "Is not this my lord's cup in which my lord drinketh and wherein he divineth?" Hence the mystic qualities of the cup.

Ceromancy consisted of dropping melted wax into water and divining by the forms the wax assumed in cooling. It is a very old art, but tea was only introduced into Europe in the seventeenth century; yet the primitive mind still subsisting in man at once seized upon the tea-ground as a means of foretelling the future, as that same mind had seized upon the melted wax thousands of years before.

World's Time Clock for Radio Purposes.

At the immense new central transmitting station in Berlin, it was imperative that the sending operators should know the exact time. In any other part of the world at a given moment. Some form of clock was found necessary, that would indicate day and night, and simultaneously indicate the time at all other important radio stations throughout the world. A map of the world was therefore placed on a circular glass dial, on the outer edge of which two 12-hour scales were graduated at 5-minute intervals. This dial, being darkened around half the edge, to indicate where it is night, is moved around by clockwork. Arrows extend from the stations on the map to the edge, indicating the approximate times at any given moment. The device, moving across the shaded area, eliminates need for calculation by the operator.

Courage is a virtue which the young cannot spare; to lose it is to grow old before one's time.

Language of the Sea.

It might be thought that the word *admiral* is a typical English expression. Its origin, however, is Emir el Bagh, which is Arabic for "Lord of the sea." The term *captain* comes to us direct from the Latin *caput*, meaning head.

The *coxswain* was originally the man who pulled the after-oar of the captain's boat, then known as the "cock's boat." Cock-boat itself is a corruption of the word *coracle*, a small round boat used for fishing. *Commodore* is nothing more than the Italian *Comandatore*, or commander.

Frequently we hear about "Davy Jones." There was, of course, no such person, but should you speak of "Duffy Jones's Locker," you have the original phrase. Duffy is the West Indian Negro term for the spirit of Jonah.

The term "dog watch" is a corruption of "dodge" water, the "dodge" being an arrangement to prevent men from being on duty every day at the same hours.

The starboard side of a ship was at one time the steer-board side, in memory of the Anglo-Saxons who used to steer their boats by putting out an oar on the right-hand side of the stern. The larboard (now known as the port side) is a corruption of lower board, which was always considered inferior to the starboard.

The golf links at Banff, in Banff National park, Alberta, have an altitude of 4,500 feet. They are owned and operated by the Government and are situated at the foot of Mt. Rundle (966 feet) just below the junction of the Bow and Spray rivers, amid surroundings of unusual beauty.

Examining Power Possibilities in Canada

Few realize the background of scientific research, engineering study, and survey work which must precede and prepare for orderly, timely, and progressive development of an important Canadian water-power river. The Winnipeg River, for instance, which is destined to furnish half a million continuous horsepower for use in the Kenora-Winnipeg district, has been proven by engineering investigations of the Department of the Interior to be one of the most remarkable power rivers on the North American continent. The St. Lawrence river alone rivals it as a naturally well regulated stream. Its maximum recorded flow is but six times its minimum flow, and in any one year the ratio between highest and lowest flow is very much less. The river traverses but 100 miles between the Manitoba boundary and Lake Winnipeg, and in this short distance there are nine feasible power sites varying in capacity and attractiveness, but all certain to be developed within the short space of twenty-five years.

Realizing the exceeding importance of power in a portion of Canada where fuel is scarce and expensive, the Department of the Interior is, through its various branches, taking every precaution to make certain that the power resources of the Winnipeg River will

be available for the upbuilding of the West, as soon as required and without further handicaps or delays.

By topographical surveys, scientific research, engineering studies, hydro-metric investigations, precise leveling, land reservations, and cordial co-operation between administrative officers and operating municipalities or corporations, the Department of the Interior has laid a firm foundation for progressive development to meet the power needs of the large territory tributary to the Winnipeg River, including the cities of Winnipeg, Brandon, and Portage la Prairie. Three of the Winnipeg River sites, with a total ultimate capacity of 300,000 continuous horsepower, justifying a commercial installation of 300,000 horsepower, have already been developed; one by the city of Winnipeg and two by the Winnipeg Electric Railway Company. Plans are even now being prepared for not only a fourth, but fifth additional development. If the steady increase in the Winnipeg River power load that has been experienced in the past ten years is continued—and it appears certain that it will be—the entire nine power sites must be completely developed before the year 1950. By that time there will be over half a million continuous dependable 24-hour Winnipeg River power developed and in use.

PROVINCIAL BANK

OF CANADA

Capital Authorized: \$5,000,000.00
Capital paid up: \$3,000,000.00
Reserve Fund and Accumulated Profits: \$1,525,000.00

It is the aim of this Bank to give courteous as well as efficient service in connection with all business entrusted to its care. The most careful attention is given to all enquiries.

You can procure a Safety Deposit Box in which to store your valuable and important papers, it offers you security at little cost.

John McFaul & Son, Lachute.

PUBLIC NOTICE is hereby given that the undermentioned LANDS and TENEMENTS have been seized, and will be sold at the respective times and places mentioned below.

FIERY FACIAS DE TERRIS. Magistrate's Court, District of Terrebonne.

CANADA
Province of Quebec,
VICTOR BERGERON, plaintiff, vs
DAME MATHIE DUPOIS, defendant.

No. 106.

As belonging to the said defendant, the following immovable, to wit:

An emplacement situated in the parish of Saint-Adolphe d Howard, containing 50 feet in width by (100) feet in depth, English measure, and more or less, as presently fenced in and bounded as follows: in front to the north by the public road, in rear by Zanon Pigeon, to the west by the surplus part of the said lot of land belonging to the vendor, to the east by the lot of land belonging to A. D. Fournier, known and designated as forming part of the lot of land bearing the number one-A of the six range of Howard, county of Argenteuil, with the buildings thereon erected.

To be sold at the door of the Catholic church of the parish of Saint-Adolphe d Howard, the TWENTY FIRST day of JUNE, one thousand nine hundred and twenty three, at TEN o'clock in the forenoon.

Sheriff's Office, J. W. CYR, Sheriff.

PUBLIC NOTICE is hereby given that the undermentioned LANDS and TENEMENTS have been seized, and will be sold at the respective times and places mentioned below.

FIERY FACIAS DE BONIS ET DE TERRIS.

CANADA
PROVINCE OF QUEBEC
DISTRICT OF TERREBONNE

PIERRE DESORMEAUX, plaintiff, against EUGENE ETHIER, defendant.

No. 57.

As belonging to the said defendant, the following immovable, to wit:

A lot of land situated in the town of Saint-Jerome, county and district of Terrebonne, designated on the official plan and book of reference of the said town of Saint-Jerome, under the number nineteen, of the official subdivision of the original number forty nine (lot 19-49) with the house thereon erected.

To be sold at the door of the Catholic church, in the town of Saint-Jerome.

Here and There

Saskatchewan's crop cost \$187,000,000 to produce last year. The proceeds amounted to \$287,000,000.

During the month of April and the first two weeks of May 300 claims were registered in the counties of Temiskaming and Abitibi, the gold field of the province of Quebec.

"Twenty marriage engagements are among the results of a round-the-world voyage of a C.P.R. liner," Mr. Beatty has a lot to answer for. —Ottawa Journal.

With a population which is over 70 per cent. rural Saskatchewan has a larger automobile registration than any other province. One in every 15 people owns a car.

One of the largest fish caught in the history of Lake Timagami was recently caught by E. B. Hamlin who, with a small bass hook and light steel rod landed a salmon trout weighing 24 pounds and measuring three feet in length.

In 1920 there were cut in Canada 4,024,826 cords of pulpwood. This would, if piled four feet high and four feet wide, reach in a continuous line over 6,000 miles, or the distance from Vancouver to Halifax, and out over the Atlantic to Queens-town, Ireland.

Trees to the number of 10,000 were distributed among Saskatoon school children by the Parks Officials and Dominion Forestry Branch on the occasion of Arbor Day. Each child received one maple and one ash. Last year only 5,000 trees were distributed.

The Empress of France, of the Canadian Pacific fleet, now on the trans-Atlantic service between Hamburg, Southampton and Cherbourg to Quebec, holds the record for the fastest journey between Quebec and Liverpool, having crossed in 5 days, 23 hours and 38 minutes, just two hours less than the Empress of Britain.

General Sir Arthur Currie will unveil a memorial cairn at Sault Ste. Marie to Etienne Brule and his companion Grenon, the couriers de bois, who found the Sault and discovered Lake Superior in 1622. The unveiling will take place August 7th during Discovery Week, when the Ojibways will produce "Hiawatha" on two afternoons.

Notwithstanding that there will be an increase this year in Canadian Pacific steamship traffic on the St. Lawrence, with 17 more sailings than in 1922, Canadian Pacific officials report that ships are being well booked and that according to present indications the 1923 season will show improvement in ocean trade from both Montreal and Quebec.

Whales are reported early and plentiful this season and despatches from Victoria state that conditions surrounding the inauguration of the deep-sea hunt this year are the most promising in more than a decade. The demand for canned whale meat has become so pronounced that the prospective pack of the Victorian whalers is already disposed of. England will be the distributing market for canned whale meat this year.

A replica of an old time Hudson's Bay fort, such as once was the nucleus of the western posts of the great company, and which still exist in the far north, will be erected at the Calgary Exhibition grounds, July 9 to 14, as a part of the big Stampede feature. Special arrangements are also being made to provide a commodious camping ground for the Old Timers who will attend with the old-fashioned chuck wagons and cowboy equipment.

Running on schedule the Canadian Pacific Steamship's liner "Empress of Canada," Captain A. J. Hailey, again demonstrated her right to the claim of "Queen of the Pacific." The Canadian vessel left Vancouver twenty-four hours behind the American liner "President McKinley" bound for Yokohama recently. The "Empress of Canada" docked about 3 A.M., and the "President McKinley" arrived at 8 A.M.

Mr. A. Lamarche wishes to inform the public that he is agent for the Canada Cement Co., and any persons wanting cement will do well to call up A. Lamarche, St. Philippe, or Telephone 166 r 1-3. A car load just in.

ST. ANDREW EAST.

The Literary Club will meet on Tuesday next, June 19th, at the home of Miss Davis.

Mr. and Mrs. Watt, of Montreal, were the week-end guests of Mrs. Geo. Jeffrey.

Among the visitors to the city this week were Mr. Fred Robertson, Mrs. Dorion and Rev. J. Burgess.

Mr. and Mrs. R. W. Burgess, of Montreal, were the week-end guests of Mr. and the Misses Walsh.

Since sympathy is extended to the relatives and friends of the late Mrs. Castonguay in their sad bereavement.

Mr. W. J. Pollock and Mr. Leonard Pollock, of Mille Isles, were week-end visitors and guests of Mrs. Holt, of Carillon.

A very enthusiastic meeting of the Women's Missionary Society was held on Tuesday at the home of Miss Davis.

Miss Ethel Bradley has returned home from Mille Isles where with Mrs. Holt she spent a week as the guest of Mr. and Mrs. W. J. Pollock.

Miss Mary Elizabeth Rodger and Miss Bernice Helms Rodger have returned home, having successfully graduated with Model diplomas.

A meeting of the Ladies Aid was held at the home of Mrs. Edward McGregor on Thursday, at which the ladies got through a lot of work.

The friends of Mrs. Percy Funchen will be glad to learn that she is progressing most favorably, and is now looking forward to being discharged from the hospital at an early date.

Public Worship will be held in the Presbyterian Church on Sunday, June 17th, at 11 a.m. and 7.30 p.m. (standard time.) Sunday School 10 to 11 a.m. in the Church. The pastor Rev. J. Burgess will preach at both services.

Saxon Aubrey - 2759-65272 is a beautiful bay six year old Standard-bred stallion weighing about 1100 lbs. He is sired by Captain Aubrey 1274-48050 by Peter the Great 28955.

Perishing (11619) 150817 is a black five year old Percheron, weighing 2160 lbs. He is the real draft type and the kind that will sire market toppers.

Brunej-3291-11596 is a black four and a half year old Belgian, weighing 2000 lbs. This is an excellent show horse and for quality of field legs and real show action he is hard to excel.

Mastoc (11622) 171880 is a grey two year old and weighs 1600 lbs. This is very promising show colt that we are offering for light service only. All these horses are Gov't. inspected and have No. 1 Highly recommended certificates.

TERMS:—\$12.00 and \$15.00 to insure a foal payable March 1st. All mares at owner's risk.

J. E. ARNOLD, GRENVILLE.

Creamery Butter For Sale.

For Good Pasturized Creamery Butter. Apply to Wilfrid Desforges, St. Philippe, P.O. Box 21, Quebec.

PROPERTY FOR SALE.—Good 6 room frame house, well, stable. Frontage 318 ft., depth 67 1/2 ft., on Dalesville Road. Cash \$3,500. Write to Neil McQuaig, Box 122, Brownsburg, Quebec.

WANTED.—To rent for the summer, camp at Lake Louise, address Louis Fitch, P. O. Box 884, Montreal.

NOTICE.—Kindly bear in mind that in future all pay notices, births, deaths, memorials, etc., must be accompanied by cost of insertion or same will not be published.

LATHS.—Just received a carload of wood laths, good quality. Reasonable prices for any quantity.

Mrs. J. Cottingham, Phone 29, Lachute, Que.

WANTED AT ONCE.—A canoe in good condition. Apply to Watchman Office.

FOR SALE.—A Square Piano. Apply to Mrs. Mackie, East Ward.

FOR SALE.—Used Ford car in good running order for sale cheap. Apply to Camille C. Lette, at Phillips Mason's, Lachute.

FOR SALE.—A light runabout buggy, rubber tires, made by McLaughlin, used very little. Apply to Dr. Higginson, Hawkesbury, Ont.

TEACHER WANTED.—For the St. Canute, Protestant School. Apply to Garrison MacAdam, L.R. No. 3, Lachute, Quebec.

Stock Farm For Sale.

Ideal stock farm with good sugar bush and wood lot, large farm house and farm buildings; 135 acres under cultivation, 45 acres in bush. Situated on bank of the North river 4 miles from Lachute and 2 1/2 miles from St. Andrews East. Daily School Bus to St. Andrews Model School, also Rural Telephone Line and Rural Mail Route. Easy price and terms to responsible man. Apply to McOleach, Lachute. R. R. 2, Que.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

LOCAL NEWS.

+++

Mrs. J. C. McRae spent last week
visiting friends in Ottawa.

Mr. J. Graham, of Ottawa, spent
a few days in town this week.

Miss Nellie Hill is spending a few
days in Montreal this week.

Miss Lucina Garrettsen is visiting
with friends in town this week.

Mrs. Fred Gann, of Dunany, is in
the Hospital. We all hope for a speedy
recovery.

Mr. Oscar Charbonneau, of Hull,
was the recent guest of Miss O.
Paquette.

Mr. MacChisole and Mr. Willie
Dewar, of Lost River, spent Monday
in town.

Mr. James Wallace, of Montreal,
is the guest of Mr. W. P. Cruise
this week.

Mrs. Chas. McPhail, of Fessett, and
Mrs. A. McFaul spent the week-end
in Montreal.

Messrs. Scofield and Hamilton, of
Montreal are spending a few days in
town this week.

Miss Carrie Davis of Morin Heights
is the guest of her cousin Mrs. Wm.
Deacon this week.

Master Harry Lister spent last
week with his grandmother, Mrs. Ed.
Hodge in Thomas' Gore.

Mr. Duncan, of Montreal, was the
guest of Mr. and Mrs. Foreman the
early part of this week.

Mr. and Mrs. C. J. Stanforth, and
family, of Arundel, spent Sunday the
guest of Mrs. Jno. Hope.

Miss Cameron Hay of Montreal
spent the week-end the guest of her
parents Mr. and Mrs. Geo. Hay.

Miss Allison Cottingham and Miss
Field of Montreal spent the week-end
the guests of Mrs. J. Cottingham.

Mr. Herbert Bruneau, of New Bed-
ford, and Mr. Gerald Bruneau were
guests of their sister Mrs. E. Jousse.

Mr. and Mrs. S. Goldworthy and
two daughters are leaving on Sat-
urday to spend a month at Lac Mar-
ois.

Mr. H. Moore Jr., of Montreal,
returned home on Friday, after a
fortnight's visit with friends at Clear
Lake.

The many friends of Mr. Philias
Rodrigue will be sorry to learn that
he is confined to the house through a
severe illness.

Messrs. Louis Roger, Lions, and
Jules Lafleur who have been study-
ing in Montreal, are now in town
spending their vacation.

Mr. and Mrs. Edmund Hodge spent
Wednesday in Montreal attending the
wedding of their niece Miss Leonie
Jones to Mr. Russel Sylvia.

Bargains in Millinery! Hats re-
duced to half price. Children's hats
from 65 cts. up. Come and get a
bargain. Miss Hampton, Lachute.

Mr. and Mrs. Jones, Miss Isabel
Kearns, Miss Peebles, and Mr. P.
Kearns Jr., of Montreal, were guests
of Mr. and Mrs. H. Kearns on Sunday
last.

We are glad to hear that Mrs.
Carlin, of Thomas' Gore, who went
under a very serious operation in the
hospital in Montreal, is improving in
health.

Mrs. Thos. Robertson, of Ottawa,
and Mrs. Frank Shaw, of Lachute,
spent a few days last week as guests
of their sister Mrs. Thos. Lister of
The Seigneurie.

Messrs. Henry and Louis Rodrigue,
of Montreal, have returned home to
spend their summer vacation with
their parents Mr. and Mrs. A. Rod-
rigue.

The members of the Independent
Order of Oddfellows will hold their
annual Decoration Day Service on
Sunday next, June 24th, at 2.30 p.m.
Advance time.

Mr. and Mrs. Henry Lister and son
of Lachute, and Mr. Alex. Hodge, of
Grenville, spent the week-end guests
of their parents Mr. and Mrs. Ed.
Hodge, Thomas' Gore.

Guests of Mr. and Mrs. Ernest
Ward on Sunday were Mr. and Mrs.
Chas. Kirkpatrick and two children
of Mille Isle, Mrs. Sylvia, of Kil-
kenny, and Mr. and Mrs. H. Lister and
son of Lachute.

The Rev. Mr. Waddell, left on Mon-
day last, after having spent two weeks
renewing old acquaintances in town
and vicinity. 'Tis some 22 years since
Mr. Waddell left Lachute and he
was agreeably surprised at the im-
provements and growth of our little
town. During his stay here he was
the guest of Mr. J. W. McQuat and
Mrs. R. McArthur.

Mrs. Moore returned to Montreal
on Friday last, for the purpose of
attending the first convention of the
Grand Chapter, of the Province of
Quebec, order of the Eastern Star,
of which she is Grand Chaplain. The
meeting is being held on June 28th,
and 29th.

Mr. Smith Henderson, of Montreal,
is spending the summer in town.

Mrs. Sherritt, of Lakefield, is the
guest of Mrs. H. Scott this week.

Miss E. Beers of Montreal spent
the week-end the guest of her par-
ents.

Nurse Sampson of Montreal spent
the week-end the guest of Mrs. G.
F. Calder.

Mr. Ben. E. Rogers, of the Molson's
Bank Staff, has been transferred to
Chesterville, Ont.

Mr. Geo. McCoy, of Montreal, is
spending a two weeks vacation with
his parents in town.

Miss J. Ada Fisher of Montreal is
spending her vacation here, the guest
of Mrs. Wm. Belanger.

Mr. and Mrs. H. W. Holthamby
have returned to Montreal after a
two weeks visit at Lakefield.

Mrs. Keir and daughter Lillian, of
Toledo, Ohio, are visiting with friends
in Upper Lachute and Brownsburg.

Mr. and Mrs. Robert Stevens, of
Dundee, spent the week-end with
friends and relatives at Beech Ridge.

Mr. and Mrs. J. S. Giles are spend-
ing this week in Halifax, attending
the Annual Meeting of the Canadian
Press.

Mr. and Mrs. B. J. Moore and two
children, of Montreal, were the week-
end guests of Mr. and Mrs. Thos.
Moore.

Mr. and Mrs. Jas. Drysdale and
two children, of Winnipeg, are spend-
ing a few weeks as guests of Mrs.
H. Drysdale.

Miss Jessie Dobbie, of Montreal,
and Miss Grace Dobbie, of the Gen-
eral Hospital, also Mr. Frank Cooke,
of Hawkesbury, were the week-end
guests of Mrs. P. Dobbie.

Keep date of July 10th, open for
the Ladies of the Methodist Church,
Brownsburg, who purpose holding
their lawn social on the Upper School
Grounds.

Congratulations are due Mr. Her-
bert Bruneau, who has completed his
third year at College, in being first
in his class and in winning a medal.

Messrs. Jos. McDermott, of Lachute,
Holland, of Avoca, and Saund-
ers, of Grenville are attending the
Ottawa Association.

Mr. and Mrs. Jno. Hay spent the
early part of this week in Montreal.

Miss K. Patterson has returned
home from Shawbridge to spend the
summer vacation.

Mrs. W. de la Duranlaye and Mrs.
E. Laverdure, of Montreal, are visit-
ing Mrs. G. B. Robinson at Sars-
bury.

A very pleasant week-end was
spent at the home of Mr. Jos. Lavi-
gne, when Mr. and Mrs. F. Lavigne,
of Lachute, and Mr. and Mrs. Charles
Lavigne, of Moose Creek, whose wed-
ding took place recently, were en-
tertained. There were some 30 re-
latives and friends present and a
most enjoyable time had by all.

CHEAP MILLINERY.
Miss A. Lavigne wishes to announce
that having sold out her business,
she is giving some splendid bargains
in Spring, Summer, Fall and Win-
ter Hats. Don't miss this opportu-
nity of getting a real good hat at
a very low price.

CHURCH NOTES.

Services in the Presbyterian Church
Lachute will be conducted as usual
on Sunday next, by the Rev. Mr.
McKinnon. In the morning he will
speak on the recent Assembly Meet-
ing at Port Arthur.

Methodist Church Services for Sun-
day next, are as follows.—Lachute
at 10.30 a.m., and 7 p.m. East Settle-
ment at 3 p.m., Brownsburg at 7 p.m.
All services, with the exception of
that in Brownsburg will be conduct-
ed on Standard Time.

Services in the Baptist Church Lachute
on Sunday, June 24th, will be
at 11 a.m. (subject "Walking in the
Spirit"), and 7.30 p.m. (subject "Mo-
dern Esau"), conducted by Pastor
Jos. McDermott. Bible School at 9.45
a.m. All Daylight Saving time.

Pastor Jos. McDermott was in Ot-
tawa this week, representing the La-
chute Baptist Church at the gather-
ing of the Ottawa Association of Bat-
tist Churches.

BIRTHS.

DEACON.—At Lachute, on Thursday,
June 21st, 1923, to Mr. and Mrs.
Wm. Deacon, a daughter.

CRESWELL.—At Brownsburg, Que.,
on Sunday, June 19th, to Mr. and
Mrs. George W. Creswell, a son.
(Willard Morrison.)

DEATH.

BARRON.—At Lachute, Que., on Sun-
day, June 17th, 1823, Grace Jane
Henry, widow of the late Thomas
Barron, in her 80th year.

HELPING THE HELP PROBLEM.

Do you realize the great time-saving value of the motor-truck? A team of horses with an average load can hardly make more than five or six miles an hour on a fairly good road. Against this, the motor-truck will easily carry a larger load at a rate of from twelve to twenty miles an hour under similar conditions. Suppose, then, that a farmer has to haul milk to the railroad every morning, say a distance of twelve miles. If he uses a horse and wagon the trip will take him practically half a working day, and the services of the man who drives the team are lost during that long period. Besides, both man and horses may be badly needed for other work.

On the other hand, a motor-truck will make the round trip in a little over an hour, or two hours at the most, releasing both truck and driver for other duties.

But this saving of time, due to the increased speed of the motor-truck, has other advantages. It opens up new markets and enables the farmer at a distance, who owns a truck, to compete with the man who is nearer a particular market, for a horse can hardly haul a load more than twelve to fifteen miles and return the same day, whereas a motor-truck can easily do fifty miles during the same period. Besides, it costs more to haul farm products to shipping points by team and wagon than it does by motor-truck.

EXTRA POWER WHEN NEEDED.

An interesting example of the value of the motor-truck in an emergency came up on a farm near Yellow Springs. Two men loaded the truck with alfalfa as high as they could pitch. The load was two and a half tons. Hardly had the truck started for the road when it came upon a wagon-load of one and a half tons of alfalfa. The load had become mired in a soft spot, and the most strenuous efforts failed to extricate it. Finally the animals were unhitched and the wagon load of alfalfa was hitched behind the truck. The motor-truck, which had plenty of power, not only pulled the mired wagon out of the mud, but with the extra load in addition to its own, crossed the field and went on to the barn, nearly a mile away.

A motor-truck is intended, of course, for hauling. In an emergency, though, it can do other jobs. A farmer had sixty-six acres of wheat which had been badly tangled by storms. There was a shortage of horses, but the wheat had to be harvested. The temperature stood at 110 deg. F., making it impossible for even the few horses available to work more than an hour or two at a time.

However, a two-ton truck was hitched to a nine-foot binder and the wheat was cut in short order and without difficulty.

Similarly, another farmer used motor-trucks last season for handling wheat in the field and by their help found no difficulty in keeping up with the thrasher, which was harvesting twenty-five acres a day. During the summer season 1,000 bushels of wheat

were hauled eighteen miles every day.

In the hauling of perishable produce such as fruit and vegetables, the time gained by the use of motor-trucks is an important factor.

TRAILER CUTS DOWN HAULING COSTS.

The motor-truck trailer has shown itself to be a big helper. The trailer makes use of the reserve power of the engine. You know that the automobile or motor-truck engine must be powerful enough to enable the vehicle to climb steep grades or go through heavy roads. On a road with fairly good surface and without excessive grades, however, this reserve power is seldom used and thus becomes available for drawing a trailer.

Just as a horse or locomotive can pull a much heavier load than it can carry, it has been found that a motor vehicle can not only carry the weight which it is designed to carry, but can in addition haul a trailer or semi-trailer bearing an equal or greater load; in other words, a truck-trailer combination can haul from two to three times what the truck, tractor or automobile could haul alone. Yet, despite the greater load capacity of the combination, the added expense of operating the motor vehicle is only about 25 per cent.

The use of trailers also saves time, for the trailer can be loaded or unloaded while the motor-truck is going on another trip, and by using three trailers, one loading while a second is unloading and the third is on the road with the truck, the loss of time is greatly reduced.

THREE TYPES OF TRAILERS.

There are three principal types of trailers: the two-wheel, the four-wheel and the semi-trailer, all of which are being used by farmers, the particular type selected depending upon the individual needs and preferences of the user. As with motor-trucks, certain manufacturers of trailers are specializing in trailers especially designed for farm work. Many of the best makes of trailers now on the market embody the most approved features of the motor-truck, and are able, without difficulty, to follow in the track of the towing vehicle without wobbling, overturning or coming to grief when turning corners.

The following examples illustrate the varied uses to which the trailers are being put by farmers: farmer operates a wholesale milk route covering twenty-five miles a day with an automobile and trailer; a fruit grower hauled his entire peach crop to market with a light passenger car and a four-wheeled trailer, averaging sixty crates on each trip, the total weight of each load being thus more than 3,000 pounds; a farmer uses his light runabout with a two-wheel trailer for hauling cattle up to a ton in weight; Pacific coast farmers haul thousands of tons of hay every season by means of trucks and trailers; a wheat grower made use of several touring cars with four-wheel trailers for handling last season's crop, not only hauling the threshed wheat to the shipping point in this way, but likewise bringing the wheat across the fields to the threshing machine.—Donald McLeod Lay.

POULTRY

Green feed, in some form, constitutes an essential part of any well-balanced poultry ration, whether for young chicks, growing stock or adult birds.

The modern tendency is to give a somewhat narrow ration containing protein in a highly concentrated form. This is particularly true with regard to poultry kept in confinement and fed heavily for egg production, as are a large proportion of the birds on our Canadian farms during at least five months of the year. A liberal supply of green feed minimizes the dangers of this system by adding both bulk and variety to the ration, and at the same time replaces a certain quantity of grain.

Green feed is valuable, not only for its succulence, which makes it palatable to poultry, but also because it contains mineral matter, including nutritive constituents, necessary to sustain life, promote growth, and assure reproduction. Foremost among these constituents are the vitamins, the absence of which from any ration, whether for humans, animals or birds, will ultimately prove fatal.

Therefore it behooves every poultry keeper, whether backyarder, specialist, or farmer, to make provision for an ample supply of green feed in some form, and in view of the shortness of our growing season, and the late spring experienced this year, no time should be lost.

Green feed may be divided into two kinds, that intended for immediate consumption, and that which is to be held for winter use. Certain varieties, however, are grown for both purposes, this being particularly true of grasses and leguminous plants.

Among the green feeds which are to be used as soon as grown, rape holds first place by reason of its quick growth, palatability and value for cleaning and freshening the yards. The best variety is Dwarf Essex and it should be sown broadcast. Under normal weather conditions it is ready

for grazing from five to six weeks after being sown.

Alfalfa makes excellent green feed for growing stock, and when cured is valuable for winter feeding. It has the added advantage of being able to withstand prolonged drought. The favorite varieties are Grimm and Turkestan.

Mangels or semi-sugar beets form the bulk of the green feed for winter use; they are easily harvested, keep well, and generally crop well. The Mammoth Long Red or Gate Post varieties are preferable, as they contain a higher percentage of dry matter. Mangels should not be fed immediately after being harvested, as when very fresh they might cause bowel troubles.

The Jerusalem Artichoke, and especially the Mammoth French White, deserves more attention from poultrymen. Extremely hardy and prolific, it can be grown almost anywhere and under any conditions. The green shoots form abundant shade and succulent feed for growing stock, the closeness of the foliage helps to choke out weeds, while the tubers keep well, are relished for winter feed for laying hens and early spring feed for little chicks.

Details regarding methods and time for planting all the above mentioned kinds of green feed will be found in bulletins 87 and 88 (second series) and pamphlet 23, which may be obtained free from the Publications Branch, Department of Agriculture, Ottawa, Ont.

Better be right and poor than wrong and rich.

The gift to Canada of five breeding Shire horses, two stallions and three mares, by the Shire Horse Society of Great Britain, has been added to by Mrs. Stanton, of Derbyshire, England, who has contributed a two-year-old colt from her famous stud at Snelston, near Ashbourne. This colt is the son of one of the best bred mares in the Empire, and by a very famous sire—one time champion of the breed in the British Isles.

Early Sources of Nectar and Pollen.

The early sources of nectar and pollen are of great importance to the beekeeper, not from the standpoint of the surplus honey they may give, but because of the effect they have in stimulating the bees to heavy brood production and so providing a large force of worker bees in time for the harvest.

Most regions in Canada produce a fair supply of these early flowers, especially the Maritime Provinces, Quebec, Ontario and British Columbia. In the prairie provinces, however, these early sources are limited in many localities, and it becomes necessary to feed the bees in order to have them build up strong enough for the main flow.

The most important of the very early plants are the willows and maples; they grow abundantly in most parts of Canada and yield both pollen and nectar. There are many species of willow, and practically all of them are visited by honey bees. The pussy willow (*Salix bicolor*) is usually the first to bloom. Of the maples, the sugar or rock maple, box elder or swamp maple, red or soft maple, and the Norway maple are important. In British Columbia the large-leaf maple (*Acer macrophyllum*) is very important. Other plants that yield pollen at the same time are the alder, ash and elm.

A little later in the season the common dandelion and fruit bloom; apple, pear, plum, cherry and the wild fruits are very important, yielding both pollen and nectar, and in favorable seasons a good surplus may be obtained. In the prairie provinces many of the wild flowers contribute small supplies of nectar and some pollen. The bush fruits, currants, gooseberries and raspberries also furnish large amounts of nectar and, where wild rasp-

berries grow abundantly large crops are obtained.

Caragana or Siberian pea tree is also a heavy yielder and is becoming very important in the prairie provinces where it is being grown to provide windbreaks. In Manitoba and Alberta a surplus is obtained from this plant.

Horse chestnut, hawthorn, barberry, dogwood, honeysuckle, buckthorn and wild mustard also yield small amounts of nectar and are important in the aggregate.

The first shipment of Canadian store cattle for the British market since the removal of the embargo was personally inspected at Montreal by the Dominion Minister of Agriculture, Hon. W. R. Motherwell, the Deputy Minister, Dr. J. H. Grisdale, and other officers of the Department of Agriculture, as well as by several Members of Parliament. There were 427 animals in the shipment, mostly of the Shorthorn and Polled Angus types, and of good beef quality. The Minister stated his belief that the resumption after a period of 80 years, of store cattle shipments would lead to the gradual development of an important export trade.

In France the controversy between the cities and the country over daylight saving has been settled by compromise. The government orders all clocks turned ahead one half hour to conform with Strasbourg instead of Greenwich time.

Learning to cover up an aching heart, to smile when you would weep, is what everyone must learn if he would live the masterful life.

To the motorist a child on the highway is always a danger signal. When you see one ahead slow down at once; and if you are in any doubt, stop.

Home Education

"The Child's First School is the Family"—Frederick.

Unspoiling the Spoiled Child—By Mary E. Underwood

"Joe is so awfully mischievous," his mother complained to me. "He simply takes the house apart. He meddles with the clock, every lock or screw, and we never know what terrible thing is going to happen next." To illustrate, she told me of an unpleasant experience which resulted because of Joe's mischievousness. One morning when he was alone in the room, he opened the telephone and loosened the wires.

A few hours afterward a neighbor hastily came to call for the doctor. The telephone was out of commission and no one present knew what to do. Joe was at school. At the supper table Joe's mother mentioned the incident. Joe calmly announced that he knew how to fix it. This he did. "And," concluded the mother, "I fixed Joe to help him remember not to meddle with the telephone again."

It was very plain that what this "spoiled child" needed was not punishment or suppression of his mechanical inclinations but a chance to make use of them. I stated to Joe's mother that if he were my boy I would see that he owned a good set of boy's tools and some good mechanical books. Joe's parents obtained the set for him and they proved to be exactly what he needed. He found great pleasure in using the tools and reading the books, and before long Joe, instead of being an annoyance to everyone, became a very genuine source of pride to the household. He had a corner in the house which he called his "shop," whence emanated all kinds of original and ingenious mechanical toys.

The problem presented by the child who "cries violently until he gets what he wants" is a very common one. The child who has this habit is almost invariably a child who has learned from experience that crying hard and crying long enough is the most successful method of securing his ends. Sometimes this practice originates from

what some parents claim are absolutely unavoidable circumstances; one instance being a sickly child whom the parents think should not be irritated, crossed or annoyed in any way. A child so treated quickly and naturally learns the great value to himself of showing irritation. This coddling in childhood usually develops a selfish, self-centred, self-seeking adult, who in the end pays a heavy penalty for it all by being generally disliked.

This use of crying as a business method is a comparatively simple variety of "spoiledness" to cure, if the mother goes at it wholeheartedly, seeing to it that the child never gets anything by crying for it.

The child who maliciously teases animals does it perhaps because he has never been trained or taught to treat them kindly, or because he has seen those about him careless and unkind to animals. Little children are cruel without meaning to be cruel or knowing that they are cruel. Kindness and sympathy for animals can best be developed in children through actual personal experiences. Every little child should have a chance and should be required to care for some living, growing thing, animal or plant. Only through such practices can the finer human sympathies and instincts in the child be awakened and developed.

The desire of a child to tease others is often the direct result of the child's home environment. It is among the commonest of parents' sins to tease their little children. I do not need to suggest particulars here; most of us can supply them from our own experience.

Wise and loving parents will realize that if their thoughtlessness and lack of judgment have resulted in spoiling, in order to insure the happiness and welfare of these children the work of unspoiling the spoiled child must be undertaken.

THE MIXED FARMER

YOU CAN'T PUT HIM OUT OF BUSINESS

The Ontario Long Course Schools

By L. STEVENSON, B.S.A., Secretary and Supervising Director, Department of Agriculture.

In Ontario, winter classes in agriculture and in domestic science are held by the Agricultural Representatives, and during the duration of the Agricultural Instruction Act 4,000 farm boys have benefited. Out of these classes have grown the junior farmers' organizations, of which there are 104 within the province, with a membership of 2,815. These organizations are the basis of the pig clubs, calf clubs, and various competitions in crop production, all of which are of great practical value. The three-months' courses in agriculture and domestic science now held at eight centres in the province are a similar development.

The Three Month Courses or Long Course Schools in Agriculture and Domestic Science, were organized in 1921-22 as an extension activity of the Agricultural Representatives Branch of the Ontario Department of Agriculture, in four counties, Middlesex, Huron, Peel and Wentworth. The courses were very successful, and the various groups of progressive people making use of the Agricultural Representatives' services in those counties were very desirous that the schools be repeated in 1922-23. Four other counties, Simcoe, Leeds, Prince Edward, and Peterboro asked that the Three Month School service be extended to them. This made a total of eight counties benefiting by this form of extension work during the past winter.

The Agricultural Representative selected the location for the school in his county, arranged with the municipal authorities or others concerned for the use of buildings, grants for running expenses, equipment, prizes, and other minor essentials necessary to conduct a well organized school for rural youth.

The resident faculty at each point where a school was held consisted of the Agricultural Representative, the Assistant Representative, the Domestic Science assistant and the instructor in English and Mathematics. The travelling faculty, visiting all the schools for a definite period in accordance with a well-ordered plan, was made up of the best instructors avail-

able. This faculty was composed largely of college and university graduates with teaching experience. The Domestic Science class at each school had the benefit of a resident domestic science teacher, who in turn was assisted by the visiting specialists. Classes were assembled at 9.30 each morning, except Saturday, and continued until four o'clock in the afternoon.

The regular students at the eight schools made a grand total of 239 boys and 260 girls. Many occasional students attended the classes of special interest to them. Literary and debating societies were organized in connection with each school.

The cost of these schools has been very low when compared with the cost of the permanent school, being but \$16 per student for the three month period, a mere trifle for well organized schooling in elementary agriculture and domestic science.

The schools were held at the following points, Clinton, Parkhill, Streetsville, Binbrook, Norwood, Wellington, Mallorytown and Orillia.

The classes in Agriculture received instruction in Animal Husbandry, Agricultural Botany, Horticulture, Farm Drainage, Soils and Fertilizers, Apiculture, Farm Mechanics, Poultry Husbandry, Farm Dairying, Farm Management, Farm Forestry, Economic Entomology, Elementary Chemistry and Physics, Civics and Rural Organization, Co-operative Marketing, Veterinary Science, Gas Engines, English, and Mathematics.

The classes in Home Economics received instruction in Sewing, Home Nursing, Foods and Cooking, Laundering, Household Administration, Millinery, English, and Mathematics. All Domestic Science students may elect to attend the classes in Poultry, Apiculture, Dairying, and Horticulture. Special lectures on subjects of interest were arranged from time to time.

Schools of this type take the college teaching into the back districts and reach young people who can not for various reasons attend the permanently organized Agricultural College at Guelph.

THE CHILDREN'S HOUR

HOME-MADE BIRD-BATHS OF CEMENT.

A bird-bath of simplest construction, but which has been much enjoyed by the robbers, blue jays, wrens, and other feathered denizens of my garden, is here described.

The cover of a large sized galvanized garbage can was used as a mold, after being carefully lined with greased paper.

The cover was filled about three-fourths full with cement; then as the cement slowly hardened, it was drawn gently and constantly with a wooden paddle, back from the centre and toward the edge, until, when the cement finally "set," it reached up to the rim of the cover at the edge, and sloped very gently and gradually downward toward the deepest part in the centre.

It was set upon a low mound of stones, about which gay red and yellow and white portulacas were planted. The birds seem particularly to appreciate the bath's being set so conveniently low that it is easily within their reach as they hop about the lawn, so that this spot in our garden is gay all summer long with bright-hued blossoms and happy feathered creatures.

A similar bird-bath was constructed by a neighbor, which, instead of being set low upon a tiny "rockery," was elevated upon a pedestal.

A cracked earthenware drain-pipe was used as the mold for this pedestal, the pipe being thoroughly greased inside before the cement was poured into it. After the cement had hardened, this mold was broken to pieces to set the pedestal free.—Harriet Joer.

TRY THESE NEW GAMES.

Here are some games that were played at a recent school fete:

Nose and toe tag furnished much amusement. If the one who was "it" tagged a contestant who was not in manual connection with his nose and toes, the unfortunate player had to become "it."

Now then, look out! If you don't want to get caught, just grab your nose with one hand, and your foot with the other. If you can keep your balance and hop around on one foot, all well and good; but if you can not, you will fall down. But whatever you do, don't let go of your nose or toes, or you will be tagged.

Ostrich tag came next. In this game none of the performers could be tagged while they slung an arm under the crook of the leg and grabbed the nose. To be seen hopping around in that position reminds one very much of the ostrich; but it's fun, just try it.

Ankle tag was a game for the girls. Here the girls to be immune from "it" would make a lunge for each other's ankles. Of course there were some falls, but it only added to the hilarity of the children.

In playing **fertile tag**, if one kept his hands and feet from touching the ground, he couldn't be tagged. At first the boys tried to fly, but in a few moments they discovered it was easier

to drop to the ground and hold their feet and hands high.

Snake and birds was played by the teachers and the children. The director of games told the youngsters that "the lovely teachers" would be the birds, which were to be caught within the circle by the snakes.

Then he called sixteen girls, and had them line up in fours. Each line of four, locking arms, formed a snake, whose business it was to kill a bird, without letting go of each other. When the head of the snake with its free arm caught hold of a bird, the rest of the snake quickly encircled it and the bird was pronounced dead and removed from the circle, while the snake went to the end of the line and the second snake was set free, and so on until all the birds were dead.

Horseback tag was the next game. Here to keep from being tagged, the performers had to straddle the backs of their fellow contestants.

The Flower Garden in Spring.

To all lovers of flowers the garden in spring is a most enjoyable place; here one meets old friends among the spring flowering plants, which, perhaps, one has watched the development of for years. In many gardens, however, there is a dearth of spring flowers, but, as there are so many hardy desirable plants, this could easily be remedied if there is the desire to do so.

As soon as the snow is gone one may have the Snowdrop, Snowflake, Crocus, Chionodoxa, and Scilla among bulbs, soon to be followed by the Daffodils and Tulips. Hardy Primulas soon mingle with the bulbs as do the Iceland Poppy, Trillium, Trollius, Doro-nicum, Epimedium, and other early spring flowers; while close behind are the Columbinas, Bleeding Heart, Sweet Rocket and Irises, and many others.

As one looks at the garden as it now is, one can picture how it would be improved if, in another year, there were flowers where there are no flowers now; where yellow, red or white would add to the general effect; where a low-growing plant or a tall plant would improve the appearance of the border. As one is liable to forget these things after the spring has gone, a good plan is to write on a label or small piece of wood the kind of plant which is desired in each place where improvement can be made; then when the proper time for planting arrives, if such a plant is put there, it will not be long before there will be a marked improvement in the garden in spring and this method can be followed with good results for the whole season.

Let all who love flowers, then, plan for improvement in the garden next spring; a little improvement each year would soon result in a great change and make the home grounds much more attractive.—W. T. Macoun, Dominion Horticulturist.

Hitherto eggs imported into Canada in less than ten-case lots have not been subjected to inspection, and by making small consignments, shippers were able to evade the regulations. The regulations have now been amended, and all shipments of eggs in the shell will henceforth be subject to inspection and marking at the port of entry.

Make the Rinso liquid first

Do not put Rinso direct from the package into the tub. Mix half a package of Rinso in a little cool water until it is like cream. Then add two quarts of boiling water, and when the froth subsides, you will have a clean amber-colored liquid. Add this liquid to the wash tub, until you get the big lasting Rinso suds. Then soak the clothes clean.

Rinso is as splendid for the regular family washing as Lux is for fine fabrics.

Surnames and Their Origin

GOWER

Racial Origin—Welsh.
Source—A place name.

Welsh family names are not always borne by those of Welsh blood, though it is a fairly safe assumption that where a Welsh family name is found there also you will find at least a portion of Welsh blood.

It was quite possible, however, in the period of family name formation that a Norman or a Saxon Englishman, having settled in some section of Wales, would most naturally find himself tagged with a surname indicative of a Welsh place name, inasmuch as the place names all about him would be Welsh. And it is true that an exceptionally large number of English have settled in Wales.

The family name of Gower, therefore, is one of those which might be borne by Englishmen as well as those of pure Welsh extraction.

It is simply the name of a place in Glamorganshire, and according to the Welsh spelling it is not Gower but "Gwyr." though the pronunciation is about the same. The meaning of the name is an inclosed, a round or an encircled place. In this instance the

place is virtually encircled by the sea and certain rivers and streams.

ARGYLE

Racial Origin—Scottish.
Source—A locality.

You will have no difficulty whatever in guessing the source of this family name if you are at all familiar with the geography of the British Isles, for you will recognize it as an extensive shire on the west coast of Scotland.

If you bear the family name, the chances are in favor of your ancestry on the paternal side tracing back through the male line of Gaelic origin, for the name of Argyle is simply the modern form of "Earra Ghàidheal," which means the land of the Western Gael, and which is referred to by Grant as "the breeding place of the Gael."

The family name, however, while Scottish in the sense that it is the name of an ancient Scottish shire, is English in its method of formation. For the Gaels of Scotland, like those of Ireland, nearly always formed their family names from given names or from clan names, and such names as this, when found among them, indicate the presence of English influence.

THANKFUL MOTHERS

Thousands of mothers throughout Canada—many of them your neighbors—speak with thankfulness concerning the use of Baby's Own Tablets. Once they have used the Tablets for their little ones they would use nothing else. The Tablets are an absolutely safe medicine for even the youngest baby, being guaranteed by a government analyst to contain neither opiates nor narcotics or other harmful drugs. Concerning them Mrs. David McRobb, Divide, Sask., says: "I have used Baby's Own Tablets and have found them so satisfactory I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Dreadful Possibility.

His Mother—"Go and wash your hands and face, Bobby. I'm expecting Mrs. Pokenose here any minute."
Bobby—"But s'pose she don't come at all after I've gone and washed my hands and face?"

MONEY ORDERS.

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

Snappy.

Tactless Hostess (on seeing her nephew's fiancée for the first time): "I should never have known you from your photograph. Alan told me you were so pretty!"

Quest (coldly): "No, I'm not pretty, so I have to try to be nice, and it's such a bore. But perhaps you haven't tried?"

Goodness is the only investment that never fails.—Thoreau.

Minard's Liniment used by Physicians.

Warned by Their Dreams.

The late Lord Dufferin dreamed one night that he was in a hearse on his way to the cemetery. The features of the driver were impressed on his memory when he awoke. A day or two later he was on the point of entering a lift at an hotel, when he recognized the lift attendant as the driver of the hearse he had seen in his dream.

He stepped back and the lift ascended without him. As it neared the top something broke. It crashed to the bottom, killing everyone in it.

Lord Roberts recorded a remarkable dream warning. In October, 1893, his father, to whom he was acting as A.D.-C., at Peshawar, had issued invitations for a dance.

Two days before it was to take place he was silent and despondent during breakfast, and eventually told his son he had had an unpleasant dream, which has visited him several times before, and had always been followed by the death of a near relative.

As the day wore on his depression grew and he wanted to put off the dance. His son dissuaded him, but that night the dream returned and the dance was postponed. "The next morning," wrote Lord Roberts, "the post brought news of the sudden death at Lahore of the half-sister with whom I had stayed on my way to Peshawar."

One night in November, 1850, Tennyson dreamt that Prince Albert, the Prince Consort, came to his bedside and kissed him, whereupon he remarked to himself in his sleep: "Very kind, but very German!"

Next morning came Queen Victoria's letter offering him the position of Poet Laureate, an offer prompted, as he discovered, by Prince Albert's high opinion of "In Memoriam."

For more than a hundred years the Chinese people have drunk no milk because a Chinese expression was tender-hearted and thought it a mean trick to deprive calves of their nourishment issued an edict against drinking milk. The Chinese have now begun to use it again, but it will be a long time before there are cows enough in China to supply milk for all the people.

Better really be than seem to be.
Better for the foot to slip and not the tongue.

THE GERMAN REPARATIONS
Mademoiselle France (to Germany)—"In you go!"

—From London Opinion.

HAVE YOU ANY OF THESE SYMPTOMS?

If You Have, You Are in Need of a Tonic Medicine.

Are you pale and weak, easily tired and out of breath on slight exertion? Are you nervous? Is your sleep disturbed? Do you wake up in the morning feeling as tired as when you went to bed? Is your appetite poor, your digestion weak, and do you have pains after eating?

If you have any of these symptoms you need a tonic, and in the realm of medicine there is no better tonic than Dr. Williams' Pink Pills, which enrich the blood, restore shattered nerves and bring the glow of health to pale cheeks. The value of Dr. Williams' Pink Pills is shown by the case of Mr. Horace Cuphill, Woodward's Cove, N.B., who says:—"The first indication that my general health was not good was a shortness of breath after the least exertion. Then my appetite began to fail, and after eating it seemed as if there was a lump in my stomach. I grew so weak that I could not walk a hundred yards without resting. Then I was taken with a numbness all over my body and was in a sad plight. I was under a doctor's care, but as I was not getting better, I decided to try Dr. Williams' Pink Pills. The first few boxes did not seem to help me but my wife asked me to continue their use and I got four boxes more. Before these were gone I could eat a fair meal, the numbness was leaving me and I was feeling much better in every way. I took the pills for a while longer, and felt that I was again a well man. I still take the pills occasionally, but have had no return of the old trouble."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Saving Migrating Birds.

A Dutch ornithologist has hit upon the simple plan of having perches placed under the shutters to save migrating birds from being killed by dashing themselves against the lenses of the great lanterns of lighthouses, when attracted and confused by the glare. Perches for thirty thousand birds have been set up, and at Brandaris Light on the island of Texel, twenty thousand birds have been seen perching on them.

There is no more inconceivable folly than this continued riot of expenditure on battleships at a time when great masses of humanity are dying of starvation.—Herbert Hoover.

Look to Your Eyes

Beautiful eyes, like fine teeth, are the result of constant care. The daily use of Murine makes eyes clear and radiant. Enjoyable. Harmless. Sold and recommended by all druggists.

MURINE FOR YOUR EYES

Keep Stomach and Bowels Right

By giving baby the harmless, purely vegetable, infant and children's evacuator.

MRS. WINSLOW'S SYRUP

brings astonishing, gratifying results in making baby's stomach digest food and bowels move as they should at bedtime. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Safe and satisfactory.

At All Druggists

A Child Asks.

"Where has yesterday gone?" (Hark to the prattler!) Yesterday, my child, Has gone into our memories—of hearts; Sometimes we would forget . . . but It lives still And we are made of joys and griefs and hopes Of yesterdays.

"Why is to-morrow?" (Listen to the child!) To-morrow, Like a clean sheet of paper, is ours to write on, And we record, when it is given us, What yesterday has taught. If we make mistakes— And we all make mistakes—or if we waste Our paper with our silly blots or scribbles, Another sheet is given us to write on: The day-after-to-morrow.

Yesterday was today, my child; to-day We make the memories which will be yesterday's; And soon to-morrow will be to-day, And we shall have—and everyone will have— One more clean sheet to write a record on.

—Robert Withington.

Minard's Liniment for sale everywhere

Old Captain Hennessey, although quite feeble, is proud of his age. He always induces strangers to guess how old he is, and when, out of courtesy, they misjudge him ten or fifteen years to the sunny side, he will titter triumphantly, "Stung again! I'll be eighty-six my next birthday."

A Parliamentary candidate in the midst of a stirring address was struck by an ancient egg full in the face. Pausing to wipe away the contents of the missile, he continued, "I have always contended that my opponents' arguments were very unsound."

When an employee ceases thinking of the business as "ours," he is greasing the skids.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Frezzone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Frezzone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

ISSUE No. 22-23.

MRS. YOUNG GAINS THIRTY-FOUR LBS.

Declares Tanlac Restored Her When Stomach Trouble Had Almost Wrecked Health.

"I weighed only a hundred and fourteen pounds, my face was sallow and sunken and I was thin as a rail. But since taking Tanlac I weigh one hundred and forty-eight, have the rosy cheeks of a school girl, and enjoy good health for the first time in fifteen years." This remarkable statement was made recently by Mrs. Bella Young, 98 Cathcart St., Hamilton, Ont.

"The last year of my sickness I was near a nervous breakdown, and my appetite was so poor even the odor of food sometimes nauseated me. Headaches, pains in my stomach and back nearly set me wild and I would walk the floor for hours. I got so weak I could hardly stoop over to lace my shoes, and my housework was a burden."

"The Tanlac treatment gave me a wonderful appetite, built me up till friends wondered at my great change, and I always feel strong and well. I will never cease to praise Tanlac."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.

Sins of the Fathers.

Tommy—"How far is the earth from the sun?"
Father—"I'm sure I don't know."
Tommy—"Well, I hope you will feel sorry to-morrow when I am being punished for your ignorance."

MINARD'S "KING OF PAIN" LINIMENT

MRS. MISENER'S ACHES AND PAINS

Vanished After Using Lydia E. Pinkham's Vegetable Compound

"Branchton, Ont.—"When I wrote to you for help my action was mostly prompted by curiosity."

"I wondered if I, too, would benefit by your medicine. It was the most profitable action I have ever taken. I heartily assure you, for through its results I am relieved of most of my sufferings. I have taken six boxes of Lydia E. Pinkham's Vegetable Compound Tablets and a bottle of Lydia E. Pinkham's Blood Medicine, and I can honestly say I have never been so well before. I had suffered from pains and other troubles since I was fifteen years old, and during the 'Great War' period I worked on munitions for two years, and, in the heavy lifting which my work called for, I strained myself, causing pelvic inflammation from which I have suffered untold agony, and I often had to give up and go to bed. I had doctor for several years without getting permanent relief, when I started to take your medicines."

—Mrs. GOLDWIN MUSEMAN, Branchton, Ont.

Write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments of Women." O.

Former Lachute Boy Wins Honors

The many friends of Mr. Ryckman Alexander will be pleased to hear of his recent success and high standing taken at McGill. Ryckman is an old Lachute Boy, and his recent honor speaks well for our High School, where he started his education.

He is winner of the first Mackenzie Scholarship, and of first-class honors in Economics and Political Science, Faculty of Arts, McGill, third year. Mr. Alexander is vice-president of the class of 1924, president of the Political Economy Club, and holder of the Sir William Macdonald Scholarship for 1923 and 1924. He lives at 331 Harvard Avenue, Notre Dame de Grace, and is the son of Dr. W. W. Alexander.

OBITUARY

The Late Mrs. J. W. Dumouchel. The death occurred here on Tuesday, June 17th, of Mrs. J. W. Dumouchel, who since having an operation in the Hotel Dieu Hospital of Montreal, last September has had a lingering illness. Deceased lady was formerly Miss Louise Anna Rousseau, of St. Hugues, P.Q., and was very accomplished as a musician, playing since she was 13 years of age and for 19 years being organist at Annonciation.

She was married in 1908 to Mr. J. W. Dumouchel, station agent at Lachute, Que. The funeral took place on Thursday morning to the R.C. Church and thence to the cemetery, the Pall Bearers being:- Messrs. E. Lacasse, A. Larocque, P. Chabot, J. A. Dumouchel, R. Rousseau, V. Lefebvre and A. Raymond.

Those attending from a distance were, Mr. R. Rousseau, of Actonville, Mr. A. Rousseau, of St. Hugues, Mr. O. Parenteau, of Montreal, Mr. E. Choiniere, of Farnham, Mr. and Mrs. J. A. Dumouchel, of Ste. Rose, and Mr. J. B. Dumouchel, of Montreal.

ST. ANDREWS EAST.

Mr. Timberlake of Montreal, spent the week-end as the guest of Mr. R. T. Pringle.

Don't forget the special Collection for 'Sunday School Literature' on Sunday June 24th.

The Literary Club held their meeting at the home of Miss Davis on Tuesday evening.

Mr. and Mrs. Watt, of Montreal, were the guests of Mrs. G. Jeffrey over the week-end.

Among the visitors to Ormstown show last week were Messrs. H. Walsh, R. E. T. Pringle, W. G. Rodger, W. C. Watson.

Prayer meeting will be held in the School House Lachute Road, Thursday evening June 28th, conducted by Rev. J. Burgess at 8 o'clock.

Among the visitors to Montreal since our last report were the Misses Walsh (who motored), Mrs. W. Jeffrey and daughter Doreen, Mr. N. F. MacGregor and Mr. G. W. Rodger.

Public Service will be held in the Presbyterian Church, on Sunday, June 24th, at 11 a.m. and 7:30 p.m., the pastor Rev. J. Burgess will preach at both services. Sunday School 10 a.m. to 11 a.m. in the Church. The Lords Supper will be dispensed on Sunday, July 1st, at the morning service. Preparatory service on Friday evening June 29th in the Church at 8 o'clock. The pastor will preach.

GRENVILLE.

Mr. Frazier Carson and friend motored from Amherst last week.

Mr. George Cannon and Mr. W. H. Skeleher, of Montreal, spent the week-end here.

Mrs. A. Clark and Mrs. H. Gill, of Grenville, were recent visitors of Alfred cottage.

Mrs. Eastin and Miss Barrie, of Montreal, were Sunday guests of Mr. and Mrs. James Brachin.

The Ladies of the Presbyterian Church, purpose holding a sale of fancy and useful articles, in the near future.

Rev. Mr. Sanders, Mr. Dakin and Mr. A. V. Gaudry are attending the Baptist Association held in Westboro, Ottawa this week, Tuesday, Wednesday and Thursday.

FOR SALE.-A large touring car, in good condition. For further particulars. Apply to Watchman Office.

LATHS.-Just received a carload of wood laths, good quality. Reasonable prices for any quantity.

Mrs. J. Cottingham, Phone 29, Lachute, Que.

NOTICE

A WEARY WILLIE PARTY.

A "Weary Willie" party, when the "eats" can be served from cans in true hobo fashion, spells much fun and little work. Each guest may very properly be asked to bring a "hand-out." The invitations, written on roughly torn scraps of brown wrapping paper, might read:

The Weary Willies and the Limping Janes, Will hit the ties, unless it rains; Saturday afternoon, while the sun is up, Bring a can of beans and your own tin cup.

(Meeting place and hour.) All will need to bring a cup, as the cups will answer for plates as well as a means of getting a drink. Only a few, however, will be asked to bring beans; others will bring bread, weiners, cookies, or fruit. A hobo feed is never an elaborate affair, but the hosts must see that a can opener, a bread knife, drinking water, and coffee appear at the proper time.

Have a red bandanna handkerchief at the meeting place for each person. Before giving them out divide them into two piles. In the folds of each bandanna going to the boys, slip a piece of paper upon which is written the name of some food. Upon the slips in the girls' handkerchiefs will be the names of foods usually associated with those given the boys. Such combinations might be used as: Ham-eggs, bread-butter, salt-pepper, pork-beans, crackers-cheese, and cream-sugar. The boy whose slip bears the word "cream" will of course look for "sugar."

When the boys have found their slips and located their partners, they will find sticks to make "Weary Willie" packages for themselves and their partners.

The march should be under the leadership of some boy who has the gift of making the company want to do anything he suggests. A cowbell might be rung by the leader to gain attention. There is only one thing that is likely to mar the jolly good-fellowship of a tramp through the woods, and that is the wandering off of a few who are especially good friends. You can avoid this by having them march in couples and changing partners whenever the leader orders. When changing, each boy drops back with the girl just behind, the last boy moving up to the front of the line. Most of the time they will be allowed to set their own pace, but just as the conversation begins to lag they will be told to flap their arms and crow four times like a rooster, or to dog-trot, walk pigeon-toed, or backwards. The whole line must do this at the same time. If there are any strangers in the crowd, they will not seem like strangers long.

Upon reaching the camping place, seat the crowd in a circle, and give each girl some word suggestive of the art of hoboeing, such as blind baggage, back-dog spread, bull dog, hand-out, wood pile, straw pile, or tramp. Give the boys the same names, thus a boy and a girl will each have the words, "blind baggage," and so on.

The ring leader begins a story of hobo life; the wilder and more exciting the tale the better. Whenever he mentions one of the words given out, the boy and girl having that word must leave the circle and scout for a couple of pieces of firewood. The

CHAPTER V.—(Cont'd.)

"I can't say the years have detracted from you, Chess. The English officer type is a little more pronounced, that's all," remarked Culver, glancing admiringly at the lean firmness of the face before him, tanned to a deep brown, and the eyes, which life had made a little keener, a little more penetrating, but with the philosopher's twinkle in their depths. "You've done some nice girl an injustice, Chess. No doubt the British Government needed you, but ye gods, man, why didn't you take a wife with you? You don't know what you've missed out of life." And Culver's glance rested on Irma's smiling face.

Reynolds' lips lost their curve as his eyes followed his friend's but his tone was light as he made answer. "Your happiness was an incentive, old chap, but unfortunately Providence seldom duplicates women."

Irma laughed, while Culver replied good-humoredly: "That comes too glibly for one who claims he has had no practice."

Irma shook her head. I'm afraid Mr. Reynolds finds the path of bachelorhood too smooth and easy an one to turn off. He tells me he is going to leave us again almost immediately."

"You don't say? Where now, Chess?"

"I'm following in your footsteps this time, old man—China."

"What luck! Just where Irma and I are off to."

"Neill!" Irma rose to her feet.

"Yes, dear; I made up my mind today while in Tung Yung's. The old heathen cast the spell of the East over me."

"When are we to start?" Irma's voice trembled.

"That's for you to decide, dear. Say the word and we go to-morrow."

"Why that's jolly!" exclaimed Reynolds. "What's to hinder us making the trip together? I can arrange my time to suit yours. The only important business I have over there is to see the boy."

"David, you mean? Has he recovered from his wound yet?"

"Not altogether, I fancy. Not that the young jackanapes complains to me, but a letter came from his aunt, Mrs. Ashton—you remember her—and she says he is as restless as a seal in a desert."

"Poor boy!"

Irma's voice drew Reynolds' gaze to her sharply. "By the way, Mrs. Culver, how's Paul, the little shaver I left absorbing American life like an ant thrown into a new pond?"

Reynolds listened interestedly, plainly delighted at the boy's achievements.

"Well, well! so I've lost my wager after a dozen years, let alone twenty, and I'm mighty glad. The human race has the same root after all. India opened my eyes in that respect. I look agast at my old egotistical self. What a confounded, narrow-minded ass I was."

"Don't be too hard on yourself, Chess. It's a common failing."

"Yes, and a lot of people will have to expand mighty fast if they want to be in line with the boys when they come back from Europe."

Quietly Irma slipped away to superintend dinner. She stood for a moment at the open window in the hall. The sun was sinking in a bed of gold and crimson, and she smiled as her eyes followed one golden gleam into the far East.

CHAPTER VI.

For the tenth time in the past half hour Tu Hee had wandered to her window to see if the sun had succeeded in peeping out before going down for the day. But the big drops still pattered down. Dropping to the floor she rested her elbow on the cushioned window seat and contemplated the bushes and flowering trees drooping under their increasing burden. But the sight of the garden proved rather tantalizing. In view of the fact that its beauties were at present denied her. Her eyes, seeing restlessly for a diversion, incidentally lighted on one in the shape of an American magazine. Drawing the book to her she looked critically and a little wistfully at the foreign beauty smiling at her from the frontispiece.

"You are very pretty," confessed Tu Hee aloud. "No, that word is too insipid for you. You are beautiful, far more beautiful than I could ever be." A sigh accompanied the last words. "And yet my nose is straight like yours; my lips curve the same; and there are three dimples in my face when I laugh instead of two. My eyes are blue too, and yet there is a big, big difference, Miss American Beauty; yes, a great big difference. You're white and I am yellow." And some of you white-skinned as nice as you look. The young white-skinned officer for example, and yet Lun warns me to be careful. I wonder why? But Lun didn't see the little lights in his eyes that made them twinkly and soft. Chu Sing has lights in his too, but more they shine the harder and more cruel they look. But what do men matter, except Uncle Weng? I'm a little idiot, as Miss American Beauty would say, for mooning in the rain."

Tossing aside the magazine Tu Hee jumped to her feet, shook out her gown, which rippled in a silky mauve sheen to the tiny rose slippers, and darted from the room.

She paused at the head of the staircase, listening intently, but as only silence greeted her, she sped lightly to the ground floor, where she again paused. She proceeded a little more cautiously now, and upon reaching the door of her uncle's study stood alert for any sound. Reassured that the way was clear she turned the brass handle of the heavy door and warily looked in. Swinging it to noiselessly she crept across the big room, where Weng Toy sat in an armchair reading. Smiling gleefully, Tu Hee clasped her hands over his eyes, at the

same time ruffling his hair with her chin.

"It's the water sprite. She has me this time. I surrender!" cried the mandarin, lifting his hands and letting the book he had been reading slide to the floor.

"Let me see, what penalty shall I exact? You're a naughty uncle. You don't deserve ever to see your poor Autumn Glad—no Sadness, any more, letting her mope all alone in the rain."

"Please, please, good sprite, I couldn't live without my Autumn Gladness. Isn't there some other penalty you might exact?"

"Um, um—let me see. You do sound penitent." Loosening one hand Tu Hee placed her gold nail shield against her lips contemplatively.

One eye released, the prisoner blinked up at her.

"Oh, you're peeping! Just for that you shan't read another line to-day." And capturing the book from the floor Tu Hee climbed to her guardian's knee and rested her head contentedly against his shoulder.

Patting her hand, Weng Toy said regretfully: "My little girl grows lonely with only an old uncle around to play with."

"Without him around," corrected Tu Hee.

A sigh escaped Weng Toy.

Tu Hee sat bolt upright and peered anxiously into his face. "You sigh. You're not happy. In one more second Tu Hee weep, Uncle Weng."

"No, no, child. I am unhappy only when I think of the time when the gods shall order me to join my ancestors."

Tu Hee threw an arm around his neck and pressed her face closer. "The gods couldn't be so cruel, for then Tu Hee would have to go too."

"No, no, that would make gods angry. Little Autumn Gladness. Gods say you must marry."

"Marry?" Tu Hee lifted her head and drew back. "Whom?"

"Do you think your old uncle has picked your husband?" Weng Toy's eyes did not waver under the searching look from the blue ones.

Tu Hee smiled. "It's China's custom for brides to be to have no choice, but my Uncle Weng is not like that."

A shadow flitted over the mandarin's face. He avoided the look of perfect trust bent on him. "You love me too well, little Tu Hee."

Tu Hee looked puzzled. "Uncle Weng, I believe you have an eye on a husband and you are waiting for my eyes to fix him. Confess now! No, you won't frighten me, for I know you wouldn't force me to do anything."

Slipping from his knee she stood before him waiting.

Weng Toy picked up the magazine from the floor and began turning its pages carefully.

Tu Hee watched this proceeding a little indignantly. Her hurt pride bade her leave the room but her barrier of respect intercepted her. And then to her surprise her guardian held towards her the American Magazine.

"If the allotment of a husband, Autumn Gladness, rested alone with me, here would be my choice."

Tu Hee's astonished eyes fell on the likeness of a young man in the uniform of a British officer. But he was not an Englishman, or an American. Indeed, unless her eyes were playing her false, he was not a foreigner at all, but one of her own countrymen—as noble-looking as any mandarin or prince. —Yes, decidedly the gods had placed special favor on him. The wide brown eyes looked out as fearlessly—Tu Hee bent closer. Where had she seen that same dauntless, candid look before? A flush crept to her cheeks. Yes, there was no doubt of it—there was the same unconquerable look in the young Englishman's eyes. But there was something about this face that even the foreigner lacked. This was more of a boy's face, trustful and appealing. The world had not yet left its scar on the curved mouth, that would have been almost effeminate if the chin had not been so firm, while the forehead—Tu Hee sighed in delight. She had once seen a picture in the foreign school which she had been told was that of a saint. A saint, she thought, must be a foreign god. At the time she had wished her country's gods were nicer to look at. She would have liked very much to have put the foreign saint in a picture, but of course that would have been sacrilegious. But here was a brow as beautiful as that foreign saint's. All over its smooth surface were written the words, "I serve humanity." Tu Hee was spellbound.

Weng Toy watched well pleased the expression on his child's face. He had studied her too many years not to be able to read it like a printed page, and he knew Paul Culver had already touched a heart-string.

In a reverie Tu Hee held the book out to her guardian.

"He is a young mandarin, Uncle Weng? Or a prince, maybe?"

"He is my sister's child."

"But how comes he to be in English garb? And if he is my cousin, why have I never before heard of him?"

"It is a painful story, child; at least painful to me. That is why I have not before mentioned it to you. My nephew was adopted by an American doctor. His grandfather, who is now dead, permitted it through misplaced gratitude, as the foreigner had saved

his life. I have not seen the child since he was a baby, but a friend of mine, Tung Yung, has kept a close watch, and through him I have learned that my sister's son has had all the culture America is capable of bestowing, and his Chinese blood has enabled him to capture the greatest honors of Europe."

"Honors, you say, Uncle?"

"Yes; did you not read?"
(To be continued.)

Royal Marriage Raises Question of Age to Wed.

The Duke of York's marriage has stirred up a discussion as to what is the proper age for marrying, says a London despatch. Most critics think that the Duke, who is 27 and the Duchess who is 22, hit the ideal age. Others point out that any age is the right one provided you have a sufficiently bulky bank account.

The Bishop of Wexford and Dean of Durham advises young people not to marry until they can bring up a family, but he adds: "Yet early marriages are often safeguards against temptation and also motives for industry."

Coulson Kernahan, a well known writer, says a man should wait until he knows a girl long enough to know her well, adding: "Remember Heine's saying about the frogs that would have liked some water well enough but they thought twice before jumping into a well because they knew that once they were in they could not get out. Heine, of course, had forgotten about the divorce court, but to future divorcees I decline to give advice. They will get that, if they can afford it, from the lawyers."

The Rev. Dimsdale Young, a popular preacher, favors youthful marriages because "the divorce courts see less of people who marry early than of those who are supposed to be more prudent. Too many people mistake selfishness in this matter for prudence. They want a large income and an easy time."

Joseph Hocking, novelist, believes 22 for the man and 19 for the girl to be the ideal ages, provided the man can support his wife decently. "Most of the troubles of married life result from financial difficulty," he says, "and this arises generally because there has been no consideration of the financial question."

Preparations for the opening ceremony of the Banff-Windermere motor road over the Central Rockies are being rapidly advanced and it is expected that the new motor camping ground near Banff as well as the other camp grounds along the road will be ready by June 15 in good time for the opening on June 30. The Banff camp, situated near Mount Rundle, when completed will be one of the best equipped in the Dominion. It will be lighted by electricity and water from the Banff system will be piped to the grounds. Culinary, lavatory and telephone conveniences will be provided. A caretaker will be in charge throughout the season and the camp will be subject to inspection by the sanitary officer. In all there will be about 250 lots for campers.

Canadian Federal Government Bonds

Of recent years United States investment in Canada has made great strides in overtaking British, and a favorite form of such investment has been in the purchase of bonds. As recently noted, the year 1922 set up a record for American bond investment in Canada, the total of Canadian bond sales in the United States being over \$261,000,000. This centering of interest upon the securities of the Federal Government, provinces, municipalities and corporations on the part of investors all over the United States has been one of the most notable developments of recent years in Canadian financial circles, and the greater absorption exhibited each year by the Republic is the clearest proof of the increasing favor of Canadian securities for investment.

Canadian Federal Government bonds have come to be regarded in the United States and elsewhere as the soundest and most reliable, as well as a reasonably profitable form of investment. This is based on a clear conception of Canadian status. Back of them is Canadian tradition of honest and square business dealing, the vast magnitude of untouched natural resources, and that persistent faith in their ultimate prosperous development. All these things make Federal Government bond issues one of the safest and most reliable forms of investment.

Of provincial bonds it was recently pointed out by the United States Investor that no province of Canada has ever yet defaulted on either the interest or the principal of its obligations, a record many degrees superior to that of the various states of the

Union. Despite the serious economic upheaval of the war years and the post-war adjustment period, the provinces have managed to maintain their record to keep true to debt obligations, and United States authorities commend provincial bonds for the investment of their countrymen.

The record behind municipal bonds is good. There is no long list of repudiated debts such as one finds on the score of some Western and Southern states. The same authority in discussing this phase of bond issue finds a good deal of reason for commending the record which municipalities of Canada have made when consideration is given to the strain and stress through which the Dominion had to pass as a partner in the war. It is pointed out that only a few small communities of Western Canada had difficulties in meeting their bond obligations, and then only when crop troubles have occurred. In these instances there has been a determination exhibited on the part of Canadian bond houses to see that matters are rectified, and these minor defaults were adjusted.

Many investors purchase such bonds on the advice of their bankers or brokers. Others requiring personal satisfaction and assurance have made it a point to visit Canada and investigate conditions for themselves. It is significant that many of these latter are so impressed with all that they see and derive such assurance from their investigations that they thereafter insist on Canadian bonds and extend or limit their investing field to the Dominion.

Forest Protection.

The forests comprise one of Canada's greatest resources. They are exposed to several dangers, the chief of which is fire. Nearly all forest fires are caused by human agency, therefore they can be stopped by carefulness. Those whose business takes them into the forest need to remind themselves that their livelihood, in no small degree, depends upon their care with fire. Those who go into the woods for recreation and sport should consider themselves honorary fire-wardens, and even those who never enter the forest can do much by helping to strengthen the force of public opinion which is probably the most powerful single factor in preventing forest fires.

And Therefore—

Two young surveyors working in a Louisiana swamp spied what they at first thought was a hoop snake; but at second glance they saw that two snakes, each with the other's tail in its mouth, were strenuously trying to swallow each other.

"On reaching camp that night, they told their snake story to the cook, a gray-haired veteran of the swamps.

"That was a mighty curious sight, boys," said the old man, "a mighty curious sight. I reckon you wouldn't have believed it if you hadn't seen it, would you?"

"Probably not," agreed the boys. "Well," said the old man, "I didn't see it."

British Government Buys Stock.

One way in which the British government promotes private business is by buying stock in it. The government, proceeding openly with its trading, asks Parliament for authority to make whatever purchases it thinks the public interests call for. Some of the investments have not been profitable, but such large earnings as have come from the Suez Canal and the Anglo-Persian Oil Company more than cover all the losses in other ventures.

Some Job.

Teacher—"Now, Charles, you may go through the Old Testament and find the story of the man who showed such wonderful patience."

Charles—"That's some Job!"

Forest Fires and Unemployment

That unemployed workmen are walking the streets of Ottawa and Hull today because forest fires set by thoughtless citizens have made the water powers of the Chaudiere mills no longer reliable, is the statement of Mr. Robson Black, manager of the Canadian Forestry Association, in an interview.

"A great part of the forest destruction on the numerous waterheds drained by the Ottawa has been unnecessary. The axe has not taken one tree to ten killed by fire. In very few cases of careful logging does the operation seriously affect the storage capacity of the region, but when fire comes and the soil is swept bare, the 'run off' amounts to a torrent in spring-time and but little water is available at the seasons when the turbines most require it.

"Because timber regions were burned down by campers, settlers, pros-

pectors and others in the upper waters of the Ottawa, some of the chief local industries have been forced to buy part of their pulp from Eastern Quebec at double the price at which they could manufacture the same article, and Ottawa employees are therefore out of a job.

"A pulp and paper mill is just the agent of the forest. To kill a forest by careless acts with fire is a body blow at the security of water powers and the raw material on which the mill exists and pays wages. Every forest fire must be paid for and we see who actually does pay the price when workmen are turned loose. Prospector searching for non-existing minerals destroyed twenty years' supply of pulp-wood for one Ottawa company. Such acts of legalized vandalism will do more to send skilled workmen to the United States than can be counteracted by any quantity of immigration propaganda."

—AND THE WORST IS YET TO COME

BUILDING AIRPLANES IN THE DOMINION

DEPARTMENT OF DEFENCE ORDERS EIGHT.

Use of Aircraft in Canada Extending Rapidly as Value is Proved in Many Directions.

The development of commercial aviation in Canada, the general use made of the plane by various government bodies as well as large private corporations, and the fact that the machine of the air is peculiarly adapted to Canadian conditions of wide spaces, great distances and unpeopled wastes, made it inevitable that sooner or later the Dominion enter itself into the construction of its own air machines. Hitherto the aeroplanes used throughout Canada have roughly originated almost equally in the United States and the British Isles, but now Canada is to have her own plane, constructed on Canadian soil, utilizing Canadian labor and built for the greater part from Canadian materials.

Recently the Canadian Government Department of National Defence placed an order with Canadian Vickers at Montreal for eight "Viking" Amphibian planes, two of which were to be built in England and six in Canada. This signaled the commencement of commercial aeroplane construction in Canada, a relatively small beginning, which is, however, bound to develop with the diffused knowledge that Canadians can procure their own domestically constructed machines, obviating the different tariffs, and one from which great developments are anticipated and are indeed assured. Even such a beginning entails the extension of plant operations to the engagement of an additional two hundred persons or so, approximately one-third of whom are skilled workers.

An All-Canadian Plane Soon.

A virtual specialization is being made in the construction of what is known as the "Viking" Amphibian plane as being most excellently adapted to all the various uses to which a plane is put in Canada. Its features enable it to rise from or alight on land and water equally well, whilst a further development comprises the attachment of skis, which permit of the uninterrupted use of the machine through the winter months. In its all-

round purposes it is most admirably suited to Canada's varied topographical and climatic conditions, to stretches of prairie, lake and woodland, and winter snows.

At the present time only the woods used in the construction are Canadian products or the products of Canadian labor, and it is found necessary to import the metal used in building and the engines installed. Gradually, however, it is anticipated that the necessity of importing metal parts will be eliminated, and that within a short time the complete construction, with the exception of the engine, will be accomplished in Canada with Canadian products. The use of a Canadian-built engine is a plan of the more distant future, and the ultimate construction of a machine essentially Canadian in every respect is in prospect.

Logical Country for Aeroplanes.

It is pointed out by experts that Canada is a logical location for the establishment of a substantial and prosperous aeroplane manufacturing industry, possibly the only country where such an industry might thrive without a government subsidy. General Canadian conditions justify and demand a greater utilization of aircraft than perhaps any other country. In even the developed sections of the country one can see the justification of their services for years to come, whilst a large portion of the northern territory will be for all time the aeroplane's territory.

The use of aircraft in Canada is extending rapidly. Governments have proved their value in forest patrol, in fire fighting, in geological surveys, and a hundred other uses. Pulp and paper companies are every day discovering new values in their services. The country possesses an army of trained experts to take charge of additions to her fleets, and now the one quality which was missing, a Canadian-built aeroplane, is to be supplied.

The Dog.

The Almighty, who gave the dog to be the companion of our pleasures and our toils, hath invested him with a nature noble and incapable of deceit. He forgets neither friend nor foe, remembers with accuracy both benefit and injury. He hath a share of man's intelligence, but no share of man's falsehood. You may bribe an assassin to slay a man, or a witness to take away his life by a false accusation, but you cannot make a dog tear his benefactor. —Sir Walter Scott.

Avoid the pleasure that holds the penalty of future pain.

BETSY AND I ARE GOING TO KILL ANOTHER BEAR.

—From the Detroit News

Canada at the Empire Exhibition

The plans for Canada's participation in the British Empire Exhibition, to be held in London, England, from April 20 to October 31, 1924, are practically completed. The Dominion Government will erect its own building—an imposing structure in Neo-Grec architecture—on a commanding site in Wembley Park, where the Exhibition is to be held. Work on the erection of the building is to commence this summer, and all the details connected with this great enterprise will be completed when the Exhibition is opened to the public on April 20, 1924.

The building will be 415 feet long and 300 feet wide, with a floor space of 124,500 square feet, and in it, through the medium of attractive displays and exhibits, visitors will have an opportunity to learn in an engaging and impressive way something of the great natural resources of Canada, the products of the soil, and the wide range of manufactured articles made within the Dominion. The resources and products of each of the nine provinces and the two territories will be displayed. The Canadian exhibit is to be financed, controlled and directed by

the Dominion Government. The estimated cost is \$1,000,000.

On the same site as the Canadian Government building will be built two additional buildings, to be built by the Canadian National Railways and the Canadian Pacific Railway, each with a floor space of approximately 10,000 feet. In these buildings Canada's two great transportation organizations will show the attractions and resources of the country served by their railway lines. Plans for all three buildings have been approved by both the Dominion Government and the official architects for the Exhibition. When completed these structures will be so prominently located as to be readily seen from any part of the spacious grounds set apart for the Exhibition.

Wembley Park has been chosen as the site of the Exhibition on account of its remarkable accessibility from all parts of London. It is fifteen minutes' ride by the "tube" from Trafalgar Square, the most central point in the Metropolis of the Empire.

Every part of the British Empire will be represented at this great exhibition, which, it is expected, will be attended by millions of visitors from all parts of the world.

CANADA'S MICA MOST USEFUL OF MINERALS

ONTARIO, QUEBEC AND BRITISH COLUMBIA YIELD.

Heat-resisting Qualities Render it Effective Insulator and Lubricant.

Mica is one of the most useful of minerals, the production and distribution of which is little known, says the Natural Resources Intelligence Service of the Department of the Interior, Canada. Of the many varieties, only three are of commercial importance, and of these but two are available in any quantity—muscovite, or white mica, and the phlogopite, an amber mica. The latter is the most important of the Canadian micas.

India is the largest producer of mica, providing over fifty per cent. of the world's supply. Canada produces about 25 per cent., and the United States and other countries the remainder.

In Canada, mica occurs pretty generally. The most productive areas are situated along the lower St. Lawrence below Quebec, north of the Ottawa near Mattawa, and in the townships of Burgess in Leeds county, Lanark in Lanark county, and Loughborough in Frontenac county, also in a few areas in British Columbia. The production of 1922 amounted to 3,543 tons and was valued at \$129,280.

Difficulties of Mining.

Mica mining is attended with many difficulties. For successful exploitation it is essential that the miners be experienced in the mining of the material, and be familiar with the special conditions and problems it presents. Many good mica deposits have been abandoned on account of the lack of experience of the operators.

The general run of mine mica is of a small size. A very small percentage produces sheets of 4 by 6 inch surface, while fully fifty per cent. will cut to 1 by 3 inch sheets only. Fortunately, a process of cementing the small sheets enables the building up of larger surfaces. This product is known as "micantite" or mica board, and is mostly used in the electrical industry for insulation. Mica is largely used in the manufacture of boiler and steam pipe covering, its insulating properties exceeding by far that of any other known substance. Comparative tests have demonstrated that the loss of heat from bare pipes has been reduced by 90 per cent. when the pipes were enclosed in mica covering.

Owing to its resistance to shock mica is used for spectacles or goggles worn by workmen in industries where flying chips or sparks endanger the eyes, and in observing processes of melting and fusing in furnaces. The small pieces of mica, formerly wasted, are now used for various purposes. When ground fine in oil, mica forms a valuable lubricant, especially for shafting or journal boxes on locomotives or railway cars. Ground mica, when mixed with a flux, is also used in giving to wall-paper and other substances a silvery effect.

So many uses are being found for mica that what was formerly an industry with a very large proportion of waste, is now one in which the material is almost completely utilized.

He—"Do you object to kissing?" She—"Yes, but I don't object to being kissed."

Parents should do some preliminary work before engaging a music teacher for the child. The first step of preparation should be in babyhood when the mother sings her child to sleep. This first pouring melody into the ear of the child creates an early love for music. Later on the parent should play little tuneful compositions for the child, also pieces in march or dance form to impress time and rhythm. All children enjoy this very much.

Fixing the Limit.

The Chorus Lady—"Do your favor long engagements?"

The Screen Star—"It depends on circumstances. An engagement should last as long as the man's money holds out."

Sleeping Flowers Give Clue to New Anesthetic.

Florists' complaints that carnations curled up their petals and "went to sleep" when placed in some greenhouses, led to the discovery of a new anesthetic. Investigating the drowsiness of the flowers, it was discovered that it was caused by leaky fixtures permitting illuminating gas, which contains 4 per cent. of ethylene, to escape. It was only recently, however, that Dr. A. B. Luckhardt and J. B. Carter tested the effects of this gas as an anesthetic at the University of Chicago, finding that it renders human beings and animals unconscious pleasantly and causes no bad after effects of any kind so far as can be determined.

Here's An Office Boy With Bright Future.

Harry Brulaw, a 14-year-old Liverpool office boy, has a bright future ahead of him, says a London despatch. He has been overwhelmed with offers of employment following his employer's report of him at an insurance convention.

A solemn looking man entered the Liverpool office, the employer stated. The boy asked him what he could do for him in the nature of insurance—fire, life, accident or automobile. "Can you insure the immortal soul?" the visitor asked gloomily. "I am not sure," the boy replied. "Just a moment and I'll ask the manager of the fire department."

He Had Held His Own.

Two middle-aged gentlemen paused on the bank of the pond to watch the crowd of merry skaters circle round. "I'd like to join them mighty well," said Mr. Rich to his companion. "I haven't had a skate on my foot for more than twenty years, though, and I expect I'd look pretty silly."

"Well, I don't know," replied Mr. Little. "I haven't worn skates for longer than that, but I believe I could skate to-day just as well as I could when I was twenty years old."

"Oh, come now," replied his friend. "You're an active enough man, but it's absurd to say that you could go out there and skate as well as you could when you were a boy!"

"I think I could," persisted Mr. Little mildly. "I couldn't skate at all then, and I guess I could do quite as well now."

Only too often we hunt the world for happiness when its well-springs are within ourselves.

When the air is moist enough a temperature of 68 degrees is considered ideal for the human body.

PROVINCIAL BANK

OF CANADA

Capital Authorized: \$5,000,000.00
Capital paid up: \$3,000,000.00
Reserve Fund and Accumulated Profits: \$1,525,000.00

FOR SALE.—A light runabout buggy, rubber tires, made by McLaughlin, used very little. Apply to Dr. Higginson, Hawkesbury, Ont.

FOR SALE.—Used Ford car in good running order for sale cheap. Apply to Camille Couvrette, at Philias Mason's, Lachute, Quebec.

Mr. A. Lamarche wishes to inform the public that he is agent for the Canada Cement Co., and any persons wanting cement will do well to call up A. Lamarche, St. Philippe, or Telephone 158 r 1-3. A car load just in.

Mr. Ross Muir, of Michigan, and Mr. George Muir, of Montreal, are spending a two weeks holiday at home with their parents.

Mr. Ian Hay and Mr. Douglas McQuat, of Lachute, also Mrs. P. Ross, Miss A. Morrin and Mrs. Vandyke, of Montreal, motored to Dunham last week to attend the closing at the St. Helen's College, also visited Cowansville and other towns, returning home Sunday after spending a very pleasant holiday.

S.S. PICNIC.

Saturday afternoon last turned out to be an ideal day for the Baptist S.S. Picnic, which was held in Patterson's Grove. During the morning there was great disappointment among the kiddies, who look forward so to their annual treat, on account of the heavy rain, but shortly after dinner the sun came out, and the scholars soon gathered together. Games were indulged in and a most enjoyable time spent by all.

If you are travelling this summer, make your bookings through the Watchman Office. We procure passports and make all arrangements as we are agents for the Canadian Pacific, White Star, Anchor, Donaldson and Canadian Steamships. Particulars made known on application. Phone 27.

CO-OPERATION NECESSARY.

During the past two weeks, Lachute has had the pleasure of a visit from several residents, who have been both surprised and delighted at the wonderful improvements which have been made to the town. They have admired its good roads, its clean streets, its cement walks, its gardens, lawns, trees etc., all tending to make Lachute one of the prettiest towns in the province. Of course their greatest admiration has been reserved for the splendid manner in which the Lachute Protestant Cemetery is maintained, and the "beauty spot" now being created on the site of the old Court House, now known as the "Memorial Park." This park is beginning to show the results of the skill, care and hard work expended upon it. If it can be preserved intact for a few years more, it will indeed be a most beautiful spot. To do this, the Town authorities must see to it that every effort be made to prevent any injury to the plants, shrubs, flowers and grass, etc., either by straying animals or mischievous fingers.

To accomplish this, it should be made very plain that any infraction of the by-laws of the Town in this respect will be treated with the greatest severity. There is a force, however, greater and more powerful than laws or the strict enforcement of the same, that is the force of public opinion. The town has the right to expect the active co-operation of the clergy, the heads of our educational institutions, our large employers of labor, parents, and in fact the citizens generally. We do believe that every citizen worthy of the name, desires to assist in this matter. The park is a "Memorial Park" and any act of vandalism therein is an insult to the memory of the men whose names appear on the monument. No person would, either by design or unwittingly, desecrate a cemetery, and no person, who realizes this, would willingly injure the park. Let us all then, spare no effort to educate our children to so regard it.

Bowling at Brownsburg. The Bowling Team of the Arlington Co. of Montreal, paid a visit to Brownsburg on Friday last, for the purpose of meeting in a friendly game. The team of the D.C.Co., two very interesting games were rolled which resulted in wins for the D.C.C.

A BREEZE FROM THE WEST.

I promised you a short article about things in British Columbia. I suppose your readers would be more interested in hearing about the prospects of making a living there than about the attractions for tourists—that they would prefer a discussion of the questions: "Can one make a good living?" and "Is it a desirable place in which to make one's home?"

(1) There has been a good deal of pessimistic talk lately about B.C., but, according to statements recently made by the B.C. Minister of Lands, there is little justification for such talk. He says that in the last twenty years the population has tripled itself and that the value of agricultural production has grown from twenty million dollars to sixty millions annually.

However, it is a known fact that the fruit grower's position has been extremely difficult during the last few years. Many say they have not been able to make it pay. Doubtless some of the growers themselves have been partly to blame in growing varieties for which there was no demand, for marketing apples at the wrong time etc.; but, after allowing for all such faults, there is still something wrong.

I live in a fruit district, and the chief complaint there seems to be the excessive freight rates. One man is said to have noticed about fourteen cents a box for apples which probably sold for \$1.50 a box. The same trouble applies to other farm produce.

The great trouble, however, seems to be the lack of system in marketing fruit. The growers have not been co-operating. This year, however, a province wide scheme of co-operation has been started that will no doubt do much to overcome the difficulty.

It has been stated that sometimes, under the old plan, one or two car loads of fruit would land at some small town which could not use more than half a car or less, while none at all would reach other places which could use one or two car loads. Individual growers seemed to be seeking their own interests regardless of others. Some may do well this way for a while. But it seems to me like playing a game of lacrosse or football. If you wish to get the best results for all concerned, you must cut out the grand stand play and act in combination. Or it is something like the situation in the late war—so long as the allied forces acted independently the general results were far from satisfactory, but from the time when they all began to act under one head, the tide turned in their favor.

Whether the freight rates will be reduced or not in B.C., remains to be seen. The Premier of the province has been striving for some time to get them reduced.

The prairie provinces are the great market for B.C. fruit and B.C. can always raise enough to supply the prairies, if she can only overcome the freight rates and marketing difficulties.

(2) The Liquor Question has much to do with making any locality desirable or undesirable as a place in which to locate a home.

The people of B.C. realize this and are anxious to have good liquor laws. During and after the war, B.C. was under prohibition, but towards the end of the period the enforcement of it was so slack as to make it a farce. About two years ago the Liberal Government offered the people of B.C. their choice of prohibition as it was at the time or of Government Control. The people had become so heartily disgusted with the way in which prohibition was being enforced that the great majority voted for Government Control.

Many of us think that this was not a fair choice to offer—we think the ballots should have read "Real Prohibition of Government Control." The prohibition leaders urged the electors to retain the defective prohibition system, because the Federal Government had promised to prohibit importation into any province under prohibition. But the mass of voters were stampeded into government control.

Whether the present system is satisfactory or not has not yet been fully proved. Many claim that things are worse than ever. The next election will doubtless show what the people think of it.

Many of us think government control is wrong in principle, and that the duty of a government is not to act, the part of a liquor seller, but to curtail and eliminate in every way possible the evils of the traffic.

There has been a great deal of bootlegging and drunkenness under government control. Things might be better if the Federal Government would stop the importation of liquor into B.C. and so give the Provincial Government complete control.

The questions of Education and of church life and work also have a great deal to do with making any place desirable for locating a home. I may deal with these in a later article.

Yours truly,
J. Barron.

FOR SALE.—At a sacrifice to first buyer, 1 Massey Harris 60 bush manure spreader, 1 Massey Harris No. 6 ensilage blower, 1 Massey Harris feed cutter large one, 1 one side delivery rake, 1 dane hay loader, 1 Massey Harris grubber, 1 grubber and 2 rowed corn cultivator complete, 1 8 H.P. steam engine, 1 2 rowed turnip seeder, 1 large basket hay rack, 1 6 ft McCormick grain binder, 3 pair heavy new logging sleighs, 1 tumbler big body with axle only. All to be sold at once and cheap. Proprietor J. F. Owens.

PUBLIC NOTICE is hereby given that the undermentioned LANDS and TENEMENTS have been seized, and will be sold at the respective times and places mentioned below.

FIERI FACIAS DE TERRIS. Magistrate's Court of the district of Quebec.

Canada, Province of Quebec, District of Quebec, No. 5963.

THE MOLSON'S BANK, Plaintiff, vs SAM RABINOVICH et al, defendants.

As belonging to the said defendant Sam Rabinovich, the following immovables, to wit: A farm situated in the parish of Sainte Sophie, county of Terrebonne, composed as follows: 1. Of a piece of land of irregular form composed of part of the lots numbers seventy one and seventy two (Pt. 71 and 72) on the official plan and book of reference of the said parish of Sainte Sophie, without warranty as to precise measurement and without buildings; bounded the north by the Great Northern Railway, towards the east by the numbers six, nine (No. 69) towards the south by number seventy three (No. 73) and the part of the said number 72 on the said official plan and book of reference;

2. Of a lot land numbered and designated under number sixty nine (69) on the said official plan and book of reference—without buildings. It is however abstracted and will not make part of this sale the cheese and butter factory and accessories and a piece of land on which said factory is built and to communicate to the said factory, containing two arpents in width at the road by sufficient depth to go forty feet behind the said factory; bounded the said lot of land, on one side by the river, and on the other side and in rear by part of the said number 72 and in front by a public highway road.

It is also abstracted and will not make part of this sale, a piece of land situated on the south-easterly side of the said line of Railway, containing one arpent and a quarter in width by four arpents in depth; bounded on the north-west side by the land aforesaid described and presently

sold and in rear by the south-east boundary line of said lot No. 72; his piece of land of five acres, located now to Sam Sookeranski or not, situated by a deed registered in the registry office of the county of Terrebonne under No. 52459.

A piece of land situated in the village of Sainte Sophie, known and designated on the official plan and in the book of reference made for the said parish of Sainte Sophie under the lot number one hundred and seventy four (174)—with house and buildings thereon erected and made. To be sold at the door of the Catholic parochial church of Sainte Sophie, county and district of Terrebonne, the TENTH day of JULY, one thousand nine hundred and twenty three, at TWO o'clock in the afternoon (standard time). Sheriff's office. J. W. CYR.

an Ice Cream Social on Mr. Salter
Clark's lawn, Hill Head, on Saturday
evening, June 30th. There will also
be a table of Home-Made cooking
and candy for sale. Admission, in-
cluding ice cream and cake, Adults
35cets, children 20cets.

A BOON TO YOUR CAR.

Have you seen the Fan Flame?
The world's greatest and best Spark
Plug that revolves under compres-
sion and has a revolving fan that
produces a shower of hot, fat sparks
to ignite every particle of gasoline.
Saves gas, and is a perfect marvel
in increase of power and speed. Mr.
P. Chabot has the agency for this
county and will be pleased to give
any information.

NOTICE

The Laurentian Ayrshire Breeders
Club will hold a Field Day and
Basket Picnic at St. Sulpice Farm,
Oka, on Wednesday, July 4th. Every-
body welcome. President, C. R.
Rodger; Secretary, Alex. F. Bothwell.

FOR SALE.—A yearling Grade Ayr-
shire Bull. Good thrifty animal
and priced right. Apply to Robt.
Boa, R.R. No. 3, Lachute Phone
155 r 4.

Watch and Clock Specialist.

Bring your repairs to Mr. Joseph
Belanger who will do all your work
in prompt order, but he wishes to
say that he will be in his shop on
Thursday, Friday and Saturday
only of each week, so you will
please take note.

LOCAL NEWS.

Mr. and Mrs. Henry Lavigne spent
Sunday in Montreal.

Mrs. Hunter, of Montreal, spent
a few days in town this week.

Mrs. Robert Kyle, of Long Lake
is visiting friends in Montreal.

Miss Edna Thompson spent the
week-end with friends in St. Canute.

The many friends of Dr. Cassidy
are pleased to see him in town again.

Miss Wilhemina Shaw of Montreal
was the week-end guest of her par-
ents.

Miss Maud Dobbie is home from
Farnham to spend the summer vaca-
tion.

Mrs. Dan Joss and daughters are
now occupying their summer home at
Clear Lake.

Mrs. Omer Paquette spent a few
days this week visiting friends at
Ste. Jerome.

Mr. Alex. Graham, of Arundel, is
the guest of Mr. Alex. Pollock for a
few weeks.

Miss White, of Hamilton, is the
guest of her mother Mrs. Robt. Cres-
well this week.

Mrs. Victor Prophet and son, of
Calumet, were the week-end guests
of Mrs. M. Jones.

Mr. and Mrs. Whaley, of Notre
Dame de Grace, were guests of Mrs.
A. Beers this week.

Mrs. Duffghe, of Montreal, is spend-
ing the season at Lakefield the guest
of Mrs. Wm. Evans.

Mr. Smith, Inspector of Molson's
Bank at Montreal Head Office, was
in town this week.

Miss Armandine Legault, of St.
Hermas, has passed her English and
French examinations with high hon-
our.

Miss Milly Davis of Ottawa and
Mrs. Arthur Davis, of Morin Heights,
were guests of Mrs. Wm. Deacon this
week.

Mr. Adolphe Raymond has purchas-
ed a new five passenger touring Mc-
Laughlin from Messrs. Larocque and
Chabot.

Miss Ethel Morrison of Montreal
is spending her holidays the guest
of her parents Mr. and Mrs. T. B.
Morrison.

Mr. and Mrs. L. Lavigne, of Ot-
tawa, and Mr. and Mrs. A. Lavigne,
of Chicago, were the week-end guests
of Mr. Jos. Lavigne.

Mrs. J. Connelly and children and
her mother Mrs. Carpenter, of Brown-
sburg, left on Tuesday to spend a
few months in Winnipeg.

Mrs. Goodwin and Mrs. Andrew
Brown, of Dunany, were in Montreal
on Saturday last attending the fun-
eral of their brother Mr. Wm. Henry
Belair.

Miss Lucy Morrison of Montreal
accompanied by her sister Miss Olive
Morrison have gone to spend the sum-
mer with friends in the Western
Provinces.

Mr. Louis Joseph has successfully
passed his B. L., and his brother
Henri taken his B. A., in the Montreal
University, both being the sons of
Dr. Rodrigue.

The many friends of Miss Ethel
Winters, will be sorry to hear she
was taken suddenly ill on Tuesday
and removed to Montreal to undergo
an operation for appendicitis.

Mr. Colin C. Stewart, B.A., son of
Prof. Colin C. Stewart, of Dartmouth
Medical School, has been here visit-
ing his grandmother and left on Wed-
nesday morning for a trip to the
Old Country.

Mr. and Mrs. R. E. Macfie and
family, of Montreal, also Mr. Neil
and Miss Muriel Anderson were week-
end guests of Mr. and Mrs. James
Anderson, Mrs. Macfie remaining un-
til Thursday.

Mrs. Geo. Colbourne, Mrs. Eva and
Miss Lawrence Wilson, motored to
Montreal on Friday last from Brown-
burg and after spending a pleasant
visit with friends, they returned home
by train on Monday.

During our trip last week we had
the pleasure of stopping off at New
Glasgow, N.B., where we ran in to
see the Rev. and Mrs. J. L. George,
who were delighted to have had us
call on them, and they wished to be
remembered to their many friends.

Miss Una H. Townsend, and her
brother Master Russell, of Hamilton,
Ont., formerly of Cushing, returned
home this week after spending
a pleasant holiday with their grand-
parents Mr. and Mrs. Wm. Kerr, of
Cushing, and renewing acquaintance
with their many old friends.

Some day there will be a serious
accident on the streets of our town
if the speeding automobiles are al-
lowed their flying. There are just
a few of those who should know
better that wilfully persist in driv-
ing their cars with reckless speed.
The authorities should see that these
parties are brought to justice before
harm is done. It's no good crying
after. Now is the time.

Miss J. Bradley is visiting friends
in St. Amede.

Mrs. T. Christie spent a few days
in Montreal this week.

Miss Cook of Montreal was a re-
cent guest of the Misses Barron.

Mrs. R. Miller and son spent a
few days in Montreal this week.

Miss Hendry, of Magog is the guest
of Mrs. Robt. McArthur this week.

Mrs. Floyd and infant, of Verden,
were week-end guests of Mrs. Sim-
on.

Mr. and Mrs. John Weldon, of
Granville, were recent guests of Mrs.
Noble.

Mr. Reg. Hendry, of Montreal, was
the week-end guest of Mrs. Geo.
Christie.

Mr. W. Banford returned this week
from a pleasant trip to New York
and Schenectady.

Miss Viola Ball of Ottawa was the
guest of her uncle Mr. W. A. Ball
for the week-end.

Mrs. Robt. Wilson and Mr. Geo.
Wilson, of Montreal, were week-end
guests at Maple Grove, Brownsburg.

Mr. and Mrs. Harry Ward and
daughter and son are spending a
few days in Montreal.

Master William Wylie is leaving
this week for Cornwall, Ont., where
he will spend a two month's vaca-
tion.

Mr. and Mrs. Henry Reilly and
Willie Reilly, of Lachute, visited
friends in Thomas' Gore on Sunday
last.

Mrs. W. J. Lister, of Thomas' Gore,
was the welcome guest of her
sister Mrs. H. Reilly the past few
days.

Mrs. Albert Tomalty, of Lakefield,
is attending the Women's Institute
Convention at MacDonald College this
week.

Mrs. D. Currie and Miss Grace
Marshall, of Notre Dame de Grace,
were recent guests of Mrs. Jas. Mc-
Kimmie.

Mr. and Mrs. Jas. Arnold, of Gren-
ville, who have been spending the
last few months at Moncton, N.B.,
returned home this week.

Mrs. Weeks and little daughter re-
turned to Montreal on Sunday after
spending a pleasant week as the
guests of Mrs. Wood, Bethany.

Come and spend a pleasant even-
ing and take supper with the Pres-
byterian at St. Andrews East, on
Saturday evening, July 7th. Lots of
fun and a good programme for 50cets.

Mr. and Mrs. G. Arnold, of Gren-
ville, Mr. Wallace Huntley, of Los
Angeles, and Dr. Edgar Brunau, of
Montreal were guests of Mrs. Jousse
this week.

The Ladies of the Brownsburg
Presbyterian Church are holding an
Ice Cream Social and Sale of Towels,
Hdkfs, and fancy articles on Thurs-
day evening, Aug. 2nd. Keep the
date open. See posters later.

Miss Annie Hume had a pleasant
week visiting friends in Chambly and
Longueuil. Miss Anabel Hume re-
turned home on Tuesday after spend-
ing a year at Longueuil High School
and was accompanied by her friend
Miss Hayline Boxley.

Misses Fernande and Gilberte Lem-
ay went to Montreal to pass their
music examinations. They obtained
their diplomas of superior course.
We offer our congratulations to Miss
Fernade for having won the gold
medal.

During the month of June over
7,500 lbs. of wool were collected at
various points in Argenteuil County,
and shipped to The Canadian Co-
operative Wool Growers Ltd. at Len-
noxville, Que. The County Agrom-
nist, Mr. A. Bothwell had charge of
the work this year.

The Annual Midsummer Sale and
Supper of the Presbyterian Church,
St. Andrews East, will be held in the
Town Hall, Saturday evening, July
7th. Good supper and a good pro-
gramme will be given all for 50cets.
Supper served from 6 to 8. The St.
Laurent Dramatic Club will provide
the evenings entertainment.

A Happy Reunion was held this
week at the home of Mr. and Mrs.
Henry Sutton when 4 brothers who
had not met for 15 years, spent a
few days together. These were Mr.
and Mrs. Alex. Sutton, Mr. and Mrs.
Tom Sutton and Mr. and Mrs. Robt.
Sutton who with their families
motored from Sault Ste. Marie, other
guests were Mr. John Riley, of Mil-
brook, Ont., Mr. and Mrs. Jim. Cur-
ran, of Ste. Amede, Mr. and Mrs.
Wm. Sutton, of Ottawa, Mr. and Mrs.
Cooke and Miss Hilda Sutton of
Montreal, and Miss Bella Duncan of
Brownsburg.

The visitors from Sault Ste. Mar-
ie accompanied by Mr. and Mrs. H.
Sutton, Mrs. John Riley, Mrs. Thea.
Noble, and Mr. Clarence Elliott,
spent Monday visiting their old home
at Lake Louise the guests of Mr. W.
J. Boyd, and after visiting friends
in Montreal returned home on Wed-
nesday.

Men's Ready-to-Wear!

Our New Suits for Men are now in stock at prices running from
\$12.00 to \$5.00

Choice patterns in Greys and Browns are in all sizes now.
We have a very full line of Indigo Blue Suits also.
These all are at prices that will surprise you considering the quality.
We are selling these goods at lowest profits in our history.

Come in and try one on.

FOUR WAYS TO GET EGGS WHEN PRICES ARE HIGHER.

I suppose we all think sometimes that our hens are determined to lay all the eggs they can when eggs are cheap, and out of contrariness take vacations when eggs are high.

It is true that hens do lay more eggs when hen fruit is cheap, and fewer when it is high. But the reason is that when everybody's hens are shelling out eggs the price goes down because there are lots of eggs. And when production slows up, naturally the price becomes greater.

I am not going to promise that you can make hens lay most heavily when prices are high and less when eggs are low. But I will say that it is wholly possible by careful, sensible management to get more eggs than usual during the later summer months, when eggs are always higher. I am going to mention four plans that I have found by experience will bring more eggs during those months.

Four reasons for the usual summer slackening of egg production are:

1. Broodiness.
2. Parasites.
3. Poorly balanced rations, during the spring as well as in the summer.
4. Heavy laying in spring that lowers the hen's vitality.

So, if we are going to get more higher priced eggs in July and August, these are our problems. The solutions may not be exactly easy, but my experience has shown me that enough can be accomplished to make the effort very profitable indeed.

The slump in egg prices, which usually continues through April and May, by July generally changes to an upward tendency, with higher prices from then on. I am well convinced that it pays to try to manage the flock so that the laying season is lengthened out. Here are the methods I have used to accomplish the purpose:

1. Prevent broodiness.

If checked at the very start, broodiness will affect the egg production but little. But if your hens are allowed to sit a few days and get heated up, it is not only hard to break them, but they are also apt to be through with laying for a long period.

The best and simplest way to make a hen decide she doesn't want to raise a family is to put her in a small crate with a wire or slat bottom. This ventilated bottom allows air to circulate under the hen. She is kept uncomfortable. Still better, hang the crate up by wires so it will swing. Two or three days of this will usually break the most determined hen.

Feed in the crate the regular egg mash, plenty of green food and water. This will tend to keep the hens laying and prevent them from drying up. It is well to go through the hen house every night or so during the late spring and early summer, lifting the hens off the nest and taking them to the crate. After roosting is the best time.

I find this plan far superior to starving hens, which in itself checks production, or by wetting them, or any other commonly practiced plan.

2. Destroy parasites.

Warm weather means more active lice and mites. They sap vitality. Lice and mites are often confused. They are different, and require different treatment. Lice are always on the fowl. They can't live unless they are on the bird, where they breed, hatch, and grow. There are several different kinds of lice, some feeding on the head, others on the neck, some on the back; since their feeding habits are alike, all can be fought alike.

Investigators a few years ago found that sodium fluoride powder was an absolute specific against chicken lice. For about 50 cents a pound your drug-gist will supply the commercial grade—it need not be chemically pure—and a pound will dust at least 200 hens.

I use it this way. I hold the hen by the legs, head down. I rub a pinch of fluoride, held between thumb and index finger, along the base of the tail feathers, around the vent, under each wing, down the back, up the back of the neck and on the back of the head. I usually take three or four pinches for each hen.

Within three or four days it is well to go over every bird. Within a week the lice will be gone. All that hatch from eggs present during the dusting will be killed. In fact, your hens may not be bothered with lice for a year or more.

The mite is a different "critter." It is seldom on the hen except at night, or when she is on her nest. He hides in cracks and corners. Since he does not chew, as does the louse, but sucks blood from the hen by thrusting his bill through the skin, surface poison does not affect him. You have to make it hot for him.

The best method is to clean out all the dirt you possibly can, especially from the corners of nests and roosts, and spray or paint thoroughly with some strong disinfecting solution, usually one with a coal-tar base. A spray or paint that goes into the cracks and lasts for months is best. Especial success often follows application of disinfectants while they are hot.

A good plan to get the internal parasites which are apt to be active at this period, is to feed the hens two per cent by weight of finely ground tobacco stems or leaves—leaves preferred—in the mash feed for ten days. A pound of Epsom salts to every 100 birds, every three days, should be fed while the hens are getting tobacco.

3. Keep the rations right.

Sometimes the flock's yards and ranges get bare and dry in late summer. The hens continue to enjoy a taste for juicy and succulent food. I like to see an arrangement that will keep for the hens a continual growth of green food after the early spring supply is exhausted.

Experiments I have studied convince me that, while a wide variation of formulas for mash feed is possible, it is absolutely essential to maintain the proper proportions of the cardinal factors, such as mineral protein, fibre, and mineral food. Mineral food is extremely important. Whether you use a commercial or a home-mixed mash, the elements of phosphorus, sulphur, and calcium must be present. It is not the exception to find good hens that have stopped laying because of a lack of mineral foods.

4. Regulate the rate of production so as to extend the laying period.

This sounds like a formidable task, but it is simpler than it seems. A hen that lays heavily during the spring may exhaust her vitality and literally "lay herself out." She likely has the capacity to lay a certain number of eggs in a year. If allowed to lay all these eggs in the spring months, little more can be expected of her later. By turning a bucket upside down you can pour out all the water at once. By tipping it gradually, you can take a much longer time to empty it. To an extent you can do the same thing with a hen.

Once hens stop laying it is a hard task to bring them back. It is not uncommon for farm flocks to lay as high as 80 per cent. for short periods. This is dangerous, except perhaps for a highly skilled poultryman. When the flock production begins to reach 50 per cent., 50 eggs a day per 100 hens, it is well to slow them up.

The most effective way I know to do this is to reduce the amount of mash, especially the animal protein element in it, and to increase in direct proportion the scratch feed and the proportion of starch in it. This should be done gradually when production goes over 40 per cent. If the flock will hold between 45 per cent. and 55 per cent. with a heavy feeding of scratch feed, you may be very certain the hens will not lose weight. It is a well-known fact that when a hen begins to lose weight her egg production will quickly begin to drop.

The scratch feed will tend to maintain weight. If production starts to drop below 40 per cent. again, it is time gradually to decrease the scratch feed and to feed more of the mash with animal protein and other egg-building elements.

By following this policy carefully it is possible to extend the egg-laying period so that more eggs will be laid later in the year, when prices get better. It may mean a substantial difference in the year's income from the farm flock. Heavy winter production,

Salving a Tuberculous Dairy Herd

Successful Operation of the "Bang System" at the Central Experimental Farm.

About six years ago, the Central Experimental Farm at Ottawa introduced the Bang System in connection with its dairy herd, which was then undergoing the process of "accreditation." Under this "accredited" system, a herd is tested for tuberculosis every six months, the reacting animals being removed from the herd. When reactors cease to appear under the test, the herd is accredited by certificate as tuberculosis free. Under the Bang System such reactors as are considered sufficiently valuable are segregated and isolated from all contact with other animals, their progeny being added to the main herd. The length of time during which the reactors are retained depends on their age, period of gestation, producing ability and the progress of the disease; but gradually they are eliminated, and in the course of time the Bang herd ceases to exist.

The object in establishing a Bang herd at the Central Experimental Farm was twofold: first, to preserve for breeding purposes a number of exceptionally valuable cows, and second, to demonstrate the value of the Bang System. The segregated animals were isolated in comfortable, well ventilated and properly appointed premises on an adjoining farm some two miles distant from the Central Farm. The cattle were in charge of a skillful herdsman, and were treated in a normal manner in all respects. The maximum number of animals in the Bang herd at any one time was 23 head, while the total number isolated during the whole period was 66 head, and included Holsteins, Ayrshires and Jerseys. All of the cows were of high individual merit and record. Some of them remained in the Bang herd throughout the whole period, others were retained for a short time only.

During the winter the segregated animals were kept inside, but in the summer they were allowed on pasture. The milk was thoroughly pasteurized and separated, the skim-milk being used for feeding hogs and the cream being made into butter. The cows were for the most part bred to reacting sires. When a reacting sire was not available they were bred to another on neutral ground. The calves were removed soon after birth and placed in isolated pens until tested before being allowed to mix with the calves from the healthy herd on the main farm. Of the sixty-six head isolated, 49 gave birth to 80 calves. Of this number 18 died previous to six months of age; 17 at the age of six months or over reacted to the tuberculin test, some of which infection undoubtedly occurred in the main herd, it not yet having been cleaned up; 45 remaining free from the disease. Of the latter, 19 have been sold and 26 retained in the breeding herd.

During the period under review, 51 Bang cows were slaughtered. The majority of these were removed to make room for other and more valuable reactors and comparatively few on account of clinical symptoms of advanced tuberculosis. In the latter class there were not more than six cases. On the other hand, there were a number of cows that had outlived their usefulness but were still in excellent condition, which, upon slaughter and examination, proved to be highly generalized and advanced cases. This goes to prove what has been repeatedly observed, namely, that a cow may be in an advanced stage of tuberculosis and still not show any outward symptoms of the disease. Furthermore, the experience with this herd has shown that a cow may be in an advanced stage of tuberculosis and still produce milk quite heavily and profitably. Another outstanding observation as regards the health of the herd was that quite a large percentage of the cows when slaughtered showed only old calcified lesions, while a few showed two distinct sets of lesions, one old and calcified and the other recent and open. This would go to show that in many cases, nature, assisted by a rugged constitution in the animal, had isolated the infection and thus put the animal in the non-spreader class. The presence of a secondary set of open

lesions in some animals points to re-infection through being stabled with spreader cases.

Some cows that were in the Bang herd for two, three, and even four years, when slaughtered, proved to be but slightly infected, indicating that an animal may be some time developing the disease even when amongst diseased animals and, when eventually infected, may show considerable resistance to the ravages of the disease. On the other hand, among cows in the main herd that reacted and were slaughtered immediately, numerous generalized open cases were found, which goes to show that infection may take place rapidly and run a rapid course. It may be inferred that the rapidity of infection depends on the virulence of the strain of bacteria introduced and on the power of resistance in the animal itself.

Milk and butterfat records were kept of the Bang herd during the entire period. Eight of the cows qualified in the Record of Merit test; and 13 in the test for the Record of Performance. Of the latter, eight records from mature cows averaged 461 pounds of butterfat, nearly all being made in less than 365 days. One Ayrshire cow, Marjorie 8th of Ottawa, during the four years that she was in quarantine, gave 32,987 pounds of milk containing 1,214.74 pounds of fat. This animal when slaughtered proved to be badly infected in the lungs and bronchials. These and other creditable records would indicate that tuberculosis, up to a certain stage, does not necessarily reduce the milk production of some cows; in fact, the production of the Bang herd varied but little from that of the main herd.

An accurate account was kept by the Experimental Farms Branch of the expense incurred in operating the Bang system from December 1, 1916, to November 1, 1921. The receipts for milk, calves and manure amounted to \$22,108.06. The expenses, which included feed, bedding, rent of building and labor, amounted to \$15,930.63, leaving a profit of \$6,177.43.

CONCLUSIONS.

In the light of the experience of the Central Experimental Farm, it is concluded that the Bang system is both feasible and practicable where circumstances warrant its operation. According to the views of the Experimental Farm officials, these circumstances would be (1) The existence of a herd or herds of purebred cattle of sufficient size and high quality to make the isolation of reactors and the reclaiming of their progeny profitable; (2) A sufficient number of reactors of high quality within the herd to ensure returns on the overhead charges that must be met in maintaining a Bang herd, which overhead charges might be so great as to exceed the returns from only a few reactors.

In view of the rapid adoption of the Accredited Herd System, now taking place, and particularly since the reduction of the compensation on reacting animals, there are undoubtedly many herds that might adopt the Bang system and at the same time fulfill the Accredited Herd conditions. In some cases, where the individual herds are not sufficiently large or the reactors within the herd not so numerous as to warrant the introduction of the Bang system, a group of breeders might unite in maintaining a joint herd under the Bang system.

A conclusion which should not escape attention is that if a Bang herd is to justify its existence at all, it must be established simultaneously with the entry of a herd into the Accredited Herd System, for the reason that it is at this time that the greatest number and often the highest quality reactors will be found. As each successive test proceeds, the number of reactors naturally decreases, so that, in the course of a few years at most, the herd should have a clean sheet and the Bang herd would be gradually eliminated. It is when the herd has this clean bill of health that the owner who has omitted to establish a Bang herd may wish that he had done so and thus have retained some of his favorite individuals and strains.

forced by lights and skillful feeding, is likely to mean lower summer production. But, in any event, experience has thoroughly convinced me that, measured by the bank account, the effort to get eggs when prices make them most profitable will be followed by results worth while.

Lesson of the Live Stock Markets.

A survey of the current market reports issued by the Live Stock Branch, indicates an unusually wide difference in the prices for good cattle as compared with those for common. Those offering fairly well finished stock are realizing satisfactory prices and aiding in keeping the market in good tone.

At Toronto, during the week ending May 10th, choice steers, animals well bred and properly fed, brought \$7.75 per hundred pounds, while common kinds sold as low as \$5.25 per hundred. This means that a good steer, weighing 1,200 pounds, would bring \$98, while a poor thin steer, weighing say 800 pounds, would fetch only \$42, a difference of \$51. In the report of the week previous, it is shown that good quality spring lambs sold from

\$10 to \$15 each, with others, considered too young by the buyers, sold as low as \$5 each. The week following, four loads of Western lambs brought \$15.25 per hundred while poor spring lambs from nearer points brought only \$5 each. Really good calves, sold around May 10th, brought as high as \$12, while common to medium, commanded prices ranging from \$9 down to \$6. Hogs were slightly higher that week than during the previous week, but there was the same discrepancy in prices between the good and the ordinary, selects selling on the average for \$12.47 and extra heavies for \$9.87. In developing trade, quality is a first essential, and therefore is a strong selling factor, whether it be live stock or some other product in which we do business for export. Increased domestic consumption and satisfied customers can only be obtained on the basis of a palatable article.

Why I Keep My Mower Sharp.

BY WALTER S. EBLING.

As a boy on the farm did you learn to mow hay with the scythe? You were careful of what became of the blade, for it was harder to swing when the edge became dulled.

But when one sits on the mower with the horses furnishing the power, it is more easy to forget that worn cutting parts make the work harder.

We have learned that the power of three horses may actually be required to pull effectively a two-horse mower when it is very dull and some of the parts are badly worn.

The knife is only half the problem of keeping the mower sharp. A mower cuts like a pair of shears. No matter how sharp the blades of a pair of shears may be, they will not cut properly unless firmly held together.

The knife can readily be sharpened, but the ledger plates when worn must be replaced, either by putting new ones into the guards or by replacing the entire guard. As the guard is usually bent or worn by the time the ledger plate becomes dulled, it is often better to replace the whole guard rather than merely the plate.

If the sections no longer fit down closely upon the ledger plates, there are usually two causes for the play—wear of the clips which hold the knife down, and wear of the steel wearing plates which support the knife in the rear. The clips can be hammered down and the wearing plates may be taken out and turned over, so that the unworn under side comes into use, or they may be replaced by new ones.

With a few dollars' worth of new parts and a few hours of work I have seen smooth-running, clean-cutting mowers made out of machines that at first appeared to be ready for the junk pile. The life of the mower is in the cutting parts—the gears and truck do not readily wear out.

Seven points to be considered in keeping the mower in good cutting shape are:

1. Keep the knife sharp and the sections tight.
2. Keep sharp ledger plates in the guards. These do not wear very rapidly.
3. Keep all the guards level by bending, or shimming between the bar and guards. Test them by laying the edge of a carpenter's square on the ledger plates.
4. Replace the wearing plates when they become worn so as to cause the tips of the sections to raise from the ledger plates.
5. Replace the knife head guide or shim it for adjustment when it becomes worn.
6. Keep the clips hammered down just tight enough to eliminate play but not to bind.
7. The sections should centre at least approximately in the guards at the extreme end of the pitman stroke when the pole is held about 30 inches from the ground.

Cranberry Culture.

Cranberries, in the opinion of Mr. M. B. Davis, Chief Assistant to the Dominion Horticulturist, and author of the bulletin "Cranberry Industry and Its Possibilities in Canada," could be profitably grown a good deal more extensively in this country than they are. At present cranberries are cultivated in Canada only on a few bogs in Nova Scotia, Prince Edward Island,

Quebec and British Columbia, although there are many acres of unemployed land suitable for cranberry culture. A point made is that, as a very large portion of the crop we import from the United States is grown at Cape Cod, the freight haul from there is very little less, if any, than it would be if the Eastern Canadian producer desired to ship to the western markets. It would appear, therefore, that there is opportunity for the more extensive development of the industry. The pamphlet contains information as to the nature of the site required, the system of cultivation to be followed, the enemies to be combatted, and the cost of preparation. An instance is given of a sixteen acre bog in Nova Scotia that was purchased, cleared, tilled, ditched, sanded, dyked, and planted for \$4,500. Although the cost is comparatively large, the profits from bogs are quite in proportion to the cost, when they are properly handled. Forty to fifty barrels an acre are often obtained, and thirty barrels are the average.

Translated literally the word "halibut" means "holy flounder."

Knowledge hurts nobody; ignorance and stupidity can well be left behind.—Sir W. Arbuthnot Lane, the famous surgeon.

Surnames and Their Origin

KELSEY

Variation—Kelsy.
Racial Origin—English.
Source—A place name.

Here is a family name which though it is properly classified as an English one, really traces back to an ultimate Celtic origin rather than to Anglo-Saxon sources. As a family name, however, it is just as likely to be borne by descendants of the Anglo-Saxons as the Cornish British from whom the place name comes down.

The village or town of this name, spelled Kelsey today, is in Lincolnshire. An older spelling, and one closer to the original name in the Cornish tongue, was "Kelsyck" or "Kelsyck."

"Kel" in the ancient tongue of the Cornish, signified a "neck" in the geographical sense, and the word "syc" or "syck" meant "dry."

The place name is, of course, of great antiquity, antedating the Anglo-Saxon invasion of that section of England, and like other place names in the middle ages, it became the basis of a family name indicating originally that

the bearer had come from that place or was in some way connected with it.

FENNESSY

Variations—Finnessy, O'Fennessy, O'Finnessy.
Racial Origin—Irish.
Source—A given name.

Here is an Irish family name which while perhaps not so widespread today as some other Irish names, carries with it much of historical romance.

This name was borne by one of the most powerful clans in Ireland during the Middle Ages, which was one of the last in its section of the country to go down before the force of English arms.

The Gaelic form of the clan name was "O'Fianagusa," derived from the given name of the chieftain "Fianagus," who led it into fame at a very early period of the Middle Ages. The strong hold of the clan was near "Cashel of the Kings" in Tipperary County.

The pronunciation of the old Gaelic name is not so different from that of the modern Anglicized form as might be supposed from the spelling.

Light Without Heat Invented in France.

A French engineer has made a discovery which, it is believed, will cause a revolution in methods of illumination. At present most electric lamps use up 70 per cent. of their energy in giving out heat rather than light. Risher has constructed a lamp which gives out light without heat. He makes use of a vacuum tube through which a phosphorescent material is passed. As soon as the electric current is passed through this, a light is produced which is brighter than that of the largest lamps now in use.

The consumption of energy is only 15 watts an hour in a tube six metres long and seven millimetres in diameter.

No Death by Accident on Railway in 50 Years.

There is a railroad in operation today which holds the remarkable record of never having had an accident so severe as to cause loss of life, says a London despatch. "It must be a toy railroad," some one will say. But even these meet with dire catastrophes sometimes.

This is a real railroad, which has been running for more than fifty years, and is still running to-day. During that time it has carried more than 1,000,000,000 passengers and not a life has been lost due to accident on the road. It is the North London Railway, begun by Robert Stephenson.

Pick and Nick.

This is the season when picnics are in full swing, but how many of the thousands who enjoy them could say why they were given their name?

The explanation is simple. When a picnic was being arranged it was the custom for those who were to be present to promise to supply food and drink.

A list of the things necessary was drawn up and passed round, each person picking out the articles he or she would supply. The name of the article was "picked" on the list—that is to say, a mark was placed against it. The open-air entertainment thus came to be known as "Pick and Nick." The custom is said to date from 1802.

Masterpieces of Music.

Many of the world's greatest masterpieces are known to have been written in an incredibly short time. The Messiah of Handel is reported to have taken the composer exactly twenty-eight days. The Barber of Seville of Rossini is said to have been the work of a fortnight. La Traviata of Verdi, if his biographers are correct, was done in less than one month. Schubert often poured out his immortal songs at the rate of three and four a day. The gift of melody seems like a kind of musical fountain—once set flowing it continues without interruption in a marvelous manner.

Minard's Liniment used by Physicians.

PAIN IN THE JOINTS

Is An Indication That the Blood Is Thin and Watery.

The first sign of rheumatism is frequently a pain and swelling of one of the joints. If this is not treated through the blood, which is the seat of the disease, the poison spreads, affecting other joints and tissues—sometimes rheumatism attacks the heart and is fatal.

A remedy that has corrected many cases of rheumatism is Dr. Williams' Pink Pills. These pills enrich and purify the blood so that the poisonous rheumatic matter is driven out of the system as nature intended. Miss Gertrude Denne, Washago, Ont., was attacked with rheumatism and found relief through Dr. Williams' Pink Pills. She says: "About a year ago I was attacked by rheumatism and for two weeks was confined to my bed. The trouble was so painful, affecting the joints of my limbs so that I could not stand alone. Mother had a box of Dr. Williams' Pink Pills in the house and thought they might help me. I began taking them, and when I had taken these pills got a further supply, with the result that the rheumatism vanished and I was a well girl. I may add that my mother and two of my sisters have also used the pills for various ailments with equal success, and now we are never without them in the house."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, a note how your strength and health will improve. You can get these pills through any dealer in medicine, or by mail, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Soliloquy.

The roads of June are paved with shadows dancing,
The flowers new magic know,
Through trees, thick-leaved, the silver moon is glancing,
The glad reeds whisper low.

Soft ivy-fingers at my pane are tapping,
When zephyrs drowsy dream,
And idle willows in the dusk are lapping
The waters of the stream.

June's cup of loveliness my heart is quaffing—
Ah, merry sounds the surge upon the bar,
As in the moonlight lone it tumbles, laughing
At Even's loyal star.

The heartstrings of the summer night are throbbing
Like pulsing of sweet lyres,
Then laughter of the creeping Morn comes, robbing
The dream and heart desires.
—Alleen Ward.

Not Shaky Enough

The Guide—"Now that you've seen the real thing, how do you like the Indian snake dance?"
Miss Tiptoes—"Not a bit. I expected to see some stunts wriggles that I could introduce in a hesitation."

ISSUE NO. 23—23.

Eastern Church to Adopt Gregorian Calendar.

On October 1, the ecclesiastical calendar of Eastern Christendom will be brought into harmony with the Gregorian calendar. Instead of sticking to the Julian, the Congress of all Orthodox Churches, under the presidency of Patriarch Meletios, decided.

On October 1 thirteen days will be added to the calendar, making it October 14, the same as most of the rest of the world. The change is due to the fact that most of the Oriental countries have adopted the Gregorian calendar, the latest country to do so being Greece.

The decision unifies celebration of all fixed Christian feast days in both east and west. As for Easter, the congress decided the Gregorian method of reckoning it is erroneous. Delegates look forward to adoption of a scientific calendar everywhere that will make Easter a fixed feast.

Meanwhile the congress charged the observatories at Athens, Belgrade, Bucharest and Petrograd to draw up a table fixing Easter scientifically until the year 2000.

Giant Spiders.

A spider native of Trinidad has a body as large around as a fifty cent piece, and eight legs, which spread themselves out to a circumference the size of a cheese plate. For months at a time these spiders, husband and wife, will live irreproachably together in a chosen corner of a cupboard or ceiling, where they stay during the hours of daylight, the wife clasping her white egg case to her body by her forelegs. After dark, when they hunt, they run all over the house, for they spin no web, but get their living catching cockroaches by sheer fleetness of foot. They are seldom disturbed or killed, partly because of their very considerable running powers.

BABY'S OWN TABLETS

AN EXCELLENT REMEDY

When the baby is ill—when he is constipated, has indigestion, colic, or simple fever or any of the other many minor ills of little ones—the mother will find Baby's Own Tablets an excellent remedy. They regulate the stomach and bowels, thus banishing the cause of most of the ills of childhood. Concerning them Mrs. E. D. Dugan, Thunder River, Que., says: "My baby was a great sufferer from colic and cried continually. I began giving him Baby's Own Tablets and the relief was wonderful. I now always keep a supply of the Tablets in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Awakened Apple Tree.

It seems so short a space ago I stood,
Beside you 'neath a dark and cloudy sky,

To all appearance dead, your naked wood

Raising aloft stiff branches, black and dry.

Without foreknowledge we could not conceive

That you would have a resurrection new.

How soon such loveliness you would receive,

That filled with pleasure, we would gaze on you,

Knowing that God into this world of ours

Had placed this wondrous miracle of Spring.

This tree awakened to a soul in flowers,

Exquisite joy into our hearts to bring.

—Christina W. Partridge.

Sell Verse-Scratched Inn Window for \$65.

"There are Three Crosses at your door, hang up your wife and you'll count four."

A small pane of glass bearing the above couplet, scratched in a moment of chagrin by Jonathan Swift, the famous Dean of St. Patrick's Cathedral, Dublin, has just been sold by auction for \$65.

Swift was wont to sleep at an inn called Three Crosses at Willowby, near Rugby, on his way to and from his deanery in Ireland. On one occasion the landlord's wife, being occupied with other visitors, offended the irascible author of "Gulliver's Travels" by paying him less than usual attention. To mark his displeasure of a hasty observation, Dean Swift scratched the couplet on the window with his diamond ring.

That was 200 years ago and since that day the name of the inn has been changed to Four Crosses.

Electric Rain Alarm.

Falling rain is likely at any time to drive into a room and damage the floor, wallpaper and furnishings. One manufacturer has devised an electric rain alarm which will give warning as rain in any quantity falls into a room. The device consists of a box containing a battery, a buzzer, a small electric light and a switching arrangement that holds what the maker calls a "rain-disc." The box is put on the window sill at night when the window is left open for ventilating purposes. The falling rain drops on the disc, switches on the current and throws both light and buzzer into circuit. The buzzer awakens the sleeper and the light shows which window needs attention.

PRICE OF A HOME SPENT IN VAIN

Mrs. Logue States Money Failed to Buy Health, But Tanlac Restored It.

"I bless the day I started on the Tanlac treatment, for it completely ended my troubles, which had kept me in misery ever since I came here from Scotland eleven years ago." Is the grateful statement of Mrs. Emily Logue, 129 N. Park St., Hamilton, Ontario.

"At times indigestion, gas bloating and heart palpitation tortured me till I thought it would drive me frantic. My appetite was so poor I scarcely ate enough to keep going, and I grew so weak and worn out I had to let my housework go. My head ached till I thought it would split, I had fearful dizzy spells, and couldn't get a good night's sleep."

"I spent enough money on medicine to buy a home, but nothing helped me until I started on Tanlac. I now have a splendid appetite, my digestion is perfect, and I always feel strong and well, for Tanlac has built me up to robust health and I will always praise it."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

MRS. ANDERSON TELLS WOMEN

How Backache and Periodic Pains Yield to Lydia E. Pinkham's Vegetable Compound

Leslie, Sask.—"For about a year I was troubled with a distressing down-bearing pain before and during the periods, and from terrible headaches and backache. I hated to go to a doctor, and as I knew several women who had taken Lydia E. Pinkham's Vegetable Compound with good results, I finally bought some and took four bottles of it. I certainly do recommend it to every woman with troubles like mine. I feel fine now and hope to be able to keep your medicine on hand at all times, as no woman ought to be without it in the house."—Mrs. OSCAR A. ANDERSON, Box 15, Leslie, Sask.

Mrs. Kelsey Adds Her Testimony

Copenhagen, N. Y.—"I read your advertisement in the papers and my husband induced me to take Lydia E. Pinkham's Vegetable Compound to get relief from pains and weakness. I was so weak that I could not walk at times. Now I can do my housework and help my husband out doors, too. I am willing for you to publish this letter if you think it will help others."—Mrs. HENRIETTA KELSEY, R.F.D., Copenhagen, N. Y.

Sick and ailing women everywhere in the Dominion should try Lydia E. Pinkham's Vegetable Compound before they give up hope of recovery.

Canadian Weekly Press Association Tour the Maritimes

Through the courtesy and consideration of the two great railways the Canadian Pacific and the Canadian National, the editor of this paper, together with representatives of other weekly newspapers of the nine Provinces, has been privileged to have traversed our beloved Canada from Coast to Coast.

Two years ago a special train took the Press Party from Toronto out to Victoria B.C., where we were royally entertained in the varied cities as we passed through and when the invitation was extended this year to visit the Maritimes, it was accepted eagerly and Mr. Roy Sales the manager of the Association spared no time in working out an itinerary that has proven a revelation to those who participated.

The wonders unfolded has filled us with a zealous desire to do our little part in trying to stimulate amongst our readers and others with the spirit of loyalty and devotion such as characterized those who came before and made our goodly heritage possible. The trip throughout provided us with a fund of information. Many of the party had never been in the Maritime Provinces, and but few in Nova Scotia. What they saw will doubtless be of great benefit to Canada as a whole, and will help to unification in studying the varied problems of East and West.

Our first welcome was accorded us by the good people of Fredericton, where the Mayor and Council with many prominent citizens were on hand with automobiles to drive us around the city after which we were treated to a beautiful supper served in the Methodist Church. The party afterwards proceeded to the Assembly Chamber of the Parliament Buildings where a reception was held for them and the Federated Women's Institute of Canada, which were conceding their convention.

Deputy Mayor Dickson presided at the formalities which preceded the reception and dance. The chief speakers who extended welcome to the association were His Honor Lieutenant-Governor Todd and Hon. P. J. Veniot, Premier of the province.

His Honor referred to the Women's Institutes as a body which had a notable duty to perform and which was bound to make itself felt in both education and in political life. To the press delegation His Honor said that the newspapers wielded a mighty power. He hoped that in their case the pen ever would be tempered with justice and the point forged in the fire of truth.

He wished that the stay of the party in New Brunswick could be longer in order that they might obtain a more detailed idea of the problems and views of the country. He had referred to education as an important matter. Transportation was another. The lowest possible rates for transportation were necessary for the proper development of the industries of the Maritime Provinces.

Premier Veniot emphasized the fact with deputy Mayor Dickson that there was no desire of secession in the Maritime Provinces.

A quick run was made to St. John, arriving there about 11 a.m. and our first pleasure was to call up one of our town boys Mr. Kenneth Morrison, late of the Provincial Bank Branch in Brownsburg. Needless to say he was more than delighted to greet us and wished to be kindly remembered to his many friends here. He is in full enjoyment of his work and the tang of the salt sea air must be agreeing with him for he is looking hale and hearty.

We were met at the station by Mayor Fisher and the other members of the committee in charge of their entertainment. Some were taken by automobiles and the rest by street cars, kindly provided for the occasion by the New Brunswick Power Company, to "Paradise," where a banquet was tendered to them by the city.

The ladies of the party were taken at 4.30 by automobiles, cars having been provided by the New Brunswick Automobile Association and the Rotary Club to East St. John, while the men were driven there by special street cars. They were shown all around the huge dry-dock by the management and the various features were explained to them. Later in the afternoon the ladies were entertained at tea by Mrs. Fisher, wife of the mayor, when they had the opportunity of meeting a number of St. John ladies. Seats were reserved for the entire party at the Imperial Theatre in the evening by the courtesy of the management and many of the younger members as well as quite a few of the older ones took advantage of the invitation to repair to the Venetian Gardens for dancing.

There were in all some 250 at the banquet given to the visitors in the banquet hall of "Paradise." It was a splendid function.

A very attractive menu, setting out a full course dinner, and with a picture on the front cover of the Champlain monument in Queen Square, was kept by most of the visitors as a souvenir.

Mayor Fisher presided and in order to expedite matters, addressed the gathering during dinner. He extended to them a hearty welcome on behalf of the city, outlined the program of their entertainment while there, told of some of the points of interest and briefly explained St. John's position as Canada's front door, impressing the desirability of the existence of a proper understanding between the various portions of Canada. He expressed the belief that such a visit as this would do much to educate the people as a whole about the different parts of Canada and concluded by wishing the C. W. N. A. a very successful convention in Halifax.

At the conclusion of the dinner, Rev. A. L. Fleming called upon by the chairman told the delegates something about St. John and New Brunswick describing some of its landmarks and points of historical interest.

Mr. R. E. Armstrong, secretary of the board of trade, spoke on trade problems and dwelt fully upon the commercial possibilities of the port and the need of expanding them. He pointed out the difficulties under which the port has to labor and outlined the various reasons for increasing trade through St. John and developing the facilities there.

Mr. A. R. Brennan, publisher of the Summerside Journal, and Agriculturist and president of the association, thanked the chairman on behalf of the delegates of the association for the very cordial reception they had received and expressed his appreciation of the kind attention which had been paid to the members who had come from the far west and from points in Ontario and Quebec by the Canadian Pacific Railway.

Mr. J. W. Eedy of St. Mary's, Ont., also spoke warmly of the way the members and their wives had been treated, saying that the railway officials both on the C. P. R. and on the C. N. R. coming from Fredericton had been courteous itself. He referred to the beauties of the province as glimpsed from the train on the journey down the St. John Valley.

All the baggage of the visitors was transferred by the C. P. R. to the steamer Empress on Saturday, the boat sailing for Digby at 9 o'clock Sunday morning.

The trip across the Bay Sunday proved most pleasant. Divine service was held on the boat, the preacher being Rev. A. H. Moore, of St. John's, Que.

The party were met at Digby by a committee of citizens and conveyed by automobiles to point of interest around that town before entraining for Halifax.

Before the boat docked members of the party asked Mr. Armstrong of St. John to express to the people of that city their hearty appreciation of the kindly and friendly reception given them there.

Mr. A. R. Brennan, on behalf of the Association, also sent his thanks to the citizens for the hospitable reception accorded them and Fred H. Stevens, of Hartland, on behalf of the New Brunswick members of the executive, also sent thanks.

Mr. Armstrong said several members of the party had told him the trip was a great revelation to them. They had had no idea that the Maritime Provinces had so much in the way of scenic beauties and possibilities from a port standpoint and expressed their intention of helping along the development of this part of the Dominion.

When the party arrived at Digby it was met by the mayor and councillors of the town and many prominent citizens, and given a motor drive through the town. Geo. E. Graham, General Manager of the D. A. R., placed at the disposal of the officials his private car.

The train made a non-stop run to Annapolis, where the party was met by the mayor and town council, and driven to the old Fort Ann, and from there proceeded to Kentville, where they were received by the town band, the mayor, town councillors and citizens having arranged a motor drive through the orchard country to Grand Pre. At the latter place they visited the Acadian memorials. F. G. J. Comeau, of the D. A. R., gave an address of welcome from the steps of the memorial chapel.

At this historical spot, which all had read of but many never previously visited, a full hour was spent roaming about. The well and cemetery received much attention, and the cameras were kept constantly clicking in order that friends at home might see the scenes which bring back Longfellow's immortal poem.

STANDING on the steps of the building which will in the future house historical treasures, F. G. J. Comeau, of the D. A. R., gave a brief talk, divided between the story of the surrounding parts, and an invitation to be carried home by all, urging all Canadians to visit Nova Scotia, which no part of the Dominion is equal for scenery or romance. Looking down from one of the nearby hills, he said, a traveller of the world had stated that before him he saw a combination of all the noted beauty spots, but the land of Evangeline stood above them all.

Continued next week.

MORIN HEIGHTS

Mrs. E. Christie is visiting friends in Montreal.

L.O.L. 2818 is preparing for a big picnic for July 12th.

Mrs. R. McCullough called on Mrs. M. Strong, of Cambria last Sunday.

Mr. Wm. Thompson, of Arundel, visited his sister Mrs. S. McArthur this week.

Miss Muriel Dawson closed her school, June 2nd, and returned to her home in Mille Isle.

Mrs. Wm. Morrison, of Arundel, is a visitor at her cousin Mr. R. McCullough.

Mr. Rufus McCullough has had as guests his four sisters during a goodly part of June.

Mrs. Arthur Davis is visiting her new grand-daughter at Wm. Deacon's Lachute.

Mrs. Morrison, Mrs. R. McCullough and Mrs. J. Hamilton were guests at the vicarage Tuesday last.

Mr. A. Blason and family motored from Montreal and spent Sunday with

23,000 MILES

—and Never a Blowout

"If this isn't service, I don't know what is," says Mr. H. Parker of Ingersoll, Ont.

His taxicab, with Ames Holden Tires—running on all kinds of roads—under all conditions—covered 23,000 miles and outwore seven tires of other makes.

AMES HOLDEN TIRES

his sister Mrs. J. E. Syvret.

Mr. Henry Hunting, of Lennoxville, is visiting his brother Norrie Hunting at Morris this week.

We are pleased to learn that Carl Seale has successfully passed his entrance examination at Lachute.

Hotels and boarding houses are filling up with guests, a big influx is expected by Dominion Day.

The Webster's cottage is undergoing extensive additions and repairs including an up-to-date basement.

Mr. and Mrs. Harry Scott and Mrs. Geo. S. Rogers, of Lachute, were visitors at R. McCullough's last week.

Mrs. McGowan, of Montreal is renewing acquaintance with friends of her youth here, being a guest of Mrs. C. Seale.

We are pleased to welcome the Gardner family as having taken up summer residence in their cottages by the station.

Rev. H. White preached his farewell sermon Sunday to a large congregation. He is moving to Port Lampton, Ont.

Mr. Geo. Rogers who has been visiting his son Norman here, motored home to Lakeside, accompanied by a number of friends Sunday last.

The new Roman Catholic Church building, will soon be ready for occupancy. A successful box social in Davis Hall, Saturday last, netted a goodly sum towards its funds.

Mr. Samuel M. Kerr, of Montreal, Presbyterian College has taken up residence at Mr. M. Day's in charge of the work of the mission of Mille Isle and Morin for the summer.

Mrs. Wm. Mugford returned home to Montreal, and Miss McCullough to Hudson Heights last week, while Mrs. Mary Smith left Wednesday for her home in Chicago. Mrs. J. Hamilton is still a Morin guest.

Grenville Picnic.

July 2nd, Join the Grenville French Presbyterian congregation in their annual picnic on their church lawn. A cordial welcome, refreshments, games, races, short addresses, music. Some one will meet you at Magnesian station.

CHURCH NOTES.

Service at Dalesville on Sunday morning at 10 a.m., standard time. Sunday School at 9.30 a.m.

Service at Mount Maple on Sunday afternoon at 2.30 p.m., standard time.

Service at Brownsburg on Sunday evening at 7.30 p.m. Daylight Saving Time.

Sunday School at 2 p.m. Daylight Saving Time.

Services in Baptist Church Lachute, on Sunday, July 1st, at 11 a.m., and 7 p.m. Morning topic "What Saith the Spirit" — Evening, "Rescue the Perishing", conducted by Pastor Joseph McDermott. Sunday School at 9.45 a.m., classes for all ages. These services will be on the advance time.

Presbyterian Church services will be held next Sunday, July 1st, as follows: In Lachute at 11 a.m., and 7 p.m. Standard Time. (Please note change back to Standard Time.) In Upper Lachute at 11 a.m., East Settlement and Hillhead school at 3 p.m., and in Brownsburg at 7.30 p.m. (Daylight Saving Time.)

Rev. Jas. A. McKenzie, of Gulph, will preach in Lachute at both services and in East Settlement. Mr. A. O. Lloyd will preach in Upper Lachute, Hillhead school and in Brownsburg. Rev. Mr. McKenzie will take the place of the pastor during this month of July.

Services in the Methodist Church on Sunday next, will be conducted by the Pastor as follows: Lachute at 10.30 a.m., and St. Canute at 3 p.m. Brownsburg at 7 p.m. All except Brownsburg on standard time.

Please note that the evening service at Lachute has been cancelled for July and August.

If you are travelling this summer, make your bookings through the Watchman Office. We procure passports and make all arrangements as we are agents for the Canadian Pacific, White Star, Anchor, Donaldson and Canadian Steamships. Particulars made known on application. Phone 27.

CHAPTER VI.—(Cont'd.)

As Tu Hee confessed the face had held all her attention, Wong Toy read: "Lieutenant Paul Culver, adopted son of Dr. Neil Culver of New York, who has been awarded the highest honors of France and Great Britain, the Croix de Guerre and the Victoria Cross. China has also expressed her pride and esteem of her young countryman by conferring on him the famous sacred ruby of the Chow dynasty. The jewel has not swerved from its natural course, however, as the young hero is a direct descendant of the Emperor Woo Wang himself."

"How wonderful!" breathed Tu Hee, her eyes shining, and then, meeting her guardian's glance, the realization of why the picture had been shown her rushed over her. She turned wide and startled eyes on her uncle. She had looked upon the picture in delight, claiming the young hero as one of her own blood, one of her own noble house, yes, as the brother that had been denied her. Bewildered, she clasped and clasped her hands. There was confusion and a note of pleading in her voice when she spoke:

"But he is my cousin, Uncle Weng." Wong Toy laid aside the book. He replied calmly and evenly as if making an unchallengeable statement: "He is my nephew, but for reasons which I cannot now disclose, child, the fact would not prevent a closer alliance."

"You mean, Uncle Weng, you really wish me to marry—"

Wong Toy lifted his hand. "I wish only for your happiness, my child. It would please me only if it pleased you."

But the words brought no relief to Tu Hee. It seemed that the inevitable was submerging her will power. A strange thing had happened. A problem had entered her life which she must solve for herself and by herself. Bending towards her guardian, Tu Hee brushed his forehead with her lips and ran from the room.

CHAPTER VII.

It was the night Captain Marsden was to dine at the mandarin's. Tu Hee's cheeks glowed until they matched the tints of the gown that Lun was fastening so proudly.

"You grow more like your mother every day," conceded the old nurse, standing back and surveying her charge with head on one side.

Established 25 years.

Tu Hee did not realize she was eavesdropping. The knowledge that she was the pivot of the conversation magnetized her to the spot. She held her breath now for the denial she expected to be forthcoming.

"And why not? She is but a gift to China!"

Tu Hee's head swam. She grasped the edge of the door to steady herself. What did Uncle Weng mean? Was he disowning his own blood? She made a step forward to confront him, when the derisive laugh of Chu Sing sent her shuddering back, and she listened tensely, fearing she knew not what.

"A gift—a gift of the gods!"

Tu Hee's heart gave a throb of relief. She wanted to throw herself forward laughing for joy, so great was the relaxation that swept over her, but instead she stepped out into the hallway and proceeded towards the drawing-room, her head high, a true mandarin's niece and daughter of beauteous China.

David Marsden, whose artistic eye had been trying to regulate his impatient heart and failing miserably, crossed eagerly to meet the bewildering vision that entered the room. For six days he had been delving assiduously into Chinese etiquette, but now stood forgetful of it all, aware only of the ecstasy of being able to gaze again into a pair of eyes the blueness of which had brought back a little of God's sunshine into his broken life.

"My uncle has been detained, Captain Marsden, by an unexpected caller," explained Tu Hee, as she gave him her hand. "I am sure he regrets keeping you waiting, for Uncle Weng is punctuality itself."

"The time flies so rapidly in this interesting room I didn't even know I had been kept waiting," reassured David, obeying her motion to be seated.

"This interests you?" David fidgeted under the quizzical look in the blue eyes and wondered if she were laughing at him. He decided she was when she continued naively: "Please don't say it looks unusual to you. We like to think this room is tolerably foreign in appearance. I know Uncle Weng had that object in view when he furnished it."

It was with a decided effort David made himself agreeable with light talk, an entirely new experience for him when with the fair sex. His admiration for the Eastern maiden was growing by leaps and bounds. Her

NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and travelling expenses to and from New York. For further information apply to the Superintendent.

poise and self-confidence in comparison with her years astonished him. She couldn't possibly, he decided, be more than eighteen, and how lovely she looked, like some rare, delicate, exotic flower with a peculiar refinement all her own! Why didn't English women wear gowns that rippled like pink rose vines down to slippers as dainty as buds?

"If you are really interested in what we of the East consider beauty, Captain Marsden—"

David endeavored to get a firm and equal grip on his two senses, hearing and seeing. It required great effort, though. Yes, her voice, he decided, equalled her other points. It was soft, and almost lazy in its nonchalance, yet was saved from monotony or drawl by an almost American alertness that rounded off each word.

Tu Hee paused in the middle of a sentence. "But perhaps I am presumptuous in supposing you are interested in us. After all, your mission in our country, I understand, is not voluntary."

"Indeed, Miss Weng Toy, the East has fascinated me from childhood. If I appear distrustful and absent-minded I assure you it is not indifference. It is rather that, please pardon me for what may seem abruptness to your Eastern training, you are a very unusual young lady."

But Tu Hee was not at all affronted. Her lips parted in an alluring smile and she leaned towards him eagerly. "Do you really think me that? Do I seem at all nice to your foreign eyes? O Captain Marsden, if you only knew how I've been envying the smiling creatures on your magazine covers for the past week! And that pretty young lady—Mrs. Claymore told me she is your cousin—you find me interesting after her?—what word shall I use?—ah yes, vivacious company!"

(To be continued.)

Woman's Interests

YOUR SUMMER FROCKS.

Batiste and Valenciennes lace! Sheer voile and all-over embroidery! Dimity and tuck and tuck! Soft muslin, colorfully embroidered! If you are in your teens or a little older, these are the cream of the sheer stuffs to choose from this summer. Take any one of them, add flounces, tiers, or tucks that look like skirt sections, and you are almost sure to come out with a pretty frock.

You see, soft goods won't stand for the severe treatment we have been giving organdie for the last two or three years. They need trimming. Lines to cut them up. And fullness to stuff them out. I'm almost tempted to use the word lingerie in describing them. There's so much lace. Lace to edge the berthas and the sleeves and flounces. You can slip by with one row, but three or four is all the prettier.

As one might expect, when daintiness is the quality to be achieved, the lace is Valenciennes. Flounced dresses are made straight as to waist, a rather close-fitting skirt foundation. And then just as many flounces as you please. The material is an embroidered voile with a two-toned satin ribbon sash that blends with the embroidery.

This brings me to another smart trimming: ribbon edges. There's a great variety made especially for finishing. Sometimes these edges are formed of a narrow and wide ribbon sewed together on one side. Can't you picture a white batiste embroidered in blue, with its flounces edged with yellow and blue ribbons? Other ribbons are scalloped or picoté. All you have to do is to turn the edge of the flounce an eighth of an inch, press it, lap it over the ribbon, and slip-stitch it in place. It goes surprisingly fast.

In the case of a three-tiered skirt, bandings make attractive trimmings. A plain white batiste or voile could be made quite out of the ordinary if Egyptian embroidered batiste or wool-embroidered organdie were inserted an inch above the bottom of the tiers. These bandings vary in width from one to twelve inches. For wide tiers, four-inch bands are effective.

Of course, not all of the tiered and flounced dresses are sheer cotton. One meets them almost as often in silk. In small-patterned silks they are especially pretty. Here the edges are bound with self-bias and the fastenings finished with ribbon—grograin, picoté-edged ribbon, or velvet.

And even heavier goods, such as cotton ratine, show a tiered effect. An easy way of accomplishing this is to tuck a straight skirt. Since the lower edge of the skirt is straight, it's a style that could be copied in checked gingham or a bordered goods.

MUSHROOM POINTERS.

In preparing mushrooms, cut a small piece from the stem end and soak in salted water for fifteen minutes before using; then peel the caps, and unless they are to be broiled cut them in halves if large.

A very delicious and simple mushroom dish known as mushroom ragout is made by frying a quarter of a pound of prepared mushrooms in two tablespoons of bacon fat. Then add a cup and a half of thin brown sauce and simmer for twenty minutes. Add half a teaspoon of kitchen bouquet, a tablespoon of Worcestershire sauce and four slices of diced bacon that has been cooked crisp and brown. Bring to the boiling point and serve on hot toast slices.

Stuffed mushrooms—Still another good recipe is stuffed mushrooms. Prepare twelve very large caps and chop the stems finely. Melt three tablespoons of butter, add half a tablespoon of minced shallot and the chopped stems and fry for eight minutes. Blend in one and a half tablespoons of flour, add chicken stock to moisten, a teaspoon of shredded parsley, salt and paprika to taste and a few grains of nutmeg. Cool, fill the caps, well rounding them up; cover with buttered crumbs and bake fifteen minutes in a hot oven.

Mushroom sandwiches are particularly good and rather a novelty. Prepare a quarter of a pound of the caps, cut in pieces and simmer in milk until tender, adding a pinch of salt. When tender drain and chill, add one chopped hard boiled egg, half a cup of finely diced celery, one tablespoon of cream, extra salt, celery salt and paprika to suit the individual taste and sufficient mayonnaise dressing to moisten. Use as the filling between buttered slices of whole wheat or graham bread.

RUG CLEANING.

This formula can be applied with equal success to a thousand-dollar oriental rug or a homemade braided or knit or crocheted or "hooked" rug. This is the formula:

One box soap flakes or an equal quantity of soap shaved from bar, 2 oz. borax, 1 oz. soap bark, 1 1/2 qts. hot water, 4 oz. ammonia.

Mix soap flakes, borax and soap bark, add the 1 1/2 qts. hot water and boil until well dissolved. Next add the ammonia and 2 1/2 qts. cold water. Let stand one day. The soap mixture, after standing, forms a slimy mass. Apply the mixture to rug with a scrub brush, working gradually from one end of rug to the other. Rub in until there is a deep lather. Then scrape off this lather with a thin strip of wood about twelve inches long, or with tin shingle. Wipe the surface of the rug carefully with a damp cloth, give especial care to the edges of rug. This application should not wet the rug through.

The best companion is a good conscience.

Minard's Liniment for Corns and Warts

The Liveryman's Prayer.

It was a hot August afternoon when the gasoline stove in Mrs. Jones' kitchen exploded. As the Joneses' house was the only house in the block, no one heard the noise; and no one saw the fire until the flames burst from the window. As the town was a new one in the remote West there was no fire company, and there was, moreover, not enough water to fight such a fire.

Mrs. Jones was terribly burned. She had managed to drag herself out of the room, and when neighbors came they carried her away from the intense heat. The doctor, who arrived a few minutes later, examined her burns, and said there was no hope for her.

"I want a minister!" pleaded the woman.

"The minister's gone to the next town to preach," some one replied. "Somebody pray for me, then!"

The women shook their heads; all that they and the half dozen men gathered round could do was weep. None of them had ever prayed aloud.

"Can't somebody pray for me?" Without a word Jim Peck, the liveryman, stepped forward and knelt by her side. "O Lord," he began, "this isn't in my line. I should be prayin' for myself instead of somebody else; but, Lord, you know how Mrs. Jones is hurt an' how she wants somebody to pray for her. Now, Lord, if you'll help her an' save her, we'll all go to church an' learn how to pray. Amen."

"Did I do wrong, minister?" the man said to the Rev. Henry Walker on Sunday, after relating his experience.

"You did right. Your prayer was as effective as any minister's would have been. The Lord looks on the heart, not on the outward appearance. But, Mr. Peck, God has called you to be a Christian, and, as you led in prayer for Mrs. Jones when she lay dyin', He wants you to pray for all your neighbors."

"Do you think so?"

"I know it! God wants you to lead this town to Christ. This tragic death is a summons for every man and woman in the town!"

"I'll have a lot of things to unlearn," answered Peck thoughtfully, "but with God's help I'll try."

The next Sunday he and four other men came forward and, kneeling before the dry-goods box that served as pulpit, received Christian baptism and the right hand of fellowship into the church. Peck was made a deacon and prays with spiritual fervor whenever there is need. The dying have sent for him in the absence of the minister, and he never refuses to help men and women to find Christ.

Not Complimented.

He (exalted)—"I feel I could put all the world under your feet!" She—"Sir, permit me to say the size of my feet would not permit the carrying out of your ambition by any means."

Minard's Liniment for Coughs & Colds

Circling the Globe.

By airplane the earth could be circled in fifteen days—that is, if there was a machine capable of making the journey without a stop. But this is not possible, and when stops and so on are taken into consideration the time works out at nearly three months. At least, this was the time allowed by Sir Ross Smith, who was preparing for a round-the-world flight when he met his death.

Needles of Clay.

Photograph needles which produce a very clear tone are being made of clay.

The Flavor Lasts

What Our Favorite Hymns Are.

The Etude Musical Magazine has been making an attempt to ascertain what are the favorite hymns of the people on this continent. In the census taken, people of various callings, various creeds, and both of city and country localities are included. The result was that 32,000 hymn titles were sent in, the titles and number of votes being as follows: Abide With Me, 7,301; Nearer My God, to Thee, 5,490; Lead, Kindly Light, 4,161; Rock of Ages, 3,432; Jesus, Lover of My Soul, 2,709; Holy, Holy, Holy, Lord God Almighty, 1,444; Just as I Am, Without One Plea, 875; Jesus, Saviour, Pilot Me, 457; My Faith Looks Up to Thee, 236; All Hail the Power of Jesus' Name, 220.

Between 150 and 200 votes: O Love That Wilt Not Let Me Go; How Firm a Foundation; In the Hour of Trial; What a Friend We Have in Jesus; I Need Thee Every Hour; Sweet Hour of Prayer; When I Survey the Wondrous Cross.

Between 100 and 150 votes: He Leadeth Me; In the Cross of Christ I Glory; Jesus Calls Us, O'er the Tumult, Onward, Christian Soldiers; Guide Me, O Thou Great Jehovah; O Mother Dear, Jerusalem.

Between 50 and 100 votes: Will There Be Any Stars? Come, Thou Almighty King; Softly Now the Light of Day; O Worship the King; Now the Day is Over; Come, Ye Disconsolate; One Sweetly Solemn Thought.

ARSENIC NEEDED TO COMBAT BOLL WEEVIL

OPPORTUNITY FOR CANADA TO SUPPLY DRUG.

United States Requires 12,000 Tons Per Year to Save the Southern Cotton Crop.

In the strenuous campaign waged in the United States to combat the serious menace of the boll weevil, the infestation of which pest has spread over 97 per cent of the cotton belt, the seriousness of the situation to the Southern cotton fields is apparent when it is realized that the cotton crop of 1922 will probably not exceed ten million bales as compared with the average production of the ten years preceding 1920, which was thirteen million bales. Experiments carried out by the United States Department of Agriculture and by independent agencies in recent years indicate that the most effective measure in this warfare, so far developed, is the use of calcium arsenate, which is dusted upon the cotton plant at night. The dew becomes impregnated with arsenic and the weevils are poisoned by drinking it.

The resulting demand for calcium arsenate, however, bids fair to outrun the available supply of arsenic. According to a recent issue of Commerce Monthly, the total cotton acreage in 1922 was 33,742,000 acres, so that if applications were made on all fields, 500,000 tons of calcium arsenate would be required. The capacity of present smelters in the United States is estimated at 18,300 tons of arsenic per annum, or a maximum of 25,000 tons should all existing smelters work to capacity. The United States Department of Agriculture states that already the arsenic demand has reached the maximum capacity of the refineries and is expected to go beyond that capacity in the near future. There is practically no direct production from United States arsenical ores.

Necessity of Importation.

From this it is clear that the United States must look to imported supplies if she is to find arsenic sufficient to treat more than 1 per cent of her affected cotton fields. The use of arsenic as a general insecticide and weed-killer is increasing on the continent. Aside from the special demand for it to poison the boll weevil it is employed as a cattle and sheep dip. Other industries which compete for the available supply include, besides miscellaneous chemicals, plate glass manufacturing, in which it serves to counteract the coloring effect of metallic oxides and increase the brilliancy of the glass. It has been estimated that in 1920 from 50 to 60 per cent of consumption in the United States was for insecticides and fungicides and from 25 to 30 per cent for the manufacture of plate glass.

Arsenic may be obtained direct from ore, when circumstances are such that treatment primarily for this product is profitable. The greater part of the output of the United States, however, is recovered from flue dust as a by-product of the smelting of metals, principally copper and lead, and the quantity produced, therefore, depends upon the situation in the market for these metals rather than upon the demand for arsenic. Consumption of arsenic in the United States in 1920 was estimated at 14,000 to 16,000 tons, imports supplying 3,740 tons, and present demand is believed to be about 12,000 tons. Whilst the United States is the largest producer of arsenic, it is also the largest consumer, and at no time has domestic output been sufficient to satisfy domestic requirements.

Prior to the war, France was the chief producer of arsenic with an output of 70,613 tons of ore, and Germany was second, producing 5,093 tons of white arsenic, metallic arsenic, sulphide, etc. In both these countries arsenic is a primary product of arsenical ores. Great Britain and Canada recover arsenic from smelters, and installations for its recovery are being made in Japan. The chief sources of imports into the United States at present are Mexico and Canada. Shipments are also made from Japan, but a large part of the Japanese output is consumed locally.

Canadian Production Can be Increased. The production of arsenic in Canada in 1922 amounted to 2,576 tons valued at \$321,037, which was an increase of 73 per cent in quantity but only 37 per cent in value over the shipments for 1921. Approximately four-fifths of this quantity was produced in the smelting of silver-cobalt-nickel ores of the Cobalt district. One gold mining company in British Columbia reported some 500 tons of this commodity as having been recovered from arsenical gold concentrates shipped to the Tacoma smelter.

There is a great opportunity in Canada for a development of this industry, for an augmentation in the annual production of arsenic and the growth of the export trade. In the Temagami district of Ontario, for instance, there are known deposits of arsenical ore as well as in the vicinity of Belleville and along the Kingston subdivision of the Canadian Pacific Railway. In various parts of the country are valuable deposits merely awaiting the introduction of capital for their commercial exploitation, and with the urgent and continual need of supplies in the United States, which that country is not in a position itself to furnish ade-

quately, there should be a future in the expansion of such an industry in Canada.

Marie Antoinette's Kiss.

Marie Antoinette, pitiable woman that she was in life and especially in her death under the knife of the guillotine, is the object of many interesting stories. A contributor whose ancestors were French royalists found some time ago among her family heirlooms a notebook, or diary, containing this touching incident illustrative of the young queen's impulsiveness and sympathy.

In some things Marie Antoinette, so runs the record, is but a thoughtless young girl, although she can assume the queenly dignity befitting her station when she so desires. If the king were less indulgent of her pranks, there would be a sorry time in the royal household. One day in a spirit of mischief she made a wager with the ladies of her entourage that she could make the Swiss guard, who was stationed at the door smile. The Swiss guards are dressed in magnificent uniforms. They stand a erect and immovable as statues, well knowing the punishment for the least change of attitude.

In one of her gayest moods the beautiful young queen came down the magnificent hall, most royally attired and chatting gaily with her companions. When the party came near the door the queen hesitated a moment, glanced at her maids and then, deliberately plucking a rose from her corsage, stepped quickly to the immobile sentry and lightly dropped it on the hand gripping his musket. He saw the act but gave no sign of appreciating the honor that many a gallant cavalier would have risked his life for.

A bright flush suffused the countenance of the queen as she realized that she was in danger of losing her wager, and, instantly poisoning herself on the tip of her bejeweled white satin slippers, she reached up and with inimitable grace modestly kissed the cheek of the giant guard! Even then he made no salute to majesty, but his eyes slowly filled with tears. In spite of her frivolity the queen had a good heart and, touched by the apparent confusion of the sentry, she murmured a few friendly words, and the party passed on.

Gossip soon brought the incident to the notice of the king, and he caused the guard to be brought into the royal presence. The poor fellow was greatly alarmed, but on being assured that no harm would come to him he said that he had been long separated from his wife whom he adored, and that the beautiful queen so strongly reminded him of her that he could not control his emotion.

The king gave the guard a present of money, and dismissed him with a promise that he should immediately have leave of absence. Thus the prank ended happily, but the queen lost her wager, the character of which is not recorded.

Reform in Caveland

Officer Stonebat—"I'm goin' down to pinch Skinkpans for sellin' that new drink he makes out of spoiled grape juice."

Dogfang—"I thought you rather liked that drink."

Stonebat—"I did, but he doesn't pass me his share."

For Posterity.

A man does not plant a tree for himself, he plants it for posterity. And, sitting idly in the sunshine, I think at times of the unborn people who will, to some small extent, be indebted to me. Remember me kindly, ye future men and women.—Alexander Smith.

—AND THE WORST IS YET TO COME

CONSERVING OUR HEALTH RESOURCES

WORK OF DEPARTMENT OF PUBLIC HEALTH.

Progress Attained in Combating the Narcotic Drug Evil in the Dominion.

It is an axiom that the good health of a people constitutes a great national resource. Canada possesses a bracing and healthful climate and her people have a high average of strength and vitality. Many agencies are at work for the combating and eventual eradication of preventable disease, and recently there has been added to this work a campaign against the use of harmful drugs. The narcotic drug habit which is naturally a cause of lowered vitality and efficiency in the nation is one of the evils which the Canadian Department of Health has, since its establishment four years ago, striven to stamp out and with gratifying results. As the table given below shows, between the years 1919 and 1922, importations of cocaine and morphine through the regular channels of trade fell off about seventy-five per cent, while only about one-fifteenth as much crude opium was imported in the latter as in the former year.

The Drug Evil in Canada.

The narcotic drug evil in Canada can be traced back to about 1890, but it was not until 1908 that its presence was brought very noticeably to the attention of the people of the Dominion. In the later year certain riots broke out in a number of cities on the Pacific coast and much damage was done to the property of the Chinese residents. Claims for damages were presented to the Dominion Government in which were included large amounts for quantities of opium that were destroyed. As a result of an investigation conducted at that time it was ascertained that there existed several factories carrying on an extensive business in opium manufacture, particularly in the cities of Vancouver, Victoria, and New Westminster. The combined annual gross receipts of these concerns amounted to over \$600,000. The customs returns showed that in the year 1908 the importation of the drug into Canada had reached the great amount

of 88,013 pounds or in other words forty-four tons. Between seventy and one hundred persons were employed in the opium factories and some of the factories had been in existence for over twenty years, although the majority of them had been only recently established. It was asserted by the owners of these establishments that all the opium manufactured was consumed in Canada and that almost as much of the product was sold to the white people as to the Chinese.

The report of the investigation resulted in the first legislation, dealing with the suppression of the use of opium, being placed on the statute books in 1908. In 1910, as a result of this Act, the amount of opium imported was only 3,576 pounds, a reduction of over forty tons in two years.

The Hague Convention.

It was found, however, that in other parts of Canada the opium evil had spread and the improper use of opium, morphine and cocaine had reached alarming proportions. Amendments to cover morphine and cocaine were made to the Act in 1911. Later, as one of the British Dominions, Canada subscribed to the convention reached at the International opium conference held at The Hague. However, the outbreak of war left the ratification in abeyance and it was not until the treaties of peace with Germany, Austria, and Bulgaria were being drawn up that further action was taken. The convention was incorporated in the League of Nations, which made it necessary for a revision of the existing Canadian laws. As a result of this the present Opium and Narcotic Drug Act was passed and brought into force in 1920. The Act was carefully drafted and under it all legitimate dealers are licensed, so that the Government knows the exact quantity of each individual shipment imported or exported through the regular channels of trade. Under this system of licensing the following reductions in the amount of narcotic drugs imported into Canada took place:

	Cocaine	Morphine	Crude Opium
	oz.	oz.	lbs.
1919	12,333	20,987	34,263
1920	6,968	28,195	13,626
1921	3,310	12,124	2,953
1922	2,952	5,774	1,706

Illicit Traffic.

The illicit traffic, however, constitutes a much more difficult problem as supplies are smuggled in by every conceivable means "through the under-

Stories About Well-Known People

Gallant Mr. Button.

We have all read how Mr. Brownlie, President of the Amalgamated Engineers, assured the Duke of York that he would be "safe in the hands of a Scottish lassie." Just before their marriage the Duke introduced Mr. Brownlie to Lady Elizabeth with "Here is the Scottish lassie, Mr. Brownlie."

There was another Labor leader, Mr. F. S. Button, ex-member of the executive committee of the A.E.U., who was presented to the Duchess.

"She's more charming even than everyone says," said Mr. Button.

"Why didn't you tell her so?" remarked another Labor leader.

"I did," replied Mr. Button, and went on: "And she's prettier than any photograph can convey."

"Why didn't you tell her so?" asked the other Labor leader.

"I did," said Mr. Button.

Hot Stuff.

Have you ever heard the story of the Indian missionary who allowed an American to sample some chutney he was bringing home? Silas K. Hocking tells it in "My Book of Memory."

After the first spoonful of chutney had been swallowed the American seemed overwhelmed by some great emotion. When he recovered he turned a reproachful fact on the missionary.

"You're a missionary?" he asked.

"That is so," was the reply.

"And I suppose you believe in Hell fire; but I'm blamed if you're not the first who ever took samples round with him!"

Delightful Memories.

Sir Henry Robinson's book, "Memories: Wise and Otherwise," is delightful. It is full of intimate pictures of

the great, from kings downwards, and one of the nicest concerns a visit of the late King Edward to an Irish town, when Sir Henry was the last of the Vice-Presidents of the old Local Government Board for Ireland.

"The oldest inhabitant," he writes, "thinking he could make his presence felt, shouted for three cheers for the King, when he suddenly realized that he did not know what his title was. However, he made a shot at it, and roared out, 'Three cheers for King Henry the Sixth!'"

"The populace was quite satisfied, and 'Three cheers for King Henry the Sixth!' was the cry along all the roads and up the mountain-sides. The King did not understand this at first, and beckoned to me, and asked me what the people knew about Henry VI., and when I explained that they thought it was his Majesty's title, he accepted the cheers with the usual acknowledgment."

The Prince's Popularity.

Here's the latest regarding the Prince of Wales. It refers to the Prince's popularity, and to the reason thereof.

"It's popular, that's a fact!" observed a workman, watching the Prince go by, and welcoming the opportunity to knock off for two minutes.

"Ay, a fact it is!" replied the male. "Blimy, I won't sometimes 'ow a chap can get as popular as 'im!'"

"It's understandin' 'ot does it," replied the other. "See, its like this yer! If I was 'ungry and awt yer for a bit o' blinkin' bread, you'd give it me!"

"So I would!"

"Now, the Prince, 'e just wouldn't do that; 'e'd give me a blinkin' rock-cake. See! 'E jest under stands things won't erful, 'e does!"

Lilacs.

Lilacs are always memory flowers. They grow beside old country places, Closed doors and windows blank of faces;

They guard old secrets, hushed and grave,

Through early summer's singing hours

Heavy with fragrance of the brave.

I know a house upon a hill,

Wind swept and looking to the tide;

That house—the fragrance folds me

still

Wherever I abide.

Two pictures hang upon the wall;

The boyish eyes look out to sea,

Far and away beyond the call

Of bird and field and tree.

There many a summer afternoon

The glass is etched with shadows

pale

Of lilac bough and clouds of June

And one white, breasting sail.

Shadows of sea and flowers flow

Across each earnest pictured face;

They who had lived where lilacs blow

Died where the waves give place.

This old, dim spot the road led past—

The long, sad road of marching men,

To strife and tumult, and at last

To peace and dreams again.

And she who watched her sons pass

by,

Returning not on land or tide,

Folded her brave hands reverently

In lilac time and died.

Lilacs are always memory flowers,

They grow beside old country places,

Closed doors and windows blank of

faces;

They guard old secrets, hushed and

grave,

Through early summer's singing hours,

Fragrant with memory of the brave.

—Bertha Cleveland Jones.

How Gold Fish Began.

Goldfish are the result of the elimination of the sombre colors in a variety of carp by selective breeding begun by the Chinese and Japanese in the sixteenth century.

Promise is good; intention is better; performance is best.

Our Canadian Song-Birds :

By P. A. Taverner, Ornithologist of the Canadian National Museum, Ottawa.

Appreciation of Bird Songs Largely a Matter of Sentiment and Tradition.

With the belated arrival of Spring, Canadian bird-lovers are once more on the lookout for the return of their feathered favorites. Canada's song-birds, beloved as they are by her native sons and daughters, have at times been objects of disparaging reference by new-comers to our country. In this connection it may be pointed out that appreciation of bird songs is largely a matter of sentiment, familiarity, association and tradition. Coming here where all is new, the bird songs carry no memories and association to the visitor from foreign shores, even if that shore is no more foreign than the British Isles.

It is not at all surprising that the newcomer fails to hear the music that we read into them. William Brewster failed to appreciate the white-throated sparrow when he first heard it in the north, and such sincere American bird lovers as Frank Chapman, John Burrows and our own Will Saunders expressed themselves disappointed at the first hearing of British birds. One friend visiting England described the skylark as "that squeaking up there." I am not insinuating that the skylark

squeaks but merely attempting to demonstrate that appreciation of bird songs depends as much on what we bring to them as what they bring to us. An Englishman can no more justly appreciate our birds than we can his.

Our Singers Are Shy.

Unfortunately most of our finest singers have to be unobtrusively wooed. To a native Canadian no song can be sweeter than the cheerful chirrup of the robin (American), the plaintive, graceful warble of the bluebird or the golden flute notes of the meadow lark. They are not mere songs to us, they are the voice of Spring, the beauty of the blossoming orchard and the memories of the old home. It is impossible to judge them dispassionately and in cold blood. These associations are, to us, as much a part of the songs as the notes themselves.

Have you ever heard a brown thrasher in Spring-time, singing hour after hour from the topmost spray of a thorn bush, or a really good catbird when he forgets interpolations? The house was bubbling and boiling over or that wondrous sound from the tiny ruby-

Making Homes for the Birds.

It is a fact that, although we have so many species of birds around us, few people are familiar with them, and it is the more surprising, when we consider that not a few of our Canadian songsters will nest close to human habitations in shelters or boxes provided for them. Among the most attractive are little Jenny Wren, the living insect destroyer, the darting tree swallow which keeps the air free of mosquitoes and the pesky, shy, Bluebird,

"... shifting his light load of song From post to post along the cheerless fence."

—Emerson.

crowned kinglet? Have you heard the witching song of the winter wren in the black tangle of the deep spruce

woods, the absolute purity of tone of the hermit thrush or the golden jangling chain of the veery? The American goldfinch has a charming little warble as well as his merry "per-chick-o-pee" that he utters as he strings his graceful loops of flight. Is there anything more perfectly in keeping with the night, its woody hollows and soft shadows, than the plaintive whip-poor-will? Have you ever heard the long loud wail of the loon over the black water to an accompaniment of whispering pines?

No Intruders Wanted.

This is our music and it is truly Canadian and part of our fibre and soul. We do not want intruding, stranger birds. We can only have them at the expense of old friends. There are only so many bird niches in the economic scheme of things. To introduce one means the displacement of another, and the price is too steep to pay.

Il-advised introductions have been attempted again and again. There are probably few land birds on the British list that at one time or another some-

where in the country enthusiasts have not attempted to naturalize. With few exceptions they have, thank Providence, all failed. Yes, there must be Guardian Angels to protect us from ourselves. Goldfinches and skylarks held on precariously about New York and elsewhere but never made secure establishment. The only success we have had succeeded but too well. The Guardian Angel must have dozed. The house sparrow and the European starling are with us for keeps and we wish they weren't. Lately comes the report of the Japanese starling about Vancouver. Where it will end, goodness only knows, but we have little confidence in it. We hope it will be harmless but it has become a pest in Hawaii where it was also introduced.

So dangerous is this naturalization of foreign birds and animals deemed that their introduction is now forbidden and to-day no importations can be made in either Canada or the United States without special permission and if necessary guarantees against liberation or escape.—Canadian Forestry Magazine.

Train on Canadian National Railway leaves Lachute at 9:03 in the morning and at 12:01 p.m., on Monday, Wednesday and Friday for Hawkesbury and West. Also at 3:11 in the afternoon for St. Jerome and Huberdeau on Monday, Wednesday and Friday. At 10:30 a.m., for St. Jerome and Joliette on Tuesday, Thursday and Saturday.

The Misses D. and V. Hall have returned home for their holidays.

Mr. Robert S. McArthur and Miss Ethel Dixon are at Lachute taking the Academy Examinations.

Mr. A. O. Lloyd and Mr. L. Cruise spent the week-end with his cousin Pete Cruise.

ARUNDEL.

The church services on Sunday next, July 1st, will be as follows: -

Laurel - Celebration of Holy Communion 10:30 a.m.
Glen 3:00 p.m.
Weir 7:30 p.m.

Grace Church, Arundel 7:30 p.m.
S.S. Grace Church 7:30 p.m.
Rev. Geo. H. Gagnon, M. A. Rector

ARUNDEL UNION CHURCH
Rockway 10:30 a.m.
Crystal Falls 3:00 p.m.
Arundel 7:30 p.m.
S.S. Arundel 7:30 p.m.

The union church was filled to capacity last Sunday evening, the occasion being the farewell of Rev. A. Johnson, whose new field of work is to be at Shawbridge, Rev. and Mrs. Johnson, who were very popular, will be greatly missed.

The very badly needed rain, came on Tuesday, and will mean thousands of dollars in the pockets of the farmers of this district. Owing to the continued dry, hot weather, following abnormally cool weather, growth was very slow, but the heavy rain, on the warmed ground will make all the difference.

We regret to say that Mrs. Thos. Bishop is confined to bed, with a severe attack of sciatic rheumatism.

Mr. Wm. Gass, who was here visiting his wife at her parent's home, has returned to Boston, Mrs. Gass following later on.

Mr. and Mrs. P. J. Elliott, of Westmount, and Mr. J. M. Nelson spent a very enjoyable four days visit to Mr. Elliott's cottage at Bark Lake, last week, and had some good fishing.

Mrs. Elliott returned home to instrument on Saturday, Mr. Elliott remaining with Mr. Nelson, awaiting the arrival of his three daughters, when all four will go to Bark Lake for the summer, followed later by Mrs. Elliott.

The June meeting of the Arundel Branch of the Women's Auxiliary, was held on Thursday, 14th, at the residence of Mrs. James Simon, the Secretary-Treasurer. Those present were: Pres., Mrs. Gagnon, Hon. Pres., Mrs. Wm. Scott, Sec. Treas., Mrs. Simon, Mrs. W. H. Kerr, Mrs. A. B. Morrison, Mrs. Moore, Mrs. J. M. Nelson, P.H.S.

Those were also present, as guests, Rev. G. H. Gagnon, Mrs. Joseph Boyd, Mrs. Stone and Miss Mary Stone and Miss Kathleen Morrison.

The meeting having been opened with for ago, by the president, the Hon. Sec'y read the minutes of the previous meeting, and presented the financial statement, and an motion
