COMING EVENTS

The Young People of Lachute, intend holding a Dance in the Oddfellows' Hall, on Friday evening, Mar. 2nd., 1928. Come and have a good time. Orchestra.

A Masquerade Carnival is being held in the Brownsburg Skating Rink on Saturday, March 3rd., 1928. \$60. value in prizes are being given to the Best Costume won by Lady, Girl, Gent and Boy. A special draw of lucky number and 2 special prizes for most comical costume will be given. Admission 25c. and 15c. Don't miss it.

Come and enjoy a good laugh in the Auditorium, on Friday, March 9th., at 8.30 p.m., when "Adam and Eva" will be presented.

DALEVILLE BAPTIST CHURCH—On Wednesday, March 7th., 1928.

A Social gathering on above date will be held, consisting of Supper, from 6.30 to 8.30, to be followed by a Lecture on the Great Pyramid of Egypt, by the Rev. J. Ford. A free will offering will be taken. All are welcome.

REX THEATRE

MAR. 4-5-6

"BEN HUR"
Admission 50-25

LADIES' CURLING.

The ladies paid a friendly visit to Montreal on Thursday last, where a pleasant time was spent curling with the Ladies of Outremont Club, resulting in a win for Lachute by being 2 points up. The Rinks were as follows:

Mrs. C. Walker Mrs. Rice
Mrs. H. Giles Miss Barron
Mrs. J. McGibbon Mrs. Cottingham
Mrs. Wilson Miss E. Fraser
(Skip)

On Wednesday one rink visited Hawkesbury where they were loyally entertained and were also victorious in a score of 10 to 5. The rink was composed of Mrs. Christie, Mrs. M. Gall, Miss A. Riddell and Miss E. Fraser. (Skip). In the evening a mixed Bonspiel took place in which Miss Alice Riddell was the only Lachute Player. She skipped the winning Rink whose players were presented with Pins, as a slight remembrance of the occasion.

CARD OF THANKS

Mrs. Zotique Rochon and family wish to thank all those who so kindly assisted in their recent sad bereavement and loss. Particularly The Council of Lachute, Mr. J. T. Ayers, H. Underhill for floral offerings and all who visited at the house or attended the funeral service.

SPRING IS COMING

And with it you should have a New Suit. Our samples of cloth have just arrived so come in and choose yours now. If you can't afford a new one call in and have the old one steam-pressed and made to look like new. While you wait.

R. DESLAURIERS.

EXPERT WATCHMAKER.

A good line of Wedding and Engagement Rings, also Watches, Silverware, Chinaware, Glassware, and all kinds of Souvenirs.

A. C. LAPIERRE, Jeweller.

Bethany Street, Lachute.

OBITUARY

THE LATE WM. S. TODD.

The death occurred on Sunday last after a long illness of Mr. Wm. S. Todd, aged 75 years. Deceased was the eldest son of the late Mr. and Mrs. Andrew Todd, of Lachute Road, and was born in St. Eustache and had lived all his life with the exception of 4 years spent in California as a young man, in Lachute, St. Andrews and vicinity, and was for many years Secretary of School Board and Council in St. Andrews. He was married to Miss Agnes Rodger, who predeceased him 7 months ago. Besides his adopted daughter, Elsie, he leaves 3 sisters, Mrs. McKerscher, of St. Andrews; Mrs. Currie, Montreal; and Mrs. Jas. MacKimmie, of Lachute. Five brothers, David, of Lachute Road; Andrew, of California; John, of Winnipeg; Henry, of Vancouver; and Robert, of Lachute, to mourn his loss.

The funeral took place on Wednesday from the Presbyterian Church, the service being conducted by Rev. Henry Cousens, in the midst of a large number of relatives and friends. The pall-bearers were his three brothers, David, John and Robert, Geo. Rodger, Wm. Todd and Dan Currie.

Those attending from a distance were Mrs. Campbell, McOuat, of Cowansville; Mr. and Mrs. D. Currie, of Montreal; and Mr. John, Todd, of Winnipeg.

THE LATE DR. PAGER.

The somewhat sudden death of Dr. Pager of St. Hermas, will be learned with deep regret by his many friends throughout Lachute and neighboring country. Dr. Pager was Provincial Revenue Inspector for this district and was a man eminently qualified for the position which he so faithfully carried on for the Provincial Government. His demise leaves a vacancy for which we understand many aspirants are laying claim. It is said that St. Jerome is making a strong bid for the office, but we feel strongly that Lachute has a more justifiable right of location and we hope that the position will be landed by one of our townsmen.

THE LATE EDMUND HODGE

After an illness of some months the sudden death occurred on Monday, Feb. 26th., at Thomas' Gore, of Edmund Hodge, aged 52. Deceased was the son of the late Mr. and Mrs. Robert Hodge and had lived in Thos. Gore all his life. He was married to Elizabeth Slade, who with 6 children are left to mourn a loving husband and father. He also leaves 3 brothers, Amin, Orlando and Levi, of Thomas' Gore, and 2 sisters, Flora and Lottie, of Cowley, Alta. Funeral took place on Thursday, March 1st., conducted by Rev. J. Cassidy, who spoke many comforting words to the bereaved family.

THE LATE P. O. TRUDEL

The death occurred of Mr. P. O. Trudel, on Wednesday last, after a short illness of only a few months. Deceased gentleman was in business at Lachute Mills where he conducted a small Javel Water Factory. He was 74 years of age and had been in good health until November last, when he was taken ill, and eventually succumbed to heart failure.

He leaves to mourn his loss, two daughters, Mrs. Belair, of Montreal; and Mrs. Danthony, of Westville, U. S. A.; also two sons Mr. Arson Trudel, of Montreal; and U. J. Trudel of Lachute Mills. The funeral will be conducted on Saturday, at 8.30 to St. Anastasia Church, and thence to R. C. Cemetery.

LOCAL NEWS.

Mr. Wm. Duffy spent a few days in Montreal recently.

Miss Jean McGibbon is spending a short visit with her brother in Quebec.

Miss Mary Hope, of Montreal, was the guest of her mother, for the week-end.

Mrs. Richard Hodge returned to Montreal, having spent the past week the guest of Mrs. John Boyd.

Misses A. and M. Dulude, A. Combie, and I. Rockbrune spent the week-end in Montreal visiting friends.

Mrs. Robert Beers and Miss Louise Parker, of Montreal, were guests of Mrs. A. Beers for the week-end.

Mr. F. St. Denis of East Ray, was the guest of Mr. and Mrs. W. J. Deacon for a few days this week.

Mrs. Jas. Bell and Mrs. W. Sturt, of Montreal, were guests of Mr. and Mrs. J. A. Rice for the week-end.

Mr. J. Boyd was in Morin Heights last week, attending the funeral of his sister-in-law, Mrs. Wm. Boyd.

Miss Rita Boyd, of Calumet, was the guest of her parents, Mr. and Mrs. John Boyd for the week-end.

Miss Yearsley, of the Montreal General Hospital, was the week-end guest of her sister, Mrs. W. R. Fraser.

Miss Margaret Armstrong and Mr. E. Adams, of Montreal, were the week-end guests of Mr. and Mrs. Jas. Armstrong.

Mrs. Melvin Burke, of Flint, Mich., arrived in town on Monday last to spend a short vacation with her parents Mr. and Mrs. Wm. Doig.

Mr. and Mrs. P. Paquin returned on Monday from San Francisco, where they have spent a most pleasant holiday for the last two months visiting relatives and friends.

The Mission Band, of the Baptist Church spent a pleasant afternoon and evening at the home of Miss M. McPhail, on Saturday last, at a toboggan and sliding party.

Mr. Lionel Lafleur, son of Mr. and Mrs. Louis Lafleur, underwent an operation in St. Mary's Hospital, Montreal, and his many friends are pleased to hear that he is doing well.

Miss Florence Armstrong, of MacDonald College, and Mr. Linton Armstrong, of the United Theological College, Montreal, were week-end guests of Mr. and Mrs. Geo. Armstrong for the week-end.

A Masquerade Carnival will be held in the Lachute Rink, on Friday, Mar. 2nd. All skaters must appear in costume and prizes will be given for the Best Lady, Gent, Boy or Girl. There will also be Moonlight Skating and Races. Don't miss it.

—Adam and Eva, the 3 Act Comedy being presented by the Lachute Dramatic Society, on Friday, March 9th., should not be missed by anyone. Procure your tickets now, come early and be sure of a good seat. Tickets may be procured at the stores of W. D. McOuat and G. Y. Deacon. Reserved seats on sale at the store of Robert McFaul.

Messrs. J. D. Davis, Morin Heights, and R. A. Giles, were in Montreal on Friday last, attending a re-union of the Sergeants of the 148th. Battalion. Among those present were the commanding officer Col. A. A. MacGee, Major P. Sise, Major Eve, Capt. Cutmore and some 20 of the old boys. A very pleasant time was spent and many amusing incidents related of experiences while soldiering. It is planned to make this an annual event.

A most successful afternoon tea, was held on Saturday last, by the C. G. I. T. of the Presbyterian Church, in the S. School Hall, when the sum of \$23.00 was realized.

CASH AND CARRY

The Cash and Carry System seems to have taken quite a hold on the Grocery Leaders, and as Mr. Whissell was the first to adopt the System in town it would appear that it will soon be in general use, for Mr. Whissell is still going strong, then there is The Dominion Stores which now have strong competition with the Laporte-Martin Wholesale Houses who intend opening another store in town in addition to their tie up with Mr. J. D. Lemay on Bethany Street and it is rumored that the Atlantic and Pacific Stores are seeking location here. This looks as if our housewives will be able to keep the pantry well stocked and save money in the process, by the ready purchase and carriage of their own goods.

ADAM AND EVA

Now that the members of the casts are very busy touching up their parts, great interest in the coming play, "Adam and Eva", is being aroused. Following the success last year of "Daddy Long-Legs" it was agreed that another comedy would be welcomed, and after a thorough search a light comedy was chosen. "Adam and Eva" you will find is full of fun, giving ample scope for good clean humour, and with sufficient plot to keep up the interest. The story of how the rich man's family, pampered and spoiled, 'rise' to the occasion when called upon, and therein find real content, will capture the hearts of young and old. The play will be given on March 9th, in the Auditorium, and it is advisable to get tickets early.

HOCKEY

Such a good game of Hockey was experienced by the Hawkesbury Team on their last visit to Lachute that they have decided to pay us another visit and so will be over with a special train and a good crowd of supporters on Saturday night next. They have a good team as has Lachute, so it should be an A. I. game.

ARGENTEUIL AMATEUR HOCKEY ASSOCIATION

The Playoffs are now going strong between Ayers Limited and Brownsburg. Two legal games have been played, the first being won by Ayers Limited 3-2 on February 24th., the second, by Brownsburg 1-0 on February 29th. An other game was played in Lachute on Feb. 25th., but protested by Ayers Limited on the ground that the Brownsburg team was not representative of that town. In fact only two or three players, including substitutes, were from Brownsburg.

This leaves the two teams with each one game to their credit. The last and deciding game is to be played in Lachute on March 10th.

LACHUTE INDUSTRIAL NUMBER CREATES GREATER PUBLICITY

In writing up some of the main industries of the Ottawa Valley, the Ottawa Evening Journal, of Saturday last, pays fine tribute to Lachute in the publication of almost a page devoted to the Ayers Limited, which bears a large picture of our respected townsmen Mr. J. T. Ayers and an enlarged picture of the plant over which he is the energetic President. Our Industrial Number served a good purpose in bringing to attention the activities of our Town.

BROWNSBURG

Mr. Wm. J. Graham was in Montreal on Monday.

Mrs. Alex. Day was in Montreal over the week-end.

Mr. Bert Davis visited his parents over the week-end.

Mr. A. E. McAllister was in Montreal over the week-end.

Mr. and Mrs. Fred Hooper were in the city over the week-end.

Mr. E. Zimmers, of Montreal, visited his parents over the week-end. Two Grenville Boys skied from Grenville to Brownsburg last week-end.

Mr. Wallace Wilson, of McGill College, spent the week-end at his home here.

Mr. E. Quesnel, Mgr. of the Bank of Nova Scotia, spent the week-end in Ottawa.

Mr. E. Cockfield, Mr. G. Jenkins and Mr. J. Winslow spent the week-end in Montreal.

Miss Grace MacKiddie, of Montreal, is spending a few days this week with her parents.

Miss Eileen McGibbon who is in the Royal Victoria Hospital, is recovering and will be soon back to the Burg again.

Mrs. John Tomalty of Sask., who has been in Brownsburg for the past few months, has returned to her home.

Mr. Taylor, of Montreal, is now baking real Home-made bread in Brownsburg. A trial loaf will convince you that it is real home-made. He intends to open a shop within the next month here.

HOCKEY

Among the many interesting Hockey matches recently played in the neighborhood, there were two really good games which ought not to be allowed to pass unnoticed.

One was a match between teams of the Brownsburg and Lachute Scouts, played at Lachute as a return match. It was a strenuous game both sides displaying wonderful fineness, and resulted in a win for the visitors; the score being 5-3. After the game the Lachute team entertained their Brownsburg comrades in the regular Scout spirit.

Another match also played at Lachute was between the Brownsburg Scouts and Lachute Academy, and ended in favour of the visitors by 6-4.

We should like to see such matches made fixtures. Could not there be a second division of the League to take care of them?

BIRTHS.

HAMILTON, At Cedarcroft, St. Eustache, Que., on Feb. 24th., 1928, to Mr. and Mrs. J. Stanley Hamilton, a daughter.

BOYCE.—On February 24th., at the Royal Victoria Montreal Maternity Hospital, to Dr. and Mrs. J. Clifford Boyce, of Solon, Maine, a daughter.

DEATHS.

BOYD.—At Morin Heights, Que., on Friday, Feb. 24, Susan Hammond, beloved wife of the late Wm. Boyd, in her 65th. year. Funeral Sunday, Feb. 26, at 2 p.m.

TODD.—At Lachute, on Sunday, Feb. 26th., Wm. S. Todd, aged 75 years.

TRUDEL.—At Lachute Mills, on Wednesday, Feb. 29th., Pierre O. Trudel, in his 74th. year.

Stork Sense of Direction Innate, German Observatory Finds

Bavarian Professor's Experiments Show That Young Birds Fly Unerringly South Even if Leaderless

Diessen-Am-Ammersee.—At Rositten, the lonely spot of sand and salt marshes on the Kurische Nehrung, stands the great bird observatory in which so many experiments already have been made toward clearing up the problems of bird flight. The fitting out of the birds with rings bearing the date and the name of the observatory has led to many interesting results. Now Professor J. Thienemann, the director, is about to use the period of migration to make various new experiments in the hope of discovering something about the methods by which the birds find their way on their far flights to warmer lands. The question which the professor put to himself was the following:

"What happens if migratory birds, bred in the spring, are artificially held back in autumn, and let loose when all the other birds of the same species already have made their way to the South? They would be thrown back upon their own resources, are without a leader, cannot attend the 'bird

parliaments" and so on. How will such birds fly? Will an infallible sense of direction point them the way?"

Professor Thienemann thereupon set about finding answers to these problems and describes his procedure as follows:

"I decided to choose storks for purposes of experiment, because the route taken by these typical migratory birds to the southern extremity of Africa has been determined beyond possibility of doubt by the experiment of providing the birds with rings. Each of these rings bears a number and the words 'Vogelwarte Rositten, Germania.'"

Route Taken to Africa

"The route taken by the birds leads from East Prussia toward the south-east, through Hungary, over the Bosphorus, through Asia Minor and by way of Syria and Palestine to Africa, and then up the valley of the Nile and in the eastern half of the Dark Continent down to the Cape. This being established, I can at once observe whether any of my experimental storks diverge from the accustomed route."

Last year the professor made an experiment on a small scale. A few storks were artificially held back when the other storks were preparing

to fly. They were kept in an enclosure and were extremely restless and upset for a week or so after the others were gone. Then they quieted down and were set free. Bad weather set in and the storks made no attempt to set about the customary flight. However, a couple of weeks later, when the weather cleared they all set off at once. This was on September 18, 1926.

The next day they were sighted, flying in a group to the south of the Kurische Nehrung; the day after over the Samland, in East Prussia, and then nothing more was heard of them until the beginning of December, when the professor received a report from Athens that one had been found. It had been discovered, in company with others of a similar species, between Athens and Aulon. The foot ring, also was returned. The Greek police had forcibly retained it in the interests of science in spite of the protests of the fortunate owner, who wanted to keep the ring as a lucky talisman for himself and his family.

The finding of this stork showed that the experimental storks had flown further westward than the normal route.

"It is very strange," said Professor

Test To Be Repeated This Year on Larger Scale; Presence of Species Indicates Prosperous Area

Thienemann, "These birds grew up in the oases of Rositten. On both sides of them lay water, the Baltic Sea and the Kurische Haft, and to north and south the Nehrung, with its flat salt marshes stretched alike in both directions—why did not these birds fly off stupidly toward the north? On the contrary, they flew off quite correctly toward the south, although they had no leader. It would seem, therefore, that they have a feeling for the southerly direction."

"This year I have repeated the experiment on a much larger scale, for one must give chance as much space as possible. I am at present the happy owner and nurse of seventy-five young storks. It is no joke to be the foster-father of such a family. The problem of their daily dinner is not so lightly solved. The fishermen of Rositten are hard put to it to haul enough dabs out of the Kurische Haft, and the village boys, I am afraid, have become very inattentive to their lessons, for they think of nothing but catching frogs."

Perpetual Motion "Solved," But Problem is How to Stop Device

Machine Is Simple, Explains Young Serb Who Got Idea From Water Pump; Invention Patented and Experts' Opinion of Blueprints Is Flattering

Belgrade—Perpetual motion, which used to rank with the philosopher's stone as science's greatest problem, is a burning question no longer, if the claims of a young Serb, M. Asim Hajdarovitch, are accepted at their face value. His chief problem now is how to stop the machine, once it has been started.

The idea is very simple, Hajdarovitch explains, for it came to him when he saw a wheel pumping water out of a cistern. The machine consists of some wheels, with certain

weights on one of them. He says his machine is not ideal, but practical. His invention has been patented, and the opinion of experts who have seen the blueprints is very flattering.

When the first wheel starts the other wheels gradually assume a terrific speed, and in order to stop them many devices must be brought into play. It is suggested in scientific circles that this machine will create a technical revolution.

Hajdarovitch is without education and admits total ignorance of the laws of physics.

METROPOLITAN CHURCH, TORONTO

Recently destroyed by fire. The firemen saved the Carillon one of the finest in Canada.

The author of seven volumes of original lyrics, and the author of "The Dynasts" is one and the same man—Thomas Hardy. —N.Y. Herald-Tribune.

RATHER LISTEN THAN READ

He: Do you read love stories?
She: No; I like to have them told to me.

A man was smashed up in a railroad accident. The family received a wire saying: "Mr. Hess in railroad wreck. Both legs, both arms, back and neck broken, and skull fractured." And a few hours later a second dispatch arrived: "Not so bad as at first reported. One arm not broken."

THE LAST OF THE VICTORIANS

The Death of Thomas Hardy Closed the Career of the Last of the Great Victorians—For 50 Years He Enjoyed Fame, and Lived Long Enough to See His Books Definitely Among the Classics

By WILLIAM LYON PHELPS

Author of "Essays on Modern Novelists" and "The Advance of the English Novel"

I shall never forget the first time I read a novel by Thomas Hardy. I had felt an attack of "flu" coming, and, remembering that I had been cured of tonsillitis by reading "Treasure Island," I decided to read another good book, in the hope that it would divert both the mind and the cold. The volume I picked up had the inviting title, "A Pair of Blue Eyes."

I do not know how I had escaped hearing about Hardy's love of tragedy, but I began reading in that ignorance which has been called bliss. After I reached a certain point in the story the hero and the two heroines were in serious difficulties; but I had so often in other books seen even worse emergencies from which the leading characters had come off scot free that I felt no apprehension or alarm, merely curiosity to see how this clever author would manage it.

If any one reading this article has not read "A Pair of Blue Eyes" I invite you to stop half way through the narrative and ask yourself this question: In what way could the story end that would hurt my feelings most? And I feel sure no one would be able to imagine an ending so bad as the one in the last chapter. When I finished that novel I threw it as far as my diminished strength would permit; I vowed I would never read another book of Hardy. I went to bed and started there one week. Such was the effect produced on me by a pair of blue eyes.

But such is the inconsistency of human nature that within one year I had read his man's complete works. Since then I have reread many, as he is one of the few authors of our time whose books become more interesting on rereading. He was the Englishman whom I most wanted to meet; and my wish was gratified on a beautiful September day in the year 1906.

We were on a bicycle tour in southwestern England; at Weymouth I bought a copy of one of my favorites—"Far From the Madding Crowd"—and armed with this I called at Max Gate, Dorchester, the author's home, which looked like an illustration for "The Woodlanders." The servants informed me that Mr. Hardy would see me at 3 o'clock.

Max Gate was awaited in the garden with any sharper eagerness than I looked forward to that hour. I found him by his front door. He was clad in knickerbockers, possibly out of consideration for my informal bicyclist. He was a smallish, slender, wiry man, with a gray mustache and a gray face. And although his expression was grave, and though I never heard him laugh, he was as far from being severe as he was from being petulant. During our conversation—we sat together on a bench—he made no remark that savored either of cynicism or of bitterness. But he was, as might be expected, undeniably serious.

In two respects I grieved him, but I knew I ought to be sincere. He told me that he greatly preferred his poems to his novels, whereas I liked the novels much better. At that time his first volume of poems had been out only two years. He also said that he regarded the shooting of game birds as wicked, as sinful, and asked me if I indulged in that practice. Alas, I told him that I was very fond of shooting, though not in the English fashion. I was lucky to bag two or three birds in a day's march. He said that he had endeavored to get others to co-operate in an attempt to abolish shooting in England, but he rightly regarded the project as hopeless. It may be that

in this respect he was in advance of his time.

I got along better on other themes. I asked him what he thought a novel should be. He replied emphatically that it should always be a story; the foundation must be a fact. He did not admire the modern custom of writing treatises, diaries, propaganda, what not, and calling the thing a novel.

I told him that even if I had not known he had been a professional architect I should know it from reading his books. "Because I introduce so many architects?" "Oh, no," said I, "because the whole structure of your novels is so beautiful architecturally." And in fact, the outline of almost any one is as symmetrically engaging as a Greek statue.

Mrs. Hardy joined us. We walked about the garden and entered the house, where we saw some of her paintings. I was invited to come to tea the next day, and I told them that while I had rather do that than anything else, we had only a few days left in England, we were on a bicycle tour, and I must consult my partner (life). He said they would be having tea in the garden the next day at 5 o'clock anyhow, and we could come or not, as we found it convenient.

We Went

He was literally covered with cats. Several large cats were purring over him, and at different places on the lawn and in the shrubbery I saw saucers of milk. "Are all these your own cats?" "Oh, no, only a few of them. But may cats invite the cats of the neighborhood in to tea. They know that saucers of milk will be provided and many come who are not invited. They just hear about it." This pleased me, for I have always been an ardent catist. A poem that Mr. Hardy published many years later, "Last Words to a Dumb Friend," is the most beautiful and affecting tribute to a cat that I have ever seen.

I asked him if he had put much of his own experience into his novels. He said that "A Laodicean" had more of the events of his own life in it than any other of his books. That was published in 1881; during its composition he was seriously ill and expected to die. He was unable to write, and therefore dictated the whole novel from a horizontal attitude.

My admiration for Hardy's novels, almost idolatrous as it was and is, did not exceed my admiration of the man. He was simple, unaffected, quiet, genuine; and I felt that he would have immeasurable sympathy for any one in sorrow or trouble. My previous belief, that his pessimism was caused by sympathy for others, was strengthened by talking with him.

The dawn of the twentieth century found Thomas Hardy without a living rival among English writers. By common consent he stood first. He received all kinds of honors, university degrees, medals, and the highest distinction of all, the Order of Merit.

He won everything winnable except the Nobel prize, and in my opinion his friends did him a disservice by bringing his name up publicly every year. If the Nobel Prize were granted merely for literary distinction he might have received it long ago; but, like the Pulitzer prizes in this country, the Nobel Prize must be given to work of an idealistic and uplifting character.

Now, although there is not the slightest doubt of Hardy's literary eminence, or of the sincerity, beauty and nobility of his character, his philosophical views were atheistic and pessimistic. I say this not as an accusation, but as an accurate description.

He sincerely believed that "God" was an IT with no moral characteristics, and that men and women would have been happier and better off if they had not had minds, but had possessed only the senses of the lower animals; and how far astray his theories led him as to the actual conditions of modern life may be seen by the following extracts from "The Return of the Native":

"The view of life as a thing to be put up with, replacing the zest for existence which was so intense in early civilizations, must ultimately enter so thoroughly into the constitution of the advanced races that its facial expression will become accepted as a new artistic departure."

Is it any wonder that Hardy, with all his artistic genius, and with all his sincerity, failed to get the Nobel Prize?

One of the most remarkable things about his long life is that he attained eminence in four kinds of art. He was a successful and prize-winning architect; he became the foremost living English novelist, the last of the great Victorians, and is enrolled permanently—so far as we can see—with Dickens, Jane Austen and Fielding; he became one of the leading English poets of the twentieth century; his epic tragedy of the Napoleonic wars, "The Dynasts," has apparently given him a place among the great English dramatists, for it is safe to say that it will find readers for many years to come.

He always (after 1893) wished to be regarded as a poet, not as a novelist; he insisted that his poems were better than his prose and that they would live longer.

It is possible that "The Dynasts" will live as long as anything he wrote; but it is the novelist we think of first when his name is mentioned.

Had he never written a novel his poems would have won for him an audience; but it was fortunate for him that the poems were published with the tremendous prestige of his name. It is true, as he always insisted in later years, that his career as a poet, even going only by actual publication, was longer than his career as a novelist. He published

prose fiction for twenty-five years and poetry for nearly thirty.

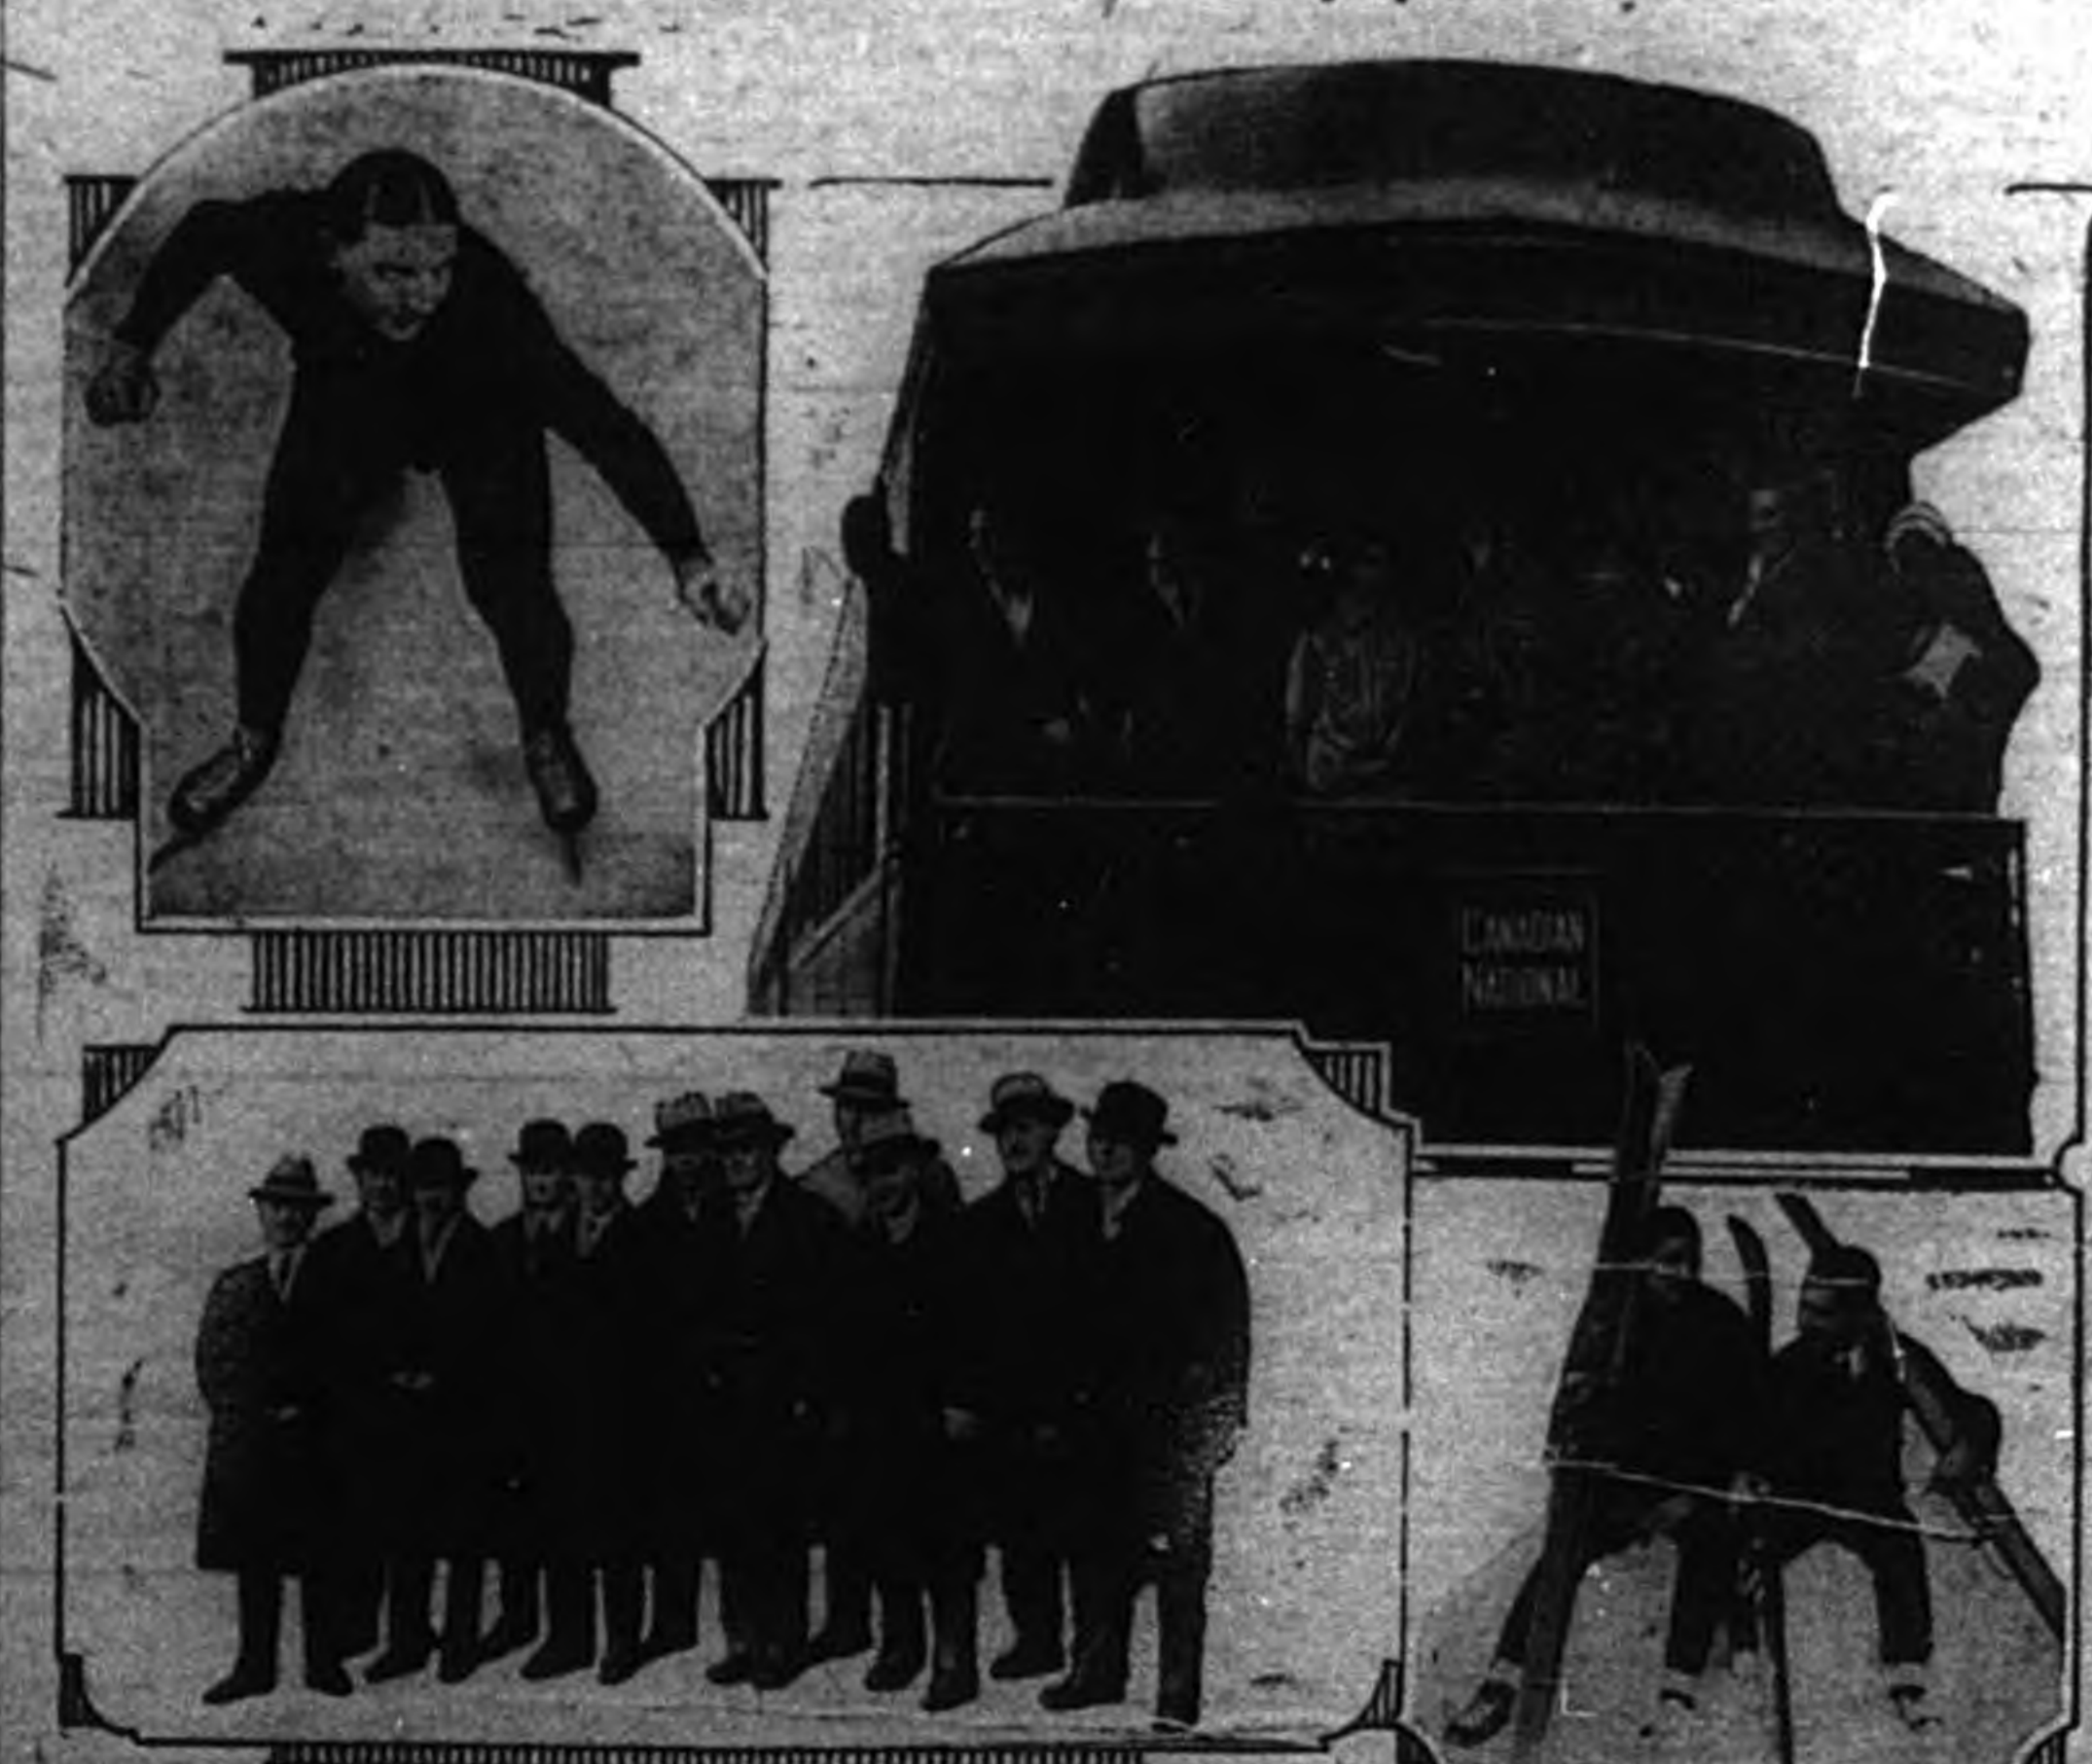

His poetry has enough quality to insure him a place among the poets of his time; but suppose you had to choose between Francis Thompson and Hardy, or between Alfred Housman and Hardy, or between Rudyard Kipling and Hardy, which would you take? His poetry is interesting because it proceeded from an interesting mind; but in poetry, style and expression are the main thing. There is no doubt that Hardy's mind was far more interesting than the mind of Alfred Tennyson; but no one of Hardy's poems, interesting, original, appealing as it may be, is equal in beauty of expression to "Ulysses."

It still seems clear to me that Hardy's novels are the most important part of his work; but in order that the other view may receive adequate expression, coming as it does from the highest possible source, I will quote, with the most profound respect and appreciation, from a letter that Mrs. Hardy was kind enough to write to me February 14, 1926, in which she notes "the curious fact American critics bestow nearly their whole attention on the first half of Mr. Hardy's literary career (1871-1895) and none on the second half (1895-1926). Yet the writings of the first half were dictated by accidents and circumstances not under his own control, while those of the second half were the result of uncontrolled personality."

When one remembers what time has done to critical pronouncements and judgments one is—or should be—humble. It is, of course, possible that some centuries from now Hardy will be known chiefly as a poet; to-day one can express only personal preferences. It has always been thought a good answer to the Baconian fanatics that for one man to write the thirty-seven plays was marvelous; that for another man to write the Essay was marvelous, but that for one man to write both was inconceivable.

It is an amazing fact in our own time that the author of "Tess," "The Return of the Native," "Far From the Madding Crowd," "The Woodlanders,"

Canadian Athletes Leave For Olympic Games

Canada's representatives at the Olympic Games at St. Moritz, Switzerland, now on their way across the ocean, journeyed from their homes to the seaboard via Canadian National Railways. Most of the party were photographed by the Canadian National

camera man at Montreal en route to Halifax. Photographs show: Lower left, The Varsity Grads hockey team, of Toronto; right, Lohan and Dupuis of Montreal and Ottawa respectively, present Canada in the speed skating events.

Do Popovers Pop?

The Conduct of the Popover Becomes More Predictable if a Standardized Recipe Is Used

There is something about popovers, apparently, that induces a general feeling of inadequacy in otherwise self-confident cooks. And that something, to draw conclusions from our own experience, is as likely as not the fact that in every cookbook you find an entirely different recipe for making hot bread. Apparently there are as many different ways to make popovers as there are ways to raise a baby, and each adviser insists that her way is the only possible road to success.

Popovers may be made with one, two or three eggs, according to the cookbook you use. The recipe may or may not call for a little butter. Some authorities take a firm stand about the necessity of using heavy iron pans for baking the popovers, while others ignore this matter completely. Practically no two cookbooks give identical directions for regulating the oven temperature for baking popovers. One recipe will advise a quick oven and another will recommend a slow oven throughout the baking time. If definite temperatures are given they may vary from 350 to 475 degrees in various cookbooks.

It is easy to see, in view of all this variation in recipes, why so simple a thing as a popover may go astray as often as not. That the popover may truly be simple, tractable and easily managed was recently proved in the research and testing kitchen of a store company. All the popover recipes available were tested and the results were carefully compared. It was found that satisfactory popovers may be made by using the following recipe:

A Tested Recipe

1 cup flour, 1 cup milk, 1 egg, ¼ teaspoon salt.

The addition of one tablespoon of fat will increase the tenderness of this product.

The addition of one egg will also increase the tenderness of the popovers, but a three-egg recipe results in an eggy flavor.

The most desirable recipe for popovers was found to be: 1 cup flour, 1 cup milk, 2 eggs, 1 tablespoon melted butter, ¼ teaspoon salt.

Add the beaten egg to the milk and combine slowly with the sifted flour and salt, beating just enough to mix thoroughly. Beating the whites and yolks of eggs separately not only does not improve the product, but causes the texture to become somewhat similar to that of muffins.

The best temperature for baking popovers was found to be 450 degrees Fahrenheit for 30 minutes and then 350 degrees for 15 minutes.

Melt the butter and add it last. Use heavy iron muffin pans, previously heated for ten minutes in an oven heated to 450 degrees. Pour about one and one-half tablespoons of batter into each small pan.

"When the time comes for New Year's resolutions the first thing a man generally gives up is the price of a table reservation."

Quits

"Why were you late at Sunday school this morning, Tom?" asked the teacher.

"Why, the bell rang before I got here," the little fellow explained.

Carpet is purchased by the yard and worn out by the foot.

FOUND A HEALTH BUILDING TONIC

A Nova Scotia Lady Was in an Anaemic Condition.

Men and women who do not sleep well and are not refreshed and strengthened by a night's rest, are generally suffering from thin, watery blood. The nerves fail to get the nourishment they demand and headaches and a worn-out feeling is the result. Building up the blood is the one sure step to renewed health and strength, and for this purpose nothing else can equal Dr. Williams' Pink Pills. From first dose to last they enrich and purify the blood, and in this way promote better appetite, better rest at night, and renewed strength.

Mrs. Mary E. Uhlman, Williams-town, N.S., writes: "I have received so much benefit from Dr. Williams' Pink Pills, that I would feel myself ungrateful if I did not let you know."

"I was in a very bad state of health and reached the stage where I had to remain in bed. A doctor was called in and he told me I had no organic trouble, but was simply run down from overwork. I had been left with a family to support, which I did by dressmaking. The doctor said my blood had almost turned to water, and advised a rest cure. I did not see how it was possible for me to take a very long rest, so I decided to try Dr. Williams' Pink Pills. Soon I found my strength returning and before very long I was able to go about my duties as usual again. This was a few years ago, and my health remained good until about a year ago, when I broke out with humor of the blood. Again I consulted the doctor, who said my blood had become so thin that it had really poisoned itself. I told him I had bought several boxes of Dr. Williams' Pink Pills, and he told me to go on taking them as he thought they were just what I needed. I took eight boxes and again was in good health. I can therefore recommend these pills to all in a weak or run-down condition."

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50 cents a box. Try them today.

A sergeant-major, relating his experiences in the Great War, told the company in the mess-room that on several nights the temperature was down to zero. "That nothing!" remarked a sergeant. "What's nothing?" said the sergeant-major, evidently angered. "Zero!" was the sergeant's quiet answer.

NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' course of training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and traveling expenses to and from New York. For further information write the Superintendent.

OWL-LAFFS

O. W. L.
(On With Laughter)

Little Boy (on the beach)—"Mum-mum, I want to go deep into the sea."
Mother—"My dear, you cannot."
Little Boy—"But, Mummy, daddy does."

Mother—"Yes, but you see his life is insured."

Marshall (on phone)—"Yes, this is the fire department. Do you want to report a fire?"
New Bride—"Oh, no, I just want to order coal for the winter."

Seven Stages of Matrimony.

- 1. Patrimony
- 2. Ceremony
- 3. Parsimony
- 4. Inharmonymy
- 5. Acrimony
- 6. Alimony
- 7. Out o' money

A friend of mine was discussing his roommate the other day. He said: "Fred is one of those fellows who would hold the lamp while his mother chopped the wood."

Nothing can take the place of common sense.

"O mother, guess what! I just saw a lady with great long hair gathered up in a bump on top of her head and held there with pieces of best wire."

He kissed Helen.
Hell ensued.
He left Helen.
Helen sued.

"The cat was making an awful noise last night."
"Yes, ever since she ate the canary she thinks she can sing."

It is said a diamond will turn green when exposed to the rays of radium. We have never tried the experiment, for two reasons: One is that we have no diamond, the other that we lack the radium.

He—"I saw an attractive selection of garters on the street to-day."
She—"Where on the street?"
"Just above the knee."

Man, who always used to like to head the procession, now since the era of short skirts seems to want to lag behind.

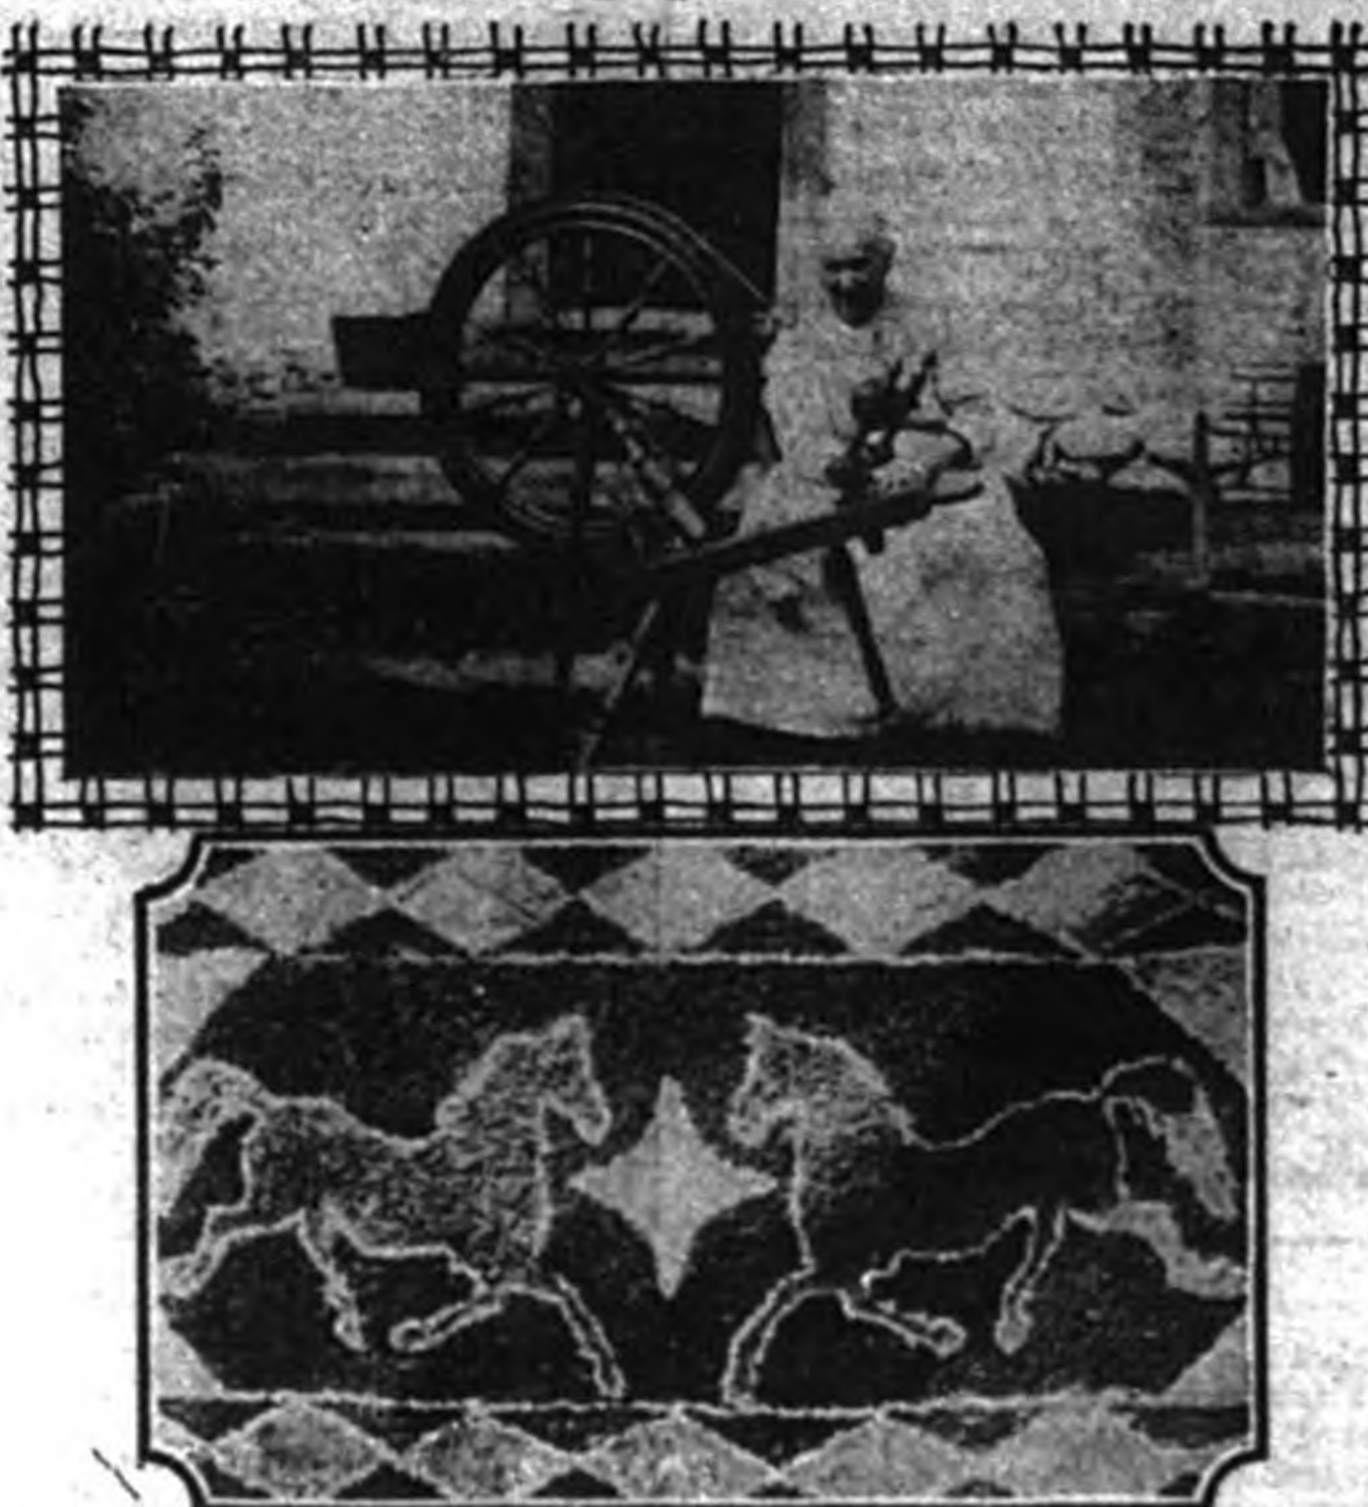

Teacher—"Robert, here is an example in subtraction. Seven boys went down to the creek to bathe, but two of them had been told not to go into the water. Now, can you inform me how many went in?"
Robert—"Yes'm, seven."

If you are looking for revenge you'll find it in forgiveness.

The only reason that most flappers don't look more foolish than they do is because they can't grow sideburns.

Encouraging Home Crafts

One extraordinary result of the immense tourist traffic to Canada, especially in the eastern section, is the revival of home industries which in some cases have not been practised to any great extent for many years. So much so, that visitors to Quebec Province have been afforded the privilege of seeing rug-weaving, which is again flourishing after many years of disuse.

Tourists naturally desire to take home with them something of unique design or individual charm which cannot be obtained at home. They also look for something which had an attachment to and is representative of

the country they have toured. Rugs especially are much appreciated, and in scores of homes, nimble fingers are executing the designs of fifty to a hundred years ago, while there is great rivalry in the creation of new and artistic patterns representative of the country and atmosphere in which the workers live.

The revival of an old industry is due in part to the festivals promoted by the Canadian Pacific Railway, where exhibitions of this art are shown and greatly appreciated by interested spectators. Another festival of this kind will be given soon in Quebec, while others will be held in Banff and Vancouver.

GREAT PRAISE FOR BABY'S OWN TABLETS

The Dr. Williams' Medicine Co. has received the following letter from Mrs. Griffith, of 21, Merchison Ave., East Hamilton, Ont., concerning her experience with Baby's Own Tablets:

Dear Sirs,—I wish to thank you for the handy little booklet you sent me on the Care of Children. My baby boy was six weeks old when I first used Baby's Own Tablets, being new to Canada, but since the first proof of their many uses in bringing up a family, I have never been without them, for they are worth their weight in gold. There is no trouble in getting the little ones to take them and they often prevent an illness if taken in time. My first baby is now, at the age of four and a half years, a picture of health, and my nine-month-old baby is also well and happy. They are both a real good sample of what Baby's Own Tablets can do, for I have never yet needed a doctor for either of them.

The booklet to which Mrs. Griffith refers is entitled "Care of the Baby," and treats with what a mother ought to know for baby's sake. A copy of the booklet will be sent free to anyone requesting same from The Dr. Williams' Medicine Co., Brockville, Ont.

American Woman Gives Church 32-Carat Diamond

York, England.—A 32-carat diamond, the gift of an American woman, now studs a golden chalice of York Minster, the cathedral which has celebrated the thirteen hundredth anniversary of its founding.

The donor is Mrs. Lily Forepaugh, of Brewster, N.Y., a former Yorkshire woman. Mrs. Forepaugh visited England last summer and made arrangements for the presentation of the jewel.

Canon C. C. Bell showed Mrs. Forepaugh the various ornaments of the Minster, especially the chalices, but Mrs. Forepaugh was unable to find any which seemed suitable to enshrine the diamond. She then arranged to have a chalice and paten made at her own expense, the chalice to contain the diamond. Mrs. Forepaugh said the jewel had formed part of a brooch which had been given to her as a wedding present by her husband.

8-Hour Day for Horses Asked by French League

Paris.—An eight-hour day and one day off a week for horses is the starting point of an animals' Magna Charta.

The French League for the Protection of Animals hopes eventually to get the League of Nations to sanction these proposed rights of dumb animals.

Dr. E. G. See, head of the protective society, is actively seeking support for his plan. His proposal is that a number of laws applicable to the labor of man be applied by the government to the four-footed beasts which are protected now only against extreme physical abuse.

The eight-hour law, he says, and the six-day week, are needed as badly by horses as by man. The difference is that the horse has no vote and he doesn't go on strike for better working conditions and more pay. He works for his board and sometimes doesn't get it.

Woodsmen—Keep Minard's handy.

From Rab and His Friends
"Who made you?" was asked of a small girl. She replied, "God made me that length," indicating with her two hands the ordinary size of a newborn infant; "and I grewed the rest myself."

—This story was current in Scotland long before Topsy "Spects I grewed."

The BABY

Why do so many, many babies of to-day escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, or constipation, or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

NOT THIS LITTLE GIRL
"I trust that you're not a drinking girl like so many of our younger set of today."
"No, indeed! Not me! I'm cutting out the old demon for the New Year."

Minard's Liniment for sick animals.

Sore Back

Drive away the pain by massage with Minard's.

MINARD'S "KING OF PAIN" LINIMENT

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

STILL THEY COME

Letters of appreciation for the Industrial Number are still being received from appreciative readers and we are pleased to pass along a letter from one of our old townsmen in British Columbia which we are sure will be read with great interest.

Nakusp, B. C., Feb. 8, 1928.

Editor, "Watchman,"
Lachute, Que.

Dear Sir,—
I must not let another week pass without writing to thank you for the Industrial Number of the "Lachute Watchman" which you sent me several weeks ago. I was reminded of my negligence when I read the letters of commendation in one of the last numbers.

I wish to tell you that I was much delighted with your enterprise and enjoyed every page of it. It made me feel proud that he was raised in the Town of Lachute and the County of Argenteuil. I was specially interested in the Historical Sketch from the corner stone of Henry's Church. It is the first time I had ever read it in the Watchman.

By the way, when I was home at the time of my mother's death six years ago, a couple of very old documents were found among the papers of my grand uncle, Lt.-Col. Thomas Barron, which might be of interest. One was a letter from one of the first Presbyterian ministers at St. Andrews endeavouring to make arrangements for a Presbyterian service at Lachute. I believe this old letter was turned over to Rev. Mr. MacKinnon. If you apply to him you might be able to see it.

The other was a document relating to the first educational enterprise at Lachute. This was turned over to Inspector J. W. McQuat, and I think he sent it to the Archives at Quebec. He will be able to inform you.

I was talking to some tourists recently who had passed through Lachute last summer. They were greatly interested when I told them that the scene of the encounter of Dollard and his sixteen brave comrades with the Iroquois Indians was only some ten miles from Lachute. They were much disappointed that they had missed seeing the monument, not knowing about it. They would have gone out of their way to see it with its inscription, "Ici ont généreusement donné leur vie pour la Nouvelle France, etc."

There are other points that would also attract tourists to the County of Argenteuil, if they were known.

I have been trying for some time to find out the origin of the name Argenteuil. The very name would seem to indicate that there might be a wealth of romance behind it. It may be taken for granted that the county was named from the City of Argenteuil in France, but why? There must be some reason.

The city of Argenteuil on the River Seine is close to Paris and grew up, according to Encyclopedia Britannica, around a monastery built 656 A.D. This was changed about 800 A.D. by Charlemagne to a nunnery afterwards famous for its connection with Héloïse in 1129 it was again turned into a monastery.

Asparagus, figs and grapes are grown in the district and the district was noted for its wine.

Whether the name was given to a particular locality or whether it was given to the Seignior, when formed, I have at present no means of ascertaining. Probably the original seignior came from Argenteuil in France and named it after his native town. I think Thomas says something about this in his history.

A few of us natives of Argenteuil County who live out here have been greatly interested in the articles by Mr. Wales concerning the history of St. Andrews.

I think I have nothing further to say at present and shall conclude. Thanking you again for the splendid Industrial Number.

T. J. BARRON.

GRENVILLE.

Mrs. James Wade has had a bad attack of rheumatism, but is better now.

We are pleased to hear that Mr. D. McIntyre is recovering from pneumonia.

CUSHING.

Mr. John Innes visited in Lachute on Saturday.

Mrs. Jas. Heatlie is spending a few days in Montreal this week.

Miss Alice Davidson spent Wednesday with friends in St. Andrews East.

Mr. Frank Gaston left for Montreal on Saturday to spend a few days visiting friends.

Mr. Lathbury, of Montreal, was the guest of Miss B. Nicholls the latter part of last week.

Mrs. A. Graham returned on Wednesday from a visit to friends in Dorval, Lachine and Montreal.

Mrs. F. Foller returned on Friday night from a week's visit to her sister, Mrs. Ed. Croll, of Montreal.

Mrs. Walter Mann and Mr. Clifford Mann, of Stardale, were guests of Mr. and Mrs. W. Canning on Sunday.

The C. C. Club are holding their Annual Oyster Supper, on Saturday night, March 3rd, in the Club Room. A good time is expected.

Miss M. Whelehan and Mrs. R. Funcheon left on Monday, to attend the funeral of their niece, Miss Mary Hart, of Concord, U.S.A.

Mrs. Jobb arrived home from Montreal on Friday, having attended the W. M. S. Annual Presbyterial meeting, in the American United Church.

The Women's Missionary Society will hold their March Meeting on Tuesday the 6th, at the home of Mrs. A. Graham, at the usual hour. All welcome.

We are sorry to hear of the rather serious illness of Miss Marguerite Heatlie, who is in the Hospital in Montreal with pneumonia. We wish her a speedy recovery.

Memories of old St. Andrews

Since the publication of the last sketch, the writer has had the good fortune to run across an old pamphlet, published in Montreal in 1843, by Messrs. Lovell and Gibson, entitled "The Emigrant to North America", in which on pages 48 and 49, the author exploits one Elon Lee as a very successful pioneer, and the first one of the Ottawa Valley.

This Elon Lee proves to be no other than the jolly landlord of the Lee hostelry of the St. Andrews of pioneer days.

The interesting story of his early life, and of his last days, here told, dovetails neatly into the account given in the history of Argenteuil published in 1896, and completes a narrative well worth recording in this history.

Captain Elon Lee was an officer in the army of the American Revolution, and like many another American patriot, he came to financial bankruptcy as the result of the war.

In order to escape from the wreck of his Massachusetts fortunes, and the clutches of his creditors, "He made a moon-light flitting into Canada, came to the banks of the Ottawa, at that time little known, where he was not likely to be found, and took up a wide lot of land bordering on the Ottawa River."

To shorten the story, this fugitive pioneer with a puritan conscience, by his own exertions and with persevering industry, was so prospered, that in time he paid up with interest all his old debts in the States, and after his long exile in Canada, was able to return to his native heath to spend in comfort his last days with his kindred, respected and honoured for his integrity of character.

"He is now (1843) an old man, well provided for during the remnant of his days which are wearing away, under the consoling reflection that he has by great and voluntary sacrifices, acted the part of an upright and honest man."

The story of Captain Lee's career in St. Andrews, as told to Cyrus Thomas in 1896, and which had filtered down through the memories of two generations, accords with the above narration; except the reference to his debts, which was not so likely to be authentic as the earlier first hand account.

Captain Lee obtained his certificates of settlement from Seigneur Panet, at the pioneer rates of the earliest period, which was almost a gift. His purchased block of unbroken wilderness, extended back to the North River, and included within its area, the larger part of the site of the west side village.

One can picture this astute and sharp-eyed Yankee, camping near the present bridge, surveying the water-power that was within the capacity of a young colony to develop, and noting where the river narrowed to high banks, inviting the construction of the first bridge where all roads must meet.

On the lot, at present the prosperity of Dr. Maude Abbott, he erected his buildings, and later the village "Inn" which became the centre of interest in early days.

In early colonial days, Inn-keeping was a dignified occupation, and the village landlord was often-times a prominent member of society. And so it was with landlord Lee.

He was the Senior Warden of the Murray Masonic Lodge, and was the appointed Moderator when the building of the Presbyterian Church was decided on. At an earlier period, so interested was he in the religious life of the pioneer colony, that the doors of the "Lee Tavern" were always open for Sabbath services, until the commodious school house built on the site of the present Town Hall, was ready for the first day school of that time.

The Lee Tavern was a rendez-vous for many an adventurer from across the border, but there was no dictaphone to record the Tales of that Wayside Inn.

To be continued.

At What Age Will You Retire?

That depends. Suppose we say at sixty. All right—how much will you have saved by then?

No! You must guess again. Only three men in a hundred save enough to retire comfortably at sixty.

And about two out of the three do it because they've put part of each year's earnings into Endowment Insurance, such as provided by The Imperial Life.

Write today for particulars of this plan.

It's a phase of life insurance that will interest you, even if you never thought of it before.

THE IMPERIAL LIFE

Assurance Company of Canada

T. W. BOYD & SON 27 Notre Dame St. W. MONTREAL

**"Give me ten minutes a week
and I'll knock dollars off your tire bills"**

SET a day every week—preferably any one but Saturday or Sunday—and let me look over your tires. It'll mean dollars off your tire bill.

Maybe they need more air. Two or three pounds under pressure will take miles off the life of a tire. Maybe there's a nail or a flint just waiting to work through and make trouble. Maybe they're O.K. and you can drive away in comfort.

Ten minutes! But isn't it worth it to feel sure of your tires?

Car owners spend many a half-hour on the side of the road because they won't take the ordinary precaution. And that's saying nothing of the extra mileage they might get and the money they might save.

DOMINION TIRE DEPOT

GEO. Y. DEACON

WALSH-KATRINE GOLD MINES LIMITED

A report from the Walsh-Katrine Mine states that vein No. 2 on the 250 ft. level is still working in high grade ore. It has been opened for 165 ft. and samples taken and assayed over 85 ft. in length gave an average value of \$31.40 to the ton, over a width of 30 inches. The wall rock on each side of the vein in many places carries \$4.50 to \$5.80 per ton. There is no visible Gold, and the values are in the Pyrites and Tellurides. Assays run to \$244.00 to the ton in Gold, and Silver values as high as \$9.80.

Work is now being pushed on some of the other ore bodies as well as on No. 2 vein.

The Company is fortunate in having had a siding placed close to their property by the Ontario Government Railway. This siding will hold five freight cars.

The power transmission line is now completed and this will result in a reduction in costs as soon as it can be connected up to the property. The road from the Railway to the Mine is to be graded this coming Spring. The fuel for this summer's operations is now being cut and large quantities of supplies have been shipped in to carry operations over until after the break-up.

The directors of the Walsh-Katrine have recently received many offers to buy control of their property, but it was decided to continue to sell to the public direct as at present. It is the intention to limit the amount of Treasury shares to be sold as it is felt that financing will shortly be completed. The many offers to assist in financing have been due to the splendid grade of ore now being mined.

Main Street, Lachute.

ST. ANDREWS EAST.

Mr. Wm. Simpson's family were here for the week-end, and with other young people enjoyed skiing on our gentle slopes. If the roads of St. Andrews ran down hill both ways skiing would be a delightful sport.

Mrs. Bezonson was in Ottawa this week to hear Rachmaninoff's recital. She also heard Miss Jobb play at the morning Musical Club.

Mrs. Snowdon, Mrs. Lamb and Mrs. Charman attended the Presbyterian of the W. M. S. held in the American Presbyterian Church, Montreal.

The meeting on the Day of Prayer of the W. M. S. (Friday) was held in the United Church, in St. Andrews. A large number of the ladies of the three protestant churches were present. Mrs. Snowdon presided and Mrs. Macaskill, Mrs. Miller, Mrs. R. Bradley, Miss Hibbard and Miss Yarker took part.

A debate was held Friday in the Consolidated School on the subject "Resolved that wood is more useful than iron." Miss Lois Perks (Captain), Miss Florence Thompson and Miss Elizabeth Wales spoke for the affirmative and Miss Ruth Bradley (Captain), Miss Gladys Hyde & Miss Hylda Shaw for the negative. The judges, Revs. Miller and Macaskill and Miss Wilson decided in favour of the affirmative. We hope this will not send the price of wood up while the cold weather lasts.

On Friday evening, Prof. H. C. Perrin, of McGill University, gave a lecture in the Town Hall, on "What is good Music?" The Hall was filled by an appreciative audience and the lecturer's remarks gave valuable information to those who are interested in music.

Mr. Harrison and Mr. and Mrs. Ellison were at Miss Hibbard's over the week-end. Mr. Harrison and Mr. Ellison sang solos and a duet in the United Church on Sunday morning. Mr. Macaskill gave an address on Home Missions among the Russian-Germans and Ukrainians.

CORRESPONDENCE

Lachute, Que., Feb. 22nd, 1928.
Mr. J. S. Giles,
Editor of the "Watchman,"
Lachute.

Dear Mr. Giles:—

As you were good enough to publish in the Watchman's issue of Feb. 10th, a letter addressed to you by the Ottawa-Montreal Power Company RE proposed new rates for the town of Lachute, would you be kind enough to insert in your always appreciated Newspaper, the following open letter to the same Company.

The Ottawa-Montreal Power Co.,
Head Office, Ottawa.

Gentlemen:—

Referring to your letter of Feb. 7th, instant, addressed to Mr. J. S. Giles, a copy whereof was published in the Watchman's issue of Feb. 10th. I notice that there are different items showing amounts which would have been saved by your Lachute Customers, should your proposed new tariff or rates be in force in our town. There is also, in the same letter a list of towns which have accepted this new tariff, and if you will remark, every one of them is across the Ottawa River, so, would your company let the people of Lachute know if you or your Siamese sister, the Gaieneau Power Company have granted to towns situate on this side of the same River lower rates than those proposed to our town. I would suggest you would give us the rates for electricity in St-Jerome, Papineauville or Pointe-au-Chene, the latter a village of may be less than 25 customers, and which towns are supposed to be furnished with the energy coming from the same power houses as Lachute, or will be in the near future.

I believe that the people of Lachute, before granting a franchise for a certain number of years to your firm, will try to know your rates in all the surrounding districts, and you can remain assured that our town is too well located to grant a franchise without inquiring.

Yours truly,
A Lachute Customer.

Walsh-Katrine Gold Mines Lt'd.

(No Personal Liability)

The Walsh-Katrine is situated in the gold bearing geological belt of Kirkland Lake.

The work being carried on at the Walsh-Katrine is daily adding to the known ore reserves. Work on No. 2 Vein on the 250 ft. level is opening up ore at a very rapid rate.

Preparations are now being made to cut No. 4 Vein on the 140 ft. and 375 ft. levels, to open up the ore cut at these levels by the diamond drilling.

Diamond drilling has given assurance of high values in all four ore bodies.

5000 feet of diamond drilling has proven gold values to a depth of 835 feet.

The LAND OF FORGOTTEN MEN

by Edison Marshall

BEGIN HERE TODAY

Peter Newhall, Augusta, Ga., flees to Alaska after being told by Ivan Ishmin, Russian violinist, he had drowned Paul Sarichef, Ishmin's secretary, following a quarrel. Ishmin and Peter's wife, Dorothy, had urged him to flee. He joins Big Chris Larson in response to a distress signal at sea, forcing his sea jacket upon him. Their launch hits rocks. Larson's body is buried as Newhall's, Peter, rescued, finds injuries have completely changed his appearance.

NOW GO ON WITH THE STORY

CHAPTER XII.—(Cont'd.)

"You want me—call Paul Sarichef?"

"Yes."

"Why, Dorothy?" Ivan whispered tensely. "He would have no message for you."

"I want him to try, just the same," the girl replied. "Can you call him, Joe?"

The native was already calling; and all of them knew that psychic energy expended in that summons was beyond their wit to grasp. Fortune Joe seemed immersed in a terrific struggle that would seemingly rend the spirit from the body. "He come," the witch-doctor muttered at last. "He no want to—be here soon."

The muttered words grew unintelligible, then ceased. The circle waited for Paul Sarichef—Newhall's victim of months before—to speak to them from beyond the grave.

"Hearn't he anything to say to us?" Dorothy asked, after a long period of waiting. Word of Sarichef's forgiveness was an urgent need with her.

But as they waited, Joe himself emerged into their familiar world. He was white and drawn; and he seemed more like a man drowsy with slumber than one who had pierced the greatest of all mysteries. The chain was broken, and he got up.

"No no try any more to-night," he said simply. "Maybe some other time."

The girl gave him a smile of heartfelt gratitude. "Thank you for what you've given me," she told him earnestly. "You've answered my greatest question—I really don't need to know any more."

Ivan, at the door of the tent, read the truth in her radiant face. He reached her hands, then drew her slowly toward him. "Do you know now?" he asked, holding her and peering down into her luminous eyes.

"I know now," she told him tremulously. "Ivan—you can have my promise, now I know that it's Peter's wish as well as my own. He wouldn't advise me wrong."

"Then I've won you at last!"

"Yes. When we come home again."

He could not urge her, to-night, for anything more. His plan of immediate marriage, the Russian priest officiating, could be discussed at another hour. He kissed gently, triumphantly, her soft, yielding lips.

From the door of his hut Pete saw their forms in the dusk, the girl's

white blouse and the man's encircling arms. He guessed the truth; that this was the first kiss of their definite betrothal. Despair swept over him like a great wave of the sea he had once battled, but the madness, the haunting and torturing jealousy was spared him now. He had conquered that; and he must never let it sweep him into hell again.

CHAPTER XIII.
FALSE STANDARDS.

At the appointed time Ivan packed his supplies for his journey across the narrow, rugged Peninsula in quest of help. He took three days' rations, tied them up in Pete's light caribou robe, that was in itself sufficient protection from even severe cold, and strapped the pack on his lean, well-muscled back.

"Pete, I'm leaving you to take care of Mrs. Newhall," he said simply. "I know you'll do it—as you've done before. She'll be wholly in your charge till I get back, and don't let any harm befall her."

"Don't worry about that," Pete assured him.

Ivan shook his head and looked carelessly, to settle the pack. "I won't be back for three days," he went on casually, with no emphasis whatever in his musical voice, "unless I choose to come back before—but I can't look after her personally. But I might say that if any harm did befall her, I would chase the man down, no matter what corner of the earth he fled to, keeping after him and after him till I got him. When I did get him—"

He paused, and Pete looked him squarely in the eyes. There was no doubt whatever that this man meant what he said, and no doubt of his reason for saying it. "That isn't necessary, sir," Pete told him stiffly.

"Well, I didn't think it was, but I wanted you to understand, in case you were tempted. I am a man myself, and I know what temptation is."

Pete's eyes blazed. "Temptation of that kind doesn't come to men of our race, unless they are perverts," he said easily. He was somewhat pale, but he lit his pipe with a steady match as he spoke. "I don't know about the inferior races."

Ivan smiled inscrutably. "At some other place and time—perhaps just before we sail—I'll give you a chance to show whether the Anglo-Saxon is superior to the Mongol. It would be really diverting, for a moment. At present, both of us have work to do—you to take care of the camp and I to go after supplies." His voice changed and softened, but it had never been perceptibly hard. "Keep up the

hunt for caribou," he directed. "The boys haven't done so well lately. Take care of the meat and cure it as fast as possible." Then he turned to say good-bye to Dorothy.

She walked a short distance up the hill with Ivan; and her trust in herself and her love for him swept back to her to the full when he gave her a good-bye kiss.

"Take care of yourself, Ivan," she told him with a plaintive sweetness that carried him off his feet. "You are all I have now. I have lost so much, and I couldn't bear to lose you."

They clung together, and then she watched him as he strode away up the hill. Sighing, she turned back to the camp.

Pete had her breakfast ready when she reached the camp, and his homely face glowed when he brought it to her. He had taken especial pains today—venison liver fried with bacon, coffee such as her colored mammy herself could make, brown flapjacks not too thick, served with maple syrup. His broad shoulders towered above her; and he was boyishly elated when he saw she was pleased.

The day wore on, and his care of her, his watchfulness, was a wonder. Although his work carried him far afield,

he had cut fuel always ready for her hand in case the fire burned low; he personally superintended her meals, and he saw—with fine generalship—that at no time she was left alone with Pavlov and Fortune Joe.

When the day faded, and the dusk crept in from the sea, she appreciated his care more and more.

He took special pains with her dinner. He made reflector biscuits, thin and light, to be served with marmalade; he pot-roasted a fine canvas back duck that Pavlov had decapitated with the pistol; he fried potatoes crisp and brown. He watched her devour every mouthful of her portion, then after he had remade the bed and built up the fire in the camp stove, he turned to the task of washing dishes. Pavlov and Joe, meanwhile, were cutting into strips for curing the caribou meat they had procured in the day's hunting.

"I wouldn't mind washing the dishes to-night," Dorothy told him in a friendly tone. "Maybe you'd like to help the men take care of the meat."

"Couldn't think of it," Pete returned. "If you'll excuse me saying so—I suspect you're not very experienced at it. But if you should care to help me dry 'em—"

They made quite a little party out of washing and drying the metal plates and the crude, iron knives and forks. And soon it was deep dark, and night winds were blowing from the sea. This work done, the girl started to turn away.

But she halted; and he saw her girlish profile in the soft light of the camp fire. "Would you like to come and sit at the door of my tent a little while?" she asked. Her voice was somewhat tremulous; but she did not try to ask herself why.

Pete glanced about him. "Camp work is pretty well done, for to-night. I will smoke my pipe once at your tent door, if you don't mind. Human companionship is very reassuring, very necessary in this North."

She went in and sat comfortably on her bed, while he sat at the tent mouth. They talked easily, surprisingly freely while the lesser stars were emerging, and his pipe paled and glowed and paled again in the gloom. She felt wholly secure and at peace.

"Sometimes there is a throwback in your speech, an accent or a choice of word that interests me immensely," Pete, she told him. "I don't want to be curious—but curiosity is a very human trait, after all. Sometimes I'm caused to think that you must have known something very different from this—before you came here."

"I did," he answered quietly. "It's nothing unusual, up here. This end of Alaska is a sort of missing men. I don't see why the police don't look here first for them; a man who wants to get away finds himself up here before he knows it—or in South America."

"And you are exiled from home?" she asked him bluntly. Yet there was no hint of vulgar curiosity in her tone. He turned to her with a grateful smile.

"Forever. But I can blame no one but myself. I guess I simply couldn't stand civilized existence. If you'd ask the trouble, I'd say—false standards." This had been the cause of Peter's downfall, too: false standards of which both Peter and herself had been guilty. "I'd know better again," she heard him say. "I'd never sacrifice my birthright again—waste all I have. But that's always the song we exiles sing."

A MODISH FROCK.

Particularly graceful is this attractive frock, having a flared side section at each side of the skirt. The front of the bodice opens in a deep V over a vestee, and the long darted sleeves have wide cuffs placed a short distance above the lower edge. No. 1439 is for Misses and Ladies, and is in sizes 16, 18, years, 36, 38, 40, 42 and 44 inches bust. Size 38 requires 4 1/2 yards 39-inch, or 2 3/4 yards 54-inch material without nap. Width at lower edge about 76 inches. Price 20c the pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 78 West Adelaide St., Toronto. Patterns sent by return mail.

Counting Noses

Wild Life Census To Be Made In Big Canadian Game Preserve

A census of the musk-oxen and other wild life in the Canadian Government sanctuary of 15,000 square miles east of Great Slave Lake will be taken early in 1923 by W. H. B. Hoare of the Northwest Territory and Yukon Branch of the Canadian Department of the Interior. He is an experienced explorer—with an intimate knowledge of the animal life of the region. The work is expected to take about a year.

The information obtained is to be used by his department to estimate what further expenditures are necessary to conserve and develop the resources of the area. The census has been ordered to determine the inroads made by wolves and other predatory animals.

Mr. Hoare will also report on the measures necessary to protect the musk-oxen and caribou and on the problem of patrolling the area properly. The area is believed to be seldom visited and contains no permanent residents, either native or white.

To make the journey he must go to the end of the railroad at Waterways and from there travel 300 miles by dog team to the proposed location of his base camp, which is at Fort Reliance, about thirty-five miles south-west of the sanctuary.

To equip his expedition six Eskimo sled dogs were brought from Pond Inlet, Baffin Island, by the 1927 Canadian Arctic Expedition. The dogs from the Eastern Arctic are highly rated by travelers in the far North, both because of their strength and endurance.

Minard's Liniment for asthma.

Isobel: "No, daddy, I won't need any clothes this summer." Father: "I was afraid it would come to that!"

Infatuated Youth—Thinking of me, darling? Weary Girl—Oh, was I laughing? I'm so sorry.

Improving Home Conditions
Lanterns on Floor
Serious Menace

Parents Are Reasoned With and Instructed in Better Methods by Children's Aid Officer
Should Be Hung On Hook Out of Way—Electric Light Safest

Where children are neglected, it is not our custom, says J. J. Kelso, Superintendent of the Children's Department, to order prosecution. That is only resorted to when milder methods fail. Occasionally however, neglectful parents are brought before the Court and warning given of the danger of losing their children. In one case, with a family of six children, ranging in age from eleven down to one year, the conditions in the house were deplorable. The children were found to be in an extreme state of dirt, and all looked miserable and ill nourished. Their clothing was described as being nothing but rags. The house itself was in a filthy condition, infested with vermin the natural result of unclean living. This state of matters was not due to poverty, as the parents were quite able to do better. It was simply laziness and indifference. It is pleasing to report that bringing them before the magistrate proved a salutary lesson, and conditions are now decidedly better.

A nervous brindle cow, being milked for the first time, kicked over the lantern set on a box behind her, and a great city was wiped out. That was in Chicago, back in the last century, but the same thing has been going on in a minor way ever since. Each year, several good barns in Ontario go up in smoke, as a result of a lantern being knocked over, and while a city is not wiped out, the loss to the individual, especially when mows and stalls are full of valuable stock and equipment, is disastrously high. And the tragedy of the thing is that it is all due to carelessness.

Firm hooks, fixed in the ceiling of the stable at convenient intervals will cost but a few cents, and yet when the lanterns are swung from these, not only is the light better distributed, but a nervous, halting, spirited horse, or a hurrying man cannot knock it over and set fire to the place. The Ontario Fire Marshal suggests that it would be good business if the country insurance companies would buy several thousand of these hooks and present half a dozen to each policy holder. Even if one fire was prevented as a result, the saving effected would pay for the hooks for all time to come.

Where possible, Ontario fire fighting officials urge the installation of electric lights, which they maintain make the safest illumination. Where the wiring is done by a competent electrician, and the work inspected by a government official, fire risk is reduced to the minimum. Where it is impossible to put in electric light, and unfortunately, this is often the case in the country, good safety lanterns should be procured and the hooks provided.

Importance of Our Water-Power

Canada's water-power resources form one of her most striking and important natural assets. Their nature, extent, and location combine to give them a special value in relation to the chief centres of industry and population. Water-power is available in every province, and it is not too much to say that, apart from the human factor, water-power is the most vital force behind Canadian industrial development.

Give a small boy a watch and he will have the time of his life.

Royal Bank Annual Meeting

The annual General Meeting of shareholders of The Royal Bank of Canada marked the close of the most successful year in the history of the Bank.

Sir Herbert Holt, President, in his address, dealt more particularly with general conditions throughout the country, but touched on many developments of great importance, more especially from the standpoint of trade and industry.

C. E. Neill, General Manager, reviewed the growth of the Bank to the foremost position it now occupies and gave to the shareholders an interesting insight into the part the bank is playing in all centres in which it is now doing business.

Outlook Favorable.

Sir Herbert referred to the year's developments in industry, trade and finance as generally satisfactory. The foundation for the development which has taken place is sound. Sir Herbert declared that as yet there are no indications of industrial and commercial inflation. Production is not expanding to a point unwarranted by growth and demand and it is a noteworthy fact that the whole expansion has taken place during a period characterized by moderately declining prices. On the whole the financial situation in agriculture, industry and commerce is more settled than at the beginning of the period. Summing up the business situation, Sir Herbert stated that the "outlook

CRUELTY TO ANIMALS IN TRANSIT TO ABATTOIRS

Government Should Take Drastic Action to Reduce Unnecessary Torture by Rigid Enforcement of Laws To Every Letter

CONDITIONS BAD

While the cruelty of the average Toronto slaughter-house is "a blot on the face of civilization," according to J. Macnab Wilson, general manager for the Ontario Society for the Prevention of Cruelty to Animals, it is as kindness when compared with some of the other evils he is striving to eradicate from the meat industry. The fright and physical pain of the abattoir are at worst quickly over; the unintentional torture that sometimes precedes them may last for hours, or even days.

For years the society has been waging a constant battle to ease the lot of the unfortunate food animals that pass through the stock yards and abattoirs; and in some respects it has been winning steadily. The treatment of crippled animals at the stock yards is now prescribed by humane considerations. General provision for the care and feeding of animals is carefully made and supervised. But the worst abuse of all, carelessness or ignorance in loading, still heaps its needless misery on a given quota every month.

Crowded Cars.

Sleek from the feeding stalls, a shipment of cattle are bought by a drover a day's journey away from the city. For the first time in their lives they find themselves on the open road, and their natural nervousness is heightened by the hustling they get from half a dozen men armed with heavy sticks on the way to the railway. Once there, the hustling is intensified as they are loaded into railway cars. There may not be enough to fill the cars completely, and they stand, loosely packed together with space to move about in the car. It is this space that causes the mischief.

Let an engine come along and "kick" one of these cars off the siding, and the cattle will surge to one end, scrambling to keep their feet. If one of them goes down it is trampled by the others.

Tells of Injuries.

"Have you ever ridden in a cattle car?" asked Mr. Wilson in discussing the subject—"well, I have; and I have seen a cow turn a complete somersault when the car was shunted." Broken legs, broken horns, bruises and dislocated joints are the result; and frequently the animals thus injured lie without attention until they reach the stock-yards.

In cases of mixed loading, matters become worse. The law requires that cattle, sheep or swine, if loaded in the same car, must be separated by partitions from each other. The law's requirement in this respect is practically always fulfilled; but frequently the partition is too flimsy and collapses under the weight of the animals.

During the present winter, carloads of animals have reached the stock-yards in which sheep had been trampled underfoot by cattle and died a lingering death, hogs been crippled in the same manner, and calves horribly mutilated. It is not an uncommon occurrence for hogs, in such an accident to attack the disabled animals with them and commence to eat them alive.

Carload of Cripples.

"Once within the past six months," Mr. Wilson states, "I saw a big hog munched at the shoulder-blade of a crippled calf that was bellowing for mercy." In another carload that reached the stock-yards recently there were only seven animals able to walk; the rest were either dead or crippled and helpless.

Wherever such cases seem attributable to negligence on the part of the shipper prosecution follows; but the humane society authorities are seeking a better remedy. A type of partition that is easily installed and absolutely secure has been devised; and an effort is on foot to have its use enforced by the Dominion Railway Board. If such a regulation can be secured it is felt that it will eliminate one of the worst features of the livestock industry; and with it an enormous waste as well as much needless suffering.

For the protection of the animals from unnecessary hardship, a police constable is constantly on duty at the stock-yards, and with the co-operation of the packing-houses his efforts have accomplished definite improvement in several respects. One of the difficulties that has been met is the disposal of unwanted calves. Formerly it was not infrequent for these little creatures to go hungry sometimes for days before they were slaughtered. Now, however, real calves are disposed of on the day of their arrival, are turned over to nurse cows at night; while immature calves left unsold are killed at once. A recent amendment to the criminal code prohibiting the shipment of calves under three weeks except when the mother accompanies them has done much to better conditions in this last respect.

Formerly, also, crippled animals were sometimes reshipped from the yards in the same car with others of their kind. This practice has been completely stopped; and the slaughtering of cripples is done as soon after their arrival as possible. Crippled cattle are killed before being removed from the cars; special "cripple wag-

ons" are used for removal of injured sheep or swine.

Conditions at Toronto's stock-yards are probably above the average for Canada; but even so, Mr. Wilson declares that there is much loss and much suffering that could be eliminated.

"Every blow a bruise and every bruise a loss" is a slogan he wants posted up at every shipping point in Canada. The number of carcasses that have to be graded as third-rate meat for no reason except the bruises that sticks, stones, whips and other ill-treatment have inflicted is, he declares, appalling.

"The government," he states, "spends thousands of dollars annually in improving live-stock; eliminating the scrub bull, importing new breeds, training boys and girls in the art of judging cattle and otherwise encouraging production of the best possible type of carcass for our meat-packers. It is time that it also took active measures to check the continual loss from degradation of what would otherwise be prime carcasses, through the ignorant or brutal mishandling of the animals on their way to the abattoir."

No More Small Five-Cent Pieces

Not Being Withdrawn From Circulation, However, Says Robb

Ottawa.—The Finance Department is not having any more of the small five-cent pieces made, but it was stated at Hon. J. A. Robb's office that they are not being withdrawn from circulation or called in as yet. The idea is ultimately to have only the nickel, but it is difficult to call in so much money commonly circulated.

Last summer the Confederation Jubilee Committee had a contest for designs for the new nickel and prizes were awarded. They are not altogether satisfactory, however, and the mint authorities are now looking them over. For some time only nickels have been coined, and gradually the small pieces will disappear. There is considerable complaint about the duplicate currency.

New York Cancer Project Given Up

President States Public Response to Appeal is Unsatisfactory

New York.—The project to establish a national cancer centre here at a cost of \$5,000,000, has been abandoned.

Sanders A. Wertheim, president of the New York Cancer Association, Inc., which sponsored the movement, admitted that the appeal for the necessary funds for the enterprise had failed, explaining that the financial response to date had been so comparatively slight that it did not warrant the directors in continuing the campaign. The project, therefore, has been given up and all moneys contributed by the public will shortly be returned to the individual givers.

Miss Lloyd George Smokes Cigarette

Impersonating Queen Victoria She Takes a Few Puffs

London.—Those Ontario women (if any) who applaud the decision of Chicago's women's societies to cancel addresses by Miss Maude Royden because she smokes cigarettes will doubtless be pained to hear that Miss Megan Lloyd George has gone Miss Royden one better.

The daughter of Britain's wartime Prime Minister recently attended a fancy dress ball as Queen Victoria, but perpetrated a glaring anachronism by indulging in a casual cigarette. When it was called to her attention that the home life of Queen Victoria did not include the use of tobacco, Miss Lloyd George promptly turned the laugh against her informant by dashing the cigarette on the floor and repeating the famous cry of Victoria as a girl:

"I will be good! I will be good!"

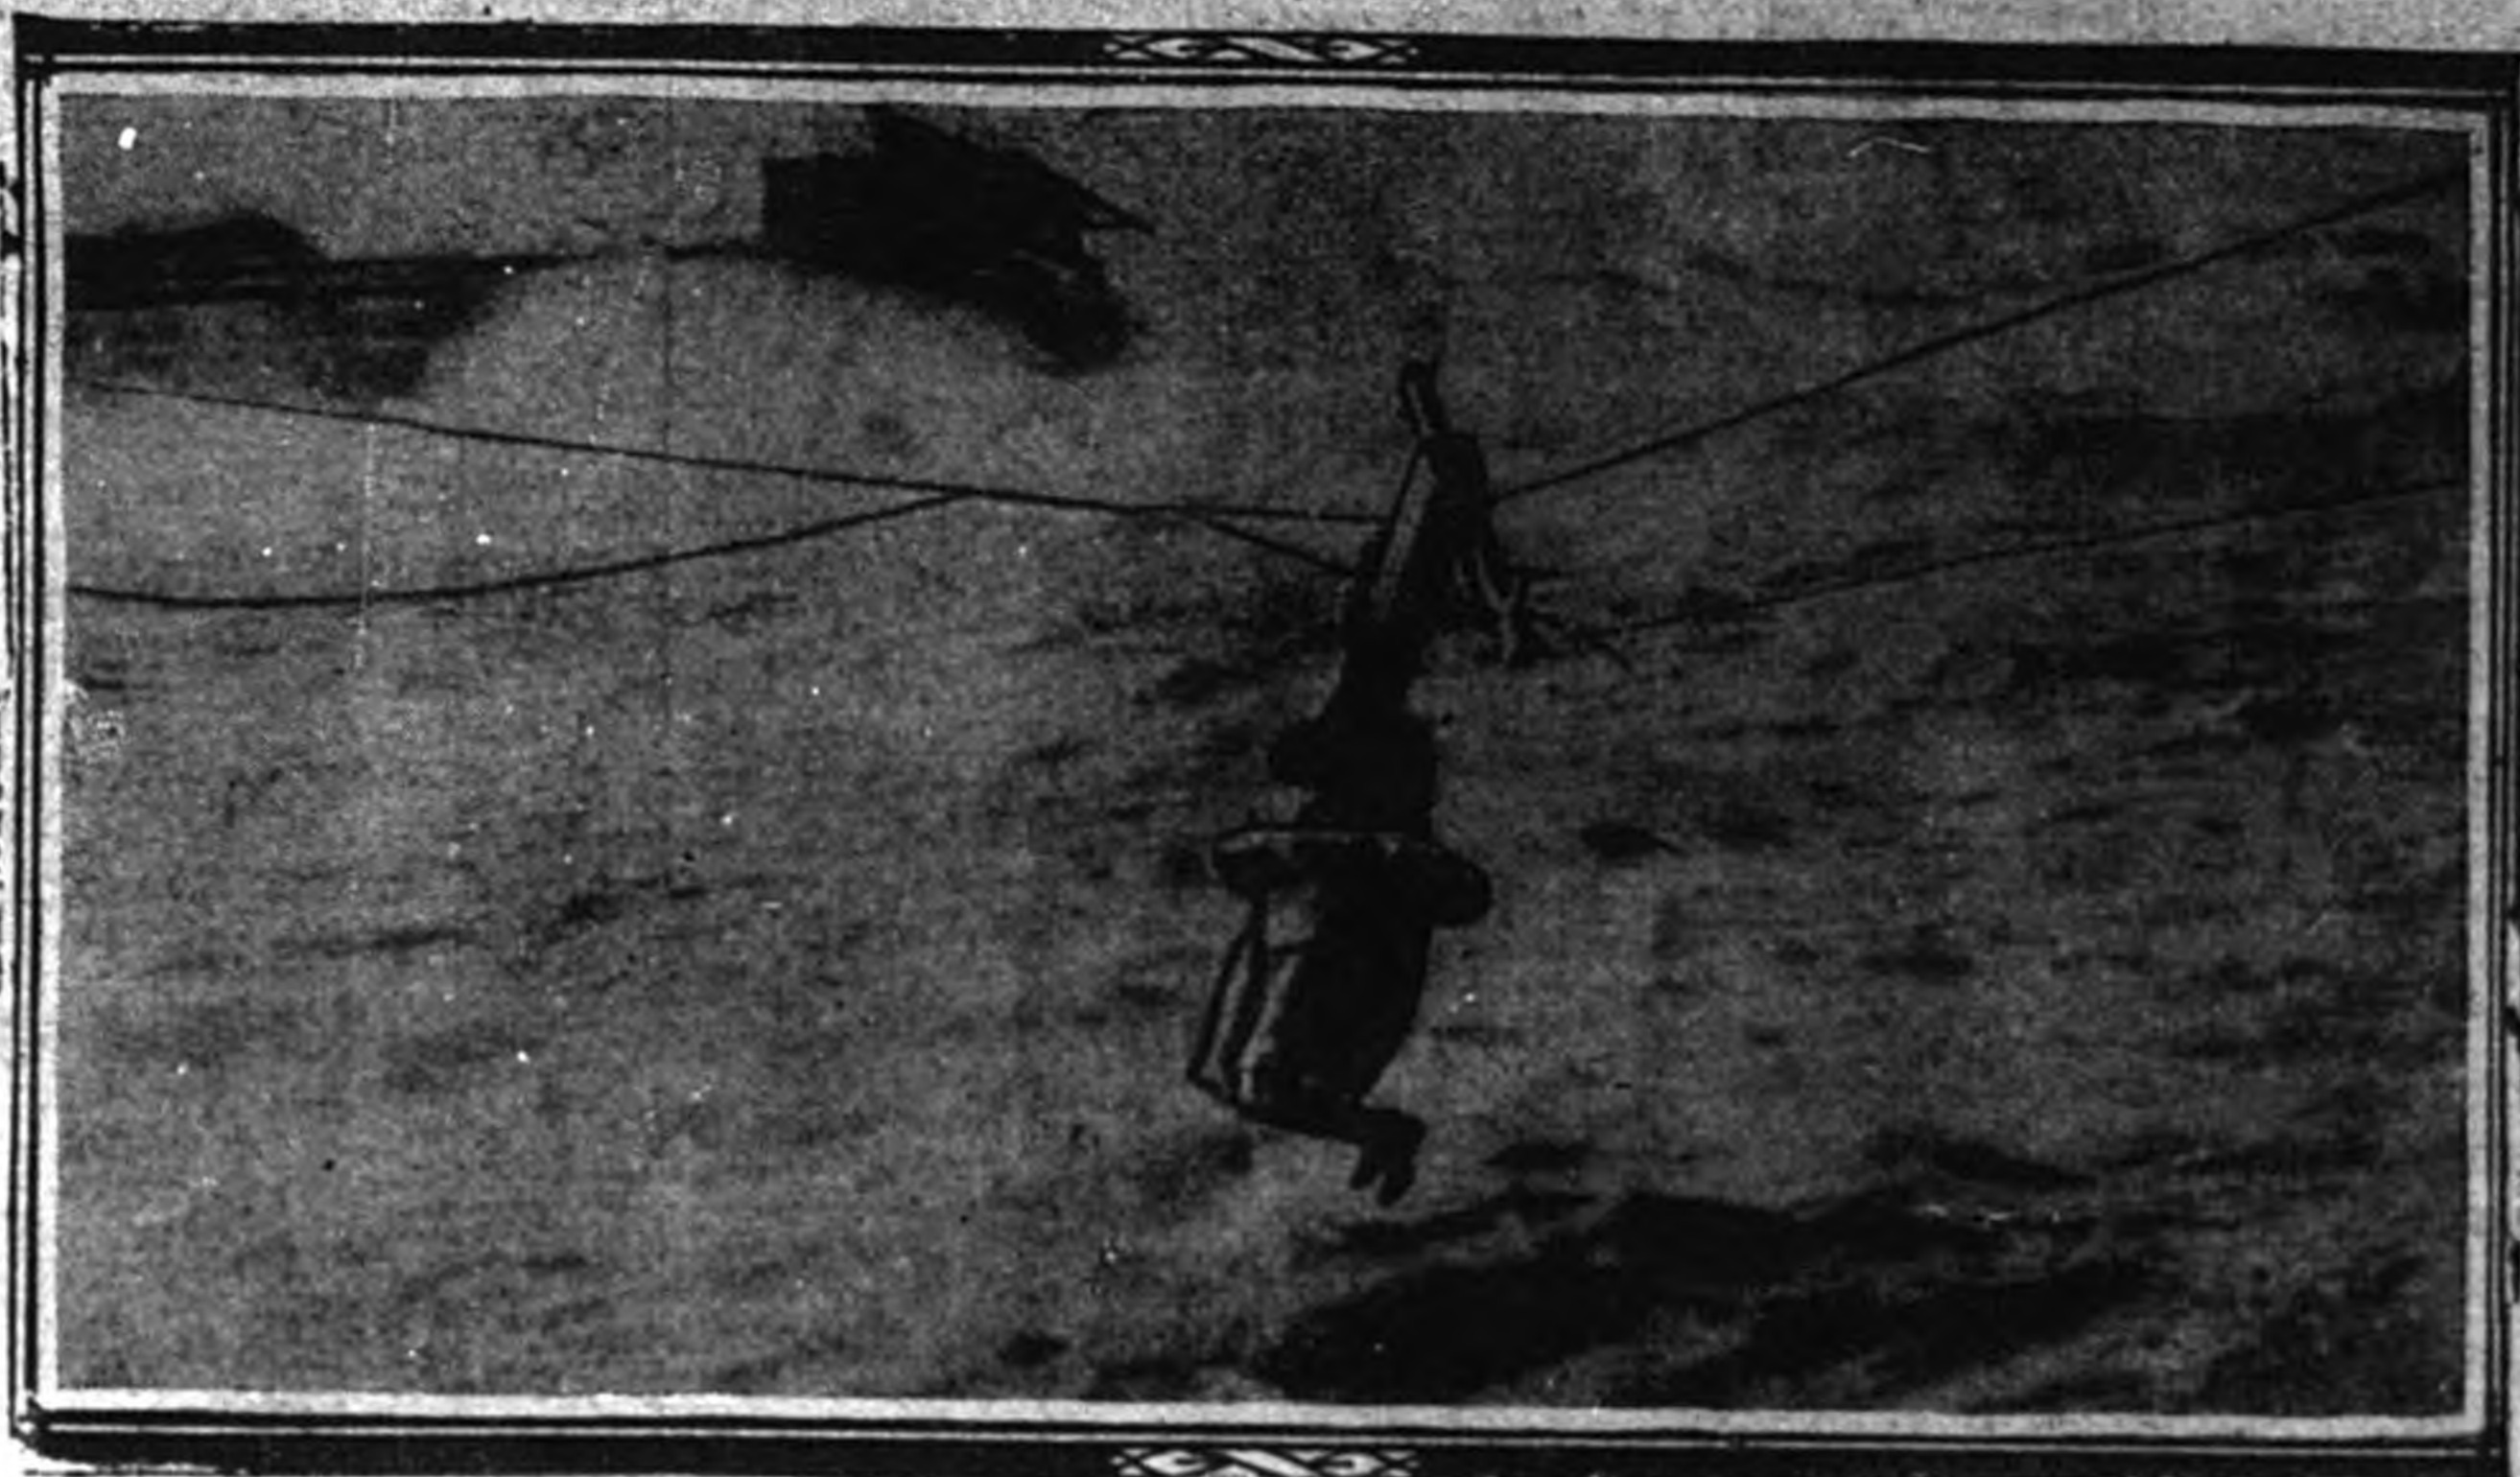

Liver Loaf.

1 pound liver, ½ pound sausage meat, 1 cup bread crumbs, 1 egg, ½ cup milk, poultry seasoning, salt and pepper. Parboil the liver and chop fine. Mix with the sausage, bread crumbs and season to taste. Stir the egg and milk together and add to the mixture. Form into a loaf and bake for forty-five minutes. This tastes something like a chicken loaf and is an excellent luncheon dish.

Enough's Enough.

No matter how much money a man has, he can only eat three meals a day, wear one suit of clothes at a time and sleep in one bed.—The American Magazine.

A Very Close Call

Eat Liver for Rosy Cheeks

These Savory Liver Recipes Are Recommended for Their High Food Value

Doctors have for a long time recognized the value of liver in the diet for treating a run-down condition, and in the last two years there has been particular emphasis placed on the use of liver in the treatment of some of the worst types of anaemia. Although it is yet too soon to make any sweeping generalization about the curative value of liver for anaemic patients, many physicians have reported successful results after prescribing a liver diet. Since "going on a liver diet" may mean chewing a half pound of liver every day—and a half pound of liver looks bigger than any other kind of half pound we know of—it is important to know the easiest and pleasantest way of taking this food.

It is generally believed that uncooked rather than cooked liver provides the greatest benefit for an anaemic condition. Some doctors prescribe scraped liver and liver juice for children and suggest mixing it with orange juice to mitigate the liverishness of the flavor.

Another way in which some hospital dietitians prepare it to broil or grill the liver on a rack and serve very rare. If a casserole of vegetables is placed under the broiler, all the valuable liver juices will be conserved in a very palatable form.

From one half to one cup of raw diced liver and juice could be added to three cups of soup, making a very palatable and savory dish. We added the liver just before serving the soup, so that the meat was practically uncooked. We considered tomato soup and onion soup the best disguises for liver. Canned soups may be used and the highly flavored products such as oxtail and mulligatawny are, of course, very effective in concealing the liver flavor.

A good creamed filling for patties or toast or for vegetable stuffings may be made by heating a can of tomato soup, undiluted except with a little milk. Add one cup of minced raw liver and juice just before serving.

A liver cocktail really isn't as bad as it sounds. Use the uncooked liver again. Wash, but do not let it soak in the water, heat quickly in shallow pan for just a minute, squeeze out the juice in a potato ricer, or scrape the liver with a teaspoon. Flavor the juice or pulp with tomato catsup, salt, pepper and a few drops of lemon or onion juice. Grape juice may also be used to conceal the taste of liver to a certain degree.

These suggestions which we have just offered are for the benefit of patients who are taking liver under a doctor's orders. It is not advisable to eat large quantities of this very concentrated protein food unless it has been prescribed by your physician.

The demand for liver has been so great since its high food value has been realized that the price has soared steadily skyward in some markets.

All kinds of liver—calf, beef, pig, chicken and goose livers—are good. While calf liver is more delicate and delicious than that of beef, the latter is the one to use when blood-building interests you more than the pleasure of the palate. Liver from chickens and fowls is excellent, but it takes a great many to make a pound. Never, never do as one woman recently did. She bought calf liver for her little girl and gave the chicken livers to the cat!

How to Buy Liver.

Due to the expense of liver at this time it is important to be able to recognize the different kinds which are offered. Calf liver is more delicate, lighter in color and, in most markets, far more expensive than beef or pig liver. In homes of comfortable means it is the calf's liver which is usually served. Beef liver, if one takes care

to buy only that which is perfectly fresh, light in color and cut from the nipple end, can be made into very palatable dishes. Often when it is highly seasoned it cannot be distinguished from calf liver.

Liver is a valuable food for well people as well as for anaemic patients, and for the benefit of those who can eat it in cooked dishes we are offering the following recipes:

Liver Cocktail.

½ pound liver, ¼ cup tomato catsup, ¼ cup lemon juice, 2 teaspoons Worcestershire sauce, ½ teaspoon chives (chopped fine), salt and pepper to taste. Cut off the skin, veins and tough parts of the liver; rinse with cold water and put it through a fine meat grinder. Place on ice immediately. Add this to the sauce, using one part liver to two and one-half parts sauce. Chill thoroughly. Serve in cocktail glasses with saltine crackers.

Escalloped Liver.

1 calf or beef liver, ¼ cup bread crumbs, 4 slices fat bacon, ½ teaspoon salt, 2 tablespoons chopped onion, a few gratings nutmeg, a few grains red pepper, 1 cup water. Wash and chop the liver. Add bread crumbs and bacon and chop into small pieces. Add this add onion, nutmeg, red pepper and water. Mix well and put in greased baking dish. Cover with grated bread crumbs and dots of butter. Bake in moderate oven (350 F.) for forty-five minutes.

Liver Baked in Milk.

1 calf or beef liver, 1 pint milk, salt, pepper. Cut liver in serving pieces, sprinkle them with salt and pepper and arrange in baking dish which has been well greased with bacon drippings. Cover with scalded milk. Bake in a moderate oven (300 F.) for about forty minutes, or until liver is tender.

Rice and Liver Casserole.

Line a casserole with mollied and buttered rice. Fill the center with chopped, boiled liver and gravy. Sprinkle grated bread crumbs over this, dot with butter and place in a moderate oven long enough to brown on top.

Liver Sandwiches.

Broil and mash the liver. Season with salt and pepper (onion juice if

desired), moisten with cream. Add chopped bacon and spread the mixture between slices of bread.

Liver Terrapin.

1 cup baked liver, chopped, 2 tablespoons butter, 1 tablespoon flour, 1 cup evaporated milk (or thin cream), ½ teaspoon salt, a few grains cayenne pepper, ¼ teaspoon cloves, ¼ teaspoon nutmeg, ½ teaspoonful mace, 2 tablespoons cooking sherry, 1 hard-boiled egg. Heat the milk in top of double boiler. Rub flour into the butter. Pour warm milk over this, blend and return it to saucepan. Heat in this the chopped liver. Add seasoning. Chop finely the egg white and mash the yolk in two tablespoons of milk or water. When the liver is hot stir in the egg and wine.

Liver Stuffing.

3 cups bread broken in small pieces, ½ pound liver, 1 medium-sized onion, 2 stalks celery, salt, pepper, poultry seasoning. Add the chopped onion and celery to the bread. Season to taste with salt, pepper and poultry seasoning; moisten the bread with water to make of the right consistency. Then add the liver, which has been prepared by pouring boiling water over it, draining and cutting it in small pieces, discarding skin and tough fiber. Mix the liver with the bread and seasonings and fill the bird. The amount of liver used may be increased to three-fourths of a pound if desired.

Liver Soup.

4 tablespoons butter, 1 small onion, 3 tablespoons flour, 3 cups milk, ¼ pound liver. Melt the butter, add the chopped onion and cook five minutes, taking care not to let them brown. Stir in the flour and add the milk gradually. Cook, stirring constantly, until the mixture boils. Pour boiling water over the liver, drain and cut it into small pieces. Add it to the first mixture, season highly with salt and pepper; cook two minutes and serve.

Yorkshire Pudding With Liver.

1 cup flour, 1 teaspoon salt, 1 cup milk, 2 eggs, ½ pound liver. Put the flour, salt, milk and eggs in a bowl and beat with an egg beater about two minutes until light. Add the liver after pouring boiling water over it,

draining and cutting into small pieces. As soon as the liver, which should be prepared first, is added to the batter pour it into a shallow pan well greased with drippings and bake for thirty minutes in a hot oven. Serve cut in squares.

Liver in Ravioli.

3 egg yolks, 2 tablespoons water, ½ teaspoon salt, ¾ cup flour (about), 2 cups sauce. Beat egg yolks slightly with water and salt. Stir in flour to make a stiff dough. Knead five minutes. Roll very thin and cut in rounds about four inches in diameter. On each half of the rounds put one teaspoon of filling, wet the edges of paste, put second round over, press edges together firmly. Have saucepan full of boiling salted water (two teaspoons of salt to one quart of water). Drop in the rounds, bring water to boiling point again, then simmer twenty minutes. Drain and place in a greased baking dish; pour tomato sauce over them and bake in a quick oven for fifteen minutes.

For the filling use one-fourth pound of liver, one onion, one tablespoon of butter, tomato sauce and seasonings, pour boiling water over the liver, drain and chop. Melt the butter, add the chopped onion and cook gently for a few minutes. Then add the liver and enough thick tomato sauce to moisten. Season highly with salt and pepper.

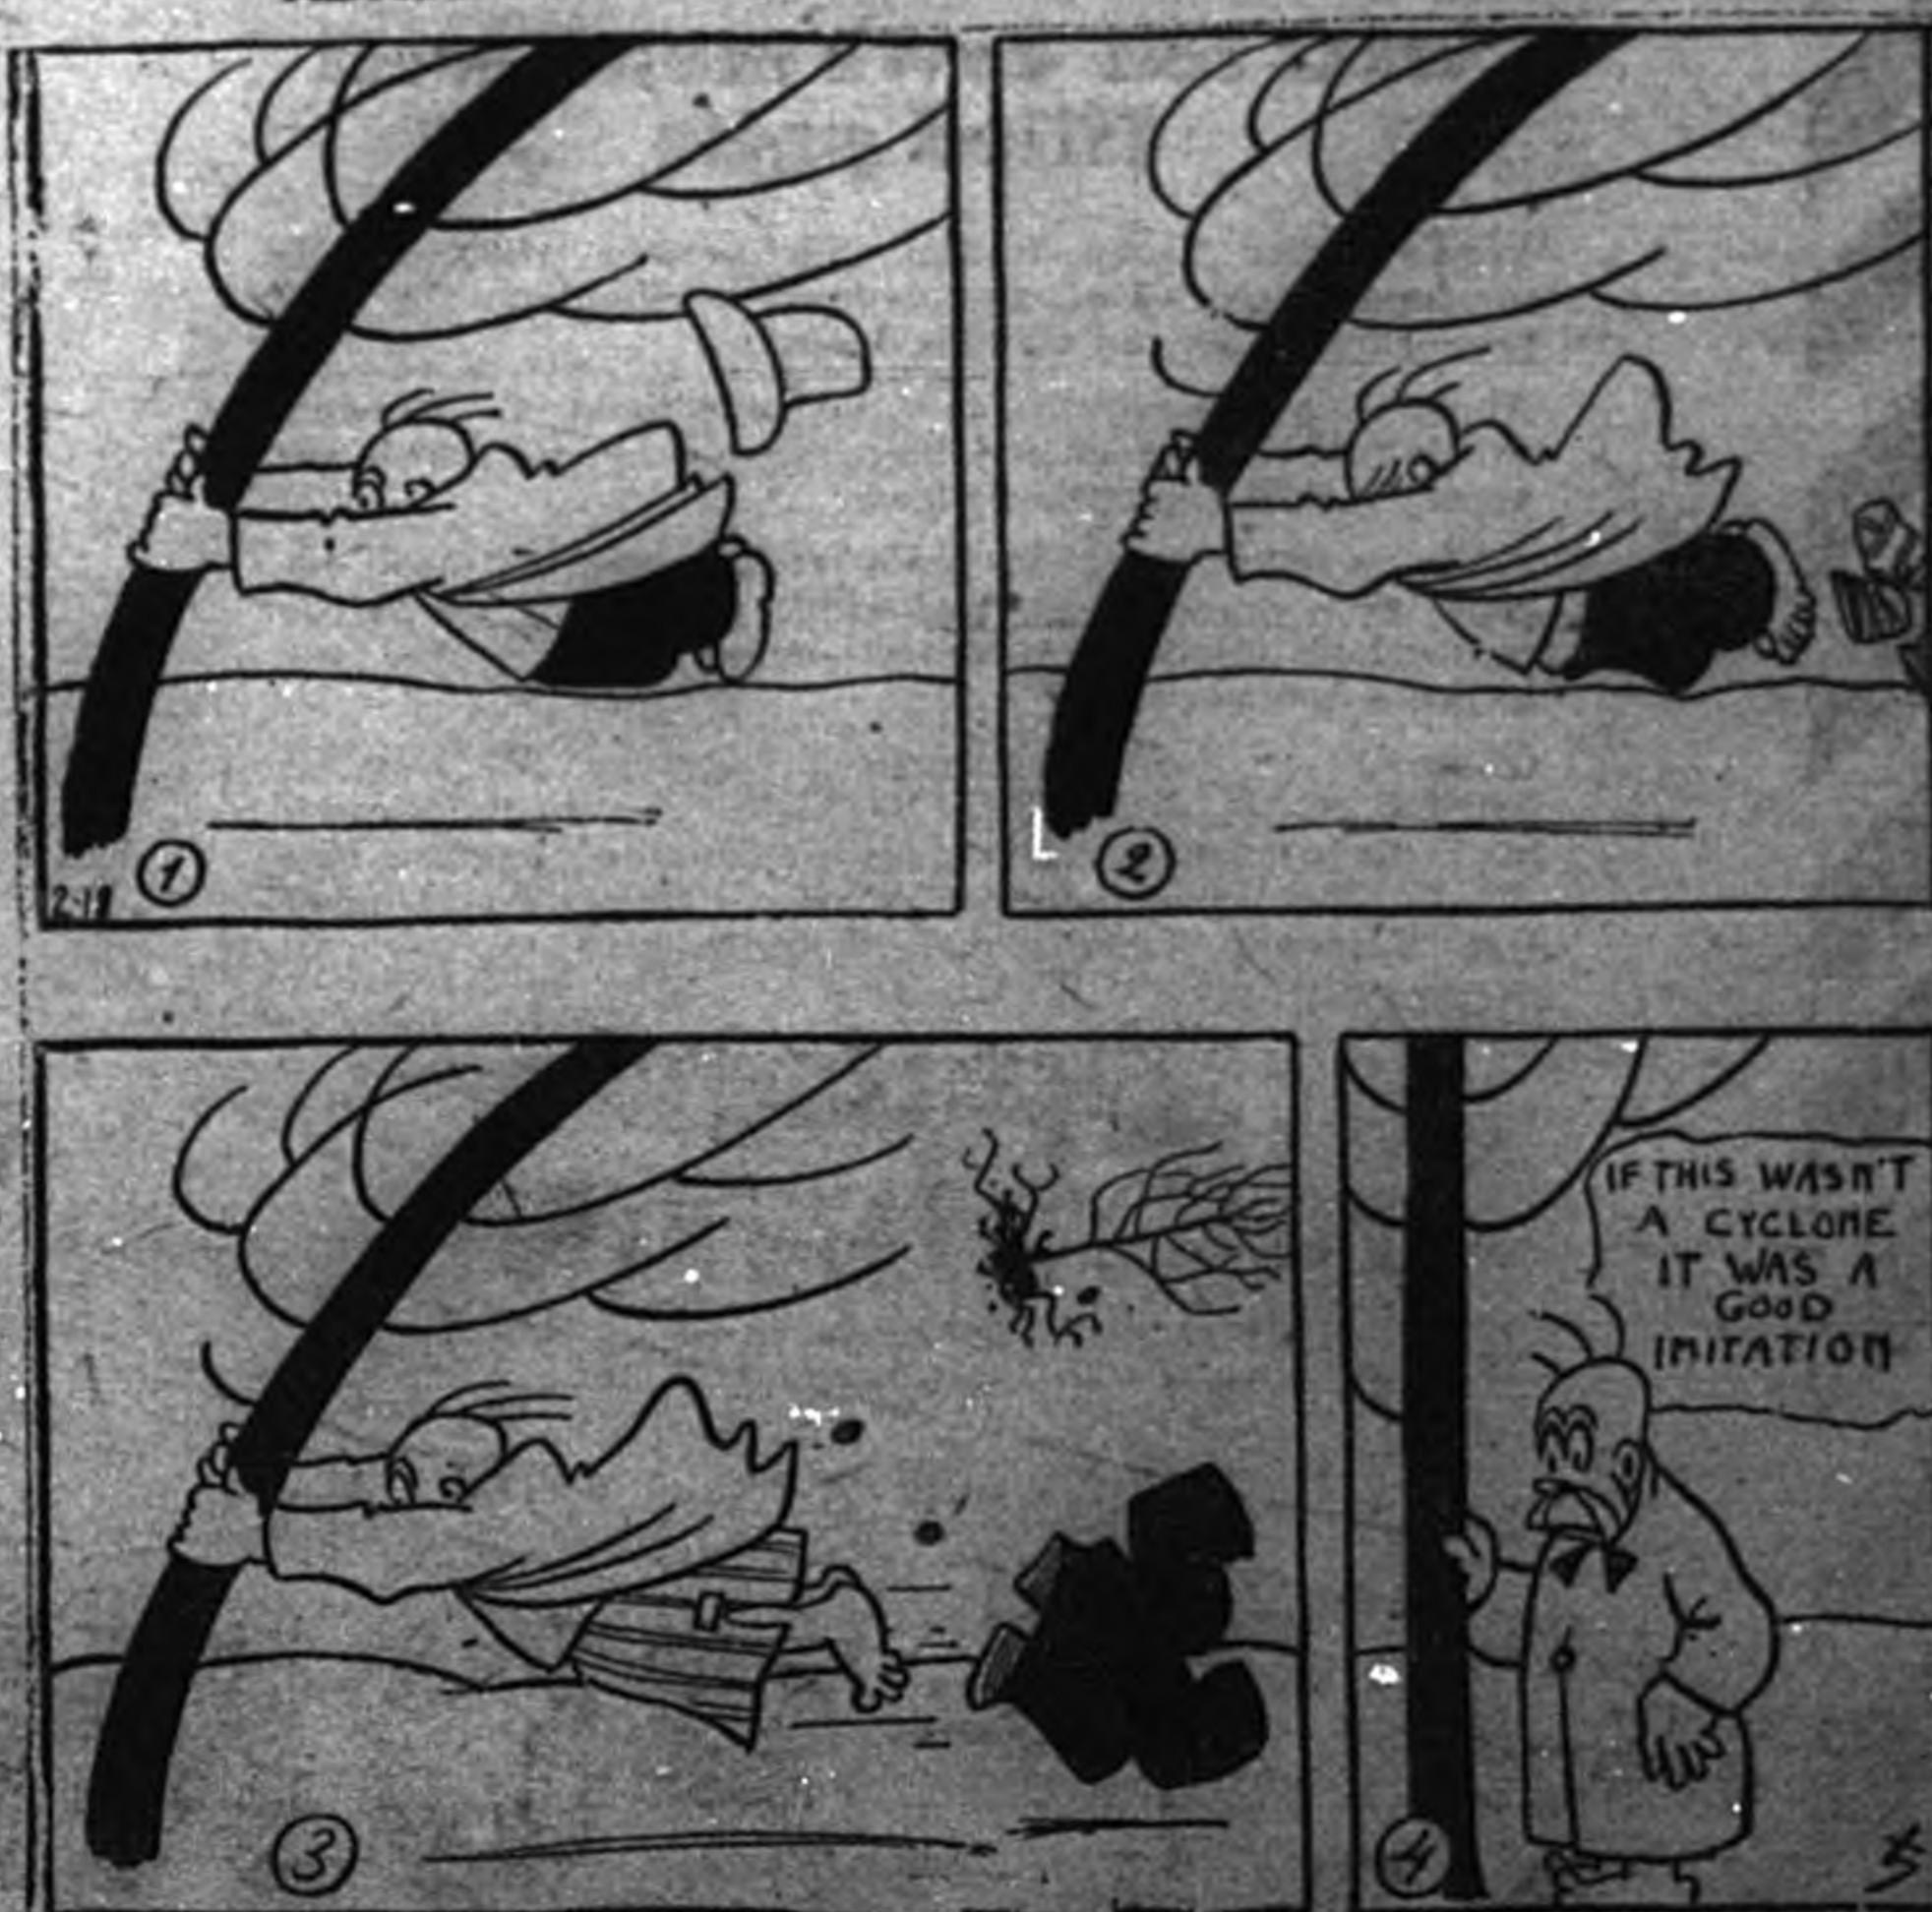

Liver Hash.

1 pound liver, ¼ pound bacon, 2 cups chopped boiled potatoes, 2 minced green peppers, salt and pepper. Parboil the liver so that it will be firm enough to chop. Fry the bacon and chop with the meat. Allow the minced green peppers to cook in the bacon fat for five minutes, then add to the liver potatoes and bacon. Season with salt and pepper. Minced onion may be added if desired. This hash may be fried in the bacon fat or baked in the oven until brown.

Busy Signal.

We have letters from many mothers some saying they have four children, some five and some six. Those with more than six apparently hadn't time to write.—Woman's Home Companion.

REVISED STATUTES PROVINCE OF QUEBEC CHAPTER 46 — SECTION 7.

Public Notice is hereby given, in
accordance with Section 7, of the
Watercourse Act, that the Gatineau
Power Company, a corporation or-
ganized under the Quebec Companies
Act, with its principal place of busi-
ness in the City of Ottawa, Province
of Ontario, intends to apply for au-
thorization to construct dams, power
house and other necessary works of
development of its water power at
"Chate au Pateau" near Ste. Adele,
Quebec. The said works to be built
in and along the North River, East
Branch, in front of lots 1 and 2, of
the 5th Range, and 1-B, 2-A, 2-B, 3,
4, 5, 6, and 7, Range 4 of the Town-
ship of Wexford and lots 22 and 23
range 10, Township of Abercrombie,
in the County of Terrebonne.

Notice is also given that a petition
to that effect accompanied by plans
and specifications of such works show-
ing the site chosen for the construc-
tion thereof and the lands affected
by the backing up of the water has
been forwarded to the Minister of
Lands and Forests and that a dupli-
cate of the said plans and specifica-
tions has been deposited in the Re-
gistry Office of the Registration bur-
eau of the County of Terrebonne, at
St. Jerome, Quebec.

The application contained in the
petition will be taken into considera-
tion on or after the day following

THE NAVIGABLE WATERS PROTECTION ACT.

R. S. C. Chapter 115.

The Gatineau Power Company here-
by gives notice that it has under Sec-
tion 7 of the said Act, deposited with
the Minister of Public Works at Ot-
tawa, and in the office of the Dis-
trict Registrar of the Land Regis-
try, District of Terrebonne, St. Jer-
ome, Quebec, a description of the site
and the plans of dam and intake for
a hydro electric plant proposed to be
built on the North River, East branch
near Ste. Adele, Quebec, in front of
lots 1 and 2 of the 5th Range, and
1-B, 2-A, 2-B, 3, 4, 5, 6, and 7 of the
4th Range in the Township of Wex-
ford and lots 22 and 23 Range 10,
township of Abercrombie, in the
County of Terrebonne.

And take notice that after the ex-
piration of one month from the first
publication of this notice, the Gat-
ineau Power Company will, under
Section 7 of the said Act, apply to
the Minister of Public Works at his
office in the City of Ottawa, for ap-
proval of the said site and for leave
to construct the said dam and power
house.

REVISED STATUTES PROVINCE OF QUEBEC CHAPTER 45

SECTION 7.

Public Notice is hereby given, in
accordance with Section 7, of the
Watercourse Act, that the Gatineau
Power Company, a corporation or-
ganized under the Quebec Companies
Act, with its principal place of busi-
ness in the City of Ottawa, Province
of Ontario intends to apply for au-
thorization to construct dams, power
house and other necessary works of
development of its water power at
"Wilson Chute" Quebec. The said
works to be built in and along the
North River near the town of St.
Jerome in front of Lots 292, 428 and
429 in the Parish of St. Jerome, in
the County of Terrebonne.

Notice is also given that a peti-
tion to that effect accompanied by
plans and specifications of such
works showing the site chosen for the
construction thereof and the lands af-
fected by the backing up of the wa-
ter has been forwarded to the
Minister of Lands and Forests and
that a duplicate of the said plans and
specifications has been deposited in
the Registry Office of the Registra-
tion Bureau of the County of Ter-
rebonne, at St. Jerome Quebec.

The application contained in the
petition will be taken into considera-
tion on or after the day following
the date of the last publication of
this notice in the Quebec Official
Gazette.

LACHUTE AUDITORIUM

FRIDAY EVENING, MAR. 9th.
8.30 p.m. Sharp Admission 50c.

HOCKEY

An exciting game was played at the L.A.A.A. rink last Saturday afternoon, when Lachute Academy was defeated by the West Hill High School Team of Montreal, by a score of 6-2. The game was fast and clean there being no penalties in the whole sixty minutes of play. The Academy boys expect to go to Montreal on Saturday for a return game. The Lachute line-up was as follows: Goal, R. Cruise; Defence, I. Monk and A. Stewart; Wings, L. Cruise and A. MacGibbon; Centre E. Middleton. Subs:—R. Underhill, M. Wilson, Roy Cruise and S. Jones.

In the league formed this winter comprising Brownsburg, Ayers Limited and Argenteuil Motor Sales, considerable rivalry and hard feeling has been caused as to who should be the rightful winner of the "Cup." We are not in a position to state just who is right or wrong and we do not purpose giving any lengthy discussion to the matter as there are always two sides to every question, and I think these matters can be settled much more satisfactorily without using the columns of a newspaper. However, having received a letter from the president of the Brownsburg Team we print in brief their chief complaints as follows:—
Why should the game played on Saturday night 29th, be protested any more than that of the 24th. We admit having outside players, but these have been used by all teams in the league at different times as there was nothing signed to the contrary. We have won two games out of three and feel that we are entitled to the Cup, therefore the game called for on March 10th., is unnecessary and we will not be present as Hawksbury is coming over for a friendly game. Don't miss it. Puck faced at 8.45 p.m. Admission 20c. and 10c.

BOYS AND GIRLS CALF CLUB

The Calf Club for Boys and Girls which has been conducted under the St. Philippe Farmers' Club for the past three years, has been transferred to the St. Jerusalem Farmers' Club for the year 1928.
Boys and girls between the ages of 10 and 18 years may join this Club. Each boy or girl must care and feed two calves and exhibit the best calf at the fall exhibition. Classes will be provided for registered calves and grade calves. Prize money will be provided by the Federal Dept. of Agriculture, the Provincial Dept. of Agriculture and the St. Jerusalem Farmers' Club.
Boys and girls wishing to join this Club should send their names as soon as possible to Alex. F. Bothwell, County Agriculturist, Lachute, Que.

G. F. CALDER SR. HONORED.

Were the residents of Argenteuil to be called upon to vote on this County's most honored and respected citizens, we have no hesitancy in saying, that in our opinion the honors would be accorded to Mr. Geo. F. Calder, and we are glad to know this feeling is shared in a larger sphere than that of his own environs, because we learn that he has just been elected an associate member of the Protestant Committee of the Council of Education, a position that we know he will worthily occupy and justly fill.

As a true gentleman, a cultured scholar, and an active thinker, Mr. Calder has been a great asset to this community, always giving most ungrudgingly of his time and energy in rendering valued service for the greater good of his fellows.
Like many of our county boys who have mastered great difficulties Mr. Calder's early life was not a bed of roses. He gained his first years of schooling in the little old log school house known as "Warwick's School" in Chatham, afterwards coming to Lachute Academy. He then learned the printing trade in "The Watchman" office but his ambition carried him back to the Lachute Academy where he prepared himself for college and entered McGill in 1881, matriculating in arts and receiving his degree of B.A. in 1885. He obtained a first-class Academy diploma from the McGill Normal school and then accepted principalship of the Aylmer Academy where after successfully teaching for two years he returned to Lachute and entered partnership with Mr. Simpson in the office where he learned his trade. In 1891 he was appointed a commissioner of the Superior Court and in 1892 was admitted to the Bar for the study of law. In 1897 Mr. Calder was appointed as Registrar of the County which position he has filled with distinction and honor, being now in his 32nd. year of office.

Serving as Mayor of the Town, Mayor of 16 Island Lake, where he has his summer home, acting as Commissioner & Chairman of our School Board for many years, President of the Lachute Cemetery Committee, and many other boards, one may readily see that these services have often been rendered at point of very great sacrifice.
It is then with great pleasure that Argenteuil appreciates the honor conferred upon our worthy citizen and we trust he will long be spared to enjoy the good wishes and esteem of his many friends.

CARD OF THANKS

Mrs. Edmund Hodge and family wish to thank their friends and neighbors for kindness and sympathy extended to them in their sad bereavement.

Mr. and Mrs. S. J. Wilson and family wish to thank all those who so kindly assisted in their recent sad bereavement and loss.

LOCAL NEWS.

Mr. Jas. Campbell spent Monday in Ottawa visiting friends.

Mr. George McCoy, of Montreal, spent the week-end in town.

Mr. Perry, of Montreal, is the guest of his daughter, Rev. Mrs. Cousens.

Mrs. Ball, of Montreal, was the guest of Mrs. A. Beers for the week-end.

Mr. Guy Todd, of Montreal, was the guest of his mother, Mrs. J. W. Todd.

Mr. Louis Lafleur and daughters are spending a few days in Montreal this week.

Mr. Harlow Giles of Montreal, spent the week-end in town, renewing old acquaintances.

Mr. F. Donaldson, of Montreal, was the week-end guest of Mr. and Mrs. Chas. Walker.

Major Geo. Mitchell and Mr. Scott Brown left on Monday for a business trip to the Coast.

Mrs. Oswald Thompson was the guest of her parents, Mr. and Mrs. Richard Brown this week.

Miss Dorothy Morrison, of Lochaber, was the week-end guest of her parents, Mr. and Mrs. V. A. Morrison.

Miss Lillian Hamilton, of Montreal, was the guest of her parents, Mr. and Mrs. H. Hamilton for the week-end.

Mr. K. Campbell and Miss Doris Campbell, of Montreal, were week-end guests of Mr. and Mrs. J. Campbell.

Mr. and Mrs. Jos. Belanger left on Tuesday for New York, whence they leave for a trip around the world.

Miss Maud Dobbie and Mr. Roy Dobbie spent the week-end in Cushing visiting at the home of Mr. R. Dobbie.

Mrs. Finlay McGibbon was called away this week, owing to the death of her sister, which occurred at Cleveland, Ohio.

Come and enjoy a good laugh in the Auditorium, on Friday, March 9th., at 8.30 p.m., when "Adam and Eva" will be presented.

There are rumors that Mr. John Mason, of Brownsburg, has taken the agency of the Chevrolet Car with Mr. Louis Lafleur as his salesman. Salesroom to be at Mr. John McFaul & Son's old store.

Argenteuil Motor Sales announces new addition to their line of cars Hupmobile 6 cylinder, which is now on display at their Show Rooms, with all the latest 1928 models in Buick, Pontiac, Willys-Knight, and Whippet four and six cylinders. Everyone cordially invited to pay them a visit.

At a meeting of the Council on Wednesday evening, a letter of sympathy was sent to Mrs. Zolique Rochon, in her recent sad loss of her husband, who had been one of our honored councillors. Letters of sympathy have also been received from Sir George H. Perley and the Catholic Order of Foresters.

The meeting of the Literary and Dramatic Society that was postponed on February 28th., will be held in the Academy, on March 13th., at 8.15 p.m. Dr. MacLeod will give a talk "What books constitute a good library", also the fourth act of Hamlet will be read and discussed. Members are requested to notice that the new library books are at Miss Slaters.

LADIES' CURLING

The finals for Mrs. Christie's Trophy were played off last Thursday, Mrs. Middleton defeating Mrs. Drew by a score of 16-9.

Mrs. MacKinnon Mrs. Mitchell
Miss B. McOuat Mrs. Hamilton
Mrs. J. McGibbon Mrs. A. McOuat
Mrs. Middleton Mrs. Drew

Play for Mrs. E. H. Wilson's Trophy began on Monday last.

The Challenge game for the E. H. Wilson challenge cup was played on Wednesday, the challengers defeating the Holders by a score of 18-11.

Holders Challengers
Mrs. Stead Miss G. C. McOuat
Miss K. Barron Mrs. M. Gall
Mrs. W. Deacon Miss A. Riddell
Mrs. J. MacGibbon Miss E. Fraser

(Skip) (Skip)
Owing to the absence of Miss G. C. McOuat, Mrs. Christie substituted.

MEN'S CURLING

Two teams from Montreal had a pleasant game with Lachute on Saturday last, during the afternoon, and in the evening two teams came over from Hawksbury, accompanying the Hockey Boys. During both games Lachute came out victorious and the games were greatly enjoyed.

Finals in the Dunany Cup were played off on Tuesday between rinks skipped by Dr. Drew and Mr. F. A. Brennan. As often happens, luck seemed to be against the losers resulting in a win for Dr. Drew of 14 to 5. The teams were as follows:

A. F. Aitken D. McOuat
R. A. Giles S. McFaul
C. Walker C. Tremblay
Dr. Drew F. A. Brennan

(Skip) (Skip)

DEATH.

MORRISON.—At the Glen, Louisa, Que., on Friday, March 2nd., in her 63rd. year. Katherine Tomalty, wife of Henry Morrison.

ANNUAL TEA-MEETING

The Lachute United Church tea-meeting held last Thursday, March 1st., proved a huge success. The proceeds amounted to over \$385. The weather was all that could be desired for such an event. Supper was served at 5 p.m. and between that and 9 o'clock, 700 persons had partaken of a sumptuous repast. The programme that followed was an excellent and entertaining one, Mrs. G. Carville Duncan, of Montreal, delighted everyone with her singing and Mr. Duncan contributed largely to the success of the evening by his selections on the organ as well as by his accompaniments for those who sang. Miss M. Jobb played two beautiful piano numbers in her usual brilliant manner. Mrs. John Macaskill and Mrs. Albert Tittley contributed two readings each. Mr. Champion contributed a vocal solo. Short speeches were made by Rev. John Macaskill, Rev. J. R. McLaren and Rev. F. L. Jobb.

Thanks and congratulations were offered to Mrs. J. W. Gall and her small army of assistants and the tea-meeting of 1928 was brought to a close by the singing of the National Anthem.

ANNUAL MEETING OF WOMEN'S INSTITUTE

The Annual Meeting and Pie Contest of the Argenteuil's Women's Institute, held at the home of Mr. and Mrs. Gordon Smith, of Beech Ridge, on Tuesday, March 6th., was well attended. Reports of 1927-1928 were given by the President, Secretary and Treasurer. The officers elected for the following year are:—President, Mrs. Jan. Thompson; Vice-President, Mrs. John Bradley and Mrs. Gordon Smith; Treasurer, Mrs. Wm. Watson; Secretary, Mrs. Jas. McKenzie. Our County President, Mrs. John Boyd, gave an address on the work in the County.

The entries in the Pie Contest were not as numerous as usual. The awards were:—

Lemon Pie:—1st, Mrs. John Fraser Sr.; 2nd, Mrs. Jas. Thompson; 3rd, Mrs. Robt. Morrison; 4th, Mrs. L. Hooker; 5th, Mrs. Wm. Watson.

Apple Pie:—1st, Mrs. Jas. MacKenzie; 2nd, Mrs. L. Hooker; 3rd, Mrs. G. Smith.
The pies were judged by Mrs. Cook of Beech Ridge, and Misses Grace McOuat and E. Patterson, of Lachute, to whom we are very much indebted. The fee for refreshments was waist measure, five cents a foot, which caused much amusement. After a vote of thanks to Mr. and Mrs. Smith the meeting adjourned with the singing of the National Anthem.

TOWN COUNCIL

The regular meeting of the Town Council was held on Wednesday last, there being present Mayor H. M. Gall and Aldermen T. Dallaire, H. M. Lavigne, G. J. Charland, J. Speight, C. R. Miller, A. J. Elliott, P. Dobbie and A. Larocque.

Minutes of last regular meeting were then read and approved.

It was unanimously moved and seconded that the Council send a letter of sympathy to Mrs. Z. Rochon, re the death of her husband, the late alderman Z. Rochon.

It was decided that all arrears of taxes not paid before April 1st., should be handed in for legal proceedings.

The election of Committees was as follows:—

Finance,—A. Larocque, H. M. Lavigne, and G. J. Charland.
Road,—P. Dobbie, A. J. Elliott and T. Dallaire.

Water,—T. Dallaire, J. Speight and C. R. Miller.

Relief,—H. M. Lavigne, C. R. Miller and J. Speight.

Police,—A. J. Elliott, H. M. Lavigne and Dr. L. P. Sauvé.

Park,—C. R. Miller, T. Dallaire and G. J. Charland.

Health,—L. P. Sauvé, G. J. Charland and J. Speight.

Pro-Mayor,—P. Dobbie.

Moved in amendment by Alderman A. J. Elliott that the services of Messrs. J. W. Gall and G. Valois be appointed as Auditors for 1928 to audit the Secretary's Books.

Moved in amendment by Alderman Larocque, seconded by Ald. Dobbie that the Mayor be instructed to procure the services of a Chartered Accountant. The amendment was carried.

The Council then adjourned.

BIRTHS.

WARWICK.—At Brownsburg, on Saturday, March 3rd., 1928, to Mr. and Mrs. Russell Warwick, (nee Sarah Black), a daughter.

ENGAGEMENTS

The engagement is announced of Margaret Helen, elder daughter of Mr. and Mrs. C. J. Stanforth, of Arundel, Que., to Dr. William Howard Barnes, elder son of Dr. Howard T. Barnes and the late Mrs. Barnes, of Montreal. The marriage will take place in London, England, early in April.

DEATHS.

HIGGINSON.—Suddenly at Calumet, Tuesday, Feb. 28, Anna Whitcomb Stevens, beloved wife of George E. Higginson.

Stork Sense of Direction Innate, German Observatory Finds

Bavarian Professor's Experiments Show That Young Birds Fly Unerringly South Even if Leaderless

Diesen-Am-Ammersee.—At Rositten, the lonely spit of sand and salt marshes on the Kurische Nehrung, stands the great bird observatory in which so many experiments already have been made toward clearing up the problems of bird flight. The fitting out of the birds with rings bearing the date and the name of the observatory has led to many interesting results. Now Professor J. Thienemann, the director, is about to use the period of migration to make various new experiments in the hope of discovering something about the methods by which the birds find their way on their far flights to warmer lands. The question which the professor put to himself was the following:

"What happens if migratory birds, bred in the spring, are artificially held back in autumn, and let loose when all the other birds of the same species already have made their way to the South? They would be thrown back upon their own resources, are without a leader, cannot attend the 'bird

parlaments" and so on. How will such birds fly? Will an infallible sense of direction point them the way?"

Professor Thienemann thereupon set about finding answers to these problems and describes his procedure as follows:

"I decided to choose storks for purposes of experiment, because the route taken by these typical migratory birds to the southern extremity of Africa has been determined beyond possibility of doubt by the experiment of providing the birds with rings. Each of these rings bears a number and the words 'Vogelwarte Rositten, Germania'."

Route Taken to Africa

"The route taken by the birds leads from East Prussia toward the south-east, through Hungary, over the Bosphorus, through Asia Minor and by way of Syria and Palestine to Africa, and then up the valley of the Nile and in the eastern half of the Dark Continent down to the Cape. This being established, I can at once observe whether any of my experimental storks diverge from the accustomed route."

Last year the professor made an experiment on a small scale. A few storks were artificially held back when the other storks were preparing

to fly. They were kept in an enclosure and were extremely restless and upset for a week or so after the others were gone. Then they quieted down and were set free. Bad weather set in and the storks made no attempt to set about the customary flight. However, a couple of weeks later, when the weather cleared they all set off at once. This was on September 13, 1926.

The next day they were sighted, flying in a group to the south of the Kurische Nehrung; the day after over the Samland, in East Prussia; and then nothing more was heard of them until the beginning of December, when the professor received a report from Athens that one had been found. It had been discovered, in company with others of a similar species, between Athens and Aulon. The foot ring, also was returned. The Greek police had forcibly retained it in the interests of science in spite of the protests of the fortunate owner, who wanted to keep the ring as a lucky talisman for himself and his family.

The finding of this stork showed that the experimental storks had flown further westward than the normal route.

"It is very strange," said Professor

Test To Be Repeated This Year on Larger Scale; Presence of Species Indicates Prosperous Area

Thienemann. "These birds grew up in the oasis of Rositten. On both sides of them lay water, the Baltic Sea and the Kurische Haff, and to north and south the Nehrung, with its flat salt marshes stretched alike in both directions—why did not these birds fly off stupidly toward the north? On the contrary, they flew off quite correctly toward the south, although they had no leader. It would seem, therefore, that they have a feeling for the southerly direction."

"This year I have repeated the experiment on a much larger scale, for one must give chance as much space as possible. I am at present the happy owner and nurse of seventy-five young storks. It is no joke to be the foster-father of such a family. The problem of their daily dinner is not so lightly solved. The fishermen of Rositten are hard put to it to haul enough dabs out of the Kurische Haff, and the village boys, I am afraid, have become very inattentive to their lessons, for they think of nothing but catching frogs."

He sincerely believed that "God" was an IT with no moral characteristics, and that men and women would have been happier and better off if they had not had minds, but had possessed only the senses of the lower animals; and how far astray his theories led him as to the actual conditions of modern life may be seen by the following extracts from "The Return of the Native":

"The view of life as a thing to be put up with, replacing the zest for existence which was so intense in early civilizations, must ultimately enter so thoroughly into the constitution of the advanced races that its facial expression will become accepted as a new artistic departure."

Is it any wonder that Hardy, with all his artistic genius, and with all his sincerity, failed to get the Nobel Prize?

One of the most remarkable things about his long life is that he attained eminence in four kinds of art. He was a successful and prize-winning architect; he became the foremost living English novelist, the last of the great Victorian novelists, and is enrolled permanently—so far as we can see—with Dickens, Jane Austen and Fielding; he became one of the leading English poets of the twentieth century; his epic tragedy of the Napoleonic wars, "The Dynasts," has apparently given him a place among the great English dramatists, for it is safe to say that it will find readers for many years to come.

He always (after 1858) wished to be regarded as a poet, not as a novelist; he insisted that his poems were better than his prose and that they would live longer.

It is possible that "The Dynasts" will live as long as anything he wrote; but it is the novelist we think of first when his name is mentioned.

Had he never written a novel his poems would have won for him an audience; but it was fortunate for him that the poems were published with the tremendous prestige of his name. It is true, as he always insisted in later years, that his career as a poet, even going only by actual publication, was longer than his career as a novelist. He published

prose fiction for twenty-five years and poetry for nearly thirty.

His poetry has enough quality to insure him a place among the poets of his time; but suppose you had to choose between Francis Thompson and Hardy, or between Alfred Housman and Hardy, or between Rudyard Kipling and Hardy, which would you take? His poetry is interesting because it proceeded from an interesting mind; but in poetry, style and expression are the main things. There is no doubt that Hardy's mind was far more interesting than the mind of Alfred Tennyson; but no one of Hardy's poems, interesting, original, appealing as it may be, is equal in beauty of expression to "Ulysses."

It still seems clear to me that Hardy's novels are the most important part of his work; but in order that the other view may receive adequate expression, coming as it does from the highest possible source, I will quote, with the most profound respect and appreciation, from a letter that Mrs. Hardy was kind enough to write to me on February 14, 1926, in which she notes "the curious fact American critics bestow nearly their whole attention on the first half of Mr. Hardy's literary career (1871-1895) and none on the second half (1895-1926). Yet the writings of the first half were dictated by accidents and circumstances not under his own control, while those of the second half were the result of uncontrolled personality."

When one remembers what time has done to critical pronouncements and judgments one is—or should be—humble. It is, of course, possible that some centuries from now Hardy will be known chiefly as a poet; to-day one can express only personal preferences. It has always been thought a good answer to the Baconian fanatics that for one man to write the thirty-seven plays was marvelous; that for another man to write the Essay was marvelous, but that for one man to write both was inconceivable.

It is an amazing fact in our own time that the author of "Tess," "The Return of the Native," "Far From the Madding Crowd," "The Woodlanders,"

Perpetual Motion "Solved," But Problem is How to Stop Device

Machine Is Simple, Explains Young Serb Who Got Idea From Water Pump; Invention Patented and Experts' Opinion of Blueprints Is Flattering

Belgrade.—Perpetual motion, which used to rank with the philosopher's stone as science's greatest problem, is a burning question no longer, if the claims of a young Serb, M. Asim Hajdarovitch, are accepted at their face value. His chief problem now is how to stop the machine once it has been started.

The idea is very simple, Hajdarovitch explains, for it came to him when he saw a wheel pumping water out of a cistern. The machine consists of some wheels, with certain

weights on one of them. He says his machine is not ideal, but practical. His invention has been patented, and the opinion of experts who have seen the blueprints is very flattering.

When the first wheel starts the other wheels gradually assume a terrific speed, and in order to stop them many devices must be brought into play. It is suggested in scientific circles that this machine will create a technical revolution.

Hajdarovitch is without education and admits total ignorance of the laws of physics.

METROPOLITAN CHURCH, TORONTO

Recently destroyed by fire. The firemen saved the Carillon one of the finest in Canada.

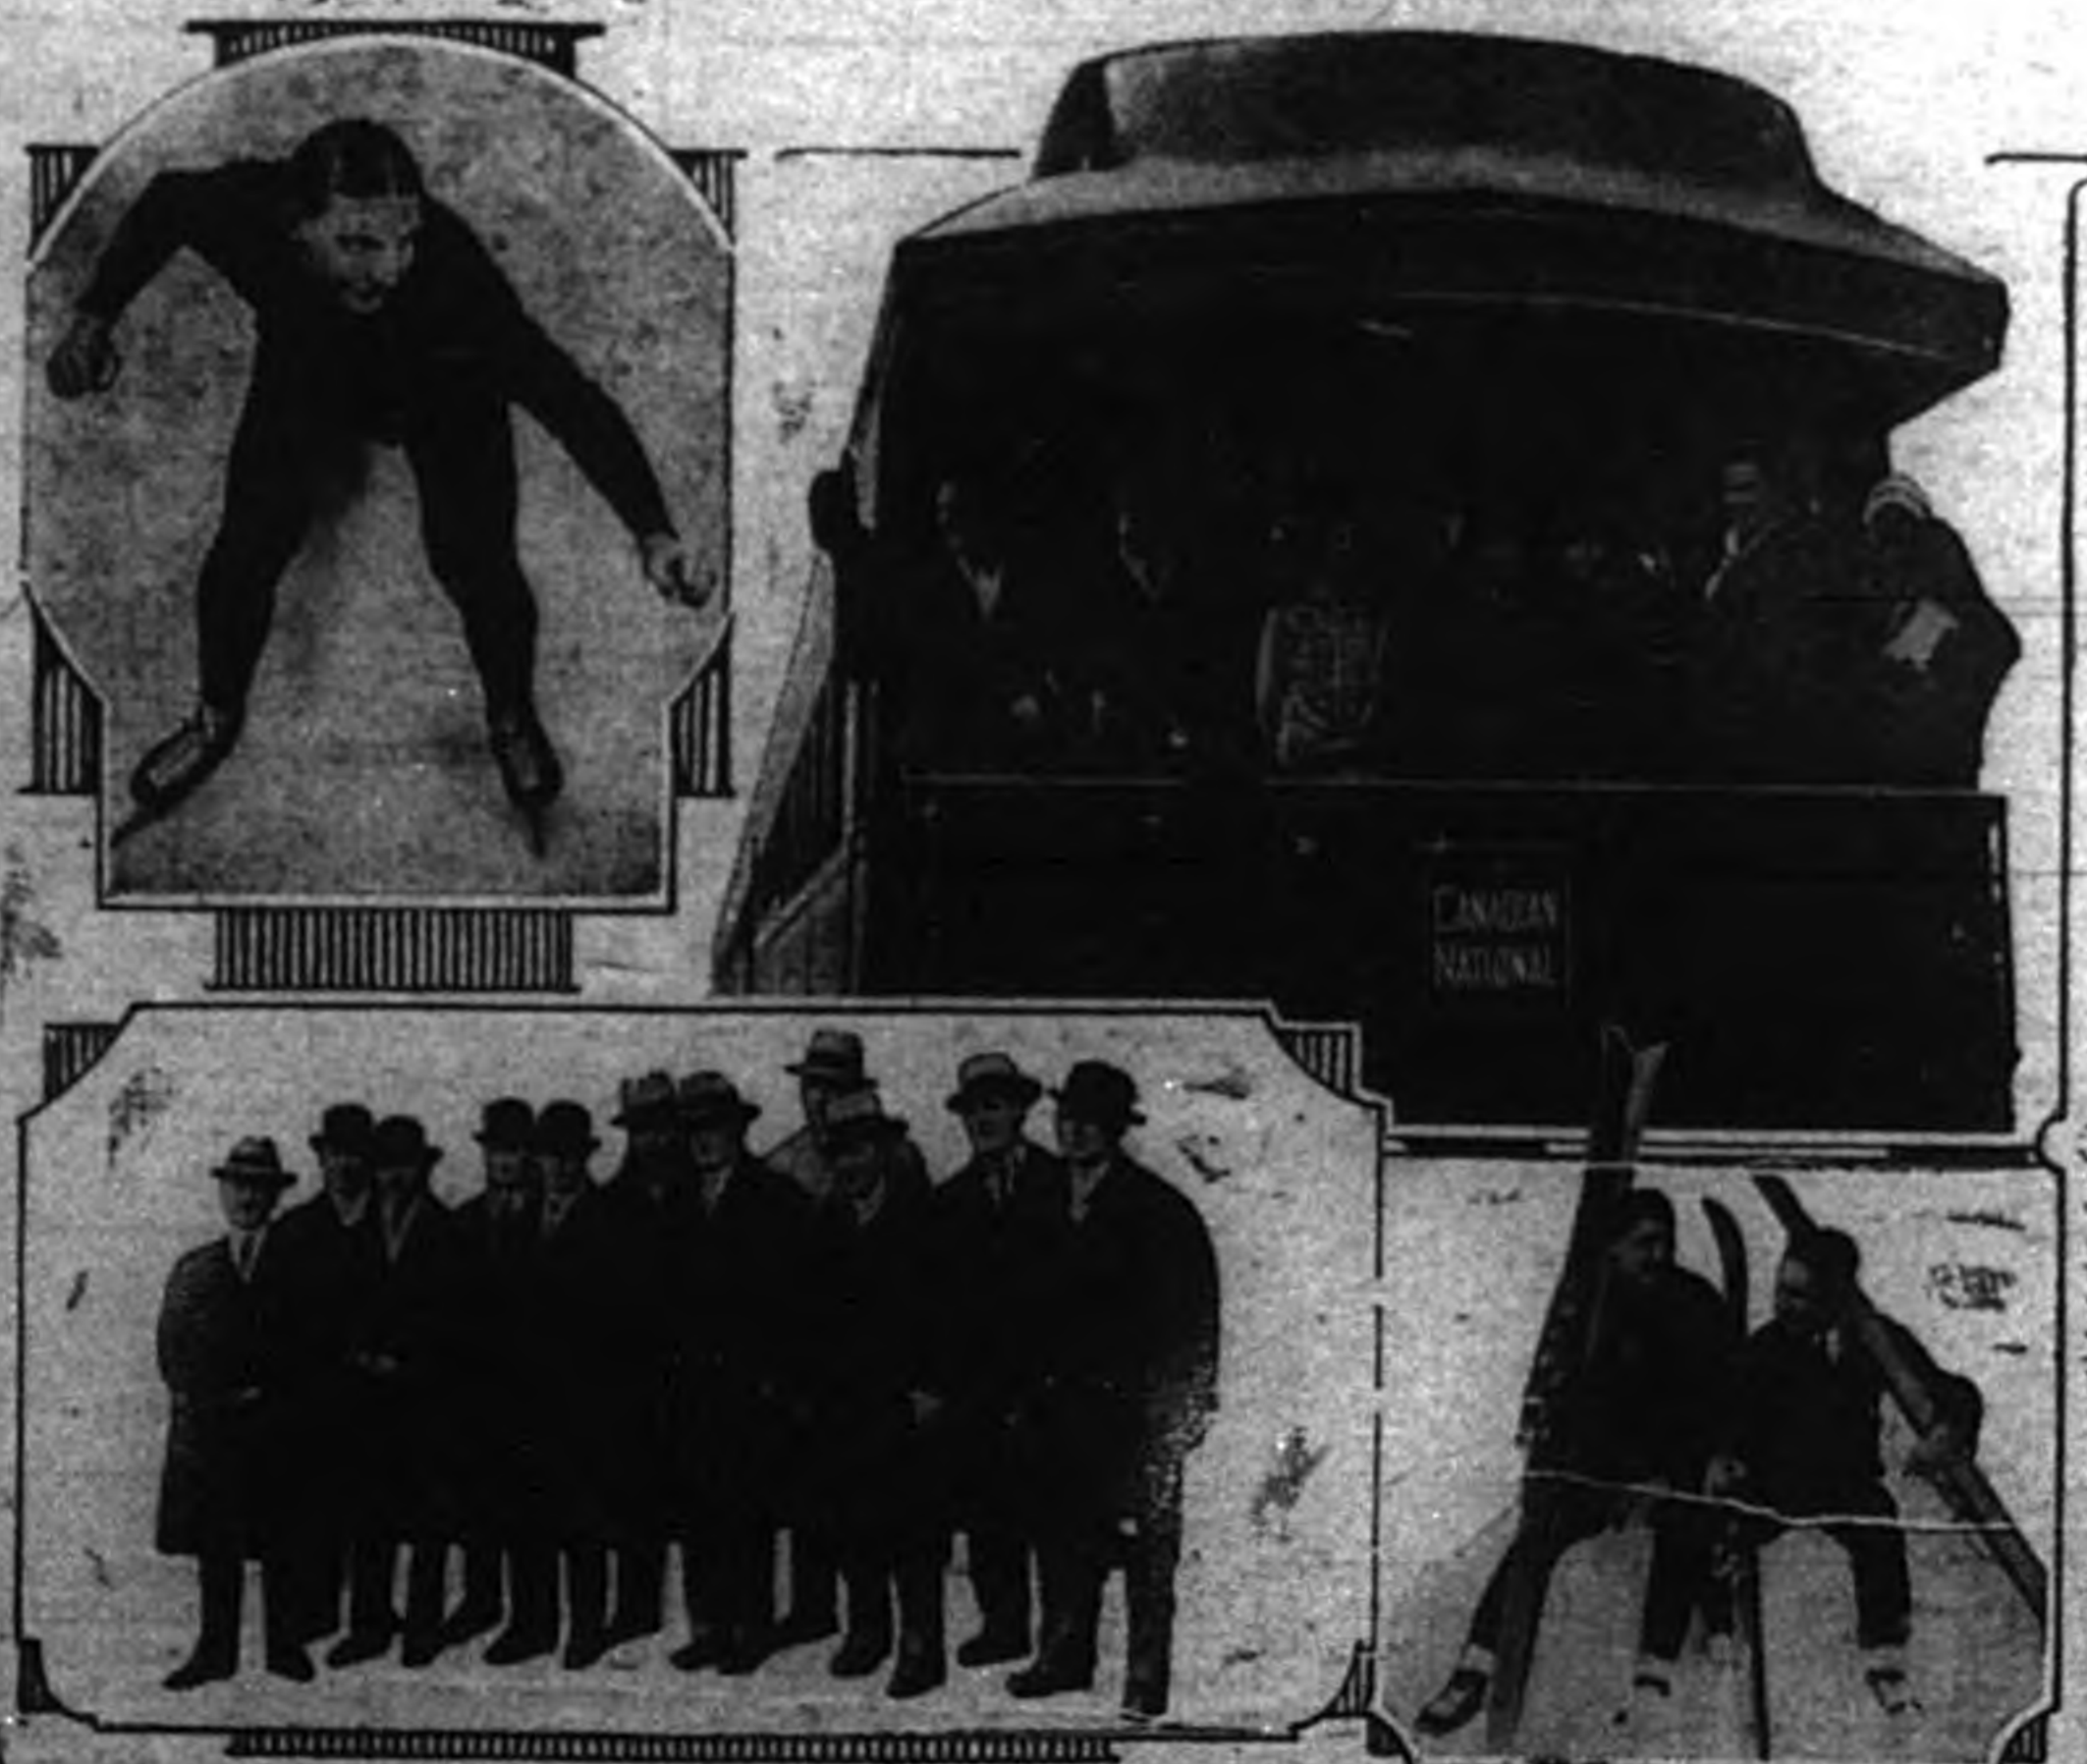

the author of seven volumes of original lyrics, and the author of "The Dynasts" is one and the same man—Thomas Hardy. —N.Y. Herald-Tribune.

RATHER LISTEN THAN READ
He: Do you read love stories?
She: No; I like to have them told to me.

A man was smashed up in a railroad accident. The family received a wire saying: "Mr. Hess in railroad wreck. Both legs, both arms, back and neck broken, and skull fractured." And a few hours later a second dispatch arrived: "Not so bad as at first reported. One arm not broken."

Canadian Athletes Leave For Olympic Games

Canada's representatives at the Olympic Games at St. Moritz, Switzerland, now on their way across the ocean, journeyed from their homes to the seaboard via Canadian National Railways. Most of the party were photographed by the Canadian National

camera man at Montreal en route to Halifax. Photographs show: Lower left, The Varsity Grads hockey team, of Toronto; right, Lehan and Dupuis of Montreal and Ottawa respectively, skating representatives. Upper right, the party aboard the Maritime Express of the Canadian National Railways; left, Ross Robinson, Toronto speed skating champion, who will represent Canada in the speed skating events.

Do Popovers Pop?

The Conduct of the Popover Becomes More Predictable if a Standardized Recipe Is Used

There is something about popovers, apparently, that induces a general feeling of inadequacy in otherwise self-confident cooks. And that something, to draw conclusions from our own experience, is as likely as not the fact that in every cookbook you find an entirely different recipe for making hot bread. Apparently there are as many different ways to make popovers as there are ways to raise a baby, and each adviser insists that her way is the only possible road to success.

Popovers may be made with one, two or three eggs, according to the cookbook you use. The recipe may or may not call for a little butter. Some authorities take a firm stand about the necessity of using heavy iron pans for baking the popovers, while others ignore this matter completely. Practically no two cookbooks give identical directions for regulating the oven temperature for baking popovers. One recipe will advise a quick oven and another will recommend a slow oven throughout the baking time. If definite temperatures are given they may vary from 350 to 475 degrees in various cookbooks.

It is easy to see, in view of all this variation in recipes, why so simple a thing as a popover may go astray as often as not. That the popover may truly be simple, tractable and easily managed was recently proved in the research and testing kitchen of a store company. All the popover recipes available were tested and the results were carefully compared. It was found that satisfactory popovers may be made by using the following recipe:

A Tested Recipe
1 cup flour, 1 cup milk, 1 egg, ¼ teaspoon salt.

The addition of one tablespoon of fat will increase the tenderness of this product.

The addition of one egg will also increase the tenderness of the popovers, but a three-egg recipe results in an eggy flavor.

The most desirable recipe for popovers was found to be: 1-cup flour, 1 cup milk, 2 eggs, 1 tablespoon melted butter, ¼ teaspoon salt.

Add the beaten egg to the milk and combine slowly with the sifted flour and salt, beating just enough to mix thoroughly. Beating the whites and yolks of eggs separately not only does not improve the product, but causes the texture to become somewhat similar to that of muffins.

The best temperature for baking popovers was found to be 450 degrees Fahrenheit for 30 minutes and then 350 degrees for 15 minutes.

Melt the butter and add it last. Use heavy iron muffin pans, previously heated for ten minutes in an oven heated to 450 degrees. Pour about one and one-half tablespoons of batter into each small pan.

Quits.
"Why were you late at Sunday school this morning, Tom?" asked the teacher.

"Why, the bell rang before I got here," the little fellow explained.

Carpet is purchased by the yard and worn out by the foot.

THE LAST OF THE VICTORIANS

The Death of Thomas Hardy Closed the Career of the Last of the Great Victorians—For 50 Years He Enjoyed Fame, and Lived Long Enough to See His Books Definitely Among the Classics

By WILLIAM LYON PHELPS

Author of "Essays on Modern Novelists" and "The Advance of the English Novel"

I shall never forget the first time I read a novel by Thomas Hardy. I had felt an attack of "flu" coming, and, remembering that I had been cured of tonsillitis by reading "Treasure Island," I decided to read another good book, in the hope that it would divert both the mind and the cold. The volume I picked up had the inviting title: "A Pair of Blue Eyes."

I do not know how I had escaped hearing about Hardy's love of tragedy, but I began reading in that ignorance which has been called bliss. After I reached a certain point in the story the heroine and the two heroes were in serious difficulties; but I had so often in other books seen even worse emergencies from which the leading characters had come off scot free that I felt no apprehension or alarm, merely curiosity to see how the clever author would manage it.

If any one reading this article has not read "A Pair of Blue Eyes" I invite you to stop half way through the narrative and ask yourself this question: In what way could the story end that would hurt my feelings most? And I feel sure no one would be able to imagine an ending so bad as the one in the last chapter. When I finished that novel I threw it as far as my diminished strength would permit; I vowed I would never read another book of Hardy. I went to bed and stayed there one week. Such was the effect produced on me by a pair of blue eyes.

But such is the inconsistency of human nature that within one year I had read his man's complete works. Since then I have read many, as he is one of the few authors of our time whose books become more interesting on re-reading. He was the Englishman whom I most wanted to meet; and my wish was gratified on a beautiful September day in the year 1900.

We were on a bicycle tour in southwestern England; at Weymouth I bought a copy of one of my favorites—"Far From the Madding Crowd"—and armed with this I called at Max Gate, Dorchester, the author's home, which looked like an illustration for "The Woodlanders." The servants informed me that Mr. Hardy would see me at 3 o'clock.

Man and woman awaited in the garden with any sharper eagerness than I looked forward to that hour. I found him by his front door. He was clad in knickerbockers, possibly out of consideration for my informal acquaintances. He was a smallish, slender, wiry man, with a gray mustache and a gray face. And although his expression was grave, and though I never heard him laugh, he was as far from being severe as he was from being petulant. During our conversation we sat together on a bench—he made no remark that savored either of cynicism or of bitterness. But he was, as might be expected, undeniably serious.

In two respects I grieved him, but I knew I ought to be sincere. He told me that he greatly preferred his poems to his novels, whereas I liked the novels much better. At that time his first volume of poems had been out only two years. He also said that he regarded the shooting of game birds as wicked, as sinful, and asked me if I indulged in that practice. Alas, I told him that I was very fond of shooting, though not in the English fashion. I was lucky to bag two or three birds in a day's march. He said that he had endeavored to get others to co-operate in an attempt to abolish shooting in England, but he rightly regarded the project as hopeless. It may be that

in this respect he was in advance of his time.

I got along better on other themes. I asked him what he thought a novel should be. He replied emphatically that it should always be a story; the foundation must be a fable. He did not admire the modern custom of writing treatises, diaries, propaganda, what not, and calling the thing a novel.

I told him that even if I had not known he had been a professional architect I should know it from reading his books. "Because I introduce so many architects!" "Oh, no," said I, "because the whole structure of your novels is so beautiful architecturally." And in fact, the outline of almost any one is as symmetrically engaging as a Greek statue.

Mrs. Hardy joined us. We walked about the garden and entered the house, where we saw some of her paintings. I was invited to come to tea the next day, and I told them that while I had rather do that than anything else, we had only a few days left in England, we were on a bicycle tour, and I must consult my partner (life). He said they would be having tea in the garden the next day at 5 o'clock anyhow, and we could come or not, as we found it convenient.

We Went

He was literally covered with cats. Several large cats were purring over him, and at different places on the lawn and in the shrubbery I saw saucers of milk. "Are all these your own cats?" "Oh, no, only a few of them. But may cats invite the cats of the neighborhood in to tea. They know that saucers of milk will be provided and many come who are not invited. They just hear about it." This pleased me, for I have always been an ardent catist. A poem that Mr. Hardy published many years later, "Last Words to a Dumb Friend," is the most beautiful and affecting tribute to a cat that I have ever seen.

I asked him if he had put much of his own experience into his novels. He said that "A Laodicean" had more of the events of his own life in it than any other of his books. That was published in 1891; during its composition he was seriously ill and expected to die. He was unable to write, and therefore dictated the whole novel from a horizontal attitude.

My admiration for Hardy's novels, almost idolatrous as it was and is, did not exceed my admiration of the man. He was simple, unaffected, quiet, genuine; and I felt that he would have immeasurable sympathy for any one in sorrow or trouble. My previous belief, that his pessimism was caused by sympathy for others, was strengthened by talking with him.

The dawn of the twentieth century found Thomas Hardy without a living rival among English writers. By common consent he stood first. He received all kinds of honors, university degrees, medals, and the highest distinction of all, the Order of Merit.

He won everything winnable except the Nobel prize, and in my opinion his friends did him a disservice by bringing his name up publicly every year. If the Nobel Prize were granted merely for literary distinction he might have received it long ago; but, like the Pulitzer prizes in this country, the Nobel Prize must be given to work of an idealistic and uplifting character.

Now, although there is not the slightest doubt of Hardy's literary eminence, or of his sincerity, beauty and nobility of his character, his philosophical views were atheistic and pessimistic. I say this not as an accusation, but as an accurate description.

FOUND A HEALTH BUILDING TONIC

A Nova Scotia Lady Was in an Anaemic Condition.

Men and women who do not sleep well and are not refreshed and strengthened by a night's rest, are generally suffering from this, watery blood. The nerves fail to get the nourishment they demand and headaches and a worn-out feeling is the result. Building up the blood is the one sure step to renewed health and strength, and for this purpose nothing else can equal Dr. Williams' Pink Pills. From first dose to last they enrich and purify the blood, and in this way promote better appetite, better rest at night, and renewed strength.

Mrs. Mary E. Uhlman, Williams-town, N.S., writes:—"I have received so much benefit from Dr. Williams' Pink Pills, that I would feel myself ungrateful if I did not let you know."

"I was in a very bad state of health and reached the stage where I had to remain in bed. A doctor was called in and he told me I had no organic trouble, but was simply run down from overwork. I had been left with a family to support, which I did by dressmaking. The doctor said my blood had almost turned to water, and advised a rest cure. I did not see how it was possible for me to take a very long rest, so I decided to try Dr. Williams' Pink Pills. Soon I found my strength returning and before very long I was able to go about my duties as usual again. This was a few years ago, and my health remained good until about a year ago, when I broke out with humor of the blood. Again I consulted the doctor, who said my blood had become so thin that it had really poisoned itself. I told him I had bought several boxes of Dr. Williams' Pink Pills, and he told me to go on taking them as he thought they were just what I needed. I took eight boxes and again was in good health. I can therefore recommend these pills to all in a weak or run-down condition."

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50 cents a box. Try them today.

A sergeant-major, relating his experiences in the Great War, told the company in the mess-room that on several nights the temperature was down to zero. "That nothing!" remarked a sergeant. "What's nothing?" said the sergeant-major, evidently angered. "Zero!" was the sergeant's quiet answer.

NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and traveling expenses to and from New York. For further information write the Superintendent.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid. The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

OWL-LAFFS

Little Boy (on the beach)—"Mum-mum, I want to go deep into the sea."
Mother—"My dear, you cannot."
Little Boy—"But, Mummy, daddy does."
Mother—"Yes, but you see his life is insured."

Marshall (on phone)—"Yes, this is the fire department. Do you want to report a fire?"
New Bride—"Oh, no, I just want to order coal for the winter."

Seven Stages of Matrimony.

Patrimony
Ceremony
Parsimony
Inharmonony
Acrimony
Alimony
Out o' money

A friend of mine was discussing his roommate the other day. He said: "Fred is one of those fellows who would hold the lamp while his mother chopped the wood."

Nothing can take the place of common sense.

"O mother, guess what! I just saw a lady with great long hair gathered up in a bump on top of her head and held there with pieces of bent wire."

He kissed Helen.
Hell ensued.
He left Helen.
Helen sued.

"The cat was making an awful noise last night."
"Yes, ever since she ate the canary she thinks she can sing."

It is said a diamond will turn green when exposed to the rays of radium. We have never tried the experiment, for two reasons: One is that we have no diamond, the other that we lack the radium.

He—"I saw an attractive selection of garters on the street to-day."
She—"Where on the street?"
"Just above the knee."

Man, who always used to like to head the procession, now since the era of short skirts seems to want to lag behind.

Teacher—"Robert, here is an example in subtraction. Seven boys went down to the creek to bathe, but two of them had been told not to go into the water. Now, can you inform me how many went in?"
Robert—"Yes'm, seven."

If you are looking for revenge you'll find it in forgiveness.

The only reason that most flappers don't look more foolish than they do is because they can't grow sideburns.

Encouraging Home Crafts

One extraordinary result of the immense tourist traffic to Canada, especially in the eastern section, is the revival of home industries which in some cases have not been practised to any great extent for many years. So much so, that visitors to Quebec Province have been afforded the privilege of seeing rug-weaving, which is again flourishing after many years of disuse.

Tourists naturally desire to take home with them something of unique design or individual charm which cannot be obtained at home. They also look for something which had an attachment to and is representative of

the country they have toured. Rugs especially are much appreciated, and in scores of homes, nimble fingers are executing the designs of fifty to a hundred years ago, while there is great rivalry in the creation of new and artistic patterns representative of the country and atmosphere in which the workers live.

The revival of an old industry is due in part to the festivals promoted by the Canadian Pacific Railway, where exhibitions of this art are shown and greatly appreciated by interested spectators. Another festival of this kind will be given soon in Quebec, while others will be held in Banff and Vancouver.

GREAT PRAISE FOR BABY'S OWN TABLETS

The Dr. Williams' Medicine Co. has received the following letter from Mrs. Griffith, of 21 Merchison Ave., East Hamilton, Ont., concerning her experience with Baby's Own Tablets:

Dear Sirs,—I wish to thank you for the handy little booklet you sent me on the Care of Children. My baby boy was six weeks old when I first used Baby's Own Tablets, being new to Canada, but since the first proof of their many uses in bringing up a family, I have never been without them, for they are worth their weight in gold. There is no trouble in getting the little ones to take them and they often prevent an illness if taken in time. My first baby is now, at the age of four and a half years, a picture of health, and my nine-months-old baby is also well and happy. They are both a real good sample of what Baby's Own Tablets can do, for I have never yet needed a doctor for either of them."

The booklet to which Mrs. Griffith refers is entitled "Care of the Baby," and treats with what a mother ought to know for baby's sake. A copy of the booklet will be sent free to anyone requesting same from The Dr. Williams' Medicine Co., Brockville, Ont.

American Women Gives Church 32-Carat Diamond

York, England.—A 32-carat diamond, the gift of an American woman, now studs a golden chalice of York Minster, the cathedral which has celebrated the thirteen hundredth anniversary of its founding.

The donor is Mrs. Lily Forepaugh, of Brewster, N.Y., a former Yorkshire woman. Mrs. Forepaugh visited England last summer and made arrangements for the presentation of the jewel.

Canon C. C. Bell showed Mrs. Forepaugh the various ornaments of the Minster, especially the chalices, but Mrs. Forepaugh was unable to find any which seemed suitable to enshrine the diamond. She then arranged to have a chalice and paten made at her own expense, the chalice to contain the diamond. Mrs. Forepaugh said the jewel had formed part of a brooch which had been given to her as a wedding present by her husband.

"I trust that you're not a drinking girl like so many of our young set of today."
"No, no! Not me! I'm cuttin' out the old demon for the New Year."

Minard's Liniment for sick animals.

8-Hour Day for Horses Asked by French League

Paris.—An eight-hour day and one day off a week for horses is the starting point of an animals' Magna Charta.

The French League for the Protection of Animals hopes eventually to get the League of Nations to sanction these proposed rights of dumb animals.

Dr. E. G. See, head of the protective society, is actively seeking support for his plan. His proposal is that a number of laws applicable to the labor of man be applied by the government to the four-footed beasts which are protected now only against extreme physical abuse.

The eight-hour law, he says, and the six-day week, are needed as badly by horses as by man. The difference is that the horse has no vote and he doesn't go on strike for better working conditions and more pay. He works for his board and sometimes doesn't get it.

Woodsmen—Keep Minard's handy.

From Rab and His Friends
"Who made you?" was asked of a small girl. She replied, "God made me that length," indicating with her two hands the ordinary size of a newborn infant; "and I grewed the rest myself."

This story was current in Scotland long before Topsy "Spects I grewed."

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, or constipation, or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

HOW SOME MINISTERS EVADE THE TRUE ISSUE!

And so the McConachie case which has been aired so freely in the House during the last two weeks is to be re-opened according to Dr. King, in spite of the assertion made by the Minister of Immigration Dr. Forke, who says "he will not let a feeble-minded girl into this country" although he has signed permits of entrance in almost countless cases, evidences of which were brought down in the House and discussed by Dr. Edwards, who with Mr. Quinn and others are seeking redress for the grave injustice done this family.

It will be remembered that McConachie was a Scot, who came to this country a little over a year ago, and working hard had secured himself a home and sent for his family. The mother appeared before the appointed doctor and received a clear certificate of health and in consequence sold up her little home in the old land and set sail for her new surroundings, but on arrival here the examining official at Halifax declared the infant to be mentally deficient and accordingly refused admission, resulting in the deportation of mother and child. Efforts were at once made to Mr. Forke to even grant a temporary permit, which under regulation 4 of the Immigration Act he was permitted to do, but he remained obdurate in his decision and thereby creates not only a hardship on the family, but lays Canada under a stigma through the failure of the Minister to exercise common sense in the performance of a clear duty.

When Mr. Robert Forke rose in the House on a question privilege to deny Dr. Edwards' assertion that he (Mr. Forke) gave a solemn, written pledge to Lord Byng, that he would support the Meighen Ministry of 1926 until the session was ended and supply voted, and then violated his pledge, he was at least technically right, but the Ottawa Journal in its editorial of March 2nd, issue says:—
What happened, apparently, was this. Lord Byng asked Mr. Meighen whether he would have any objection to his having a talk with Mr. Forke about the parliamentary position. Mr. Meighen said that he had no objection, whereupon Lord Byng sent for Mr. Forke to come and see him. Mr. Forke, it appears, misunderstood the nature of the summons. When Lord Byng asked him whether he thought Parliament would complete the sessional program, Mr. Forke took from his pocket a paper which he said was a resolution of his party declaring that they were prepared to support Mr. Meighen to complete the work of the session. He offered this paper to Lord Byng, but Lord Byng told him that he could not accept it, as it was not his task to arrange for support for any Ministry in the Commons. Mr. Forke then put the paper back into his pocket and departed with it.

It is fairly clear, therefore, that Mr. Forke made no solemn pledge to Lord Byng to support Mr. Meighen. On the other hand, it is equally clear that the Progressive party did pass some sort of resolution pledging its support, and then turned around and violated it.

BROWNSBURG.

Miss Nellie Hanson visited her home here over the week-end.

We are pleased to hear that Miss Eileen McGibbon is back to Burg again, after undergoing an operation in the Royal Victoria Hospital.

Mr. E. Zimmers was home over the week-end.

Mrs. A. E. MacAllister spent a few days last week in Montreal.

Mrs. G. J. Thompson, of Brownsburg, left last Friday, to visit her brother, Mr. Wm. Ayers in Smith's Falls, Ont., and from there to her parent's home in Gananoque, Ont., and will return via Montreal on Sunday, Feb. 11th.

Mrs. Wm. Ayers, of Smith's Falls, Ont., is visiting her mother Mrs. Moncrieff this week.

Miss Grace Moncrieff, of Smith's Falls, Ont., is visiting her mother and friends in Brownsburg this week.

Miss Leona Thompson, of Montreal, visited her parents over the week-end.

Mrs. John Richards, of Montreal, visited her parents and sister, over the week-end.

Mrs. Alex. Chambers, of Beloit, Que., visited her daughter, Mrs. A. E. MacAllister over the week-end.

A Good game of Hockey, probably the last game of this season, will be played here in the Brownsburg rink, on Saturday, Feb. 10th., 1928, between the noted Hawksbury team and Brownsburg. Come and see a real game. Everybody welcome at the regular admission.

CUSHING.

Miss A. Davidson spent Monday in Lachute.

Miss Alberta Cleland of Montreal, is spending this week in Cushing.

Mr. S. Pinkerton, of Montreal, was the guest of his parents over the week-end.

Miss Muriel Nicholls, of Montreal, was the guest of Mrs. T. Weir over the week-end.

Mr. and Mrs. Frank Gaston were guests of Mrs. James Hammond, of Centerville, on Sunday.

Miss Francis Douglass, of Soulanges, spent the week-end with her parents, Mr. and Mrs. John Douglass of Chatham.

Miss Maud Dobbie, of Montreal, and Mr. Gordon Dobbie, of Lachute, were week-end guests of Mrs. Robert Dobbie.

Miss A. Davidson left on Tuesday, by way of Montreal to Kingston, where she will be the guest of (Rev.) Mrs. Brokenshire.

Mrs. L. C. Cooke and daughters Norma and Catherine, left on Saturday for Ottawa and other points in that vicinity, after a short stay there. She will proceed to Michigan to visit her mother, Mrs. O'Brien for a few weeks before going on to her home in Hoosier, Sask.

Rev. Mr. Jobb spent Sunday in Montreal, attending a meeting of the Presbytery.

Here and There

(23)

Forty-five years of faithful service to the Canadian Pacific Railway were honored recently when George A. Fowler, former lumber agent of the company, was presented by George Stephen, freight traffic manager, with a purse of gold, contributed by Mr. Fowler's colleagues in the railway's freight traffic offices east of Chicago in the United States and east of Fort William in Canada.

Fergus.—A special train of 25 cars left for Vancouver and points en route the other day with over 11,000 consignments of washing machines and barn equipment. This trainload, the largest of its kind ever to originate in Canada, is from a Fergus firm and was handled by the Canadian Pacific Railway as a special train, stopping at Fort William, Winnipeg, Saskatoon, Calgary, Edmonton and other centres. Nearly all the consignments were for rural communities.

Immigrants are beginning to pour through the port of Saint John and Montreal en route to Ontario and the West. With the arrival of Canadian Pacific liners Montclair and Montclaira recently, in the neighborhood of 600 settlers of the best type have been distributed. Among these were British farm laborers going to selected farms under the scheme of the Canada Colonization Association, and many more will be coming in during the next few months.

TO WHOM IT MAY CONCERN

Saint-Jerome, Feb. 27th, 1928.
Last Friday night at 8 o'clock, when working in my office, I was notified of the escape of our jail, of the prisoners Omer Cantin, Joseph and Arthur Davidson. This being the first occasion of its kind to happen here, I was greatly worried.

Immediately I communicated with Chief D. D. Lorrain and the Mounted Police Authorities of Montreal, with Officers of St. Vincent de Paul Penitentiary, also with all the Chief of Police of our neighbouring towns, with High Constable Ouellette and Bailiffs of our District and many good friends, to ask them help to contribute without delay in arresting those prisoners. Everyone quickly answered my call, also the Montreal Police Force and most specially Mr. Savoie constable and Captain Desy, of the Firemen's Department of Bordeaux, to whom comes the merit of having effected the arrest of the prisoners aforesaid.

I thank very truly everyone who near or far has devoted himself to help me in bringing back to their cell these dangerous bandits, so that they will face their trial this week at the Criminal Court.

I believe it a duty for me to make these facts public.

I owe also many thanks to News-Papers and to my good friends for their generous help in bringing a solution to this case which was a work to all the country.

To all, I offer my deep gratitude for such kindness in supporting me so quickly in this sad emotion.

Yours very truly,
J. W. CYR, Sheriff.

65,000,000 Bushels of Grain Move West

1. A Canadian Pacific freight boat being loaded with grain. 2. Sound for far countries carried some of Canada's golden crop. 3. Part of a grain train passing through the monumental regions of the west. 4. A huge double-headed hauling grain near Hector, Alta.

Over 65,000,000 bushels of grain will be carried into the port of Vancouver for the twelve months ending March 31 next according to estimated figures issued from the offices of E. D. Cotterell, Winnipeg, Man., superintendent of transportation for the western lines of the Canadian Pacific Railway.

These figures will establish a record. In fact they show enormous strides since 1922—the first year that the Canadian Pacific Railway handled any quantity of grain to the western coast.

Up to and including January 21 of the present year, a total of 32,839,373 bushels have been shipped by boat from the port of Vancouver. Of this amount 23,756,930 bushels have been routed to

the United Kingdom; 3,732,046 bushels to the Orient and 344,557 bushels to other countries.

It is interesting to note that up to January 21, the Canadian Pacific railway loaded on western lines this season 125,431 cars of grain of all kinds. If placed end to end this vast collection of cars would stretch approximately 1,170 miles and a train travelling at the fast rate of 60 miles an hour, would take nearly twenty hours to pass them.

Very few people know that the very extensive and expensive facilities provided by the Canadian Pacific railway to handle the annual grain crop on western lines remain idle, comparatively speaking, for about two thirds of the year, and the money invested in these facilities

and extra rolling stock earn no returns during the period mentioned. The building of the Transcona yards at Winnipeg, with over 100 miles of track and a capacity of 12,000 cars, one of the most up to date yards on the continent, was necessary to handle the Canadian Pacific's grain traffic, and is therefore used for handling revenue traffic only about two thirds of the year.

During the time the cars and locomotives are lying idle they are kept thoroughly by the mechanical department and put into first class shape, so that when the rush commences they are ready for immediate use. This year seventy of the company's latest engines were transferred west for the grain haulage.

The LAND OF FORGOTTEN MEN

by Edison Marshall

BEGIN HERE TODAY

Peter Newhall, Augusta, Ga., flees to Alaska, after being told by Ivan Ishmin, Russian violinist, he had drowned Paul Sarichef, Ishmin's secretary, following a quarrel. Ishmin and Peter's wife, Dorothy, had urged him to flee. He joins Big Chris Larson in response to a distress signal at sea, forcing his sea jacket upon him. Their launch hits rocks. Larson's body is buried in Newhall's. Peter, rescued, finds injuries have completely changed his appearance.

Ishmin and Dorothy go to Alaska to return Peter's body to Georgia. They do not recognize Peter, who is chosen head guide. A storm carries their ship to sea, stranding them at the grave. Ishmin urges Dorothy to marry him but she could first ask the spirits of her husband, whom she believes dead. They hold a séance with one of the guides as medium. She receives the message: "Change name," and believes it means to marry Ishmin.

NOW GO ON WITH THE STORY

CHAPTER XII—(Cont'd.)

"You want me—call Paul Sarichef!"

"Yes."

"Why, Dorothy?" Ivan whispered tensely. "He would have no message for you."

"I want him to try, just the same," the girl replied. "Can you call him, Joe?"

The native was already calling; and all of them knew that psychic energy expended in that summons was beyond their wit to grasp. Fortune Joe seemed immersed in a terrific struggle that would seemingly rend the spirit from the body. "He come," the witch-doctor muttered at last. "He no want to—be here soon—"

The muttered words grew unintelligible, then ceased. The circle waited for Paul Sarichef—Newhall's victim of months before—to speak to them from beyond the grave.

"Hear! be anything to say to us?" Dorothy asked, after a long period of waiting. Word of Sarichef's forgiveness was an urgent need with her.

But as they waited, Joe himself emerged into their familiar world. He was white and drawn; and he seemed more like a man drowsy with slumber than one who had pierced the greatest of all mysteries. The chain was broken, and he got up.

"No no try any more to-night," he said simply. "Maybe some other time."

The girl gave him a smile of heart-felt gratitude. "Thank you for what you've given me," she told him earnestly. "You've answered my greatest question—I really don't need to know any more."

Ivan, at the door of the tent, read the truth in her radiant face. He reached her hands, then drew her slowly toward him. "Do you know now?" he asked, holding her and peering down into her luminous eyes. "I know now," she told him tremulously. "Ivan—you can have my promise, now I know that it's Peter's wish as well as my own. He wouldn't advise me wrong."

"Then I've won you at last!"

"Yes. When we come home again." He could not urge her, to-night, for anything more. His plan of immediate marriage, the Russian priest officiating, could be discussed at another hour. He kissed gently, triumphantly, her soft, yielding lips.

From the door of his hut Peter saw their forms in the dusk, the girl's

white blouse and the man's encircling arms. He guessed the truth; that this was the first kiss of their definite betrothal. Despair swept over him like a great wave of the sea he had once battled, but the madness, the haunting and torturing jealousy was spared him now. He had conquered that; and he must never let it sweep him into hell again.

CHAPTER XIII.
FALSE STANDARDS.

At the appointed time Ivan packed his supplies for his journey across the narrow, rugged Peninsula in quest of help. He took three days' rations, tied them up in Peter's light caribou robe, that was by itself sufficient protection from even severe cold, and strapped the pack on his lean, well-muscled back.

"Pete, I'm leaving you to take care of Mrs. Newhall," he said simply. "I know you'll do it—as you've done before. She'll be wholly in your charge till I get back, and don't let any harm befall her."

"Don't worry about that," Pete assured him.

Ivan shook his lean shoulders carelessly, to settle the pack. "I won't be back for three days," he went on casually, with no emphasis whatever in his musical voice, "unless I choose to come back before—so I can't look after her personally. But I might say that if any harm did befall her, I would chase the man down, no matter what corner of the earth he fled to, keeping after him and after him till I got him. When I did get him—"

He paused, and Pete looked him squarely in the eyes. There was no doubt whatever that this man meant what he said, and no doubt of his reason for saying it. "That isn't necessary, sir," Pete told him stiffly.

"Well, I didn't think it was, but I wanted you to understand, in case you were tempted. I am a man myself, and I know what temptation is."

Pete's eyes blazed. "Temptation of that kind doesn't come to men of our race, unless they are perverts," he said easily. He was somewhat pale, but he lit his pipe with a steady match as he spoke. "I don't know about the inferior races."

Ivan smiled inscrutably. "At some other place and time—perhaps just before we sail—I'll give you a chance to show whether the Anglo-Saxon is superior to the Mongol. It would be really diverting, for a moment. At present, both of us have work to do—you to take care of the camp and I to go after supplies." His voice changed and softened, but it had never been perceptibly hard. "Keep up the

hunt for caribou," he directed. "The boys haven't done so well lately. Take care of the meat and cure it as fast as possible." Then he turned to say good-bye to Dorothy.

She walked a short distance up the hill with Ivan; and her trust in herself and her love for him swept back to her to the full when he gave her a good-bye kiss.

"Take care of yourself, Ivan," she told him with a plaintive sweetness that carried him off his feet. "You are all I have now. I have lost so much, and I couldn't bear to lose you."

They clung together, and then she watched him as he strode away up the hill. Sighing, she turned back to the camp.

Pete had her breakfast ready when she reached the camp, and his homely face glowed when he brought it to her. He had taken special pains to-day—venison liver fried with bacon, coffee such as her colored mammy herself could make, brown flapjacks not too thick, served with maple syrup. His broad shoulders towered above her; and he was boyishly elated when he saw she was pleased.

The day wore on, and his care of her, his watchfulness, was a wonder. Although his work carried him far afield,

he had cut fuel always ready for her hand in case the fire burned low; he personally superintended her meals, and he saw—with fine generalship—that at no time she was left alone with Pavlof and Fortune Joe.

When the day faded, and the dusk crept in from the sea, she appreciated his care more and more.

He took special pains with her dinner. He made reflector biscuits, thin and light, to be served with marmalade; he pot-roasted a fine canvas back duck that Pavlof had decapitated with the pistol; he fried potatoes crisp and brown. He watched her devour every mouthful of her portion, then after he had remade the bed and built up the fire in the camp stove, he turned to the task of washing dishes. Pavlof and Joe, meanwhile, were cutting into strips for curing the caribou meat they had procured in the day's hunting.

"I wouldn't mind washing the dishes to-night," Dorothy told him in a friendly tone. "Maybe you'd like to help the men take care of the meat—"

"Couldn't think of it," Pete returned. "If you'll excuse me saying so—I suspect you're not very experienced at it. But if you should care to help me dry 'em—"

They made quite a little party out of washing and drying the metal plates and the crude, iron knives and forks. And soon it was deep dark, and night winds were blowing from the sea. This work done, the girl started to turn away.

But she halted; and he saw her girlish profile in the soft light of the camp fire. "Would you like to come and sit at the door of my tent a little while?" she asked. Her voice was somewhat tremulous; but she did not try to ask herself why.

Pete glanced about him. "Camp work is pretty well done, for to-night. I will smoke my pipe once at your tent door, if you don't mind. Human companionship is very reassuring, very necessary in this North."

She went in and sat comfortably on her bed, while he sat at the tent mouth. They talked easily, surprisingly freely while the lesser stars were emerging, and his pipe paled and glowed and paled again in the gloom. She felt wholly secure and at peace.

"Sometimes there is a throwback in your speech, an accent or a choice of word that interests me immensely," Pete, she told him. "I don't want to be curious—but curiosity is a very human trait, after all. Sometimes I'm caused to think that you must have known something very different from this—before you came here."

"I did," he answered quietly. "It's nothing unusual, up here. This end of Alaska is a sort of melting pot. I don't see why the police don't look here first for a man who wants to get away from himself up here before he knows it—or in South America."

"And you are exiled from home?" she asked him bluntly. Yet there was no hint of vulgar curiosity in her tone. He turned to her with a grateful smile.

"Forever. But I can blame no one but myself. I guess I simply couldn't starve civilized existence. If you'd ask the trouble, I'd say—false standards." This had been the cause of Peter's downfall, too: false standards of which both Peter and herself had been guilty. "I'd know better again," she heard him say. "I'd never sacrifice my birthright again—waste all I have. But that's always the song we exiles sing."

(To be continued.)

Minard's Liniment relieves pain.

He: They say Tom descended from kings.
She: Yes—and how!

A MODISH FROCK.

Particularly graceful is this attractive frock, having a flared side section at each side of the skirt. The front of the bodice opens in a deep V over a vestee, and the long dart-fitted sleeves have wide cuffs placed a short distance above the lower edge. No. 1439 is for Misses and Ladies, and is in sizes 16, 18 years, 36, 38, 40, 42 and 44 inches bust. Size 38 requires 4½ yards 39-inch, or 3½ yards 54-inch material without nap. Width at lower edge about 76 inches. Price 20c the pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Counting Noses

Wild Life Census To Be Made In Big Canadian Game Preserve

A census of the musk-oxen and other wild life in the Canadian Government sanctuary of 15,000 square miles east of Great Slave Lake will be taken early in 1923 by W. H. B. Hoare of the Northwest Territory and Yukon Branch of the Canadian Department of the Interior. He is an experienced explorer with an intimate knowledge of the animal life of the region. The work is expected to take about a year.

The information obtained is to be used by his department to estimate what further expenditures are necessary to conserve and develop the resources of the area. The census has been ordered to determine the inroads made by wolves and other predatory animals.

Mr. Hoare will also report on the measures necessary to protect the musk-oxen and caribou and on the problem of patrolling the area properly. The area is believed to be seldom visited and contains no permanent residents, either native or white.

To make the journey he must go to the end of the railroad at Waterways and from there travel 300 miles by dog team to the proposed location of his base camp, which is at Fort Reliance, about thirty-five miles south-west of the sanctuary.

To equip his expedition six Eskimo sled dogs were brought from Pond Inlet, Baffin Island, by the 1922 Canadian Arctic Expedition. The dogs from the Eastern Arctic are highly rated by travelers in the far North, both because of their strength and endurance.

Minard's Liniment for asthma.

Isobel: "No, daddy, I won't need any clothes this summer." Father: "I was afraid it would come to that!"

Infatuated Youth—Thinking of me, darling? Weary Girl—Oh, was I laughing? I'm so sorry.

The modern woman is considered too delicate to shoulder a gun, but nobody questions her ability to bare arms.

Judge the quality of Green Tea by the colour of the brew when poured into your cup before cream is added. The paler the colour the finer the Green Tea. Compare any other Green Tea with "SALADA"—None can equal it in flavour, point, or clearness. Only 38c per ½-lb.

"SALADA" GREEN TEA

Improving Home Conditions

Parents Are Reasoned With and Instructed in Better Methods by Children's Aid Officer

Where children are neglected, it is not our custom, says J. J. Kelso, Superintendent of the Children's Department, to order prosecution. That is only resorted to when milder methods fail. Occasionally however, neglectful parents are brought before the Court and warning given of the danger of losing their children. In one case, with a family of six children, ranging in age from eleven down to one year, the conditions in the house were deplorable. The children were found to be in an extreme state of dirt, and all looked miserable and ill nourished. Their clothing was described as being nothing but rags. The house itself was in a filthy condition, infested with vermin the natural result of unclean living. This state of matters was not due to poverty, as the parents were quite able to do better. It was simply laziness and indifference. It is pleasing to report that bringing them before the magistrate proved a salutary lesson, and conditions are now decidedly better.

SPOT CASH

Friend: You are always pleased when you can bring down the Isogarda, eh?
Big Game Hunter: Oh, yes; I can always sell their skins for spot cash.

Hostess: Willy, won't you have some more Christmas pudding?
Willy: No, thanks; mother says I don't want any more.

It was the young advocate's first case in Court, and he was very nervous. "My lord," he began, "I appear in this matter to—er—to—er—" "Yes, yes," interrupted the Judge, "but it's not your business to err, Mr. Smith. That is my privilege."

Lanterns on Floor Serious Menace

Should Be Hung On Hook Out of Way—Electric Light Safest

A nervous brindle cow, being milked for the first time, kicked over the lantern set on a box behind her, and a great city was wiped out. That was in Chicago, back in the last century, but the same thing has been going on in a minor way ever since. Each year, several good barns in Ontario go up in smoke, as a result of a lantern being knocked over, and while a city is not wiped out, the loss to the individual, especially when mows and stalls are full of valuable stock and equipment, is disastrously high. And the tragedy of the thing is that it is all due to carelessness.

Firm hooks, fixed in the ceiling of the stable at convenient intervals will cost but a few cents, and yet when the lantern is swung from these, not only is the light better distributed, but a nervous heifer, a spirited horse, or a hurrying man cannot knock it over and set fire to the place. The Ontario Fire Marshal suggests that it would be good business if the country insurance companies would buy several thousand of these hooks and present half a dozen to each policy holder. Even if one fire was prevented as a result, the saving effected would pay for the hooks for all time to come.

Where possible, Ontario fire fighting officials urge the installation of electric lights, which they maintain make the safest illuminator. Where the wiring is done by a competent electrician, and the work inspected by a government official, fire risk is reduced to the minimum. Where it is impossible to put in electric light, and unfortunately, this is often the case in the country, good safety lanterns should be procured and the hooks provided.

Importance of Our Water-Power

Canada's water-power resources form one of her most striking and important natural assets. Their nature, extent, and location combine to give them a special value in relation to the chief centres of industry and population. Water-power is available in every province, and it is not too much to say that, apart from the human factor, water-power is the most vital force behind Canadian industrial development.

Give a small boy a watch and he will have the time of his life.

Royal Bank Annual Meeting

The annual General Meeting of shareholders of The Royal Bank of Canada marked the close of the most successful year in the history of the Bank.

Sir Herbert Holt, President, in his address, dealt more particularly with general conditions throughout the country, but touched on many developments of great importance, more especially from the standpoint of trade and industry.

C. E. Neill, General Manager, reviewed the growth of the Bank to the foremost position it now occupies and gave to the shareholders an interesting insight into the part the bank is playing in all centres in which it is now doing business.

Outlook Favorable.

Sir Herbert referred to the year's developments in industry, trade and finance as generally satisfactory. The foundation for the development which has taken place is sound. Sir Herbert declared that as yet there are no indications of industrial and commercial inflation. Production is not expanding to a point unwarranted by growth and demand and it is a noteworthy fact that the whole expansion has taken place during a period characterized by moderately declining prices. On the whole the financial situation in agriculture, industry and commerce is more settled than at the beginning of the period. Summing up the business situation, Sir Herbert stated that the "outlook

was never more favorable for prolonged prosperity in Canada."

Necessity For Curbing Unwise Speculation.

In commenting on the annual statement, Mr. Neill referred at length to the importance of call loans, which represent loans against stock exchange collateral, not only of the Royal Bank, but of all banks. He pointed out that this was indicative of three things:

"1. Increase in the number of securities available to investors.
"2. Increase in the market value of securities.
"3. Increase in speculation.

"In a growing country the development of its resources produces new securities. Prosperous times result in the enhancement in value of securities and for these reasons it is clear that the two first mentioned causes for the increase in Call Loans are at least to some extent justified. As to the third, it is obvious that speculation has reached a dangerous stage. The best-informed financial and brokerage firms are already operating on an unusually conservative basis by calling for increased margins, by declining to open new accounts and by restricting the liability of their customers to reasonable amounts. In times of excessive speculation, the lure of easy profits cannot be denied, but speculation can be checked and held within reasonable bounds by the financial interests, particularly the banks, and bond and brokerage houses."

CRUELTY TO ANIMALS IN TRANSIT TO ABATTOIRS

Government Should Take Drastic Action to Reduce Unnecessary Torture by Rigid Enforcement of Laws To Every Letter

CONDITIONS BAD

While the cruelty of the average Toronto slaughterhouse is "a blot on the face of civilization," according to J. Macnab Wilson, general manager for the Ontario Society for the Prevention of Cruelty to Animals, it is as kindness when compared with some of the other evils he is striving to eradicate from the meat industry. The fright and physical pain of the abattoir are at worst quickly over; the unintentional torture that sometimes precedes them may last for hours, or even days.

For years the society has been waging a constant battle to ease the lot of the unfortunate food animals that pass through the stock yards and abattoirs; and in some respects it has been winning steadily. The treatment of crippled animals at the stock yards is now prescribed by humane considerations. General provision for the care and feeding of animals is carefully made and supervised. But the worst abuse of all, carelessness or ignorance in loading, still heaps its needless misery on a given quota every month.

Crowded Cars.

Sleek from the feeding stalls, a shipment of cattle are bought by a drover a day's journey away from the city. For the first time in their lives they find themselves on the open road, and their natural nervousness is heightened by the hustling they get from half a dozen men armed with heavy sticks on the way to the railway. Once there, the hustling is intensified as they are loaded into railway cars. There may not be enough to fill the cars completely, and they stand, loosely packed together with space to move about in the car. It is this space that causes the mischief.

Let an engine come along and "kick" one of these cars off the siding, and the cattle will surge to one end, scrambling to keep their feet. If one of them goes down it is trampled by the others.

Tells of Injuries.

"Have you ever ridden in a cattle car?" asked Mr. Wilson in discussing the subject—"well, I have; and I have seen a cow turn a complete somersault when the car was shunted." Broken legs, broken horns, bruises and dislocated joints are the result; and frequently the animals thus injured lie without attention until they reach the stock yards.

In cases of mixed loading, matters become worse. The law requires that calves, sheep or swine, if loaded in the same car, must be separated by partitions from each other. The law's requirement in this respect is practically always fulfilled; but frequently the partition is too flimsy and collapses under the weight of the animals.

During the present winter, carloads of animals have reached the stock yards in which sheep had been trampled underfoot by cattle and died a lingering death, hogs been crippled in the same manner, and calves horribly mutilated. It is not an uncommon occurrence for hogs, in such an accident to attack the disabled animals with them and commence to eat them alive.

Carload of Cripples.

"Once within the past six months," Mr. Wilson states, "I saw a big hog munched at the shoulder-blade of a crippled calf that was bellowing for mercy." In another carload that reached the stock yards recently there were only seven animals able to walk; the rest were either dead or crippled and helpless.

Wherever such cases seem attributable to negligence on the part of the shipper prosecution follows; but the Humane Society authorities are seeking a better remedy. A type of partition that is easily installed and absolutely secure has been devised; and an effort is on foot to have its use enforced by the Dominion Railway Board. If such a regulation can be secured it is felt that it will eliminate one of the worst features of the livestock industry; and with it an enormous waste as well as much needless suffering.

For the protection of the animals from unnecessary hardship, a police constable is constantly on duty at the stock yards, and with the co-operation of the packing-houses his efforts have accomplished definite improvement in several respects. One of the difficulties that has been met is the disposal of unweaned calves. Formerly it was not infrequent for these little creatures to go hungry sometimes for days before they were slaughtered. Now, however, veal calves are disposed of on the day of their arrival, are turned over to nurse cows at night; while immature calves left unsold are killed at once. A recent amendment to the criminal code prohibiting the shipment of calves under three weeks except when the mother accompanies them has done much to better conditions in this last respect.

Formerly, also, crippled animals were sometimes reshipped from the yards in the same car with others of their kind. This practice has been completely stopped; and the slaughtering of cripples is done as soon after their arrival as possible. Crippled cattle are killed before being removed from the cars; special "cripple wag-

ons" are used for removal of injured sheep or swine.

Conditions at Toronto's stock yards are probably above the average for Canada; but even so, Mr. Wilson declares that there is much loss and much suffering that could be eliminated.

"Every blow a bruise and every bruise a loss" is a slogan he wants posted up at every shipping point in Canada. The number of carcasses that have to be graded as third-rate meat for no reason except the bruises that sticks, stones, whips and other ill-treatment have inflicted is, he declares, appalling.

"The government," he states, "spends thousands of dollars annually in improving live-stock; eliminating the scrub bull, importing new breeds, training boys and girls in the art of judging cattle and otherwise encouraging production of the best possible type of carcass for our meat-packers. It is time that it also took active measures to check the continual loss from degradation of what would otherwise be prime carcasses, through the ignorant or brutal mishandling of the animals on their way to the abattoir."

No More Small Five-Cent Pieces

Not Being Withdrawn From Circulation, However, Says Robb

Ottawa.—The Finance Department is not having any more of the small five-cent pieces made, but it was stated at Hon. J. A. Robb's office that they are not being withdrawn from circulation or called in as yet. The idea is ultimately to have only the nickel, but it is difficult to call in so much money commonly circulated.

Last summer the Confederation Jubilee Committee had a contest for designs for the new nickel and prizes were awarded. They are not altogether satisfactory, however, and the mint authorities are now looking them over. For some time only nickels have been coined, and gradually the small pieces will disappear. There is considerable complaint about the duplicate currency.

New York Cancer Project Given Up

President States Public Response to Appeal is Unsatisfactory

New York.—The project to establish a national cancer centre here at a cost of \$5,000,000, has been abandoned. Sanders A. Wertheim, president of the New York Cancer Association, Inc., which sponsored the movement, admitted that the appeal for the necessary funds for the enterprise had failed, explaining that the financial response to date had been so comparatively slight that it did not warrant the directors in continuing the campaign. The project, therefore, has been given up and all moneys contributed by the public will shortly be returned to the individual givers.

Miss Lloyd George Smokes Cigarette

Impersonating Queen Victoria She Takes a Few Puffs

London.—Those Ontario women (if any) who applaud the decision of Chicago's women's societies to cancel addresses by Miss Maude Royden because she smokes cigarettes will doubtless be pained to hear that Miss Megan Lloyd George has gone Miss Royden one better.

The daughter of Britain's wartime Prime Minister recently attended a fancy dress ball as Queen Victoria, but perpetrated a glaring anachronism by indulging in a casual cigarette. When it was called to her attention that the home life of Queen Victoria did not include the use of tobacco, Miss Lloyd George promptly turned the laugh against her informant by dashing the cigarette on the floor and repeating the famous cry of Victoria as a girl:

"I will be good! I will be good!"

Liver Loaf.

1 pound liver, ½ pound sausage meat, 1 cup bread crumbs, 1 egg, ½ cup milk, poultry seasoning, salt and pepper. Parboil the liver and chop fine. Mix with the sausage, bread crumbs and season to taste. Stir the egg and milk together and add to the mixture. Form into a loaf and bake for forty-five minutes. This tastes something like a chicken loaf and is an excellent luncheon dish.

Enough's Enough.

No matter how much money a man has, he can only eat three meals a day, wear one suit of clothes at a time and sleep in one bed.—The American Magazine.

Eat Liver for Rosy Cheeks

These Savory Liver Recipes Are Recommended for Their High Food Value

Doctors have for a long time recognized the value of liver in the diet for treating a run-down condition, and in the last two years there has been particular emphasis placed on the use of liver in the treatment of some of the worst types of anaemia. Although it is yet too soon to make any sweeping generalization about the curative value of liver for anaemic patients, many physicians have reported successful results after prescribing a liver diet. Since "going on a liver diet" may mean chewing a half pound of liver every day—and a half pound of liver looks bigger than any other kind of half pound we know of—it is important to know the easiest and pleasantest way of taking this food.

It is generally believed that uncooked rather than cooked liver provides the greatest benefit for an anaemic condition. Some doctors prescribe scraped liver and liver juice for children and suggest mixing it with orange juice to mitigate the liverishness of the flavor.

Another way in which some hospital dietitians prepare it to broil or grill the liver on a rack and serve very rare. If a casserole of vegetables is placed under the broiler, all the valuable liver juices will be conserved in a very palatable form.

From one half to one cup of raw diced liver and juice could be added to three cups of soup, making a very palatable and savory dish. We added the liver just before serving the soup, so that the meat was practically uncooked. We considered tomato soup and onion soup the best disguises for liver. Canned soups may be used and the highly flavored products such as oxtail and mulligatawny are, of course, very effective in concealing the liver flavor.

A good creamed filling for patties or toast or for vegetable stuffings may be made by heating a can of tomato soup, undiluted except with a little milk. Add one cup of minced raw liver and juice just before serving.

A liver cocktail really isn't as bad as it sounds. Use the uncooked liver again. Wash, but do not let it soak in the water, heat quickly in shallow pan for just a minute, squeeze out the juice in a potato ricer, or scrape the liver with a teaspoon. Flavor the juice or pulp with tomato catsup, salt, pepper and a few drops of lemon or onion juice. Grape juice may also be used to conceal the taste of liver to a certain degree.

These suggestions which we have just offered are for the benefit of patients who are taking liver under a doctor's orders. It is not advisable to eat large quantities of this very concentrated protein food unless it has been prescribed by your physician.

The demand for liver has been so great since its high food value has been realized that the price has soared steadily skyward in some markets.

All kinds of liver—calf, beef, pig, chicken and goose livers—are good. While calf liver is more delicate and delicious than that of beef, the latter is the one to use when blood building interests you more than the pleasure of the palate. Liver from chickens and fowls is excellent, but it takes a great many to make a pound. Never, never do as one woman recently did. She bought calf liver for her little girl and gave the chicken livers to the cat!

How to Buy Liver.

Due to the expense of liver at this time it is important to be able to recognize the different kinds which are offered. Calf liver is more delicate, lighter in color and, in most markets, far more expensive than beef or pig liver. In homes of comfortable means it is the calf's liver which is usually served. Beef liver, if one takes care

to buy only that which is perfectly fresh, light in color and cut from the nipple end, can be made into very palatable dishes. Often when it is highly seasoned it cannot be distinguished from calf liver.

Liver is a valuable food for well people as well as for anaemic patients, and for the benefit of those who can eat it in cooked dishes we are offering the following recipes:

Liver Cocktail

½ pound liver. Sauce—½ cup tomato catsup, ¼ cup lemon juice, 2 teaspoons Worcestershire sauce, ½ teaspoon chives (chopped fine), salt and pepper to taste. Cut off the skin, veins and tough parts of the liver; rinse with cold water and put in through a fine meat grinder. Place on ice immediately. Add this to the sauce, using one part liver to two and one-half parts sauce. Chill thoroughly. Serve in cocktail glasses with saltine crackers.

Escalloped Liver.

1 calf or beef liver, ½ cup bread crumbs, 4 slices fat bacon, ½ teaspoon salt, 2 tablespoons chopped onion, a few gratings nutmeg, a few grains red pepper, 1 cup water. Wash and chop the liver. Add bread crumbs and bacon and chop into small pieces. To this add onion, nutmeg, red pepper and water. Mix well and put in greased baking dish. Cover with grated bread crumbs and dots of butter. Bake in moderate oven (350 F.) for forty-five minutes.

Liver Baked in Milk.

1 calf or beef liver, 1 pint milk, salt, pepper. Cut liver in serving pieces, sprinkle them with salt and pepper and arrange in baking dish which has been well greased with bacon drippings. Cover with scalded milk. Bake in a moderate oven (300 F.) for about forty minutes, or until liver is tender.

Rice and Liver Casserole

Line a casserole with mollied and buttered rice. Fill the center with chopped, boiled liver and gravy. Sprinkle grated bread crumbs over this, dot with butter and place in a moderate oven long enough to brown on top.

Liver Sandwiches.

Broil and mash the liver. Season with salt and pepper (onion juice if

desired), moisten with cream. Add chopped bacon and spread the mixture between slices of bread.

Liver Terrapin

1 cup baked liver, chopped, 2 tablespoons butter, 1 tablespoon flour, 1 cup evaporated milk (or thin cream), ¼ teaspoon salt, a few grains cayenne pepper, ¼ teaspoon cloves, ¼ teaspoon nutmeg, ¼ teaspoonful mace, 2 tablespoons cooking sherry, 1 hard-boiled egg. Heat the milk in top of double boiler. Rub flour into the butter. Pour warm milk over this, blend and return it to saucepan. Heat in this the chopped liver. Add seasoning. Chop finely the egg white and mash the yolk in two tablespoons of milk or water. When the liver is hot stir in the egg and wine.

Liver Stuffing.

3 cups bread broken in small pieces, ½ pound liver, 1 medium-sized onion, 2 stalks celery, salt, pepper, poultry seasoning. Add the chopped onion and celery to the bread. Season to taste with salt, pepper and poultry seasoning; moisten the bread with water to make of the right consistency. Then add the liver, which has been prepared by pouring boiling water over it, draining and cutting it in small pieces, discarding skin and tough fiber. Mix the liver with the bread and seasonings and fill the bird. The amount of liver used may be increased to three-fourths of a pound if desired.

Liver Soup.

4 tablespoons butter, 1 small onion, 2 tablespoons flour, 3 cups milk, ¼ pound liver. Melt the butter, add the chopped onion and cook five minutes, taking care not to let them brown. Stir in the flour and add the milk gradually. Cook, stirring constantly, until the mixture boils. Pour boiling water over the liver, drain and cut it into small pieces. Add it to the first mixture, season highly with salt and pepper; cook two minutes and serve.

Yorkshire Pudding With Liver

1 cup flour, 1 teaspoon salt, 1 cup milk, 2 eggs, ½ pound liver. Put the flour, salt, milk and eggs in a bowl and beat with an egg beater about two minutes until light. Add the liver after pouring boiling water over it,

draining and cutting into small pieces. As soon as the liver, which should be prepared first, is added to the batter pour it into a shallow pan well greased with oil and bake for thirty minutes in a hot oven. Serve cut in squares.

Liver in Ravioli.

3 egg yolks, 2 tablespoons water, ¼ teaspoon salt, ¼ cup flour (about), 2 cups sauce. Beat egg yolks slightly with water and salt. Stir in flour to make a stiff dough. Knead five minutes. Roll very thin and cut in rounds about four inches in diameter. On each half of the rounds put one teaspoon of filling, wet the edges of paste, put second round over, press edges together firmly. Have saucepan full of boiling salted water (two teaspoons of salt to one quart of water). Drop in the rounds, bring water to boiling point again, then simmer twenty minutes. Drain and place in a greased baking dish, pour tomato sauce over them and bake in a quick oven for fifteen minutes.

For the filling use one-fourth pound of liver, one onion, one tablespoon of butter, tomato sauce and seasonings, pour boiling water over the liver, drain and chop. Melt the butter, add the chopped onion and cook gently for a few minutes. Then add the liver and enough thick tomato sauce to moisten. Season highly with salt and pepper.

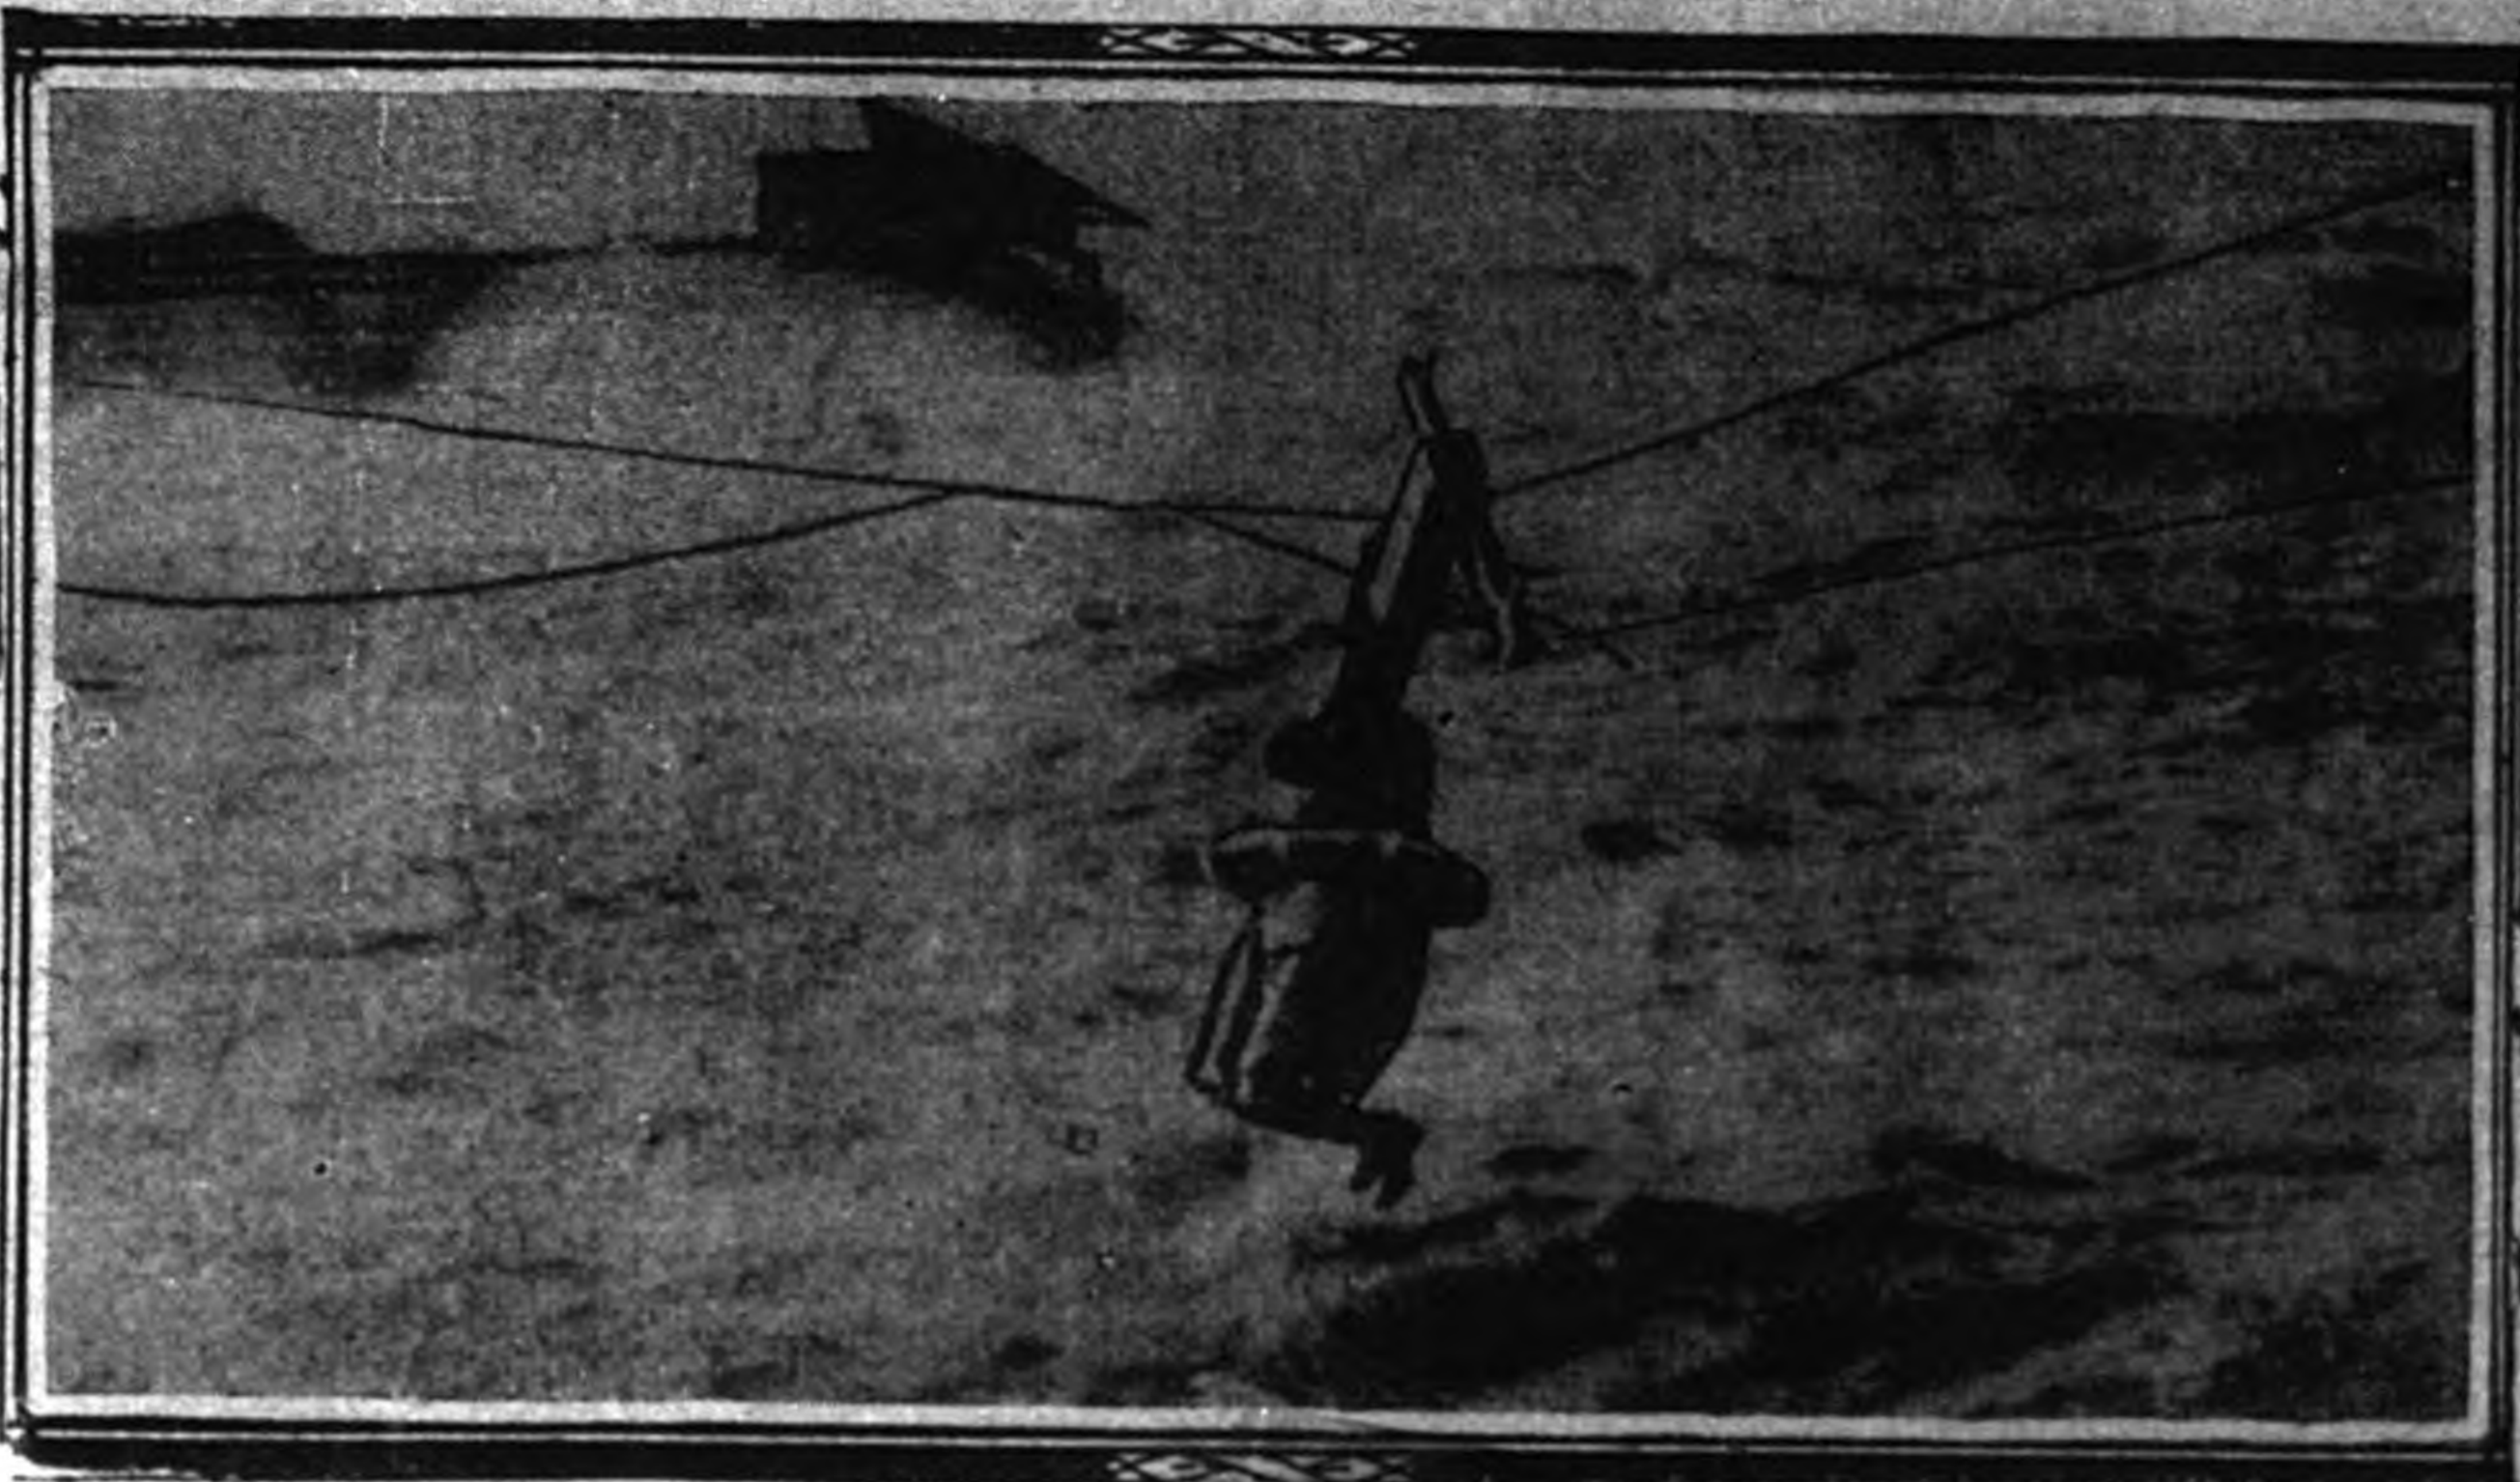

Liver Hash.

1 pound liver, ¼ pound bacon, 2 cups chopped boiled potatoes, 2 minced green peppers, salt and pepper. Parboil the liver so that it will be firm enough to chop. Fry the bacon and chop with the meat. Allow the minced green peppers to cook in the bacon fat for five minutes, then add to the liver potatoes and bacon. Season with salt and pepper. Minced onion may be added if desired. This hash may be fried in the bacon fat or baked in the oven until brown.

Susy Signal.

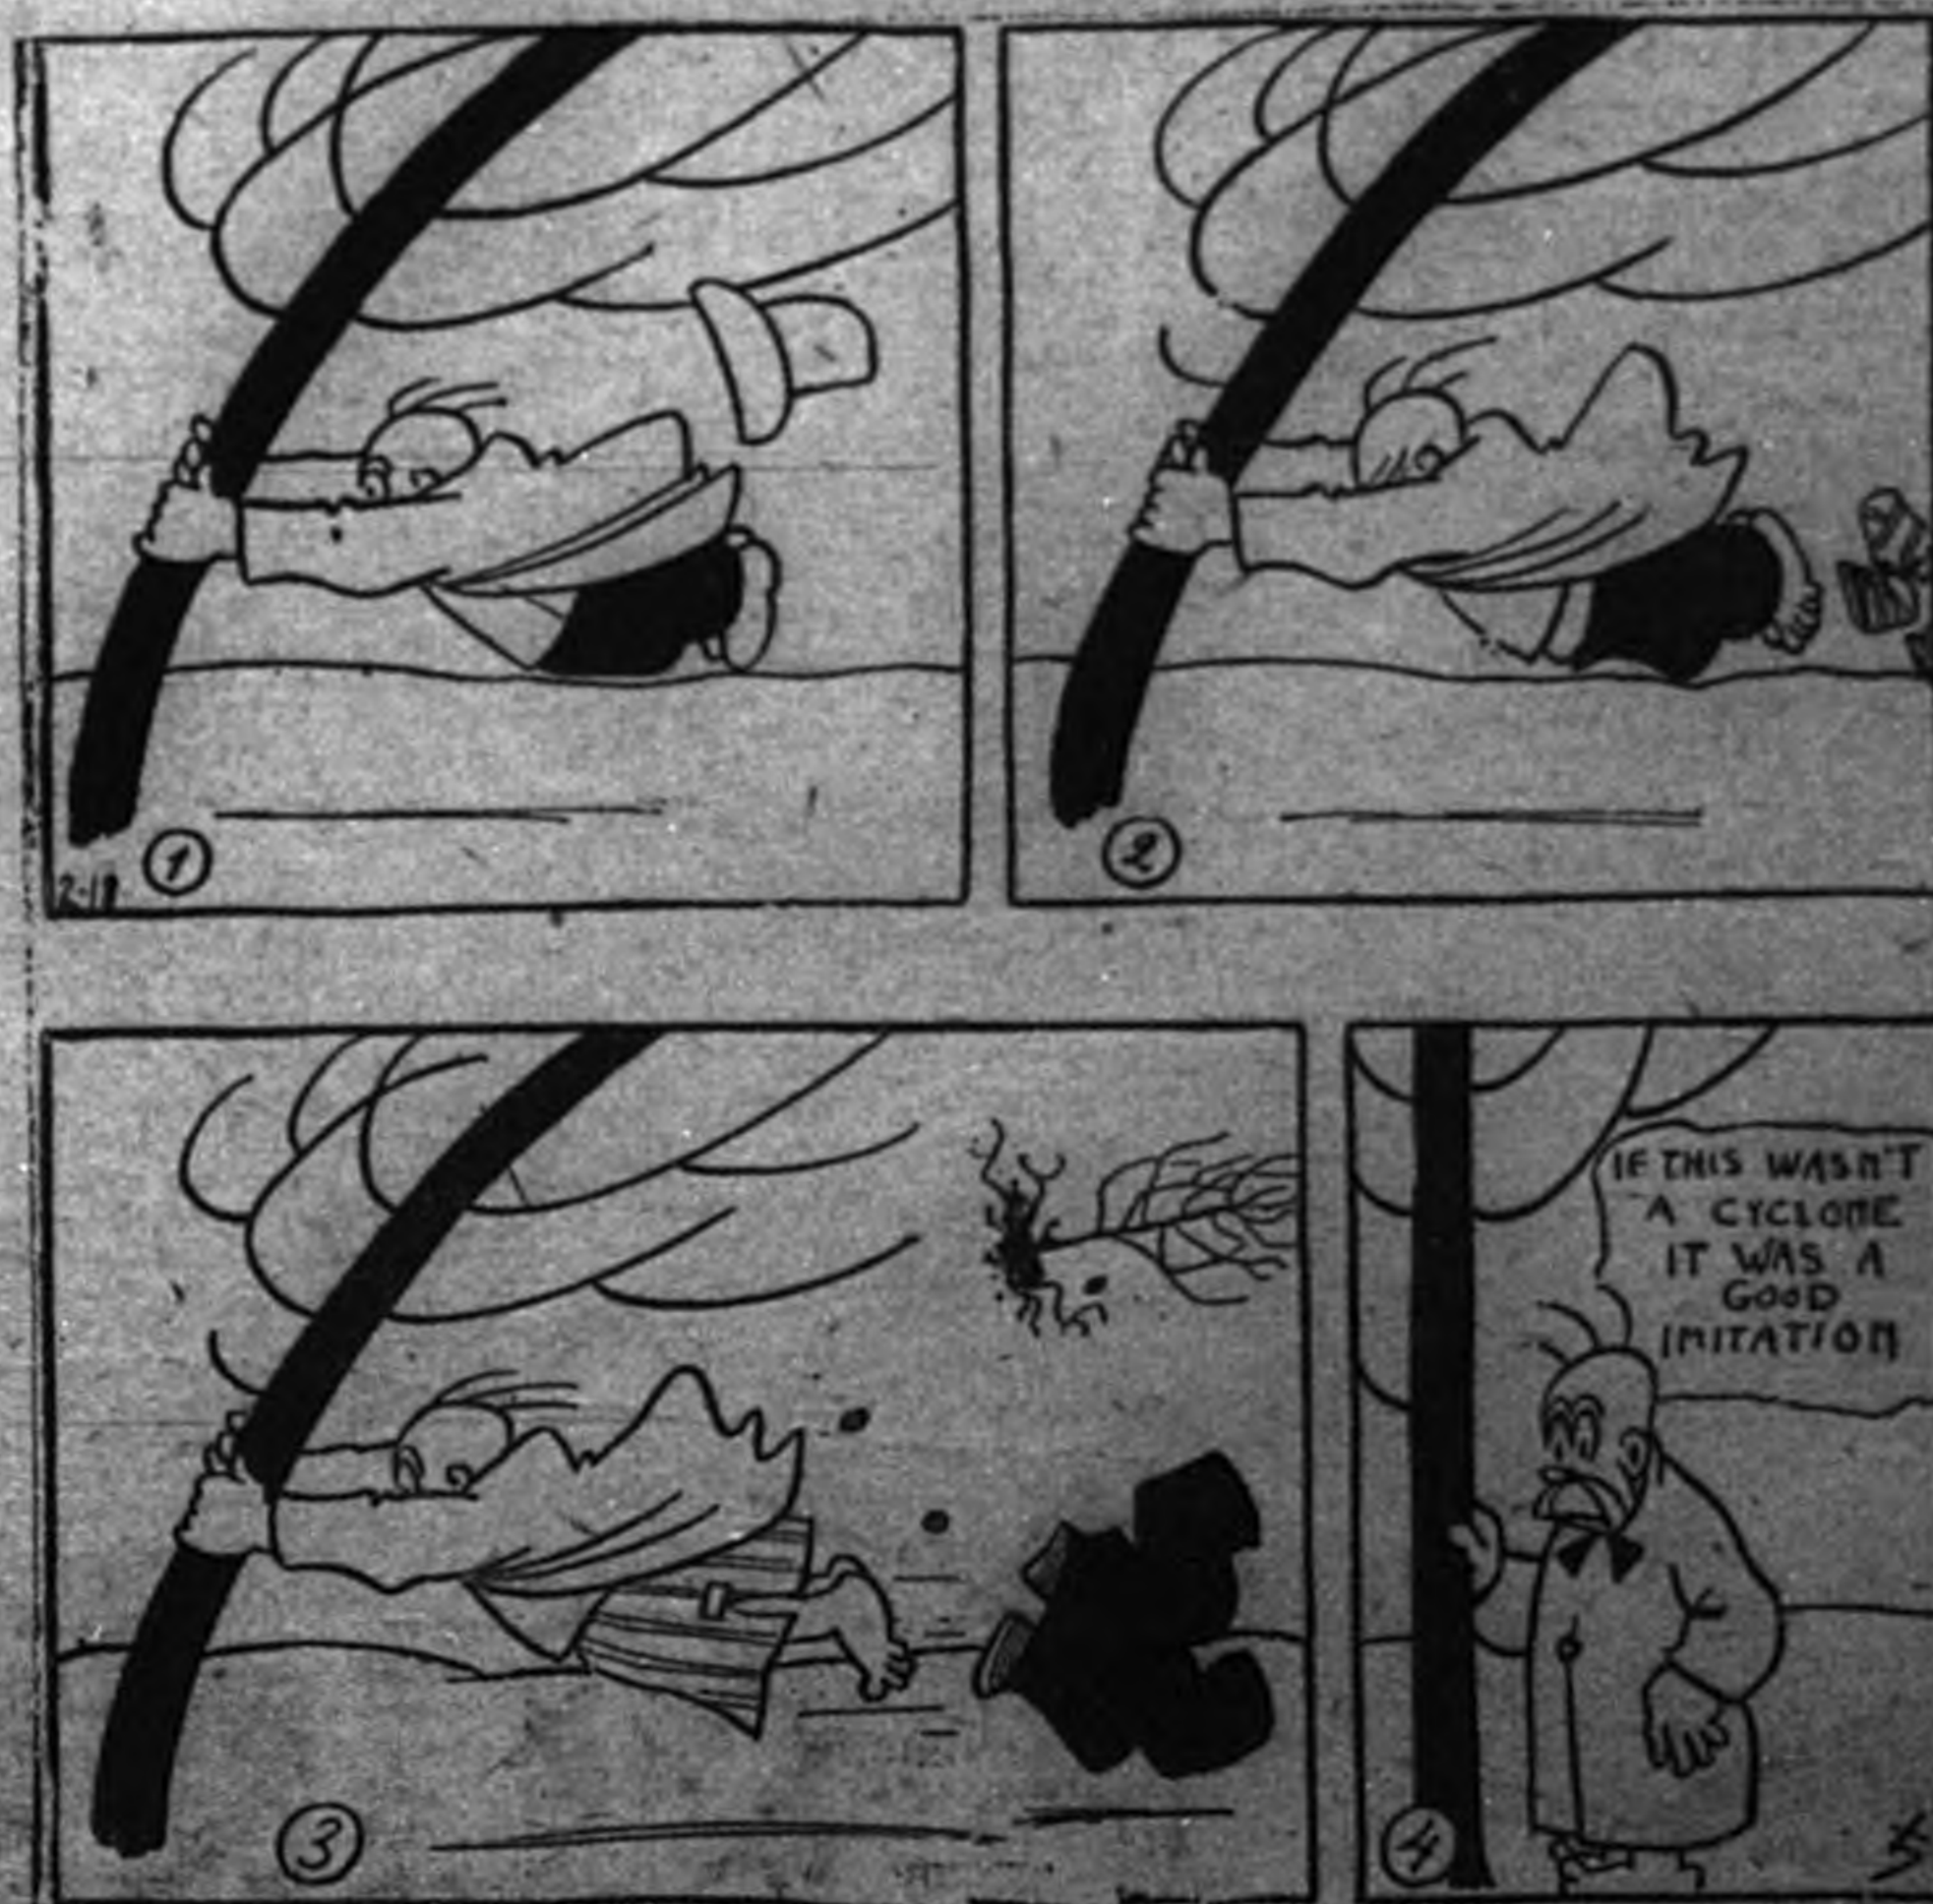

We have letters from many mothers some saying they have four children, some five and some six. Those with more than six apparently hadn't time to write.—Woman's Home Companion.

OBITUARY.

THE LATE STUART HARKNESS.

The many friends of Mr. Stuart Harkness will be sorry to learn of his death, which occurred in Montreal on Friday last. Stuart was one of our old Academy Boys, and during his stay here, made his home with Mrs. Hugh Fraser Sr.

The remains were brought up from Montreal on Tuesday, by his cousins Messrs. H. and L. Gatehouse, interment taking place at Lachute.

SCOUT NEWS.

No meeting was held last Wednesday, Feb. 29th, as the exams were held on that night at school. February competition ended with the Bull-Dog Patrol 184 points.

Crow Patrol, 180 points.
Fox Patrol, 179 points.
Wolf Patrol, 168 points.
This evening was spent in relay-racing, yells and signalling.
The competition for the first week of March is as follows:—
Bull-Dog Patrol, 10 points.
Wolf Patrol, 9 points.
Crow Patrol, 6 points.
Fox Patrol, 5 points.
All Scouts that are ready for tests will be passed next week.

**FIERI FACIAS DE BONIS
ET DE TERRIS.**
SUPERIOR COURT

Canada,
Province of Quebec,
District of Terrebonne,
No. 1569.

ALFRED OUMET, of Ste. Thérèse, Plaintiff; vs **JOSEPH CHARBONNEAU,** of Montreal, Defendant.

As belonging to the said Joseph Charbonneau, the following, immovable, to wit:
A farm situate in the Grande Côte, of the parish of Ste. Therese de Blainville, composed of number seven and of the greatest part of number eight (Nos. 7 and Pt. 8), on the official plan and book of reference of the parish of Ste. Therese, county of Terrebonne, the said farm being contained with in the following limits: bounded on one end to the south up to the half of a stream which crosses the said farm, on the other end to the north, by numbers two hundred and eighty and two hundred and eighty one (280 and 281) on the same official plan and book of reference, on one side to the west by number nine (No. 9) on the same official plan and book of reference and on the other side, partly by number three (No. 3) on the same official plan and book of reference and partly by the emplacements of Alphonse Moureix and Dame Oumet—with a house and other buildings thereon erected.

To be sold at the door of the Catholic parochial church in the town of Ste. Therese, said district, the THIRD day of APRIL, one thousand nine hundred and twenty eight, at TEN o'clock in the forenoon.
J. W. CYR,
Sheriff's office,
St. Jerome, February 24, 1928.

IN MEMORIAM.
STEELE.—In loving memory of our dear Kenneth, whom God called home a year ago today, March 6, 1927.

God is kind, he gives us strength,
To bear our lonely cross,
He is the only one who knows,
Our loneliness and loss,
Inserted by parents and family.

The CANADA STARCH CO., LIMITED
MONTREAL

REVISED STATUTES PROVINCE OF QUEBEC CHAPTER 46 — SECTION 7.

Public Notice is hereby given, in Accordance with Section 7, of the Watercourse Act, that the Gatineau Power Company, a corporation organized under the Quebec Companies Act, with its principal place of business in the City of Ottawa, Province of Ontario, intends to apply for authorization to construct dams, power house and other necessary works of development of its water power at "Chate au Pateau" near Ste. Adele, Quebec. The said works to be built in and along the North River, East Branch, in front of lots 1 and 2, of the 5th Range, and 1-B, 2-A, 2-B, 3, 4, 5, 6, and 7, Range 4 of the Township of Wexford and lots 22 and 23 range 10, Township of Abercrombie, in the County of Terrebonne.

Notice is also given that a petition to that effect accompanied by plans and specifications of such works showing the site chosen for the construction thereof and the lands affected by the backing up of the water has been forwarded to the Minister of Lands and Forests and that a duplicate of the said plans and specifications has been deposited in the Registry Office of the County of Terrebonne, at St. Jerome, Quebec.

The application contained in the petition will be taken into consideration on or after the day following the date of the last publication of this notice in the Quebec Official Gazette.

GATINEAU POWER COMPANY
(Signed) G. GORDON GALE,
Vice-President & General Manager
March 16-5.

THE NAVIGABLE WATERS PROTECTION ACT. R. S. C. Chapter 115.

The Gatineau Power Company hereby gives notice that it has under Section 7 of the said Act, deposited with the Minister of Public Works at Ottawa, and in the office of the District Registrar of the Land Registry, District of Terrebonne, St. Jerome, Quebec, a description of the site and the plans of dam and intake for a hydro electric plant proposed to be built on the North River, East branch near Ste. Adele, Quebec, in front of Lots 1 and 2 of the 5th Range, and 1-B, 2-A, 2-B, 3, 4, 5, 6, and 7 of the 4th Range in the Township of Wexford and Lots 22 and 23 Range 10, township of Abercrombie, in the County of Terrebonne.

And take notice that after the expiration of one month from the first publication of this notice, the Gatineau Power Company will, under Section 7 of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa, for approval of the said site and for leave to construct the said dam and power house.

GATINEAU POWER COMPANY
(Signed) G. GORDON GALE
Vice-President & General Manager,
Dated at Ottawa this 18th. day of February, 1928.
March 16-5.

DISTRICT SUPERINTENDENT'S OFFICE,

J. TAYLOR,
District Superintendent of Postal Service.
Montreal, 3rd. March, 1928.

The happy merchant

Never before in the history of the world has it been possible for a merchant in good credit to do so much business with so little capital locked up in stock.

One important reason for the present prosperity is, that instead of having to buy a big stock at the beginning of each season, he is now able to buy small stocks and replenish them promptly by Long Distance.

Keep your customers for miles around coming to you for whatever they need. Invent ways of inducing them to visit your store, or to order from you by Long Distance—and they tell us—you will not be seriously bothered by competition.

Long Distance is making happy merchants in some towns. Don't overlook its great possibilities.

When you want
to bake your best,
you want

DEATHS.

MacGIBBON.—At Brownsburg, Que., March 11, 1928, Duncan D. in his 65th year, beloved husband of Annie Buchanan. Funeral took place from his residence, at 2 p.m., Tuesday, March 13th.

BUCHAN.—At Detroit, March 11th, 1928, Jessie W. McGibbon, widow of the late Duncan Buchanan, of Ottawa, in her 78th year.

GREY.—At Montreal, on Saturday, March 10th, Thomas H. Grey, in his 67th year. Funeral took place from his residence, Grenville Bay, Que., Tuesday, March 13th.

CARDS OF THANKS

Mrs. Thos. Grey and family wish to thank their friends and neighbors for kindness shown during their recent bereavement.

Mr. and Mrs. George Tucker wish to thank all the neighbors and friends who were so kind during the sickness and death of their sister.

Mr. Henry Morrison and family, of "The Glen", Louisa, wish to thank their many friends for their kind sympathy in their recent sad bereavement.

Miss Katherine Lee wishes to thank her relatives and friends for their help, kindness and sympathy in her recent sad bereavement.

Mrs. D. D. MacGibbon and family wish to thank all for their kind assistance and expressions of sympathy, in their recent sad bereavement and loss.

IN MEMORIAM.

TOMBS.—In loving memory of my dear son John, who passed away on March 17th, 1925, in Pottenger's Sanatorium, Monrovia, California.

It is not the tears at the moment shed, That tells how loved is the soul that is fled, But the tears through many a long night wept, And the sad remembrance so fondly kept.

Mother.

THOMPSON & McKIDDIE.—In loving memory of my dear mother, who passed away on March 16th, 1922, and also my darling sister, Maggie, who passed away March 22, 1924.

We who loved you sadly miss you, As it dawns another year, And there's not a day goes by, That we do not think of you.

Sadly missed by Annie and Olive.

EXPERT WATCHMAKER.

A good line of Wedding and Engagement Rings, also Watches, Silverware, Chinaware, Glassware, and all kinds of Souvenirs.

A. C. LAPIERRE, Jeweller.

Bethany Street, Lachute.

AN IMPROVEMENT.

Perhaps one of the most dangerous things in existence are slippery sidewalks and we are pleased to see that the Town now has a machine for "grooving" the ice, which should make walking much safer and easier. This is a good step in the right direction and we hope it will be continued by the use of a "Snow Plow" on our sidewalks next Winter. Other Towns smaller than Lachute have it. Why can't we be up-to-date as well.

LADIES' CURLING

Last Thursday a Charity Bonspiel in aid of Dr. Grenfell's Hospital in Labrador, was held. Mixed games were played afternoon and evening. After the evening games refreshments were served. The proceeds from the day's play amounted to \$45.65.

On Tuesday the finals for Mrs. E. H. Wilson's Trophy were played. Miss G. C. McQuat's rink defeating Mrs. Drew's rink by a score of 10-5. Mrs. Cousens Mrs. Mitchell Miss B. McQuat Mrs. MacNeill Mrs. Cottingham Mrs. A. McQuat Miss G. C. McQuat Mrs. Drew (Skip)

A mixed Bonspiel which is being greatly enjoyed by all is being played this week

ARGENTEUIL AMATEUR HOCKEY ASSOCIATION

At the end of the season, we think it is in order for the officials of the League to draw their conclusions, answer their critics and plan for the future.

According to the understanding that took place on Jan. 9th, the first and second teams were to play-off and the winner of two games out of three would be declared Champion. In these series, Ayers Limited took the first game 3-2; Brownsburg, the second 1-0. The third was forfeited by Brownsburg which gave 2 games out of three to Ayers Limited. They are the rightful winners of the Cup for 1928.

Referring to the complaint from Brownsburg that both games, on the 24th and on the 25th, should be protested by Ayers Limited, we must state that Ayers Limited protested the game on Saturday 25th, legally and did not protest the game of the 24th at all. Now, we maintain that it was Ayers Limited's right to protest if they so wished the game of the 24th, and nobody could force them to do so other than themselves. The next point is to state that the protest relative to the game of the 25th, is perfectly valid. This was agreed upon at a meeting held on Feb. 28th, at which the Brownsburg representatives should have been present.

However, taking everything into consideration, the league did not get along too badly. This was our first year and things were started extremely late. With this year's experience and a whole year ahead of us to draw up a Constitution and By-laws, we should have it going good and up to its objective which is to promote Hockey and Sporting Spirit in the County of Argenteuil.

Argenteuil Amateur Hockey Association per L. E. DUMAIS, President; E. LABERGE, Sec. Treas.

A general business meeting of the Lachute Literary and Dramatic Society will be held in the Academy, on Tuesday, March 20th, at 8.15 p.m. All members invited to attend.

Lachute is well supplied with car Agencies, and we are pleased to report that the Chevrolet will now be under the direction of Mr. W. J. Graham, of Brownsburg, who is opening up Show Rooms in town. The Nash Essex and Hudson will still be sold by Mr. John Mason.

LOCAL NEWS.

—Don't fail to see the Display of New Spring Hats, personally chosen by Mrs. A. Habib, Brownsburg. Their Advt. appears elsewhere in this issue. Look it up. It's a corner Ad for the Corner Store.

Easter Flowers

Nothing in the way of remembrance of Easter could be nicer than a nice flower. We will have them for sale on the 5th and 7th, at reasonable prices. See our Advt. elsewhere and don't fail to order early.

McQuat & McQuat

We are pleased to report that Mr. A. N. MacVicar, of the Bell Telephone Co., here, has been appointed as District Plant Wire Chief, and although this will necessitate moving from town we are glad to see "Mac" climbing up.

The Jerusalem and Bethany W. I. held their Annual Meeting at the home of Mrs. Leonard Boyd, on Wednesday, March 7th. The following Officers were elected:—Mrs. Kenneth Sly, President; Mrs. Norman Boyd, Vice-President; Miss Hilda Hume, Secretary.

The many friends of Mr. Brunt will be sorry to learn that he with his family will be taking up residence in Westmount, where he has accepted a position in the High School. Although we hate to see him go, we have enjoyed his stay with us and wish him every success in his new venture.

The Children will enjoy it.

Mrs. Jarley's Wax Works, is something that both old and young can enjoy. Its a program of entertainment in itself. But besides there's "Mr. Bob" a comedy in Two Acts all for the same money. Don't miss it. In the Auditorium, this Saturday, March 17th, at 8.15 p.m. Adults 50c., Children 25 cts.

OBITUARY.

THE LATE MISS ROGERS.

After a very short illness, Miss M. J. Rogers, of Lakefield, passed away in her 74th year, on Saturday, March 10th; at the home of Miss M. Wells, where she has lived since the death of her brother George.

The remains were laid to rest in the Lakefield Cemetery, Sunday afternoon; service being conducted by Mr. Watters. She leaves to mourn her loss two sisters, Mrs. Geo. Tucker and Mrs. Sam Moore and three brothers John, William and James.

The pall-bearers were Messrs. Jno. Gain, Lawrence Hodge, Albert Tomalty, L. Rogers, Ben Rogers and Harry Scott.

THE LATE MRS. J. W. BUCHAN

A former resident, of Lachute passed away on March 11th, last, in the person of Jessie W. Buchan, of Detroit. Deceased lady was the third daughter of the late Alexander MacGibbon, and was the wife of Duncan Buchan, of Ottawa, where they resided for some 10 years. Besides her loving husband she leaves to mourn her loss, one brother, John A. MacGibbon, and three sisters, Mrs. Jackson Banford, of New Westminster; Mrs. Mary Murray, of Pinkerton, Ont. and Miss Kate MacGibbon, of Lachute.

The funeral took place on Tuesday, and was largely attended by sympathizing friends and relatives, interment being made in Beech Wood Cemetery, Ottawa.

THE LATE D. D. MacGIBBON.

One of Brownsburg's most popular and familiar characters has been taken away in the person of Mr. Duncan MacGibbon, who after an illness of over two years, passed away on Sunday last. Deceased gentleman, who was in his 65th year was born in the Burg, where he lived during his lifetime. During his younger days he worked in the Grist and Saw Mill with his father, carrying on the business until several years ago, when he sold out to Mr. John Graham. He was married to Miss Annie Buchanan, of Lachute Road, who still survives him. He was a devoted Christian gentleman, an ardent worker in the Presbyterian Church, and the mainstay of the Choir, being both organist and leader for many years. His loving wife, one daughter, Mrs. C. Richardson and two sons, William at home, and Stewart in the West are left to mourn his loss. The funeral took place on Tuesday, conducted by the Rev. H. Cousens, assisted by the Rev. Mr. Lackey and Rev. Mr. MacKinnon, interment taking place at Lachute.

The pall-bearers were six of his nephews, Messrs. Allan and Douglas Todd, of Lachute; Ross and Erle Todd, and Mr. Roe, of Ottawa; and Mr. Wyman MacGibbon, of Brownsburg. A large number of wreaths and floral tributes bore silent tribute as to the esteem in which the deceased gentleman was held.

THE LATE MRS. H. MORRISON.

The sting of death has caused deep sorrow in this community by the death of Mrs. Henry Morrison, which occurred at her home in The Glen, Louisa, Que., March 2nd, 1928.

Mrs. Morrison was born in 1865 and was the daughter of the late Arthur Tomalty, of Louisa, Que. She was married to Henry Morrison, on Mar. 26, 1884.

Deceased had been in fairly good health until six weeks previous to her death when she caught a heavy cold, which developed into bronchitis. She was rallying from this and was able to be up a couple of days, when pleurisy set in and she was again confined to bed for another two weeks but was seemingly gaining every day from this also when suddenly death came as a great shock to all her loved ones, who are being comforted with her own words that at God's call she was ready to go. "For if we believe that Jesus died and rose again even so them also which sleep in Jesus will God bring with Him. 1st. Thess. 4-14.

Deceased bore her sickness with christian patience and had all the attention that medical aid and loving hands could tender. She will long be remembered by a large circle of friends for her kind and loving disposition.

The funeral service was conducted in her home by Rev. J. A. Lackey, who took for his text 1st. Cor. 15-55. The hymns were "What a friend we have in Jesus." A duet "No Night There", sung by Geo. R. Bale and Alexander Tomalty, and "Safe in the Arms of Jesus", favorites of the departed. The remains were then interred in Louisa cemetery.

She leaves to mourn her loss a loving husband, four sons and five daughters. Robert, of Lachute Rd.; Walter, of Carlyle, Sask.; Arthur of Shrewsbury, Que.; Wilfred, of The Glen. Mrs. M. J. Matthews, of Dunany, Que.; Mrs. G. R. Bale, of Montreal; Mrs. Robert Gain, of Dunany; Mrs. W. T. Brown, of Shrewsbury, and Miss Wilma Morrison, of Dunany, also two brothers, Arthur Tomalty, Louisa; and Albert Tomalty, Lakefield, Que.

The pall-bearers were Robert, Arthur and Ernest Morrison, Geo. R. Bale, Robert Gain and Alexander Tomalty.

We miss you, Mother oh so much. But God has called you home. So by His grace and faith in Him, We say "Thy will be done."

1928 Auto Models Built for Women

Upholstery Luxurious and Instruments Placed So as Not to Require "Reach"

Inspection of the various models of automobiles now will show that most manufacturers are continuing their policy of adapting motor cars to women drivers.

As one goes from showroom to showroom, one will find in the models for 1928 refinements which will appeal to the exacting feminine driver are numerous.

Special care has been given to the upholstery of the interior and materials are the finest of mohairs, broadcloths and leathers. Cushions are soft and comfortable, set at just the right angle so that women can ride all day in perfect comfort.

In the various driving compartments, refinements are everywhere in evidence. Many models have the new and thinner steering wheel, which fits diminutive hands as comfortably as those of men. Centralization of light controls on top of the steering post, and arrangements for the adjustment of the post itself to suit the individual driver, also are found in many models.

Still another refinement is the grouping of instruments on the dash so that a single glance tells the story of gasoline and oil supply, engine heat, speed, mileage and rate of charge.

NURSES WANTED

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' course of training in young women, having the required education, and desirous of becoming nurses. This hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and traveling expenses to and from New York. For further information write the Superintendent.

One will find accelerators of the large treadle type, rubber covered so as not to mar milady's shoes and set at just the right angle so as not to tire the ankle. Clutch and brake pedals also are rubber covered.

Gear shift levers are long and easily reached, and parking brakes are operated in some models by a long lever with spoon latch that is also within easy reach. In fact there is no operation incidental to the control of most of the 1928 models requiring a "reach," a point which women appreciate.

"Your uncle seems rather hard of hearing?" "Hard of hearing! Why, once he conducted family prayers kneeling on the cat!"

"Hundreds of Queens Workers Rally to Connolly's Support."—Headline. Possibly to the tune of "Fifty thousand henchmen can't be wrong."

Mussolini has agreed to write the story of his life, and it will probably be called "Me."

SUN LIFE SETS NEW RECORD

Canadian Company With World Wide Organization a Great Credit to This Country. Increase in New Business For Year Greatest on Continent.

The extraordinary expansion of the Sun Life Assurance Company of Canada during the last few years has caused its annual report to be awaited with unusual interest, not only by the policyholders of the Company, but by a large section of the general public.

The annual report which the President has just submitted, and which appears in this issue, must have surpassed the expectations of the most sanguine. The total amount of assurances in force with the Company now approaches the billion and a half figure, \$1,487,000,000, an increase for the year of over \$231,500,000. The total net income for the year exceeded \$100,000,000—five times what it was ten years ago and more than \$23,000,000 in excess of the income for the previous year.

Such statistics as are available for 1927 indicate that the aggregate new business of all the companies operating in North America last year barely exceeds the total new business of the previous year. The increase in the new business of the Sun Life of Canada, on the other hand, was twenty-three per cent. Assurances in force on the books of the Company have doubled in four years—new business has trebled in that period.

This wonderful expansion has been paralleled by a great increase in the

MR. T. B. MACAULAY
President
Sun Life of Canada

already proverbial strength and resources of the Company. The assets have been increased by over \$50,000,000, and now reach the impressive total of over \$400,000,000. The Company's assets approximate the amount of the total assurances in force only eight years ago.

The wisdom of the Company's investment policy is reflected in the fact that it has no arrears in interest or dividend on either its bonds or preferred stocks, while the dividends accruing in its common stocks are greatly in excess of those payable on those stocks at the time of their purchase. The care and foresight exercised in this branch of the business is indicated by an appraisal of company securities, the market value of which has increased by over \$19,000,000 during this year.

The surplus earned during the year amounted to over \$38,500,000. The Company has followed its conservative policy with respect to this surplus and

The strength and solidity of our large insurance companies, banks, etc., is a source of great pride to all Canadians, and it is in the best interests of the country that these institutions remain Canadian in ownership and not pass to foreign control, as have many of our large business enterprises.

deducted \$5,000,000 from the market value of its securities as a further provision against possible future fluctuations, the total amount set aside for this purpose now standing at \$10,000,000. The account to provide for unforeseen contingencies has been increased by \$1,500,000 and now amounts to \$12,500,000. The sum of \$1,000,000 has been written off the Company's properties; an additional \$500,000 has been set aside in anticipation of the greater longevity of annuities—the total provision under this head now being \$2,000,000. Another \$50,000 has been set aside to provide for claims with respect to total disability cases as yet unreported. \$11,000,000 has been paid or allotted as profits to policyholders during the year, and over \$6,000,000 has been contingently allotted to deferred dividend policies issued prior to 1911 and to five-year distribution policies to provide for profits accrued but not yet payable.

After making these liberal deductions and allocations, over \$11,000,000 has been added to the undivided surplus, which now stands at more than \$45,000,000.

There is good news again for the participating policyholders of the Company in the announcement that the scale of dividends to be paid to policyholders during the year commencing April 1st next will be again increased—this for the eighth successive year. The interest rate on dividends left with the Company will be maintained at 5 1/2 per cent. per annum during the new dividend year.

There were paid to policyholders and beneficiaries, in respect to death claims, matured endowments, etc., during the year over \$42,000,000. The Company has paid out since its organization, under this head, over \$300,000,000.

It is indicative of the efficiency and morale of the world-wide organization of the Sun Life that the increases in its income are from every department of its business and from every territorial division, namely, Canada; United States; South America and West Indies; Great Britain, South Africa, and the Near East; China, Japan, India and the Far East. Such a showing is not alone a tribute to President Macaulay, but a striking proof of the high quality of the personnel of his organization.

The Head Office building in Montreal is to be increased to mammoth proportions, the first unit of the new building being now under construction. This building is designed, when completed, to accommodate 10,000 employees. Almost equally interesting is the action of the Company this year in purchasing one of the most central sites in London, just off Trafalgar Square and adjoining Canada House. Here is being erected what will be undoubtedly one of the finest office buildings in the world's metropolis and from which the business of the British Isles will be administered.

Speakers Broadcast In Many Languages

European Station Announcer Must Use From 2 to 5 Tongues Because of Size of Countries

Paris—Most announcers in Europe must be linguists, for many stations, especially those of small countries, send their programs beyond the borders of their own countries.

The station of Barcelona announces in Spanish, Catalan, English, French, Italian and German, Hilversum, in Holland, and Zagreb, in Yugoslavia, announce in five languages. The Holland station uses Dutch, French, German, English and Spanish, and the Serbian station, Serbian, Slovene, German, Italian and Greek.

The Turkish station, at Stamboul, makes announcements in Turkish, French, English and German. Five other European stations transmit in three languages; eight in two languages. Dublin transmits in Irish and English.

"Why Worry."—For Politicians

Starting as a plain citizen, you have two alternatives: Either you are interested in public affairs or you are not.

If you are not, you have nothing to worry about.

If you are interested, you have two alternatives:

Either you engage actively or you do not.

If you do not, you have nothing to worry about.

If you do engage actively, you have two alternatives:

Either your work is recognized by your party and you are given more work to do or you are not.

If you are recognized, you are taken into the inner circle or you are not.

If you are not in the inner circle, you have nothing to worry about.

If you are in the inner circle, you will finally be nominated for public office or you will not.

If you are not nominated, you have nothing to worry about.

If you are nominated, you have two alternatives:

Either you will be seated or you will not.

If you are not, you have nothing to worry about.

If you are elected, you have two alternatives:

Either you will be seated or you will not.

If you are seated, you have nothing to worry about.

If you are not seated, you will again be a plain citizen with nothing to worry about.

The man who blew hot to warm his hands and cold to cool his soup had nothing on the candidate who is personally dry and politically wet.—Boston Herald.

Mrs.—"I won't be long, dear. I'll be ready in a minute." Mr.—"Well, for goodness' sake do pick out a minute that's not more than half-an-hour away."

English Court Humor

The London courts perform their allotted function of tempering justice with humor:

Witness (asked to identify a prisoner)—I'm not certain. He seems to have washed his face since I last saw him.

Defendant in bigamy case—I am feeling rather queer to-day. I really ought not to be here at all.

Motorist summoned for exceeding speed limit—I was stamping my feet because they were cold, and I must have touched the accelerator!

Magistrate—If you don't go back to your wife I shall make an order against you.

Defendant—I'm already paying under an order.

Magistrate—Who made the order?

Defendant—The missus herself.

Sunday School Teacher—"Johnny, what can you tell me about Aaron?"

Johnny—"His name was the first in the telephone book."

Bobby Burns's Kirk Reclaimed

Taken Over by Britain as Perpetual Memorial

Was Fast Falling to Ruins

Scene of Tam O'Shanter's Adventure Saved for Posterity

London—It will be gratifying to admirers of Robert Burns to know that the famous "auld haunted kirk" at Alloway in Scotland has been reclaimed from its recently neglected state.

After an appeal for its better guardianship as made to King George V. by Capt. Edward Page Gaston, F. R. G. S., an Illinoisan of Scottish descent long resident in London, the British Government has taken over the property as an ancient monument to be under official protection in perpetuity as a memorial to Scotland's greatest poet and most widely beloved son.

"Being of Scottish ancestry and an admirer of 'the ploughman poet,' I have visited the Ayr district repeatedly during the last twenty-five years," said Gaston. "Some time ago I was astonished at observing the neglected state of the old church which was the scene of 'Tam O'Shanter,' the most popular of Burns's poems.

"By a recent general parliamentary act affecting old burying grounds, the care of Alloway Kirk had been taken from the Burns Trust, which had capably looked after it for many years, and its control had been vested in the local parish council, whose official duties consist largely in looking after the poor.

Almost Reduced to Pauperism

"Thus (as regards its means of support out of the limited poor fund) the world-famed church and churchyard were technically degraded to the level of parish paupers! As practically nothing was being done toward keeping it in repair a part of the seventeenth century structure was in danger of collapse at the time of my visit, and many loose stones were almost falling from the walls.

"The situation was so arresting that consultation was had with various representative people interested in preserving the Burns associations in their highest sense, these including a lineal descendant from the poet. It was agreed that an attempt should be made to deal with the existing anomalous state of affairs.

"The proposal which I accordingly ventured to lay before the King was that the structure be officially adopted as an ancient monument and hence be taken over and protected in perpetuity by the British Government. As a result of the decision shown by the King and his advisers, another of Britain's priceless literary monuments has been thus preserved from further deterioration, for the benefit of posterity.

Looted By Relic Hunters

"This official action was taken none too soon, for local builders and relic hunters long ago made off with the timbers of the fallen roof, together with other removable, and each year was adding its toll of vandalism to the sum total. I suggested to King George that the church might be restored as a sacred shrine to which Burns devotees from any lands could repair, on occasion. Such restoration would need to be done by private persons, however, as the Office of Works has no funds at its disposal from which expenditure can be incurred on the preservation of Alloway Kirk; but it would of course, be pleased if an effort were made, say, by societies interested in Robert Burns to provide funds for preserving this monument.

"As the Burns cult increases continually, the hundreds of Burns clubs, and other Scottish societies, in America, Canada, Australasia and elsewhere, should readily supply ample funds for restoration and maintenance, if so desired.

"Fully 100,000 sightseers annually visit Alloway on the average, 70,000 persons having paid admission to the Burns monument there in one year, while other thousands make the free visit to

Alloway's auld haunted kirk... Where ghaists and howlets nightly cry.

Burns's Desired Burial Place

Robert Burns wished to finally rest at Alloway by "the banks and braes o' bonnie Doon," instead of at Dumfries, where he lies. This was he plainly expressed in connection with the burial of his father in Alloway churchyard in 1784, when the poet had inscribed upon the still standing modest tombstone the tribute:

"O ye whose cheek the tear of pity stains

Draw near with pious reverence and attend!

Here lie the loving husband's dear remains,

The tender father and the generous friend,

The pitying heart that felt for human woe;

The dauntless heart that feared no human pride;

The friend of man, to vice alone a foe;

For ev'n his failings leaned to virtue's side."

Burns's Religious Nature

"Aside from being a Burns enthusiast," concluded Capt. Gaston, "this interest in Alloway Church arises

from my Covenant ancestry, who fled from Scottish religious persecution in those parts to the Irish Protestant plantations of Ulster, whence my paternal grandfather emigrated from Ballymena to the backwoods of Ohio a century ago. In common with others, I hope that something practical may now be done in the way of paying the suggested additional tribute at Alloway Church to one whose nature was, in truth, a deeply religious one."

Guest—"Who is that awful-looking tramp over there?" Host—"Why, that's my wife." Guest—"Oh—er—beg pardon. My mistake." Host (sadly)—"No, mine!"

To be a success, a political issue must be like a bond issue: It must draw interest.

Returning tourists call the Cuban capital "What'll you have?"

Aerial Survey

45,000 Square Miles of Photographs Taken Last Year

Government camera men in our country photographed 45,000 square miles of territory last year from the air. Of this, 28,650 square miles was by oblique photography and 17,300 square miles by vertical photography. The oblique photographs numbered 16,246 and the vertical photographs 46,340.

The work was carried on in eight of the nine Provinces, according to a review of the Dominion Department of the Interior. Individual operations included such items as the extension of oblique photographs over an area of 15,200 square miles west of Lake Winnipeg for forestry purposes; an oblique photograph operation covering

an area of 8,000 square miles over the Wood Buffalo Park, near Ft. Smith, N.W.T., and a considerable number of vertical photographic operations of smaller areas in various parts of Canada.

"Since the inauguration of aerial photography in Canada six years ago by the Topographical Survey, Department of Interior, working in co-operation with the Royal Canadian Air Force, this art has repeatedly demonstrated its value in its application to mapping," says the Interior Department. "This method fits in admirably with conditions that prevail in a new country of the extent of Canada, since by its use speed and economy are effected in mapping lands that by the ordinary methods of ground survey would involve a tremendous expenditure of time and effort.

"One of the interesting features of the problems relating to development and connection with the season's work in a study of such problems generally was the covering by vertical photographs of the route of the New W.

land Canal through the Niagara Peninsula. This was undertaken at the request of the Department of Railways and Canals for the purpose of showing the progress of the work in pictorial form. The advance made was readily seen by comparison with photographs of the same area which had been taken in 1921.

"Another interesting operation was the photographing, both vertical and oblique, of Niagara Falls, at the request of the Dominion Water Power and Reclamation Service, for the purpose of studying various features relating to the effect of ice conditions, the recession of the brink, etc.

"The value of the aerial photographs taken on this work does not cease with their use in the actual mapping operations. The information upon them is of importance in all investigations over the territory

in question. The Topographical Survey has been made a central bureau for the collecting and indexing of all aerial photographs. Here the ever increasing number of these photographs are first converted into maps and are then kept on file for reference and record purposes."

Capped the Lot

Three artists were telling tall stories of their work.

"The other day," said one, "I painted a deal board in imitation marble with such effect that it sank immediately when thrown into the water."

"That's nothing," said another. "Yesterday I hung a thermometer on the easel supporting my picture of the Polar regions and it fell at once to twenty degrees below zero."

"Go on," remarked the third. "My portrait of a millionaire was so realistic that it had to be shaved every morning."

Dividends to Policyholders increased for eighth successive year

EXTRACTS FROM DIRECTORS' REPORT

Substantial advances have been made in all departments during the year.

The total net income for the year exceeded one hundred million dollars.

The strength and resources of the Company have been further enhanced.

The high earning power of the Company's investments has been again demonstrated. The net rate of interest earned on the mean invested assets, after fully providing for investment expenses, was 6.47 per cent. This gratifying result has been made possible by dividend increases, bonuses and stock privileges accruing on many of the Company's holdings.

The wisdom of the investment policy which has been consistently followed in past years, in favouring long term bonds and the stocks of outstanding and very carefully selected corporations, has been once more emphasized. The appraisal of our securities shows that the excess of market values over cost increased during the year by \$19,235,889.99. In addition, a net profit of \$5,028,033.20 accrued from

the redemption or sale of securities which had risen to high premiums.

The quality of the investments listed in the assets is testified by the fact that on both bonds and preferred stocks not one dollar, due either as interest or dividend, is in arrear for even one day, while the dividends accruing to common stocks are greatly in excess of the dividends payable on the same stocks at the time of purchase.

The surplus earned during the year amounted to \$38,511,029.67 from which the following appropriations have been made:

\$5,000,000 has been deducted from the market value of our securities as a further provision against possible future fluctuations, increasing the amount so set aside to \$10,000,000.

\$1,500,000 has been added to the account to provide for unforeseen contingencies, which now stands at \$12,500,000.

\$1,000,000 has been written off the Company's Head Office building and other properties.

\$500,000 has been set aside to provide for the greater longevity of annuitants, bringing the total provision under this heading to \$2,000,000.

\$50,000 has been set aside to provide for claims in respect of total disability as yet unreported.

\$11,090,056.61 has been paid or allotted as profits to policyholders during the year. In addition, \$6,203,573.00 has been contingently allotted to deferred dividend policies issued prior to 1911, and to five year distribution policies, to provide for profits accrued but not yet payable.

After making these deductions and allocations, \$11,269,330.89 has been added to the undivided surplus, bringing the total over all liabilities, contingency account and capital stock to \$45,280,896.14.

Your Directors are gratified to announce, for the eighth successive year, a substantial increase in the scale of profits to be distributed to participating policyholders during the ensuing year.

LACHUTE LITERARY & DRAMATIC SOCIETY HAVE GOOD TURN-OUT TO SEE "ADAM AND EVA"

Despite the fact that the day was stormy and many who desired to attend were unable to get in from a distance, there was a real good turn-out at the presentation of "Adam and Eva," on Friday evening last, and had the weather been favorable, there would have been a record attendance.

As was proven in former presentations, there is no need of sending out-of-town for talent and it was been freely expressed by many who attended that these plays are being rendered equally as well as those of Theatrical Stock Companies in our larger cities.

The play was presented in 3 Acts, opening with a view of the Drawing Room of Mr. King's Home, he being a rich man, who ruled his family with a check book instead of through the medium of love. Mr. King at the first of the month was confronted by a huge number of bills and after considerable argument with his family, made them conceive the idea of "Shipping him off on a Vacation." This was worked admirably by his daughters, Eva and Julie, his sister-in-law, Miss Rucker and his son-in-law, Clinton de Witt, with the assistance of Dr. Delamater who with Lord Andrew Gordon, is in love with Eva, chiefly as fortune hunters.

It had been Mr. King's intention to send his manager Mr. Adam Smith on a business trip, but he changes his mind and goes himself instead, leaving Smith in charge of his family, in the form of loco-parentis and with full power to act in his place, but limiting him as to funds. The maid Corintha however, comes to Smith's assistance and at this time seems to be the only friend he apparently has, giving him a lot of good advice and encouragement; for although Adam is not aware of it, she is very fond of him. Considerable humility is caused amongst the family when they are curbed and Mr. Smith realizing that he is dealing with a bunch of Spongers conceives the idea of making them work, by telling them that their father has lost everything. This fact, along with a severe lecture from their new father, brings the family to time and we find them all eagerly searching the newspapers for positions.

In the last Act, the family have moved to an old Chicken Farm of their Father's where they now have a prosperous business. Mr. De Witt obtains a position as a Clothing Salesman, while Lord Andrew drops his title and enters the Livery Business. On Thanksgiving Day there is a family re-union and Mr. King unexpectedly returns, to the great surprise of all, and where he expected to find his family in Long Island raising the Dickens, he finds them in his old farm in New Jersey raising Chickens. Uncle Horace, who has since become an Insurance Agent, is very eager in his new profession, trying to sell his nephew a Life Policy and King is dumfounded when he discovers that all the family are working. The story of his ruin is of course untrue, but the experiment has put the whole family on their merit and made them realize that there is more fun in really working and doing for themselves, than there is in being dependent on ones parents. Mr. Smith has of course won his way into the hearts of the family and especially that of Eva, who at the dropping of the curtain thinks there is no one "Just like Adam."

The lines were very evenly distributed, and the success of the play did not depend upon any particular individual interpreting a rôle, but upon the co-operation of the entire cast. Mr. Clarence Rogers gave a splendid interpretation of the boisterous father, James King, while Miss E. MacKimmie, played the rôle of his younger daughter Eva, and Mr. John MacKimmie that of his manager Adam Smith. These were the three major characters and were taken off in a style that artists of longer standing might well envy. All of the charm and attractiveness of Eva were ably portrayed by Miss MacKimmie, and the pleasant, thoughtful and quiet determination of Adam by Mr. MacKimmie. Miss R. Bishop, as King's elder daughter Julie De Witt, and Mr. R. A. Giles as Clinton De Witt, his son-in-law, had rather difficult parts, but their contribution to the atmosphere of the play was important. To be proud, supercilious over bearing, soft and silly in their love for each other, and then be transformed into industrious and sensible people is not as easy as it may appear, yet they both gave an admirable interpretation of the characters. Mrs. G. Y. Deacon as King's sister-in-law, Aunt Abby Rucker, in charge of his house, but more interested in her charities and memory classes and other clubs, was most effective. Horace Pilgrim, King's

uncle, a peevish crabbed old bachelor, lazy and selfish, was interpreted by Mr. J. W. Brunt, and it is no exaggeration to say that he could not be surpassed. He filled the part to perfection and brought out all the wit and humour his lines contained, and what more can be said of any actor. Mr. W. Gordon took the part of Dr. Jack Delamater, King's neighbour, and that he was an admirer of Eva, and very jealous of his rivals was easily seen. The roll of maid is often considered to be very minor, but Miss P. Fraser, as Corintha could not be overlooked. Her part was very effectively performed, showing great care in the smallest of details which mean so much. Last but not least was Lord Andrew Gordon, King's would-be-son-in-law, a Scotch lord who is in search of a rich wife, was ably portrayed by Mr. C. Duncan. The accent was natural and so was the actor, which gave a touch of realism to the play, and this contribution was most valuable.

The Society is to be congratulated on the huge success of their play, and if there is any criticism it is with the play and not the players. We have been informed that fully two thirds of the strong expressions were eliminated, and only those retained that were necessary to the play. Elimination and revision is not permissible and should not be made necessary in the production of any play, but if the presence of certain expressions is necessary to depict modern life and conditions, the reflection is upon society and not the playwright. We wish the society every possible success, and trust they will continue to give the people of Lachute this form of wholesome entertainment at more frequent intervals in the future.

The large audience we may say was very appreciative, which to those taking part makes acting much easier. During intervals the Brownsburg Orchestra supplied music and a pleasant hour was spent dancing after the performance.

The thanks of the Society is due to all who helped in any way to make it such a success, especially Rev. Mr. Cousens, under whose direction the play was produced. Coaching is far from being an easy job and it is largely due to his untiring efforts that the play was such a marked success.

FOR SATURDAY EVENING

"Mr. Bob"—Best selling play published. Comedy in two Acts. Robert Brown, Clerk of Benson and Benson, is sent on a secret mission to a country house. Before his arrival, another Mr. Brown shows up and becomes the victim of double mistaken identity, for he is taken not only for the clerk but also "Mr. Bob." The latter is thought to be a sweetheart of Katherine Rogers, but in reality is her best girl chum. Before clerk Brown can establish his identity he is whirled about in some funny situations. When we say "Mr. Bob" is a funny play, you don't know the half of it.

BROWNSBURG.

A very good game of Hockey was played between Hawkesbury and Brownsburg in the Brownsburg Rink, last Saturday night; the score being 4-3 in favor of the home team. A good crowd attended the match.

Mr. G. J. Thompson spent the week-end in Montreal visiting friends.

Mrs. G. J. Thompson arrived home last Sunday night, accompanied by her husband from Montreal, after spending a very enjoyable visit with her parents at Gananoque, Ont.

Mr. E. Quessel spent last week-end visiting friends in Ottawa.

Mrs. L. Hill returned to her home in Lachute, after spending some time here visiting her mother, Mrs. S. A. Wilson.

Miss N. Hanson was in Montreal over the week-end.

Mr. M. Seary was in Montreal for the week-end.

Mr. and Mrs. Quinn spent Tuesday in Montreal.

Mr. B. Davis, of Montreal, spent the week-end at his home here.

Mr. Russell Graham, of Rochester, N. Y., is home visiting his parents for a few weeks.

RAWCLIFFE

This community was grieved to hear of the death of Mr. John Lee, which occurred on March 8th. Deceased was one of the oldest and highly esteemed residents of the district. He was in his eighty-ninth year. He had been in poor health for the past year.

He leaves to mourn his loss four sons and four daughters: Thomas & James, of Stanley, Wis.; Joseph and William, of Louisiana, Alta.; Mrs. C. Roycraft and Mrs. James Kanores, of Chicago, Ill.; Mrs. Ernest Nixon and Miss Katherine Lee at home, also several grand children and great grand children.

The funeral was on March 8th, from his late residence. The service was conducted by the Rev. J. Irving.

Interment was in Scotch Road Cemetery. The sympathy of the community is extended to the bereaved family.

COUNTY COUNCIL

The regular meeting of the County Council was held in the Court House on Wednesday, March 14th, when the following Officers were elected:—Warden for 1928, Mr. A. MacL. Pridham.

County Delegates,—Councillors Seale, Staniforth and the Warden.

Auditors,—E. J. Wood and A. Bothwell.

Secretary,—J. W. Gall, with an increase in salary of \$100. per year. A resolution was passed and ordered to be sent to Premier Taschereau, urging the building of the Inter-Provincial Bridge, between Grenville & Hawkesbury.

HOCKEY

On Saturday night Laprairie Hockey Boys will meet Lachute in a friendly game. They are the South Shore Champions, so it will be a good game and likely the last of the season.

FARM FINANCING

THROUGHOUT Canada the Bank of Montreal is daily loaning funds to responsible farmers to assist them in their business.

This Bank is at all times prepared to advance loans on terms consistent with sound banking.

To Farmers --

Why not enjoy the pleasant evening concerts on the radio? What is more soothing to the mind than the wonderful charm of music, after a hard days work. You can have the pleasures as well as the city men, so just pay us a visit to our new store, and select your radio set. LOWEST OF PRICES

We are Agents for all Farming equipment, also repairs done of all kinds.

John McFaul & Son, Main St.

"Some fine day, Bill

I'll put on some life insurance and when I do I'll take it with you."

In these words last summer a young man declined to apply for an Imperial Life policy to protect his widowed mother against the contingency of his death.

Four weeks later he and a friend were drowned while bathing.

Supposing you should die suddenly—what would happen to your dependents? Would they be destined to a life of hardship? It is for you to say.

You can prevent it by means of an Imperial Home Protection policy. Let us tell you more about it? A postal will bring the information.

THE IMPERIAL LIFE Assurance Company of Canada

HEAD OFFICE - TORONTO
E. M. Jones, Agent

LACHUTE

The Imperial maintains for policyholders' protection stronger reserves than those of any other Canadian company.

"Those wheels are out of alignment!"

A wobble—a worn bearing—a badly lined-up wheel—anything that keeps tires from tracking true will rob you of mileage and make your motoring costly.

EVEN if the tread doesn't show it to your eye—our experienced tire men will usually notice the first signs of trouble. Give us the chance to save you the price of a new tire.

Wheels do get out of alignment. Catch it before it gets really bad and you will lower your tire bills and get greater tire mileage. Let our service man check up your tires every week. Let him test tire pressure and look for hidden trouble. A little care may save you a half-hour on the roadside—and knock dollars off your running costs.

DOMINION TIRE DEPOT

GEO. Y. DEACON

ST. PATRICK'S DAY

The 17th. of March, St. Patrick's Day, is also recognized as St. Simon's Day here. This year promises to be something extra for during the afternoon there will be their Tea and Sale of Home-made Cooking and Candy, while at night there will be a play entitled "Mr. Bob", as well as a presentation of Mrs. Jarley's Wax Works. Its entertaining for both young and old, so don't fail to attend. Regular admission of 50c. but special price of 35c. for children, under 12 years.

DALESVILLE BAPTIST CHURCH.

On Wednesday, March 7, a Social evening was spent, consisting of Supper and Lecture. After Supper three choruses were well rendered by the Young People of the Church. Two duets by Jean, and Ada Morrow, were given in such a way that richly deserved the sounds of applause accorded. A reading was given by Mr. Jas. Matthews and two instrumental pieces by Francis Kettyle, that revealed musical talent. This concluded the first part of the programme.
The Rev. J. Ford began his lecture at 10.10 and sat down at 11.10 and for the last 55 minutes spoke without notes, describing that greatest of all the seven material wonders of the world, from a chart on a small scale, on a blackboard, the Great Pyramid of Egypt; its divine message. He pointed out that the interior, as well as the exterior measurements, by the English inch, which is precisely the same as that used by Moses, in the Tabernacle measurements, was used nearly 6,000 years ago, which according to ancient Egyptian Literature, in the Pyramid which was built by either Seth or Enoch. And that the Chronology indicated in the Pyramid was in perfect keeping with the Chronology of the Scriptures of Truth. And to the unprejudiced student, the unescapable conviction is that the Great Pyramid is what some of the foremost engineers of the Old Land, claim it to be,—The Bible in Stone or in other words, "Revelation Measurements", and also that it measures up to Isaiah 19-19 and 20 in every particular. To illustrate the correctness of the Chronology by the measurement, it is claimed (among many others) that it foretold to the day August 4 and 5, 1914, as the day when Britain entered the Great War and the 11th. November 1918 when the Armistice was signed.
This was the first time Mr. Ford has given the Lecture and he will be pleased to answer as far as possible any enquiries on this intensely interesting subject. A voluntary offering was taken and the result was very satisfactory to the Church officials.

Most feed Value for least Money

For all general livestock feeding, Quaker Schumacher Feed is unexcelled. It is the perfected carbohydrate ration—a scientific balance of corn, oats, wheat and barley feed, together with oilcake meal, edible bone meal and calcium carbonate—minerals so vital to the health of animals, and which are usually deficient in ordinary feeds.

As a base for a dairy ration, or as the sole grain ration for young stock, dry stock, bulls, hogs or horses, Quaker Schumacher Feed is most economical.

No waste, because of the perfect balance. Low moisture content, because kiln dried. Palatable, easy digested, and quickly assimilated. Quaker Schumacher Feed provides most feed VALUE for least money. Write us for free advice on your feeding problems. The Quaker Oats Company, Peterborough, Ontario.

Quaker SCHUMACHER FEED

Also Quaker Dairy Ration, the best feed for dairy cows, and Quaker Ful-O-Pep Feeds for Poultry.

A PERFECT PEACH

Or Love Among the Ledgers

By J. P. Loughnan

She had a fascinating little nose, thought better of it, got up, bade us good-night, and went away. I seated myself beside the girl, and we both went over the open ledger. A tiny frown lined her white forehead as she stared at the rows of figures from under her curly black lashes.

"Better put a straight nose on your sevens," I advised mottly. "Otherwise they look rather like nines. This is what I mean." I laid my hand over hers and guided the pen.

"Yes, that is a plainer seven," she agreed, and gently disengaged her hand.

Well, we made quite good progress that evening with the ledger. Afterwards I asked her to dine with me. She hesitated. But when she realized that I wanted to discuss the theory of book-keeping, all was well. We dined at a quiet little restaurant I know, in the light of a pink-shaded lamp. On second thought, I postponed the book-keeping discussion.

Next morning a letter turned up from one of our clients in Derbyshire raising many important questions. I sent for Jimmy.

"Marsh," I said briskly, "you must run down and see old Bevan at once. I'll write and say you're coming. Here's his letter. You'll have to stay the night in Derby, so cut along home and pack your bag. If it should be necessary to stay away a couple of nights do so. I shall understand."

He appeared a trifle taken aback. This was the kind of job I usually liked to take on myself.

The day seemed uncommonly long, but at last came closing-time. Being now responsible for Jimmy's work, I visited the general office and saw them all out. Daphne, entrenched behind ledgers, hesitated. I pulled up a stool and joined her.

"Do you approve of new sevens?" she asked shyly.

I studied the figures with close attention. "They certainly are less like nines," I admitted. "But what about a little tilt to their noses? This is what I mean."

I laid a hand over hers and guided the pen. "But I thought you preferred straight noses, Mr. Lawton?"

"Oh, no-o-o! A tip-tilted nose for me every time!" I declared, with veiled enthusiasm, looking deep into her big blue eyes.

Down came the curly lashes, while a delicious blush swept her smooth cheeks. It was just about dinner-time when the ledgers were finally posted. We got the same table. She looked lovelier than ever under the pink lamp.

Next morning I went to the office with a feeling of relief. Jimmy would still be in Derbyshire. Then I found a letter from him to say he was returning that night. Well, this meant another dinner with Daphne, and perhaps—Could I screw up my courage? She had given me no reason to hope. But she who hesitates is lost.

That evening I entered the general office with a beating heart. The clerks shooed away their books briskly. Then I gave a gasp of dismay. The ledgers were all closed, and one of our fellows was shoving them into the strong-room. Daphne had slipped from her stool and turned towards the door. I hurried after her.

"Miss Heather, what about pouring-tuition?"

"If you please, Mr. Lawton, I particularly want to get away to-night. The blue eyes were pleading.

"By all means, Miss Heather. But I think better of it, got up, bade us good-night, and went away. I seated myself beside the girl, and we both went over the open ledger. A tiny frown lined her white forehead as she stared at the rows of figures from under her curly black lashes.

"Better put a straight nose on your sevens," I advised mottly. "Otherwise they look rather like nines. This is what I mean." I laid my hand over hers and guided the pen.

The ledgers were all closed, and one of our fellows was shoving them into the strong-room. Daphne had slipped from her stool and turned towards the door. I hurried after her.

MAURITANIA'S PROPELLER

The world's fastest ocean liner is undergoing a thorough overhauling in the floating dock at Southampton.

I say, what about the spot of dinner presently?"

"Thanks ever so much, I'm engaged to-night, Mr. Lawton. As she left the office, a horrid suspicion gripped me. Jimmy's train would reach St. Pancras at 6.45. I decided to meet him.

I reached the station just on time, and—yes, there she was! While I hesitated at the barrier the train rolled up. Jimmy jumped out and ran to her. Next moment they were in each other's arms. I dashed out of the station and took the first bus home.

Next morning Jimmy reported that the Bevan business was O.K. When he had finished I told him to send Daphne along. She came in looking as lovely as ever.

"You won't want to stay at the office much longer?" I suggested.

"Oh, yes, I do—if you'll let me!" she contradicted.

"But look here," I argued. "Marsh earns a good salary, he has a comfortable flat, and no relations to support."

"Well," she breathed. "Well, you—er—you love him, don't you?"

"Yes, of course I do!"

"Then I'm sure he won't want you to go on working here."

"But I want to, and that's enough for him. He's always been most faithfully kind ever since I can remember."

"You've known him all that time?"

"Of course! Oh, but you don't know. We thought it would be rather fun not to tell you—"

She broke off, bubbling with laughter. "You mean you've been engaged to Jimmy all along?"

"No, I mean his mother married twice."

"Well!"

"And I'm the baby of the family." I fairly leapt from my chair.

"Do you mean," I demanded, trying to keep my voice steady, "that Jimmy is your half-brother?"

She gave a demure little nod. She hadn't time for more, because next moment she was in his arms.

"You precious sweet!" I stammered. "You will not want this job!" And I kissed the tip of her dear little tilted nose.—(Answers.)

The way to get rich is to lay up part of your income and as much as possible of other people's.

Geese

Oh, swans are lovely; lovely, too, are geese

White in a greensward, dreaming on a stream.

On whose calm surface lilies they might seem.

I have seen geese in proud procession gleam

Bright as high sailing clouds, whiter than fleece

Or crested seas, white as the soft increase

Of tranquil snowfall and as filled with peace;

Their beauty is like beauty in a dream.

I have seen them, when summer's heat brings rain

In driving gusts, stand with their heads held high

Facing the downpour—O, before you die,

Would you might see them when the sun again

Shines on their dazzling whiteness, and they faint,

Impelled by some wild ecstasy, would fly.

—Charles Winks.

Labor and Immigration

Le monde Ouvrier (Ind.): From the strictly labor point of view, the immigration question can be summed up as follows: Free citizens should not be hindered from seeking to improve their condition by emigrating from one country to another, provided their transference to the other country does not constitute an economic danger to the worker of that country. It should be established with all possible accuracy what each industry can absorb in the way of additional hands without compromising existing conditions of industry. As soon as this point is passed, the balance is broken and the surplus labor becomes a menace not only to the country's workers but to the immigrant workers themselves, who are compelled by the force of circumstances to accept lower wages and are thus prevented from adopting our standard of living, becoming pariahs who cannot be assimilated.

With Mr. Coolidge positively out of the running, we make a bid for the concession of checking hats at the ringelide.

Sumernian Queen Owned Vanity Case 5000 Years Ago

Excavations at Ur by Joint Expedition of U.S. and British Explorers Discover Richest Treasures Ever Found in Tomb

Philadelphia—Queen Shub-Ad, Sumernian ruler of approximately 5,000 years ago, wore golden garters, golden ear rings, a wig, mounted by a golden ornament resembling a large Spanish comb, a heavily beaded cloak and carried her rouge in vanity cases of the period—cockle shells.

Discovery of the queen's body near that of her king was announced in a report from Leonard Woolley, director of the joint expedition of the Museum of the University of Pennsylvania and the British Museum in Ur, of the Chaldees. Mr. Woolley said the treasures found in the tomb were the richest ever unearthed in Ur.

The tomb of the queen was found abutting the king's burial vault which had been robbed of its treasures, and in the center was a burial pit containing the bodies of more than 50 men and women, the warders of the tomb. A sloping ramp led down into the pit, the report stated, and on the slope lay the bodies of six soldiers of the guard, their crushed skulls encased in copper helmets and their spears shouldered. They been killed in their places to remain as sentinels of the dead.

Part of Grave is Shambles

"The rest of the grave area was a shambles," Mr. Woolley said, "for in the narrow space were strewn 50 bodies of the dead. Along one side were men, their daggers on their hips; against the foot of the tomb lay the chief ladies of the harem, eleven of them wearing what must have been full court regalia, consisting of elaborate head dress of gold ribbon, wreaths of gold mulberry leaves hung from strings of lapis lazuli and Cornelian beads, silver pins with lapis heads and great gold earrings.

"Above the hair of each woman was a silver palm with long point ending in solid rosettes of gold, shell and lapis and beside each lay caskets containing face paint and little alabaster unguent vases."

Returned With Thanks

As he was passing beneath a ladder reaching up to the windows of a recently built house, the franchisee was struck on the head by a large piece of putty.

He seized the putty in one hand and, racing up the staircase of the house, entered the room from which it had been thrown. He was confronted by three stalwart men.

"Who threw this?" he cried, angrily.

"I did," retorted the biggest of the three. "What are ye goin' to do about it, eh?"

After a moment's sober reflection the colonel murmured: "Oh, I just thought I'd return your putty."

"Could I see the captain of this ship?" "He's forward, miss." "I'm not afraid. I'm used to men."

Medical science, we read, is still hunting for the cold germ, hoping, we presume, if it is found, to make things hot for it.

Society pays for its sins. It once made Willie speak pieces on Friday afternoon, and now it must listen to his after-dinner speeches.

Strange Uses For the Airplane

Passing strange are some of the uses to which the airplane is now being put in certain far corners of the world, we read in an Associated Press dispatch from Croydon, England, that great aviation center in Great Britain. Of course we are familiar with the use of airplanes for destroying deleterious insects by scattering clouds of poison, and with the use of the airplane in mapping localities otherwise difficult of access. It is more surprising to hear that—

In Formosa, airplanes have played the part of messengers from the gods. Head-hunters were in the habit of ambushing lumbermen in the jungles. Having first circulated a report that stupendous bird creatures of Formosa mythology were soon to be dispatched by the gods as a warning, the Japanese Governor-General sent a pair of such celestial birds over the haunts of the head-hunters. They dropped a nest of explosive eggs—and the head-hunters are now as quiet as a dud shell.

When the gulf of Finland froze over and the sailors on thirty-eight ships locked fast in the ice seemed in danger of starving, Finnish army airplanes carried food to the beleaguered craft.

Airplanes work with whalers in the North Pacific in discovering the leviathans of the deep. Norse fishermen off Stavanger use the airplane for "spotting" shoals.

The forests of Alsace-Lorraine are sprayed from the air to kill plagues of caterpillars. In woods, near Berlin, poison-gas bombs have been dropped from airplanes for the same purpose. In south Russia airplanes scouted for hosts of locusts. One such host was found five miles long by three miles wide. Troops made all human beings and cattle evacuate the territory, and the aircraft then flew at night over the locusts, spraying them with poison gas.

The seaplane of the Dutch-American party which explored Western New Guinea was of great use, particularly in overhauling the fierce Papuan tribesmen. The tribesmen on being asked if they had seen the plane ran up and down in great glee, with arms out stretched, as if playing at a child's game.

Hydroplanes are surveying topographically the Great Barrier Reef off Australia. The same method is being used to survey the great jungle of Borneo and the delta of the Irrawadi in Burma.

In Eastern Siberia the Russians have been using airplanes to connect their remotely situated gold-fields in the Aldan territory. The planes carry the gold in five hours, whereas formerly the journey by horse, through almost impenetrable forests, required thirty-five days.

Like the "Pidgy"

Londoners Help Pigeons Escape City's Pied Piper at St. Paul's

London.—While London disapproves and bystanders do all they can to hinder the work of the city's official Pied Piper, some 2,000 pigeons of St. Paul's are finding their way into pigeon pies.

The London City Corporation having decreed that 2,000 of the pigeons which cluster before the steps and pillars of St. Paul's as an item of every tourist's London program must go, it became the duty of one Dalton, the city's rat-catcher, to trap them.

He first built a wire cage measuring 14 by 6 feet and provided himself with corps of "expert trappers."

His first day, however, was like the first bag of a hunter with a bent shotgun. He caught, all told, twelve. The crowd that gathered was wholeheartedly on the side of the pigeons. They fed the pigeons so that the grain trails which led into the trap would not allure them. And they engineered noises and movements to scare the pigeons away from the trap.

Trapper Dalton thereupon resorted to subterfuge. First, he came back early Sunday morning while most people were asleep. Secondly, his assistants had for hours the night before been sweeping away the crumbs and bread which good-hearted people had strewn before the pigeons. Thirdly, the assistants stood in such a way as to hide the standards of the cage from the birds. He netted 250 birds in one catch.

The pigeons are being sold to a poultry dealer.

Windfall.

An honest speeder had just hit a dog and had returned to settle his damages, if possible. He looked at the dog a moment and addressed the man with a gun.

"Looks as if I'd killed yer dog."

"Certainly looks that way."

"Very valuable dog?"

"Not very."

"Will five dollars be enough?"

"Well—I guess so."

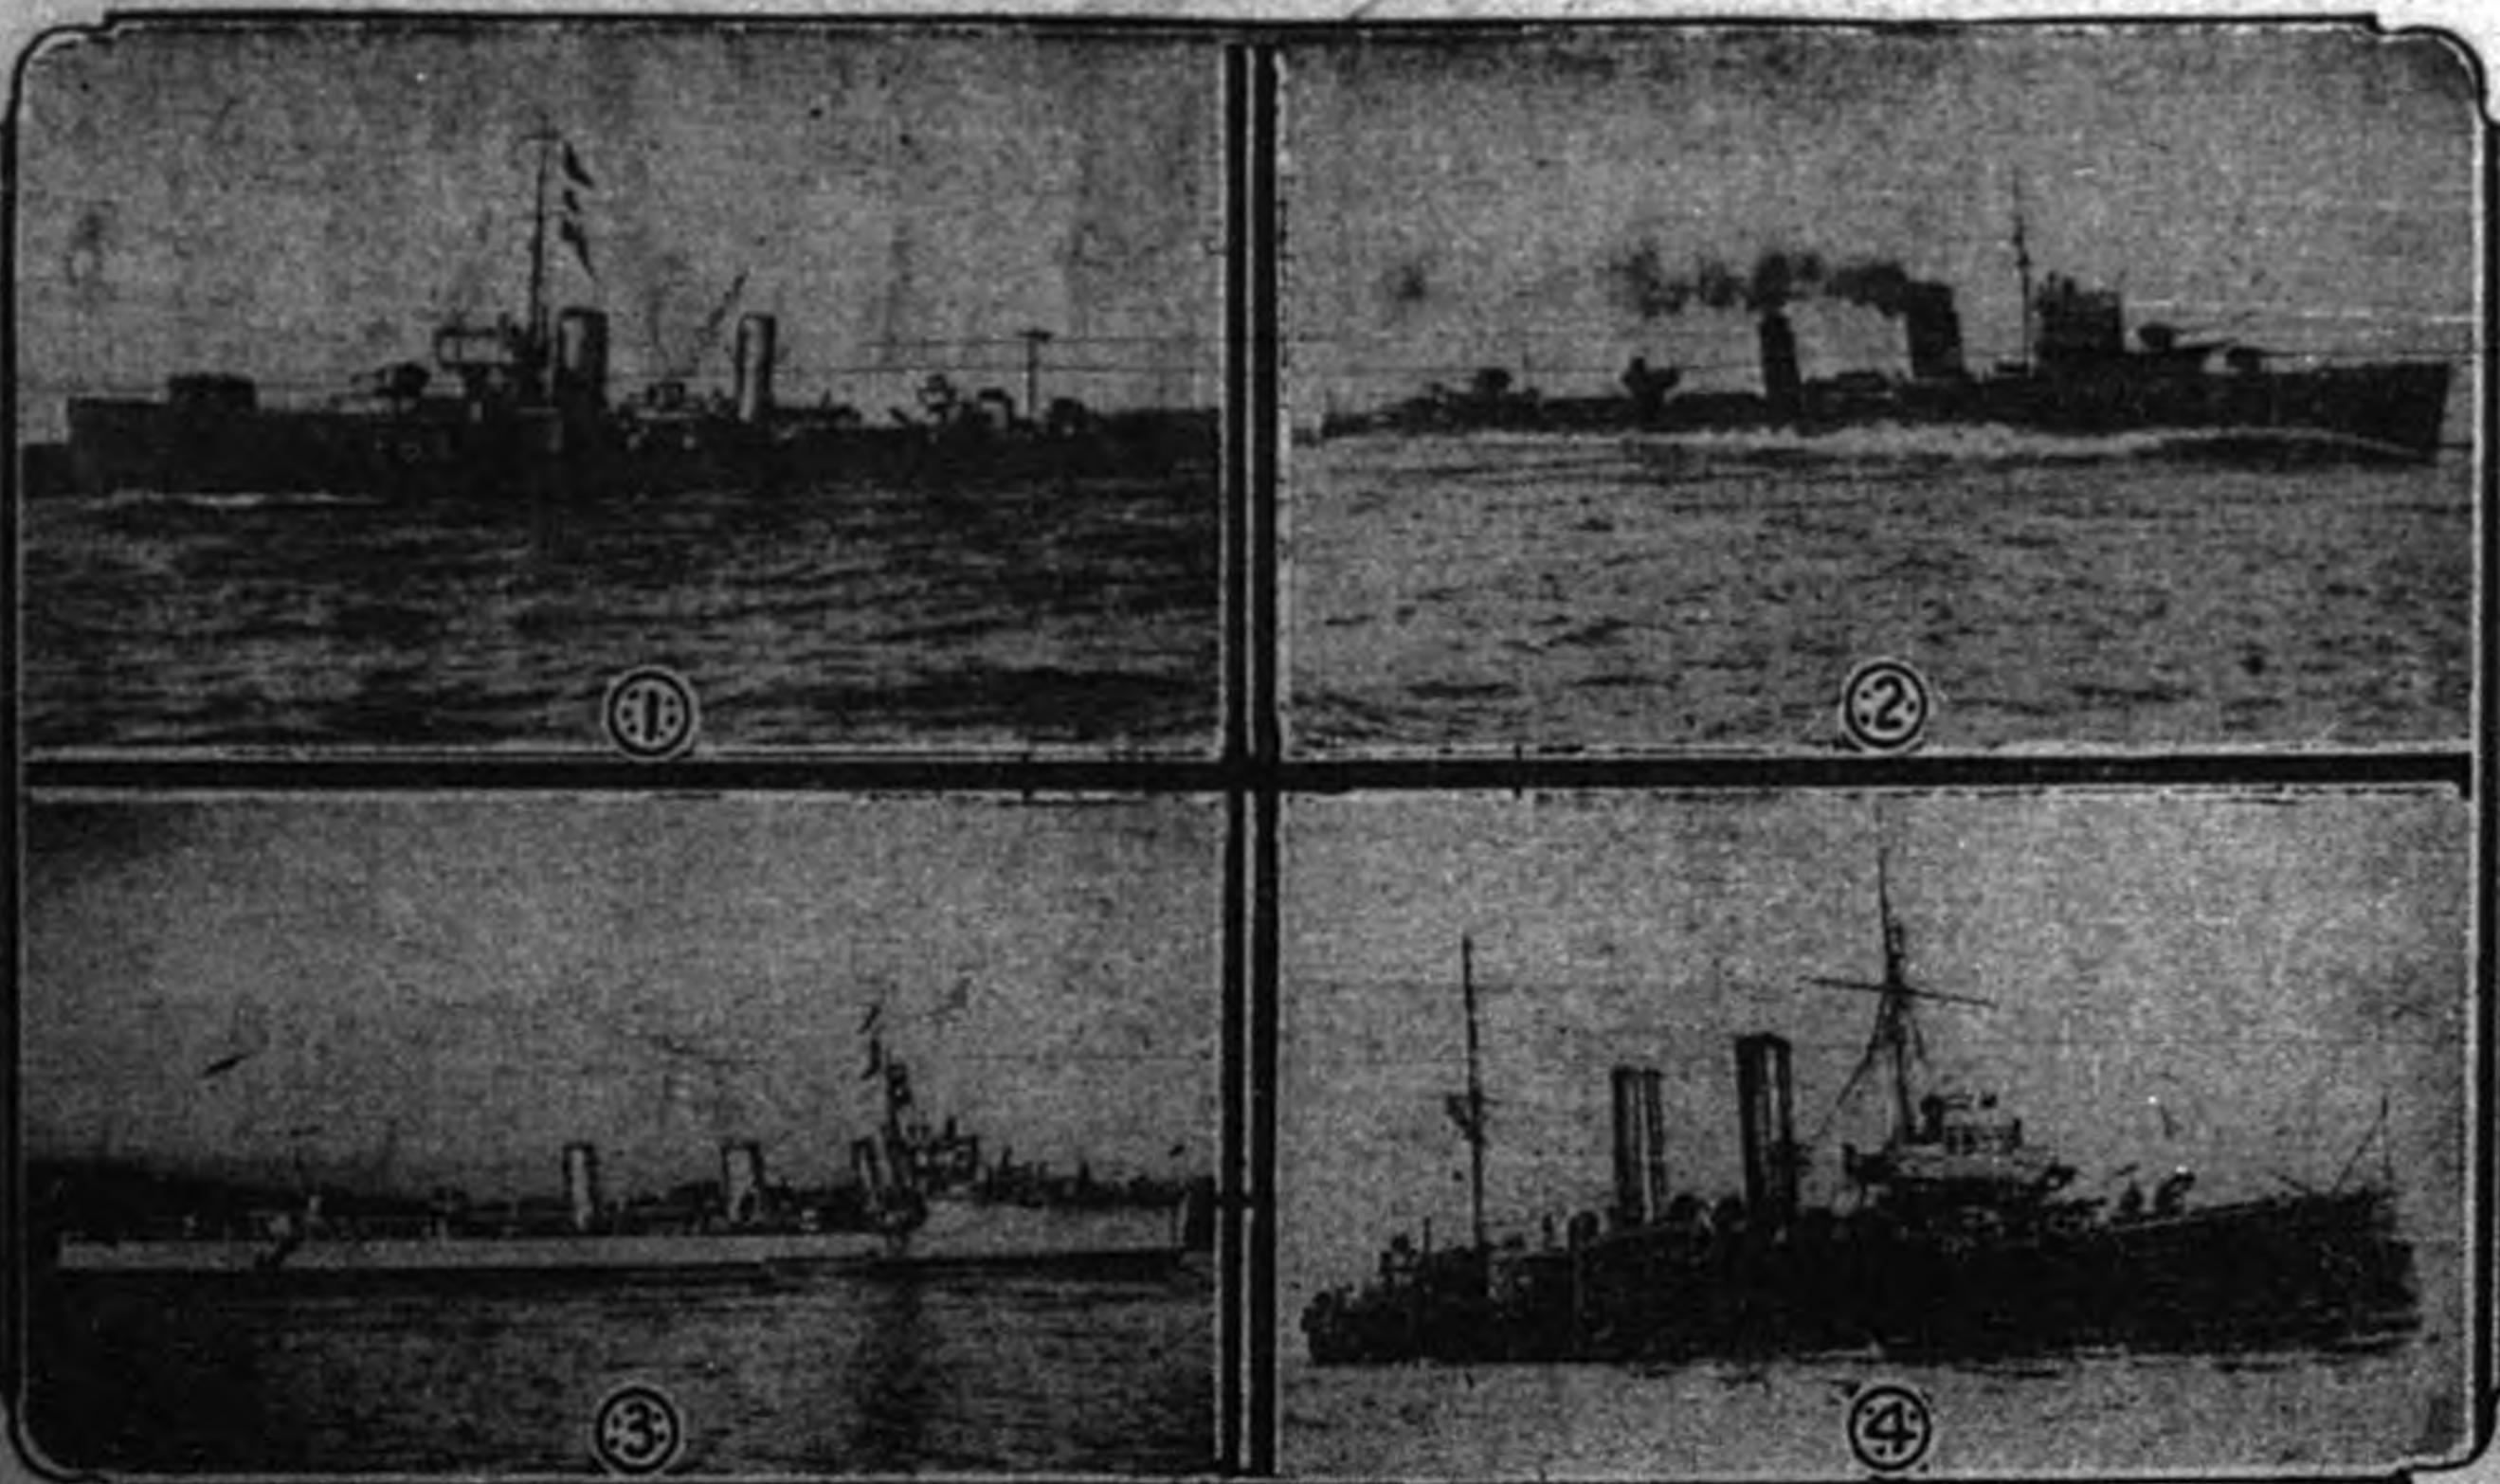

"Sorry to have broken up your hunt," said the motorist pleasantly as he handed the owner a crisp five-dollar bill.

"I wasn't going hunting—just going out in the woods to shoot the dog."

"Motor War on Hand."—Head-line. But that doesn't make it any safer for those on foot.

The rumble seat of a coupe is better than the grumble seat of a limousine.

Replacing Canada's Navy

PATRICIAN AND PATRIOT GO TO THE WRECKERS AS OBSOLETE

With obsolete vessels being scrapped and replaced, Canada's navy is being brought up to date. The first picture in the ABOVE layout shows H.M.S. Vancouver, one of a pair of destroyers which are being loaned to Canada for the time, between the scrapping of old vessels and the building of new ones. The other destroyer of the pair is the Champlain. They were formerly the Tormentor and the Torbay. Picture No. 2 shows the new British destroyer Amazon, a type which is being suggested as possible for Canada's replacements. A destroyer of this type takes 21 months to build, and is of more complicated construction than the battleships. No. 3 shows a Canadian destroyer which is now meeting the ungrateful fate of age, H.M.C.S. Patrician, called after Canada's royal princess, this gallant vessel has outlived its usefulness and is now being stripped of guns and equipment to be sold as junk. A similar fate has overtaken the destroyer Patriot. No. 4 shows the light cruiser Rainbow, Canada's first naval unit.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed to Keep Up Their Vitality.

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular out-of-doors exercise. But a lack of appetite, and tired, aching limbs tend to hinder progress. To have the weak, thin-blooded sufferer, she must have new, rich blood, and nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and improve the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus bringing new health and strength and transforming anemic girls and women into cheerful, happy people.

The value of Dr. Williams' Pink Pills in the case of anemic girls is proved by the case of Miss Lucy Stoddart, Margareville, N.S., who says: "From the age of 12 to 15, I was in an anemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doings of those of my age. My mother got me after tonic for me, but they did me very little good. Then Dr. Williams' Pink Pills were recommended and almost from the first they seemed to be just what was needed to restore my strength. After taking the pills for a time I felt an altogether different girl. I got up in the morning feeling bright and active, and ready for work or play. Since then I have always taken a couple of boxes of Dr. Williams' Pink Pills in the spring as a tonic and have thus kept in the best of condition."

Every weak girl should promptly follow the example of Miss Stoddart, feeling sure that the pills will renew her health. You can get the pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Prince Meets Boys

Tells London Club He Likes Detective Stories

London.—The Prince of Wales likes nothing better to read than a good adventure story. He so informed a boy ingressed in such literature in the library of a Roman Catholic club in East London recently.

The Prince made one of his incognito excursions into the East Side Laborite districts, visiting two Catholic clubs for boys. His advent was not known except to Father Rawlinson, who conducted the Prince on his tour.

The presence of the Prince only leaked out gradually to the youngsters, many of whom were skeptical at first. When he talked with several of the boys and they compared him mentally with his pictures the conviction grew that it really was the Prince.

The Prince toured the library, asking many of the youngsters what they were reading and exchanging views on books with them. He watched football played on the roof of one of the clubs by electric light. He also saw several boxing bouts and heartily applauded the young pugilists.

The Prince departed to the enthusiastic cheers of the boys, most of whom are the sons of dock laborers.

Toilers of the Deep

Quebec Evening News (Cons.). (The Government are taking steps to improve the lot of the fishermen.) We have many fishing colonies on the coasts of the Gulf of St. Lawrence and on the banks of some of its tributaries. The Federal Government are interesting themselves in their grievances, and the Government of the Province of Quebec are doing something to make their strenuous calling more profitable. But nothing is so precarious or uncertain as the income of a fisherman. There are years when fish are scarce, and other years when they fetch too small a price. Every winter one hears that, in this or that part of the Gaspé Peninsula, the fishermen are in dire distress.

Conciliatory is a public proclamation of the poverty of one's personal relations.

OWL-LAFFS

And this is what we'd like to be: Good and kind and neighborly. Big of heart and broad of mind. Glad with every joy we find. Friendly as we go our way. Generous handed day by day. Keeping though we rise or fall The love and good esteem of all.

He—"Are you cold?" She—"Bout to freeze." He—"Want my coat?" She—"If you please." He—"Want it full?" She—"Just the sleeves."

"It's been a hard grind," sighed the mechanic as he replaced the valves.

"Daddy, mother is a wicked woman. She burned the Bible this morning." "Never mind. We can get another Bible, but there was only one record in existence that said your mother was born in 1888."

Kissing, according to scientists, is unknown among the savage tribes. And some day we are going to figure out whether this constitutes an argument against kissing or in favor of it.

Higher Mathematics. Auto—Autonomy—Autopsy.

The girl in the movie ticket office said that the usher in the theatre is the leading man.

Freedom of the Sea. Girls, when they went out to swim, Once dressed like Mother Hubbard; Now they have a bolder whim: They dress more like her cupboard.

The best way to outlaw war would be to hang the outlaws who cause it.

The modern idea in fashion, so far as we have been able to observe, seems to show everything but the brains.

The dominating personality doesn't help much, if the other fellow is driving a truck.

To-day's unfinished task is a mortgage on to-morrow.

Funniest situation is when you are asked for advice, then argued with about it.

It takes a bride an hour to sew a button on a coat and a year later it takes her six months.

Politicians live off the fathead of the land—and everybody else too!

The choir isn't to blame for all the discord in the church.

THE REVERSE OF THE MEDAL

Chicoutimi Progress du Saguenay (Ind.). (It is denied that the big industrial development of the Lake St. John region has actually brought wealth to the inhabitants.) Doubtless vast and admirable works have been carried out; doubtless immense sums have been spent in the locality; doubtless it would be foolish to pretend that ten thousand is not more than a hundred. But if there is a hundred to share up and only ten people, every one gets ten; but if, on the other hand, there is ten thousand to divide and there are ten thousand people, there is only one apiece.

A taxi-driver provides fresh flowers, cigarettes, a box of matches and an ash-tray in his cab. The latest form of cab array.

Husky Twice Saves Master's Life

"Mountie," leader of the Chateau Frontenac dog-team, has many friends, but none who watch his career with more interest than Sergeant William Grennon of the Royal Canadian Mounted Police. The Sergeant, who is sixfoot-three and the crack marksman of the force, tells, with tears of pride in his eyes, how "Mountie," whom he raised from a pup, saved his life on two occasions. An early freeze in the North Country. The team with "Mountie" in the lead crossing Sturgeon Lake. Then the realization that the ice was cracking and bending and the knowledge that it was too thin to allow the sleigh and driver to stand still long enough to turn. There was no retracing, they must go on. "Mountie" waited for no word of command. He lead the team on; on at a breakneck speed across an expanse of seven miles, with death facing them at every step, and reaching the opposite shore in safety.

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine for Nervous, Sleepless Children.

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children. "Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Why Prince of Wales Was Named David

London.—Most of us know the Prince of Wales is called "David" by his relatives and never "Eddie," there will be some interest in the Dowager Lady Radnor's claim in her newly published book of reminiscences that it was she who suggested this name. Lady Radnor believes the Britons are descended from the ten lost tribes and the royal family from King David, the chap who slew Goliath. She sent a message to the Queen, then Duchess of York, asking that if a son was born to her he should be called David. The Duchess liked the name, but "wondered what reason she could give" for calling her son by it. Lady Radnor suggested that it could be included among the other names of the four patron saints of these islands and that, she writes, "is how the Prince of Wales came by the name of David."

When They Were 26

The great Alexander had overthrown the Persian Empire. Washington led the advance guard of the British army toward Fort Duquesne. Napoleon was second in command to Barras. Franklin started "Poor Richard's Almanac." Fox had been First Lord in both the Admiralty and the Treasury. Gladstone was a junior Lord of the Treasury. Byron was writing "Childe Harold." Macaulay had published his essay on Milton. Delane was editor of the London Times. Emmet was in a grave without an epitaph.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said, it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at these times."—Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, or constipation, or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Making Winter Popular

A few years ago Canadians were inclined to be apologetic concerning their winter climate and to resent public mention of its seasonal peculiarities—as Kipling learned when he wrote about "Our Lady of the Snows." Now it is all different. We have learned to capitalize our Winters and the publicity agencies tell the world in words and pictures about the beauties of the ski trails and the invigorating and beneficial influences of zero temperatures.

This is more than merely making the best of an inevitable situation. Canadians themselves have been sold on their own Winters and out of the fulness of personal experience they recommend them to those of softer climates. Ottawa, for instance, takes to its skis with the first snowfall, and on afternoons and week-ends the wooded hills and open spaces in the vicinity are dotted with thousands of the young and middle aged venturing their skill on the precarious runners against the forces of gravity and the perils of hidden stumps. Summer to them is but an inconvenient interval between skiing seasons.

Canada and the Empire

Toronto Globe (Lib.). The "new status" question is entitled to a rest. Canada has done well in the last sixty years, as was made plain during Diamond Jubilee year. Her progress has been remarkable, whatever has been her status, and to continue this progress along broad lines and on a solid foundation should be the chief objective of Parliament. If it is the desire to help the Empire by making this country a strong component part, with the Imperial ties becoming firmer each year—as they should—attention ought to be directed to that end instead of to the texture of her bonds. Canada is of the Empire in fact and in sympathies.

The Falls of Niagara are reported to be wearing out. There will of course be somebody to charge that they were not built right in the first place.

De Valera wants to start a newspaper. The Irish always were glutted for punishment.—New York Evening Post.

ASTHMA Successfully Relieved

Use Dr. Gull's Green Mountain Asthma Compound. Originated by Dr. J. H. Gull, specialist in respiratory affections. Quickly relieves the distressing symptoms that cause suffering and loss of sleep. Two sizes, \$1.50 and \$5.00. Also cigarettes (box of 24, 60c), at your druggist or sent direct postpaid for cash. FREE TRIAL box (6 cigarettes), with authoritative treatise on causes and treatment sent on request.

J. H. GULL CO., Rupert, Vt., U.S.A. Dept. 22. Distrib. for Can.: Lyman's Ltd., 344 St. Paul St. W., Montreal.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any druggist—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin is a Bayer manufacture, so aware the public has become, the Tablets will be stamped with their "Bayer Cross" trademark.

REVISED STATUTES PROVINCE OF QUEBEC CHAPTER 46 — SECTION 7.

Public Notice is hereby given, in Accordance with Section 7, of the Watercourse Act, that the Gatineau Power Company, a corporation organized under the Quebec Companies Act, with its principal place of business in the City of Ottawa, Province of Ontario, intends to apply for authorization to construct dams, power house and other necessary works of development of its water power at "Chate au Pateau" near Ste. Adele, Quebec. The said works to be built in and along the North River, East Branch, in front of lots 1 and 2, of the 5th Range, and 1-B, 2-A, 2-B, 3, 4, 5, 6, and 7, Range 4 of the Township of Wexford and lots 22 and 23 range 10, Township of Abercrombie, in the County of Terrebonne.

Notice is also given that a petition to that effect accompanied by plans and specifications of such works showing the site chosen for the construction thereof and the lands affected by the backing up of the water has been forwarded to the Minister of Lands and Forests and that a duplicate of the said plans and specifications has been deposited in the Registry Office of the Registration bureau of the County of Terrebonne, at St. Jerome, Quebec.

The application contained in the petition will be taken into consideration on or after the day following the date of the last publication of this notice in the Quebec Official Gazette.

GATINEAU POWER COMPANY
(Signed) G. GORDON GALE,
Vice-President & General Manager
March 16-5.

THE NAVIGABLE WATERS PROTECTION ACT. R. S. C. Chapter 115.

The Gatineau Power Company hereby gives notice that it has under Section 7 of the said Act, deposited with the Minister of Public Works at Ottawa, and in the office of the District Registrar of the Land Registry, District of Terrebonne, St. Jerome, Quebec, a description of the site and the plans of dam and intake for a hydro electric plant proposed to be built on the North River, East branch near Ste. Adele, Quebec, in front of Lots 1 and 2 of the 5th Range, and 1-B, 2-A, 2-B, 3, 4, 5, 6, and 7 of the 4th Range in the Township of Wexford and Lots 22 and 23 Range 10, township of Abercrombie, in the County of Terrebonne.

And take notice that after the expiration of one month from the first publication of this notice, the Gatineau Power Company will, under Section 7 of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa, for approval of the said site and for leave to construct the said dam and power house.

GATINEAU POWER COMPANY
(Signed) G. GORDON GALE
Vice-President & General Manager.

Dated at Ottawa the 13th day of February, 1928.
March 16-5.

CUSHING.

Mrs. R. Pinkerton left on Wednesday to spend a few days in Montreal, accompanied by her daughter, Mrs. Jas. Harcourt, of New Glasgow, who was her guest the early part of this week.

We regret to report the illness of our aged and respected fellow citizen Mr. Richard Hooper, who is at present in a rather serious condition.

Mrs. R. Funcheon of Monalea, spent last week with her brother, Mr. E. Whelehan.

Mr. D. G. Greig, of Montreal, spent last week-end with his family at Greece's Point.

Mrs. R. D. Hartley and little son Kenneth, of Montreal, is at present the guest of her aunt, Miss Whelehan.

Mr. Romeo Noel, formerly operator at Cushing Jet, was in this vicinity recently, for the purpose of removing some of his household effects to a station in the Transcontinental Ry. in the vicinity of La Tuque, to which he has been appointed.

Miss Whelehan arrived home on Monday evening from Concord, N. H., for which place she left on Feb. 27th, accompanied by her sister, Mrs. R. Funcheon, of Monalea, and Mr. S. Whelehan, of Montreal, to attend the funeral of their niece the late Miss Mary Hart, whose death occurred at her home in Concord, on Feb. 26th.

COMING EVENTS

DANCE

On Thursday, April 5th., there is to be a Dance given by the Fire Brigade, to be held in the Auditorium. There will be an orchestra in attendance, and the usual good time can be looked for.

BOUND FOR SCOTLAND

Quebec Party Will Purchase Choice Ayrshire Cattle

On their way over to Scotland to purchase 70 head of choice Ayrshire cattle, J. H. Black, of Lachute, Que., president, of the Canadian Ayrshire Breeders' Association; Gilbert McMillan, of Huntingdon, Que., and William Greenshields, of Sennerville, Que., were passengers on "The Ocean Limited", of the Canadian National Railways over the week-end, bound for Halifax where they will embark on the Anchor-Donaldson liner "Athens". While in Scotland, the Canadians will be the guests of A. W. Montgomery, at his beautiful estate "Lesessnock," at Ochiltree. Mr. Montgomery is known as one of the foremost breeders and exporters of Ayrshires in the world, and will be remembered by many Canadians as being the first Scottish judge of this world-famous breed of cattle at the Royal Winter Fair at Toronto, in 1925.

The members of the Canadian party are all well-known importers and breeders of Ayrshires. Gilbert McMillan, of Huntingdon, has been closely associated with the famous Golden Loves strain and the noted sire Lesessnock Gold Love, whose blood is prominent in the winning animals of most of the large Ayrshire exhibits. Mr. Greenshields is the manager of the Waldo Skinner farm at Sennerville, and has won many of the prizes at the 1927 Royal Winter Fair at Toronto.

The party expect to return to Canada in April, having planned to arrive at Quebec on the first sailing of the coming season to that port.

BROWNSBURG.

Mrs. W. J. Fletcher spent the early part of this week in Montreal.

Miss Grace MacKiddie of Montreal, spent the week-end with her parents.

Mr. E. Zimmers, of Montreal, was home over the week-end.

Miss Pearl Ayers entertained a number of friends at a Bridge on Sunday last. A silver cup was presented to Miss Antonia Charlebois for winning the highest score during the winter months.

Mr. John Cunningham was in Montreal, the early part of this week, attending the funeral of his brother-in-law, Mr. John McPherson who passed away in the Royal Victoria Hospital, on Friday, March 16th.

The Chatham Women's Institute are holding a Pie Supper in the United Church Hall, Brownsburg, on Saturday, March 24th. A good program will be provided. Doors open at 7.30. Supper served at 8 p.m. Admission 35c. Come and have a good time.

We are pleased to note that a sub-agency for the distribution of Auto Licenses is to be placed in Lachute. This will mean extra business for our growing town and although the appointment of manager has not officially been made we understand that Mr. P. Chabot will be in charge.

Congratulations are extended to Mr. and Mrs. Robt. McArthur, who celebrated their 43rd. Anniversary on Saturday last. Both are in excellent health and we hope will be spared to enjoy many more of such occasions.

Mr. and Mrs. Lorne McArthur and two children, of Ottawa, were in town for the event.

ST. SIMEON'S CHURCH HOLD SUCCESSFUL TEA AND CONCERT

On Saturday afternoon last the Ladies' Guild of St. Simeon's Church held their Annual Tea in the Lachute Auditorium, which, combined with a Concert in the evening gave them proceeds to the amount of \$335. The Tea and Sale which has now become an annual event was greatly enjoyed by all, both from a social standpoint and from being able to procure home made cooking and candy.

The concert in the evening also proved a great success and consisted of two parts.

The first was a representation of Mrs. Jarley's Wax Works the characters of which were taken very well, each one figuratively being wound up and going through actions suitable to the character.

To stand in one position for almost 40 minutes without moving, representative of a Wax Figure, is no easy proposition and those who took part are certainly to be congratulated on the able manner in which each character was portrayed. Miss Ethel Morrison as Mrs. Jarley, gave a age and played her part, which entailed considerably memory work, very well. The Attendants Messrs. Yelland and Gorman looked quite smart in their uniforms and were right on their toes in winding up the statues and placing them in their proper positions. This presentation was under the direction of Miss M. Prime, Miss K. Barron and Miss E. Hampton, who deserve great credit for the way in which it was produced.

The second part of the program consisted of a Two Act Comedy entitled "Mr. Bob." This was under the direction of Mrs. Geo. Y. Deacon and was very ably rendered. Act I opened in the home of Miss Rebecca (Miss J. Valpy) who as a maidenly old Aunt was very fond of cats. A Mr. Brown clerk of Benson & Benson (Mr. E. Boyd) arrives on the scene and is mistaken for several other personages never getting a chance to explain who he really is. Katharine Rogers (Miss R. Rodgers), a niece of Miss Rebecca expects a visitor Marion Bryant (Miss J. Cockerline) whom she calls Bob. This is of course quite confusing to her cousin Philip Royson (Mr. Geo. Leggett) and from start to finish there is a general misunderstanding as to "Who's Who." The maid Patty (Mrs. Geo. Leggett) with the Butler Jenkins (Mr. Alfred Miller) are both keen on theatricals, hoping some day to go on the stage and during their practices create some very amusing incidents. The maid and butler parts might be considered by some as minor roles but in this play its success was largely due to the effective manner in which Mrs. Geo. Leggett and Mr. Alfred Miller acted their parts.

OBITUARY

THE LATE HERMAN BIGELOW

Herman Bigelow, son of Mr. and Mrs. Eliza Bigelow, died here on Sunday evening, March 11th, age 13 years.

The little fellow was sick about two weeks with peritonitis and although everything possible was done by doctors and loving parents, the little fellow grew worse until the end came. "And he was not, for God took him."

The funeral was held on Wednesday, the Rev. F. Jobb officiating.

Beautiful flowers covered the casket among which was a spray from his Sunday School Class-mates, among whom Herman was a general favorite. Our deepest sympathy is extended to the bereaved parents, sister and brothers.

ENGAGEMENT

The engagement is announced of Ruby Isabel, youngest daughter of Mrs. W. Nicholls, of Montreal, to Mr. Theodore George Murdoch, eldest son of Mr. and Mrs. James Murdoch of Brownsburg. The marriage will take place quietly in April.

Mr. and Mrs. Harbort Kettyle announce the marriage of their younger daughter, Hazel A., to Mr. Reginald L. Tipping, of Oshawa, Ont., son of Mr. and Mrs. Geo. Tipping, Coldwater, Ont., to take place on Monday, March 26th., at St. Alban's Cathedral Chapel, Toronto.

DEATH

BIGELOW—At Calumet, on Sunday, March 11th, 1928, (twin son of Mr. and Mrs. W. E. Bigelow, aged 13 years and 5 months.

CARD OF THANKS

Mr. and Mrs. W. E. Bigelow, of Calumet, wish to thank all kind neighbors and friends for kindnesses and floral offerings extended to them during their recent sad bereavement.

IN MEMORIAM.

TODD.—In loving memory of dear Lizzie, who passed away, March 27th, 1922. "Time passes" but fond memories linger with Father, Mother, Sisters and Brother.

"SALADA" GREEN TEA

The LAND OF FORGOTTEN MEN by Edison Marshall

BEGIN HERE TODAY.

Peter Newhall, Augusta, Ga., flees to Alaska, after being told by Ivan Ishmin, Russian violinist, he had drowned Paul Sarichef, Ishmin's secretary. He joins Big Chris Larson in response to a distress signal at sea, giving Larson his sea jacket. Their launch hits rocks. Larson's body is buried as Newhall's. Peter, rescued, finds injuries have completely changed his appearance.

Dorothy and Ishmin go to Alaska, to return Peter's body. They do not recognize Peter in their head guide. A storm strands them at the grave. Ishmin goes for supplies. Peter falls in a gully on a hunting trip. Dorothy finds her greatest happiness in rescuing him.

NOW GO ON WITH THE STORY.

She knew now why, even from the first hour, the grim adventure on this shore had been thrilling to her. She knew why she had befriended Pete against Ivan, why his companionship had been so dear and his protection so comforting; and she understood why her whole world had passed into darkness when she had seen him fall. The first caribou hunt, on her first day in the hills, had given her what had hitherto been an almost-forgotten joy; and every day since that joy had increased. Even from the first hour he had called to her, and she had answered. Evidently this love—and it could be nothing else but love—had been predestined, a thing of the instincts that all the barriers of caste and circumstance could not restrain. But it must never, never be. Only tragedy lay that way, and she had had enough of tragedy. She looked at the matter calmly; and she knew her only possible course.

The barrier between her and the guide was wholly impassable; and it must be forgotten like a vain dream. He was an exile in the North; she was of exile. He was of the storm and the windy shore, the desolation and the solitude; and she was of warmth and laughter and beauty. He was of another plane and caste, and never the two could meet. Besides, she had gone too far with Ivan to turn away from him. She had given him her promise.

She knew her course. In a few more days she and the man who loved her would launch their boat and row away; and Pete would be left on the desolate shore. They would never cross trails again. Slowly these strange, rapturous memories that already seemed like dreams instead of the living events of the hours just gone would pale and die, just as many of the memories of Peter had paled and died; his rugged, homely, yet ever-familiar face would fade in her remembrance; and the drama in the wilderness would be dimmed by the mists of the past. She would take up her old gayeties, and she would live for Ivan. In time the poignant pain would pass away, and she would find the normal contentment of marriage.

As soon as the Russian returned would remove all danger by putting herself forever out of Peter's reach. Thus she would defeat her wilful heart, check the enigmatic destiny that had festered with her so long, and

perhaps find a humble share of human happiness.

CHAPTER XVI.

IVAN SUCCEEDS.

Just before noon of the following day Pete—who was resting beside the camp fire—made out a moving speck on the distant, inland hills; and close scrutiny proved it to be Ivan, returning from his quest. In half an hour he would be at camp and Dorothy in his arms.

Pete understood perfectly the full significance of this return. It marked, indeed, the turning point in his own great adventure; his personal watch of the girl would be over, and a few hours thereafter she would sail away. The one joy that was left him was to carry the good news to Dorothy and to watch the dear, remembered kindling of her luminous eyes. He made his way quietly to her tent.

"Mr. Ishmin is returning," he told her simply, still in the character of Pete the guide. "He's in plain sight already."

The girl's lips parted, but her face did not at once flush with pleasure. Yet her expression showed instant, unmistakable relief. It was all that was needed to convince Pete that the girl had found her happiness; and he was persuaded that her tenderness yesterday, after she had brought him home, was merely an instinctive reaction—an echo of her almost-forgotten love for Peter Newhall—of which her consciousness made no interpretation. The girl looked breathlessly into

"Was the trip across a success?" she asked.

Pete's haggard face. Fortunately he did not guess the full truth: that her genuine relief was not at having her lover come again, but only because it permitted her to escape from her own doubts and fears.

She left the camp and trudged up the hill to meet Ivan. He waved to her, a motion brimming with vitality and spirit; and he was graceful as a caribou as he hastened to join her. Evidently the hard trip had left him unscathed. He was slightly more brown, perhaps, not quite so well groomed if for no other reason than he had left his shaving kit in camp, but there was no visible trace of fatigue in his dark, handsome face; no change in his easy, graceful carriage.

He held the girl close, and she felt the steel of his muscles. There was a world of reassurance here. When she returned to her native city, Ivan at her side, when all the witchery of this savage land had paled into dreams, she had every chance to find a full share of happiness in these strong arms.

"Was the trip a success?" she asked, radiant from his kiss.

"Do you think I'd come back if it weren't? I had the best kind of luck. I didn't even get clear to the Pacific shore. A few miles this side I ran into a squaw, laying out a trap line. I got her to go back to her cabin on the coast and get a load of supplies for us, and bring it over as fast as she can—hard bread and canned goods and things we can use on the trip.

She may get here tonight—she's certain to make it in by tomorrow morning. Then we can take the dory and start out—back to God's country."

"You started back as soon as you'd made arrangements with her?"

"Yes. There was no use to go on. She could bring all the grub she could spare without my help. Besides—I couldn't bear to be away from you any longer."

They walked arm-in-arm down to the camp, and Pavlov glowed at his sister's greeting. "You've been comfortable?" he asked the girl.

"Perfectly. Pete has taken the best possible care of me."

"I'm glad to hear it. We'll add something fancy to his cheque when we pay him off." He followed Dorothy into her tent, and after she had told him of Pete's accident, he caught her yielding hands. "Dear, I've come back successful, and now I've got something to ask. It's the biggest thing in the world, but it's for your happiness as well as mine."

The girl tried to meet his vivid, magnetic eyes. By a supreme effort she shut from her mind the whisper of fear and the last lingering doubt, and opened her heart to his pleading.

"I don't think I can refuse you anything now," she told him.

The slanting eyes glowed like great jewels in the eye sockets of a heathen idol. "We'll be starting to-morrow," he went on. "You and I and the two natives—Pete, I understand, is going to stay here and winter on the mainland. Dear, we have a long, difficult trip before us. We will be tied up at various places on account of bad weather, we will have to fight storms and rough seas—it will be cold, tough, severe experience the best we can do. Besides that, it's really dangerous."

"But why think of the danger? There isn't any other course open."

"That's just it—there isn't any other course. We can't stay here much longer; winter is likely to break any day. We can't wait any longer for the Warrior to return. But I've got a special reason for pointing out the dangers—dangers that only a fool would deny. It's wholly possible, Dorothy, that the trip will actually put an end to us. There will be constant danger of sudden storms—of being wrecked and lost on the reefs. It's a perilous trip, at best."

"It's best, on a trip like that, that I should be able to look after you and be responsible for you in a much greater degree than I have on this trip. But the main thing is—that if we are to go down to our deaths in the next few days, we want to find the greatest possible happiness first. I know a way that we can be sure of at least a few hours of perfect happiness—that death can never cheat us out of."

"Be merry," she quoted quietly, "for tomorrow we may die!"

"That is the philosophy—the only possible philosophy. Not only to be merry, but to take all that life offers—and not let foolish conventionalities or propriety stand in the way. Dorothy, we love each other. We belong to each other. And there is no reason on earth why we should be kept apart any more."

"Pavlov is a native priest, as you already know. The marriages he performs are legal in all this end of the world. A marriage performed when a license is not procurable stands forever just the same, and all the legal end of it could be straightened up when we get to Seward. As for conventionalities—it is much more conventional to take that trip as my wife, even taking into consideration the character of the wedding service and everything else, than to go unchaperoned with three men. Ordinarily I would prefer to be married in old St. Paul's, as we have often talked of—with the flowers, and the music, and the beauty, and all that goes with it—yet you won't feel any lack of solemnity. The sea behind you and the winter clouds above, and those gray cliffs in front will thrill you as much as any vaulted ceiling of a cathedral. The sky and the sea and the hills—all the essentials—and the cross over Peter's grave!"

His face was stark white. Evidently the idea of this marriage in the wilderness had fired Ivan's imagination. It appealed to some primitive part of him that she had never fully understood, and to which she could not reach.

(To be continued.)

Scions of Sitting Bull

Prepare for Scout Work

Rierre, S.D.—Descendants of Sitting Bull, Hump, Gall and other chiefs of the Sioux in the Dakotas are again preparing to do scout work, but not along the lines of their ancestors nor for the same purpose, but through the organization of a Boy Scout troop among the lads at the Government Indian School, located at this city.

The work will be under the supervision of the Kiwanis Club of Pierre, which is financing the Boy Scout movement for the current year. The troop will be organized within a few days and a Scout leader will be appointed.

1709

A NEGLIGEE OF SMART SIMPLICITY

The attractive negligee shown here is made with seams on the shoulders, and with short kimono sleeves finished with cuffs, or attached long sleeves. There are two useful patch pockets and a long collar, which may be omitted if desired. No. 1709 is in sizes 36, 40, 44 and 48 inches bust. Size 40 requires 4 1/2 yards 36-inch, or 3 1/2 yards 54-inch material for View A; 4 1/2 yards 36-inch, or 3 1/2 yards 44-inch material for View B. Price 20c the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to the home dressmaker. Price of the book 10c the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

The Sun

The sun had been sending its rays down on bathers, pastures, cattle and babbling brooks and was very tired and hot and not in such a nice mood, for a large cloud had passed in front of him, cutting off his rays and making him very angry indeed. So, when 5 o'clock came, he was looking forward to a nice cool meal, and as he sank, leaving the sky a beautiful red, he was thinking only of getting home.

As he went he met the moon on its way to lighten the sky so that ships on the sea would not go to destruction, and so that fairies and elves would not get confused and bang into each other while doing their midnight dances. They passed the time of day and went on. Soon he met the moon's helpers, the stars, all tripping along gaily in their silver shoes. He passed the time of day with them, also, and went on. Then he met the dew, its freshness made him very cool indeed, but Mr. Sun only bowed. He and the dew were not very good friends, for he dried up the dew and made it very warm and uncomfortable. He met the breezes and wished them good evening and passed on.

When he got home he ate his supper and then he sat on his front porch and talked. Soon he went to bed, for Mr. Sun had to be up at six o'clock in the morning, unless Mr. Rain sent him word that he was on duty and that his services would not be required.

Now you know the history of the sun; at least that is what I make of it.

Paris Speed Standards

Twenty-five miles an hour has been fixed as a sort of arbitrary "dangerous" automobile speed in downtown Paris. There is no legal limit for the driver of a car is responsible for his acts at all speeds.

The police, nevertheless, have decided that a common sense standard must be used so traffic officers can exercise control.

This limit is to be enforced only where there are cross streets. On the avenues a car may go as fast as traffic conditions and safety permit.

Minard's Liniment kills warts.

"What let he strongest water power?" "Women's tears."

British Cruisers Sent to Quell Samoa Natives

Unrest Grows After Royal Commission Clears Local Administration of Autocratic Rule of Mandate

European Boycott Urged 300 in Purple Uniforms and Carrying Big Sticks Patrol Streets in Protest

Wellington, New Zealand. — The New Zealand Cabinet as a precautionary measure, has decided to dispatch the cruisers Dunedin and Dismal to the mandated territory of Samoa, where disaffection is prevalent among a section of the native population.

Unrest was continued for some time in Samoa, where a citizens' committee, formed in 1926, charged the local administration with autocratic action. A royal commission of inquiry recently absolved this official.

Premier Coates, in announcing the dispatch of the cruisers, said that the administration had advised the government a serious position had arisen and that any action taken by the official police will be regarded as a signal for general retaliation by the Mau, or League of Samoa Police, an unconstitutional body opposing Europeans.

Aps, British Samoa—Wearing purple uniforms and carrying big sticks, 300 native Samoans have been patrolling Apia's streets to prevent Samoans from purchasing goods in the stores of Europeans.

The patrolmen are the police of the Mau (League of Samoa), which has declared a six-month boycott of European stores, hoping thereby to make it impossible for the stores to pay taxes to the government. There being no taxes, reason the natives, no revenues will be available for conducting the government.

The natives have long protested against liquor prohibition, and have demanded greater native representation in the government.

The Mau police, though an unconstitutional body, have continued their activities for weeks. The government police and the Mau police pass each other with contemptuous glances, but without indication of a clash.

It is feared, however, that trouble may come from the situation, for the Mau action is a gesture of defiance of the government, which recently deported three Europeans because of their activities with the league.

Even in olden times it was customary to anoint the head with oil, but not by ceremony of crawling under the car.

An anxious father got wind of the rumour that his son was leading a rather convivial life at college. But the son strenuously denied the charge in letters to his father. Still unsatisfied, the father made an unexpected visit to his son's lodging-place, and, giving the bell a pull, was met by a grim-faced landlady. "Does Mr. James Smith live here?" asked the father. "He does," replied the landlady; "bring him in."

HUTS 1,000 YEARS OLD STILL EXIST ON THAMES

Remains of Ancient Dwellings Similar to Those of Charcoal Burners

London.—Remains of huts at least 1,000 years old still exist at East Tilbury, on the foreshore of the Thames. These huts, circular in shape, vary in diameter from eleven and one-half to twenty feet.

Consisting of three rings of pointed stakes, each one and one-half to two inches in diameter, which formed a framework for wattles, the "skeletons" are preserved in the mud just as they were made.

These huts were provided with plank floors and burnt roof tiles as floor coverings. Yorkshire charcoal burners still build circular huts formed of stakes and covered with turf. Bark peelers in the Lake district still are building an even more highly developed construction, using similar materials. Without doubt the construction has been handed down through countless generations from primitive times.

From the time of Chaucer comes the rhyme "teapot hall, all roof, no wall," which actually describes these early homes.

Hawks and Owls And the Farmers

Accused of Being Barnyard Pests, They Are Proved to Be Interested Mostly in Rats

NOT ALL BAD

Few persons realize the value of hawks and owls. Even farmers who reap the greatest benefit from the food habits of these birds seem, in large measure, to be ignorant of the good they do. Boys, reared on farms, learn early to shoot them, having conceived the idea that they are pests, and the habit persists in manhood.

Waldron De Witt Miller, associate curator of birds in the American Museum of natural history and Vice-President of the New Jersey Audubon Society, in a recent bulletin published by the society, discusses the value of hawks and owls. The object of the bulletin is to inveigh against the use of the steel "pole-trap"—an unbaited trap attached to the top of a pole, post or stub in an exposed situation in a marsh or meadow, its purpose being to capture hawks and owls.

"There are accumulations of definite and exact data concerning the food of the so-called 'hen-hawks,' which positively establish their value to man," says Mr. Miller. "The marsh hawk, which has been generally considered by sportsmen to be one of the worst enemies of game birds, was particularly studied by Herbert L. Stoddard, biologist of the United States Department of Agriculture, in his quail study in Georgia, jointly sponsored by the Department of Agriculture and the local sportsmen of the region. Mr. Stoddard found in more than 1,000 meals of marsh hawks only two quail, but fully 1,000 cotton rats, which rodent in turn was found to have taken 15 per cent. of all quail eggs destroyed."

Mr. Miller gives the following data on stomach contents of a few of these supposedly harmful birds:

"Of 563 stomachs of the red-tailed hawk, from all sections of the country, only 54 examined contained poultry or game, only 51 contained other

birds, while 278 contained mice, 131 other rodents, and 47 insects.

"Of 230 red-shouldered hawk stomachs similarly examined, only 3 contained poultry or game and 12 small birds, while 102 contained mice and 40 other mammals. Insects were found in 92.

"Of 65 stomachs of broad-winged hawks examined, none contained poultry, 2 contained small birds, 15 mice and 13 other mammals, while insects were found in 30.

"As to the long-eared owl, of 107 stomachs examined only 1 contained a game bird and 15 other birds, while 84 contained mice, 5 other mammals and 1 insect. In 101 stomachs of the short-eared owl, only 11 contained small birds, while 77 had mice, 7 other mammals, and 7 insects.

"The foregoing examples should satisfy the most exacting that the food habits of hawks and owls as a class are such as to make them of the greatest benefit to man."

RICH, RED BLOOD A REAL NERVE TONIC

The Source of All Nervousness is Weak, Watery Blood.

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

Doctors of the nerve with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto despondent people bright and cheerful. Miss Irene Denne, R.R. No. 1, Washago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—"I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time, trying one medicine after another. I was advised to try Dr. Williams' Pink Pills and I have reason to be thankful that I acted on this advice as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvellous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Asbestos Deposits

Canadian asbestos deposits are of particular interest supplying as they do the largest part of the world's demands for the short grades of fibre. Though occurrences of this mineral have been noted in other localities and provinces, the productive areas are confined to the Eastern Townships in the province of Quebec where active mining operations began in 1880.

An artist-designer is reported as saying that women like their attire to be witty. They have certainly made brevity the soul of it.—Punch.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, or constipation, or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

Railway Ads. Wins Prize

A signal tribute has been paid by Harvard University to the quality of Canadian advertising by the selection of the Diamond Jubilee Campaign of the Canadian Pacific Railway as the best institutional campaign in North America for the year 1927.

An award of this nature is made each year by the Harvard Business School with the object of raising the standard of advertising, and includes a cheque of two thousand dollars to the advertising agency which handles the campaign. The fortunate winner in this case is Mr. W. P. Tuttle, President of the Ronalds Advertising Agency of Montreal. This is the first occasion in which a Canadian campaign has been so honored. The announcement was made at a banquet held recently at the Faculty Club of Harvard. The Canadian Pacific Campaign was unique in the fact that it was bi-lingual, the advertisements being in both French and English. It illustrated and described the part played by the railway in helping to build up the Dominion of Canada during the sixty years of Confederation, and was cleverly built up on the idea of the open pages of a book.

A sample of this advertising is reproduced above, clearly depicting transportation methods of Canada's childhood and that of to-day.

OWL-LAFFS

O. W. L. (On With Laughter)

When an unpleasant task lies ahead of you get it behind you without delay.

Eve's Daughter. Woman (in crowded car, to her friend)—"I wish that good looking man would give me his seat." Five men got up.

Wouldn't it be grand if a man, when in a hurry, could hold up his arms and, like a woman, drop nearly all of his clothes on him?

Who remembers "way back when all good housewives made soft soap?"

Those who carry no burdens are burdens carried by others.

Heinke—"There are several things I can always count on." Bine—"What are they?" Heinke—"My fingers."

Table Manners.

When eating corn on the cob, adjust it as you would a mouth organ, but do not run the scale so rapidly.

Never display the napkin at half mask. Place it in your lap, as that is where nearly everything falls.

If you are obliged to yawn, wait until there is a gap in the conversation. Syrup should be used for nourishment and not as a liniment.

Never force soup from your spoon by suction. This might cause all of the guests to look startled because it sounds like a flat tire.

When talking do not wave celery around to emphasize what you are saying.

Do not put cake, roast beef or chicken legs in your pocket. If you want more later on ask the hostess to wrap it up.

Do not use a fork as a toothpick. You might bend the prongs.

Do not drink from the finger bowl.

Good For Neighbors.

"Was your garden a success this year?"

"I should say so. My neighbor's chickens took first prize at the poultry show."

Well, our bank balance looks like it has been on a diet.

If you have faith, preach it; if you have joy, share it; if you have sorrow, bear it.

A word to wives is sufficient.

Some of the motorists that cut such funny capers on the streets with

their autos are merely jaywalkers behind the wheel.

Landlady—"I think you had better board elsewhere."

Boarder—"Yes, I often had."

Landlady—"Often had what?"

Boarder—"Had better board elsewhere."

MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies "eat everything that grown up people do." Such a course is almost certain to bring on indigestion and lay the foundation of much ill-health for the little one.

Other mothers administer harsh, nauseating purgatives which in reality irritate and injure the delicate stomach and bowels and at the same time cause the children to dread all medicine.

Absolutely no meat should be given to a child until it reaches the age of 18 months, and then only if approved by the doctor. For medicine, all strong, disagreeable oils and powders should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the newborn babe. They quickly banish constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Perfect Brownie

The perfect brownie always knows that he must bow on tippy toes. And wash his wings out nightly: When mortals come on fairy green He should be heard (but never seen) Then fly away politely.

And he will never stick his tongue out at his queen or anyone. Who ties her shoe strings neatly. And just before he goes to bed Of course he stands upon his head Or somersaults completely.

The perfect brownie'll never stoop To gurgie up his spinach soup Or gobble his bananers, And every week and day and hour He sits along from flower to flower And uses all his manners.

London Dancing Shocks Minister

Each Kick and Wriggle Has Its Horrible Meaning

CURSE OF AFRICA

London.—Rev. A. E. Guest, of Quiboolo, West Central Africa, has spent a lifetime teaching natives of Darkest Africa to abandon certain suggestive dances. He has just come to London to learn that civilization is doing the very steps which he has asked the natives to omit from their repertoire.

"Each kick and each wriggle of these dances has its own particular meaning," Mr. Guest explained, "and I feel certain that if British dancers had any idea of these meanings they would never dance the Heebie-Jeebie or the Black Bottom again."

Shocked Beyond Words.

The minister was "shocked beyond words," he said, at an Islington Church.

"This is the most serious problem that confronts the missionary in Africa today. One of the chief reasons for the prevalence of this immorality is the performance of dances similar to the Black Bottom," he declared. "The Black Bottom which I saw performed by scores of young people at a London dance hall is nothing more nor less than an adaptation of a native African dance, the meaning of which is too horrible to describe."

Mr. Guest hastened to explain his theory.

"Until he becomes of a certain age an African boy is not allowed to mix with girls."

"On attaining what the tribe considers his manhood, he goes through an initiation."

"This takes the form of a dance exactly like the Black Bottom, which is performed by men wearing grotesque masks. Its actual meaning must be left to the imagination."

Gives Right to Wed.

"When this dance is over the youth goes and takes as many 'wives' as he wants, 20 being about the usual number."

To dances in general, the minister said, he had no objection, but he knew from first hand observation that the Black Bottom and the Heebie-Jeebie were nothing less than exhibitions of primitive animalism.

"At Quiboolo," he said, "we suspended native Christians for even watching the Black Bottom; yet I come home and find my white brethren performing the same immoral dances that are the curse of darkest Africa."

"They must positively be stopped."

Use Minard's Liniment for Corns.

Two Kinds Only

There are only two kinds of bears in the United States, according to David Newall, the artist-naturalist writing in the March issue of "Child Life Magazine." These are the grizzly and the black bear.

The brown bear, the author of "Cougars and Cowboys" says, is merely a black bear that forgot to turn black. "Most folks," he points out, "think that the brown bear is a different kind of a bear, but it is really just a brown-colored black bear. An old mother black bear will often have brown cubs! And when these brown cubs are grown, they may have black babies of their own. Sometimes the brown bears are dark, dark brown and sometimes light brown."

However, brown bears are only found in the west. "Strange to say, the black bears in the eastern states never have brown cubs!"

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful on water neutralizes many times its volume in stomach acids, and at once, the symptoms disappear in five minutes.

CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Mining, Ontario.—"I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed, I would be so weak. Then he read in the paper of a woman suffering as I did who got better after taking the Vegetable Compound, so he went and got it for me. When I had taken three bottles I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pains I always take it; sometimes a half bottle or whatever I need. It is my only medicine and I have told many a case about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it."—Mrs. MABEL BOWMAN, R.R. 1, Mining, Ontario.

Do you feel broken-down, nervous, and weak sometimes? Do you have this horrid feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently will relieve this condition.

Too Much ACID

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

TOWN DEVELOPMENT

It used to be frequently said in smaller towns, that it is the business of a good citizen to mind his own business, keep out of debt, and avoid breaking laws. It was commonly thought that if he did that, it was about all that could be expected of him, and he was conforming to the ideals of good citizenship.

But a community's development cannot be promoted in these times on any such limited basis. The fact that so many small town people still have this spirit, and expect to get along without doing anything particular to boost community movements is one of the principal reasons why some towns do not get ahead faster.

Some must take hold and carry on the work of churches and fraternal societies. Some of the men with a special head for business need to work in some organization for the commercial and other needed development of the community. Some need to work in clubs for educational purposes, and for more interesting social activities. There is something that each one should do and we must all take hold to do something in these public lines, if we expect that a town is going to keep up with the game.

People should not act as if they were making a great sacrifice if they devote a little of their time to such purposes. We should love our home town so much, we should be so ambitious to see it go ahead, we should be so conscious of the gains that people who have initiative or ability or industry, should be willing to give some time each week to helping forward such causes.

SPRINGTIME.

Already there are many signs of spring, although officially it did not arrive until Mar. 21.

Spring is the season of reincarnation, rejuvenation and radiant life. It is only to man that January 1 represents the birth of a new year and the calendar year is an artificial structure. With plant life and that of the lower animals the coming of spring is at once the birth of a new year and new life.

Humanity recognizes and speaks of a new year as from January 1 but nevertheless observes it from the first breath of spring. After the departure of the drear and stifling winter and with the coming of refreshing and magnetic spring there is new life and new hope created in the breasts of men and women. Spring brings great plans and high resolves which only winter can demolish or deter.

It is not sufficient to say that the homing instinct is convenient in the spring. It is natural and not to be gainsaid by man or beast. Spring urges the bird to build its nest, the animal to burrow into its mother earth and man to plan his home, but neither bird, beast nor man knows nor asks why. Spring is the one and only irresistible force.

THIS VERSATILE MONTH.

All of the evidence considered, it is agreed that the month of March is the disquieting member, the erratic revolutionary, the most fickle of the fickle and the most irresponsible of the undependable among the 12 major divisions of the calendar year. It is born of both winter and spring by virtue of the calendar and weather tradition. It is nature's sample case. There are weather reasons for the existence of the "crazy March hare" and the prophetic association of March with the lion and the lamb.

Throughout the major portion of the United States the month of Mar. is welcomed because it marks the death of winter and the birth of spring. Among the time-honored days of the year none is quite so well-loved and joyfully received as March 21, the first day of spring. Sometimes the first day of spring does not live up to its calendar designation and harsh winds or deadening snows strive for supremacy over the urge of spring, but to no avail. In closing March advocates in favor of April with her moving day, showers and garden making.

THE USELESS "GOOD CITIZEN".

There is a certain type of man in every community who poses as a good citizen. He breaks no laws, lives morally, pays his honest debts and is never tangled up with the law in any manner. But he lives of himself, by himself and for himself exclusively. When the call is issued for volunteers to put across a community movement and give a boost, he never answers. When calamity has befallen people in certain localities and charity lies to their rescue, he is never one of their number. When money is needed for a public enterprise his name is never on the list. When he sees some neighbor stuck in the mud he detours to avoid him.

In fact, if he stood on the shore and saw the ship of state sinking, he would never offer to throw out a line.

And, if all mankind was fashioned from this same kind of chap what would happen ? There would be no churches, no hospitals for the sick, no institutions for the unfortunate, no progress. If you are about to become a useless "good citizen" read this editorial again.

Three-fourths of all motor vehicles are sold on credits. Riders pay as they go.

We now learn that an "ovis poli" is just a sheep and not dangerous. We naturally supposed it was a ferocious animal.

Vermont is said to have one of the lowest reckless driving records in the country. In Vermont the driver is almost always going up hill.

It is said that gowns now coming into fashion make it possible for a woman to dress in 55 seconds after spending three-quarters of an hour deciding which one to wear.

ST. ANDREWS EAST.

The Women's Guild held their meeting in the United Church hall on Thursday. Mrs. Brash and Mrs. Geo. Perks acted as hostesses.

We have pleasure in reporting that a St. Andrews boy, Mr. Willie Perks, has been promoted to be principal of a school in Montreal Extension, with eleven teachers under him.

Miss Evelyn Wales has returned to her home here, and is now nursing Miss Harrington, thus giving Miss Brophy a much needed rest.

The C.G.I.T. met as usual in the Church Hall on Friday, after school. Mr. Wm. Drysdale & three friends were up on Thursday to see the progress that has been made in road building etc., around the proposed Golf course.

CUSHING

Miss Ida Fletcher spent the weekend at her home in Brownsburg.

Miss Beatrice Leclaire was the week-end guest of her brother, Mr. Horace Leclaire, of Lachute.

Miss Ivy Graham, of Montreal N., was the week-end guest of her parents, Mr. and Mrs. A. Graham.

A very pleasant meeting of St. Mungo's Ladies' Aid was held at the home of Mrs. John Smith on Thursday of this week.

Mr. John Douglass Jr., of Montreal was the week-end guest of his parents, Mr. and Mrs. John Douglass. Mr. and Mrs. Jas. Watson, of Point Fortune, were guests of Mr. and Mrs. L. Gaston and attended Irish night in the C.C. Club.

Mrs. Irving Fuller arrived home from Montreal on Thursday night, accompanied by Mrs. Geo. Hodgson, who will spend some time the guest of her daughter, Mrs. Frank Fuller. Irish night at the C. C. Club was a decided success.

The Misses Eileen Canning, Mary Starnes, Dorothy and Helen Weir gave Irish recitations, also Keith Canning. Miss D. Leroy recited "Specially Jim"; Miss Muriel Jobb played several Irish selections and sang very sweetly. A little bit of Heaven and Killarney's Lakes and Fells, and Rev. Mr. Elliott gave a very interesting speech.

Miss Viola Innes, of Ottawa, and Miss Neilson, of Hawkesbury, were guests of Mr. and Mrs. Jno. Innes over the week-end.

Mrs. A. Graham was the guest of Mrs. Thomas Bradford, of Point Fortune, on Tuesday.

The Women's Missionary Society are giving Lantern Views of Trinidad in St. Mungo's Church, on Good Friday evening.

High Cost of Living

VS.

Low Cost of Insurance

Midst all the increasing cost of living there's one thing that hasn't advanced,—that's the cost of Imperial Life policies. In fact, an Imperial policy today requires no greater annual investment than a similar policy taken at a corresponding age a dozen years ago.

And the fact that the dividends to policyholders in The Imperial Life have shown a gradual increase every year since the Company's inception makes this investment more attractive now than ever before.

Would you care to know the profit returns being made this year to holders of Imperial profit-sharing policies? Our booklet "The Voice of Experience" gives the information.

A copy will be sent to you postfree if you ask for it.

The Kind of Eggs Poultrymen Want

Every poultryman wants lots of large, uniform, strong-shelled, and HATCH-ABLE eggs. And more and more are finding that Quaker Ful-O-Pep Egg Mash is just the feed to get the BEST eggs, as well as MOST eggs.

The ingredients of this good feed are of proven merit—oatmeal, most digestible of all grain products; cod liver meal, that tones up the digestive system; minerals, essential to egg building.

Greater hatchability—and stronger, healthier chicks—make Quaker Ful-O-Pep eggs just the eggs for the poultryman, breeder and hatchery man.

Memories of old St. Andrews

The history of Old St. Andrews would be incomplete without a brief sketch of its first resident Seigneur, who was more than any other individual, its founder.

Although his favourite patronymic, and documentary signature, was "Pat", there is every indication that Major Patrick Murray came of Highland Scotch Ancestry, for he attracted to his domain his fellow countrymen from their Highland glens, and named the pioneer village after their patron Saint. The Emerald Isle had no monopoly of the historic name, and tradition has it, that St. Patrick was a native of Scotland, and furthermore the family name, "Murray" was common to both races.

The story of Major Murray's military career, of his early enlistment and rapid promotion is fully told in the Archives at Ottawa, taken from the files of Irving's officers of the British forces in Canada.

During his young manhood he received his first commission as Ensign at Quebec in 1761, two years after the surrender of the City (1759), the following year he was promoted to a Lieutenantcy, and five years later, (1767) he was appointed to the responsible position of Town Major for Quebec by Brigadier General Murray, who succeeded General Wolfe in command of the British forces.

These events favour the conclusion that our Major Murray was the son, or a near Kinsman of General James Murray of historic renown, and probably, that the soldier boy played some part in the battle of the Plains of Abraham.

It is much to be regretted that as far as yet discovered, Major Patrick Murray has no living descendants to inherit and narrate the story.

That he was a family man is evidenced from a letter found in the Archives, addressed to Lt. Col. Green, in which he recommended his son as a recruiting officer for a proposed New Brunswick regiment.

We next meet the Major in Montreal, in command of the 2nd. Battalion, 60th. Regiment, a position which he held for a number of years before his purchase of the Seigneurie of Argenteuil.

He appears again in the role of President of the General Court Martial in Montreal in 1817, and finally as Colonel in command of the Argenteuil division of Militia in 1818.

Of his career during his Seigneurship, the few details given in the History of Argenteuil, justify the following estimate of his character.

Major Murray was no ordinary man. His energy, his public spirit and his mental endowments fitted him for leadership and for getting things done. He found a hamlet, and left an industrial centre. Through his surveys he linked up the neighboring hamlets and settlements by the most direct roads, and mapped out surveyed lots for the fast coming settlers.

The foundation of the Manor House built by Major Murray near the mouth of the North River has never been found, and the explanation offered is, that the Manor House built by his successor Sir John Johnson after the model of the Johnson Hall of the Mohawk Valley, and still well remembered, was built on the same site.

To be Continued.

CORRESPONDENCE

Editor of the Watchman,

Dear Sir:—

As manager of the Brownabury Hockey Team I still feel that the decision of Cup winners is unfair and in reply to last week's letter state that although the game of the 25th, was protested because outside players were used, there was nothing in the rules to the contrary; other teams did likewise and we were not the first to start.

Relative to the meeting at which this protest was decided in order, we were only notified an hour before hand, and informed that the President would not be present, and one of the committee men also expected to be absent. Please tell me who was there.

I would suggest that a general meeting be called to settle this matter, as all we want is a fair deal.

JOHN MAITLAND.

Ed. Note.

We think the latter suggestion a very good idea, and although we desire to let our readers know what is transpiring we are not intending to use our paper as a legal debating medium and with this would ask that the matter be dropped. If a general meeting is held we will be pleased to publish the results.

"SATADA" TEA

"Pekoo" comes from the Chinese word "Pak-ho", meaning silver hair, which was applied to the tip leaves on the Chinese tea bush. Tip leaves are wiry in shape. In India they were more orange in colour, so were called "Orange Pekoo" (Pak-ho).

The LAND OF FORGOTTEN MEN

by Edison Marshall

BEGIN HERE TODAY

Peter Newhall, Augusta, Ga., flies to Alaska after being told by Ivan Ishmin, Russian violinist, he had drowned Paul Sarichef, Ishmin's son, following a quarrel. Ishmin and Peter's wife, Dorothy, had urged him to see. He joins his wife, Dorothy, in response to a distress signal at sea, forcing his way aboard upon him. Their last, hasty, rescue. Peter's body is buried as Newhall's. Peter, rescued, finds injuries have completely changed his appearance.

Ishmin and Dorothy go to Alaska to return Peter's body to Georgia. They do not recognize Peter, who is chosen head guide. A storm carries their ship to sea, stranding them at the very moment Dorothy is to leave him. He would first ask the name of the husband whom she believed dead. They hold a séance with one of the guides as medium. She receives the message: "Change name," and Ishmin goes for supplies. Peter falls in a gully on a hunting trip. Dorothy goes to his aid.

NOW GO ON WITH THE STORY

She was too terrified now for coherent thought; yet a dim glimmer of a startling truth came to her as she gazed for the man's bleeding hand. To her he was not merely a guide, a faithful servant. Her prayer for his life was heartfelt; indeed it seemed the first theme of her own life. He was not just a fellow mortal who had given her service; he was her companion, her stronghold and shelter; but this was only the beginning. In that instant of stress the voice of her heart spoke clearly above the confusing babble of lesser tongues, and some deep tenderness—almost forgotten—was thrilled into life. This rough man of the open made an appeal to her that could no longer be denied, that reached to the secret places of her being.

The time might come when false pride would manifest itself again, and she would be ashamed of this heart secret that the faithful moment had revealed; but she yielded to it freely now. She took his rough hand and kissed his lips to see if they were still warm with life. Then she pressed his battered head against her breast and rocked him as a child rocks its doll.

She kissed the homely, bleeding face, then tried to coax him back to consciousness. . . . They must not linger here, in the creek bed and under the cold roof of snow. He was not dead; she was sure of that now. As she mounted nearer the head springs of the little stream that flowed at her feet the gully itself had deepened in depth, and Peter had fallen more than thirty feet. The fall, . . . might have been somewhat broken by striking first the almost sheer wall of the gully just above the water. Yet he might easily be mortally injured. His present deep sleep might usher him, without waking, straight into death.

She began quietly to bathe his wounds. The cold water was an effective stimulant, and soon he stirred and opened his eyes.

It moved her to the depths to see a

little, faint echo of his friendly smile come to his lips. It was almost imperceptible, yet its meaning was plain; that he would stand between her and disaster, that she need not fear. "Don't trouble about me," he told her faintly.

The drops of water on his bleeding face were not wholly from the cold stream. Her tears lay there, too. "Don't try to talk," she cautioned him. He closed his eyes, rested, and full consciousness came back to him. "I don't believe I'm badly hurt, Mrs. Newhall—just shaken up and scratched. Maybe I can get up."

"You mustn't try. I'll run back for help."

"I'm afraid it wouldn't be best to wait. . . . It's pretty cold down here—almost freezing. The best plan is

She tried to coax him back to consciousness.

to try to reach the camp."

He spoke softly, with evident difficulty; yet she was convinced at last he was not mortally injured. She realized that life itself, however, might depend on getting him at once into camp. At least he must not be left under the snowbank to the mercy of the cold.

She took his hand and he tried to get to his feet. Evidently the entire mechanism of his central nervous system had suffered from the shock of the fall, and at first his muscles refused to respond to the commands of his brain. It was only with the girl's help that he was able to get to his knees. Very slowly, unsteadily, pulling with his own free hand on the overhanging roots of the gulch from which the soil had been carried by his sliding body, and leaning on Dorothy, he managed to stand erect.

He paused for breath and they met each other's eyes. The fact that Peter had not been mortally injured did not mean that he was safe. He could not walk unaided over the hills and across the barrens with such strength as he now had. He could not wait for help to come from the camp; hours would pass before the natives returned from their hunting, and hours more would be required to bring them here, even if Dorothy could find the way alone. Safety depended upon the fighting spirit, the courage and fortitude, of one person.

That one person was Dorothy. If she did not get him to camp and shelter, it might easily mean that cold and exposure would put out the spark of life before the morning.

There was no further time for terror and vain tears. For one of the few times in her life she had work to do.

Encircling him with her arm and sustaining him against her shoulder she started away with him down the creek and out of the shadow of the snowbank. He was unsteady, faltering, and at first they could go only at a snail's pace. All the time she encouraged him with her words and her voice, and most of all by the pressure of her hand. And soon they were from under the snow roof and were making a path up the steep wall of the gully.

Without a word from Pete she continued on down the ravine until she found an old game trail that permitted fairly easy access. This had been part of the guide's own toasting in their many excursions into the wild. The narrow, brown trailing path up the hillside was quite steep, but at least it was a way through the brush and offered them the greatest margin of safety. Slowly, laboriously, testing every few paces, they reached the crest.

The fight was not only to surmount the grade. She also had to guard against a lapse into unconsciousness on the part of the injured man, the results of which would have been to throw all of his dead weight against her and hurl them both down the steep grade in a perilous fall. Pete gave his own strength of will to this battle; and he was breathless and fainting when he relaxed on the crest of the gully.

"It's not so cold up here," the man told her, when he had rested. "There's no use of you breaking your heart open trying to half-carry me. I think you can leave me here and send the natives to bring me in."

Dorothy glanced at the white sky and heeded the threat of winter in the wind. "We'll go on," she said.

They went on, and that first, long, high-insuperable mile proved definitely the quality of Dorothy's basic metal. She found that she not only had spirit to endure; but that her physical strength itself was greater than she had ever dared dream. An

unconquerable spirit moved in her today—its native chief he did not yet know or attempt to trace—and she would have got the injured man to shelter if she had had to carry him on her back. This was spared her, however, because after the first mile Pete slowly but steadily began to rally.

Ever his heart beat with greater power: the vital energy flowed through the floodgates of his nerves in an ever greater stream. He carried more of his own weight, depending less on the strength of his companion. When vivid consciousness swept back to him and he saw the girl's white, drawn face, he took her arm from his and tried to go unaided; but she would not hear of this. She drew his arm through hers again with a strange, tender urgency; and she would not let it go.

"But I'm all right now," he objected.

She studied his pale face and somber eyes. "Let me help you a while longer, Pete," she told him.

Down the steep grades, through the

deducted \$5,000,000 from the market value of its securities as a further provision against possible future fluctuations, the total amount set aside for this purpose now standing at \$10,000,000. The account to provide for unforeseen contingencies has been increased by \$1,000,000 and now amounts to \$12,000,000. The sum of \$1,000,000 has been written off the Company's properties; an additional \$500,000 has been set aside in anticipation of the greater longevity of annuities—the total provision under this head now being \$2,500,000. Another \$50,000 has been set aside to provide for claims with respect to total disability cases as yet unreported. \$11,000,000 has been paid or allotted as profits to policyholders during the year, and over \$6,000,000 has been contingently allotted to deferred dividend policies issued prior to 1911 and to five-year distribution policies to provide for profits accrued but not yet payable.

After making these liberal deduction and allocations, over \$11,000,000 has been added to the undivided surplus, which now stands at more than \$45,000,000.

There is good news again for the participating policyholders of the Company in the announcement that the scale of dividends to be paid to policyholders during the year commencing April 1st next will be again increased—this for the eighth successive year. The interest rate on dividends left with the Company will be maintained at 5½ per cent. per annum during the new dividend year.

There were paid to policyholders and beneficiaries, in respect to death claims, matured endowments, etc., during the year over \$42,000,000. The Company has paid out since its organization, under this head, over \$300,000,000.

It is indicative of the efficiency and morale of the world-wide organization of the Sun Life that the increases in its income are from every department of its business and from every territorial division, namely, Canada; United States; South America and West Indies; Great Britain, South Africa and the Near East; China, Japan, India and the Far East. Such a showing is not alone a tribute to President Macaulay, but a striking proof of the high quality of the personnel of his organization.

The Head Office building in Montreal is to be increased to mammoth proportions, the first unit of the new building being now under construction. This building is designed, when completed, to accommodate 10,000 employees. Almost equally interesting is the action of the Company this year in purchasing one of the most central sites in London, just off Trafalgar Square and adjoining Canada House. Here is being erected what will be undoubtedly one of the finest office buildings in the world's metropolis and from which the business of the British Isles will be administered.

unconquerable spirit moved in her today—its native chief he did not yet know or attempt to trace—and she would have got the injured man to shelter if she had had to carry him on her back. This was spared her, however, because after the first mile Pete slowly but steadily began to rally.

Ever his heart beat with greater power: the vital energy flowed through the floodgates of his nerves in an ever greater stream. He carried more of his own weight, depending less on the strength of his companion. When vivid consciousness swept back to him and he saw the girl's white, drawn face, he took her arm from his and tried to go unaided; but she would not hear of this. She drew his arm through hers again with a strange, tender urgency; and she would not let it go.

"But I'm all right now," he objected.

She studied his pale face and somber eyes. "Let me help you a while longer, Pete," she told him.

SUN LIFE SETS NEW RECORD

Canadian Company With World Wide Organization a Great Credit to This Country. Increase in New Business For Year Greatest on Continent.

The extraordinary expansion of the Sun Life Assurance Company of Canada during the last few years has caused its annual report to be awaited with unusual interest, not only by the policyholders of the Company, but by a large section of the general public.

The annual report which the President has just submitted, and which appears in this issue, must have surpassed the expectations of the most sanguine. The total amount of assurances in force with the Company now approaches the billion and a half figure, \$1,497,000,000, an increase for the year of over \$231,500,000. The total net income for the year exceeded \$100,000,000—five times what it was ten years ago and more than \$23,000,000 in excess of the income for the previous year.

Such statistics as are available for 1927 indicate that the aggregate new business of all the companies operating in North America last year barely exceeds the total new business of the previous year. The increase in the new business of the Sun Life of Canada, on the other hand, was twenty-three per cent. Assurances in force on the books of the Company have doubled in four years—new business has trebled in that period.

This wonderful expansion has been paralleled by a great increase in the

The care and foresight exercised in this branch of the business is indicated by an appraisal of company securities, the market value of which has increased by over \$19,000,000 during this year.

The surplus earned during the year amounted to over \$38,500,000. The Company has followed its conservative policy with respect to this surplus and

brush thickets, across streams and over hills she led him, sustaining him with the touch of her hand, leading him, cheering him with her voice and her smile. At last she laid him on his cot.

She built up the fire, with fast, eager motions, and heated a pot of water. Then sitting beside him, she bathed his wounds. She did not know why he quivered at the touch of her warm, caressing fingers, or whence came the sea of tenderness that flowed through her finger tips upon him. The moment, to Pete, seemed actually to redeem and brighten some of the dark hollows in the trail of his life.

Dorothy helped him off with his wet boots, and still postponing the dread moment of self-analysis, tucked his blankets about him. Then she built up the fire and prepared a warm, nourishing soup which she fed him, spoonful at a time. She did not remember that she was dead tired herself, that she was accustomed to receiving, rather than giving service; and she let herself forget, for the moment, that this man was of a plane and sphere far below hers. Unaware of her own aching muscles she worked cheerfully about the camp, tending to Pete's every comfort, warming his great, cold hands between hers, even cutting fuel to keep the fire warm at the mouth of the dugout. It was increasingly evident that he had received no mortal injuries, only a severe shock and some painful bruises and cuts, yet she found herself nursing him as if his life were at stake. The hours winged by, and night seemed to fall before its time.

It was only when she had gone to her own bed, tired out, and the two packers were on watch, that she dared scrutinize the events of the day. It was not merely that she had given heroic aid to Pete, lavish with her own strength and wracking her body with fatigue. She might have done as much, under certain conditions, to any one in need. The thing that amazed her, that distressed and terrified her, was not that she had helped him, but that in helping him she had found the greatest glory, the most exalted happiness that had blessed her since the first months of her marriage.

(To be continued.)

Infantile Mortality

Three Rivers Nouvelle (Cons.): It is in the Province of Quebec that the cradles are most visited by death. . . . We should follow the example of New Zealand and Australia. Perhaps nowhere in the whole world are organizations so active in the struggle against infantile mortality. And the system is proved by its results: Australia and New Zealand have an infantile mortality less than half of that in our province. Have we not also the example of Great Britain? There is a country with a birth rate no better than the birth rate in France. Yet the population increases there each year by 250,000. What is the reason? Because not only have they reduced mortality among adults, but especially among little children, the infants of the cradle.

HOW THE SUN LIFE MADE THIRTY-EIGHT MILLIONS PROFIT IN THE YEAR 1927

Participating Policyholders Receive Ninety-Five Per Cent. of Profits—Dividends to Policyholders Again Increased—Company Seeks Legislation to Maintain Canadian Control

Montreal.—The phenomenal record of the Sun Life Assurance Company is an inspiration to all Canadians. Its income of \$102,000,000 is already equal to the total revenue of the Government of Canada in the year 1910, and \$38,000,000 is certainly an amazing sum to have earned as profit in one year. Not many corporations anywhere can report such figures. The President's intimate, practical comments at the annual meeting explaining how these huge profits were made were illuminating.

Of even greater moment, however, were his statements regarding the danger that this great Canadian institution may pass from Canadian control. Some months ago, Mr. Macaulay referred to the activity of Wall Street in the buying of Sun Life stock, and cautioned policyholders and shareholders of the menace it involved to an institution which was founded and developed by Canadians and which has obtained its phenomenal growth under Canadian management. Subsequent events have justified these misgivings, and at the meeting the first public intimation was given that the Sun Life directors are seeking legislation at the present session of Parliament which is intended to effectively forestall this danger.

Precautions to Maintain the Company Canadian in Character.

In concluding his address to the shareholders and policyholders the President made the following reference to the matter:—

"There is but one cloud on our horizon. Our very prosperity has created a remarkable demand for our capital stock. We desire to ensure that this great company shall always remain strictly Canadian in its control and in particular that its investments shall never come under Wall Street domination. A bill which we have introduced into Parliament will be submitted for your approval. If it be passed, it will give us the protection we so much need, and I know we can rely on the whole-hearted sympathy and support, not only of our stockholders and policyholders here present, but of our army of policyholders throughout the country."

The meeting unanimously approved of the measure in question. How important and how vital to Canadians are the interests at stake is disclosed in the report submitted to the annual meeting of the Company.

In moving the adoption of the report, President Macaulay said:—

"You gentlemen have become so accustomed to our presenting every year a statement surpassing all previous records that you come prepared to hear another report of that description. I am quite sure, however, that not one of you, in his most optimistic mood, expected a report so favourable as that which you now have. Our record for 1927 is indeed a remarkable one. Let me touch on the main features:—

Remarkable Growth, Strength and Profits.

"The new assurances completed amounted to \$325,000,000, an increase of \$82,500,000.

"The amount in force at the close of the year had risen to \$1,487,000,000, and at the present moment is well over \$1,500,000,000.

"The income exceeded \$102,000,000, an increase over the previous year of \$23,000,000. To me, this is very impressive. Not only has this item passed the one hundred million mark, but the increase alone is equal to what was our total income but eight years ago, which had been accumulated by forty-nine years of strenuous effort. A life company with a total income no greater than our increase would be an important corporation.

"The assets have increased by \$56,000,000, and now exceed \$400,000,000.

"But the most wonderful of all these wonderful figures is the amount earned as profit—\$38,000,000. How great this figure is may be judged from the fact that the earnings of the previous year, in which we so rejoiced, were \$20,500,000. It would be hardly reasonable to assume that our earnings of future years will continue on such a tremendous scale, and we have therefore set aside a large part of this sum to provide for future contingencies.

A Great Surplus and Contingency Fund.

"Our securities have been valued on a very conservative basis, but from even these moderate values we have set aside another \$5,000,000 to provide for market fluctuations, making the total deduction under this heading \$10,000,000.

"We have also set aside the following amounts:—

"A further \$1,500,000 for unforeseen contingencies, raising that fund to \$12,500,000; \$500,000 to provide for possible greater longevity of annuitants, raising that item to \$2,000,000; and \$1,300,000 to increase our reserves on tropical business; besides writing off another \$1,000,000 on our Head Office and other buildings.

"We have distributed \$11,100,000 in profits to our policyholders, and have also set aside \$6,200,000 to cover profits accrued on policies.

"After providing for all these amounts, we have added \$11,000,000 to our undivided surplus, raising that sum from \$34,000,000 to \$45,000,000.

Scale of Profits Increased for Eighth Successive Year.

"The announcement, however, that will be received with the greatest enthusiasm is that for the eighth consecutive year we have increased the scale of profit payments to our policyholders. The basis of distribution for 1928 will call for nearly \$300,000 more than would the basis of last year.

Profits of Policyholders Unexcelled in the World.

"We can already say that in profitability to our policyholders, we are not excelled by any life company in the world; but we are not satisfied until we can make an even stronger statement than that. Years ago, I told our field force that we hoped to be able to announce an increase in our profit scale for ten consecutive years. We have maintained that record for eight years, but the ninth and tenth years have yet to come, and their story has yet to be told. Our huge undivided surplus and our great contingency funds are the best guarantee our policyholders can have as to their future dividends.

Large Dividends the Result of a Wise Investment Policy.

"You ask how we are able to make these huge profits. The \$38,000,000 earned may be divided as coming approximately \$14,000,000 from the regular life assurance operations of the Company, \$5,000,000 from profits actually realized by the redemption or sale of securities and \$19,000,000 from increase in market values. And, of all the profits made in the participating branch, the policyholders get ninety-five per cent.

"I would not have you suppose that we ever speculate. We do not. We, of course, do not hesitate to sell bonds or other fixed-interest securities when they rise to such premiums that the yield is no longer satisfactory, but when we buy a stock we buy for permanent investment, we buy to keep, and we never sell merely because the market value may have risen to a high figure. We have, however, had an epidemic of security redemptions, and as a result we have the \$5,000,000 of realized profit.

High Interest Rate Earned, With No Arrears.

"Even the normal earnings of a life company depend very largely on the rate of interest it can obtain on its investments. The current rate of interest has been steadily dropping for years, and there is every indication that it will continue to drop—for how long we cannot tell. The outlook for investors in bonds and mortgages is not encouraging. That fact causes us no anxiety. We have enlisted many large groups of the ablest and most experienced, most energetic and most successful men on the continent to work for us to maintain our co-operation by becoming stockholders in the outstanding basic corporations of the country, so that we share in all the profits that they make. The dividends which we receive on our stock holdings are already two millions more than were payable on the same stocks when we bought them. Our interest account, of course, includes also our dividend receipts, and our record is illuminating. In 1921 the average rate earned by us was 6.07 per cent; in 1922 it was 6.20 per cent; in 1923, 6.38 per cent; in 1924, 6.41 per cent; in 1925, 6.49 per cent; and in 1927, if we were to use the same basis of calculation as in previous years, the rate would be 6.81 per cent. We, however, do not wish to show such a high rate, and as we always make a charge of 5 per cent against our interest earnings for investment expenses, you will note that we are quoting only the net rate, 6.47 per cent, after deducting that investment expense. The falling rate of interest has no terrors for us.

"The quality of our securities may be judged by the fact that not one dollar of interest or dividend on any bond, preferred or common stock listed in our assets as in arrears for even one day.

Business Doubled in Four Years.

The position we have attained justifies enthusiasm, but we must always look on the present as a mere vantage ground from which to plan for the future. What is that future to be? Year after year we have been confidently predicting the glorious future yet to come, and that promised future is now unrolling itself before our eyes in all its greatness and strength. But what of to-day's future? I have just been reading my own remarks of two years ago, and already the figures of which we were then so proud look small and outgrown. We have doubled in size now every five and a half years since the Company began, but our last doubling has taken only four years, and we are today growing more rapidly than ever before in our history. I predict that the figures of two years hence will make even the figures of to-day look small and outgrown in their turn.

Sun Life Sets Its Own Pace.

"People sometimes say when speaking of our progress:—'Yes, life assurance is growing wonderfully.' So it is; but the Sun Life is not content to grow only at the rate of life assurance generally. Statistics now available indicate that in 1927 the aggregate new business of all the companies operating in the United States exceeded the total for 1926 by only one per cent and in Canada by seven per cent. But the new business of the Sun Life of Canada shows an increase of twenty-three per cent. We set our own pace. Our prosperity and popularity, and the enthusiastic support of our six hundred thousand policyholders, make our growth both rapid and certain. The future still before us will, I am convinced, be more wonderful than anything we can now imagine. And it is indeed a happy thought that all that growth in size and all that growth in prosperity mean increased service to humanity, and service at steadily lowering cost to our policyholders."

The President closed his remarks by his reference to the need of safeguarding the future of the Company, as above quoted.

The Board of Directors of the Sun Life is composed of the following:—T. B. Macaulay, F.I.A., F.A.S., President and Managing Director; Arthur B. Wood, F.I.A., F.A.S., Vice-President and Actuary; Robert Adair, W. M. Birks, Hon. Raoul Dandurand, J. Redpath Dougal, Sir Herbert S. Holt, Abner Kingman, J. W. McConnell, C. E. Neill, Carl Riddon, John W. Ross, His Honour James C. Tery, Hon. Lorne C. Webster. Three new directors were added at the meeting—Hon. L. A. Taschereau, Ross H. McMaster and C. B. McNaught.

The Cleaning And Care of Furs

Furs are being used to-day by Canadian women to a greater extent and in greater variety than ever before. They are expensive and to some extent a luxury; their proper care is therefore a matter of considerable importance in order that the wearing quality and beauty may be preserved to the fullest extent. In this connection the Natural Resources Intelligence Service, of the Department of the Interior, considers that it would not be amiss at this season of the year to give some information regarding the proper care and storage of fur garments.

Furs not only collect dust but cosmetics, grease and other foreign matter which works down to the leather unless thoroughly beaten or brushed or blown out. It will be readily understood that if these are allowed to remain and accumulate they will have a deteriorating effect not only on the life of the leather but on the beauty and texture of the fur as well.

A good deal may be done in the home in the superficial cleaning of fur garments, mostly in the way of shaking and beating. Frequent shakings are a fairly good insurance against moths. Furs should always be cleaned and aired before being stored. They should not be hung in the sun but in the shade where the wind can blow on them.

To clean furs they should be shaken vigorously and then be beaten with a smooth switch or light cane. There should not be too much beating for fear of damage to the skin. A vacuum cleaner may be run over them with good effect. Hardwood sawdust rubbed into a fur and then thoroughly beaten out will much improve the appearance and the process can be repeated several times if necessary. The use of hair brushes and combs on furs should be with moderation. Combs, if used, should be large toothed.

This is about the extent to which cleaning should go in the home and if carried out frequently, it will be very beneficial in the upkeep of fur garments. Thorough cleaning of the linings and the fur should be undertaken by an expert with proper facilities and experience. The use of cleaning fluids such as alcohol, etc., are dangerous in the hands of the amateur. Besides danger from fire, irreparable damage may be done to the garment.

Some cleaners, who have little or no real knowledge of fur, advertise fur cleaning. Furs should only be entrusted into competent hands. The process of the fully equipped furrier in cleaning furs includes a considerable number of operations and is generally as follows. First the linings are removed and cleaned separately. Then the fur body is tumbled over and over in a revolving drum and afterwards laid on a padded table and whipped or beaten. The duration and severity of these actions depends on the kind and condition of the skins.

The fur is then vacuum cleaned by blowing and suction after which sawdust is moistened by a cleansing fluid such as highly refined naphtha or benzene and rubbed into the fur. After the dampened sawdust is rubbed into the fur until the grease, powder rouge and other materials have been cut by the cleaning solution, the garment is shaken and beaten again. The fur is then patted on a figure and glazed with water, care being taken so that the water will not soak into the skin, and tressed with paper between the iron and the skin. Finally the cleaned fur and linings are brought together again.

Enough has been indicated to show that fur cleaning is really a craft of its own and one which should be taken advantage of. It is frequently convenient to have fur garments thoroughly cleaned at such time as alterations or retailoring is being carried out. The fur will emerge like new and worn skins can then be easily replaced and the garment brought up to the latest fashion.

A word about storage. Do not hang furs in closets or wardrobes filled with other garments or near

Meaty Winter Dishes

These New Veal and Liver Recipes Are Suited to Cold Weather Appetites

In choosing veal, look for meat that is pinkish in color with white fat. If the fat is colored, the meat has probably been taken from an animal that is too young.

Remember above all that veal should be cooked thoroughly, as it is a difficult meat to digest easily. Also it is bland in flavor and requires more than the ordinary amount of seasoning.

Veal Chops—Surprise.

Cut a wide slit to the bone in six thick veal loin chops, making a pouch. Fill this with a stuffing made from eight slices of bread soaked in water, one-half an onion chopped fine and sautéed in butter three minutes, one-quarter of a pound of mushrooms sautéed in one tablespoon of butter. Mix the bread, which has been drained, with the onions and mushrooms, season with salt and pepper and celery salt, and moisten with a little stock or water if necessary. Put the stuffing into the pouch and hold in place by inserting a wooden skewer in each chop. Place the chops in a baking dish with small pieces of salt pork in the bottom of the pan. Bake in a moderate oven for an hour and a half. Baste frequently with stock or water. Remove the skewers before serving.

Stuffed Breast of Veal.

Cut two and one-half pounds of breast of veal into individual servings. Cover each with a stuffing made of one and one-half cups of bread crumbs, mixed with one-third of a cup of melted butter, the juice of one onion, salt and pepper to taste. Place in a slow oven, in a covered roaster for one and one-quarter hours. Baste with stock frequently. Remove the cover about five minutes before serving if the bread crumbs have not browned.

Veal and Green Peppers.

Wipe two pounds of veal cut from the leg, and cut into small cubes and roll in flour seasoned with salt and pepper. Sauté in butter until brown. Pour meat and fat into a kettle, add three green peppers cut up, one cup of water and three tablespoons of butter, or substitute. Cook very slowly for one and one-half hours. It may be necessary to add water from time to time. Thicken the gravy before serving. Place on a platter surrounded by a ring of boiled rice.

Veal à la Bismarck.

Buy two and a half pounds of veal from the round. Cut into pieces of individual servings. Roll in bread crumbs, then in a beaten egg, and then in crumbs again. Fry in four tablespoons of fat until brown on both sides. Pour tomato sauce over the

outlets and cook at a low temperature for one hour or until tender. The sauce is made of two cups of strained tomato juice, half a teaspoon of chopped parsley and one clove of garlic. Thicken by making a paste of four tablespoons of flour and two tablespoons of fat. Remove the garlic before adding the sauce to the outlets.

Creamed Liver.

A good way to use left-over liver is to serve it in a cream sauce. Cut one pound of liver into small dice. Make a pint of cream sauce and add to the meat. Allow the liver to cook in the cream sauce for about five minutes. Serve on hot buttered toast.

Liver, Danish Style.

Fry one pound of sliced beef liver for three minutes with a few slices of bacon. Leave slices whole. Cover with milk and shake a small amount of flour (about two tablespoons) over it. Let simmer for half an hour, stirring occasionally. Season with salt and pepper to taste and a little nutmeg. The dish is very good served with baked sweet potatoes.

Peppers With Curried Stuffing.

6 green peppers, 1 pound sliced liver, 2 cups cooked rice, 1 teaspoon curry powder, salt and pepper. Boil the sliced meat in a minimum quantity of water until it becomes light in color and firm enough to run through the food chopper. Add chopped liver to cooked rice and liquid in which meat was cooked. Add salt, pepper and curry powder. Mix well. Remove stems, cores and seeds from peppers and parboil for ten minutes. Fill peppers with meat and rice mixture, dot each with butter and bake thirty minutes. Serve garnished with sliced beets.

Liver, Macaroni and Cheese.

1 box macaroni (9 ounces), 1½ pound American cheese, 1 pound calves' liver, 1 clove garlic, 1 teaspoon Worcestershire sauce, salt, paprika, 1 Spanish onion, 4 slices bacon, 2 tablespoons flour, 1 pint of water in which macaroni was boiled, 1 green pepper. Break the macaroni in short pieces and put into one and one-half quarts of boiling salted water. Add the sliced garlic and boil until tender. Then drain into a hot dish.

Cut the liver into half-inch pieces, removing all outer skin and tough fiber. Cut the onion and green pepper into fine pieces; slice the bacon into quarter-inch pieces and fry until nearly crisp; then add the onion and pepper and sauté until soft. Add the chopped liver and cook until the liver is done. Then add the flour and brown slightly. Add the macaroni macaroni water, season with salt, paprika and Worcestershire sauce. Make a ring of the macaroni on a large platter, place the cooked liver in the centre, and sprinkle the macaroni liberally with grated cheese. Garnish with parsley and serve.

fires and radiators. This applies especially to wet furs; there are natural oils in furs and heat softens the leather. Attention has already been directed to the desirability of vigorous shaking and beating, etc., before putting away furs. They should then be wrapped carefully and completely in a good paper covering (tar paper and carbolized paper are sometimes used) scattering some naphthalene flakes, camphor, moth balls or cedar shavings in them. Plenty of moth preventatives should be used. Wrap the package in a second wrapping of heavy paper or place in a good paper bag and store in a dark cool closet or in a box with a close fitting lid. Some careful persons even wrap the box in one or two coverings of paper and seal.

Moths may sometimes persist even in a well cleaned and packed fur garment. They cannot however live in a temperature below zero and thus many place their furs in cold storage over the summer for safe keeping. Most of the larger furriers are now equipped to handle furs in this way. Furs are valuable and can be completely destroyed by fire. Insurance is advisable and the furrier attends to this also. Lastly one should see that the storage receipt and insurance papers are placed in a safe place, preferably the safety deposit box.

A Proud Mother

Gold Emblem Awarded to Mrs. Lindbergh for Her "Modesty" and Ability as a Teacher

Washington.—For "characteristics of modesty and idealism and outstanding work in the teaching profession" Mrs. Evangeline Lindbergh will receive the award of a gold emblem and life membership from the National Education Association at its convention in Boston March 1.

Secretary J. W. Crabtree of the association, who signed the certificate, said:

"It is a source of distinct pride to the teaching profession that the youth whom the nation has so singularly honored is the son of a fellow-worker."

The testimonial to Mrs. Lindbergh, representing the high regard in which she is held by more than one hundred and eighty thousand teachers in all parts of the country, is to be presented while her son, Colonel Lindbergh, looks on, just as she has looked on while the world heaped honors on him.

CUSHING

Mr. Johnnie Douglas, of Montreal, spent the week-end with his parents at Chatham.

Mr. and Mrs. T. Weir Jr., spent the early part of the week visiting relatives in Hawkesbury.

Mr. and Mrs. T. Ranger, of Montreal, were guests of Mrs. Piche, at Greece's Point over the week-end.

Mrs. R. Pinkerton is in New Glasgow, this week with her daughter, Mrs. J. Harcourt.

Miss Muriel Jobb is spending the week in Ottawa this week, where she had the pleasure of hearing Kreisler the celebrated violinist in recital at the Russell Theatre, on Monday evening.

Mrs. J. Innes will be the hostess of the Ladies' Aid of the United Church at their March meetings on Thursday afternoon.

Sugar-bush owners who have tapped their trees, report a small run of sap, but no syrup has been turned out as yet in this community.

SCOUT NEWS

A larger number of boys than usual turned out to the meeting. Colin Copeland is now a second class scout of the Fox Patrol as he passed the signalling test at this meeting. Eric Stephens of the Fox Patrol passed Kim's Game.

Several new games were played and all had a good time also a period was used in practicing first aid and parallel bars.

The competition is as follows:—
Wolf Patrol 34 points.
Fox Patrol 34 points.
Bull-dog Patrol 23 points.
Crow Patrol 30 points.
The result of a knot test will be given next week.

I.O.O.F. LACHUTE
Meets every Tuesday night at 8 p.m.
in McARTHUR'S HALL,
W. J. Cooper, N.G.,
T. Izzard, Rec. Sec'y., Brownsburg

Is this true
of your town?

Just as there are farmers who make very good money by intensively cultivating a few acres, so there are merchants in small towns who do a surprisingly large business.

Of course, they too cultivate their territory intensively. They don't wait for their customers to come to them—they go to their customers with frequent offers of what they know will tempt them. And they seem to sell everybody.

So regularly do they keep in touch with their customers that their offers of merchandise are eagerly awaited, and are read as if they were news—which they are.

These merchants use Long Distance frequently, to order goods for prompt shipment or to fill in sizes—and they find it good business to call important customers by Long Distance to advise them of opportunities.

WANT ADS

LOST.—During the week-end, between McPaul's Store and the Presbyterian Church, a small gold wrist watch. Finder please communicate with Watchman Office. Reward.

Where can you
buy so much
for such
PRICES?

At their sensational new prices of \$870 and upwards, Chrysler cars, with famous Chrysler quality and performance unchanged, become even greater value than ever before.

They offer outstanding values which result from a huge and constantly swelling public demand. Four great lines of cars—"52," "62," "72," and "112 h.p. Imperial"—supply every price need from \$870 to \$4685.

Inspection—better still, actual demonstration—will instantly convince you that in any Chrysler you buy performance, quality, style and value which you cannot equal in any other make costing hundreds of dollars more.

COMING EVENTS

DANCE

On Thursday, April 5th., there is to be a Dance given by the Fire Brigade, to be held in the Auditorium. There will be an orchestra in attendance, and the usual good time can be looked for.

The Literary and Dramatic Society are holding a Taffy Party in McArthur's Hall, on Tuesday next, at 8.30 p.m., to which all members are invited.

A meeting of the Argenteuil Amateur Hockey Association is called for April 4th., in the Offices of the Argenteuil Motor Sales, Lachute, at 8 p.m.

The Brownsburg Hockey Club are holding a Banquet on Saturday, April 7th., 1928, at 6 p.m., in St. Ouge's Hotel, Brownsburg. About seventy invitations will be issued and tickets will also be on sale at \$1.25 per plate. Those desirous attending must have a ticket by April 4th.

LOST.—Gold Wrist Watch, between Post Office and United Church, on Monday, March 26th. Return to Watchman Office.

AN INVITATION

One can hardly realize the change that is possible in a building until entering the premises of J. W. Cottingham Limited, on Foundry St. As will be remembered, this business was recently purchased by Mr. Cottingham from Messrs. O. B. Lafleur and Sons, since which time extensive alterations have taken place. The old drive way has now become an up-to-date office, with everything spick and span, and tasty in design. Another part of the building has been devoted to the laying out of several rooms as would be done in the ordinary household, dining-room, bedroom, parlor and kitchen. This in itself is a wonderful asset to anyone purchasing furniture, for it lets them see just how it looks and assists them greatly in making a selection. Mr. Cottingham has gone to a great deal of expense in fitting up these rooms and nothing that can make them up to the minute in comfort and style has been forgotten. In addition to the inner furnishings, there is a miniature Bungalow, displaying different designs of brick and shingles, which can be used to beautify the outward appearance of the home, when building. All this has been done with the idea of giving his many patrons a chance of "seeing for themselves" and proving the old saying true that "Seeing is Believing".

In order that everyone may have a chance to see this wonderful display, Mr. Cottingham is having a Home Exhibition, starting at 9 a.m., Monday, April 23rd, to which ALL are invited to attend. There is no obligation to buy; every one will be made welcome.

He will have for display, Rugs, Mats, Carpets, Linoleums, Congoleums, Oilcloths, Electrical fixtures, all kinds of furniture and a car-load of Kroehler Chesterfields, specially chosen, in fact everything required to furnish your home within and without. Experts will be on hand to explain the merits of the different lines and you are cordially invited to drop in and see for yourself, what can be done to make your home beautiful.

EXPERT WATCHMAKER.

A good line of Wedding and Engagement Rings, also Watches, Silverware, Chinaware, Glassware, and all kinds of Souvenirs.

A. C. LAPIERRE, Jeweller.
Bethany Street, Lachute.

WEDDING BELLS.

MOONEY-DRENNAN.

A quiet but pretty wedding took place on Wednesday last, at the home of Mr. and Mrs. Alex. Drennan, of Upper Lachute; when their eldest daughter, Miss Helen Elizabeth, was united in marriage to Mr. Michael Mooney, youngest son of the late Mr. and Mrs. William Mooney, of Upper Lachute. The ceremony was performed by Rev. Mr. Cousens. The bride was given away by her father, was dressed in Rose-Beige silk flat crepe. After the ceremony, refreshments were served. Mr. and Mrs. Mooney left on the evening train for Ottawa and other points.

CURLING

Curling ended rather abruptly this year owing to the mild spell, but the final games were greatly enjoyed by all being in the form of a mixed Bonspiel. There was very keen competition which resulted in a win for the Skip Geo. Fraser. The teams were as follows:—

Geo. Fuller Miss S. Parsons
Mrs. W. K. McArthur S. S. Campbell
Wm. Deacon Miss K. Barron
Mrs. Creswell, Skip Geo. Fraser
The Houston Challenge Cup, which for the past two years, has been held by Mr. Jno. MacGibbon was this year won by Mr. Geo. Hay.

ST. ANDREWS EAST.

Mr. J. Young, now of Montreal, spent Sunday in St. Andrews.
Miss Helen Perks went to Montreal on Friday for a visit of a few days.

Mr. A. Watt, Mrs. Jeffrey, Miss Hendry and Mr. and Mrs. Charman were in Montreal this week.

The C. G. I. T. will give a sacred concert in the United Church on Wednesday evening, April 4th., at 7.30.
Mr. Charles Coleman, and Mrs. Coleman (nee Jennie Ireland), spent the week-end in her father's house here.

Mr. Wm. Rodger, Mr. John Fraser and Mr. John Bradley were in Montreal on Tuesday to hear Harry Laurier.

Mr. A. H. Shorey's family, Mr. Irwin, Mr. Drysdale and Mr. Hugh Allen have been up this week from Montreal.

Mrs. De Laronde had a week-end visit from her two sisters, Mrs. Tedford and Mrs. Eaton and her niece, Miss Audrey Eaton.

The show is still two feet deep on our avenues and boulevards but crows have returned, and a little maple syrup is offered for sale at our doors so spring is evidently near at hand.

The Young People's Society met in the Church hall and besides the usual routine discussed the question "can young people of today render more service than those of sixty years ago"? Our opinion is that with autos and airplanes, agricultural colleges and new-fangled implements, they should be able to do so; but still when the gardening begins it is likely the old man who will have to get on the overalls and duff into the work.

—Come and select your New Easter Hat, at Habib's Brownsburg, all the latest of styles, personally chosen by Mrs. Habib. Just glance at our other advertisement in this paper.

—An Auction Sale of the house and moveables belonging to the late Wm. S. Todd, East Ward, Lachute, will take place on Saturday, April 7th., at 1 p.m. Further announcement by posters.

LOCAL NEWS.

Miss J. Valpy spent the week-end in Montreal.

Mr. Robt. Todd spent the week-end in Montreal.

Mrs. Wm. Deacon and daughter Louise are visiting in Ottawa.

Mr. Jas. Calder, of Montreal, was the week-end guest of his parents.

Miss Tanner, French Inspector, was visiting the Academy early this week.

Mr. and Mrs. Stanley Goldworthy spent the week-end at Kitchener, Ont.

Mr. Walter Wert, of Senneca Falls, is visiting with his family this week.

Mrs. Walker McArthur is spending this week in Huntingdon and Montreal.

Mrs. J. E. Constantin left on Monday for Montreal, where she will reside.

Mrs. Vasey, of Montreal, is the guest of her daughter, Mrs. Roberts this week.

Mr. and Mrs. Robt. Hamilton and daughter Shirley, spent the week-end in Montreal.

Mr. Kenneth Campbell of Montreal, was the guest of his parents for the week-end.

Mr. Beryl Todd left last week to take a position with the A.O.A. of Montreal.

Mr. and Mrs. W. Walsh, of Valleyfield, were week-end guests of Mr. and Mrs. E. F. Ayers.

Mr. Chas. McBurney, of Quebec, was visiting his many friends in town over the week-end.

Miss A. L. Moore spent a few days recently, in Arundel, owing to the illness of her sister.

Mr. and Mrs. H. Wall, of Montreal, were guests of Mrs. R. Miller for a few days this week.

Miss Marian Inglis and Miss M. Morrison spent the week-end at the latter's home in Lachute.

Mrs. Leslie Morris left on Saturday to attend the wedding of her sister Hazel, which took place on Monday in Toronto.

Mr. David Laurin was removed to the General Hospital recently, where he underwent an operation for appendicitis.

Mrs. Wm. Ball is spending a few days in town, prior to entering the Women's Hospital, Montreal, for 3 months training.

The many friends of Mr. Lionel Lafleur are pleased to see him home after his recent operation at St. Mary's Hospital, of Montreal.

Mr. A. N. MacVicar was the recipient of a nice Waterman's Fountain Pen, from the Staff of the Bell Telephone Co. here, on his departure to the Offices in Montreal.

We are pleased to welcome into our community, Mr. C. Gillard, of Devon, England, who arrived on the "Minnesota" last week to take up employment with Ayer's Limited.

One of our local skaters, Mr. M. Brissou, of Lachute, attended the Carnival in Montreal on Wednesday evening, where he gave some good exhibitions in Barrel Jumping.

We are pleased to note that one of our Town Boys, Mr. Guy Dolg, has been transferred from Parkside, Sask., as manager of the Bank of Nova Scotia, at Westside, Saskatoon. Something No-one should Miss

Cottingham's Limited invitation for Monday, April 23rd., to see their splendid Home Exhibition, at the former factory of O. B. Lafleur, on Foundry Street.

Mr. E. Larocque, of Legal, Alta., returned recently to his home, after spending several months visiting with his brother, Mr. A. Larocque, and his sister, Mrs. Z. Rochon, of Lachute, and Mrs. Jos. Belanger, of Montreal.

—Furniture, Beds and Household Furnishings. We have a big assortment on hand, which are being sold at Right Prices. See us first. J. W. Cottingham, Ltd.

The many friends of Rev. R. J. Miller, pastor of the Presbyterian Church in St. Andrews East, will be sorry to hear that he will be leaving soon, having accepted a call to the Fort Coulonge Church.

BIRTH.

BOYD.—At Lachute, on March 25th., 1928, to Mr. and Mrs. Ernest A. Boyd a son.

CARD OF THANKS

Mrs. Albert Matthews and family wish to thank their friends in this community for their help and sympathy, during the recent illness of the family.

Weldon Bros. of Calumet, have opened an up-to-date Show Room in Jno. McPaul & Son's Block on Main Street, Lachute, where they will have on hand the Celebrated Graham-Paige Automobiles and Trucks, also Durant Autos and Rugby Trucks. Messrs. Louis Lafleur & Son, Lionel have been appointed as local Agents. At the Calumet Show Rooms they will handle the Overland, Whippet, Willys-Knight, Graham-Paige, Durant Autos and all Trucks. Their Garage is up-to-date and repairs will be quickly and satisfactorily done.

THE LATE JOHN A. CROZIER.

The death occurred somewhat suddenly on Sunday last, of Mr. John A. Crozier, one of our respected citizens who with his wife had been a resident of Lachute for some twenty years. He was born in the Seigneurie and had spent a considerable number of years in St. Jerusalem later moving to town where he was well known. He was a devoted Christian gentleman and a member of the United Church. The funeral was conducted on Tuesday, by the Rev. Mr. MacKinnon, assisted by the Rev. Dr. MacLeod and Rev. Mr. Lackey, interment taking place in the Lachute Cemetery.

He leaves a loving wife and three sisters, Mrs. Simon McGillivray, of Verdun; Mrs. Alex. Stewart, of Calgary; and Mrs. Jno. McGibbon, of Sauk Centre, Minn.; to mourn his loss.

The pall-bearers were Messrs. Jno. Albert Thompson Jno. M. Campbell, of Lachute, and his nephews Messrs. Dan and Andrew Davidson, Hector and Donald Sturgess, of Montreal.

Among those attending from out of town were, Mrs. Robert Tait, of St. Laurent; Mrs. Farquhar of Montreal; Mrs. Simon McGillivray, of Montreal; Mrs. Richard Ryan, of Montreal; Mrs. Wm. John Strong; Mrs. J. W. Reid; Mrs. C. Muir, of Montreal; and Mrs. D. Lough, Rosemont.

GRENVILLE'S OLDEST MASON DIES.

The death occurred on Wednesday, March 21st. inst., at Grenville, Que., of the late Alexander Goudie, in his 76th. year, after an illness of a few months, though he had been in poor health for some time.

Mr. Goudie had in his earlier days, resided at Little Rideau, Ont., and then took up his residence in Grenville, Que., where he has resided since except for some winters which he spent in Ottawa.

He joined the Masonic Order with the old Hawkesbury Lodge, G. R. C. which was afterwards closed. He was a Charter member of Grenville Lodge, A. F. & A. M., No. 1, G. R. C., and was a prime factor in having the Lodge instituted.

He was buried Friday, Mar. 24th. inst., with full Masonic honors, the ceremony being conducted by Grenville Lodge, Rev. Mr. Williams of the Presbyterian Church conducting the Church services.

He is survived by his widow, one sister Eliza, R. F. Goudie, of Seattle, a brother, and the following children:—S. D. Goudie, of Lachute, Que.; W. K. Goudie and J. L. Goudie, of Ottawa; R. F. Goudie, of Toronto; Alex. H. Goudie, of Cochrane; Mrs. J. MacKay and Miss Eleanor Goudie, of Ottawa.

The following floral offerings were received, Grenville Lodge, No. 101, A. F. & A. M.; Capital Lodge, No. 48 K. of P., Ottawa; Dominion Bureau of Statistics, Ottawa; Signal Inspection & Test Dept., Ottawa; Can. Nat. Railways, Toronto, and C. F. Young.

The body was interred in the family plot at Chute au Blondeau, Ont.

CUSHING.

Mr. and Mrs. Gordon Higginson, of Hawkesbury, were Sunday guests of Mr. and Mrs. T. Weir, Jr.

Mr. and Mrs. F. Gaston visited the latter's mother Mrs. Hammond, of Centreville, last Sunday.

Miss Pearl Dawson, of Stonefield, Heights, was a guest of her sister, Mrs. C. F. Watson the latter part of the week.

Mrs. Jas. Harcourt and Miss Marion Harcourt, of New Glasgow, visited the former's father, Mr. R. Pinkerton on Friday last.

Miss Tester, of Montreal, visited the Misses Corner and Gaze, at Mascot Lodge, last week, and Miss Holmes also of Montreal, arrived on Saturday for a week's visit.

Miss Tessie Robert, of Monaca, is at present spending a couple of weeks in Montreal, with her sister, Mrs. E. J. Mahoney.

"SALADA" TEA

The LAND OF FORGOTTEN MEN by Edison Marshall

BEGIN HERE TODAY.

Peter Newhall, Augusta, Ga., flees to Alaska, after being told by Ivan Ishmin, Russian violinist, he had drowned Paul Sarichef, Ishmin's secretary. He joins Big Chris Larson in response to a distress signal at sea, giving Larson his sea jacket. Their launch hits rocks. Larson's body is buried as Newhall's. Peter, rescued, finds injuries have completely changed his appearance.

Dorothy and Ishmin go to Alaska, to return Peter's body. They do not recognize Peter in their head guide. A storm strands them at the grave. Ishmin goes for supplies. Peter falls in a gully on a hunting trip. Dorothy finds her greatest happiness in rescuing him. Ishmin returns and Dorothy accepts his proposal for immediate marriage by a native priest. Ishmin plays their wedding music.

NOW GO ON WITH THE STORY.

At that instant he was whole worlds and centuries apart from her. She saw him as the Mongol, his slanted eyes alight, devoured by his Oriental passion, lost in an alien ecstasy. She felt estranged, unspeakably terrified. Yet even now, as the music faded, she must stand beside him at this crude cross so white in the dusk. She must go to him, like a maiden sacrifice to some unearthly, heathen god. It mystified her, filled her with a poignant sense of imponderable prophecy, that the cross that marked the grave should be the only whiteness left in the spreading dusk.

She was hardly aware when the music stopped. The wind and the softer noises of the sea and the night continued its refrain. Ivan stepped beside her, then they walked together until they stood in the place where they would plight their vows.

In that moment Pavlov had become a figure of unmistakable dignity. He was no longer merely a packer, a degenerate descendant of many crossed breeds. He was the Priest, the high minister of the church. He stood erect, his voice low and full of feeling, and it was plain that he considered this a holy rite, sacred to his heathen gods.

Ivan had not been mistaken in thinking that the ceremony would be impressive. Here were the eternal realities—the sea and the sky and the storm-swept shore—and the weird tone and quality of the night added to it an effect of dignity. The worship that throbbled in Pavlov's tone was real, even if it were mistaken, even though he had long turned away from the light to how before graven images. It was exactly the kind of marriage that Ivan, in particular, would have preferred. It appealed to his eternal sense of fitness, the attribute of his genius; and it lifted him out of himself like the passion of his own great music.

Very soon the vows were spoken, and ignoring the presence of the priest and the two witnesses, Ivan took his bride in his arms. Pavlov shook hands with them both, himself carried away by exultation, and Fortune Joe came up clumsily to offer his good wishes.

"We owe a lot to you," Ivan told him happily. "That message to 'change the name' that you brought through helped more than any other

thing to make up Mrs. Ishmin's mind."

Dorothy turned, her heart leaping, to receive Pete's congratulations, but the head guide still loitered in the dusk. In the same instant he was almost carried away by a half-mad impulse to take the girl in his arms for one kiss that by an old custom at weddings he might rightly claim. It would mean more to him than mere beauty and loveliness; it would be a memory to harbor in the days to come and it would some way exalt him in ways beyond his ken. It was not just a whim, a delusion; all his longing and his loss had some way centred, for the instant, in this; and it was suddenly a veritable need. Some way that kiss would be an enduring token of what he had been and what he had given, and it would help sustain him in the darkening future. But he repelled the impulse with an iron will, wondering, for the instant, if even to dwell upon it signified the first wandering of insanity. Such an act would only put him to needless trial, open old wounds. She would know his lips of old and feel the love that poured through them; he might, by one selfish act, risk the inviolacy of his disguise. Even yet it might cost her her happiness.

"Aren't you going to wish us well, Pete?" he heard the girl say in the dusk.

Her tremulous voice brought him to himself. "In just a minute," he answered as casually as he could. "I've got to get the camp ready for you first. After that I'll give you all the good wishes that I know."

He turned, groping into the gloom, and lifted his face to the doubtful mercy of the wind. It swept by him, chanting, into the fastnesses of the night; and he wondered if it would not blow out the wan flame of his own life. He had a feeling that oblivion was near; that somehow, because the need of him was done, the curtain would soon fall over his own existence. Surely it was futile henceforth; the drama was concluded, the game was through and the counters put away.

He felt that the will to fight on—without which he could not survive in this hostile land—had departed for good and all. Already he could glimpse this stormy shore without him, the wind shrieking by, unheard by human ears, the snow lying untracked, the storm veiling itself in vain fury on the desolate hillsides. His four companions would sail away on the morrow; and there might be a time of waiting—perhaps long years, possibly only months—for the final wind-up of his destiny, but the ultimate conquest of the raw powers of the wild was certain as the rising sun. The camp fire would burn out, smothered at last by the far-spread blanket of snow, and the last wisp of smoke blow away in the gust. Then the joke would be complete.

The game was played and finished. This now was only the epilogue of a drama that was done.

It was an ironic thing that the performance of his camp duties—not even now to be forgotten—must include the widening of the bed in Dorothy's tent where the wedded pair would lie. He knelt and cut long grass, heaped it into a pile, and then loaded it into his great arms. Strangely dulled—partly from the events of the past hour and partly, perhaps, from the effects of yesterday's injury—he made his way to the door of Dorothy's tent through which Ivan and the girl had just passed. "Can I come in?" he called. "I've got more hay for your bunk."

Ivan had just closed the tent flap, but Dorothy drew it quickly aside. Pete did not look into her white face as he stumbled in. Fortunately for his peace of mind, he did not see that she was pale and drawn as he had never before seen her. He knelt on the floor and began the work of widening her bunk. He built it up with all the care he knew, spread the blankets, then slowly stood erect. He turned

with the air of a prophet to Ivan. "We've talked intimately before," he began quietly.

"Yes," Ivan agreed. "Perhaps too intimately." He studied Pete's set face, and his brows lowered. "That doesn't necessarily mean we will talk intimately again."

"We will talk intimately again." There was nothing in his straightforward gaze and firm lips to suggest the underling. "This is the last chance—you are going away tomorrow in the dory—I stay here. I've come in here to wish you happiness, particularly to wish her happiness, but I've got something else to say, too."

His voice was deep and moving, and Ivan knew that he could not help but hear.

Your wife didn't ask me to say this, but there's no one else to do it—no one of her own kin who would have the right to say it. My right is that the girl is my own race, and I am hers—and there's no one else here who is her own race. I understand her because she's an Anglo-Saxon, and I can speak for her. We talked once before about race—which is the best breed isn't the question to-night. The point is—that they are a different

"Which is the best breed, isn't the question."

breed. I know her because she's my own race—and race matters more than most people know. And because I've been out here—so far west that it's almost east—for months and years—I know you, too."

Ivan smiled, his thin lips closely pressed. "You seem to have forgotten you're the guide—not a family adviser. Please give Mrs. Ishmin your best wishes and get out."

They looked eyes into eyes. Slowly the look of scorn, of arrogance passed from the Mongol's face. This man might be of a lower social plane, of different caste and class, but Ivan could not doubt what he saw in the blue, steadfast eyes. This was no menial. He saw in him a worthy representative of a proud, unconquerable race. They were man to man, the East and the West, and Ivan looked and knew that he must listen and heed. He might hate him to the world's end—the East has always hated the conquering West—but he dared not scorn or disregard him. Pete's gaze neither changed nor lowered.

"I am the guide—I am here to tell you that I've been her guide and protector for some weeks now; and it's come to me that I want to continue to be, even after she goes home," Pete replied. "Just why this is so I don't feel the need of explaining, even if I could explain—it's enough that it is so. I want to be something more, too. To-night I'm no longer under

All Iceland Parties Favor Severing Union With Denmark

Copenhagen.—All parties in the Iceland Parliament have agreed to the desirability of canceling the present treaty of personal union with Denmark, thereby obtaining complete independence.

The movement for cancellation of the treaty, which is not revocable until 1940, is partly due to Iceland's wish to have her representation abroad in her own hands.

Iceland is united with Denmark by a personal bond of union under the Government of King Christian X. As far back as 1381 Iceland, together with Norway, came under the rule of Danish Kings, but when Norway was separated from Denmark in 1884 Iceland remained under the rule of Denmark. Since Dec. 1, 1918, it has been acknowledged as a sovereign State and is united with Denmark only through the identity of the sovereign.

your employ, and I want you to imagine that I'm her real brother—instead of just a race brother. Ishmin, I know your breed, part by instinct, part by acquaintance, and I know you individually, and this is in the nature of a warning. Remember she's finer clay than you. I know your attitude toward women, but I want to say in this case you've married above you, forever and ever, and I want you to bear it in mind. Worship her, and thank God for her, and be kind to her, every minute of every hour."

The girl tried to speak, but the words choked her, and Ivan's eyes glittered under his brows. "I heard what you said. You've gone insane. Now get out."

"One thing more. I'm not only her protector. This may sound insane, as you say, but both of you know it's true. Who gave the word that this marriage should take place?" (To be continued.)

"Have you heard the last story about my boy, aged five?" "No, old man. Nobody has."

Minard's Liniment kills warts.

Nobody was ever sorry for being straight with the boys and square with the girls.

BIG PRICE REDUCTION IN ROGERS BATTERYLESS RADIOS

Canadian Company Leads Field In Production of Batteryless Sets

Price reductions of \$26, \$45 and \$50 on the new 1928 Models of the famous Rogers Batteryless Radios were announced recently by Rogers dealers. These drastic changes are not a price "cut" on special models, but constitute the creation of an entirely new and lower price level for all Rogers Radios from now on. These big reductions represent savings, passed on to the public, through economies in purchasing, production and distribution of Rogers Sets due to the tremendously rapid increase in sales during the past two years.

There can be no doubt but that the inauguration of these new prices will stimulate radio sales, for it is now possible for anyone to own a Batteryless Radio with all its advantages and

economies at the price of an ordinary battery set.

As a representative of the Q.R.S. Music Co., the Rogers distributors in Eastern Canada, expressed it: "Three years ago when the Rogers was first introduced it was the only Batteryless Radio on the market."

Not only does the Rogers eliminate all batteries, chargers, chemicals, attachments and complicated wires, so that all you have to do is plug it into your light socket and tune in, but it takes care of variations in line voltages in different localities and in the same locality during different times of the day, so there is no danger of burning out tubes. See your Rogers dealers for demonstration.

Lady (having seen maid out with well-known but now elderly tenor): "Minna, who was the gentleman you were with last night?" Maid: "He was my brother, madam." Mistress: "Yes, he was my brother ten years ago."—Der Wah.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitation, the Tablets will be stamped with their "Bayer Cross" trademark.

Joy in Australia At Hinkler's Safety

Aviator Who Flew From England Says He Feared Only Europe's Fogs

Aided By Arabs in Desert

London.—England, like Australia, was overjoyed at news which arrived recently that Bert Hinkler, the Australian airman reported missing after completing his record flight from England to the Antipodes, was safe.

According to a Weekly Despatch cable the tidings were received with jubilation in Sydney and announced in Bundaberg, Hinkler's native town by the ringing of joy bells.

The airman's destination after leaving Port Darwin on the Northern Australian coast, where he landed after his fifteen and a half days' flight from England, was Cloncurry—the half-way stage of a 1,600-mile trip to Bundaberg. He was forced by darkness and a blinding dust storm, however, to land near Brunette Downs cattle station. Through faced with a strong headwind he came down without mishap and resumed the long reach to Bundaberg the next day.

Slept Under a Windmill

He slept under a windmill until daylight flew to Alexandria, a cattle station, for breakfast and later reached Camooweal, a Queensland cattle centre, which has been made an airport.

The news of his safety was telephoned to Hinkler's mother at Bundaberg. She had waited all night at a friend's telephone for word of him. Bundaberg had prepared a great welcome for its hero when he arrived and "taxi his airplane up to the front gate of his mother's house."

In a dispatch to The News of the World Hinkler telegraphed that his first day's flight from London was the one he feared most and felt that success was certain if he could only clear Europe and its fogs. Rome was a welcome sight.

"After that," he says, "for a long time I seem to remember nothing but endless stretches of desert. Once I sighted a group of Arab tents with tethered camels. A whole day I was lost in Libya and as I was trying to clear a space in the desert for a take-off a party of Arabs cantered up. It was an anxious moment. There were friendly overtures on my part and then they helped me with the clearing. A few minutes later I was again pushing on over the desert and then at last came the stony wastes of Palestine.

Three Impressions of India

"On India I remember three things—blistering heat, air currents that threw us about like a shuttlecock and endless crowds of kind-hearted people pressing hospitality upon us. Whenever the East Indies are mentioned I shall think of rainstorms and my gallant little machine plowing on through rain so heavy one couldn't see the ground.

"And then came the coast of Australia, a clearing in the jungle, a native hut and mosquitoes, droves and droves of them. There was a hasty filling up from a dump of gasoline tins and only 1,000 miles remained between me and home.

"The last stage from Bima to Port Darwin I will never forget. I flew for hour after hour over an unbroken expanse of sea with not a ship in sight, guided only by my compass and estimating the drift by guesswork. Almost to the minute I calculated the lagoon of land appeared on the starboard. It became sharper the nearer it grew until I saw Bathurst Island, the first glimpse of my native soil for eight years."

New Radio Station Proves Success

High-powered Broadcast Heard in Many Hither-to "Dead" Spots

Toronto.—Canada's new high-powered radio station CKGW made its debut recently. Several hundred telegrams, cablegrams and long distance telephone messages were received while the station was broadcasting stating that the program was coming through quite clearly and in good volume.

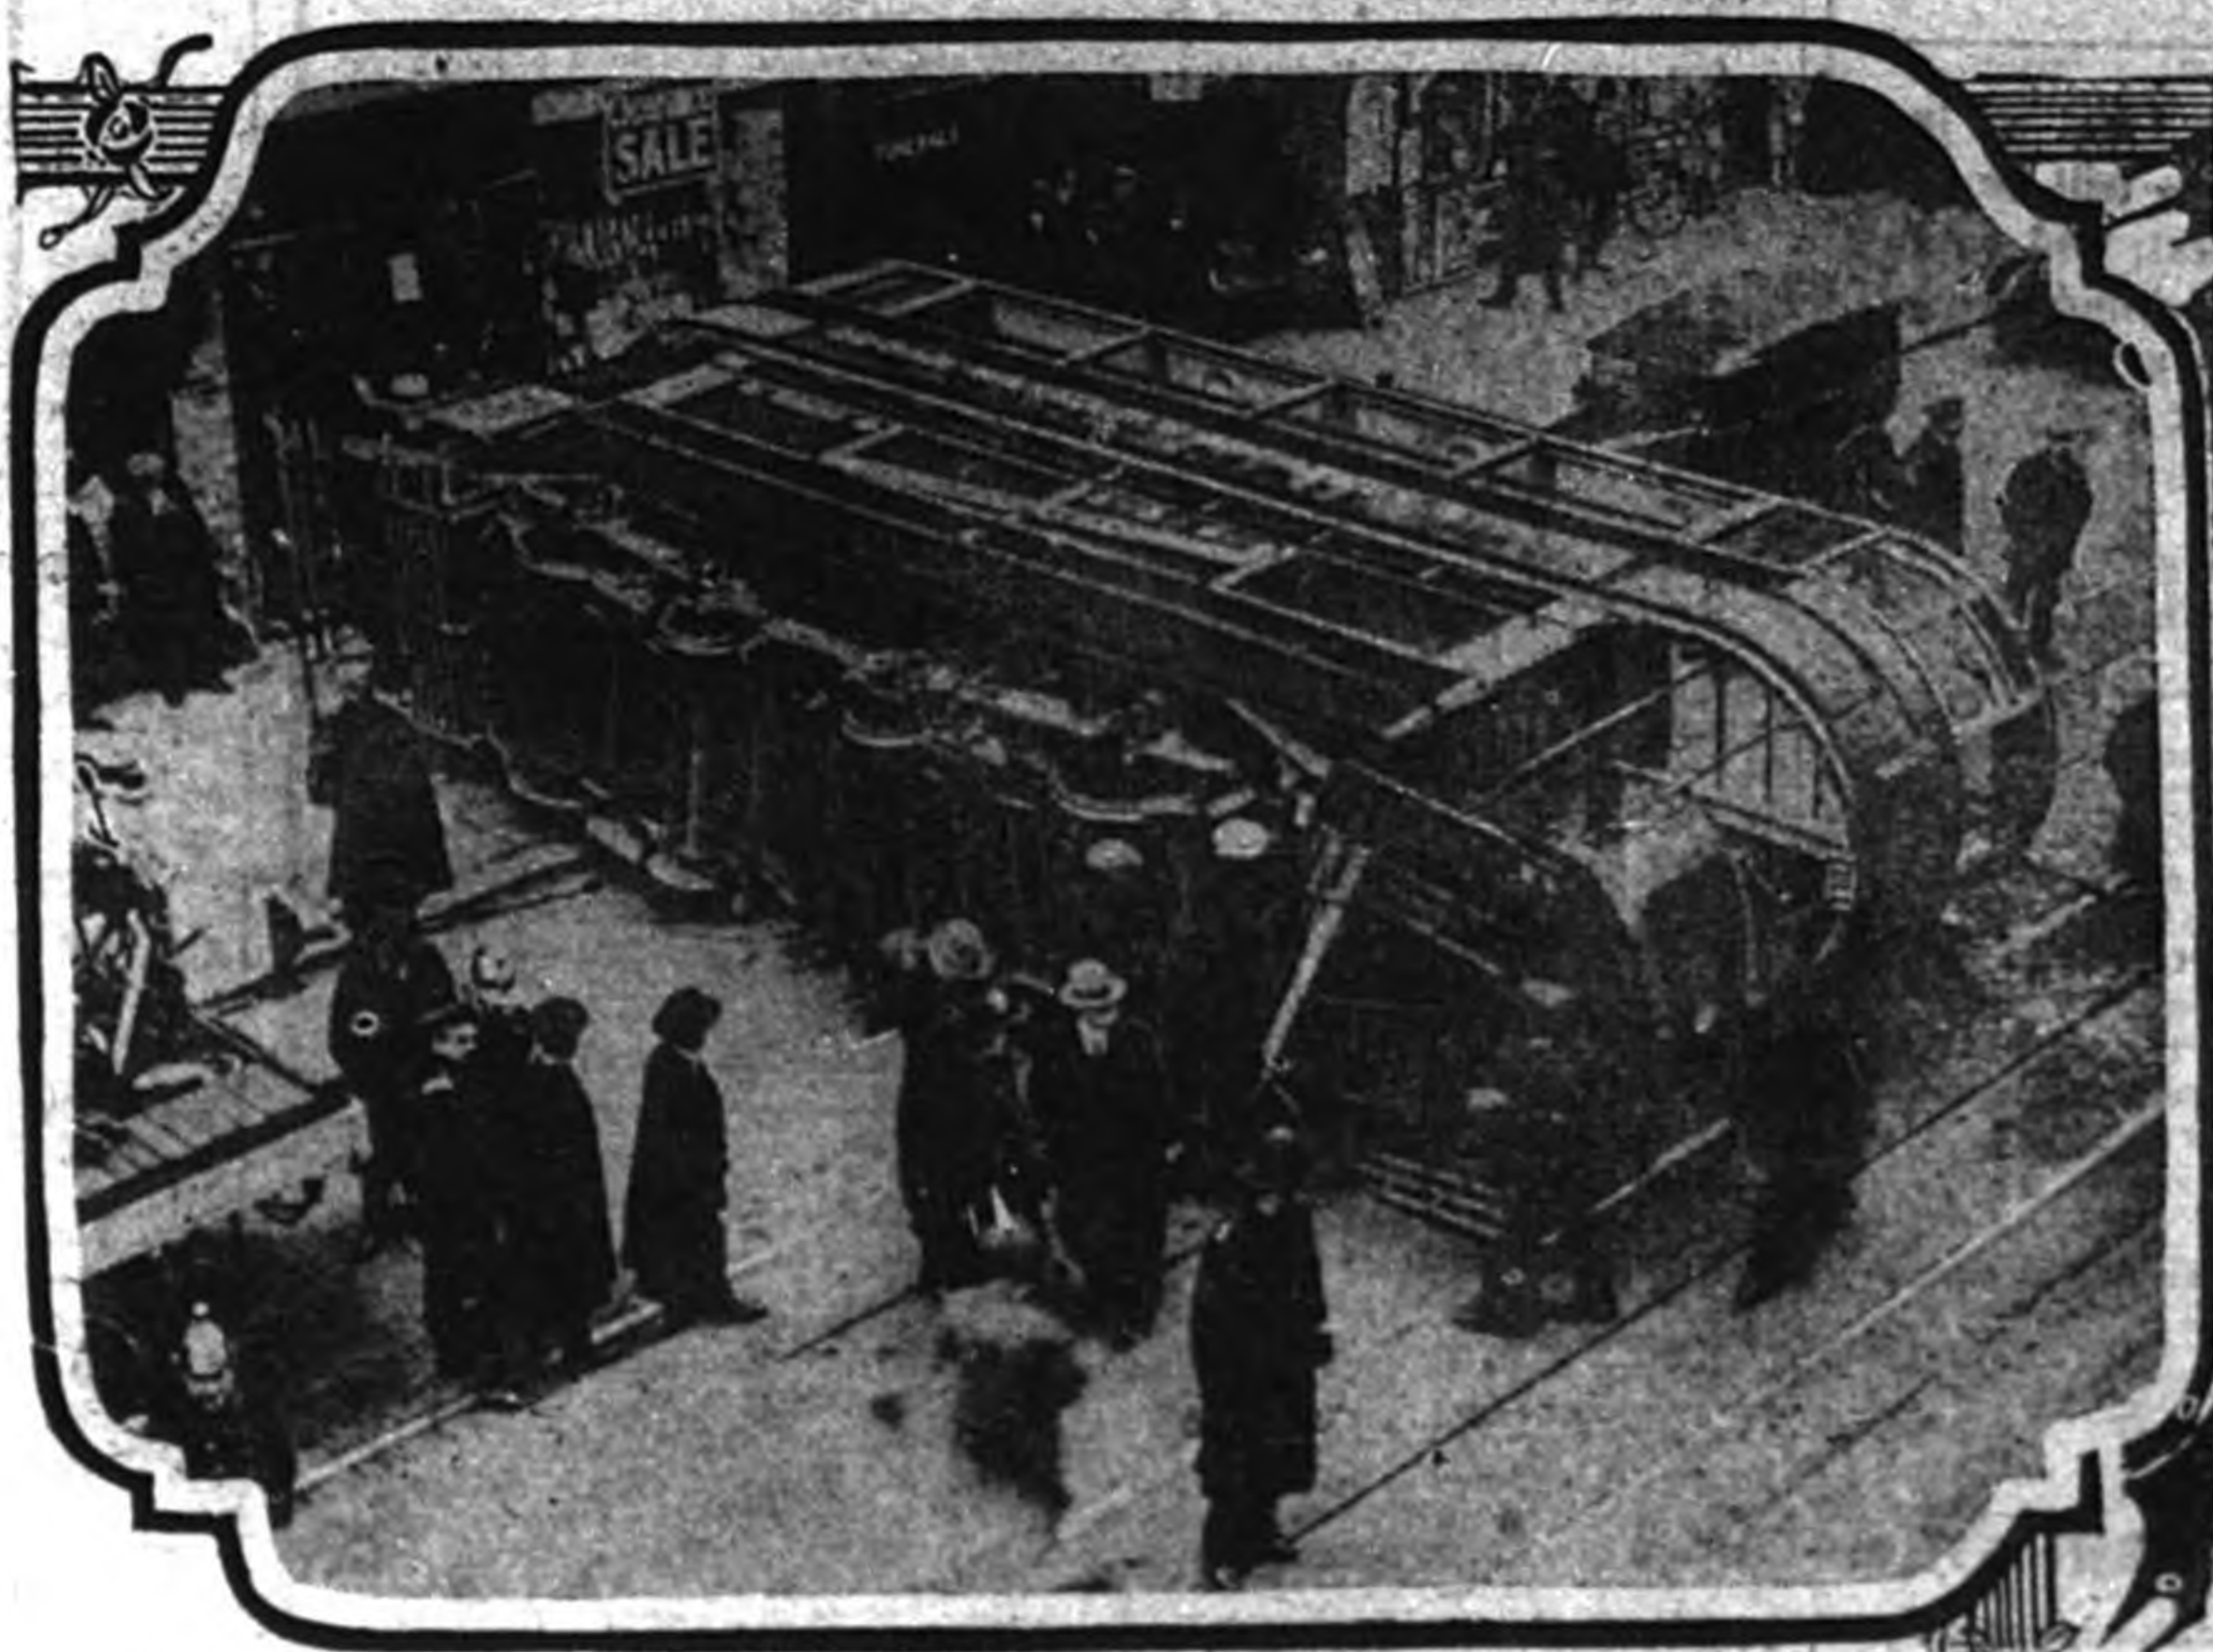

For the first time in the history of Canadian broadcasting, Hawaii reported by cable that they were getting good reception. Other points heard from were St. John's, Newfoundland, the Maritime provinces, British Columbia, Los Angeles and San Diego, California, Fort Worth, Texas, and Miami, Florida, as well as innumerable intermediate cities.

A large number of "dead" spots in Ontario, which have so far been unable to get reception from Toronto and Montreal, also reported that the broadcast was clearly audible. In fact, the station covered all of the U.S. and Canada.

It operates on a wave length of 312.3 metres, with 5,000 watts capacity. The transmitting station is located at Bowmanville, and the studios are in Toronto.

The broadcasts to date have been away above the average for Canadian stations and the announcer has a real good voice but is inclined to be a bit facetious.

London Has a Smash

AT UNUSUAL ACCIDENT AT EMPIRE'S CAPITAL
Tram took a tumble and 30 people were injured in London when a tram from Tooting to the Embankment left the rails at Belham High Road and turned over.

Skipper Wins Acclaim by Gamble With Surf to Speed His Cargo

Hailed as West Coast Hero for "Easing" Lumber Ship Across Bar With Margin of 2 Feet Under Keel; Owners—Enriched While Rival Carriers Waited

Hogquam, Wash.—Over Grays Harbor bar the surf heaved and seven big lumber-laden carriers waited inside for a smooth channel across two miles of treacherous black water to the open sea—but one skipper, O. Belleson of the West Mahwah, nosed toward the sand at half speed.

There was twenty-seven feet of water over the bar; the West Mahwah drew twenty-six. Captain Belleson watched the swell rolling in. Before his ship could ride it he signaled for slow speed with helm over to make the wave broadside, to a slight

degree. The lumber-loaded ship was eased quietly on again, until the next swell was met. On and on, for forty minutes, over the two miles of bar with but a couple of feet under the keel, the West Mahwah worked like an aggressive football team seeking yardage. Aground a million dollars worth of lumber would be useless in wild salt water; but safely over and fourteen hours ahead of its rivals the lumber carrier would be making money for its owners, so Captain Belleson is rated along the West Coast as the newest hero.

British Deplore Big Prices Paid For Old Armor

Collection in Tower of London Suffers Because of Inability to Compete With American Bidders

Rare Pieces Come to U.S.

Only Recent Additions to English Store Gained by Transfer From Museum

While the other national collections are, year by year, enriched by the acquisition of works of art and historical specimens of great value, the armories of the Tower of London, for various reasons, have remained in statu quo for a considerable period, says "The Times," London. In the middle of the nineteenth century the admission fees to the armories were earmarked for a purchase grant, and from this piece of great interest were acquired at sales, notably the Brocas sale in 1834, the Bernal sale in 1855, and at the dispersal of the collections of the Earl of Shrewsbury, 1857; of Baron Penker, 1858, and of Baron de Cosson, 1893, the last purchase being a pistol at the Gurney sale in 1898.

Of later years the fantastic prices given by American collectors for armor and weapons have rendered competition in this respect quite impossible, and the magnificent armors of the Earls of Cumberland and Pembroke, made in English workshops by the great master Jacob Halder, of Greenwich, have been allowed to leave the country without protest, while during the same period large sums have been raised to preserve the work of foreign painters for our national collections. The last important additions to the armories were the fine pieces which formed part of armors already in the Tower that the King transferred from the Royal Armory at Windsor in 1914.

For nearly 100 years the little-known Rotunda Museum on Woolwich Common has sheltered several examples of outstanding interest which were placed there at a time when the Tower was so overflowing with war stores that no room could be found for any additions to the armories. These pieces were acquired early in the nineteenth century, and were added to by General Lefroy, who purchased some fine examples of fifteenth century armor at Rhodes in 1866.

Collection Transferred
During the present year the Com-

mission of the Royal Artillery Institution, who have charge of the Rotunda, were approached with a view to transferring these specimens from the Rotunda, which is not easy of access, to the Tower, where they would be seen by large numbers of the general public. This transfer was agreed to, as the Royal Artillery Institution have rightly considered that in this respect they are trustees for the public, and that the education of the public in the best and most convenient manner is of the first importance.

The first acquisitions include a fine suit of the early part of the sixteenth century, russeted, with bands of gilding. It is considered to have belonged to the Duc d'Uze, and according to a tradition, for which no authority can be found, it was worn by the Chevalier Bayard. The leg armor is of exceptionally fine workmanship, but the whole suit is of such small proportions that it must have been made for a youth of slight build and can hardly have belonged to such a mighty

Other Rare Examples

The actual provenance of the Rhodes armor is vague, for from General Lefroy's autobiography we learn merely that it came from the Castle of Rhodes. It must have been the whole or part of a store left by the Knights Hospitallers when they were driven out by the Turks in 1522, for all the pieces may be dated in the fifteenth or early sixteenth centuries. The most important pieces are the salade, of which there are four or five

British Births are Falling Below Low Mark of 1927

London.—Not only was last year's birth rate in England the lowest on record, but the rate is still falling.

Detailed figures for the last three months of 1937 show that the births registered correspond to an annual rate of 15.4 per 1,000, which is 1.3 below that recorded in the corresponding quarter of the previous year. It is the lowest birth rate recorded for any quarter.

varieties, and an early armet, which is a rare example of such a helmet retaining the brass "vanelles," or studs, to which the camail of mail was attached. The salades bear armorers' marks, one being that used by the famous Missaglia family of Milan. On these helmets are found several original rivets fashioned in a distinctive fashion. There are also a large number of breast and back plates bearing the graceful fluting peculiar to the fifteenth century before Maximilian and his master craftsman Conrad Seusenhofer had introduced the deep channeling which at the present day is known as "Maximilian." Of this latter type of armor there are three breastplates, one of which for sheer metal working is magnificent, the deep channeling and the fine roping at the margins being undoubtedly the work of a master. The late Sir Guy Laking in his monumental work on European armor, writing of this breastplate, says: "The flouting and roping are superb, and the suit to which it belonged must have been unparalleled in its simplicity and boldness." There are also fine graceful leg pieces, elbow pieces and some early pauldrons, or shoulder defences, of Italian style, excellent and rare examples of the armor of the fifteenth century, and a splendid "Gothic" chanfron.

Britain Builds Altitude Fighters

Challenges the United States to Turn Out Better Planes

3-TYPE MACHINE

Special Attention to Securing Fighting Airships with Machine Guns

London.—Great Britain has challenged the effort of the United States to build super-altitude fighting planes.

Already, as if in answer to the recent contract which the U.S. Air Service has placed with the Curtis Company for fighters capable of attaining an altitude of eight miles, the air ministry has inaugurated three competitions designed to improve fighting airplanes.

The three types of machines in the competition are:

The single-seater fighter.

The "interceptor fighter," whose special duty will be to deal with invading aircraft.

The multiple gun fighter.

To capture orders for these machines, every military aircraft company in Great Britain is busy on designs. In some cases construction of experimental machines already has begun. Firms which hitherto have concentrated on production of sea-planes and flying boats are turning their attention toward construction of fighting land planes.

Great Britain's fastest aircraft recently—the Schneider Cup race winner—is a seaplane. It maintained an average speed of 218.49 miles over a 200 mile race, while the Italian seaplane which holds the world's speed record averaged 236.34 miles an hour in four trials over a four-kilometer course. Both records are far in excess of any speed ever attained over similar courses by a land airplane.

"Higher and faster" is the watchword of the air ministry, and firms which cannot produce fighting machines which, with full equipment, can attain a speed of more than 200 miles an hour and climb to 30,000 feet or more in a few minutes, are believed to have small prospects of getting government contracts.

Special attention is being given to production of fighters with five and six machine guns. These will be two-seaters in which the pilot will operate two guns, and the observer three or four. It is understood great progress is being made in the development of this class of fighter, but details of the new machines are being kept secret.

It is known, however, that their specifications are based on the expectation that they be used in air battles fought at altitudes of five, six and seven miles, and that all the planes will be fitted with super-charged machines that will enable them to maintain speeds of at least three miles a minute at these lofty altitudes.

Foot, foot! We're off!
"When is a hat not a hat? Don't know—give it up."
"When it becomes a girl."

Sensational Speed By Aero Engine

Italian Claims "Theoretical Speed" of 625 Miles An Hour

London.—Attaining 12,000 revolutions a minute, an aero engine which will make a "theoretical speed" of 625 miles an hour, and an "effective speed" of 470 miles an hour, has been designed by Signor Narciso Lombini, of Venice. Aviation experts are expecting interesting departures from the prevalent constructional details since no type of engine now known can be made compact enough to reach such a tremendous velocity.

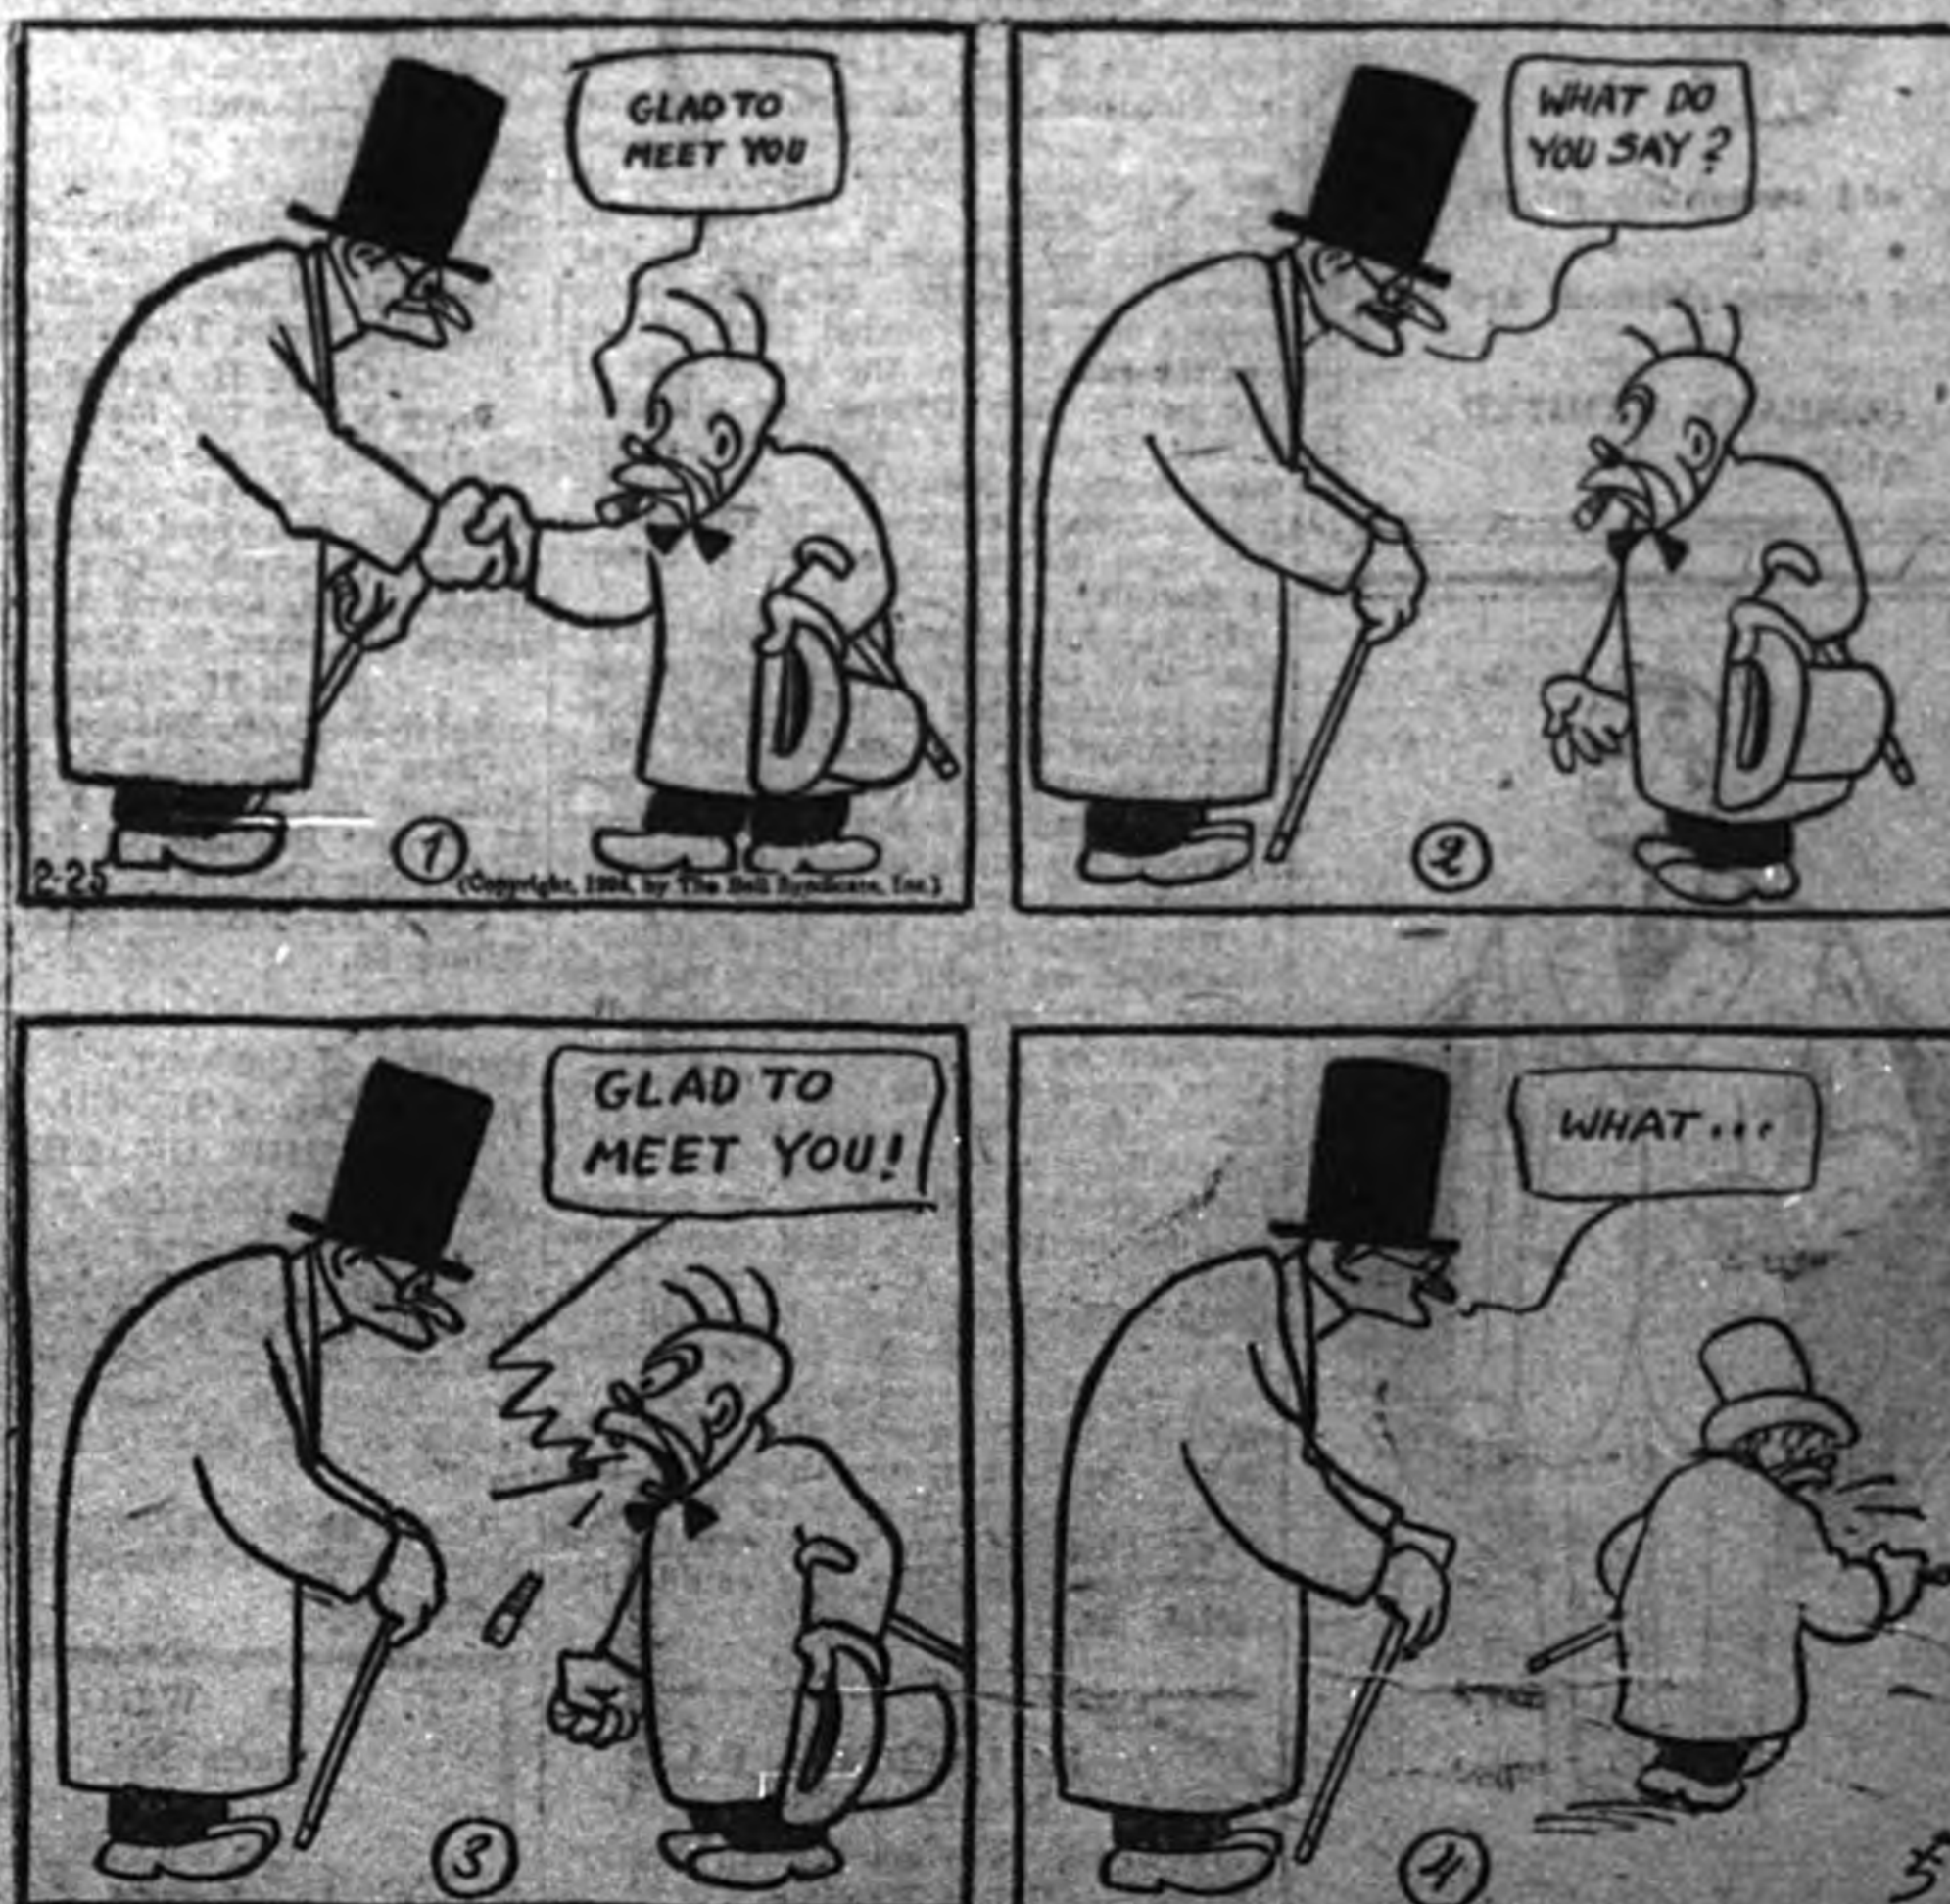

London 'Pubs' Have Dropped 24 Per Cent. Since 1904

Eighteen hundred and forty "pubs" have been closed in the London area since the Licensing Act of 1904 went into effect. That is 24 per cent. of the "pubs," or saloons which existed in 1904.

The number continues to decline annually, to the discomfort of owners of licensed premises who are clamoring for the repeal of the act on the ground that further reduction is not necessary.

"Pub" owners are also endeavoring to have the closing hours altered in such a manner that they will be uniform throughout the London area. At present many public houses must close at 11 at night, while those in neighboring boroughs may remain open till 11.

ADAMSON'S ADVENTURES—By O. Jacobson

He Needs Inspiration.

Are you ready for the Spring !

Our spring stock is now complete, and we invite you to see it. Our tailor-made clothes will be especially pleasing to you in style, smartness, and quality. Also a good stock of ready made clothing from the best of makers. HIGH CLASS TAILORING.

Geo. Licop, Main St. Lachute.

To Farmers --

Why not enjoy the pleasant evening concerts on the radio ? What is more soothing to the mind than the wonderful charm of music, after a hard day's work. You can have the pleasures as well as the city men, so just pay us a visit to our new store, and select your radio set. LOWEST OF PRICES

We are Agents for all Farming equipment, also repairs done of all kinds.

SUNDAY OBSERVANCE

"It is only in the Catholic province of Quebec that the Sunday Theatre reigns," said he, because the practice had been allowed to continue for years was no reason why it should not be stopped.

Dealing with the matter of Sunday closing, the Premier said that he had never refused to grant permission to any society or individual to take action against those who broke the Lord's Day Act in this respect. Yet, he said, the Government was being constantly condemned by those who preached for Sunday closing, "sky pilots" and others who wanted to lead others to heaven, but they themselves never took any steps to co-operate with the Government. The same situation prevailed for the municipal authorities. The Government had repeatedly offered to pay the costs and loan its lawyers to those who wanted to take action against theatres which open on Sunday.

"I am not afraid of the responsibility, and am willing to be the target," declared Mr. Taschereau.

In the above words the Montreal Star, of last Friday, March 23rd., reports the final proceedings of the question that has been looked forward to with vital interest and which came up during the closing session of the Quebec Legislature just prorogued.

We do not like the attitude of Premier Taschereau, as he sarcastically refers to the inactivity of the "sky-pilots" in not availing themselves of the generous offers of the Premier to furnish them with the money and the lawyers to fight the cause of Sabbath observance in proving the validity of the Theatres and Stores thus to do business on Sunday. If the Government are willing to furnish the lawyers and pay the costs, why not complete the transaction by themselves taking action and establishing the right, rather than depend upon private individuals to furnish information necessary to put the law into proper effect.

The cause of the present stir is the result of the Commissions report into the awful calamity of the Laurier Palace fire by which some 80 poor little hearts lost their lives. But the cause was not "The picture," but rather the negligence of the Provincial Department in not seeing that the Proprietor of the Building had his premises in such shape as to make impossible the occurrence of such a catastrophe. Another fact contributory to the accident was the greed of the proprietor in contravening the law by admitting so many youngsters that were so visibly under age, and here again is where officialdom failed in its responsibility.

In Lachute, the public are fortunate in having as proprietors of the "Rex" Theatre, Mr. and Mrs. Passio, who endeavour to present their patrons with pictures of good class, many of which are of real educative value. Recently they put on the wonderful production of "Ben Hur" so appreciably enjoyed by all who saw it, and whose principal part was taken by Ramon Novarro, who intended as a boy to become a monk, but circumstances changed his plans, though not his interest in religion and according to an interview by Mary B. Mullett, in the American Magazine of March issue, who first seeing the picture recalled most vividly not the frenzied rush of the chariot race! Not the tense face of the young man driving his plunging horses to victory! But, instead, the quiet scenes where that same young man somehow conveyed to those who had eyes to see, a sense of inward spirituality.

In her interview Miss Mullett says that this talented young movie star was so interested in talking of spiritual things that he said—"Don't think that because I am a motion picture actor instead of a monk, that I have changed my ideas about the purpose of living. I am just as sure today as I was then, that life is absolutely wasted if we make it only a material thing. In reply to Miss Mullett's question as to whether he believed there was a God, he said "I certainly do." It is inconceivable that this marvellous world should not have had a Creator. People reject religion because as they say they cannot understand it. But if our human brain could understand God, He would not be God! He would be no greater than we are. As soon as we know—or think we know—all there is to be known about any one thing, we lose interest in it and pass on to something else. If we were capable of comprehending Him, He could not satisfy us.

Outdoor taste is well catered to in the April issue of Rod and Gun and Canadian Silver Fox News which is just published. The latest issue of this sporting magazine contains an interesting collection of stories of hunting, fishing and camping as well as many useful and informative articles concerning the various phases of outdoor life.

Helpful articles on the special subjects are included in Fishing Notes, edited by G. P. Sladen, Guns and

Ammunition, edited by C. S. Landis, and Kennel, edited by C. G. Hopton and L. E. L. Taylor. The Canadian Silver Fox News section also contains useful articles both in English and French on the latest developments of the industry and the care and management of foxes.

Rod and Gun and Canadian Silver Fox News is published monthly by W. J. Taylor, Limited, Woodstock, Ont.

Beyond the Reach of Your Creditors

Suppose you should die to-morrow and your executors were called upon to wind up your estate, what would be left for your wife and family?

Precious little, perhaps. But if you hold an Imperial Life policy made payable to your wife, and you should die hopelessly in debt, your creditors couldn't touch the life insurance money. That would go intact to your widow.

You never knew that? Well, there's a whole host of other features of Imperial Life policies equally attractive.

Write for our booklet, "A Few Facts." It's full of interesting information about the advantages of Imperial Policies—and it's free.

For the Boys and Girls

"NOTHING TO DO"

BY LUCY RANDALL COMFORT.

"Oh, dear," said Haddie. "I don't mean a grown folks hospital—I mean a children's hospital."

"Where?" said Haddie. "I'll tell you, children," said Miss Midget. "There was a little girl run over and badly hurt on this very avenue, not more than an hour ago."

"Yes!" cried Patty and Haddie in chorus. "We saw her. And did you hear about it, Miss Midget?"

"I was at the hospital, dear, when they brought her in," said good Miss Midget. "But the wards were all full, and there was no room for her. So I had her carried to Mrs. Budge's house. I knew Mrs. Budge had an upper room that she wanted to let, so I engaged the room for a month. Doctor Cheyne, of the hospital, came with me and set her broken leg and arm, and we will visit her once a day."

"But now the question is, how to get nurses. Old Mother Budge is too firm to go up and down stairs, and I can only spare a few minutes daily. We want some one to give the child her medicine, to bathe the wounded limbs, to read to her and amuse her, and—"

"Oh, Miss Midget," cried Haddie, with her face brightening, "couldn't I go?"

"And me, too?" eagerly added Patty. "Will you each of you give two hours a day to this poor, friendless and nameless child?" said Miss Midget. "Mind, I don't promise you any reward. I know two other little girls who will help me, and between us all I think we can get the child well cared for."

"We could read fairy stories to her," said Haddie, gleefully. "We could show her how to put the dissected maps together," said Patty. "She could do that, Miss Midget, you know, with one hand."

"Yes," added Haddie, "and since we joined the Children's Cooking Club we learned to make jellies and nice little dishes that perhaps she would like!"

"There's no 'perhaps' about it," said Miss Midget; "of course she'll like 'em! Well, girls, if your mothers are willing, I'll call for you this afternoon, and we'll organize our hospital at once."

"There was no more complaint about 'nothing to do,' Haddie and Patty went at once to the play-room to select such toys and books as they thought best adapted to their particular emergency, and to tell 'Marie Antoinette,' the big French doll, that she needn't expect them back at present. And there was so much to plan and arrange for that the moments seemed actually to fly by as if they had wings.

Poor little Mary Higgs, the hurt child, lay all bandaged and splintered on the bed in Mrs. Budge's up-stair room. The sun was shining brightly in at the uncurtained window, flies buzzed about, and one by one the big tears rolled down Mary's cheeks and splashed on the pillow.

For Mary had no one to care for her as other girls have. She was a desolate orphan, out of an asylum, and had earned her scanty living heretofore by selling matches, buttons, tapes, and such small wares. But the woman in whose house she had sheltered herself at night absolutely declined to receive her in her trouble.

"She's nothing to me," said Mrs. Prout, "and I've got my own family to look after."

So that Mary could hardly believe her eyes when the two little girls came with their basket of fruit and their package of toys and books.

"We have come to take care of you," said Haddie.

"We are your nurses," said Patty. "Miss Midget sent us. Are you hungry? Would you like a drink of cool water? There's to be a lump of ice delivered here directly and Aunt Julia has sent us her ice-cooler to keep it in."

"And oh how bright the sunshine is! Haddie, if you stay here I'll run home and get some cloth and a needle and thread to make curtains. I'm sure we could hem them ourselves and sew

THE DAVID COPPERFIELD LIBRARY

In Johnson Street, London, in the house in which Charles Dickens lived as a little boy. It was opened as a library for poor children but financial support has not been sufficient. Every evening when the children come they have a wash and get clean overalls to put over their tattered clothes.

on little brass rings such as the upholsterers put on Aunt Julia's curtains to slip back and forward.

So off she trotted while Haddie seated herself beside the sick-bed.

"Do you feel very bad?" asked she, in a gentle voice, as she stroked Mary's hair.

"Not so very," said Mary. "It don't hurt so much when I lie still; but my head aches."

"I must bathe it with cold water," said Haddie, like the most experienced nurse in the world; "and I will unpack one of the story-books, so that you can read."

Poor Mary turned very red. "I can't read," said she. "Nobody ever taught me."

"But we'll teach you how," said Haddie, cheerfully. "It will pass away the time."

And so our little girls, who were so puzzled for something to do, found an engrossing occupation until school commenced again—nursing Mary Higgs and teaching her to read.

Mary was the story they told her, and the game they invented to while away the weary hours; and when, at last, she was able to go out to work again, they found her a place as nurse to a little blue-eyed baby, which afforded her a good home.

Lions to the Den.

Wife—"There's no doubt, dear, your cellars are social lions." Hubby—"Oh, I know that—have them shown to my den."

Japan Has Mother's Day.

Japan has taken over this year the American custom of a national observance of "Mother's Day," the celebration coinciding with the birthday of the Empress. The day has been declared a national holiday

King George Buys Half of a Tame Rabbit

King George recently became the owner of a half share of Wilfred, a tame rabbit. He bought his share from Bob Timlinson, son of the rector of Bolton Abbey, where the King has been grouse shooting as a guest of the Duke of Devonshire.

Bob's sister, Kathleen, six, has had a long illness. The king, on his way to the moors, each morning passed her window. One day the King said he wished to see Kathleen and she was brought into the hallway. She told the King she felt well, but was unhappy, because Wilfred was going to be sold by her brother Bob.

The next day the King's equerry visited the rectory and tried to make a deal with Bob. It then developed that Kathleen owned a half share of the rabbit anyway, but Bob was forcing her to sell.

"Will you sell your share to the King?" asked the equerry.

Bob agreed. "How much is Wilfred worth?" the equerry asked.

Bob said five shillings, equivalent to \$12.50.

The equerry gave Bob ten shillings. "The King presents his half of the rabbit to Kathleen. She now has all of Wilfred and you have ten shillings," the equerry said.

Bob ran and brought back five shillings change, which the equerry, as the King's representative, refused.

English Doctor Demonstrates Remarkable Gain Possible by Diet.

Investigations concerning diets for boys of school age, carried out during four years by Doctor H. C. Orry Mann on behalf of the Medical Research Council, have yielded startling results. In a report, Dr. Mann says:

It is startling to learn that the addition of one pint of milk a day to a diet which, by itself, satisfied the appetite of growing boys, could convert an average annual gain of weight of 5.85 pounds per boy into one of 6.99 pounds, and an annual average increase of height from 1.84 inches to 2.43 inches. This unmistakable betterment in nutrition was proved to be due to the qualities of milk as food.

The paper from which a Bank of England note is made is so tough that when folded it can sustain a weight of fifty pounds.

TENNYSON'S EARLIEST HOME

Lately our thoughts have been turning to Somersby Rectory, the home in which Tennyson was born and lived for nearly thirty years.

Lincolnshire is often said to be one of the bleakest and least interesting counties in England, but it has a certain beauty of its own. Its immense open stretches, broken only by the graceful windmills with which the whole country is dotted, give one an impression of grandeur, while its sunrises and sunsets are magnificent. At this time of year the hedges which border its lanes are overrun with wild roses and fragrant briary bells; and fragrant with honeysuckle, eglantine and meadowweet and in spring with primroses and violets.

Amidst such surroundings three poet brothers were born between whom the love was so strong that Frederick and Charles rejoiced to find how far Alfred's genius surpassed their own. In "In Memoriam" Tennyson says to his brother Charles—

"For us the same cold streamlet cur'd Through all its eddying coves, the same All winds that roam the twilight came In whispers of the beautiful world."

"The same cold streamlet" is the brook with which we are all so familiar. It still "chatters" as it flows to join the brimming river, and its fairy forelands are still "set with willow-weed and mallow." Tennyson's perfect accuracy as to every detail in nature is shown in this early poem. If we follow the Somersby brook as he did we shall see that this poem is not, as some have thought, a fancy picture, but an exact description.

To digress for a moment we remember how much Tennyson disliked inaccuracy and how annoyed he was at the young girl who saw nothing but a poetic metaphor in the lines—

"For her feet have touched the meadows And left the daisies reeling," not realizing that as her feet "touched the meadows" the daisies would close and so show only, what he calls elsewhere, "their crimson fringes."

Somersby Rectory is not a dream of beauty, like the rose-covered thatched cottage in Somersetshire, in which Coleridge spent part of his early life, but it is a comfortable house large enough to accommodate the twelve young Tennysons and their parents, as well as the very fine library in which Alfred raved as a boy. There is what he called a flat lawn and a good garden. Its pastoral surroundings are picturesque for Lincolnshire. Here Tennyson took his full share of athletics and so developed his physical strength that Brookfield once laughingly said to him, "It is not fair that you should be Hercules as well as Apollo." In 1837 the Tennysons were obliged to

"Leave the well-beloved place, Where first we gazed upon the sky," and just before they went a voice whispered to the poet—

"Here thy boyhood sung Long since its matin song, and heard The low love language of the bird. In native basals tassell'd—"

A flood of recollection comes over him and he leaves his birthplace with "pure regret." He had far more beautiful homes afterward, but never one that he loved so well.

Those Who Sing as They Pass.

The coming and going of birds in spring and again in autumn is one of the wonders of nature. They have their times and seasons. You can almost tell the day and the month by their arrivals and departures. A calendar drawn up a hundred years ago is no bad guide even to-day. How they find their way through the uncharted air spaces is beyond our comprehension. They will travel thousands of miles and yet find their way back to the same district and even to the same nesting place. Some break their journey, and we may find them in our neighborhood.

Burroughs in one place calls attention to an interesting difference in these birds that thus break their journey. "Some of them," he says, "passing north in spring are provokingly silent. Every April I see the hermit thrush hopping about the woods and in case of a sudden snowstorm seeking shelter about the outbuildings, but I never hear even a fragment of his wild silvery strain. The white-crowned sparrow passes in silence. I see the bird for a few days about the same date each year but he will not reveal to me his song."

By way of contrast the white-throated sparrow is decidedly musical in passing, both spring and fall. He sings on his way up and on his way down. Nearly all the warblers sing in passing and are to be heard in orchard and grove and wood, as they pause to feed on their northward journey.

It is an interesting difference, not confined to birds. There are people who, like the hermit thrush, pass in silence. They have no songs for the road. Others, like the warblers, scatter songs as they go. And theirs surely is the more excellent way.

One of Browning's loveliest poems is of one who thus sang as she passed. She was only a poor Italian girl weaver, who had just one day's holiday in the year. She sprang out of bed resolved to make the most of its sunny hours. So happy was she in the day's gift that she went down the road singing. That song of hers, all unknown to the singer, fell on certain ears with holy rebuke and inspiration. It came into the lives of the hearers like a new dawn.

"Pippa Passes" is a beautiful poem and Browning thought it worth while to use his great genius to glorify that song of the little ragged girl singing out her trustful joy as she passed.

It is a worthy ambition to be counted in this glorious company of those who sing as they pass.

The first sheet of paper is stated to have been made from the bark of a mulberry tree in A.D. 75.

Two Horses.

The breeze blows gaily over the field and hill. Blue shadows of high clouds flit fast across. The laughing, sunlit country. . . Acres of grass bow all at once, and change. Their depth and hue, like water swept by wind. Over the rustling hedge two heads appear— Wild, noble heads of horses; sharp ears pricked, Black tangled manes free flying in the gale, And dark brown eyes lit with a spark of youth— A pair of unshod Clydesdales, duffy still. About the tall, gigantic baby beasts! Speak to them—see, their quivering nostrils stretch. Their quick ears point, their eyes, half-startled, flash; Now lift a sudden arm, and they are off— With one great plunge and fling, tails, manes astream; Around the field they race, while flying clouds Leap from their hoofs, that thundering, shake the earth!

—W. Karsley Holmes.

Just One Thing.

Monkey—"Whatcha doin' now?" Ostraffe—"Got a job as a radio tower!"

Four to the Good.

"Thanks for that crate of chickens you sent," wrote Farmer Brown. "They arrived safely, but on the way home the trapdoor came open, and they'll get out. I chased them around the neighborhood and captured only ten of them, but thanks just the same."

"I sent just six," wrote back Farmer Jones.

REG'LAR FELLERS—By Gene Byrnes.

Jimmie Figures It Was Worth It.

"Put something besides Air in your tires"

COMMON-SENSE wants to be pumped into them too. Because they're filled it, no guarantee that tires are fit for the road. They must be properly filled to the correct pressure for their size and load. Over that pressure, is uncomfortable — under it, is expensive.

If you want good mileage, come in here once a week! Let our tire man test the pressure — gauge it, not guess it. Let him examine the casing for flints, metal splinters and nail ends. Better ten minutes wait at the Dominion Tire Depot than half an hour's work on the roadside.

W. M. Scott, Proprietor

GRENVILLE

Mr. Austin McIntyre has left for Detroit this week.

Miss Enid Morrow is spending a few days in Ottawa.

Miss E. Montgomery of East Haverbury, was the guest of Mrs. S. W. Morrow.

Mrs. Wm. Davidson has returned home from a visit with her daughter Mrs. M. Bayington, Joliette, Que.

Mrs. Wm. Mackin is home, after spending a couple of months in Montreal.

The Annual St. Patrick's Euchre held in Danereau's Hall, was as per usual, a grand success.

Miss O. Ryan, of St. Jerome, spent a few days the guest of her mother recently.

Miss Alice Wady, of Montreal, was the guest of Miss D. Morrow for the week-end.

Miss Beattie Cummings has returned home, after visiting her sister, Mrs. O. Lefebvre who underwent a serious operation in Montreal.

Last week death claimed one of our old residents, in the person of Alexander Goudie. Much sympathy for the bereaved widow and family.

Boy Globe Circler Crosses Dominion

1. Palle Huld and Hallden Burren drawing lots for the winning ticket. 2. The young traveller photographed on a C.P.R. engine at Montreal.

Travelling light with little more than a toothbrush and a pair of pyjamas, young Palle Huld, fifteen-year-old Danish globe circler, passed through Montreal over Canadian Pacific lines, on Monday, March 12, having crossed the Atlantic from Greenock, Scotland, on the Canadian Pacific liner S.S. "Montcalm".

On the centenary of Jules Verne's birth, a leading Danish newspaper, the "Politiken", conceived the original idea of conducting a representative around the world on the regular travelling schedule of 46 days, so as to make apparent the differences of travel of 1873 and 1923. To that end a new Phineas Fogg was required, and the editor of the newspaper decided that it should be a boy of between 15 and 18 years of age. A full page advertisement was placed in local papers, and young Huld was chosen. The same day as the advertisement appeared—at two o'clock, as appointed, the stairs, offices, and private rooms of the "Politiken" building was swarming with boys

who wanted to go round the world. It was some scene, and it was soon seen that it was not even necessary to get a youth of eighteen years, there were boys of sixteen who would do quite as well, and finally the fifteen-year-old boy proved as capable as the others. A correspondent just returned from China and the revolution there, examined the boys one after the other. They all had a thorough examination, their permission from their parents in their hands they stammered out their wild desire to get the exciting chance—and finally five boys were selected. Out of the five two proved the best. They were Palle Huld and Hallden Burren. They were both equally fitted for the journey, everything justifying their setting off. As no one liked, however, to rob the other of his chance a new idea was hit upon. They must draw lots. A hat was placed on the back of a chair, the lots thrown into it, they put down their hands—Palle Huld looked at the fascinating word: "Going"! He was the lucky one.

Who is he, then? A plucky young fellow with a boyish, dark blue flash in his eyes, red fascinating hair, blond as a Northern Viking and yet a slim schoolboy, 15 years old. He is not a bit afraid. He got permission from his manager to leave the business, where he is an apprentice, for two months, and after the lucky result, rushed to his mother: "Mother, do you know, I am to go round the world!"

He left Copenhagen on Thursday, the first of March, and he expected to be back, as he has promised, in 46 days.

Palle Huld sailed from Greenock, Scotland, on March 3, on the Canadian Pacific liner S.S. "Montcalm". He reached Montreal on Monday morning, March 12th, and left that evening for Vancouver, where he sailed for Yokohama on board the C. P. R. flagship the "Empress of Canada". Arrangements for his further trip to Korea, China, Soviet Russia, and back to Copenhagen are in the hands of the Canadian Pacific Railway.

Put the test to our --- FRESH ROASTS and COLD MEAT.

They say the test of good meats is "in the eating." Which is very logical and only too true.

It's the test we invite you to apply to our fresh Steaks, Chops, Roasts and other choice cuts of meats obtainable here at lowest prices.

FRIENDLY cushions, fashioned with the comfort of an easy chair, invite relaxation as your McLaughlin-Buick sweeps smoothly along.

Comfort that invites Relaxation

In the designing of McLaughlin-Buick for 1928, riding ease and comfort have been given unusual consideration. Lovejoy Shock absorbers on all four wheels absorb and cushion every road-shock and rebound. Rubber Engine Mountings prevent vibration from reaching the car-body. Extra deep, resilient seat cushions, beautifully upholstered, are specially shaped and tailored to fit, like an easy chair. The lower body-lines have been attained without any sacrifice of headroom. And in finish and appointments, McLaughlin-Buick establishes a standard of luxury which vies with your drawing-room or club.

The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

GATINEAU ELECTRIC LIGHT COMPANY LIMITED

Porpoises May Aid Scientists To Eradicate Caisson Illness

Hatteras, N. C. — The study of whales and porpoises may aid in the solution of caisson sickness, bane of the deep-sea diver, and other human ailments.

It was with such an object in view that a group of scientists of the department of anatomy of the Johns Hopkins Medical School, and Drs. Remington Kellogg, of the United States Biological Survey, and A. Brazier Howell, of the Smithsonian Institution, mammalogist of the national museum, visited Cape Hatteras recently to conduct a series of experiments on porpoises.

The scientists took back to their laboratories specimens of all of the organs of the porpoise's body, including six brains. Contrary to what might be expected, the porpoise brain is described by Dr. Howell, who is corresponding secretary of the American Society of Mammalogists, as "phenomenally developed" and "of an exceedingly high type."

"Many of the problems involved in the study of porpoises," he explained, "are distinctly applicable to human activities. If it could be ascertained how porpoises and whales manage to survive at the depths to which they go, much probably would be learned in regard to caisson sickness. And of practical interest is the question of the carbon dioxide given off by the body, through the lungs, during prolonged submergence. Of no less interest are the physical adjustments to the denser aquatic environment which whales (once land animals) have made, involving blood pressure, pressure of spinal fluid and the mechanism of breathing, as well as the great changes in the muscle system as compared to the typical land mammal."

development near Bryson on the Ottawa River. The Ontario Paper Company has a plant of 40,000 horsepower under way on the Riviere aux Outardes.

Ontario Developments

"In Ontario the outstanding work of the year was the commencement of construction by the Ontario Hydro-Electric Power Commission of the 220,000-volt transmission line to carry the 200,000-horsepower which the commission has contracted to take from the Gattineau Power Company. Actual installations during the year included two plants at Sturgeon Falls and Moose Lake on the Selkirk River of the Ontario and Minnesota Power Company with 10,000-horsepower and 14,420-horsepower capacities respectively. A further plant of 13,200-horsepower at Calm Lake on the same river will be completed early in 1925. The Gananoque Electric Light and Water Supply Company added 1,500-horsepower to its Kingston Mills plant, and smaller installations included 325-horsepower by the town of Smiths Falls and 75-horsepower by the town of Streetsville.

"Among the developments under construction is the Ontario Hydro-Electric Power Commission's development at Alexander Landing on the Nipigon River which, when completed in 1925, will have an installation of 54,000-horsepower. The 55,250-horsepower plant of the Spruce Falls Company at Smoky Falls on the Mattagami River was well advanced, and the International Nickel Company of Canada is commencing the installation of 28,200-horsepower on the Spanish River.

The Maritimes

"In New Brunswick the St. John River Power Company made rapid progress on the construction of its 80,000-horsepower development at Grand Falls on the St. John River. The New Brunswick Power Commission made an extensive investigation of the forty-mile reach of the St. John River between Woodstock and Hawkesbury which gives promise of providing a further development on that river of 30,000 continuous horsepower. Similar investigations were made on the same river by the St. John River Power Company, and on the Nipisiguit River the Bathurst Company, carried on investigations at the Rough Waters site near the mouth. Two tidal power projects are also under investigation on the Bay of Fundy in New Brunswick.

"In Nova Scotia, the Nova Scotia Power Commission completed the construction of the 3,000-horsepower Sandy Lake development of its St. Margaret Bay system. The commission also carried on numerous investigations including a project of 3,000-horsepower at Lake Ainslie in Cape Breton, a proposed tidal power project at Amherst Point on the Bay of Fundy and investigations of the complete utilization of the Liverpool and

"In installations added during 1924 the province of Quebec took the lead mainly due to the activities of the Gattineau Power Company on the Gattineau River. Hydro-electric construction was also active in Ontario, in the Maritime Provinces and in Manitoba and British Columbia.

"In Quebec the Gattineau Power Company completed the construction of and brought into operation the initial installations of its Chelsea and Farnham Rapids developments, the first of 102,000-horsepower capacity and the second 72,000-horsepower. The company also vigorously carried forward the construction of a third development on the Gattineau River at Pagan Falls, where 204,000-horsepower is being initially installed. For the benefit of these three developments the Merrier dam, creating a very extensive storage reservoir of 35,000,000,000 cubic feet, also was completed and the reservoir filled early in the year under the direction of the Quebec Streams Commission.

"Other installations placed in operation in Quebec during the year included a 2,000-horsepower unit at Pont Rouge by the Donnacona Paper Company and the completion of a 2,000-horsepower development by the town of Coaticook. The largest project under construction is the 300,000-horsepower development of the Alcoa Power Company at Chute a Caron on the Saguenay River.

"Other projects or extensions under way are a 65,000-horsepower development by the Montreal Island Power Company on De Prairie River near Montreal; the addition of two 10,000-horsepower units to the Canada Northern Power Company's plant on Quinze River; the addition of unit 11 of 45,000-horsepower to the Duke-Price development on the Saguenay River, and a 300-horsepower plant by the Cie d'Enterprises Publiques near Riviere a Pierre.

"Contracts have been let by the City of Sherbrooke for a new development of 5,500-horsepower at Westbury Rapids on the St. Francis River, and the Ottawa River Power Company has authorized the addition of a 25,000-horsepower unit to its de-

Medway Rivers. The Bridgetown Electric Light Company added 315-horsepower to its plant at Bloody Brook, while the Avon River Power Company has under construction a second hydro-electric plant at Avon River Falls of 4,300-horsepower.

British Columbia Enterprises

"In British Columbia the British Columbia Electric Railway Company completed the construction, on the shore of Stave Lake, of a 12,500-horsepower plant. On Vancouver Island the company pushed forward the reconstruction of the flume carrying water to its Jordan River development. On the Bridge River, through a subsidiary, the Bridge River Power Company, extensive preparatory work was carried on in connection with a project of 500,000-horsepower ultimate capacity, and a contract was let for the construction of a tunnel leading from Bridge River to the power station site on Seton Lake. The West Kootenay Power and Light Company carried forward the construction of its new 60,000-horsepower development on the Kootenay River at South Slocan.

Prairie Provinces

"In Alberta the East Kootenay Power Company completed the construction of a 13,000-k.v. steam power station at Sentinel in the Crownsnest district as an auxiliary to its hydro-electric plants on the Bull and Elk Rivers in British Columbia, and the Calgary Power Company greatly extended its transmission system.

"In Saskatchewan the Provincial Government appointed a commission to inquire into the power resources of the province and a very active program of investigations was carried out.

"In Manitoba the Manitoba Power Company completed the superstructure of its Great Falls plant on the Winnipeg River and brought into operation Unit 4 of 25,000-horsepower capacity. A prospective development of great importance to the northern part of the province is in view at Whitesand Falls on the Nelson River, where an installation of from 30,000 to 40,000-horsepower is proposed to serve power over a transmission line 170 miles in length to the Flin Flon mining district northwest of the Pas.

"Numerous undertakings are in the initial stages of construction and others are about to be commenced which will result in an addition to the Dominion total of more than 2,000,000-horsepower, much of which, it is expected, will be in place before the end of 1925. The capital required for this new work will involve the direct investment of at least \$100,000,000, and many times this amount in the application of power to industry and domestic and public use."

Woman's Visit to Wilds of Tibet

One of the most remarkable shooting expeditions in which a woman has taken part has just been safely accomplished by Lieut.-Col. S. Gordon Johnson, late of the South Staffordshire Regiment, and his wife.

They have returned to London after a journey of 1,200 miles from Kashmir to Tibet and back across the Himalayas and other mountain ranges. Colonel and Mrs. Johnson, who were accompanied by six native servants, 10 transport men with 15 yaks, a herd of sheep for food, and a herd of goats to provide milk, secured a Tibetan antelope at a height of 21,000 feet.

Col. Johnson told a Daily Mail reporter: "My wife and I made the journey, which totalled 2,000 miles from when we left Kashmir on May 4 till we returned on November 4, because we are both enthusiastic shots."

Leaving Srinagar, the capital of Kashmir, we crossed the Himalayas at Zogi Pass (11,500 feet). We went 240 miles without seeing a village, and arrived at Leh, the chief village in the Ladakh Range.

Leh, which sees perhaps 25 Europeans in a year, is a market of barter between India and Kashmir on the one hand and Chinese Turkestan on the other.

Thirty miles from Leh is the monastery of Hemis, where we attended the annual festival which attracts people from all over Central Asia. Grotesque and brilliantly clad figures wearing great masks or huge black hats dance "the dance of death" or "the dance of the black hat," or other eerie steps of dismal one-note music.

During the festival you could go to see the Shushak, who might be called the Archbishop. He is supposed to be the re-incarnation of Buddha. When dying the Shushak has to call the lamas, the high priests, and tell them where to find the newly born infant whom he knows, on the inspiration of Buddha, must be his successor. When the baby is found it is placed in the monastery.

The women wear head-dresses that go down their back and bear turquoise.

Mrs. Johnson, who bought splendid specimens of turquoise for less than a pound in rupees, pointed out that these stones, carried on the head-dresses were the banking accounts of the women.

The journey continued across the Chang Chen Mo river to Tibet.

Col. Johnson said: "We encountered a snow-field at 18,000 feet into which my wife sank almost to the shoulders. When I went

City Pawnshop of Paris Reaches Ripe Age of 150

Paris.—The Paris "Monte de Piete," or city pawnshop, is 150 years old, but there will be no birthday party.

It is, officially, the Credit Municipal and unofficially "My Aunt," merely a change in gender from the American appellation.

Private pawnshops are forbidden in France and the public loan institutions are supervised by the authorities to insure honest and efficient administration.

Pension claims are accepted as collateral for loans at only 1 per cent a year, but other loans are at 5 per cent. At Toulouse and other cities loans are made without interest.

The only innovation of recent years has been the acceptance of automobiles "in hock."

To help her I sank just as deep, and soon all our transport was in. It took us from 8.30 a.m. to 2 p.m. to get out of the snowfield, in which we moved less than half a mile."

Shy on the Rocks.

"I don't believe you have grit enough to propose to a girl."

"I've all the grit needed, my boy—I'm shy on the rocks."

Barrister at Bow County Court: "are you married?" East Ham Woman: "I am not. I have no desire to keep a husband."

Clubman—I've struck a perfectly priceless idea. I've arranged to give a man \$10,000 on condition that he relieves me of all my worries. Friend—That's fine, but where are you going to get the \$10,000? Clubman—Ah, that will be his first worry.

Old Coin Discoveries

Recent Finds in Britain of Those Made by Romans

Roman coins struck in Great Britain have always held considerable interest for collectors of early Roman coins. The great majority date from the later Roman period, and recent finds of these British-minted coins have disclosed the fact that a large variety came from a number of mints in different parts of the British Isles. Most of them, however, bear the designating marks of the London mint from which came the largest proportion of the Roman coins circulated in Great Britain.

Thomas L. Elder, coin expert of New York, who has devoted considerable study to the coins of the Roman emperors, calls attention to one of the most important discoveries of these English-minted Roman coins made in 1907 at Little Orme Head, North Wales. A bronze vessel was unearthed there containing several hundred coins of the Roman Emperor Carausius, and with it also was found a large pottery jar filled with more than 5,000 Roman middle and small sized bronze coins of British and Gaulish mints.

"Careful washing of these coins," said Mr. Elder, "left them in almost perfect mint state, although about 1,600 years old. The location of the discovery showed indications of Roman masonry work and this hoard is believed to have been a military chest, kept at a Roman station, from which the coins were distributed. The Roman emperors depicted on the coins included Allectus, Maximilian, Hercules, Maximinus, Daza, Licinius, Pater, Quintillus, Aurelian, Severina, Numerian, Diocletian, Carausius, Valera and Constantine I. The types of British mints numbered twenty-five and there were seventeen of Gaulish and other mints. About 3,500 of the coins were of Constantine I."

"A more recent find was made near the British Museum in London which contained many of the 'Urbs Roma' type with the helmeted head of Rome and the reverse showing the traditional wolf suckling Romulus and Remus. Early in 1922 a number of Roman silver coins was found in a small cave in a cliff near East Wood Ashover, Derbyshire, England. The coins ranging from the reigns of Septimius Severus to Gordian III, a period of about fifty years.

"The immense number of coins struck in England at the various mints, but chiefly in London, may be imagined from the fact that it is almost impossible to find of the thousands lately unearthed two coins from exactly the same die. The die-makers must have been kept busy with the immense difficulty of keeping the die sufficiently harder than the coin to prevent breakage."

Mr. Elder says that the rulers of Britain, following the method of the Romans, sometimes copied Roman coin types. Coins of St. Ethelbert, for instance, bear the design of the wolf and twins. Later followed a widely varied coinage imitating Gaulish types with heads, animals, dots, dashes and other curious symbols. These extended down to the beginning of the Anglo-Saxon era, when a new type appeared in the English penny.

Some Birds Can Fly Across Atlantic

U.S. Biological Survey Cites Several Instances of Flights

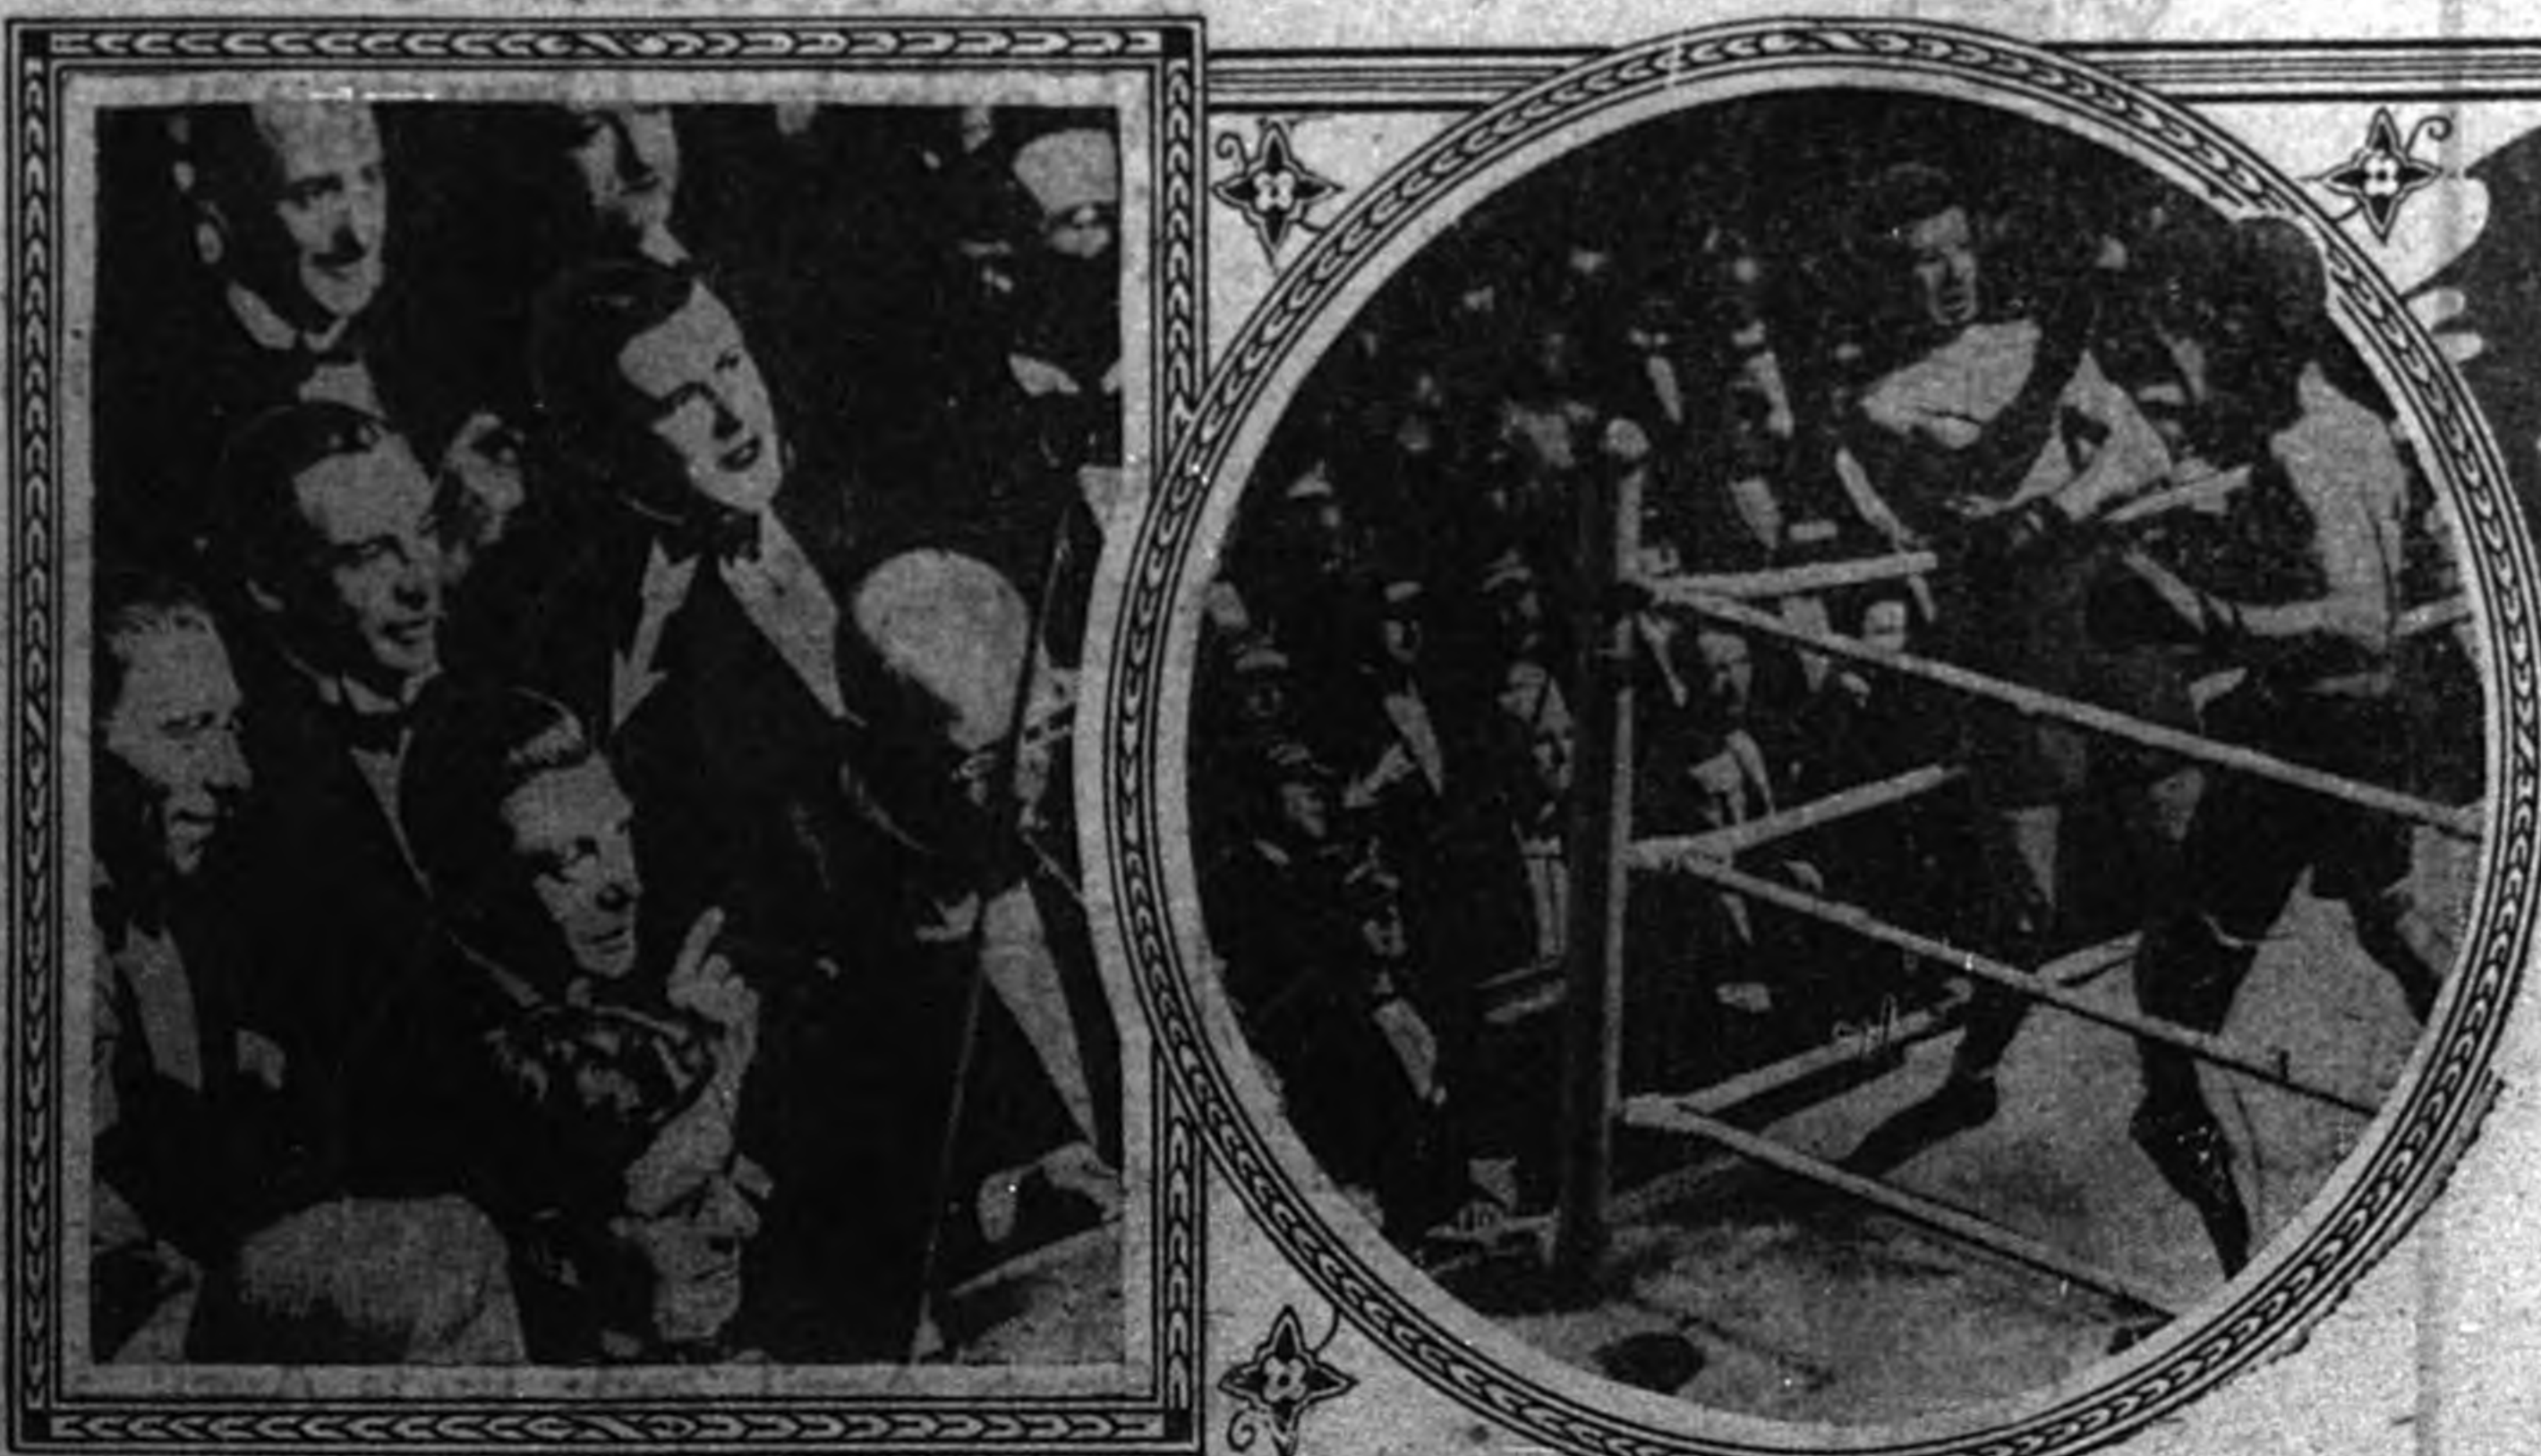

Washington.—"Long distance flights of birds are common," it is asserted by the experts of the United States Biological Survey. The Survey has conclusive evidence that some birds fly across the Atlantic.

"Two black-headed gulls banded at Rostock, Germany, were recaptured, one at Bridgeton, Barbadoes, in the British West Indies, and the other on the mainland of Mexico, near Vera Cruz. Two kittiwakes, banded at the Farne Islands, Northumberland, England, were recovered almost directly across the Atlantic at points on the coast of Labrador and Newfoundland. A common tern banded at Eastern Egg Rock, Maine, crossed the Atlantic Ocean and the Equator and was recovered from the Delta of the Niger River, British West Africa. A young Arctic tern, banded in Labrador, was recently found dead near La Rochelle, on the coast of France."

The Survey has no evidence that these birds make a non-stop flight, but that is the supposition. It is explained that many species that spend their summers in the United States and Canada fly almost the length of the western hemisphere and spend the northern winter in the Summer of Argentina and Chile.

The vicar was paying a visit to the homes of his poorer parishioners, and in the house of a certain costermonger he asked many questions about the family. A very grubby, but very cheerful little lad attracted the kindly cleric's attention, and he asked him his name. "Reginald D'Arcy Smith, sir," replied the lad, with a grin. The vicar turned to the boy's father. "Whatever did you give him a name like that for?" "Cos I want 'im ter be a professional boxer," returned the parent, "and wiv a name like that he'll get a bit of practice at school."

The Prince of Wales Enjoys a Bout

PRINCE CHARMING AT THE RING SIDE

The Prince of Wales is an ardent "fight fan." He is shown here watching the match between Len Johnson and Jack Hood for the British welterweight championship. In the circle at the right, Hood is seen forcing the fighting.

Assam teas are known by experts as the finest teas grown—a fact which explains why Red Rose Orange Pekoe has become so deservedly popular in Canada. For Red Rose Orange Pekoe is chiefly composed of Assam teas, which accounts for its distinctive quality and value. Every package guaranteed.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ills. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhoea; or need to aid sound, natural sleep.

Just one warning: It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Airmindedness

It is hard for the schools to keep their feet on the ground these days. This is to be taken literally. Eighty superintendents were recently summoned into conference by the Guggenheim Fund for the promotion of aeronautics to devise a program of air education.

The American public has not progressed rapidly enough in the direction of airmindedness to satisfy the aviation enthusiasts, so they are going to start with the children. And only one superintendent out of eighty in the larger cities of these countries made any objection. So reads the announcement from the fund headquarters.

Again the three Rs will be asked to stand in a corner while part of their allotted time is taken away from them. When railroad trains were introduced—or, again, when horseless vehicles running on rubber were offered to the public—no organized propaganda sought to inculcate the truth about these new modes of transportation in the minds of boys and girls.

Aviation's not held back by anything more serious than the "Gilt a boss" prejudice of the late '90s. The apostles of the new art are in a hurry. Every schoolboy knows the essential facts of Colonel Lindbergh's demonstrations. More performances of a similar nature will turn the trick of making the next generation airminded without any studiously devised additions to an already overburdened curriculum.—Journal of Education

Prodigious megalithic monuments, temples of cannibal feasting and burial, which Lieutenant P. J. Searles, U.S.N., lately visited in Guam and on the island in the Ladrones 125 miles north, are by the publication Nature comparable to the mysterious Stonehenge in England. Each upright monolith weighs thirty tons.

NEW STRENGTH FOR ALL WEAK GIRLS

Comes From the Rich, Red Blood Made by Dr. Williams' Pink Pills.

There must be no guesswork in the treatment of pale, anaemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anaemia—the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. When the blood is thin and watery give Dr. Williams' Pink Pills, coupled with nourishing food and gentle out-of-door exercise. The new, life-giving blood which comes from a fair use of Dr. Williams' Pink Pills, increases the appetite, stimulates the nerves and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 5, Shelburne, Ont., praises this medicine for restoring her daughter's health. She says:—"When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies, but with no good results. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not long after she began taking the pills that I could see a change for the better. She kept on taking the pills for several months and through them grew into a strong, healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills." The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

U. of T. Uses Radio

Series of Lectures Are Broadcast by Arrangement with CNRT by the University of Toronto

It may not be known to the public generally that the University of Toronto, the Provincial University of Ontario, is serving them through a new medium, namely, the radio. In conjunction with CNRT, which broadcasts on a wave length of 256 metres, a regular series of short talks has been arranged. These regular programmes began two years ago and among those who have spoken during the present academic year, which began last September, are Professor Davis, of the English Department, University College; Dr. Martin, of the Chemistry Department; Professor MacKenzie, of the Law Department; Professor Coleman, Professor Emeritus of Geology; Professor McIlwraith of the Royal Ontario Museum, Professor Sissons, of Victoria College; Professor Parkin, of the Department of Mechanical Engineering; Professor C. H. C. Wright, Department of Architecture; Mr. Illife, Department of Industrial Art; and Mr. W. J. Dunlop, Director of the Department of University Extension and Publicity. The subjects have ranged from "The Ice Age of Ontario" to "Peculiar Peoples of the Canadian West." Those who have missed these brief but instructive and interesting addresses have a chance to tune in on the March programme. On March 2nd, Mr. W. J. Dunlop, Director of the Department of University Extension and Publicity spoke on "The University as a Public Servant"; on March 16th, Miss Gladys Wrooke, one of the most popular members of the English staff at University College, will put her radio listeners into the proper mood for St. Patrick's Day by readings from Irish poetry; and for March 30th Mr. W. J. K. Harkness of the Department of Biology has chosen for his subject "The Conservation of our Fisheries." These broadcasts from CNRT begin at 9.30 p.m.

Income Tax

Le Devolr (Ind.). (The Government persist in refusing to see a difference between revenue earned by one's own efforts and family inheritance.) Surely this is unjust to the salaried man. He is treated by the Revenue Department as though he were a sort of capitalist, whereas the majority of the salaried classes have no capital at all. Their salaries, in practically every case, cease as soon as they stop work, whilst taxpayers who have incomes from estates or inheritances continue to receive these, whatever their state of health and regardless of whether they work or loaf. The Finance Department should pay attention to this matter.

Copenhagen biologists who have investigated the rotary habits of the under-laws of Danish cows chewing their cuds find 55 per cent. used the right circular motion and the rest the left. Now they ask for observation of American cows.

"So the judge fined you fifty dollars for hitting your wife with a golf club?" "Oh, he said it wasn't so much for hitting her as it was for using the wrong club!"

On fishing trips take Minard's.

Samoa Unrest

The news of disaffection among some of the native population in Samoa, sufficiently grave to cause the New Zealand Cabinet to send two cruisers to the mandated territory, came unexpectedly. For while Australia appeared to be having a good deal of trouble in administering ex-German New Guinea under the mandate system, New Zealand was credited by independent evidence with doing very well in western Samoa.

The appointment of General Richardson, the most popular officer in high command in the New Zealand Expeditionary Forces during the World War, proved a decided success. For a time restrictions on the use of liquor by the Europeans in the interests of the natives tended to make the authorities unpopular, but that difficulty seemed to have passed away.

Education has been progressing among the natives, who are being instructed in their own language as well as in English. The native villages under the mandate have been kept in a more healthy condition than those in either Fiji or Tonga, and the native population has actually been on the increase. Yes, a disease endemic in Samoa for many years, has been almost wiped out by inoculation.

It was to be expected that New Zealand would be successful in Samoa, for she has had experience in administering her own native race, the Maoris, who are closely allied with the Samoans, and who live on the most friendly terms with the whites. Most of the trade has been captured by Australia and America, and New Zealand has certainly not been profiting by the administration, but has been doing her best as a matter of honor.

Subsequent dispatches indicate that white and native Samoan police, covered by naval parties from the two cruisers, had arrested 150 members of an illegal police force who had been parading about carrying big sticks in an effort to prevent natives buying goods in the stores of Europeans. It is to be hoped that this will put an end to the disturbance.

MARCH WEATHER DANGEROUS TO BABY

Our Canadian March weather—one day bright, but sloppy, the next blustery and cold—is extremely hard on children. Conditions make it necessary for the mother to keep the little ones indoors. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against these colds and to keep the baby well till the better, brighter days come along, a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. The Tablets are a mild but thorough laxative which never fail to regulate the stomach and bowels and thus they relieve colds and simple fevers and keep the baby fit. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Only Under Pressure.

"Did she finally consent to let you kiss her?"
"It took considerable pressure to make her yield."

Alberta Coal

Edmonton Union (Ind.). The movement to get Alberta coal on to the markets of the East and thus to eliminate American coal is praiseworthy but difficult. Without taking into consideration Nova Scotia coal, which will look on this movement with some jealousy, but which will, no doubt, be ready to come to terms, the fact remains that for Alberta coal the Western producer and the Eastern consumer are 1,500 miles or more away from each other, and must rely on the railway as their only means of transport. Yankee coal, on the other hand, is eight to ten times nearer and can be carried by water. In consequence, supporting a fight to the death started, Yankee coal could always reduce its sale price lower and lower and in the end come out on top. There would only be one way out—to put up a prohibitive tax on American coal.

Colic.

OWL-LAFFS

O. W. L.
(On With Laughter)

No man ever needed the services of an oculist to enable him to see his neighbor's duty.

The man who made Time made a lot of it.

There is no substitute in the round world for being square.

He—"Do you really think there is danger in kissing?"
She—"Wait till I go to the stairs and listen if papa is asleep or not."

When the slick salesman attempts to sell you some get-rich-quick stock, it might be well to remember that really good investments do not have to be peddled.

"What did mama's little baby learn at school to-day?"
"I learned two kids not to call me 'mama's baby'."

"What did your husband think of your new frock?"
"My dear, he clapped his hands—'Splendid!'"
"—Over his eyes."

"Dad, you remember you promised to give me five dollars if I was a good girl at the party?"
"Yes, Mary."
"Well, dad, you won't have that expense."

What's His Due?
Give the 'devil his due—very well then, but who
Can be found who can clearly define it?

Should I give him what I think is due the vile guy
I am positive he would decline it.

A Scotsman was missing for three days before the police department finally located him in a "Pay-as-you-Leave" street car.

Asylums have to be maintained because so many folks are just what they're cracked up to be.

A man was smashed up in a railroad accident. The family received a wire saying: "Mr. Hess in railroad wreck. Both legs, both arms, back and neck broken and skull fractured."

And a few hours later a second dispatch arrived: "Not so bad as at first reported. One arm was not broken."

There are two sides to every question," proclaimed the wise man.
"Yes," said the fool, "and there are two sides to a sheet of typewriter, but it makes a difference to the fly which side he chooses."

Use Minard's Liniment for Corns.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

PAINS ALL OVER BODY

Two More Cases of Feminine Illness Relieved by Lydia E. Pinkham's Vegetable Compound

Barrington, N. S.—"I had terrible feelings, headaches, back and side aches and pains all over my body. I would have to go to bed every month and nothing would do me good. My husband and my father did my work for me as I have two children and we have quite a big place. I read in the paper about Lydia E. Pinkham's Vegetable Compound, and then got a little book about it through the mail, and my husband sent to Eaton's and got me a bottle, and then we got more from the store. I am feeling fine now and do all my work and am able to go out around more. I tell my friends it is Lydia E. Pinkham's Vegetable Compound that makes me feel so well."—Mrs. VICTOR RICHARDSON, Barrington, Nova Scotia.

Dull Pains in Back

St. Thomas, Ont.—"I took four bottles of Lydia E. Pinkham's Vegetable Compound and found great relief from the dull, heavy pains in the small of my back and the weakness from which I suffered for five years after my boy was born. After taking the Vegetable Compound and using Lydia E. Pinkham's Sensitive Wash I am feeling better than I have for the past seven years, and advise my friends to take it."—Mrs. F. JOHNSON, 49 Moore Street, St. Thomas, Ont. C
