LOCAL NEWS.

Mr. and Mrs. Fraser spent Sunday last at Lake Louise.

Mr. and Mrs. J. A. McGibbon spent Thursday in Ottawa.

Mr. W. Wrench spent the week-end at his cottage at the lake.

Miss Violet Paul, left on Tuesday to spend a few days in Montreal.

Mr. and Mrs. Alfred Miller spent Sunday last with friends in Montreal.

Mr. and Mrs. H. Wall, of Montreal, were week-end guests of Mrs. R. Miller.

Miss Willow Lavery, of Montreal, was the guest of her sister, for the week-end.

The Misses Lila, Jessie and Isabella Kearns spent Sunday at their camp in Dalesville.

Mr. and Mrs. Wm. Doig and son, of Montreal, were visitors in town over the week-end.

Mrs. Jas. Thorburn and son, of Montreal, were the week-end guests of Mrs. M. Jones.

Miss Muriel Walker, of Montreal, was the guest of Mr. and Mrs. Geo. Y. Deacon, for the week-end.

Dr. and Mrs. H. C. Cassidy, of Lewistown, Pa., are spending a few weeks in town visiting friends.

Mr. and Mrs. Roy S. Hubbell, of Montreal, spent the week-end the guests of Mr. and Mrs. T. Scot Brown.

Mr. and Mrs. Cameron McOuat are spending this week visiting friends in Lachute, before leaving for Flint, Mich.

Mr. Herman Kahrs and Mr. Billy Boling of New York, visited friends in Lachute and Brownsburg on Friday last.

Mr. and Mrs. Lindsay Demerise, of Montreal, were the week-end guests of Mrs. M. Demerise.

Miss Annabella Hume, nurse-in-training at the Montreal General Hospital, was the guest of her parents for a few days last week.

The Misses Mildred and Gladys Hall, of Montreal, spent the week-end the guests of their parents, Mr. and Mrs. A. Hall, of Dalesville.

Messrs. C. J. Gordon and Alex. Barker, of Berliner Gramophone Co., of Montreal, were in town over the week-end the guests of Mrs. Henry Barker.

Mrs. Chas. Wray, of Montreal, accompanied by her grandson, Kenneth McKenzie, were guests of the former's sister, Mrs. Frank Cowan over the week-end.

As a newspaper we have always said, "It pays to Advertise" but on Friday the Lachute Dramatic Society will present real facts to you in the Auditorium. Seeing is believing so don't miss it.

Mrs. Wooding and Miss Ivy Wooding, of Ottawa, were guests of Mr. and Mrs. Jas. Yelland, for the week-end. Miss May Yelland, of the Montreal General Hospital, was also a guest on Saturday.

This is the month when many young couples are meditating upon taking the matrimonial step; and one of the first requirements is a nicely printed Wedding Invitation. The Watchman can supply them for you at moderate prices.

The way YOU can help boost the Lachute Fair, is by writing all your friends and telling them the dates are set for June 20-21-22 & 23. By this means you will serve a dual purpose in doing a good turn to your friends and also to the Exhibition.

The Miller Boys, Alfred and Jack, are now joint proprietors of the general store of Robert McPaul, which they formally took over last week. If hard work and popularity mean anything in business, the Miller Bros. should make good success in their new venture, for they have an abundance of these qualities.

Mr. Richard Muir, Miss Eleanor MacDonald, with Ross and George Muir, left Flint, Mich., Tuesday morning, May 22nd, on a motor trip to Lachute, landing here at noon the following day. As a result of their visit the two boys Ross and George have decided to relinquish their work in the States and engage in business for themselves in their home town. To this end they have purchased the property of Mr. H. M. Gall at the corner of Main and Bethany Streets, where they will immediately get busy in erecting an up-to-date gas filling station for the general convenience of motorists. Further developments will be arranged in the near future, particulars of which will be made known later.

Lachute is favored in the summer by a large influx of tourists, and the impressions they gather are resultant upon the attitude of those whom they meet and upon the general appearance of our town. We are fortunate in having a class of citizens who take great pride in keeping their properties spick and span, and their gardens stocked with pretty flowers and shrubs that lend a charm to the surroundings. As in every community, there are a few who are indifferent, but it is up to us as citizens to suggest in kindly manner that they fall in line for the general good of the town.

Miss Florrie Wallace, of Montreal, was the week-end guest of Mrs. P. Cruise.

Mrs. H. M. Gall is spending a few days in Bury, Que., visiting her father.

"13 Soap—Unlucky for Dirt." It pays to Advertise—tells all about it Lachute Auditorium, June 8th.

Mrs. W. K. McArthur returned home on Wednesday, from a pleasant motor trip to Sherbrooke.

Mr. T. I. Pollock, B.A., of Westmount, spent the week-end with his brother, J. F. Pollock of Hill Head.

Members of the Lachute Literary and Dramatic Society please notice that the new library books are now at Miss Slater's.

Miss Amy McOuat, of the Montreal General Hospital Staff, spent the week-end with her parents, Mr. and Mrs. W. McOuat.

Judge Cousineau, of Montreal, presided over a session of Circuit Court held here on Tuesday last at which some five cases were dealt with as well as the probations of several wills.

At a joint meeting of those interested in the temperance cause, which was held in the Lecture Hall of the United Church on Sunday evening last, a strong resolution was passed in opposition to the granting of a Government Liquor Store for the town. A large committee was formed with the Rev. Dr. J. E. MacLeod, as chairman and the line of campaign will be discussed at a meeting to be held in the United Church Hall this evening (Thursday) at 8 o'clock.

DAYLIGHT SAVING

Last week the town of Hawkesbury took a vote on daylight saving and they have adopted it by a good majority. The measure has been a vexed question with them for years and the vote has settled the difficulty. There were 426 votes in favor and 253 against, leaving a majority of 183.

Lachute takes its vote on June 12th, and there is a general feeling that the people will follow the cities and participate in the nice long evenings that prove so appreciative.

BROWNSBURG.

Miss Ruby McPaul was home over the week-end.

Miss Ida Fletcher spent the week-end at her home.

Mr. and Mrs. Louis spent Sunday the guests of Mrs. McLeod.

Miss Gertrude Gilmour of Thurso, spent the holiday at her home.

Miss Gertrude Hoyle was the week-end guest of Mrs. W. Townsend.

Miss Leona Thompson, of Montreal was home for the week-end.

Miss Grace MacKiddie, of Montreal, was home for the week-end.

Mr. Kenneth MacGibbon of McGill College, is home to spend the summer holidays.

Miss E. Hanson and Miss Henderson were the guests of Mr. Hanson over the week-end.

Mr. Norman McLeod spent the week-end with his parents, Mr. and Mrs. McLeod of Brownsburg.

Dr. and Mrs. Harold Hooper have returned from France and have left for their home in Grandmeac.

Mr. and Mrs. A. E. MacAllister and family motored to Beloeil on Saturday to spend the week-end.

Mrs. Wesley Doran and family returned to their home in Montreal, after a two weeks' visit with her mother.

Mrs. Geo. L. Davis (nee Laura Chambers) and daughter were among the first class passengers on board the Antonia which arrived at Montreal last Saturday. She is staying with her parents at Beloeil and hopes soon to visit her old friends at Brownsburg.

BIRTHS

HUTCHIN.—At St. Mary's, Que., on May 23rd, to Mr. and Mrs. Jas. Hutchin, a daughter.

McLEOD.—At North Bay, on May 14th, 1928, to Mr. and Mrs. Robert McLeod, a daughter.

POLLOCK.—At the Catherine Booth Hospital, Montreal, May 25th, to Mr. and Mrs. W. D. Pollock, Lachute, (nee Alice Bain), a son.

IN MEMORIAM.

BLAIR.—In loving memory of my dear husband, Elijah Blair, who died May 24th, 1928. Inserted by his wife, Lizzie.

CARPENTER.—In loving memory of our dear husband and father, Geo. B. Carpenter, who departed this life, May 31st, 1922.

"We miss a husband and father, kind and true, No friend like him on earth we knew; Peacefully sleeping, resting at last, The world's weary trials and troubles are past, In silence he suffered, in patience he bore, Till God called him home to suffer no more."

How to Attract the Birds

Dr. A. H. Palmer

In one of his poems, Chaucer tells us that the birds choose their mates on February 14, St. Valentine's Day. For this reason St. Valentine is usually regarded as the patron saint of birds. Even though we may not delight in fanciful thought of this kind, we all love the birds and wish to see many of them in our midst. If we will but protect them and provide them with suitable meeting-places, food and water, they will be our intimate friends. Where birds are sheltered from harm and provided with ample food they are frequent visitors. Both in summer and in winter, birds are ever in search of food and water; where these are plentiful the birds will be plentiful also.

Though many native birds build nests on the ground, most birds nest in trees or shrubs. For this reason trees and shrubbery are essential for making a place attractive to our feathered friends. Such shrubs should be allowed to form thickets, and should be pruned back severely when young so as to provide numerous crotches adapted for nesting-sites. Birdhouses and bird-boxes are sought when no tree cavities are available. Such bird-houses can be purchased ready-made from dealers, or any boy skillful with a hammer and saw can construct them.

The most common errors in putting out bird-houses are choosing poor locations and supplying too many boxes. A bird-house needs only partial shade; houses on poles are usually occupied. Martins prefer a house standing apart from trees. The wren prefers a small house having a small entrance, and does not fear the close approach of people, though it is much afraid of cats, dogs and chickens. Entrances to bird-houses should be sheltered by projecting roofs, and should face away from the prevailing wind and rain storms. All bird-houses should be constructed so that the interior may be easily examined and cleaned in the autumn; this is important to permit a season's rubbish to be thrown out before the beginning of the next spring.

As a rule, birds do not like to be crowded; if a place is thickly studded with bird-houses only a few of them will be occupied. Birds not only do not want bird neighbors too near, but are impatient of human meddling. They should therefore be granted as much privacy as possible during the nesting season; there is a tradition to the effect that bird eggs will never be hatched if a human being has breathed upon them; one should never go near the bird young in a

nest, as it frightens both the young and their parents. Nests built in shrubbery are likely to come to a bad end if the birds are disturbed frequently. If ground-nesting birds, as bobolinks, meadowlarks, and bobwhites are to be protected, grass in the nesting fields must not be cut during the breeding season. English sparrows will drive other birds away; the common bluejay is also a tyrant among birds, and will sometimes destroy the eggs and kill the young of other birds nesting in the neighborhood of its home.

Nothing has a more potent attraction for birds than drinking and bathing places. The birds' water supply should be a pool not more than a few inches deep, the bottom sloping gradually upward toward the edge. Both bottom and edge should be rough so as to afford a safe footing. A large pottery saucer is an excellent device, or the pool may be made of concrete or even metal, if the surface is roughened. The bird bath may be elevated, or on the ground, if on an open space where skulking enemies cannot approach too near. A water supply is appreciated in winter as well as in summer.

Food supply is the vital actor in bird life and the most important single offering that can be made to attract birds. It is important to note that an ample supply of food prior to and during the nesting season tends to increase the number of eggs laid and also the number of broods in a season. Bird food may be supplied in two ways,—by planting trees, shrubs, and herbs which produce seeds or fruits relished by birds, and by exposing food in artificial devices. The most familiar phase of the latter method is winter feeding. During the season when the natural food supply is at its lowest ebb birds respond most readily to our hospitality. Winter feeding has become very popular, and the result has been to bring about better understanding between birds and human kind. The winter foods commonly used include suet or other fat, pork rinds, bones with shreds of meat, cooked meats, cut-up apples, birdseed, buckwheat, crackers, crumbs, coconut meat, cracked corn, broken dog biscuits or other bread, hemp seed, millet, nut meats of all kinds, especially peanuts, whole or rolled oats, peppers, pop-corn, pumpkin and squash seeds, raw and boiled rice, sunflower seeds, and wheat. The waste product of grain mills known as screenings is a valuable and inexpensive source of food for birds. Those who desire to have birds about their homes should not feel that

DIGNITY AND DILIGENCE

Jane Steele, aged 9, who travelled from New York to London alone, has a bit of fun with a guard at Buckingham.

their power to attract them is gone when winter is over. Winter feeding easily passes into summer feeding, and experience proves that some birds gladly avail themselves throughout the year of this easy mode of getting a living. However, by cultivating their natural food plants and allowing them to reap the harvest in their own way we may induce them to earn their own living, as it were. Feeding fruit-eating birds is best accomplished by planting selected species of fruit-bearing shrubs and trees. Through late spring and summer there is usually abundance of insect food in addition to fruit enough for all the birds. So far as fruit alone is concerned, autumn is the season of overflowing abundance; in winter the supply gradually decreases, and late winter and early spring are the seasons of actual scarcity. This is the critical time of the year for many birds, and a plentiful supply of

wild fruit will tide them over. Fortunately, everywhere in Canada there are some fruits that persist until there is no longer any need of them. If enough are planted, no birds able to live on this class of food should starve. The best of these long-persisting fruits are juniper, bayberry, thorn apples, and related fruits. In addition to holly and snowberry.

Birds devour cultivated fruit principally because the processes of cultivation diminish the wild supply. The presence of wild fruit in a locality always serves to protect domestic varieties, especially when the wild trees or shrubs are of the same kinds as the cultivated one and ripen earlier. Suitable kinds may be selected for protecting various fruits according to the season of ripening. Among those most useful for the purpose are mulberry, wild blackberries, and wild strawberries, serviceberry, wild cherry and elderberry.

could be done with the tree, the fruit and the actual cultivation.

Shoots of the choicest varieties from many parts of the world, even from the most remote oases, were gathered and studied to seek varieties suitable for American conditions. The Entomological Division was called into consultation. Ages ago the busy insects discovered the value of the date palm and its fruit, and they have been getting the first chance at it ever since.

All the date palms were found to be infected. The maturing of the fruit was much delayed by various pests, and, after the fruit had ripened, while it was being artificially dried and, later, was lying for months at a time in the markets of the world, much of it was destroyed, and most of it was injured in quality. The department worked out methods of controlling the pests on the tree, of protecting the fruit during the time of maturing, of scientifically drying and sterilizing it, and of carefully packing it and keeping it in sterile chambers until the market called for it. Now it is possible to get perfectly clean, sterile and delicious dates in America twelve months in the year.

The production of the date tree has been more than doubted in the last five years. The cultivation of the date has now largely passed from the hands of the department into those of clear-eyed, every-day American people, who themselves are working out minor improvements and especially have developed a co-operative society that handled the marketing. In a desert land they are getting from an acre more than twice as much in food value as it is possible to get from any acre of corn and three times as much as from any acre of wheat. In market

value of product there is even a greater difference.

The cultivator has the further advantage that he can count his dates "before they are hatched." The two things that most affect a farmer are sunshine and water. In the desert the sun shines in the most perfect way for date production all the year around, and with the recent improvement in digging and operating artesian wells the water supply can be exactly controlled. There is a rapidly growing realization in the United States of the value of this delicious, nourishing, digestible food.

Mineral Springs of Canada

The production of mineral waters in Canada in 1927 amounted to 303,529 gallons, valued at \$14,886, and was derived from mineral springs located in Ontario and Quebec. Spring waters containing minerals in solution, or as they are usually termed, mineral waters, occur in many parts of the Dominion. Many of them are utilized commercially, both as potable waters and for bathing purposes. At several of the springs where the waters have curative properties, hotels and sanitariums are operated. Some of the thermal springs are utilized principally for mineral baths.

Origin of Name "Pangnirtung"

According to the Geographic Board of Canada Pangnirtung, the name of the fiord and police post on Baffin Island in the Canadian Arctic archipelago, is of Eskimo origin and means "where buck deer are plentiful." The police post at Pangnirtung was established during the 1923 annual Canadian Government expedition to the northern islands.

Rayon Industry Likely to Treble

In a recent analysis of the artificial or rayon silk industry, the Department of the Interior, through its Natural Resources Intelligence Service, states that small though the production may be, the industry is growing rapidly and output will possibly be trebled in the near future. It is pointed out that Canada holds a pre-eminent position in the world as a producer of the raw product—rayon pulp, and that in fact over half the world's requirements of this material is produced in Canada.

Two processes are in use in Canada for the production of rayon: the viscose process and the cellulose acetate process. The bulk of the world's rayon supply has so far been produced by the viscose method, in which the raw material is bleached sulphite wood pulp in the supply of which Canada predominates. The first artificial silk plant established in Canada uses the viscose process; at present a large addition being erected to this plant will double its output. The second plant, which is just about to get into production of artificial silk, uses the cellulose acetate process, in which the principal raw material is cotton linters. It is notable, however, that large quantities of acetic acid manufactured in Canada will be used in this industry and that it will be a large user of Canadian hydro-electric energy. There is also hope that in time methods will be worked out to apply the cellulose acetate process in the treatment of wood pulp, thus utilizing Canadian raw materials entirely.

That there is an excellent outlook for the rayon industry in Canada is evident from the fact that production is still far from catching up with the steadily increasing domestic requirements. Recent trade statistics for the calendar year 1927 show imports of

rayon and its products amounting to \$7,112,000, compared with \$5,500,000 in 1926. There have been no exports so far of Canadian rayon yarn, but when the industry has been expanded sufficiently to take care of domestic requirements there is little doubt that Canada will be heard from in world trade in this most useful textile.

Opening National Parks to Motorists

The building of first-class motor highways and the provision of campsites and other facilities have served to make the Canadian national parks much more accessible to our own people, and it is a noticeable fact that Canadians are alive to the opportunities which are open to them; tourist records show that a higher percentage of Canadians is visiting these great reserves each year.

Sand and Gravel Pits in Canada

Natural deposits of sands and gravels occur in all provinces of Canada, and as a consequence of this wide distribution, the low value of these materials, and the ubiquitous demand chiefly for filling and structural purposes, there are a very large number of pits operated in Canada.

Our Largest Structural Timber

The largest structural timber grown in Canada is produced by the Douglas fir. The wood of this tree is one of the hardest, heaviest, stiffest, and strongest of all native Canadian timbers, and consequently great quantities are used in bridge-building, wharf construction, and heavy framework of all kinds.

Civilization is the condition in which one generation pays the last generation's debts by issuing bonds for the next generation to pay.

"Dixie" Dean (Everton), England's centre forward (on right) and Low (Chelsea), Scotland's left back in international soccer classic at Wembley.

Thieves De Luxe Modern Feature

Some People Think it Great to Bluff and Cheat

There is a growing tendency among modern young men and women to disregard what used to be the laws of common decency, writes Lola de Laredo in the London Daily Chronicle.

At one time, everybody, without exception, knew that it was not quite nice to get through life on credit—that it was not exactly cricket to incur debts which one had no hope of paying; that it was not very edifying to have to pay regular visits to pawnshops and money-lenders in order to get out of regular tight corners.

Now there is a large section of society which considers this sort of thing not only excusable but rather smart.

INNOCENT BEGINNINGS

In the beginning it is innocent enough. It only becomes dangerous when a man grows to believe that by living on his wits he is really doing what is "done" by the best people, and when he begins to feel contempt for the type of person who earns \$25 a week by honest hard work and lives within his means.

These pseudo-smart people will tell you that they must live decently—they must have their flats in town, they must have their suits from Savile row, they must winter at Cannes and they must spend two months in the summer at Deauville. Someone else always foots the bill.

So long as they do not appear to be hard up—most unforgivable crime—they are never ashamed to say, "I simply haven't a bean in the world, my dear." It never occurs to one of them to inquire how the other lives. They know. They all do the same thing. They borrow and never pay back, they obtain credit without any intention of meeting the debt, they bluff their way through life on the strength of their elegant appearances—in other words, they steal.

There is no ordinary stealing—they are thieves de luxe, and far more dangerous to society than the Bill Sykes type of thief who would put any smugness on his guard.

THEIR EASIEST PREY

They find the world's workers their easiest prey. No dressmaker, for instance, would doubt the integrity of a lady who has a flat near Park Lane and enters her salon wearing a thousand pounds' worth of sables—obtained heaven knows where or how! No Continental hotel proprietor would suspect that madame who occupied the best suite of rooms on the first floor would give him a "dud" cheque on the day of her departure.

Even the most hardened of money-lenders would hesitate to insist upon security when asked for a little ready cash by some princely gentleman who unthinkingly overdraws his account and is selling out a few hundred pounds worth of shares tomorrow.

With regard to his worthless cheques, there is always the time-worn excuse that someone who had promised to pay money into his account on a certain day let him down.

Such are the methods of the thief de luxe. He is a more dangerous enemy to society than a common pick-pocket who does a blatantly dishonest thing with a pretty good chance of being arrested. He juggles with the law, he has had years of practice. He knows the limits to which he may go with some degree of safety.

It is time the law found a new name for the Gentleman-who-lives-on-his-wits, and decided how to deal with him.

Uncovered At Last

THE PUZZLING SPHINX

The riddle ancient Egyptians left for future generations to solve is now wholly cleared of sand.

Date Palms Prosper in U.S.

The Oriental Tree Planted in the Southwest Yields Bountiful Harvest of Fruit

America has gone in for date culture. The United States is doing better with the time-honored date palm of the Orient than the Orientals themselves could do. A new industry has come into existence in that land within a very few years, and the food market is enriched thereby. Yet very little news of this development has reached the reading world.

The date palm is perhaps the oldest known cultivated fruit tree in the world. The earliest records of the Sumerian and Babylonian people in the Euphrates and Tigris Valleys show that the date palm was widely tended by farmers several thousand years before Christ. It is a plant that thrives especially well in hot valleys where there are possibilities of irrigation.

At the Tropic of Cancer all around the world there is a belt of still air. In the Eastern world it is marked by a line of deserts, beginning with Sahara and ending with Gobi, and in

America it crosses Mexico, just touching the Southern States. The cultivation of the date palm proceeded along this line.

Toward the East, in China, the date is known as Persian candy. The Arabs brought the palm and the art of its cultivation with their conquests across Northern Africa and into Spain. The Spanish missionaries brought the seed with them to Mexico and California, and under favorable conditions they got good crops and good food. In Assyrian times some wise observer discovered the art of artificially pollinating the date palm. That was perhaps the first scientific discovery ever made. It has been of vast importance to the culture ever since. The process became a kind of cult in Assyria and is portrayed on some of the old monuments.

In the hands of the farmers of the world the art moved very slowly until the Agricultural Department of the United States took it up. The British, the French and the Italians, who had colonies of Moslem folk, felt that since they had been growing dates for so many centuries they knew all that was possible of the art and so neglected to study it scientifically.

The United States, possessing no population of that kind when the Agricultural Department decided to study the date, looked at it entirely objectively and found that many new things

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use
of Dr. Williams' Pink Pills.

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these, Mrs. W. F. Tait, McKellar, Ont., who says: "I am one of the willing ones to tell you of the great benefit I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed only as they lifted me, and I could only sleep when opiates were given me. The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. After taking six or eight boxes the rheumatism was banished and I had never felt better in my life. It is several years since this happened and I have had no return of the trouble since. I may add that I recommended the pills to two of my friends who were suffering with rheumatism and the pills were equally effective in both cases."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Bathtub Cars

Henry Ford watched pensively, last week, while a line of motor cars no bigger than bathtubs moved briskly toward completion in the huge, humming plant of Morris Motors Ltd., at Cowley, England.

Because there is a crushing British tax on engines of Ford dimensions, the tiny and lightly taxed Morris-Cowley are bought in preference to Fords by thirty Britons.

Through minute after minute Henry Ford watched the swift, straight line of bathtub cars with a fascinated gaze. "You English," he observed at last, "are further ahead here than most Americans realize."

Formal entertainment proffered last week to the visiting Motor Man included a luncheon given by David Lloyd George in the Members' Restaurant of the House of Commons. "My goodness!" said Mr. Ford, later, of Mr. George, "how that man can ask questions about America!"

Lord Dwyer says that "some men electrify their audiences, and others only gas them." It must be remembered, however, that some gas has great lifting power.

She: "He calls himself a gentleman farmer." He: "Oh, and what does he go in for?" She: "Wild oats, principally."

Falsehoods not only disagree with truths, but they usually quarrel among themselves.—Daniel Webster.

Red Rose Tea is guaranteed in every way. Order a package to-day. Use any portion of it, and if you are not entirely pleased you may return the balance to your grocer and your money will be refunded.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Hawaii To Celebrate Discovery of Islands

Honolulu.—The Cook sesquicentennial celebration planned by residents of the Territory of Hawaii for Aug. 15 to 20 to commemorate the discovery of the Sandwich Islands in 1778 by the great English navigator will not stop with a mere marking of the cryptic cycle of 150 years since the ships of the British voyager dropped anchor in the bay of Waimea, Kauai.

In addition to ceremonies prepared for Waimea, the landing point; Kealahou, Hawaii, the spot where Captain James Cook was killed, and Honolulu, the celebration will give to the world in a series of addresses by eminent scholars and authorities on political, diplomatic, commercial, geographical and maritime sciences the results of what might be styled the "timely arrival" of the explorer.

The revised scheme is the broader conception of the original plan to note merely the anniversary of the discovery of the islands by the civilized world. An invitation committee has been appointed composed of Bruce Cartwright, student of all things Hawaiian; the Right Rev. Henry Bond Restarick, Bishop Emeritus of Honolulu's Episcopal diocese; Dr. Herbert E. Gregory, director of the Bishop Museum, and Albert Pierce Taylor, keeper of the archives. Letters have been forwarded to the British Government suggesting topics and the names of men who might prepare addresses on these subjects. Similar action has been taken in regard to the Government of the United States.

The subjects which it is hoped to discuss will involve Hawaii and foreign influences in the Pacific during the last 150 years, as regards England, France, Spain, Russia and the United States. The Governments of New Zealand and Canada have been asked to participate.

The commissioners have completed plans for a week's celebration, with the exception of the exact details. That portion at Waimea will be carried on by residents of the island and will include the dedication of a Cook monument at the point where Cook and his men first stepped ashore.

At Kealahou the ceremonies will include a visit by commission members, guests and visiting officials to the Captain Cook monument, a tiny patch of British soil beside the blue bay where he saw the last of his life. At the spot where Captain Cook "fell with his face in the sea" a bronze tablet will be set under the surface, the inscription to be read through the water.

At Honolulu there will be presented an elaborate masque written by James A. Wilder, Honolulu poet and artist, which is intended to portray Hawaiian life at the time of the arrival of the English seaman.

The special Cook coin, a 50-cent piece recently authorized by Congress, will be available for distribution during the week of the celebration. A special stamp also is to be issued.

Gabby Gertie

"When dumplings taste like paper pulp you can gamble they were made out of a cook book."

First Broker: What's companionate marriage? Second Broker: Interim security, no par, cumulative, free from stock liability, callable at any time.

A man that hath friends must show himself friendly; and there is a friend that sticketh closer than a brother.—Proverbs of Solomon.

Youth Win Prize

Arthur Cleland Lloyd, nineteen-year-old Vancouver youth, who won the prize of \$1,000 offered by E. W. Beatty, Chairman and President of the Canadian Pacific Railway, for orchestral suite open to all comers. This prize is given in connection with the Quebec Folk Song and Handicrafts Festival which is to be held in Quebec May 24-25.

Mr. Lloyd has been under the tutelage of Percy Grainger in Chicago, and is at the present time studying under Harold Bauer and Nicolai Mednikoff in New York. He won the distinction of Associate of Toronto Conservatory of Music with full honors while at the age of thirteen.

Old Chicken Dishes

Spring chickens are still too-high priced to serve frequently, but don't have the older ones always plain stewed. Try some of these unusual ways of cooking.

In Florida they have a delicious way of adding coconut to stewed chicken. Prepare the chicken as for any stew and boil gently in water to cover until tender, about three hours. Have ready a pint of young spinach, measured after cooking. Grate a medium-sized coconut or take its equivalent in the fresh canned, pour over it a pint and a half of milk and let it stand twenty minutes, then put through a sieve. Add the spinach to the chicken, let boil five minutes, then add the coconut milk and boil up once. Remove from the fire and add pepper and salt to taste, the latter last, to prevent any danger of curdling. Sprinkle some of the drained coconut over the top and serve.

Another splendid chicken dish is made by boiling a large chicken in just enough water to cover it until it is tender. Remove it from the fire and add to the water in which it was cooked two minced onions, one tablespoon of chopped red pepper, half a can of tomatoes and salt and pepper to taste. Cook this down until thick. Stuff the chicken with mashed potatoes, moistened with gravy and two tablespoons of raisins mixed with the potato.

Have you ever tried a Yankee pot roasted chicken with cranberries? Prepare a three-pound chicken as for roasting, brown it first in three tablespoons of hot fat. Remove from the pan and add three cups of water, stir until boiling, then add two cups of cranberry sauce made less sweet than usual. (Canned sauce is available the year around.) Replace the chicken in the pan with this gravy-sauce, cover and proceed in the ordinary way, adding salt and pepper to taste when cooking is half finished.

Fricassee chicken with asparagus sauce is especially delightful. Boil the fowl until tender, adding a bit of chopped celery while cooking. Cut in neat pieces for boiling, discarding all bones, and put into a double boiler to keep hot. For the sauce blend two tablespoons of butter and two of flour, add one pint of chicken stock, a slice of onion, a small slice of carrot, one bay leaf, a tiny bit of mace, a sprig of parsley and salt and pepper to taste. Heat slowly, stirring. When heated to boiling set back and simmer twenty minutes. Put the tender green heads from a bunch of asparagus in a cup of boiling water with half a teaspoon of salt and half a teaspoon of lemon juice. Cover, boil twelve minutes, drain, rub through sieve, combine with the other part of the sauce and heat to boiling point and serve over the fowl. Canned asparagus tips may be used.

Minard's Liniment for insect bites.

The following preciously preserved extract from a love letter written home to his wife by a soldier on active service will evoke tender memories in thousands of our former service men: "Don't send me no more nagging letters, Lettie. They don't do no good. I'm three thousand miles away from home, and I want to enjoy this war in peace."

Prince Travels Again

London.—The Prince of Wales is understood to be planning to visit Africa. He may leave on such a trip some time toward the end of the year, and the Duke of York may accompany him. No definite program has been arranged. But the Colonial Office in the meantime will communicate with the African authorities regarding the most favorable conditions for the visit.

Collector Ignores Letters From Kipling to Get More

Every little while the great men who religiously refuse to comply with requests for their autographs get what we in New England call their come-uppance, says "The Boston Transcript." It seems that recently a line of buses was put on the road that passes in front of the residence of Rudyard Kipling. This was unpleasant enough, but Kipling is a public-spirited citizen and made no complaint. But one day an auto-bus smashed off a branch from one of Mr. Kipling's trees. Then he wrote a letter of protest to the proprietor of the bus line. No response. Soon afterward another branch was broken off. Another letter from the author of "Mandalay." No response. Mr. Kipling wrote again. And somebody "put him wise." The bus proprietor is an eager autograph collector.

MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies "eat everything that grown up people do." Such a course is almost certain to bring on indigestion and lay the foundation of much ill-health for the little one.

Other mothers administer harsh, nauseating purgatives which in reality irritate and injure the delicate stomach and bowels and at the same time cause the children to dread all medicine.

Absolutely no meat should be given to a child until it reaches the age of 18 months, and then only if approved by the doctor. For medicine, all strong, disagreeable oils and powders should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the new-born babe. They quickly banish constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Faces of Living Men Carved On British Chemical Building

London.—Faces of living men are carved in stone on the new million-pound building of the Imperial Chemical Industries nearing completion at Westminster.

One of the faces is that of the head of the concern, Sir Alfred Mond. All the other carvings are said to be excellent likenesses of many men prominent in the chemical world.

Machine Plays Violin

Paris.—A "mechanical violinist," which operates like a player piano by a perforated roll of paper, is the work of a French inventor that has just been displayed here.

The caddy-master overheard one of his youthful charges using lurid language. "My lad," he said severely, "do you know what happens to kids who swear?" "Yes," replied the boy pertly, "they grow up and join the club."

How Much Water Should Baby Get? A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces or fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

Wilkins Plane Was Ideal for Job

Murray Bay, P.Q.—The flight across the top of the world by Captain George H. Wilkins, which was achieved with phenomenal success recently brings to the attention of persons interested in aviation a plane about which little is known.

The Lockheed ship which the Australian explorer selected for his venture was designed and developed on the Pacific Coast. Planes of this design have attracted much attention in California and Colonel Charles A. Lindbergh, during his recent visit on the coast, flew one of them.

Marked By Efficiency
The plane is characterized by its extreme lightness in design, its sturdiness and the efficiency with which the general trim of the ship has been marked. The Lockheed Vega has a remarkable high-cruising speed, which accounts for the record time made by Captain Wilkins in flying from Point Barrow to Spitzbergen.

Minard's Liniment for Toothache.

General: "Confound you, sir, why don't you be careful?" Army Clerk: "What do you mean, sir?" General: "Why, instead of addressing this letter to the Intelligence Officer, you have addressed it to the Intelligent Officer. You should know there is no such person in the Army."

There is no conceivable limit to human consumption, and production always lags behind our ambitions.

The world would be a much nicer place in which to live if there were some way to provide switches for single-track minds.

Firestone Tread is Scientifically Designed

When Firestone engineers were developing the Balloon Tire they found it necessary to design a tread altogether different from that required by High Pressure Tires.

The Firestone tread was not designed with large, massive projections for appearance or to make plausible sales argument. On the contrary, the projections of the cross-and-square tread are small and the rider stripe narrow, permitting the tread to yield to irregularities and cling to the road, giving the greatest non-skid surface. This tough, pliable tread has the wear-resisting qualities that give thousands of extra miles of service and save you money.

Your nearest Firestone Dealer will gladly supply your needs and give you the better service that goes with these better tires.

UNIVERSAL PEACE

The action of Mr. Kellogg, the United States Secretary of State, in inviting France and the British Empire to sign a treaty never to go to war, should cause rejoicing amongst all people who believe in the onward march of civilization and who wish to see hatred and strife replaced by understanding and the ways of peace. There can be no question of Canada's response to the invitation when received, nor probably of that of the other nations of the Empire or of France. It has been clearly foreshadowed already that the gesture towards peace by the United States will call forth similar friendly gestures from the rest of the world, so far approached.

None of us can think of the late Great War without feelings of pride and reverence for the many brave men who shed their blood or gave their lives for their country and the ideals that possessed them. "It was magnificent but it was not—Peace." It was war. The nobility, the heroism, the sacrifices, the devotion of the men who died, and of those who live maimed for life, what has it accomplished? If it had ended war it may have been worth while, but looking around the world it does not appear to have ended war, as it was declared the Great War would do, nor to have reduced armies or expenditures on war. Was it worth while? True Germany was checked, but was there no other way to do that? As a matter of fact, the nations had to do at the end of the Great War what should have been done at its beginning—sit around a table and discuss matters.

War is obsolete. War settles no questions, except that of which side has the biggest battalions, the finest chemicals, the most ruthless policy, or the greatest stamina, which means men and money these days. The right end of war to discuss differences is the beginning end, not the closing end. If matters can be settled then there will be no war. It will be a good thing to see the nations "signing the pledge." The pledge has been the means of saving many a drunkard from his drunkenness and this new pledge against war may save nations from ever again becoming drunk on war. No one would regret the passing of war from the earth, except the makers of armaments and other war profiteers, but they do not count. Not a mother who lost her boy in the Great War would to-day vote for war. Not a soldier has carried war hatred over into civil life. We are all heartily sick of war and are to-day remembering that God has made of one blood all the nations of the earth that they should dwell together in peace.

THE CALL OF ALL OUTDOORS

After a few months of snowy joys, the finest of Winter pastimes pass; overcoats seem to weigh a ton; green becomes the most beautiful of colors in the spectrum. The call of Spring sounds loud and clear and with it we begin to plan for our Summer's vacation.

To choose from the varied delights of seashore or mountain lakeland; of resort hotel or camp, becomes a problem of never-ending delight.

Canadian National places Canada's choicest vacation spots within easy reach. Luxurious train service will take you to Jasper National Park or the Pacific Coast and Alaska; to the forest fastness of the Highlands of Ontario; to any one of many beautiful spots on the Lower St. Lawrence or to the delightful seaside and woodland havens of the Maritimes.

Literature and full information may be obtained from any Canadian National Agent, or from the City Ticket Office.

CUSHING.

Mr. W. Chambers was the guest of Mr. Fred Graham on Sunday.

Communion Service in St. Mungo's Church Sunday, June 3rd, at the morning service.

Mr. and Mrs. Lemuel Cushing and family of Montreal were guests of Mrs. W. Y. King for the 24th.

Mr. E. Brosseau, of Hawkesbury, Ont., was the week-end guest of his brother, Mr. A. Brosseau.

Mr. and Mrs. George Bradford, of Little Rideau, were Sunday guests of their son, Mr. John Bradford.

Mr. and Mrs. John Mahon, Brownsburg, visited at the home of Mr. and Mrs. A. Graham on Thursday.

Miss Olga Bradford and friend, of Ottawa, were guests of Mr. and Mrs. John Bradford for the week-end.

A very pleasant meeting of St. Mungo's Ladies' Aid was held on Thursday at the home of Miss B. Nicholls.

Quite a number of Cushing residents attended the concert in St. Andrews United Church and reported a very good time.

The W.M.S. of St. Mungo's Church meets at the home of Mrs. T. Weir Sr., on Tuesday afternoon, June 5th, at the usual hour.

The Misses Mary and Betty Burton, of Montreal, were guests for the latter part of last week of their grand mother, Mrs. Jas. Cleland.

Miss I. Fletcher, of Brownsburg, who has been in charge of Cushing School for the past term has closed her school and returned home, much to the regret of her many friends in Cushing.

The Concert held in the Stone Hall, on Friday, was a great success. Our thanks are due to the following, who so kindly assisted with the program.

Miss Wheelahan, of Cushing, and Miss Bradford, of Point Fortune, who gave Drummond selections; Mrs. Macaskill of St. Andrews, who gave readings from David Copperfield and of the Civil War in U. S. A. The St. Andrews Quartette, composed of Mrs. E. Beanson, Mrs. F. Robertson and Messrs. L. Hooker and D. Todd, solos were also rendered by Mrs. Robertson and Messrs. D. Todd and J. Fraser, the latter delightful young and old alike with his Scotch selections. The Misses Wilson, Brown, Le Roy and Shaw gave an amusing sketch called "Three Dear Friends" and Miss Ellen Canning, entertained with a Monologue. The Cushing Uplight Society held a meeting which proved quite amusing at times.

The concert proved quite a success and the program was greatly enjoyed by all.

5 of the reasons why McLAUGHLIN -BUICK will serve you Better and save you More!

NOT only does today's McLaughlin-Buick excel in smart, low, dashing lines—in vivid new color harmonies—in luxurious upholsteries and appointments—but it sweeps far ahead of its field in those vital engineering factors which mean greater comfort—greater performance—greater economy—and greater value.

In Most Cars—
the springs have to serve a double function—to drive the car and to cushion the load.

In McLaughlin-Buick—
the springs have only one function—to cushion the load—and naturally are designed to provide much finer riding qualities.

In Most Cars—
water, mud and dust can work their way into moving parts causing excessive wear, engine stalling and other troubles.

In McLaughlin-Buick—
the Sealed Chassis and Triple-Sealed Engine absolutely prevent these troubles. All vital parts are enclosed in dirt-proof, dust-proof, water-tight housings.

In Most Cars—
vibration is merely dampened by means of additional bearings or other inadequate devices.

In McLaughlin-Buick—
the scientifically designed Valve-in-Head Engine, counter-balanced crankshaft and finely balanced units throughout result in performance vibrationless beyond belief.

In Most Cars—
quality is often sacrificed for price, or prices advanced to permit fine quality.

In McLaughlin-Buick—
tremendous demand makes possible both high quality and moderate price—and therefore unrivaled value.

In Most Cars—
the dealer's delivered price, including the delivery or handling charge, to the buyer—is not rigidly fixed by the factory behind the car.

In McLaughlin-Buick—
the lowest possible delivered price, including the delivery or handling charge is definitely established by the McLaughlin-Buick factory. Thus McLaughlin-Buick quality is provided to McLaughlin-Buick owners everywhere at lowest cost.

It Pays to Buy McLaughlin-Buick!

PROVINCE OF QUEBEC, COUNTY OF ARGENTEUIL, MUNICIPALITY OF THE TOWN OF LACHUTE.

BY-LAW NO. 110.

At a regular adjourned meeting of the Council of Lachute Town Corporation, held in the Council Room, in the said Town of Lachute, 10th May 1928, under the provisions of the Cities and Towns Act, and the special Act incorporating the Town of Lachute, and also the special Act amending the Charter of the Town of Lachute, 10 Geo. V, chapter 106, on the 22nd day of July 1921, at which session were present:

Mayor H. M. Gall, and Aldermen T. Dallaire, A. Larocque, P. Dobbie, H. M. Lavigne, A. J. Elliott, G. J. Charland, J. Speight and C. R. Miller, forming a quorum under the presidency of the Mayor, the following By-Law was adopted:—

(A) WHEREAS the population of this town does not exceed 5000 inhabitants;

(B) WHEREAS a petition containing 173 names of municipal electors of this town has been presented to this Council, asking that a by-law be submitted to the municipal electors of this town, in order to permit the establishment of a branch of the Quebec Liquor Commission in the town of Lachute;

(C) WHEREAS a notice of motion has been duly given of the adoption of the present by-law;

LET IT BE THEREFORE ORDERED AND DECREED BY BY-LAW, AND IT IS HEREBY ORDERED AND DECREED BY BY-LAW OF THIS COUNCIL as follows:

- 1.—That a branch of the Quebec Liquor Commission be established within the limits of the town of Lachute, according to the Quebec Alcoholic Liquor Act;
- 2.—That the present by-law be submitted to the municipal electors of this town for approval on the 12th day of June 1928, according to law;
- 3.—The present by-law shall come into force and effect after having been duly approved by the majority of the municipal electors who shall have voted on the present by-law;

PROVINCE OF QUEBEC, DISTRICT DE TERREBONNE, MUNICIPALITE DE LA VILLE DE LACHUTE.

REGLEMENT NO. 110.

A une session régulière ajournée du conseil municipal de la ville de Lachute, tenue à l'Hôtel de Ville de Lachute, le 10 mai 1928 selon les dispositions de la Loi des Cités et Villes, et de l'acte spécial incorporant la Ville de Lachute, et aussi de l'acte spécial amendant la charte de la Ville de Lachute, 10 Georges V, chapitre 106, le 22ième jour de juillet 1921, à laquelle session étaient présents:

Maire H. M. Gall et conseillers T. Dallaire, A. Larocque, P. Dobbie, H. M. Lavigne, A. J. Elliott, G. J. Charland, J. Speight et C. R. Miller, formant quorum sous la présidence du Maire, le présent règlement a été adopté:—

(A) ATTENDU que la population de la Ville de Lachute ne dépasse pas 5000 habitants;

(B) ATTENDU qu'une requête contenant 173 noms d'électeurs municipaux de cette ville, a été présentée au Conseil municipal, demandant de soumettre aux électeurs municipaux de cette ville un règlement permettant l'établissement d'une succursale de la Commission des Liqueurs de Québec dans la ville de Lachute;

(C) ATTENDU qu'un avis de motion a été dûment donné de l'adoption du présent règlement;

QU'IL SOIT EN CONSEQUENCE ORDONNE ET DECRETE, ET IL EST PAR LE PRESENT REGLEMENT ORDONNE ET DECRETE comme suit:

- 1.—Qu'une succursale de la Commission des Liqueurs de Québec soit établie dans les limites de la ville de Lachute, conformément à la Loi des Liqueurs Alcooliques de Québec;
- 2.—Que le présent règlement soit soumis à l'approbation des électeurs municipaux de cette ville, le 12ième jour de juin 1928, conformément à la Loi;
- 3.—Le présent règlement viendra en force et vigueur après avoir été approuvé par la majorité des électeurs municipaux de la ville de Lachute qui auront voté sur le dit règlement.

—Hemstitching and Pekoe Edge, properly done. Quick Service. Telephone 71 ring 2-4.

LAKEFIELD.

Mr. Waters held his farewell services last Sunday.

Mr. Alex. Miller is spending the summer at Rosemount.

The wet weather is retarding the spring work considerably in this district.

Mr. James R. Baker, of Montreal, has opened his summer cottage on Long Lake.

Mr. Clifford Oswald, of St. Scholastique, guest of Miss Grace Foster over the week-end.

Mrs. Wm. Evans entertained Mr. and Mrs. W. S. Andrews and children over the week-end.

Mr. Henney MacDonald of Montreal, was the guest of his parents, for the week-end.

Miss Jean Denovan, of Dalkrith, Ont., guest of the Misses Sherripts over the week-end.

Mr. and Mrs. Chas. Andrews and Miss M. Evans were week-end guests of Mrs. Robert Evans.

Empire Day witnessed quite a number of visitors in spite of threatening weather and rather bad roads.

Archdeacon and Mrs. Overing, Mr. and Mrs. Laurence Overing and son spent the holiday at Oerlocken.

Mr. and Mrs. R. J. Westgate, of London, Ont., are expected home this week, to visit their many friends here.

Messrs. Wm. Smith and Naylor Mount the Misses Grace Heather and Dora Milner spent Empire Day at Rosemount.

Mr. J. V. Andrews, of Saskatoon, Sask., who has been home attending the funeral of his brother, the late Bertram Andrews, has returned.

Rev. H. P. Mount, B.A., B.D., Mrs. Wm. Maynard, Mr. Whitley Mount and Miss Ruth Godin, motored from Montreal and spent Empire Day at Rosemount.

Mr. and Mrs. Harry Scott, Mr. M. Scott, of Lachute, accompanied by Miss Ida Scott, of Calgary, Alta., Miss Hazel Baker and Mr. Alvin Kyle, of Montreal, spent the twenty-fourth visiting friends here.

Mr. and Mrs. G. Warwick and daughter Audrey, Miss Wilma Tomalty, Messrs. Wallace Thompson, Robert and Lyall Tomalty motored here from Flint, Mich., to spend two weeks holidays with their parents, Mr. and Mrs. A. Tomalty.

On Sunday, June 3rd, Mr. Flander B.A., of the Diocesan College, takes charge of this parish and it is hoped that there will be a good attendance to welcome him at the services at Shrewsbury at 10.30 a.m. and at Lakefield at 2.30 p.m. Standard time. Mr. Flander has a distinguished college record; and D.V. is to be ordained in a few weeks.

ST. ANDREWS EAST.

Miss Elizabeth Walsh was at her home for the holidays.

Miss Seymour spent Thursday with friends in Montreal.

Miss Beattie Rodger was at her home here Empire Day.

Miss Evelyn Wales spent the week-end with her parents at Sunnyside.

Miss Ida Hopper of Montreal, spent the week-end with her sister, Mrs. Charman.

Miss Mock has returned from Montreal to spend some time with Mrs. B. N. Wales.

The Women's Guild on Saturday afternoon entertained at tea, in the vestry of the United Church, the members of the Company who played "Hello Bill."

Do not forget the dramatic entertainment to be given Saturday, June 2nd, at 8.15 p.m., by the Montreal Island Dramatic Club, in the Town Hall, under auspices of the Anglican Church.

Miss Mari Grant, of Montreal, has been at Mrs. Leroy's for the week past. She intended making sketches of some of our fine scenery, but the weather has not been favorable. If the rain and floods do not wash the scenery all away she expects to come again, and who hope she will have better fortune next time.

The play "Hello Bill" was given in the Town Hall, Saturday evening, by the Young People of Rosemount. The acting was worthy of professionals and the entertainment a treat to those who attended. The proceeds were given to the Women's Guild of the United Church, and hearty thanks are due to this agreeable company of amateur actors.

THE MISCHIEF - 371-49844

STANDARD BRED STALLION FOR SERVICE

This well known trotting stallion will make the season commencing May 28th, as follows:

THE YELLOW SEVEN. THE BOX TRICK.

BY EDMUND SNELL.
ILLUSTRATED BY
J. R. S. WATFIELD

BEGIN HERE TODAY

Capt. John Hewitt, Commissioner of Police at Jesselton, British North Borneo, is worried because jewels are stolen from Lady Sornaway while she is a guest at his home. Chai-Hung, influential Chinese, promises to assist in the recovery of the jewels. Pennington, detective, is hired by the government to capture the leader of The Yellow Seven, a gang of Chinese bandits. Monica Viney, sister of Capt. Hewitt, persuades Officer Dawson to take her to a Chinese gambling den.

NOW GO ON WITH THE STORY

"Chinese" Pennington lay tapping the toes of his shoes together, gazing through the wreath of smoke that hung above him at a lizard that clung to the ceiling of the veranda of Captain John Hewitt—Commissioner of Police. A hand reached down and scratched at a section of white calf that showed between the lowest extremity of a carefully creased trouser-leg and the top of a crumpled sock. The strange diagonal slits, behind which his eyes had a knack of disappearing, widened presently, and he looked across at Monica.

"Hot, isn't it?"
"Almost too hot to think. I'm glad you've decided to sit up because I've lots of things I want to ask you."
"What sort of things, Mrs. Viney?"
"There are heaps of things I don't understand," she told him. "Why don't you arrest Mr. Chai-Hung?"
"You think we ought to?"

"Why, of course. You know him to be the leader of Chinese opinion on the island; you know him to be cunning, unscrupulous, capable of anything. . . . I can't see why Jack bothers himself to scour the countryside for Chai-Hung's pappets—when the oily Oriental who actually pulls the wires is still at large."

The man with the Chinese eyes balanced a rubber pouch on his knees and began rolling a fresh cigarette. Monica watched him impatiently. She found it difficult to associate in her mind the two Penningtons—the youthful, immaculate idler who ornamented her brother's bungalow, leading an apparently purposeless existence, and the gaunt, lean scarecrow who, a master of disfects and disguise—wandered undetected from drinking-house to opium-den, from market-place to camp-fire, bounding out the spreaders of a sedition that disturbed the peace of the handful of white settlers that dwelt on these fringes of civilization.

"I'm afraid you have to blame me for that, Mrs. Viney," he said slowly. "You see, things aren't always as easy as they seem. Chai-Hung is still the most respected Chinaman in Borneo. I'm prepared to admit that there was a time when things looked black against him. It seemed incredible that he should be able to find a way out, but he did. Among a legion of worshipping followers it was by no means difficult for him to discover a scape-goat."

Monica sat up.
"But the Yellow Seven," she persisted excitedly. "Nothing can explain away that."

Pennington spread out his hands.
"I know," he agreed. "In almost every outrage committed that yellow card, with its seven black dots has been traced; but what does it go to prove, after all?—merely that the perpetrator belonged to a society or cult among which this symbol exercises a significance. It proves nothing against Chai-Hung."

"But you know—"
"Of course I know. You know—and so does your brother, but it's up to us to prove our case. It's up to me to catch Chai-Hung red-handed with the cards in his possession. Have you ever seen Lalang, Mrs. Viney? It's a

weed that grows high on ill-tended plantations. Once deeply-rooted, it spreads everywhere. To destroy it, you must dig it up—roots and all—and burn it until there is nothing left that can take root again. The Yellow Seven is like Lalang. I've got to make certain that Chai-Hung is the root—and the only root."

"I see," said Monica thoughtfully. "And until this happens—"
"Until then every planter who walks in lonely places—goes in peril of his life; every white man who employs a Chinese cook-boy should look closely into his credentials when he engages him, and carefully into his cooking forever thereafter!"

At that moment, Pennington, who had been looking through the doorway, raised a warning finger. Monica turned to see the face of Chai-Hung regarding her from the foot of the steps, which led to the verandah. Over his head was the inevitable red umbrella, and an undersized coolie—ill-favored and hump-backed—lurked in the background. The Oriental bent himself nearly double before the English girl.

"Good afternoon, Mrs. Viney. How do you do, Mr. Pennington? Is His Excellency the Commissioner at home?"

"I'm afraid he's out, Mr. Chai-Hung," she said.

"I came in by the train this afternoon," he said, in a rasping voice. "I came to suggest that a little more police vigilance might be exerted in the district in which my estate lies. An unpleasant incident occurred there last night. Mr. Allison—an assistant on a local plantation—was the victim of what I believe you call 'a gang murder'."

Pennington's brain reeled.
"Allison?" he gasped.
The Oriental nodded calmly.

"It appears he was the bearer of a considerable sum of money with which to pay the coolies and stayed a trifle too long at a friend's bungalow."
"Thanks," said Pennington drily. "I'm much obliged. It's a queer thing, Mr. Chai-Hung, but I'd always regarded your territory free from this sort of thing. I rather fancied it was because you were there!"

For a fraction of a second the eyes of Chai-Hung flashed fire.
The Chinaman produced an envelope from his tunic pocket.
"Perhaps you would be kind enough to hand this to Captain Hewitt. It was found near the scene of the tragedy."

Pennington took the envelope.
"I take it that the crime was enacted within reasonable distance of your house, Mr. Chai-Hung?"

"Unpleasantly so."
"And this—clue was discovered by one of your men?"

"It was found by me."
Pennington screwed up his eyes.
"That's interesting," he said softly. "I wonder if you could manage to pass this way again, say tomorrow morning—about ten?"

Chai-Hung shook his head slowly.
"I'm afraid that would be utterly impossible."

"Going away?" inquired Pennington casually.

The corners of the Chinaman's mouth twitched.
"I may possibly be absent from my residence—for an indefinite period," he announced loftily. "I shall be obliged if you will inform His Excellency the Commissioner that one of my secretaries will attend to any correspondence he may think necessary."

He turned abruptly and made his way toward the dusty road—a hundred yards below.

"Well!" demanded Monica eagerly, as soon as the Celestial and his hunch-backed satellite were out of ear-shot. Pennington leaned back against the wooden rail.
"It's perfectly amazing," he admitted. "I'm dashed sorry for poor Allison, of course, but it's the main issue that interests me at this moment. Look at the staff-work! He deliberately organizes a tragedy almost on his own doorstep, and calmly arranges things so that he will be the first to bring the news to the Commissioner. Then he presents us with one of these delightful little symbols, for all the world as if he'd never seen one in all his life before! Ye gods!"

He slid a finger under the flap of the envelope and tore it open. Monica saw him draw out a card. He held the thing with its black back before her, then twisted his fingers so that she could observe the bright yellow surface of its other side, and the seven black dots with which it was ornamented.

"The Yellow Seven!" she whispered.

Pennington left the rail and began pacing the verandah.
"His agents are everywhere," he ventured presently. "Even his visit this afternoon was carefully calculated so that he should run no risk of encountering your brother on his way. He knew that Hewitt was lunching with the governor at Sandakan. He is undoubtedly aware that the Commissioner is returning with the warrant for the arrest of our friend, Chai-Hung!"

"Then that is why—"
"That is why he is going away for an indefinite period."

Monica's forehead wrinkled.
"Oughtn't you to do something?"
Pennington smiled grimly.

"Chai-Hung is being watched—night and day."

Monica uttered a deep sigh of contentment.

"I don't see that there's much to bother about, then. You're bound to get him."

"You'd think so, wouldn't you? I used to think so—once. But that was when I allowed myself to be carried away by youthful enthusiasm. There's something about Chai-Hung

"The Yellow Seven," she whispered.

that baffles one at every turn. He's a past-master of cunning, an enthusiastic student of every diabolical crime in existence, but, beyond all that, he's gifted with an intuition—a sort of second-sight, that borders on the supernatural."

Captain John Hewitt swung into view a bare half-hour after the fall of darkness, and found his sister waiting for him on the threshold.

"Have you got it?" she whispered.

The Commissioner looked down at her and smiled reprovingly.

"Got what?"

She reached up on tip-toe and whispered something in his ear.

"You've been hearing more state secrets than are good for you," he laughed. "Why do you ask?"

She stood looking out into the tropic darkness.

(To be continued.)

Too Soon For Increase.

"I give my wife forty dollars and she's kickin' for sixty. What d'you think of that?"

"Well, why don't you give it to her?"

"Why, I've only had her one week."

Buyer—"Why, this horse is so thin I can feel his ribs." Dealer—"Well, count 'em. You'll find 'em all there."

First Landlady—"I keep my lodgers longer than you do." Second Ditto—"No, you don't; but they're so thin they look longer."

A reliable antiseptic—Minard's.

"Barbara regrets having married that Scotch fellow. How's he treating her?" Very reluctantly, she says.

The Harley-Davidson Single-Cylinder Motorcycle is the greatest little machine that has been made. Safe to ride, easy to control, and most economical. Stands without a rival. 100 Miles to Gallon of Gasoline. Down Payment \$105. Balance \$22 per month for ten months. Price \$305. Walter Andrews, Limited, 340 Yonge St., Toronto, Ont.

EXCELLENT TRAVEL DRESS

A smart, serviceable one-piece dress closing at centre-front with plaited inset, with inverted plaits at either side, which add graceful flare to hemline. It is an ideal style for town, business or travel, fashioned of navy blue Canton faille silk crepe, tan Angora wool jersey, light weight tweed, in beige and brown shade, or black crepe satin. Style No. 708, designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure, and only requires 3 1/2 yard of 40-inch material for the 36-inch size. Price 20c the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10c the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

Training Farm is Opened in England

A farm where young single men may be trained for farm work in Canada has been opened near Bletchley in Bedfordshire, England, under the joint auspices of the Canadian Pacific Railway and the Hudson's Bay Overseas Settlement, Ltd. The instruction lasts from four to ten weeks. No charge will be made for the instruction or for board and lodging while applicants are being acquainted with the duties awaiting them on Canadian farms. Each applicant is required to deposit \$50 as a guarantee that he intends to proceed to farm work in Canada. The fare to Winnipeg will be deducted from this and the remainder, approximately \$25.00, will be repaid upon the arrival of the new recruit at Winnipeg.

THERE is nothing quite equal to Aspirin for all sorts of aches and pains, but be sure it is Aspirin. The name Bayer should appear on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it:

Aspirin is the trade mark (registered in Canada) of the Bayer Manufacturing Co. While it is well known that Aspirin means Bayer manufacture, in some cases public attention is attracted by the fact that the tablets will be stamped with their "Bayer Cross" trade mark.

Only teas grown 4,000 to 7,000 feet above sea level are used in "SALADA" Orange Pekoe Blend—the flavour is therefore richer, more fragrant and much more delicious than other teas. Only 43c per 1-lb.—Buy it at any grocery store.

The Mockingbird in Cuba

That most delightful of all song birds in the known world, the mockingbird of America, is quite common in Cuba and remains with us throughout the entire year. Fortunately, too, he is by nature probably the most domestic of all wild birds and seems to like the society of human beings, his nest being found usually within small groves or shade trees close to the house.

Of all known birds, this little warbler with his wonderful imitation of other birds and of many animals, gives more pleasure to those within range of his voice than other members of the feathered tribe. To the farmer, too, he is of great benefit, since, like the robin, he feeds largely on insects.

In Cuba we have a vine of fine, delicate leaves and small yellow flowers that will quickly cover a wire fence with a mantle of green. The vine is called the "Cundeamor" (the cradle or giver of love), while its fruit is of an odd shape, the size of a French walnut, and in color a vivid orange. The seed of this fruit is to the mockingbird the most tempting of all food, so that if one cares for the company of these makers of sweet music, it is well to plant "Cundeamor" alongside his fences.

Not only does this wonderful little songster of the tropics and semi-tropics fill the air by day with sweet notes but, like the nightingale, with the rising of the moon his voice rings out clear and melodious in the night air—an enchanting solo given to the world free—without price. Near relatives of the polyglots are scattered over most of the Southern States and are found also in Mexico and Central America. Unlike most wild birds, the mocker, if caught when little, seems really to enjoy life in captivity, his range of imitation increasing when caged.—Cuba Review.

"Grace is accused of being a gold-digger."

"Frivolous use of the males, eh?"

Minard's Liniment for falling hair.

Those who say that Prohibition is a failure have never tried it, says Pussy-foot Johnson. The same can be said of capital punishment.

BEST FOR ALL YOUR BAKING — Pies, Cakes, Buns and Bread — DOES ALL YOUR BAKING BEST

Attractive Ways to Serve Old Dishes

Have you ever noticed how your children and your "lord and master" will fairly gobble up the plainest foods when they dine at another's home, though they would refuse the same in their own home? Of course! Every homemaker has had such experiences. But did you ever stop to consider the reason? "Good manners!" you reply. Maybe; but think about it, didn't the hostess who served mere rice and shrimps, beefsteak and onions, chops and potatoes, or meat balls and that old tuber, or such ordinary dessert as pie, do it just a little more attractively or surprisingly than you served similar foods at every-day meals? In other words, didn't she bedeck them tastefully, so to speak? This can be done, you know, without much if any extra work by drafting the imagination into service in the otherwise humdrum task of feeding a family.

Spaghetti, Eggs and Cheese.

Boil sticks of spaghetti (without breaking them more than necessary) in the usual way. Meantime hard boil several eggs, shell and slice them. Now place halves of firm tomatoes, well seasoned and dotted with butter, under a hot broiler. Make a cream sauce and add to it enough grated cheese to give it a rich yellow color. Place the spaghetti (after it has been drained) upon a large platter; place the broiled tomato halves upon it; top them with the slices of hard-boiled eggs. Cover the tomatoes, eggs and spaghetti with the hot cheese sauce. Sprinkle with paprika and serve at once.

A Crown of Lamb Chops.

Mash potatoes in the usual way, taking care to make them smooth and creamy. Meantime broil your chops. Just before serving, center a warm platter with a cone-shaped mound of the potatoes, topped with a large piece of butter. Next stand the chops meat end on the platter against the side of your potato mound. Garnish the platter with either mint leaves or springs of parsley.

Riced Potatoes and Meat Balls.

Boil potatoes and rice them in the usual way. Mix your chopped meat with butter, salt and pepper, form it into balls, then center each with a pimento stuffed olive. Broil or bake the meat balls. When ready to serve fill a warm platter with the riced potatoes. Upon the riced potatoes place the meat balls. Garnish the outer edge of the potatoes with alternate with alternate dots of butter and slices of pimento, stuffed green or plain ripe olives. Serve piping hot.

Rice, Eggs and Shrimps.

This is a very pretty looking dish and is almost no trouble to concoct. Place boiled rice in a flat cake-shaped portion upon warm plates. Upon each such portion of rice put a mediumly hard-boiled or poached egg. Top the egg with a single shrimp. Serve with a plain curry sauce.

Colored Vegetable Plates.

Fill a warm platter with triangles of crisp buttered toast. Cover each toast triangle with a mound of well seasoned string beans. Center each of these mounds with either a young, boiled beet or with a beet cone fashioned with a vegetable cutter.

Fish With Asparagus.

For this dish use either a boiled white-fish or salmon. (If you use the latter, merely steam it until it is thoroughly warmed.) Place the fish upon a hot platter, cover it with asparagus tips which are also hot. Over this pour a hot cream sauce, made with butter, flour and milk. Cover the sauce with minced green peppers. (If preferred, the fish topped with the asparagus tips may be first presented without the sauce, that the color scheme of green and white or green and pink may be noted. The sauce and the minced green peppers are then passed in separate dishes.)

Every one knows that vegetables are good for grown-ups and children alike, but it is difficult to make the average being enthuse over these health-giving foods. Maybe if you try these color-scheme vegetable platters on your family you will have the surprising success with them that other housewives who have served them have met with.

A Red and White Platter.

Thoroughly wash a large head of cauliflower and boil it in fresh water. Do not salt the water beforehand, as that tends to discolor the vegetable. Meantime either heat some canned tomatoes or stew some fresh ones. Just before serving place the stewed tomatoes upon a warm platter. Center them with the head of cauliflower. (If you have separated it before cooking build it up mound-fashion in the center of the platter). Garnish the cauliflower with strips of pimento and serve at once.

Or, if tomatoes are seasonable, halve small, firm tomatoes, sprinkle with coarse bread crumbs and cheese and broil. Arrange around the mound of cauliflower and serve with cheese.

A Yellow and Green Platter.

Place creamed spinach upon a platter. Around the edge lay slices of cooked carrots. Center the spinach with slices of hard-boiled eggs arranged in mound shape.

Noodle Ring.

Noodle ring is delightful to serve with spinach or with creamed fish, meat or chicken. It is made thus: 4 eggs, 2 cups dry noodles, 1 cup milk, 1 small piece of butter, salt to taste. Cook the noodles and rinse them in

cold water. Add the milk and stir; add well beaten egg yolks and then lastly the beaten whites. Cook in a ring-mold, set in a pan of boiling water. This should be in the oven about forty-five minutes. Be sure to butter your mold well before placing the mixture in it.

A TIRED FEELING IN SPRINGTIME

Not Sick, But Not Up to the Mark—You Need the Help of That Sterling Tonic, Dr. Williams' Pink Pills—They Give New Vitality.

With the passing of winter many people feel weak, depressed and easily tired. The body lacks the vital force and energy pure blood alone can give. In a word, while not exactly sick, the indoor life of winter has left its mark upon them. A blood-building, nerve-restoring tonic is needed to give renewed health and energy. Dr. Williams' Pink Pills are an all-year-round blood builder and nerve tonic, but are especially useful in the spring. Every dose helps to make new, rich, red blood and with this new blood return strength, cheerfulness and good health quickly follow.

If you are pale, easily tired, or breathless at the least exertion, if your complexion is poor or you are troubled with pimples or eruptions, Dr. Williams' Pink Pills are just what you need to put you right. If you have twinges of rheumatism, are subject to headaches and backaches, if you are irritable and nervous, if your sleep does not refresh you, or your appetite is poor, you need the treatment Dr. Williams' Pink Pills alone can give—you need the new blood, new strength and new energy this medicine always brings. Mr. A. Marcotte, North Ham, Que., writes:—"I have found great benefit from the use of Dr. Williams' Pink Pills. Before I began using them I was in a badly run-down condition, and at times felt scarcely able to work. Dr. Williams' Pink Pills have changed all this and since taking them, I am enjoying the best of health. Every man who feels run-down and easily tired should give this great medicine a fair trial."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Spice and Sweetness

The mere thought of clover, in some unaccountable way, suggests summer. When the hum of bees is heard in a monotone of buzzing rhythm, when the warmth of the sun, when all is peaceful under an azure sky, there is sure to be clover growing close by. Clover makes for busy contentment: an endless round of honey-gathering for the brown and gold bees, dipping into the sacks of the white clover, emerging tinged a dusty yellowish-white with pollen. A drowsy monotony hums—only the bees are working, for all else is hot and golden—asleep in the sun.

Even scurrying wasps, a black and shimmering blue in the glinting sunlight, hover over the sweet smelling clover. Slender striped yellow-jackets glance and hesitate; dash away to their homes in a hollow telephone pole. Endless green stalks, thick as pencils, rise to the height of a man's waist. Clover leaves make a forest of light green under the nodding white cylinders of the clover blossoms. Tiny flowers comprise these cylinders of white sweetness, whose scent has a delicious tang. Not a cloying overpowering scent, but a mild, pleasant aroma, reminiscent of summer's own fragrance.

On the lawns tiny white clovers, close to the ground, their long petals curving to form diminutive clover-heads, perfume the atmosphere. When they are not fullgrown, green tips the petals—petals almost like tiny chrysanthemums; when in full bloom pink floods the tips, emitting a sweetness that is the very essence of summer. When dry and powdery, a coppery brown tint changes the fluttering petals, but a faint scent above the dryness still is easily recognizable.

Maroon shades claim the larger red clover that covers the field which lies fallow. On the wind the sweet clover scents come flying; even far away from the field one can picture the maroon-colored clover blossoms; their pointed oval green leaves that have deep centres veins, their plant light green stalks. In the wind the blossoms bend; the under surface of lighter green spreads as it follows the wind's course, hiding its soft red blooms under its obelisk to the summer breeze.

Spice and sweetness; white and green and maroon blossoms in the warmth of summertime.

A New Remedy For Sagging Chair Bottoms

Chairs with sagging cane-seat bottoms can be made comfortable to sit on again by wetting the cane-seat bottom with boiling water and by letting it dry in the open air. After two or three wettings the cane seat bottom will be as tight as a new one.

An Old Game Revived

THE PRINCE OF WALES A PING-PONGER

When the Prince visited a working lads' hostel in the east end of London he played table tennis with one of the boys at this old game which is once more coming to the front.

No New Idea

Historian Finds Women Adopt Scanty Dress After Great Wars

London.—The theory that women always dress scantily in the years following great wars is advanced by the Hon. Sir John Fortescue, K.C.V.O., the historian, who was formerly the King's librarian at Windsor Castle.

"It seems to be the rule," writes Sir John in "The Evening News," "that when men take the shedding of blood on a large scale, women must begin to shed raiment." The author then proceeds learnedly and at length to support this thesis by tracing the history of women's styles from the time of the Norman conquest. He emphasizes particularly the flimsy and abbreviated clothes which became fashionable after the French Revolution and the World War. Incidentally, he dates the popular evening "chemise frock" from the Egypt of at least 3,000 years ago—presumably it was designed following some heavy fighting around the Pyramids.

The author concludes by predicting the return of long skirts. "I hope I may yet live," he says fervently, "to see again graceful, flowing draperies in evening dresses, setting forth the lines of the perfect body, and what is no less important concealing the defects of the imperfect."

Larkin Not Selling Salada Tea Business

Officials of the Salada Tea Company, Toronto, have informed this paper that the Hon. Peter C. Larkin, Canadian High Commissioner in London has cabled a denial to the rumour that he was selling his Salada Tea business. "There is not a grain of truth in it," he said. "We have had numerous offers for the business since I took office under the Government, but I would not entertain the idea of parting with any of the business interests of myself or my son, neither would my son."

Hon. Mr. Larkin said he hoped to return to Toronto to resume his former life there when the Canadian Government no longer requires his services in London. His son, Gerald R. Larkin is president of the Salada Tea Company.

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands of Mothers Say of Baby's Own Tablets.

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use nothing else. Concerning them Mrs. Charles Hutt, Tancook Island, N.S., writes:—"I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past 20 years and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

A Great Nag

"Why do you always speak of your wife as trotting around? She isn't a horse."

"Well, maybe not; but she's a great nag."

The Wife: "Quick, George's awl-lowed one of my hairpins." Her husband: "It doesn't matter a bit, dear. They're no use now, are they?"

Asks Doctor to Tell Girl He Is Unfit to Marry

Berlin.—That the ways of eugenics are best with pitfalls was demonstrated by the following letter to a physician of Berlin, which was published in "Die Medizinische Welt."

"Dear Doctor: Kindly forgive me for troubling you, but I have heard that a Miss—intends calling on you to-day to inform herself about my state of health. Should this really be so, would greatly oblige me by telling her that I am suffering from pulmonary tuberculosis, have a valvular disease of the heart and am utterly unfit to marry. On my next visit to you I shall take occasion of expressing my gratitude for this courtesy with ten marks (\$2.50)."

MacMillan Helps

Navigator Proposes Scheme To Aid Trans-Atlantic Flyers

Montreal.—If plans materialize according to the wishes of Lieut. Donald MacMillan, a navigating officer now connected with the Cunard Line, trans-Atlantic airmen will never be out of communication with the mainland, according to reports received here.

It is stated that Lieut. MacMillan, impressed with the number of lives lost in attempting to fly across the Atlantic, has devised a scheme whereby it would be possible for the airmen to keep in constant touch with shore.

The scheme proposes an unbroken chain of wireless advisers to the mainland on the Atlantic from Ireland to the coast of Newfoundland. The plan, it is understood, has been submitted to the directors of the steamship company, who have endorsed it heartily, and are said to be communicating with other lines in order to discuss its possibilities.

Lieut. MacMillan, in a letter to his directors, is understood to have declared that he has given the plan several months' consideration.

He says that at the end of each hour the airplane will be required to send out a call sign, which would be picked up by one of a series of ships lining the proposed route, which will be situated at a distance of 10 degrees longitude all the way across. The ships would be in communication with the main ship and would report weather conditions to her.

THE FIRST PLANE USED ON A GOLD RUSH

Floyd Bennet and Bernt Balchen used it to stake several valuable claims at Reindeer Lake, Manitoba. It is being tested for Byrd's expedition. Many planes will be used this coming season in the hunt for precious minerals.

"Nitrated Steel" Reduces Motor Wear and Tear

French Discovery May Greatly Affect Automobile and Airplane Industries

Paris.—Profound changes in the automobile, airplane and allied industries using large quantities of steel, are predicted as a result of the recently discovered "nitrated steel" by a French natural scientist, Leon Guillet, director of Ecole Centrale, in an address before the French Academy of Science, announced that this new steel will bring about a diminution of two-thirds in the wear and tear of motors.

Tests which were held showed that the wear and tear on an automobile using "nitrated steel" and running 30,000 kilometers was practically nil, and further that after 100 hours the cylinders of "nitrated steel" required only four to five grams of oil as compared with 1 to 15 grams consumed during the same time by an ordinary motor.

M. Guillet pointed out that the present cylinders of airplane and automobile motors, being composed of nickel or other alloys, wear out quickly, and as this takes place the oil consumption augments. On the other hand "nitrated steel" cylinders having passed through 500 degrees of heat are rendered practically immune from wear and tear.

Furthermore, this steel increases the possibilities of "direction friction" to 400 revolutions per minute.

Sees Ex-Kaiser's Cash In Junkers' Campaign

William Hohenzollern, one-time Kaiser of Germany, is about to put up from a quarter to a half million dollars to help the German Nationalist Party in the Reichstag campaign that will end in the elections of May 26, according to a report from Berlin printed in the New Yorker Volkszeitung. This story, which the German-language newspaper avers comes from absolutely reliable sources, runs as follows:

A few days ago there were interesting and mysterious conversations in the Netherlands Palace in Berlin, the present headquarters of the general administration of the Hohenzollern properties, between the Hohenzollern general representative and German Nationalists. The Hohenzollern agent declared that the former King of Prussia would put up from 1,000,000 to 2,000,000 marks for the campaign.

"Only the Lord of Doorn was said to be considering whether to give the money to the German Nationalist campaign fund or to give it to an already existing Royalist Party. As was shown some time ago, Hermine of Hohenzollern during her last visit to Berlin established a faithful Royalist Party and named its candidates for the Reichstag. This was a feature of the quiet struggle among the Conservatives, i.e., between the group that still was politically linked with the German Nationalist People's Party and the 100-per cent. German Nationalists.

"Then the German Nationalists, through their most prominent leaders, got in touch with the Hohenzollern agents in order to get the money for the German Nationalist campaign chest. As they declared themselves ready to nominate absolutely reliable Royalist leaders for the Reichstag, the Hohenzollern representative said he was satisfied and was ready to turn the money over to the German Nationalists. Furthermore, the German Nationalists had to obligate themselves to work out a law for submission to the Reichstag providing for the remission for at least two decades of all land taxes in Prussia and all national taxes on real estate on the Hohenzollern properties.

"In connection with this part of the deal the Hohenzollern agent complained that the Hohenzollern settlement had proved to be a fiasco, because the income was greatly reduced through heavy taxes imposed by the Prussian Ministry of Finance. It was necessary for the Hohenzollerns to invest more capital and for the immediate future little could be made on it. Further along in his remarks the Hohenzollern agent emphasized the fact that the campaign millions were not to be regarded as a gift, but as a loan, which was to be repaid in case the bill remitting the land taxes should not pass. The German Nationalists were not very highly edified by this last condition, but as their treasury was low they had to make the best of it."

Sentence Sermons

(By the Rev. Roy L. Smith, in Buffalo Courier-Express.)

I HAVE NOTICED—

That no man thinks he is rich until he has just a little bit more.

That no woman enjoys being told how clever some other woman is.

That the man who is complaining is usually doing less work.

That the woman who is most womanly usually gets more of a woman's rights.

That most men work better as a result of appreciation.

Judge: "You say that this man robbed you—can you recognize anything of yours here?" Plaintiff: "Yes, this handkerchief." Judge: "But that is no proof—I have one exactly like it." Plaintiff: "Yes, your honor; I was robbed of two."

WEDDING BELLS

MONETTE-TREMBLAY.

Sacred Heart Church, Ottawa, was the scene of a pretty wedding ceremony at nine o'clock on Monday morning, of Janine, only daughter of Mr. and Mrs. J. E. Tremblay, of Ottawa, to Fairbanks, son of Mrs. Monette and the late Mr. P. Monette, of Lachute, Que. Rev. Father Laflamme officiated. During the ceremony and signing of the register Mrs. A. Tremblay and Miss Boba McDermott sang very sweetly.

The bride, who was unattended was given in marriage by her father. She made a pretty picture in her dainty gown of flesh colored georgette, made on simple lines with a small hat to match. She carried a shower bouquet of butterfly roses and lily-of-the-valley. Mr. Duncan Monette, of Montreal, was witness for the bridegroom.

Mrs. J. E. Tremblay, mother of the bride, wore a gown of black satin with black over lace. Her corsage bouquet was of roses and sweet peas.

Mrs. P. Monette, mother of the bridegroom, wore a black crepe dress effectively draped with a corsage bouquet of pansies and lily-of-the-valley. After the ceremony a large attended reception was held at the home of the bride's parents, 430 Daly Avenue, where the rooms were effectively adorned with white flowers.

Later Mr. and Mrs. J. Fairbanks Monette left for a motor trip through the White Mountains, the motor car being the gift of the bridegroom to the bride.

The bride travelled in a smart ensemble of navy blue crepe Romaine with a small Bankok hat to match. On their return they will take up residence in Lachute, Que.

Work is well under way for the new being erected by W. Cottingham, Ltd., for the Muir Boys. The construction of the new Gas Station fine old elms have been brought low and sentiment is not allowed to stand in the way of progress.

On Wednesday afternoon, District Inspector Lt.-Col. Keefler, of Montreal, was in town for inspection of Lachute Cadet Corp. but owing to inclement weather they met in the Academy, where Lt.-Col. Keefler gave a very interesting address in place of the usual parade and drill.

Mr. William T. Drennan returned to Flint, Mich., on Sunday last, after spending two weeks with his parents, Mr. and Mrs. Alex. Drennan.

Mr. E. Whelan, of Ottawa, Ont., returned home on Wednesday last, after spending a few days at the home of Mr. Michael Mooney.

Mr. and Mrs. James Mooney, of Ottawa, Ont., Miss Agnes Mooney and Mrs. John Colford, of St. Columba, motored to Montreal on Friday last.

Mr. and Mrs. Geo. Tucker and little son, of Sudbury, Ont., are the guests of the latter's parents, Mr. and Mrs. W. J. Rodgers for a few weeks.

Many of our fishing enthusiasts, both local and touring, had a good time at our lakes and brooks over the week-end and report some fine catches.

Mr. and Mrs. R. J. Hodgson and little daughter Anne and Miss Agnes Hodgson, of Comox, Que., spent Sunday with Mr. and Mrs. A. Bos, of East Settlement.

—Mr. Willie Lefebvre wishes to announce that he has opened an up-to-date Butcher Shop, next to the Windsor Hotel on Bethany St., and will be pleased to supply any who require meat of all kinds.

Mr. and Mrs. Cross, of Southend, England, arrived on Sunday on the Empress of Scotland to spend a short visit with their daughter, Mrs. Morgan prior to their departure for Toronto.

Mr. A. A. McOuatt is in attendance at the Manufacturer's Convention held this week at the Saguenay. He was accompanied by Mrs. McOuatt and is expected home by the end of this week.

By establishing a rule of making your purchases where your money has the most value, you are not only obliging a friend merchant, but you are absolutely serving your personal best interests. See my Ad. on last column of this paper. H. Whissell.

Mr. and Mrs. George O'Brien, of Thuro, and son Lawson, of Chelsea, accompanied by Mrs. John Mitchell and daughter of Plato, Sask., motored to Lachute on Sunday and were the guests of Mrs. W. W. Hume and family.

Mr. P. Chabot has purchased the Skating Rink. Just what he purposes doing with it we are not yet sure, but one thing is certain that it will be fixed up and made presentable instead of being an eyesore and blot on the landscape of our town.

Among the guests who attended the Monette-Tremblay Wedding in Ottawa on Monday were, Mr. and Mrs. T. Milnes, Mr. and Mrs. H. Stansfield, Mr. and Mrs. G. A. Massé, Mr. and Mrs. Chas. Walker, Miss P. Paquette, Mr. Underhill and Mr. Lachere.

Mr. and Mrs. (Dr.) Rodrigue, accompanied by their daughter Miss Juliette and son Henri, Notary, of Montreal, were in the city over the week-end, attending service for the ordination of his son Louis, whose deaconship was conferred upon him by Archbishop Gauthier of Montreal.

Week-end guests at Holly Mead, were Miss Hazel Morrison and Mr. Fred Garner, of Montreal, Misses I. Nesbitt and Dorothy Morrison, of Lochaber, Misses Velma and Rita Tomalty, of Lakeside, Mr. Alton Murflint, also Mr. and Mrs. A. E. Tomdoch and Mr. Lawrence Cruise, of alty and family of Louisa.

AN APPEAL TO THE ELECTORS OF THE TOWN OF LACHUTE

At a somewhat recent meeting of the Council of this Town a Petition was presented, signed by about 173 electors requesting, the Council to take the usual steps in order that one of the Quebec Commission Stores for the sale of strong drinks may be opened in town: and the Council resolved to submit a By-Law (No. 110) dealing with the matter, to be voted upon on the 12th. June inst., that the electors may state whether they are opposed to or in favor of the said By-Law. The understanding is that if a majority of qualified voters, who vote, register their will by voting NO, in the section of the ballot provided for the same, the By-Law shall be defeated.

Following that announcement (of the Council) a meeting of a large section of the electors was held soon thereafter to consider what action should or would be taken in the premises.

After consideration it was moved and unanimously carried, that steps be taken to oppose by all legal means the adoption of the said By-Law (110); and in order to give effect to that resolution a large committee of citizens was appointed. The ladies, too, organized.

The Committee desire to give the following information:

A. THE EFFECT OF THE VOTE: If majority vote "NO" then we will still have the six licenses which are more than necessary for a town of this size.

If majority votes "YES", then we shall have a liquor store, with its consequent dangers.

THE APPEAL

The Committee appeals to the Electors who desire the good name, the good order and peace and the continued prosperity of the Town, to use all their endeavors, which the law grants, to register their opposition to the opening of a Commission Store, because if opened that will lead to

1. More drunkenness.
2. More disorders.
3. More accidents involving property, the bodies and lives of children, women and men.
4. Irregular work at industrial works leading to dismissals and increasing the number of the unemployed.
5. Causing loss, disagreements in homes and inflicting great wrongs upon young children.
6. Enormous loss of money which should be used for the comfort necessities of the family.
7. Bringing disorders to some of the summer residents at the desirable lakes that abound in this vicinity.
8. Person (?) Register your vote early. Bring another.

In the Name of the Committee.

TOWN COUNCIL.

The regular meeting of the Town Council was held on Wednesday last, presided over by Pro-Mayor P. Dobbie, there being present Aldermen T. Dallaire, G. J. Charland, Dr. Sauvé, Jos. Speight, A. Larocque, A. Elliott, C. Miller.

Tenders were ordered called for the laying of 900 ft. of 6 in. cast iron pipe drain from McPaul's Store to the Catholic College.

On motion of Alderman Dallaire, seconded by Alderman Elliott that the permit be granted to Muir Bros. for construction of Gas Filling Station on their property corner of Main and Bethany St., according to the plans submitted.

Considerable discussion arose regarding the proper keeping of abattoirs and as there were two cases pending court action, it was decided that the town would drop the cases of Gregoire Raymond and Fournier. The town officer was instructed to engage a team once a month for purposes of clean up days during the next 3 months.

A petition was presented by many ratepayers asking the council to enlarge the size of water pipes in the West End from McOuatt's corner to Ayeuse Mill in order to give better service for domestic use and fire protection.

Monkey Shines

A Modern "Noah" Docks His "Ark" With a Sigh of Relief After an Exciting Voyage

A widow from Arkansas, of imposing girth and even more imposing girth, was sunning herself in her chair on the deck, gazing with dreamy satisfaction out across the Atlantic. Suddenly there was a soft thud on the arm of her chair, and before she could look around a monkey, chattering shrilly, peered into her face. The lady had not met the monkey, so she solved the social problem by fainting. That was the beginning of the fun, which was scarcely ended when the Ecuador, a Panama Mail Line steamer, docked at New York several days later. After the docking, we learn from St. Clair McKelway in the New York Herald Tribune, there were delivered with unusual promptness to a New York importer of tropical animals: 62 monkeys, 657 parakeets, 252 parrots, 33 ducks, 25 flamingos, 14 ducks, and 22 sloths. For six days, we read on:

Most of the monkeys had roamed the passenger decks, screaming at dignified tourists, chasing little boys, tugging up the rigging, and in other ways making Capt. Curt Zastrow, who has seen nine years as a master, wish he had gone into some quiet business in which neither animals nor indignant old ladies from the Middle West have a part.

Everything was going nicely until the morning of Friday, the thirteenth of April. The Ecuador had steamed from San Francisco, through the Panama Canal, and was just leaving Havana. She had come through nasty Pacific weather without a mishap. Two or three tropical storms had assailed her, rounding the circle of her tour, but these were all in the day's work.

A small world in itself, with 150 passengers, mostly idle tourists, and a crew of twice that many, she plowed serenely northward toward the journey's end. Captain Zastrow felt that life on the sea held no more new things for him; the tourists, free from all ordinary worries, felt sublimely self-sufficient in the universe, where any wrong could be righted by a sear. Then the monkeys got loose.

One of them—whose one, Captain Zastrow does not know, but wishes that he did—scurried somehow from his confining crate, about ten o'clock on that memorable morning. In the space of a few minutes he had pulled the bolts on the doors of two other crates—besides his own—whether through intelligence or fumbling luck is another unknown fact. Each crate contained fifteen monkeys, taken on in Central America, along with the parakeets, parrots, ducks, flamingos, ducks, and sloths.

Some of the free monkeys—or perhaps that same first one—pulled the bolts also on one crate of parrots. Captain Zastrow said yesterday that he was thankful, at least, that the monkeys stop at this point.

"If some of those flamingos had come on deck," he said, "I'm thinking I would have given up the ship and jumped overboard. Flamingos are most annoying—most annoying birds."

The open hatchway leading to the passenger deck was merely a couple of jumps and a tail-awing or two from the place where the animal cargo was stored. They came up, two by two, like beasts out of the ark, in the language of Chief Officer William R. Calcutt, except that they were all of the same species—all monkeys. After them came the parrots, but Chief Officer Calcutt told more about the monkeys before he started on the adventures of the parrots.

The monkeys, about forty-five or them—three crates full—swarmed over the deck after that like an invading pirate crew. They scuttled down the promenades, scattering the promenaders. Before the truth of the matter got around, four passengers who were walking it off, took the pledge of "Nevermore." The monkeys climbed into the rigging, screamed through the portholes of the wheelhouse, and the Ecuador lurched five points of her course. It was twenty or thirty minutes before the demoralized ship's officers gathered their faculties and commenced the campaign to capture the monkeys.

Meanwhile a crateful of parrots were floundering clumsily on the foredeck, muttering at intervals, "Carramba!" And we are told further:

"If the blasted birds had said something besides 'Carramba,'" exclaimed Captain Zastrow, telling of the incident, "it wouldn't have been so distracting. Every time a man caught one parrot, five others yelled 'Carramba!' It made you nervous. But the parrots were easy compared with the monkeys. I had the parrots caught in only three or four hours, but the monkeys—they're tricky devils, are monkeys," said Captain Zastrow reminiscently.

For the rest of that day—Friday, the thirteenth—such members of the crew as were not essential to the now secondary task of running the ship were drafted for the monkey hunt. The Chinese and Filipino waiters and dish-washers proved the most agile in this, the ship's officers say. Some of the passengers remarked icily to the pursuer, however, that among the three there was not much choice—a monkey chattering at you, a Chinese falling on you from somewhere in the rigging, or a Filipino bumping into you full tilt as he pursued a monkey down the deck.

For six days that serenity which goes with a tropical cruise was not aboard the Ecuador. The ship's officers had no way of telling how many monkeys had escaped, and thus could not tell when they had captured them all. After three days it seemed that there could be no more monkeys in the world, so many had been captured; but about the time the passengers were risking the deck again, assured that the monkey hunt had ended, a playful beast would appear from under a steamer chair or from within a funnel and disorder would be resumed. Each day brought a prisoner or two, however, and finally the last free monkey—as far as is known—was shoved gingerly back into his crate.

This one had been named Sandino. Captain Zastrow said, because he had come down from his hiding-place in the rigging and stolen an orange out of the hand of the wife of a United States marine officer returning from the Canal Zone. He had amused himself by playing the game of "masta." This was simply the act of coming down one mast while his chasers were going up another, and vice versa. Captain Zastrow said he really won—that is, Sandino really won—because at last he merely stood still and let himself be captured. If he hadn't, the captain said, the game might have gone on forever.

The Modern Home.

"Well, has he given his bride a good, modern home?"
"Oh, to be sure—invested everything he had in a beautiful big car."

Canada's Mountain Playground

The world offers no more beautiful scenery than that found in Jasper National Park, that wonderful out-of-doors playground in Northern Alberta on the lines of the Canadian National Railways. Lakes, rivers, mountains and glaciers, and a splendid 18-hole golf course all combine to make Jasper National Park one of the finest of tourist centres on the North American Continent, and the Canadian National Railways have provided the utmost in comfort and convenience for the travellers in their wonderful log cabin hotel, Jasper Park Lodge, which will be visited by the members of the Canadian Weekly Newspapers Association at the close of their Edmonton Convention this summer.

Built of natural building materials found in the territory in which it is situated, Jasper Park Lodge is proving a mecca for tourists. Pine and cedar logs, rough boulders and other natural building materials have been utilized in the construction of the main lodge and of the bungalows, apart from the main lodge, in which accommodation for the majority of the guests is provided. The result is a series of log cabin homes, where the visitor lives amid mountain surroundings, enjoying wonderful scenery and breathing the health-giving mountain air, while his log cabin is equipped with hot and cold running water, steam heat, and all the comforts of a modern city hotel.

Germany Develops New Type Woman

Exercise and Athletics Change the Old Order of Things in a Remarkable Way

The time is long past when, according to Imperial pronouncement, the career of a German woman was confined to "church, kitchen, and children," and under the new order of things in the Republic, we learn from various sources, the German girl and the German woman are of an entirely different type. The young women have gone in strongly for athletics and the slim figure, while the married women, it appears, are beginning to make their husbands sit up to the fact that a wife is not a man's handmaid. "Fat Frauleins with thick ankles and ample figures," we read in the London Sketch, used to be considered typical of German girlhood, but things are very different now in Central Europe, and the "Backfisch," or flappers, of to-day are the same in Germany as everywhere else. This weekly adds that they are "slim, elegant, sporting young things, and are highly decorative creatures, whose slim ankles and lithe grace equal those of the English, American, and French girls." An Englishman, who has lately returned to his country after spending more than two years in various German towns, also noted the change that has come over German womanhood, and writes in The Daily Mail as follows:

Slim Flappers

"Not so long ago the German girl conveyed the impression of an indifferently proportioned lugger, with sails square set, and unduly over-weighted aft. To-day a more suitable analogy is that of a spick-and-span clipper with neat lines, the cut of her jib distinctly Parisian. Take a stroll along the Linden, visit the best dance restaurants in any large provincial town, and one beholds German girls dressed in almost the latest Paris creations. There are still a few frumps left, but they hail mostly from parti-

cian houses, where it is considered proper to maintain the old German cult and to wear print frocks in the stairs.

"The passion for slimmness has reached Germany. The full-bodied, perfunctory dress Gretchen, with half-austerly combed, is practically extinct among the younger generation. But, though it is a comparatively simple affair to reduce one's figure, it is not always easy to reduce one's ankles in proportion. That is the one detail in which here is still room for improvement—that, and the lingering prejudice that more than just a touch of powder is not quite respectable. But women are adaptable creatures, and there is little doubt that mature and artifice will soon complete the transformation."

Ideas Change Too

Temperamentally also, the English observer goes on to say, the German girl has changed, and "therein lies an element of tragedy." Judged by British standards, he claims, many German husbands "differ vastly from the conception of what a husband should be." They are inclined to be domineering, he asserts, the standard of fidelity is "lower on the whole in Germany than in some countries, and they drink a good deal." We read then:

"In pre-war days all this was taken for granted. A husband was frankly allowed his flag occasionally—was he not a man?—and his wife was accustomed to piloting him home after a beer party which had lasted well into the morning. She did not question him as to his whereabouts if he remained away from home longer than usual, and she accepted in humble spirit his rebukes if all was not quite in order in the household when he returned. And though there are—and always have been—many honorable exceptions, most German husbands are following the footsteps of their fathers and grandfathers.

"The German wife may now be found Charlestoning in the peculiar fashion common to German ballrooms—at the time of day when she used to be having a knitting party or cutting up the Wurst for supper. She is demanding to be taken to dine in restaurants on days when the cook or the

Radio Will Give World News of Noble Flight Over Arctic

U.S. Stations in Alaska to Aid Expedition in Airship Italia in Trip Over the Polar Regions in Search of Land; Will Establish Schedules

The world will again listen in to the progress of trans-polar flight when General Umberto Nobile departs from Spitzbergen in his airship, the Italia, this month in an attempt to find land in the arctic wastes. The craft is equipped with radio apparatus capable of transmitting several thousand miles. Efforts will be made to maintain contact on regular schedules with the flyers.

Army and Navy radio stations in Alaska and the northern part of the United States have been instructed to maintain communication with General Nobile on his aerial expedition over north polar regions, according to the Associated Press.

Message from the Italia will be transmitted on 333 kilocycles to all shore stations except S. Paolo, Rome, when a frequency of 908 kilocycles will be used. The latter is the same frequency used in communicating with the mother ship, the ice-breaker City of Milan.

During the first ten minutes of every hour watch will be kept on frequencies between 500 and 199 kilocycles for stations attempting to establish communication, from the sixteenth to the forty-fifth minute of every hour for transmission on frequencies below 199 kilocycles, and dur-

ing the remaining fifteen minutes, for transmissions on 9,990 kilocycles.

Each time General Nobile starts on a cruise over the polar regions the City of Milan will broadcast a warning to all shore stations.

General Nobile, who already has flown over the North Pole with Captain Roald Amundsen and Lincoln Ellsworth in the Norge, is making the flight from Spitzbergen to Point Barrow, Alaska, in an attempt to find land in the barren Arctic regions, believed to exist, although still undiscovered.

The Italia's radio equipment is of Italian manufacture and has successfully passed tests, according to General Nobile. The apparatus is extremely flexible, being adaptable to use on a number of different wave lengths. The transmitting equipment is designed primarily for continuous wave transmission. Antenna equipment consists of a weighted wire, which is suspended from the airship. The length of the wire is varied according to the wave length being used.

The cruising speed of the Italia is sixty-two miles an hour. Plans for several flights during the spring and summer from the base at Kings Bay have been made.

Aboard the dirigible is an Italian flag, which is to be dropped at the Pole, and a wooden cross with a spiked base is to be fixed in the ice fields.

maid-of-all-work is out, and she is giving up beer for cocktails. She has withal developed a sense of humor, rarely possessed in the old days, and is becoming a 'good sport' in the truly British sense.

"At present she does little more than criticize her men folk, but the day is approaching when she will demand that husbands shall conform to the new ideals. When that day dawns we shall see German husbands slowing their wives to pass through the restaurant door first, giving up their seats in omnibuses and tramway-cars, and transferring to their wives something of the respect which has been man's prerogative in the past."

Sports Mad

On the subject of the present passion for sports in Germany, the least observant visitor to that country cannot help noticing that it has become "a universal obsession—one might almost say—a universal religion—which permeates both the entire corporate and the entire individual life of the people, and which is common to both sexes and to all classes." So we learn from E. H. Wilcox, Berlin correspondent of the London Daily Telegraph, who continues:

"In every corner of Germany stadia and athletic grounds are being built and laid down with feverish haste. Even in the streets of big towns one meets droves of young men or women doing cross-country runs in shorts and vests. Football matches and athletic meetings, which but a few years ago were watched by languid hundreds, now bring together enthusiastic thousands, and sometimes tens of thousands. 'Six-day' bicycle races, in the immense covered arenas of the 'sport palaces' which exist in two or three of the chief centres, arouse frenzies of excitement. A fight between well-known boxers will anywhere fill to overflowing the biggest hall in the place, at prices which the public would hardly pay to hear Shalpin at the opera.

A Civic Duty

"Statistics collected by the big sporting federations show that last year German organizations for the pursuit of various types of sport had a

total membership of about 11,500,000. If each of these memberships involved a separate individual, this would mean that approximately every fifth member of the entire population belonged to some kind of sporting association. There are, however, of course, many holders of double memberships. Indeed, satirical tongues have even suggested that the morbid activity of the German's gregarious instinct, his passion for joining 'Vereine' and 'Verbände' of every kind, has had a good deal to do with the development of sport in his country. "But, even when all allowances are made, the figure remains an impressive one. An exact analysis of this 11,500,000, and its distribution among the various categories of sport, is impossible. Many of the organizations are of a comprehensive character, and devote themselves to almost every imaginable form of physical recreation.

"Even if the spirit of the German masses were not willing, the whole machinery of State and society is now so elaborately organized to drive them to the sports ground, the gymnasium, and the swimming-bath that they would hardly be able to resist its impulsion. President Hindenburg, whose words stick because they are few, has declared that 'physical exercise is civic duty.'"

Bismarck's Ruse to Speed Guests Turned Joke on Him

Berlin.—How Bismarck's clever ruse for ridding himself of tiresome visitors was turned against himself is recounted in the recently published collection of Bismarck anecdotes, compiled by Schmidt-Henniger.

One day Lord Russell, the British Ambassador to Berlin, asked the German Iron Chancellor at his mansion whether he did not find it very tiresome to have to receive so many unofficial visitors daily. Bismarck replied that on the whole he found something of interest in every caller—unless he overstayed his time. But for such "stickers," Bismarck remarked, he had an infallible household remedy. He explained that his wife, who from experience had acquired an intuitive sense for the proper duration of a visitor's stay, could always be counted upon if needful to open the door and on some pretext or other call him away.

Barely had the Chancellor finished speaking when Princess Bismarck called through the half-open doorway: "Otto, isn't it about time for you to come and take your medicine? I just wanted to remind you."

An embarrassing alliance followed these words. The next moment, however, both men roared with laughter as the humor of this strange confirmation of the "infallible remedy" struck them.

Titled British Quit Office To Re-establish Fortunes

London.—Politics is losing its attraction for Englishmen who have business ability. The financial rewards of public life are too slight for men who haven't large private incomes, and so many landed Englishmen who have devoted years to public life find their incomes are so largely absorbed by taxes and so shrunken by the slight income from land that they cannot afford to devote their entire time to public interests.

Sir Robert Horns, Reginald McKenna, Lord Reading, Lord Buckmaster, Sir Otto Niemeyer, Sir Josiah Stamp, Sir Eric Geddes, Sir Frank Baines and Col. Moore-Brabazon are a few of England's able public officials who have abandoned public careers within the last two years to take up business.

Banks, fuel companies, railways and industries of all sorts are bidding for the services of the government employees.

Claims of Genuine "Old Masters" to Be Upheld by Means of X-Rays

World-Famous Italian Picture Seen to Have Whole Landscape Painted In Since It Left Hands of Original Artist

London.—Kennedy North, the well-known artist, in a recent interview with a representative of The Christian Science Monitor, urged the great value of the X-rays in detecting whether a picture is entirely, or in part, the genuine work of one of the old masters. To judge by what the Monitor representative was shown in the course of the interview, it is possible that directors of art galleries might hesitate to submit their treasured old masters to the X-rays which show faithfully the texture of the paint used, every scratch, the shadowy outline, perhaps, of another picture under that seen by the eye, the filling in of worm holes with white lead on a wooden panel, and so on.

A world-famous Italian picture of which the value is computed at many thousands of pounds was submitted to Mr. North for examination. The radiograph showed that a whole landscape background had been painted in since the picture left the artist's hands. Added to this the contour of the man's hat had been altered and hair had been added. All this could be seen in the radiograph even by the uninitiated. An old picture was recently submitted to him which was reputed to be absolutely untouched in the way of restoration. The radiograph, however, disclosed that a foreign newspaper of a 1922 date had been used to fill in a crack and been painted over. Another famous picture on being put under the rays was found to be almost the expected signa-

ture but to have another signature almost obliterated and showing the plain finger marks where efforts had been made to erase it.

Mr. North has been making a study of this work for some five years. It must be realized, he said, that there is no perspective in a radiograph. The top, bottom and middle of picture, that is, say, the wooden grain, the worm holes, the gesso, the paint in its light and shade, the restoration work, etc., are all there, but in one plane which can only be read by those who have made a study of it.

Radiographs, however, can be viewed stereoscopically in an apparatus made for the purpose.

The pigments used by the old masters had a mineral basis and the delicate texture of these is most unmistakably shown up by X-rays. This can quickly be seen when a picture has undergone modern restoration. The rays passing through the modern pigments produce a quite different effect.

Asked whether there was any likelihood of the pictures in public galleries in Great Britain being submitted to investigation, Mr. North replied that he had seen no sign of it at present. In France a certain amount of work on pictures in the Louvre had been done. But it would seem that in future a prospective purchaser of an old master will have a court of appeal which can decide its genuineness or otherwise.

How Titian Painted His First Picture

An Interesting Story for Our Children Who Like Painting

Titian the famous Venetian artist, painted his first picture with flower juices squeezed from Italian wild flowers on the wall of his father's cottage in a tiny village in northern Italy. Mary Newlin Roberts tells us in "Child Life Magazine."

"One hot day in spring on his way from school," writes Mrs. Roberts, "little Titian Vecelli clambered up the rocky slope of the hill where he lived and gathered bunches of wild flowers. When he reached the walls of his home he put the flowers down carefully in the shade and then he noticed his hands and sat up and stared. His brown fingers and palms were stained with every kind of color—purple and yellow and green and red and blue."

"Now it would be interesting to any boy to see that the stems of some Italian wild flowers and blossoming weeds hold juices that stain when they are squeezed hard by strong fingers on a hot day, but to little Titian Vecelli it meant far more, for the sight of the colors sent him dreaming at once. The tints on his hands reminded him of the fresco in the chapel and he rose slowly to his feet and glanced about with eager, wistful eyes. Nobody was at home and it was very quiet on the hilltop, and the bit of cottage wall nearby seemed waiting for something."

"Then Titian Vecelli set to work, all by himself in the shadow of the cottage wall, squeezing and staining any way that he could with his fingers and a little stick, painting his first picture so many years ago. Very slowly on the dull bare wall, a picture came to life. Figures seemed to spring out by magic under the small deft fingers of the boy. He was so very busy that he did not see his father come up behind him and stand with hands upraised in amazement, nor did he see his teacher, Signor Rostelli, climbing up the hill. He stood as quietly as Signor Vecelli and watched in silent amazement the picture on the wall growing bit by bit."

"At last when the sun had set, little Titian found that he could squeeze no more stains from the juicy, aromatic stems, and so with a sigh he backed away to look with rapture at the transformed wall. 'Had I the true colors of a painter, 'twould have more depth,' he breathed. 'But even so I am happy.' And backing farther still he collided with his father and Signor Rostelli who had drawn nearer and nearer."

"D'you hear Payne advertised for a wife?" "No! what happened?" "Got ten replies from men saying he could have theirs."

She (demurely)—"Do you consider my legs long?" He—"Madam, I assure you I never even look."

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and

The new White Star liner Laurentic, 19,000 tons, completed late in 1927 especially for the St. Lawrence route, which arrived in Montreal on May 9 on her maiden voyage to St. Lawrence ports. With the White Star liner Albertic she shares the honor of being the largest cabin liner ever to come up the St. Lawrence to Montreal.

A REAL NERVE TONIC

The Source of All Nervousness Is Weak, Watery Blood.

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto despondent people bright and cheerful. Miss Irene Denne, R.R. No. 1, Washago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—"I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time, trying one medicine after another. I was advised to try Dr. Williams' Pink Pills, and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvellous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cent a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Outboard Motors Now Used on Large Boats

Many people still think of the outboard motor as a dinky little tin-can affair that one fastens onto the rear end of an old rowboat and which stalls a few hundred feet out from dock to be puttered with indefinitely. If you are one of these you are due for an awakening, for now large boats are constructed with the use of outboard motors in view from the beginning. They are now made with as many as four cylinders, and a twenty-five horsepower motor is fairly common. In the larger boats they are suspended in a well built into the boat. The advantages are that they avoid the troubles of shaft packing and that they can be lifted out of the boat, propeller and all, as one unit, for repairs. They will travel in shallow water, as the motor is made to lift automatically when an obstruction is hit and they will develop speeds up to thirty-five miles an hour. It is expected that 75,000 outboard motors will be built in the United States this year.

Their use is rapidly growing in Canada. Sale records show over 1,000 were sold during 1927.

Officer on the bridge (much put out)—"Is there a blithering idiot at the end of this tube?" Voice from the engine-room—"Not at this end, sir."

EXPERT IN SOME BRANCHES At mathematics women are Not thought to be such birds, And yet a woman is a star At multiplying words.

The married men's quartet will now sing that popular selection, "My Wife Is An Open Book to Me, But I Cannot Shut Her Up."

"I want a rake—a metal one. That wooden one you sold me last year was no good. It had pyorrhea!" "Had pyorrhea?" "Yep! All the teeth fell out!"

Times change; and a short skirt when skirts were long is a long skirt when skirts are short.

After the elaborate ceremony the well-wishers were throwing the customary rice at the young people. One excited guest button-holed the bride's father and demanded, "Have you any old shoes?"

"Yes," replied the bill-footer patiently, "but sh-h! I'm wearing them."

LAYS AND RELAYS I long for fame and fortune, too; I long for duds and diamond rings; I long for funny things to do— Oh, goosh, I long for lots of things.

I do not long for gems or gold; For fickle fame I worry not, But when it's hot I long for cold, And when it's cold I long for hot.

I do not long for gold or fame, All weather I can stand with ease, But I've a longing just the same To reprint silly rhymes like these.

If one can curb his longing he May reap reward two-fold or more; Our longing's well in hand, you see, We add this quatrain and count four.

A Scotchman has taken his children out of school because their teacher told him they paid attention.

Hubby, tackling his first meat pie: "Well, well, where did you get this?" Young Wife: "I made that out of Mrs. Thomas's cook book. It's a—"

"Ah!" he broke in. "This leathery part is the binding, I suppose?" A mistress of a boarding house hired a young Irish girl who had just arrived in this country. She was somewhat dubious of the girl's ability to wait on the table. So she said, "Norah, do you think you can wait on the table; I have ten boarders, you know?"

Norah: "Sure, and that's all right, ma'am. Why in Ireland I used to feed forty pigs every day."

Money is your servant if you know how to use it; your master if you don't.

Do you remember way back when torchlight parades were features of every political campaign?

There are 112 miles of thread in a pair of ladies' silk hose—and very few blocks of walking.

Every young man is where he is because that is his place.

North Sea Inland Milk Contains Iodine Property

Wyk-on-Foehr.—The healing properties of the North Sea air are due to strong emanations of salt, radium and especially iodine, and now a scientist of the Island of Foehr has established the fact that the milk of cows, goats and sheep on the North Sea Islands and the coastlands also contains a surprisingly large amount of iodine. As much as 210 millionths of a gram per liter has been found in cow's milk.

Iodine is the sovereign remedy for hardening of the arteries, and milk with an iodine content is also indicated for various children's diseases. It has long been known that the inhabitants of this part of Germany are almost never afflicted by hardening of the arteries.

The world a-ving follows the world a-wheel.

Minard's Liniment for insect bites.

British Experts Trace Mystery of Red Hair

London.—The mystery of red hair, and why it is prevalent in certain families may be illuminated as one of the results of a survey now being conducted by British education and health authorities.

An anthropometric committee is collecting data from all parts of Britain on the physical characteristics of school children. The effects of environment on physique will thus be further revealed.

The committee's findings may explain why there are so many strongholds of the red-headed in Scotland, and why a vein of red-haired people runs through some counties in England and Wales while in other localities the "reds" are as rare as albinos.

BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative, but do not gripe. They are a soothing, but do not contain one particle of opiate or other ingredient that can in any way do the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, banish constipation and indigestion, check diarrhoea, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in the home, and once a mother has used them for her little ones she will use nothing else. Thousands of mothers bear testimony as to this. Among them is Mrs. Hurst, Pine Falls, Man., who says:—"I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly think they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"Even a good looker doesn't always see what she looks at."

Don't Make a Toy Out of Baby—Babies Have Nerves

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhoea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

How To Insulate House Against Heat and Cold

"There are three general ways by which heat is lost or dissipated in our homes," writes W. A. Foster in the practical magazine "Successful Farming." "First," he explains, "the principle by which we secure heat from the sun—radiation. Secondly, the transfer of heat by air movements such as leakage about doors and windows. And third, by the heat transfer through our constructions, such as glass in our sash, the walls, floors or ceilings. The three principles are not wholly independent but are accumulative, consequently, the total heat loss is the sum of all three."

"In the average home there is considerable heat loss by radiation. Heat radiates from the walls after it passes through the materials used in the wall construction. One of our most familiar examples is the heat radiated from the chimney stack. The chimney closet is always warm due to the heat losses from the chimney itself. In the second principle—convection—heat losses from leakage are usually large in the average construction. While one needs ventilation or fresh air for health and comfort, the heat losses from leakage about loose-fitted sash and doors are usually in excess of the ventilation requirements in the average home."

"In frame construction," the "Successful Farming" article continues, "the dry joint between foundation and all allows cold air to sift through into the basement, which makes the floor unreasonably cold. Extreme care should be taken to set the sill in a mortar bed and further care must be exercised to have a snug-fitting sheathing and siding, otherwise cold air will pass up through the space between the studding and find its way over ceiling and under flooring. While these methods of conserving heat are important they are often overlooked."

Minard's Liniment for Toothache.

Test Weather in Study of Colds

The common cold is now being attacked in an entirely new and novel manner. At Johns Hopkins University a room has been constructed in which all kinds of weather can be reproduced from fog to zero temperature. The room is insulated by double doors, triple windows and cork padded walls. The effect of weather conditions on colds is the object of the study.

Cut away section of a Gum-Dipped Tire showing one cord embedded into 15 strands. Every fibre of every strand is impregnated with rubber.

Why Gum-Dipping Increases Tire Life

A tire in use is being constantly bent backwards and forwards by road action. Such movement generates friction and heat that has a deteriorating effect unless the tire is built to withstand it.

In the carcass of a Gum-Dipped tire there is less friction to generate heat because Gum-Dipping puts a coating of new live rubber around each separate cord that keeps it from rubbing against the cords that lie next to it. It stays cooler and therefore lasts longer.

Your local Firestone Dealer will gladly advise you on your tire problems. See him today.

A Lovely Skin of Soft, Smooth Texture

Soft, glowing color and velvet smoothness are the skin's reflections of "blood health" within.

TRU-BLOOD, the pleasant-to-take blood tonic, by acting directly on the blood and driving out impurities, corrects the underlying causes of skin affections and gives natural color and beauty to the complexion.

When taking TRU-BLOOD use Buckley's OINTMENT as an external treatment. This magic Ointment does wonders in correcting skin blemishes, in softening and beautifying the skin.

Read what these men say. One writes: "Tru-Blood is working marvels with me." Another says: "I recommend Tru-Blood to my neighbors and they find it better than any preparation they have ever used." Still another writes: "I cannot praise it enough. As long as I live I will never be without Tru-Blood."

You will sing its praises, too. Go to any good drug store for these proven "Buckley's" products—and acquire "The Skin That Glows."

OUR EQUALITY OF STATUS

Once more there has been a debate in the House of Commons on the question of Canada's status within the Empire. There are two different schools of thought in relation to this question of Canada's constitutional position. One school holds that the standing of Canada is inferior to that of the Motherland in that, while Great Britain can declare war, Canada has not the power to do so, and also asserts that the existence of a number of laws on our statute books, such as the Colonial Validity Act, and the fact that we have no power to alter the British North America Act are further proofs of our inferiority. The opposite school proclaims that the status of Canada as co-equal with Great Britain and every other nation of the British Empire was determined at the last Imperial Conference and placed beyond dispute.

Both schools are right; both are wrong. Each party to the argument is seeing the matter only from its own angle, but nobody can correctly see a many-sided question from one angle alone. Canada has not the power to declare war, it is true, and that laws remain on our statute books which more or less keep up subservient to Great Britain, is also true, nor have we the power to change the British North America Act. Yet it is equally true that our "equality of status" was formally and for all time recognized and proclaimed at the last Imperial Conference. There should be no disagreement on these points.

The right angle to take on the question of Canada's constitutional position is that our position within the Empire was settled, were it ever in doubt, on the fields of France and Belgium, and sealed with the blood of our sons. We were then the equals in stature, if not of stature, of the Motherland and every other Dominion. The mere fact of a law existing that defines our powers and outlines the obligations we bear to one another in different parts of our wide flung country has no more bearing on the question of our equal status than in ordinary life our parents' marriage lines have power to deny their children manhood or womanhood when grown up. When children have grown up they are men and women, even without parental marriage certificates. Canada has grown up; she has her equality of status inherent within herself just as children, while still remaining children, also become men and women, automatically.

As to making war, Canada does not want to make war with any other country. If she did, she would probably make war, but pray God she may never feel any need to do so. The laws that remain on our statute books which appear to still tie us to the Motherland are not working any harm to anybody and are virtually dead letters. Let them die or live; it matters not. When children grow up to manhood and womanhood and set up housekeeping for themselves they are quite independent of the old folks. But there are still laws that govern their relationships; the laws of kinship, of love, sentiment, and filial duty. There are even laws that provide for parents still being responsible for their grown-up children and vice versa. We cannot renounce kinship if we would. Canada does not want to do so, nor does the Motherland desire to get rid of us. It is all working very well, indeed. Why disturb ourselves with philosophical disputations about it? The Empire is one and Canada lives and moves and has its being within the Empire; equal and free, thank God.

CUSHING.

Dr. H. Cushing, of Montreal, visited his property here last Sunday.

Mr. Franklyn Keatley is spending the week with his grandmother, Mrs. Jas. Watson.

Mr. S. Whelehan, of Montreal, and Miss Katie Whelehan spent Sunday and King's Birthday in Cushing.

Miss Pearl Dawson, of Stonefield, was the guest of her sister, Mrs. C. F. Watson on Tuesday.

Miss Muriel Nicholls and Mr. A. C. Pinkerton of Montreal, called on their friends here Monday.

Mr. and Mrs. E. J. Mahoney of Montreal, and little sons Billy and Teddy were guests of her mother, Mrs. R. Funchon Sunday and Monday.

Mr. and Mrs. C. B. Cutten and little son Hartley, Miss Olive and Mr. Douglas Hartley of Montreal, and Mr. Laurence Hartley, of Cornwall, were guests of their mother, Mrs. S. O. Hartley over the week-end.

BROWNSBURG.

Mr. J. Maitland was in Montreal last week, on business.

Mr. Stanley and Miss Ruby Thompson motored to St. Philippe.

Mr. and Mrs. Wallace MacKiddie paid a short visit to Brownsburg.

Miss C. McPherson left on Friday last for a visit to Scotland.

Mr. and Mrs. Mitchell and Mrs. Golpin, spent Saturday last in Montreal.

Mr. and Mrs. Earl Smillie visited their parents, Mr. and Mrs. Thos. Smillie.

Miss Grace Moncrieff, of Smith Falls, is at present the guest of her mother.

Misses C. M. & K. Seary, also Miss A. Clauson spent the week-end in Montreal.

Mr. Clarence and Miss Grace MacKiddie of Montreal, spent the week in the Burg.

Messrs. R. and W. Moncrieff spent a few days last week in Smith Falls, visiting friends.

Mr. E. Barker is at present a patient in the Montreal Western Hospital, undergoing treatment.

Mrs. Albert Thompson has returned from nursing her daughter, Mrs. Roy Mott for the past two weeks.

Mr. B. Davis and Mr. and Mrs. Turner, of Montreal, were guests of Mr. J. B. Davis over the week-end.

The stork visited the home of Mr. and Mrs. Roy Mott and left a baby girl, (Frances Victoria) (born the 24th May).

A number of Brownsburg folks spent the week-end at various lakes, fishing, and some report good results.

Mr. and Mrs. J. Richards, of Montreal, spent the week-end the guests of Mrs. Dan Thompson and other friends.

Miss Edna Reid was the hostess at a Miscellaneous shower at the home of Mrs. Graves, in honor of Miss L. Martin on Monday.

One of our old town residents, Mr. F. Girard, accompanied by Mrs. Girard, of Detroit, paid a short visit to their many friends in town.

Among the graduating class of this year's nurses at the Montreal General Hospital, we are pleased to notice the Misses Gladys Jean Moseley and Moyra Frances Monk.

A Miscellaneous Shower was held at the home of Mrs. G. J. Thompson on Wednesday last, in honor of Miss Ruth Vowles. A pleasant evening was spent with music and games, after which refreshments were served.

Mrs. W. McRae of Grenville, spent last Saturday with Mrs. D. MacKiddie.

Mrs. (Rev.) J. G. Poitras & daughter Miss Polly, of Ottawa, spent the week-end at the home of Mr. and Mrs. D. MacKiddie.

ST. JEROME CHORAL SOCIETY CONCERT ON THE 14th. of JUNE

The well known singers of St. Jerome, numbering 125 will give their 13th concert on Thursday, June 14th, at 8.30 p.m. daylight saving time in the St. Jerome Auditorium.

Among the pieces to be rendered will be "Hear My Prayer" by Handel and "Dance in Fairs" by Beethoven, in which we hear the delicate music of The Calme, L'Ex-tase, l'Orage, et la Pacification. In addition to these two pieces, the singers will present a group of lighter pieces by WEKERLIN, REYNALDO HAHN, PIERRE & GOUNOD and to complete this interesting programme, two groups of old Folk French songs by Albert Dupuis and Charles Radoux of the Conservatory of Brussels.

To encourage a good attendance at this concert, the Association offers as a prize, a ticket for their annual trip to Brockville and Thousand Islands and which will be drawn during the concert.

RAWCLIFFE.

Miss Kate Lee spent Saturday the guest of Mrs. T. Hoare, Sr.

Mrs. P. Stone spent the week-end with Mrs. J. McAndrew, Harrington East.

Messrs. Laughlin & Gordon Campbell motored to Papineauville on Friday.

Mr. and Mrs. John Mahon, of Mabel, were the Sunday guests of Mrs. S. Kelly.

Mrs. A. Graves, Miss Violet and Master Morris Graves spent Sunday with Mr. and Mrs. R. A. Bigelow.

Mrs. W. S. Gauley of Magneite, was the week-end guest of her mother, Mrs. S. Loughren.

Mr. Herbert Brown, of Pointe-aux-Chenes, spent a week with his brother, Mr. Gordon Brown.

Mr. Wm. McGillivray and Miss O. McGillivray were recent guests at the home of Mr. Wm. Campbell.

Mrs. Williams and family, of Montreal, spent the week-end at their cottage at Cook's Lake.

Mr. and Mrs. J. S. Hewlett, Mr. and Mrs. John Hewlett, Mrs. Greenleaf, Messrs. George and Harold Hewlett motored from Montreal on Sunday and were the guests of Mrs. M. McGillivray.

Here and There

(79)

The Rocky Mountain Lakes fishing season was opened recently with a catch of a thirty-two pound lake trout by George Andrews of Baill, in Lake Minnewanka. A number of others of not such a great weight were caught by guests of the Baill Springs Hotel.

The month of April was the most successful so far this year from the standpoint of families settled, according to a statement issued by the Canada Colonization Association. During the month 81 families were settled throughout the Dominion on 15,249 acres of land, bringing the total of settlements from the first of the year up to 224 on 46,297 acres.

There are in Alberta today 77,192 farmers who have 354,324 horses in use and 10,225 tractors. In Saskatchewan records show 118,743 farmers with 1,199,566 horses and 24,857 tractors. Manitoba has 51,209 farmers with 354,480 horses and 10,833 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

Miss Jean Cameron, who came to her parents from England at the age of four, at ten commenced trapping in the district of her father's homestead. Today, at the age of 31, she finds it quite a lucrative and congenial pursuit, and quite superior to any occupation which would keep her in the city. She follows a trap line within a ten mile radius of her home and has caught includes coyote, lynx, weasel and fox.

A record passage by a freighter and one that has only been expected of a passenger ship was recently accomplished when the Canadian Pacific Cargo steamer Beaverburn docked at the Surrey Commercial Docks, London, nine days after leaving Montreal. The trip was the first out of Montreal of one of the new "Beaver" vessels and this record will be eclipsed by from twelve to fifteen hours now that the Beaverburn and vessels of her class are routed via the Straits of Belle Isle.

Seed growing is one of the latest industries of Vancouver Island of steadily increasing importance. Vancouver Island sweet pea seed sells on the English market from three to four shillings per pound more than the California seed. The largest sweet pea seed farm is at Duncan, which produces yearly about two tons. From 15 to 20 women are employed each year to pick, clean and pack the seed, the excellence and high quality of which is becoming world-famous.

This is the month when many young couples are meditating upon taking the matrimonial step; and one of the first requirements is a nicely printed Wedding Invitation. The Watchman can supply them for you at moderate prices.

PROVINCE OF QUEBEC, COUNTY OF ARGENTEUIL, MUNICIPALITY OF THE TOWN OF LACHUTE.

BY-LAW NO. 110.

At a regular adjourned meeting of the Council of Lachute Town Corporation, held in the Council Room, in the said Town of Lachute, 10th. May 1928, under the provisions of the Cities and Towns Act, and the special Act incorporating the Town of Lachute, and also the special Act amending the Charter of the Town of Lachute, 10 Geo. V, chapter 106, on the 22nd. day of July 1921, at which session were present;

Mayor H. M. Gall, and Aldermen T. Dallaire, A. Larocque, P. Dobbie, H. M. Lavigne, A. J. Elliott, G. J. Charland, J. Speight and C. R. Miller, forming a quorum under the presidency of the Mayor, the following By-Law was adopted:—

(A) WHEREAS the population of this town does not exceed 5000 inhabitants;

(B) WHEREAS a petition containing 173 names of municipal electors of this town has been presented to this Council, asking that a by-law be submitted to the municipal electors of this town, in order to permit the establishment of a branch of the Quebec Liquor Commission in the town of Lachute;

(C) WHEREAS a notice of motion has been duly given of the adoption of the present by-law;

LET IT BE THEREFORE ORDERED AND DECREED BY BY-LAW, AND IT IS HEREBY ORDERED AND DECREED BY BY-LAW OF THIS COUNCIL as follows:

1.—That a branch of the Quebec Liquor Commission be established within the limits of the town of Lachute, according to the Quebec Alcoholic Liquor Act;

2.—That the present by-law be submitted to the municipal electors of this town for approval on the 12th. day of June 1928, according to law;

3.—The present by-law shall come into force and effect after having been duly approved by the majority of the municipal electors who shall have voted on the present by-law;

PROVINCE DE QUEBEC,
DISTRICT DE TERREBONNE,
MUNICIPALITE DE LA VILLE
DE LACHUTE.

REGLEMENT NO. 110.

A une session reguliere ajournee du conseil municipal de la ville de Lachute, tenue a l'Hotel de Ville de Lachute, le 10 mai 1928 selon les dispositions de la Loi des Cites et Villes, et de l'acte special incorporant la Ville de Lachute, et aussi de l'acte special amendant la charte de la Ville de Lachute, 10 Georges V, chapitre 106, le 22ieme, jour de juillet 1921, a laquelle session etaient presents:

Maire H. M. Gall et conseillers T. Dallaire, A. Larocque, P. Dobbie, H. M. Lavigne, A. J. Elliott, G. J. Charland, J. Speight et C. R. Miller, formant quorum sous la presidence du Maire, le present reglement a ete adopte:—

(A) ATTENDU que la population de la Ville de Lachute ne depasse pas 5000 habitants;

(B) ATTENDU qu'une requete contenant 173 noms d'electeurs municipaux de cette ville, a ete presentee au Conseil municipal, demandant de soumettre aux electeurs municipaux de cette ville un reglement permettant l'etablissement d'une succursale de la Commission des Liqueurs de Quebec dans la ville de Lachute;

(C) ATTENDU qu'un avis de motion a ete dument donne de l'adoption du present reglement;

QU'IL SOIT EN CONSEQUENCE ORDONNE ET DECRETE, ET IL EST PAR LE PRESENT REGLEMENT ORDONNE ET DECRETE comme suit:

1.—Qu'une succursale de la Commission des Liqueurs de Quebec soit etablie dans les limites de la ville de Lachute, conformement a la Loi des Liqueurs Alcooliques de Quebec;

2.—Que le present reglement soit soumis a l'approbation des electeurs municipaux de cette ville, le 12ieme jour de Juin 1928, conformement a la Loi.

3.—Le present reglement viendra en force et vigueur apres avoir ete approuve par la majorite des electeurs municipaux de la ville de Lachute qui auront vote sur le dit reglement.

—Hemstitching and Pekoe Edge, properly done. Quick Service. Telephone 71 ring 2-4.

The Duchess of Bedford, latest addition to the Canadian Pacific's fleet of passenger liners on the Atlantic, is the first of four cabin class vessels being constructed for the Canadian Pacific to be added to the company's service on the St. Lawrence route, and they will also be used for winter cruise purposes.

Winnipeg. — According to statistics recently collected from 248,162 farms, there are 6.8 horses to each farm in Manitoba and a tractor to every 4.6 farms in the province. Each Saskatchewan farm has 10.2 horses and there is one tractor to every 4.7 farms, in Alberta there are 10.8 horses to each farm and one tractor to every 7.5 farms.

Ottawa, Ontario. — Employment stood at a higher level in Canada in April, 1928, than in any April as far back as records go. Returns from 6,191 employers of labor with working forces aggregating 342,940 persons, showed the employment index standing at 101.1, as compared with 96.2 in April, 1927, and 84.1 in April, 1926.

As a newspaper we have always said, "It pays to Advertise" but on Friday the Lachute Dramatic Society will present real facts to you in the Auditorium. Seeing is believing so don't miss it.

Various families in this town have begun receiving copies of "The Home of Today" a handsome small magazine sent them with the compliments of Argenteuil Motor Sales, Lachute, Que. Canada. The publication is issued by the Williams Oil-O-Matic Heating Corp. of Bloomington, Ill. represented locally by Argenteuil Motor Sales and although incidental mention is made of the Williams Oil-O-Matic Oil Burner, practically all of each issue is devoted to subjects of home beautification, magazine digests reviews of the current book successes and other topics of interest to homeowners.

The magazine will be sent to any family interested in home improvement.

WALSH KATHINE REPORTS GOOD PROGRESS

The Annual General Meeting of Shareholders of the Walsh-Kathrine Gold Mines Limited was held at the office in the Castle Building, Montreal, on May 6th. The meeting was of a very satisfactory nature and the shareholders present went away in a very optimistic frame of mind.

The report of the President, Mr. Hugh Walsh, briefly summarized, was to the effect that the mine was never in better condition. The shaft is down 515 feet. Four levels are established at 140, 250, 375 and 500 foot levels. About 2,500 feet of cross-cutting and drifting. The costs compare favorably with other operating mines in the district.

The outstanding development of the past year was the opening up of No. 2 vein on the 250 foot level. This is a high grade vein, heavily mineralized with iron and copper pyrites. Gold bearing tellurides are visible. The vein averages above \$20.00 over a width of four feet. This ore body has not yet been opened up for its entire length.

Work on the 140 foot level is now meeting with satisfactory results and it is expected that No. 2 vein will be cut within a few weeks. This vein carries as high as \$245.00 in gold and \$7.70 in silver on the 250 foot level.

The financial condition has been improved during the past year and the developments now taking place underground are of such a satisfactory nature that it is felt there will be no difficulty in securing funds to complete the development work.

The following were elected as officers and directors: Hugh Walsh, President; W. R. Lowery, 1st. Vice President; E. G. Goudey, 2nd. Vice President; W. O. Taylor, Secretary; E. L. Giblin, Treasurer & General Manager; A. M. McManus, Director; John Hussey, Director.

meals on time

SHARP on the dot, meals are ready to serve when Perfection does the cooking. No wood to chop, no ashes to lug.

Cooking starts with the touch of a match to the wick. Every drop of oil is changed to intense heat in the long chimneys. The automatic wick stop does not allow the flame to rise above a set point. No smoke, no soot, no odor. Far better than nursing a coal fire. No waiting for current.

See the beautiful new Perfection on display at your dealer's. Learn of its 27 new features. Inspect the wonderful 'live heat' oven. Prices on Perfection run from \$8.75 to \$212.50. Write to General Steel Ware, Limited, Toronto, Ont.

GEORGE A. VINE, Proprietor.

Why do you eat Hen's Eggs? Are in the Auditorium, by the Lachute Dramatic Society presenting "It pays to Advertise."

ST. ANDREWS EAST.

Mr. and Mrs. Webber were in Montreal on Thursday.

Miss Joan Willett spent a few days in Montreal last week.

Rev. Mr. Macaskill and Mr. A. Dorion were in Montreal on Thursday.

Mr. Ness, of Howick, is in St. Andrews to take charge of the farm work on Mr. Drysdale's estates.

The Rev. J. Burgess, recently of St. Andrews, is attending the conference of Social Workers in Vancouver, B. C.

Mr. Pierce, of the Sun Life, Montreal, and Mrs. Pierce, are spending their week-ends here, and will shortly take Mr. Dawson's cottage for a summer home.

Mrs. Cooper and her daughter Lillian, of Windsor Mills, have joined Mr. Cooper here, and they are staying temporarily with Mrs. Caution until they take up house.

The entertainment in the Town Hall, June 1st. under the auspices of the Anglican Church was a very pleasant and successful affair. The house was crowded with an appreciative audience. The plays were interesting and well acted, and everyone seemed satisfied.

DALESVILLE.

Mrs. Potrais was the guest of Mr. and Mrs. Arthur Campbell recently.

Mr. and Mrs. Stuart Campbell and daughter were the guests of his mother on Sunday.

Miss Isabel Schwartz was the guest of Miss Edythe Silverson who spent the holidays with her parents.

Mr. Geo. Calder, Mrs. Chas. Calder of Lachute, and Mr. W. Murdoch, of Montreal, were the guests of Mr. and Mrs. R. Silverson on Sunday.

Miss M. McWaters and Mr. Bert Cuthbert were the guests of Mr. and Mrs. W. J. Morrow for the week-end.

Mr. A. E. White & daughter Helen of Westmount, spent a few days at their summer cottage. Mr. Seaman, of Montreal, was their guest for the week-end.

Mrs. Conlin and Mrs. Burnett, of Montreal, are the guests of Miss Margaret Barker, who has opened her cottage for the summer. Mr. Burnett spent the week-end with them.

Miss C. Murdoch and her parents, Mrs. T. R. Cregeen, Miss Elizabeth Cregeen, the Misses Margaret and Nancy Scott, who spent a pleasant holiday at "Lingerlong Kamp" returned to Montreal.

STONEFIELD.

Miss G. Owens called on Mrs. Conway Monday.

Miss G. Owens visited at Mrs. J. Canning on Tuesday.

Mrs. H. Denmore and Miss G. Hoyle spent Monday at the Elms.

Mrs. Gordon Hampton spent Sunday with her mother Mrs. R. Dewar. The farmers are finishing up one of the latest spring seedings on record—what will the harvest be.

Mrs. J. Canning and Mrs. John McMeekin attended the Ladies' Aid meeting at Miss B. Nichols last Thursday.

Quite a few visitors motored up from Montreal on Saturday and Sunday to spend the holiday in Stonefield and district.

What's the matter with Cushing; they don't improve their road, it is in very bad shape in some places, don't let Grenville get ahead of you boys; just get out the Gravel wagon and get busy.

We had a trip through Lachute and district not long ago and would like to congratulate your people on the neatness and also on the number of new buildings that have been put up adding beauty and enterprise to the town. If you would plant a row of stately Maples down the middle of Main Street, it would add greatly to the beauty of the street, as there is quite a strip of waste land there. Sod it, plant trees and it would make a nice resting place for old and young.

GRENVILLE.

Miss Lois Cooke was at her home for the week-end.

Mr. and Mrs. W. Bradshaw Sr. are visiting at Black Lake.

Mrs. F. Wade, of Montreal, was a recent guest of Mrs. J. E. Arnold.

Miss Helen Bradshaw spent the latter part of the week at her home.

Mr. Lorne Cooke spent the week-end with his family at his home here.

Mr. Willie Skelcher and friend Mr. Flanagan, of Montreal, spent the week-end at his home.

Mrs. James Wade has returned from Ottawa, where she enjoyed a visit of three weeks with relatives.

Mrs. W. P. Gaudry and little daughter Roberta and son Victor visited Mrs. A. V. Gaudry here on Monday.

Mr. Weymouth Gaudry and two little daughters Sylvia and Elsie and little son Harold, of Greenfield Park, spent the week-end and holiday with his mother.

SCOUT NEWS.

Due to wet weather the Scouts had to remain in the hall this week. Instruction was given in boxing after which the troop was dismissed on account of extra study for the approaching June exams.

PRIVATE SALE

There will be sold by Private Sale at the residence of

**MRS. VICTOR LEFEBVRE,
BETHANY STREET,
LACHUTE.**

The following effects:—1 Dining room set, 3 bedroom sets also beds, 1 rocking chair, 1 barrel churn, 2 coal oil stoves, 1 Horse Clipper, Harness Double Windows and many other articles too numerous to mention.

Terms: CASH.

For further information apply to Mrs. Lefebvre at Mr. Napoleon Robert's residence Grace Street.

Results at Macdonald College

In reading over the results of Macdonald College we are pleased to find a number of our townfolk and county residents who have done good work and come through with honors.

LAKEFIELD.

Mr. and Mrs. Albert MacDonnell and Mrs. Aiken, of St. Andrews were in Lakefield on Monday.

Mr. and Mrs. Laurence Overing and little son have taken up their residence at Rosemount for the summer.

Mr. and Mrs. Hadley and party of Montreal, motored up to Lakefield on Monday last to visit their friend, Mr. Alex. Miller.

There were unusually large congregations both at Lakefield and Shrewsbury last Sunday to welcome their new minister, Mr. Flander.

We were glad to welcome Mr. and Mrs. Chas. Mann once more. Mr. Mann's willing and talented services as organist are greatly appreciated.

Mrs. W. Evans entertained a large party of friends over the week-end. Mr. and Mrs. Le Marquand, Mr. and Mrs. A. Marshall, Mr. and Mrs. W. S. Andrews, Mr. and Mrs. A. Wilcox, Mr. and Mrs. Ralph Andrews and Mr. Ben Lavallee.

On account of the heavy rain, the meeting of the Ladies of the W. A. was postponed until Wednesday, June 13th., at the residence of Mrs. Allan E. Mount. As several important matters are to be discussed it is hoped there will be a good attendance.

Special attention is drawn to the altered hours for Service on Sunday next, June 10th., which will be as follows:—Dunany at 10.30 a.m. Louisa at 1.30 p.m. Lakefield at 4.30 p.m., all at Standard Time. It is earnestly hoped that everybody will take advantage of these services.

The English Rugby League Football team, at the present time touring Australia and New Zealand, is scheduled to arrive at Vancouver on R. M. S. Niagara, September 14, and will play a game there next day, leaving on the Trans-Canada afterwards for Montreal where another game will be played September 20, before sailing for England on the Duchess of Atholl next day.

Free scholarships to C. P. R. apprentices or employees under 21 or to minor sons of employees of the company covering five years' tuition in Chemical or Civil Engineering at the Ecole Polytechnique of the University of Montreal and four years' tuition at the Montreal School for higher commercial studies are announced by circular over the signature of Grant Hall, senior vice-president of the railway. The scholarships are two in number, one at each of the institutions of learning named, and are decided by high standing in competitive examination.

"SALADA" GREEN TEA

THE YELLOW SEVEN: THE HUT IN THE CLEARING

BY EDMUND SNELL.
ILLUSTRATED BY RALPH WINTERFIELD

BEGIN HERE TODAY.

Chai-Hung, influential Chinese, calls at the home of John Hewitt, Commissioner of Police at Jesselton, British North Borneo, to tell of the death of Mr. Allison, victim of a gang murder. Peter Pennington is detailed by the government to run to earth The Yellow Seven, a gang of Chinese bandits. Monica Viney lives with her brother, Capt. Hewitt. Pennington suspects Chai-Hung of being the leader of the bandits. Hewitt procures a warrant for the arrest of Chai-Hung.

NOW GO ON WITH THE STORY.

"Chai-Hung called here this afternoon," Hewitt started.

"This afternoon!" he echoed incredulously.

She nodded.

"He asked if you were in—and said he was going away for some time. Mr. Pennington was here, too. He'll tell you all about it."

The Commissioner passed a weary hand over his black hair.

"Where is Pennington now?"

"I haven't seen him since tea."

A sudden movement in the wild garden outside attracted her attention. She stepped close up to the rail and peered into the blackness. Standing half in the shadow of a stunted palm, she saw a tall, gaunt figure, wearing a loose costume of pale blue material. Monica caught her brother's sleeve and pulled him forward.

"There's a man out there, Jack," she told him softly.

The Commissioner looked.

"It's Pennington, I suppose," he growled presently. "What the devil's he want to hang about the house like that for?"

At that moment, the scarecrow raised an arm and beckoned.

"How are we for time?"

She consulted her wrist-watch.

"You've twenty minutes before dinner. Don't stop out too long."

Hewitt looked at Monica. Thirty seconds later he had passed down the steps, making his way toward the tree.

Mrs. Viney went in to dress for dinner.

The deep-toned Ducun gong, reverberating in the stillness of the night, brought her back to the verandah. Her brother was nowhere to be seen. She hurried down the passage to his room, tapped on the door, then, getting no response, looked in. The room was empty and a glance sufficed to tell her he had not been there since his return.

The neatly piled clean clothes were still where the servant had put them. Her mind slightly troubled, she invaded his office. As she stepped toward the writing-table, a grim sense of impending disaster swept over her. She thrust it from her resolutely, and pressed onward. Both hands resting on the wooden surface, she gazed horror-stricken before her at a dagger with a gilt handle that stuck upright in the table, its thin steel blade impaling a heap of torn paper fragments. Dimly, as her powers of reasoning stole back to her, she realized that the tattered document was the warrant for the arrest of Chai-Hung, and that the yellow handle of the knife bore seven distinct black dots on the side.

that was turned toward her—four on the upper half and three below.

Suddenly she became aware that Pennington—serene, immaculate—was at her elbow.

She swung round on him fiercely.

"Mr. Pennington, what does all this mean? Where is Jack? What have you done with him?"

Pennington was frankly puzzled.

"Jack? Captain Hewitt? I haven't seen him. Isn't he back yet?"

Monica caught her breath.

"Somebody beckoned to him from the garden," she raved on wildly. "We both thought it was you. Jack went out. He hasn't dressed for makan, and there's that on his table. For God's sake tell me what it all means."

Pennington guided her to a chair, then bent over the dagger. A second later, he had rushed from the room toward the kitchen-quarters.

She heard the voluble tones of the cook-boy, a yell of pain, the dragging of a heavy body along the floor and the servant was flung like a sack into the office, still clinging to a flimsy box with a metal handle—the only luggage he had brought with him when he arrived.

Pennington slammed the door and leant against it.

"Get up, you swine!" he said sternly. "Get up and find your tongue or, by heaven, I'll flay you alive!"

The boy scrambled to his feet and stood sullenly in the centre of the bare room.

"You will lead me to Chai-Hung!" hissed Pennington.

At the very sound of the name the Oriental trembled visibly.

The Englishman caught him by both

shoulders and shook him violently. A volume of inarticulate grunts followed. Pennington plucked the knife from the woodwork.

"Mrs. Viney," he said over his shoulder, "do you mind waiting for me in the dining-room?"

At the entrance she looked back.

"What are you going to do?" she demanded fearfully.

He shrugged his shoulders helplessly.

"Please go," he whispered. "I've got to use every method I know to enable me to get on the track of your brother—before it's too late."

Collecting herself with an effort, she crept from the room, closing the door after her.

In the grim half-hour that followed she lost all sense of time. She looked up suddenly to see Pennington before her.

"I'm just off," he said quietly.

"Then you know—?"

"He has told me as much as I wanted to know."

She regarded him doubtfully.

"It all sounds so utterly hopeless," she declared.

Pennington was leaning against the table, eating bread and cheese alternately.

"You must remember, Mrs. Viney," he told her between the mouthfuls, "that I have made it my business to study the movements of our arch-bandit. It would be impossible for me to know all his hiding-places, but I have discovered a good few of them, sufficient, I feel convinced, to assist me in sifting fact from fiction. Wong-See—the intelligent youth I collared in the act of making a hurried exit—is a poor sort of creature when brought face to face with the serious

problems of this life. By dint of dire threats and much patience, I gathered he was on the point of proceeding to Chai-Hung's lair, to the place where your brother has been taken. In effect, we have arrived at a delightful compromise. Wong-See is between Scylla and Charybdis: If he fails to join Chai-Hung—the vengeance of that gentleman will fall upon him, swiftly and surely, whether he seek refuge in China or any old island in the archipelago. The remaining horn of the dilemma is—"He stuck his tongue in his cheek. "—death by the most horrible torture imaginable—at the hands of 'he who sees in the dark,' otherwise—myself! Now comes the compromise. He is to proceed to Chai-Hung's hiding place, as he had originally intended, only with Pennington in his immediate rear. In this manner, he stands a sporting chance of dodging a horrible end at the hands of either."

He reached for his hat.

Monica slipped between him and the door.

"You're not going alone?"

"Most certainly."

She stamped her foot impatiently.

"You mustn't do that!" she cried.

"It's positively absurd. Supposing there are others waiting for Wong-See in the jungle?"

"I've been in tight corners before, Mrs. Viney," he reminded her gently, "and I've managed to squirm out of 'em somehow. If I attempt to start out with a crowd of native soldiers, the information will be tapped out on some native telegraph-system almost before the men have left the barracks. Hewitt will be spirited away and the chances of rescue will become a thousand times more remote."

"One more couldn't possibly do any harm," protested Monica.

"I'm not taking any chances," said Pennington.

"Take me!" said the girl, flushed to the roots of her hair.

"You?"

"Why not? I shall be at my wits' end if you leave me here alone." Her voice broke. "If Chai-Hung is plotting against one of us, why shouldn't he send for me while you are away, looking for Jack?"

Pennington glanced hurriedly at his watch, and Monica realized that her argument had gone home. She seized his scket impulsively with both hands.

Pennington's one weakness lay in his utter inexperience of the opposite sex.

"Come on, then," he said, with a gruffness that was new to her. "There's an electric torch in the right-hand drawer of your brother's desk. We may want it."

Trembling with excitement, she hurried in search of it, joining him a few seconds later at the foot of the verandah steps. Almost at the exact spot where she had seen the man who had impersonated Pennington, the cook-boy awaited the order to proceed.

Soon they had left the beaten track and were threading their way through tangled undergrowth, under branches so closely interwoven as to exclude the stars, the humming of countless legions of insects in their ears, the bright light of the electric torch describing an illuminated circle on the back of Wong-See.

The night air blew suddenly chill and a slight shiver ran through Monica.

Her companion brought his head almost level with her.

"Cold?" he demanded softly.

She smiled up at him.

"Not really. Actually, I'm supremely content."

They relapsed into silence again, and Pennington, conscious of a smoldering, inconsumable fire within, glanced covertly at the trim figure of the attractive widow who kept pace with him, and was glad that he had let her come. He quickened his step, until Monica found herself compelled to run to keep up with him.

(To be continued)

British Loans in the U.S.A.

London Times (Ind.): The lifting of a British Government sterling loan on the New York Stock Exchange is a historic event of some importance.

Only a few years ago American investors were almost complete strangers to foreign investments, and many argued that they would remain so; but they have developed an unexpected liking for this form of investment, though in all, or nearly all, cases they have insisted that the loans should be dollar obligations and not obligations payable in the currency of the borrowing country. The lifting, therefore, of a foreign internal loan marks a new, if experimental, stage in development of America as an international financial centre.

A reliable antiseptic—Minard's.

Paths for Pedestrians

London Morning Post (Cons.): In the country there has sprung up a dastardly habit of removing footpaths, provided by our ancestors to protect the pedestrian or horseman from collision with a coach or cart. Never has the provision of footpaths at the side of every main road been as important as it is to-day; and the giving of a little space for users of the road who are not motorists should be the first principle of road development throughout the country.

813

EXTREMELY GRACEFUL

Lustrous golden brown crepe satin combines with wrong side of fabric in a charming dress, with the outside front plaited at waistline and tied in a sash. Wool crepe, printed and plain crepe, two tones of silk crepe, georgette crepe and lightweight woolen with silk crepe are also fashionable for design No. 813. Patterns can be had in sizes 16, 18 and 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/4 yards of 40-inch material with 1 1/4 yards of 32-inch contrasting and 1 1/4 yards of 27-inch lining. Price 20c the pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

House of Commons Manners

Sidney Webb in the London Observer (Ind.): It is mere ignorance that ascribes all the Parliamentary lapses of manners or morals to the advent to the House of Commons of the manual working class. On the contrary, it is argued by students of Parliamentary history that the continued shrinking during the past century of the aristocrat element, and the substitution, first of the growing proportion of working lawyers, authors, journalists and industrial capitalists, and then—to the extent of about one-eighth of the whole House—of men of manual working antecedents, has been at any rate coincident with an equally continuous general improvement in manners and morals, and with an actual rise in the decorum and dignity in which the British Parliament to-day surpasses all contemporary national legislatures.

"Drunk in Charge of a Car"

London Evening Standard (Ind. Cons.): (Two London Police Court magistrates, "men of great experience and sound judgment," have made it clear that the old tests for drunkenness are utterly inadequate in these days of automobiles, and that the law should be changed.) Whether a man who has been drinking and is in an excited condition ought to be called drunk is a question which each individual will answer according to his own private views. But whether he is in a fit condition to have control of what may so easily become a highly lethal instrument is open to the test of fact. No matter how little he may have taken, no matter how reasonably he may be able to talk, if his hands are unsteady on the wheel, if his judgment seems to be slow in an emergency, then he is not fit for his responsibility he has undertaken.

Recovery of \$2,000,000 from the bottom of New York harbor shouldn't be taken as evidence in other parts of the world that the very threshold of the United States is paved with gold. It was salvaged from a wreck.

World Honors Dunant as First to Urge Red Cross Relief Idea

56 Nations Took Part in Celebration of 100th Anniversary of Swiss Humanitarian's Birth; Sight of Battlefield Inspired His Proposal

The hundredth anniversary of the birth in Geneva, Switzerland, of Jean Henri Dunant—the great humanitarian who gave to the world the idea and vision on which the Red Cross is founded—was observed on May 8th in fifty-six nations. Twenty million persons are enrolled under the banner of the Red Cross.

The clash of the Franco-Sardinian and Austrian armies on June 24, 1859, when 300,000 men were engaged in hand-to-hand fighting on a ten-mile front and 40,000 were wounded and dead at the close of the fifteen-hour struggle, created the idea in Dunant's mind.

While travelling in Lombardy, Dunant came, late in the day, upon the battlefield. He was "moved to compassion, to pity, to horror" by the dead and dying, and hastened to the nearby village of Castiglione, where he persuaded peasant women and girls to return with him to succor the wounded.

For days he labored in this relief work, until all were under shelter and medical aid given them.

Later he wrote his impressions of the semi-barbaric neglect of the wounded in a pamphlet, "Un Souvenir de Solferino." It was printed in 1862. In this book he urged formation of societies for the neutralization of wounded in war, of medical men and hospi-

tals and formation of units of nurses. He added: "These societies, by their permanent existence, could also render great service at the time of epidemics, floods, great fires and other catastrophes; the humane motive which would have created them would instigate them to act on all occasions in which their labors could be exercised."

The principles suggested by Dunant in the '60s of the last century are to-day a part of the articles of the International Red Cross treaty and are the major task of the Red Cross in fifty-six countries.

The first international convention was held in Geneva in 1863, attended by representatives of sixteen countries. It adopted resolutions to neutralize wounded, hospitals and medical personnel and for use of an identical flag by all nations to designate medical service in war.

A formal diplomatic convention in 1864 embodied the resolutions in the Treaty of Geneva.

Dunant lived to see a Red Cross Society in almost every nation and died at eight-two years of age in Helden, Switzerland, where he had lived in seclusion many years. In 1907 the Norwegian Parliament awarded him one-half of the first Nobel peace prize. Get behind and help this great living throbbing movement with energy and money.

The Joys of Life

London Daily Telegraph (Cons.): (Dr. J. Strickland Goodall says that the great increase in the number of deaths from heart disease is due to late hours, cocktails, cigarettes and the low emotional character of modern novels, plays and films.) He who would live long and see good days must avoid emotion, take but little exercise, not overwork his brain and cut down on his tobacco. It is not a very easy prescription to follow. And in any case most of us would prefer to drop down dead in the middle of crook play or sermon than have to endure the lingering torture of slowly dying by other diseases. Mr. Goodall will frighten fewer people into virtuous dullness than he imagines. The theatres and cinemas will not shut down on his account.

Extraordinary Man.
"He's the most extraordinary man I ever met."
"How's that?"
"He pays every cent that he owes."

The Harley-Davidson Single Cylinder Motorcycle is the greatest little machine that has been made. Safe to ride, easy to control, and most economical. Stands without a rival. 100 Miles to Gallon of Gasoline. Down Payment \$105, Balance \$22 per month for ten months. Price \$305. Walter Andrews, Limited, 345 Yonge St., Toronto, Ont.

An old Chinese vase sold in New York recently for \$30,000, but a rose within it would smell no sweeter than in a milk bottle.

Minard's Liniment for falling hair.

While the size of a "town" may be known by its filing stations, the size of a "city" may soon be known by its landing fields.

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every drug-gist has it, but don't fail to ask the druggist for Bayer. And don't take any but the tablets that are stamped with the "Bayer Cross."

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

WRIGLEYS

The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure. It cleanses the mouth after eating—gives a clean taste and sweet breath. It is refreshing and digestion aiding.

World Trade in Newsprint Paper

Canada's Exports Exceeds Those of All Other Countries Combined

According to the best data available the total export of newsprint paper from the different producing countries in 1927 was slightly more than 3,000,000 tons. Canada's export shipments accounted for over 60 per cent. of this total and the balance was contributed by some fifteen countries. Sweden, Norway, Newfoundland and Finland, each exporting less than 200,000 tons, were fairly closely grouped, while Germany and Great Britain had the major shares of the remaining trade.

The diagram is based on figures published recently by the Newsprint Service Bureau.

The Dominion's commanding position in this field of international commerce is, for the time being, beyond dispute, but it should also be a constant and effective reminder that the Canadian people have a greater business stake in forest protection and conservation than any other people in the world.—Courtesy "Natural Resources, Canada."

Make the Most of Spare Space

Hints On Using Odd Corners To Have a Place For Everything and Then Keeping Everything in Its Place

Spring, with its fever for cleaning and renovating, rings back to mind the old, old saying "a place for everything and everything in its place." One begins to wonder how more storage space may be provided. Or, if closets are cluttered and small, how can order and system be brought out of chaos.

In most homes the more closets and cupboards that can be provided, the happier becomes the housewife. Beside the usual storage space in the kitchen which provides for supplies, there are throughout the house, cleaning closets, laundry closets, clothes closets, and other storage space which might take care of children's toys, magazines, rubbers, boots, etc.

The cleaning closet, in which brooms, sweepers, mops, buckets, brushes, and other cleaning supplies are kept, should be sufficiently large as to hold brooms, brushes and mops. There should be floor space for brooms, brooms, and mops, and shelves for cleaning supplies such as cleaning powders, furniture polish, etc. It is well to have a drawer or two in which cleaning cloths may be kept. This closet is best at the back of the house, in or near the kitchen. If there is a back passage way, that is a good place for it. An old wardrobe may be converted into a very convenient cleaning closet or different compartments are now including cleaning closets in connection with their sectional cabinets which are very good and probably as cheap as to have one made.

The laundry closet should be in the room where laundry work is done. It may be high enough to have a shelf at the top for the soap, bluing, starch, and stain removers, with space below for baskets, wash boards, and ironing boards if this is not built in a separate place.

A linen closet is one of the most important store rooms in the home and should be located in a part of the house where it will be most accessible. It should be planned with the idea of classifying and organizing the different sizes of sheets, pillow cases, towels, spreads, and any other household linen. Sometimes the extra bedding is also stored in the linen closet. When this is done, wider and deeper shelves are necessary. The shelves with drop fronts are desirable as linen is very heavy to handle. In a drawer and the drop front extends the shelf which may be an aid in sorting the linen. Sliding trays are sometimes used for the linen. They are made by simply having the drawers shallow and cutting away part of the front.

Clothes closets should be arranged in every bed room of the house and a closet for outside wraps is very desirable in both the front and back of the house. The most important things in connection with clothes closets are to have easy access to every garment, good light, and the possibility of airing. Clothes closets should be sufficiently wide to take a coat hanger without the clothes touching the walls, but, on the other hand, it is not well to build them too deep. A closet two feet deep and three or four feet long will hold many garments if it is correctly arranged. A horizontal bar running lengthwise is economical of space and makes a very good way to hang one's clothes.

Sliding rods can be used for the small "hole-in-the-wall" closet. These rods can be pulled out of the closet into the room. They are especially good for the closets under stairways.

The wardrobe closet is being utilized much in the modern home because of its compactness. These can be planned along the lines of a wardrobe trunk. It can be divided vertically into two equal spaces, each pro-

FOR INDIAN MARATHON
Frank Goodleaf, University of Toronto student, who will compete in the International event from Topeka to Kansas University.

vided with solid panel doors. Have the compartment on one side sufficiently wide to allow for a coat hanger. In the other compartment might be a tier of drawers with a shelf or two below for shoes and at the top two small closed doors to use for hats. Shoebags made of colorful chintz to fit the dimension of the door may be used. Shelves for hats and shoes can be respectively above and below the garment space. A shoe support on the door or inside the closet is a very tidy way of taking care of the shoes. Curtain rods may be used.

In every home there is usually some place for the medical and surgical supplies and this is commonly termed the medicine chest. This should be a shallow closet with narrow shelves so all bottles will be in single rows, each plainly labeled. All poisons should be kept on a shelf by themselves. It is also a good idea to either have a different shaped bottle or a different kind of stopper so they will be recognized in the dark. The medicine closet is usually placed in the bath room although this is not necessary if there is a more convenient place.

Besides these closets listed there are always odds and ends of storage spaces around the house that can be utilized to good advantage. Sometimes it is a bit of space around the chimney, a set of drawers under the stairs, or a window seat. If the window seat is on the second floor, it could be lined with cedar and make a possible storage space for wool blankets.

One seldom has too much storage space or too many closets. The main thing is to use every nook and corner to the best advantage.

He—"Jane is irresistible."
She—"I never put up much resistance either."

A Hollywood film actress is said to shun social life. She invites hardly anybody to her weddings.

A Hong Kong official had just landed in England for the first time in 20 years. It was explained to him that it wasn't the same shower still falling.

The Motor Car Past and Present

Fundamentals of Engine Unchanged—But Fewer Nuts and Bolts, Better Timing, Ease of Control, More Exact Fitting of Parts.

Thirty-odd years ago an automobile was an invention which, in the belief of the average citizen, could never become successful because he did not choose to accept it in place of the horse and carriage. That his judgment was wrong is evidenced by the fact that over 20,000,000 motor vehicles were in use on the highways of the United States during 1927, which were produced in American factories.

The first automobile was necessarily a crude affair, which strangely resembled a steam calliope while in action. It had no claim to beauty, nor was it silent and easy to operate like the 1928 models, but the fundamentals of operation which impelled it to move down the street and up the hills have remained practically unchanged through the years.

Turning to the description of the Winton 40-horsepower automobile, Model M, produced in the early years of the industry, we find that it had four forward speeds, selective type; direct drive on third forward speed; smooth-as-silk multiple disk clutch; "offset" cylinders, preventing friction—loss of power; horizontal drive shaft; mechanical throttling carburetor; "shooting" oiler, mechanically operated; all working parts easily accessible; floating type rear axle; jump spark ignition; centrifugal pump cooling; and improved Winton twin springs.

Gas and Spark Plugs

While the language is somewhat different from that used to-day the fundamentals of locomotion are the same now as in those early days. The gasoline tank was placed on the rear of the vehicle. Compressed air entering through a tube caused a displacement of a volume of gas equal to the volume of air coming into the tank. The gasoline was forced through an auxiliary tank into the carburetor, controlled by an adjustable needle valve, by means of which the flow was greater or less, according to individual needs. The air in the carburetor gathered a few drops of gasoline, which immediately evaporated into the air forming a mixture of gas.

This compressed gas was forced into the cylinder and ignited by an electric spark. Spark plugs were employed similar in construction to those now in use. To produce the spark the automobile was equipped with an electric ignition system, the component parts of which were battery, commutator, switch, spark coil, spark plug, wire and spark advance lever. Many cars of the period from 1903 to 1907 used a double battery system so that should the dry battery run out, the storage battery was ready to give the necessary power to keep the vehicle running. In the automobile of to-day the same idea is carried out in a much simplified form, but the basic idea remains unchanged.

In describing the spark plug of 1906 the Cleveland Automobile Institute says: "The spark plug is so constructed that, when energy reaches it from the batteries, the energy jumps a gap between the platinum points of the plug in the cylinder. When this jump occurs, a flash of flame bridges the gap. And, since this flame takes place in the cylinder at the exact moment when the cylinder is charged with compressed gas, the flame ignites the gas and causes its combustion and expansion."

The only practical difference between the operation of the first automobiles and those of the present day is in the timing and ease of control from the driving seat. When the automobile of 30 years ago was driven by a one-cylinder engine, which often missed fire, due to imperfect timing, the eight-in-line engine of 1928 is so constructed that each cylinder jumps the spark without loss of power at any point. Crude operation has been succeeded by an easy motion which is almost entirely automatic.

Systems of Cooling

Two systems of cooling, one by air and the other by water, were used on the early models. In the air system a series of fins or pins were placed on the outer walls of the cylinder which came into contact with the rush of air occasioned by the speed of the car. Except in a few automobiles, this system has been displaced by the method of water cooling now in vogue. A notable instance of modern air cooling is the system employed by the Franklin car, which embodies the same ideas along much simpler lines.

Three water cooling systems were employed on the old-fashioned cars, namely, thermo-siphon, gear pump, and centrifugal pump. In all of these systems water spaces were provided around the cylinders between the inner and the outer walls. The upper part of the water chambers, around the cylinders, was connected by a pipe to the radiator at the front of the car, where the water passed through tubes to the bottom of the radiator and thence flowed back to the lower part of the motor cylinder.

An illustration is given which is interesting and practical even to-day. "When water boils it leaves a deposit. The tea kettle is a familiar illustration. After a tea kettle has been used any considerable time, a coating appears at its bottom and sides. This is a deposit of lime. The same deposit of lime may be left in the radiator of an automobile and the precaution must therefore be taken that the radiator tubes be sufficiently large so that the deposit will not clog the passage of water." The years have taught automotive engineers this lesson so that the radiators on the modern cars are in no danger of clogging. However, the method of cooling to-day is based on the system used back in 1903.

How familiar this reads: "The multiple-disk clutch has proven so successful that it is rapidly displacing other types. Among numerous advantages in its favor are that it is small and compact, has metal-to-metal friction surfaces, and revolves in an oil bath, assuring its constant automatic lubrication. Except for certain minor changes the multiple-disk clutch seems to find favor in 1928 just as in 1906."

The great change in automobile construction has been the exact fitting of parts so that all unnecessary bolts, nuts, screws and other joinings have been taken out. The gasoline flow is entirely automatic to-day, the oil is filtered and used many times, the cylinders have been multiplied and the pistons shortened, while braking is on all four wheels. If Stephen Duryea, who brought out the first gasoline car in 1895, could see the 1928 model of any car on the market he would be justified in thinking that his conception of a motor-driven vehicle was quite as practical in its age as the one he would meet on the highway in any part of the world to-day.

A gardener says that an early spring is necessary. Any pedestrian knows that.

Many people say you have reversed some of your old opinions. "Of course I have," replied Senator Sordum. "Otherwise, how would it have been possible for me to remain in political action all these years?"—Washington Star.

Try It Boys!

HOW PITCHER HERB PENNOCK HOLDS THE BALL

On left his hand is set for a fast ball and on right for a slow ball. There is but a slight difference for each of the deliveries, and that difference is more a matter of finger pressure.

Care and Repair of Electric Cords

All of the portable electric appliances in household use to-day depend for their satisfactory operation upon the electric cord. When the iron or warming pad refuses to heat, or the electric sweeper runs irregularly or not at all, the probability is that the fault is not in the appliance, but in the cord through which its electricity comes.

Early portable devices such as electric irons, curling irons and sweepers, wear out cords faster than do utility motors, washing machines and fans. The electric cord is not intended to withstand mechanical stresses, as will be understood after a word explaining its construction.

Construction of Cord

The cord, which looks like one wire covered with woven fabric, is really two wires within one outer covering, which is usually silk. Each inner wire consists of many tiny strands of copper twisted together into a light cable, the cable being covered with a rubber coating. Outside of the rubber are several layers of woven cotton. The two cables, each complete in itself, are twisted together into a unit and covered with silk.

At one end of the cord is a plug for attachment to a wall socket or other receptacle and at the other a socket to receive an incandescent bulb or else a special plug to attach to the terminals of the iron, toaster, etc. The ends of the cords are attached within the plugs by brass screws or "binding posts."

Sharp bends and kinks tend to ruin the cord by breaking the fine copper wires inside it. Mechanical stresses, such as those resulting when an iron is allowed to slide off the ironing board, or when a toaster is disconnected by a yank on the cord instead of on the plug, injure it by breaking off the little wires at the point where the ends are held under the binding post screw heads. Setting a hot iron down on the cord damages the insulation and may cause future trouble. Getting a cord wet encourages short circuiting, particularly if there already be a weak spot in the insulation.

Most frequently breaks in the cords come at either end, since most of the wear from bending occurs near the plugs. It is very easy to repair trouble of this kind and every user of appliances should know something about it, since such knowledge may save not only a repairman's charges, but hours of valuable time. The only tools needed are a small screwdriver—one from the sewing-machine tools is suitable—and a small kitchen knife, although a pair of cutting pliers is very convenient.

First, be sure that the cord is not

connected with any source of electricity.

Take the Plug Apart

Take the plug apart. Inspection will usually tell the way to accomplish this; with plugs that attach to irons it usually means removing two screws, but with lamp sockets all that is needed is to squeeze the brass shell on the lower portion near the key until it disengages from the smaller top section. Let the reader assume the work concerns a socket. After having separated the two sections of the brass shell (a screwdriver will help), slide the top one, and the fibre shield that lies inside it, back on the cord out of the way. Slip off the lower portion of the shell and lay it aside. Loosen, but do not remove, the two brass screws that hold the bare ends of the cord. The chances are that when the amateur has gone this far, he has discovered the break. Pull the wires out from under the screw heads.

Now, before disturbing the knot which is tied in the wires inside the socket, take note of their length below the knot. This information will be needed later. Untie the knot and straighten out the ends of the wires. With knife, pliers or a pair of shears—copper is soft metal—cut off three to six inches of the cord so as to get a new undamaged end.

At This Point

At this point it is well to make sure that the upper part of the brass shell, and the fibre shield that belongs inside it, are already strung onto the cord as described above. (Ask any electrician how many times he has forgotten to do this.) With the point of the knife cut lightly through the outer silk covering far enough back to give two separate wires which can be tied and have the ends of the proper length. Now take each of the two inside wires separately and with the knife peel off all the insulation for about one-half inch back from the end. When the bare copper is exposed scrape the strands gently until they are clean and bright. They have a tendency to spread out like a whisk broom; twist them up between thumb and finger until there are no loose ends sticking out to cause a blown fuse. Knot the wires above the socket as they were before; if the beginner can't duplicate the knot, let him tie an ordinary square one. Insert the twisted ends of the wires under the heads of their respective binding-post screws, wrap them once around the shank of the screw in a clockwise direction, and tighten down the screws firmly. If the peeled section of the wire was too long and the end sticks out after the screw has been tightened, loosen it up and cut off the end until it will stay under the head of the screw.

Now slip the lower part of the brass shell, and its inner fibre lining, over the socket, and slide the upper parts back down the cord into position. Bring the two sections together with firm pressure and a little judicious jockeying, until the two lock together with a click.

Would Die For Him.
The Brunette—"I love him more than I can say—I'd almost give my life for him—but he seems to prefer blondes."
Friend—"I'd dye for him if I loved him that much."

WAIT TILL—

A few incidents of the Chicago election.—One candidate was killed; six persons were kidnapped; two were wounded; two gangs fought a pitched battle with pistols; gunmen toured the polling booths, attempting to drive away opposition; gangs active in the industrial and adjoining wards; candidates and voters being beaten; mobmen invaded the polling booths and threw out voters who refused to mark their papers according to instructions. But this was only a preliminary contest to choose leaders and candidates for the major elections of the Republican Party. Wait until there is a real election.

ANNUAL CAMP

A few more men and horses needed to complete "C" Squadron 17th. D.V.R.C.H. Militia Training Camp at St. Johns. Troops leave Tuesday June 12th and return June 23rd. Horses must weigh from 1100 to 1200 lbs. and must be examined by Capt. J. O. Touchette, V.O., not later than Monday, June 11th.
R. H. D. Todd, Mayor, O. C. "C" Sqdn.

Province of Quebec,
County of Argenteuil,
Municipality of the Town of Lachute

SPECIAL NOTICE

Special Notice is hereby given to all owners or keepers of dogs and cats in the municipality of Lachute Town that all dogs and cats be safely muzzled or confined, so as to prevent their escape from their owners or keepers. Any person owner or keeper of a dog or cat who allow them to run at large shall be held responsible for any damage that may occur in connection therewith.

Any case or symptoms of Rabies should be reported to the Town Office Dr. A. Campeau or Dr. J. O. Touchette.

The above notice is given in virtue of the fact that dogs and cats suffering from the disease of Rabies have been found in the Town, and that already some of our citizens are under treatment for same, therefore for the protection of our people, particularly children going and coming from school, etc., the above special notice is given.

Any stray dogs found on the streets without muzzles will be destroyed by the Town Officer.

By order of the Health Committee,
June 6th, 1928.

Province of Quebec,
Municipality of the Parish of St. Jerusalem.

SPECIAL NOTICE

SPECIAL NOTICE is hereby given to all owners or guardians of dogs in the parish of St. Jerusalem, county of Argenteuil, that you are hereby requested and warned to keep your dogs safely muzzled or confined, so as to prevent their escape from the premises of their owners, or guardians. Any person, owner, or guardian, of a dog or cat who allows him to run at large, unmuzzled shall be held responsible for any damages that may occur in connection therewith.

The above warning is given, in virtue of the fact, that according to reports, dogs and cats suffering from the disease of rabies are said to be in our midst, therefore, for the protection of our people, particularly children going and coming from school, etc., the above warning is given.

Signed this 5th. day of June 1928.
DAVID BLACK, Mayor.

COMING EVENTS

ODDFELLOWS ATTENTION!

A large attendance is requested for next Tuesday evening to receive Grand Lodge reports and also for last night of nomination of officers. By order of the Noble Grand.

DANCE

The next Dance will be held on Saturday night, June 16th, at Gordonville, and will continue each week during the summer months, unless notice to the contrary is inserted.

NOTICE

Owing to death in Mr. Crocker's family he will be unable to give his Exhibition of Tennis in St. Andrews East, on Saturday next. First dance of the season will be held in the Club House, St. Andrews East, on Saturday evening, June 16th, at 8 p.m. (Standard Time). Admission 50 cts.

—Mr. Willie Lefebvre wishes to announce that he has opened an up-to-date Butcher Shop, next to the Windsor Hotel on Bethany St., and will be pleased to supply any who require meat of all kinds.

At Amundel.

A Concert will be held in St. Francis's Hall, Friday evening, June 15th, under the auspices of the Ladies' Union of the United Church. The Programme will be given by Ladies from Montreal, who have been highly recommended. Mrs. Bissell, Vocalist, and Miss Liversedge, Vocalist. We are sure everyone will have an enjoyable time. Admission Adults 20 cts; Children under 12 years 10 cts. Programme to commence at 8 o'clock.

FARMERS' PICNIC.

The Annual Picnic of the St. Joseph's Farmers' Club will be held in the Morrison and Jackson Grove, on Friday July 6th, 1928. Dinner will commence at 11 o'clock. Sports will start at 2 p.m. Standard Time. There will be good Scotch Music, and the usual good time can be looked forward to. Should it rain on Friday, the Picnic will be held on Saturday. Bring your Baskets and meet your friends at the Picnic.

LOCAL NEWS.

Miss Laura Noble is spending this week in Montreal visiting friends.

Mrs. Collins, of Montreal, was the guest of Mrs. G. H. Hills, the latter part of last week.

Mr. and Mrs. J. Belanger returned home this week, after a pleasant trip around the world.

Miss Christina Muir returned home last week, after a pleasant visit with friends in East Angus.

Mrs. Stead, of New York, is the guest of her son, Mr. Stead and Mrs. Stead for a few weeks.

Mrs. T. Noble Sr., is spending this week in Montreal, the guest of her niece, Mrs. A. Christolm.

Mrs. J. E. Walker returned home on Monday after a three week's visit with her relatives in Detroit.

Miss Francis and Wilma Joss, of Montreal, were guests of Mrs. S. S. Campbell for the week-end.

Miss I. M. Neill, of St. Anne de Bellevue, was the week-end guest of Mr. and Mrs. Geo. Y. Deacon.

Mr. Fred Sanford was in Quebec the early part of this week, attending the funeral of his cousin.

Miss Olive Seale, of Montreal, and Miss Owey, of Morin Heights, were week-end guests of Mrs. W. R. McFaul.

Mr. and Mrs. Geo. Kilpatrick and family, of Mille Isles, were guests of Mr. and Mrs. H. Ward for the week-end.

Mrs. A. Beers returned home on Saturday last from Montreal. Miss Louise Parker was her guest for the week-end.

Miss Lena Campbell, Miss M. Hall and Mr. Chas. Kelley, of Montreal, were week-end guests of Mr. and Mrs. J. J. Campbell.

Miss Hilda Sutton, accompanied by Miss Gladys Cooke, and Mr. T. Cooke were week-end guests of the former's father, Mr. H. Sutton.

Mrs. Thos. Noble Sr. entertained at an anniversary tea, in honour of her daughters, Mrs. A. Noble and Mrs. H. Ward, on Sunday last.

Mr. and Mrs. McKencher and children, accompanied by Mrs. Hampton of Montreal, spent Thursday in town, visiting their many friends.

Mr. T. Iddon, of Lancashire, England, arrived by S. S. Duchess, of Bedford, at Quebec, on Friday last and is the guest of Mr. and Mrs. T. Milnes.

Mr. Peter Robertson returned on Saturday from Albany, N. Y., after spending a very pleasant two week's vacation with his relatives and friends.

Mr. and Mrs. R. Noble and family Mr. and Mrs. A. Noble and Miss M. Boyd were guests of Mr. and Mrs. Thos. Noble of Thomas Gore, on Sunday.

Mr. Alex. Bothwell is spending this week in Quebec, attending the Annual Convention of the Canadian Society of Technical Agriculturists, which is being held at the Chateau Frontenac.

By establishing a rule of making your purchases where your money has the most value, you are not only obliging a friend merchant, but you are absolutely serving your personal best interests. See my Ad. on last column of this paper. H. Whissell.

If you are thinking of a nice trip this summer, a visit by boat through the Great Lakes, to Toronto, Quebec or the Saguenay would make an ideal holiday at little cost. The Watchman Office will be pleased to help you in the planning. Phone 27 for information.

Mr. and Mrs. Chas. E. Gales and daughter Doris, of Boston, Mass., formerly of Montreal, motored here on Sunday, via the Mohawk Trail, for an extensive vacation in Lachute, visiting Mrs. James Boyd and their many friends and relatives also Mrs. J. H. Gales in Montreal.

MARRIAGE

SHOWERS — CUNNINGHAM, — On June 2nd, by the Rev. A. George MacKinnon, at the home of her brother-in-law, David J. Rodger, Lachute, Que., Bessie Irene, youngest daughter of the late Alexander T. Cunningham and Mrs. Cunningham formerly of Huntingdon, Que., to Carl Grant Showers, of Toronto, Ont.

ANNOUNCEMENTS

Mr. and Mrs. P. Dobbie, of Lachute, Que., announce the engagement of their elder daughter, Margaret Grace, to Dr. James N. Gillies, only son of Mr. and Mrs. A. Gillies, of Port Daniel Centre, Que. The marriage will take place early in July.

Mr. and Mrs. James Armstrong, of Lachute Road, announce the marriage of their daughter Margaret to Mr. Eric Edward George Adams, of Plymouth, England. Wedding to take place on June 23rd.

Mr. and Mrs. Richard Hodge, of Westmount, P. Q., announce the engagement of their daughter, Maria Agnes, to Mr. Alexander B. Goodfellow, youngest son of Mr. and Mrs. Robt. Goodfellow, of Lachute, Que. The marriage will take place quietly early in July.

LACHUTE VOTES FOR LIQUOR COMMISSION STORE AND ALSO FOR DAYLIGHT SAVING.

Carries by 65 majority for Commission Store and 59 majority for Daylight Saving.

The two questions submitted to the electors last Tuesday have been dealt with and the town will now be able to boast of a liquor store and has also settled the vexed question of daylight saving.

There was little excitement around and much speculation as to results. The liquor question was many sided, some voting for the liquor store believing that if they did so it would of necessity be reason for the abolition of some of the hotels as Lachute is now equipped with 5 hotels and a beer store. However the East and Centre wards both gave majorities against the Commission but in favor of Daylight Saving, and it was the West End of the Town that afforded the surprise as it went strongly in favor of the Commission giving also a slight majority for Daylight Saving.

The following is an official result of the Voting which took place on Tuesday last, as to the opinion on the establishment of a Liquor Store in Town and on Daylight Saving.

QUEBEC LIQUOR COMMISSION STORE

	For	Against
West Ward	183	44
Centre Ward	67	135
East Ward	36	42

Total 286 221

Majority for Liquor Store 65

DAYLIGHT SAVING TIME

	For	Against
West Ward	118	113
Centre Ward	131	80
East Ward	42	36

Total 291 229

Majority in favor of Daylight Saving Time 62

GOES OVER WITH A BANG.

It was a most appreciative audience that gathered in the Auditorium on Friday evening last to enjoy the efforts of the Lachute Dramatic Society in their rendering the farcical play "It Pays to Advertise."

The entertainment was a perfect scream from start to finish and all the participants took their parts with the grace and skill of old actors long at the game, for there were no dull moments and every member proved a real genius in the portrayal of their varied characters.

The story was somewhat complicated and depicted a wealthy soap manufacturer, who with his private secretary had concocted a scheme to put his son on his mettle, instead of leading a shiftless life and depending upon his father's wealth. This was no easy task but Mrs. Geo. Leggett, in the double roll of lover and secretary, skillfully worked out the plans which afforded ample opportunity for real clever acting. Taunted by his father that he was unable to earn his own living, Mr. Kenneth McQuat as the shiftless son, got busy and with the aid of a Press Agent, which part was ably taken by Mr. (Bill) Blakey, they launched out into the soap business in opposition to his father. "Bill" was a great believer in advertising, and he convincingly advanced the successes of many firms of world-renowned import, who had amassed millions in their projects, which were directly attributable to advertising and "Bill" was confident that with a good trade mark they would meet with success in their undertaking. All sorts of ludicrous situations arose in which the audience were convulsed with laughter as they went through the consequent troubles of launching their undertaking, one of which was trying to obtain money from a French Countess. This role a somewhat difficult one was ably acted by Miss Ruby Rodgers, who in turn was trying to do the firm, but was caught in the act and so both cried Quits.

The climax came when the son sold out his rights to the old man for a substantial sum which enabled him to marry his sweetheart and make provision for his old-time chum "Bill".

The other members of the cast were Miss M. Jones and Miss E. MacKimmie who ably sustained their parts as also did Messrs. C. Duncan, A. Scott and R. A. Giles.

The attendance was most encouraging and the dramatic society are greatly pleased that their efforts have found favor with the public. It will doubtless spur them on to greater endeavour and it is to be hoped they will repeat this same play again as many requests have been made from a number who were unable to be present.

At the close of the play an invitation was extended to any who might wish to remain and enjoy the pleasures of an enjoyable dance. The local orchestra of Brownsburg and Lachute provided excellent music for the occasion.

Mrs. Melvin Burke who has been visiting her parents Mr. and Mrs. Wm. Doig for the past few months, returned home with her little son to Flint, Mich., on Thursday.

Mr. and Mrs. Lindsay Demerse, of Montreal, were the guests of Mrs. M. Demerse for the week-end.

THE YELLOW SEVEN. THE HUT IN THE CLEARING

BY EDMUND SKELL.
ILLUSTRATED BY
RALPH SANFORD

BEGIN HERE TODAY.

Peter Pennington, detective, is detailed by the government to capture the leader of the Yellow Seven, a gang of Chinese bandits. Captain John Hewitt, Commissioner of Police at Jesselton, British North Borneo, procures a warrant for the arrest of Hai-Chung, influential Chinese. Hewitt is captured by the Yellow Seven and Pennington goes to hunt for him. He is accompanied by Hewitt's beautiful sister, Monica Viney. Pennington learns that Hewitt's cook-boy is a member of The Yellow Seven.

NOW GO ON WITH THE STORY.

She tripped over a root that crossed the ill-marked path, and stumbled against him, gasping for breath.

"I'm so—sorry," she panted. "I—simply—can't—do it!"

Pennington steadied her with his arm, apologising profusely.

He looked up and saw that the guide had disappeared.

This was the first serious hitch that had occurred. Swearing softly to himself, he carried her the next thirty yards, rested her against a tree, and flashed his torch like a searchlight, sweeping it in all directions. Suddenly he plunged forward and caught the delinquent covering behind a thorn-bush. He drew the shivering Wong-See from his hiding-place, then kicked him with astonishing accuracy.

The remedy proved efficacious, for, throughout the final phases of the nocturnal expedition, Wong-See made no further attempt to elude his captor!

The guide stopped abruptly, dropping to his hands and knees, and Pennington, creeping up to him, extinguished the torch. Monica, her hands torn and bleeding, her neck and wrists and ankles so many itching zones where the thirsty blood-suckers of the jungle had taken their toll, felt herself forced from the main track by the sudden pressure of her companion's left arm. Ahead of them, scarcely twenty paces distant—a light flickered for a moment and then went out.

Pennington's lips, pressed against her ear, breathed two words: "Chai-Hung's sentry!"

Pennington's hand had left Monica's arm and a subdued, restless, yet constant something was going on at her side. Presently she felt a solid mass press against her and found that she was gripping the torch that Pennington had thrust toward her. She groped wildly in the darkness with her free hand. For a matter of seconds her heart stood still, for in the space where she had believed Pennington to be—there was nothing. Her fingers dropped suddenly to a warm, motionless body that lay prostrate at her side.

She withdrew her hand, shuddering inwardly, and somehow the torch flashed in the blackness, sending a bar of brilliant light straight down the track that stretched before her. She saw a huddled form, seated on what might have been a fallen trunk and then, before the creature surprised by the illumination—could bestir itself, a white-clad figure had sprung like a panther from the trees—and overwhelmed it.

She saw no more, for her thumb had found the switch and pushed it into place. She knew now that the form she had touched was that of the miserable Wong-See, who was effectively gagged and bound.

"Come on," said the voice of Pennington in her ear. "I fancy I've cleared the path."

She was beginning to understand the reason for her brother's deep-rooted confidence in this amazing man, with the strength and cunning of a primeval savage—and the table-manners of a prince!

So cautious were their movements after this that Monica felt prompted to cry aloud to laugh, anything to relieve the appalling monotony. A broad, squat shadow loomed presently in front of them, a tumble-down wooden

erection from which issued the sound of subdued voices. Pennington drew her along with him toward a spot where a light showed between the rotting timbers.

Crouching in the weeds that rose waist-high in the clearing, she peered through. In the centre of the apartment, around a broad stone slab, she counted seven Orientals. His back to her, clad in a gorgeous wide-sleeved jacket of dark blue silk on which was embroidered a many-headed dragon, sat an elderly Chinaman whose enormous proportions could belong to no other man she had yet seen than the arch-criminal whom Pennington sought to secure red-handed.

On the stone slab, like so many sponge-fingers, Chinese playing cards were spread face-downward, a yellow hand passing to and fro over the surface of the improvised table, sweeping the cards into a shapeless mass. Each drew a card except the man whose back was toward her, who sat motionless as a carved figure, silent and watchful as the sphynx. She saw the cards turned so that they formed the nucleus of seven pack, their converging circles of black and red showing clearly in the light of a hurricane lamp that hung, askew, from a beam. The light flickered and an arm shot up from the huddled group and raised the wick. For a moment it flared to the roof, illuminating every corner of the building, and Monica gasped. Half-hidden behind a log, his arms stretched out beyond his head, the wrists secured by leathern thongs, his knees drawn up almost to his chest, lay the Commissioner of Police. The head came slowly round and the prostrate man gazed inquiringly toward the squatting circle. As if realizing that she had seen, Pennington's fin-

A long blade flashed in the lamp-light.

gers closed on her arm and, at that instant, she realized the significance of those seven, ever-increasing piles of greasy cards. They were drawing for the Yellow Seven!

She closed her eyes to still the throbbing of her fevered brain. She opened them again, and, acting on a sudden impulse, glanced up at Pennington. He was kneeling on the soft earth, one eye to the narrower portion of the chink that served as a spy-hole, while the barrel of his automatic was thrust partly through the wider extremity of the aperture. She caught something of the infection of the calm that seemed to pervade his being, and locked back into the hut in time to see a tall Chinaman in black rise to his full length, a hideous grin illuminating his swarthy features, the Yellow Seven held aloft. The guttural chattering began again, the cards were swept into a neat pack, disappearing into the capacious sleeve of the man who had originally spread them out, and the hand of the Oriental who held the Yellow Seven slipped to his waist.

Every head was turned toward the Commissioner as a long blade flashed in the lamp-light, and the Chinamen, still petrified, rose one by one spreading themselves out along the walls; but the figure in the mandarin jacket, embroidered with a many-headed dragon, remained in precisely the same position as that in which Monica had first seen him.

The tall Oriental in black drew back his sleeve and tested the blade with a grimy thumb. A sudden hush fell upon the entire assembly and the girl, cramped and trembling, became aware of the ticking of the watch at her wrist. In all this ghastly nightmare, these ceaseless, regular pulsations rang out as the sole links with the normal existence she had left behind her. She tried to think of the bungalow on the hill, the long cane

chairs with their many cushions, the winding path that led, ribbon-like to the road, the wooden jetty where the coasting steamers lay at anchor; but these phantom creatures refused to materialize and her eyes, sore and tingling, gazed straight before her, fixed, because she was powerless to withdraw them, upon whom the lot had fallen to destroy her brother.

Someone came forward and threw aside the log, and the hand that held the knife swung suddenly aloft.

Pennington's pistol broke upon the stillness. The man with the dagger spun round awkwardly—and collapsed in a heap. Cries of terror resounded on every side, and a hand, reaching upward, plunged the building in darkness.

Monica and Pennington rose simultaneously.

"Stop where you are," he called back to her. "Lie close up to the wall. They'll be too scared to look for you there."

He raced on toward the entrance and Monica, too dazed to catch the meaning of his words, followed in his wake. As she stumbled through the undergrowth she remembered that she still carried the torch. Vague shadowy forms slithered past her, stampeding as if surprised by a regiment of soldiers, rather than by one white man and a girl. She heard them crashing away into the distance and somewhere a man screamed in mortal terror as he ran, as if fearful that the friend who strove to keep pace with him were the avenging Englishman seeking his life.

As their footsteps died away, Monica switched on the torch. The door of the building stood wide open before her and she let the light travel from left to right, from Pennington kneeling over something on the floor to the huddled heap that sprawled awkwardly within a foot of where her brother lay. She ran forward with a little cry and fell on her knees at his side. She was reaching out for the knife the Chinaman had let fall when Pennington fired, when a voice called to her from the darkness.

"Monica!—er—Mrs. Viney!—Just switch that light over here a second. There's something I don't quite understand."

The Commissioner stirred and his eyes blinked up at her.

With shaking hands, she steered the narrow ray until it concentrated on the disgusted features of Pennington, who was slowly rising to his feet from the thing over which he had been kneeling.

She saw a preposterous effigy, a cunningly contrived figure of straw, with china mask and hands, over which a coat of blue embroidered with a many-headed dragon was still drawn!

Light Fiction Waning in Britain Is Report of Public Librarians

Shaw, Barrie and Masfield Brought Into "Lighter Serious" Category, While Technical Works Such as Engineering Are Found to Be in Increasing Demand

London—Is the reading of light fiction on the wane in England? There are growing indications that it is and that, in place of the light novel, the public is showing an increasing demand for more serious books.

Public librarians in London, Hampstead, Hackney, Chelsea, Shoreditch, and Middlesbrough agree that book-borrowers are evincing a higher taste in literature and that best sellers do not pull so strongly as they did right after the war. Thus at Middlesbrough, for instance, the percentage of fiction issued from the library in 1927 declined from 71.5 to 61. Moreover of 7447 new borrowers, 1309 took out tickets for serious or non-fiction works.

Guy W. Keeling, honorary secretary of the Library Association, said: "There is no doubt that the public is reading more and more serious books. This applies particularly to technical and educational works. Improved education is doubtless responsible."

M. Marsden, secretary of the National Book Council, said: "This desire on the part of the reading public for more serious works has arisen since the war. Educational and travel books are more commonly asked for. Works on engineering and like subjects are much in demand."

A Scottish Reel at a French Court

When I was seventeen, and before I had been presented, my father suddenly announced that I was to accompany my parents to Compiègne on a visit to the Emperor Napoleon III. The Emperor when a fugitive in England had accepted my father's kindness and hospitality, and the Prince, as he was then, in taking leave of him said: "I shall greet you next time at the Tuilleries." People smiled at the idea, but the penniless adventurer of those days was now the all-powerful Emperor and had not forgotten his old friends. I was overjoyed at the idea, but very shy at the prospect of my debut in a palace at a court reputed to be very magnificent.

On arrival at Compiègne, carriages with postillions and a pair of gray horses called "Percherons" awaited us. These Normandy horses are very neat, sturdy, and handsome, and capable of a great deal of work. The grand chamberlain received us, and ushered us to our rooms. Mine was splendidly decorated, hung with yellow satin, and furnished with Empire tables and chairs. I had never seen anything so grand, and wondered how I should sleep in that gorgeous yellow satin bed with its fat inviting pillows and soft mattresses. . . .

My mother had thoughtfully provided me with some lovely dresses from Worth, the great dressmaker, and with the confidence born of youth I experienced a great satisfaction in my appearance. At the appointed time we all assembled in a big drawing-room hung with many chandeliers, whose light was soft and becoming, the room blazed with pretty, well-dressed, bejeweled women, and men in various uniforms wearing glittering stars and orders. After a slight pause, the Emperor and Empress were announced. Into this galaxy of beautiful women stepped the Empress like a star, overshadowing all present with her graciousness, her brilliance, her dazzling presence. In that court one could only look at her. She was the Queen of Beauty, and as gracious and kindly as she was lovely. We proceeded in to dinner, down the corridor lined with the motionless "Cent Gardes," splendid specimens of men in their magnificent helmets and uniforms. The table was long, there might be fifty guests present. The Emperor and Empress sat opposite each other in the middle, while priceless silver and gold dishes glittered on the table. The meal did not last long, though the food was perfect, the supreme effort of the best French chef. . . .

The Empress said she would like to see a reel danced, and—as by a strange coincidence Lord Dunmore, another guest, and myself were both Scotch, would we kindly dance one? So to the music of the barrel organ we danced. It was certainly not imperial music, but it served, and I hope every body professed themselves delighted. The women stared, the men applauded, even the saturnine Emperor smiled, especially at the strange whoops and cries emitted by Lord Dunmore, who was a first-rate reel dancer, and whose intricate steps were faultless. The French ladies opened their eyes wide at the sight of our vivacious dancing. "C'est tres sauvage," they said. "Mais c'est tres

"SALADA" TEA

855

Never before has such care been used in preparing teas for the public. Never before has such a blend of high quality teas been made, as in "SALADA". This flavour, this unfailing deliciousness is bringing pleasure to millions.

interesting," as we halted breathless, and I believe they enjoyed it thoroughly.—Lady Violet Greville, in "Vignettes of Memory."

By the Far Indus

Prehistoric Cities, 6000 Years
Old, Have Been Discov-
ered in Basin of the
Indus

Bombay—Remains of prehistoric cities, which flourished in the basin of the Indus in the third and fourth millennium before Christ, have been discovered at Harappa and Mohenjodaro. The work which is in progress at these sites will, it is anticipated by archaeologists, add a fresh chapter to the knowledge of the history of a civilization of almost unsuspected antiquity.

In this connection much importance is attached to the recent opening of the Archaeological Museum at Taxila, on the northwest frontier, by Sir Muhammad Habibullah, member of the Viceroy's cabinet. This museum occupies a unique place as a representative storehouse of the relics of an ancient center of learning, wealth and power.

The museum owes its existence to certain improvements in the methods of excavation initiated by Sir John Marshall. Previous archaeologists, after staking some scanty pits and trenches upon ancient sites in Taxila, concluded that further excavations would yield no results.

When, however, Sir John Marshall assumed charge of the archaeological department in 1902, he introduced new methods, and his success is evidenced not only by the Museum, as Sir Muhammad Habibullah pointed out, but in the fine collections of relics of many fascinating phases of India's history.

Empire Settlement

London Sunday Times (Cons.): (An act amending the Empire Settlement, 1922, provides that, on suitable schemes for emigration, the whole of the money required may be charged to the Imperial exchequer, not, as in the past, evenly divided between the different governments.) We are now spending out of national and local taxation vast sums of money on maintaining persons who cannot find employment in this country. Many of them, particularly in the mining districts, are healthy, vigorous men, perfectly suited to work overseas and probably capable of very quickly picking up the essential requirements of agricultural work. Indeed, it has to be remembered that during the war many agricultural laborers drifted into the mining industry and among these are many who are now unable to find employment in the coal areas. Therefore it would be worth while from the financial point of view alone for the Government to devote very large sums of money to assisting emigration, provided that sound schemes can be arranged.

Ontario Watches Flooded Districts

Toronto.—Hon. Forbes Godfrey, Minister of Health, has sent an official of his department to the northern flood area, to confer with Dr. W. E. George, district officer of health at North Bay, with a view to taking such steps as may appear necessary to prevent any epidemic that might otherwise follow the abatement of high water, through pollution of drinking water or other causes.

The Harley-Davidson Single Cylinder Motorcycle is the greatest little machine that has been made. Safe to ride, easy to control, and most economical. Stands without a rival. 100 Miles to Gallon of Gasoline. Down Payment \$105, Balance \$22 per month for ten months. Price \$305. Walter Andrews, Limited, 346 Yonge St., Toronto, Ont.

Canada and the United States

Calcutta Englishman: Anglo-American relations are on a wholly satisfactory basis; but, however satisfactory they may be, the additional binding influence of the amity between Canada and the United States will always be welcomed. Why one of the Empire's assets in international dealings should be regarded as a potential source of weakness is a point that is difficult to understand. Still more incomprehensible is the need for any discussion of the possibility of Canada and the United States amalgamating. At the best the suggestion of such an event can do no good; at the worst it might prove a source of irritation to the Canadian people.

Australia's War Memorial to Teach the Lesson of Peace

All aspects of the Glorification of Arms Is To Be Avoided—
Object Will Be To Emphasize War's Sufferings
and Hardships

Canberra, Aust.—Australia's national war memorial will take the form of a War Memorial Museum which will be erected at Canberra, the federal capital, at a cost of about £250,000. Though it will contain a priceless collection of war relics and records of the achievements of the Australian Imperial Force during the Great War, the intention is that every aspect of the glorification of war shall be avoided, and that in collecting and classifying the articles and records in the museum, the object will be to show the hardships and sufferings of the war period.

In this way it is hoped to make the memorial a monument which will teach a lesson of world-wide peace. A special committee of the Federal Parliament is at present investigating the project, and important evidence was recently given before it by Mr. Charles E. W. Bean, official war correspondent for Australia, and editor of "The Official History of the War."

Describing the plans of the proposed building, Mr. Bean explained that the building would be one of monumental beauty on a site on the slopes of Mount Ainslie. From this position it will be visible from every part of the federal capital city. It would resemble somewhat Napoleon's Tomb in Paris. A feature of the building would be at the Hall of Memory in which will be inscribed the name of every Australian soldier who had fallen in the war, including Australians who had fallen while serving with other allied forces. The ranks they held would not be shown.

It is expected that the staff engaged upon the task of classifying the records will be occupied for three years upon this work. The British, French,

Canadian, German and Turkish Governments have so far offered access to their records for this purpose. The German Government, in particular, has been most courteous in allowing the Australian authorities access to all its records and photographs.

On the ground floor of the building will be rooms for the display of maps, famous war messages and personal relics, and in order that these might be kept in the best possible state of preservation, the authorities have been in communication with the savants engaged in the task of preserving the relics taken from the tomb of Tutankhamen in Egypt. There will also be courts containing naval displays, relics from Gallipoli, Palestine and the western front, an airplane court, and one containing a number of actual war models. At a conservative estimate, the value of the pictures which will be displayed will be about £50,000.

Only a sufficient number of guns to show the different types used in the war will be shown. One of these will be the large 15-inch gun which was formerly on view at the Central Railway Station in Sydney. This was the German gun which caused most of the damage to the city of Amiens, and it was captured by the British Air Force, British Cavalry and the Australian Infantry.

Most of the exhibits which will be in the museum have already been displayed alternately in Sydney and Melbourne, and it is estimated that they were visited by 800,000 persons in Melbourne. Since they have been in Sydney 1,250,000 visits have been made.

Those who have seen the exhibits agree that nothing could more strongly teach the lesson of peace.

Reducing England's Taxes

WINSTON CHURCHILL on his way to Westminster.

Says Immigration Laws Too Strict

English Editor Urged Changes
in Medical Inspection
System

Winnipeg—Many British persons who are willing to migrate to Canada are held back through the rigidity of the system of admission to this country, according to Edward Salmon, editor of the United Empire, and Fellow of the Royal Institute, who arrived here recently.

A more satisfactory system of medical inspection would have to come before there could be realized the necessary and possible flow of British settlers to this country, Mr. Salmon said. The present system of medical inspection by a few Canadian doctors in the Old Country, penalized those in outlying districts and made it prohibitive for them to journey in to be examined.

Mr. Salmon serves on a central immigration committee, representative of 30 British organizations all actively engaged in immigration.

Keep Prince Carol Out

Washington Post: The British Government has invited Prince Carol of Roumania to leave England, and it is reported that he intends to come to the United States. . . . If Prince Carol should attempt to enter the United States he should be turned away. The hospitality of this country has been too often abused by foreigners plotting against governments friendly to the United States. The Government has been entirely too lenient in dealing with aliens who come here solely for the purpose of carrying on conspiracies.

Our idea of a companionate marriage is one that has reached its golden wedding day.

Radium Poisonings May Not Be Fatal

Doctor Says Five Poisoned
Women May Regain
Health

Newark.—In a report of Dr. Frederick B. Flinn, of the staff of the college of Physicians and Surgeons at Columbia University made public recently, it was disclosed that the five women suffering from radium poisoning, who are suing the United States Radium Corporation for \$1,250,000, may not die and may regain a certain measure of good health.

The report, which was written at the request of Chancery Court, made clear that all the women had been poisoned by radium, as they claimed. This was shown by the reduction of white corpuscles count of their blood, a condition which lowers the normal body resistance to infection and causes softening of the bones.

Dr. Flinn said that radium poisoning does not necessarily cause death, though persons suffering from the disease may become weakened and possibly maimed.

Safety in the Air

Boston Transcript: Despite the tragic accidents which still occasionally occur in the air, the safety record of the numerous regular air services daily plying from city to city both in Europe and in the United States has been remarkably good. Over many of the established routes the percentage of mishaps has been less than that shown by the railroads. This good record is due, of course, to the care taken in the choice of pilots, to the excellence of the equipment and to the adequacy of the force of mechanics at the ground stations to make sure that the equipment be always in order.

Edmonton Graduates Have a Fine Basketball Record

Commercial Class Team, First Formed in 1914, Has Played
Since—Team Has Won 43 Games Out of
57 This Season

Edmonton, Alta.—In the series for the women's basketball championship of Canada the Commercial Graduates' team of Edmonton, Alta., enters with a remarkable record. Not long ago it played two exhibition matches against the Toronto Lakesides, considered one of the strongest eastern teams, and won the series 62 to 49.

The grads' record of 32 successive victories in Edmonton and the winning of 11 out of 14 games away from home, marks their coach, J. Percy Page, as one of the most successful basketball coaches in Canada, if not in the world. It is truly remarkable how, since 1924, he has kept the team up to a championship caliber each year. The critics claim that this year's five, which meets the University of British Columbia in the western finals, is the strongest and best-balanced aggregation that has ever represented the capital city of Alberta.

In a recent match with the Chicago Brownies, in defense of the Underwood International Trophy, the Black and Gold proved every regular and every substitute to be a star.

The Misses Gladys Fry, Margaret McBurney, and Mildred McCormack left the opposition amazed by their industry, speed and accurate shooting. In the final game the graduates came from behind in a spectacular rally to win the series, 70 to 35.

First Formed in 1914

In 1914 two commercial classes, about 60 pupils in all, entered a team in the Edmonton High School basketball league. At that time there was no gymnasium in the school, and with only a rough outdoor court at their disposal, the girls were not counted upon to furnish much opposition to the other high schools. The surprise was general, then, when they won every game in their schedule.

Encouraged by its success, the team entered a newly formed intercollegiate league, which included the University of Alberta and Alberta College. It again won the title and, not satisfied, defeated Camrose Normal School 13 to 7 to acquire the provincial championship.

When graduation threatened to disorganize the team, a Commercial Graduates' Club was formed. Miss Winifred Martin, the captain of the original team and a very brilliant guard, remained at the helm for nine years, except for one season, when she was in the East completing her education.

Challenge Shamrocks

Although, as seniors, their competitive field was reduced considerably, they found sturdy opposition in the University of Alberta, and finally, in

1922, they considered that the time was right to seek higher honors. The Shamrocks of London, Ont., were at that time claiming the Canadian championship, without a remote thought of opposition in the West.

So, although financial difficulties prevented their taking more than one substitute, the Westerners made their invasion. They won the series and the title by a score of 49 to 29, displaying a system of combination which London sport writers admitted had never been equaled in that city.

After that the Black and Gold began to be appreciated at home, and so their financial difficulties ceased. In the East there were still some skeptics, as the London game, under which the Graduates had piled up their big lead, had been played under their own rules. This time the Shamrocks visited Edmonton. Two reverses, 17 to 6 and 32 to 20, both under their own rules, convinced them.

Beat Cleveland Team

The next ambitious step of the Edmonton team was to challenge the Cleveland Favorite-Knits, who claimed the world's championship. At the resulting series in Cleveland, 5,000 spectators were thrilled when the little-known westerners not only held their own, but actually outplayed the home team 51 to 25.

Since that they have easily defeated teams from Toronto, Warren, Chicago and Cleveland, their hardest battles being against the Chicago Brownies some years ago.

Although they were now sure of the Underwood International Trophy, they hesitated to claim world-wide honors. A trip to Europe was the result, and it ended without a loss. The Olympic Games Committee did not think it necessary to include women's basketball on the list of competitive sports so the visitors had to be content with exhibition games.

Opposition Is Weak

European basketball had not been popularized until the arrival of troops from the Western Hemisphere, so that the opposition provided by the all-star teams of Paris, Strasbourg, and Roubaix was rather weak. In six engagements the Black and Gold piled up a total of 360 points to its opponents' 47.

On the return trip, the team lost its captain in Montreal, and since then there have been many changes in the lineup. In fact, the team which contends for this year's Canadian honors does not contain a single member of that 1924 combination, but for all that the Dominion trophy has not changed hands for six years.

Canada Firms May Bid for Warships

Canadian Shipyards Get
Chance to Build New
Destroyers

Ottawa.—It was learned that the calling for tenders for two new destroyers for the Canadian Navy, included or as has been made to include, bids from Canadian shipyards such as are equipped for construction of this sort.

There are plants, notably the Canadian subsidiary at Montreal of a large armament firm, where such craft could be built although, relatively, the cost would be considerably higher than in Great Britain.

In any event, the call for tenders now extends to Canadians as well as British naval builders. The outlay will be about \$3,000,000.

The average New Zealander has \$3,374.70. The average Canadian has a \$3,371.70 car.

Actually "On The Rocks"

STEAMER CAME TO GRIEF ON THE COAST OF BERWICKSHIRE

The S.S. President of Sunderland became a total wreck when she ran ashore at Eyemouth during a dense fog in the early morning. The crew, numbering 22, scaled the rocks in the darkness and reached safety.

The Democratic Candidate

Springfield Republican: Governor Smith represents the Catholic demand for political equality in America regardless of religious faith. . . . He represents especially the population of the cities and the newer immigration that has so hastened the urbanization of the United States. It was the Democratic party that first was hospitable politically to immigrants, and, through their adhesion, made itself powerful in so many of our largest eastern cities.

Politics Interfere With Penitentiaries

General Hughes Wants the
Two Operated Under Same
System As R.C.M.P.

SENDS IN REPORT

Ottawa.—The recommendation of Brig.-General W. St. Pierre Hughes that those in charge of penitentiary administration should be empowered with authority to administer and discipline on similar basis to that of the Royal Canadian Mounted Police has created much interest in Ottawa, and the annual report of Superintendent Hughes is perused this year with more than usual interest.

General Hughes makes eight other recommendations, but these are along the lines for which he has been pressing for many years and are plank in his platform of prison reform in Canada. The administrative recommendation is a new one and is believed by many in the capital to be an effort to get the penitentiary staffs out of politics.

General Hughes will not discuss the matter beyond the recommendations in his report, but there has been talk in Ottawa for some considerable time that politics have been pitch-forked into the penitentiary administration and that appointments are being made on political grounds rather than on efficiency and fitness for the service.

Crowds and Mobs

London Observer (Ind.): The term "mob," once the commonplace of alarmist reaction, has now vanished from our political vocabulary. Democracy, tolerant of so much, cannot admit mob rule. The Communist is the ringleader of the mob, but the democratic hero heads a crowd, and it is because our greatest gatherings are always crowds and never mobs that the hope of constitutionalism in this country is . . .

Nature makes mistakes, but she never arranges the bloom of youth near the nose on one side and close to an ear on the other.

FREEDOM OF THE AIR

It may well be that the religious
organization which has been denied
the renewal of its license to broad-
cast has made itself obnoxious to
people who disagree with its doc-
trines, but whether that is a justifica-
tion for the action of the Federal
Government in refusing such renewal
on these grounds is another question.
Unless it is laid down that no reli-
gious doctrines shall be propagated
by means of the radio, for which per-
haps something might be said, it
amounts to discrimination when one
"omination or sect is forbidden the
right to broadcast from its own sta-
tion. In these days of religious tol-
eration, when all of us are learning to
have sympathy with the other fel-
low's viewpoint and, where we can-
not agree with it, to give him full,
unfettered right to hold and proclaim
it, it seems almost like a reversion
to the Dark Ages to say to any re-
ligious sect, "Thou shalt not proclaim
thy message."

The right to worship God without
let or hindrance from any man, and
the essential freedom of speeches
which accompanies such right, is too
precious a thing to be curtailed or
destroyed by any government simply
because a number of people express
a dislike for the mode of worship or
the message spoken. To argue in
justification of such a course, as has
been done, that people with radios
are compelled to listen to objec-
tionable doctrines is equivalent to
saying that motorists are under com-
pulsion to attend churches against their
desires because they have automob-
iles to transport them to the church
doors. No radio owner is compelled
to listen to anything that is broad-
cast else would many people rise up
in wrath demanding the suppression
of jazz. If people do not wish to
hear a sermon or jazz when being
broadcast they need not tune in.

Let us imagine what may happen
in two cities of Canada if this action
of the Government is allowed to
create a precedent. Montreal is pre-
dominantly Roman Catholic; Toronto
overwhelmingly Protestant. Suppose
the Roman Catholic Church in Mont-
real were to demand the suppression
of all Protestant broadcasting. What
would Protestant Toronto have to
say about it? Or imagine what
would happen if the Roman Catholic
Church in Toronto were to broadcast
sermons and the Protestants there
demanded the cancellation of its pri-
vilege to do so. We should have a
state closely akin to civil war as a
result. Such a condition is not de-
sired in Canada. We are living very
happily together in spite of diverg-
ing views on God and immortality.
There must remain in Canada as part
of our British heritage of freedom,
the utmost spiritual liberty, but there
can be no real liberty when any gov-
ernment may take upon itself the
power to interfere with any religious
body's activities, however repugnant
its doctrines may be to people of
other views.

CUSHING.

Mr. and Mrs. T. Ranger have taken
up residence at Greece's Point.

Mrs. Dr. Painter, of Knowlton,
spent a day or two last week with
her sister, Mrs. S. O. Hartley.

Miss Marion Harcourt, of New
Glasgow, spent several days this
week visiting Mr. and Mrs. R. Pinker-
ton.

A number of men from Greece's
Point are employed at present on
the construction of the new golf
course at St. Andrews East.

Mr. Leonard Young and his friend
Mr. Frank Rowan, of New York, ar-
rived on Wednesday and will spend
some time at Mr. Young's residence
near Greece's Point.

Mr. and Mrs. Buckley and family,
of Montreal, motored up and spent
Sunday at Mr. F. Gaston's. Mrs.
W. Coombs, of St. Philippe, was
also a guest of her sister, Mrs. F.
Gaston on Sunday.

Mr. and Mrs. Allan Corner, of Mont-
real, visited their aunt, Miss Corner
at Mascot Lodge, on Saturday after-
noon, while Mr. and Mrs. Charlton,
of St. Johns, Que., were motor guests
at Mascot Lodge on Sunday.

Mrs. S. O. Hartley had as week-
end guests her daughters, Mrs. C.
B. Cutten and Miss Olive Hartley
also Mr. and Mrs. Douglas Hartley
and son Kenneth and Mr. Wilfred
Hartley and Mr. Parker, all of whom
came up from the city by motor.

Mr. and Mrs. T. Weir and daugh-
ters Helen and Dorothy, accompanied
also by Mr. Gordon Higginson, of
Hawkesbury, left on Friday last by
motor for Thorold, Ont., where Mrs.
Weir and children will spend some
weeks with her sister, Mrs. Hender-
son Weir and her brother Mr. P.
Nicholls.

The people of Cushing and vicin-
ity learned with regret of the death
which occurred at his home in King-
ston on Wednesday of this week of the
Rev. Dr. Donald Ross, for many
years a pastor of St. Mungo's
Church, and who is remembered with
much affection and esteem by the
older members of this community.

Rev. and Mrs. Wm. Usher, of
Campbell's Bay motored to Cushing
last week, where the latter was the
guest of her mother, Mrs. Jas. Wat-
son while Mr. Usher attended Con-
ference in Montreal. They returned
to Campbell's Bay on Tuesday of this
week, accompanied by Mr. F. Keatley
Miss Lois and Mr. Owen Keatley, of
Montreal, visited their mother her on
Sunday.

RAWCLIFFE.

Mr. Ernest Nixon has purchased
an Overland Car.

Mr. Roy Frost called on Mr. Wm.
McGillivray last Tuesday.

Mr. A. Calder is spending a few
days with Mr. R. A. Bigelow.

Mr. Walter and Mrs. T. H. Gauley
called on Mrs. C. Gauley on Satur-
day.

Mr. and Mrs. Hugh McGill and Mr.
T. Loughren spent Sunday with Mrs.
E. Nixon.

Mr. Wm. McGillivray and Miss O.
E. McGillivray motored to Lachute
on Wednesday.

Mr. and Mrs. James Ogilvie, of
Grenville, spent Sunday with Mr. and
Mrs. T. A. Gauley.

Miss Olive McGillivray and Mr. I.
Prophet were the Sunday guests of
the Misses M. and J. Kelly.

Mr. Laughlin Campbell, Miss Kate
Lee and Master Gordon Nixon were
the Sunday guests of Mrs. M. Mc-
Gillivray.

Mr. Wm. Campbell, Miss Agnes
Campbell, Messrs. Gordon and Laugh-
lin Campbell called on Mrs. M. Mc-
Gillivray on Tuesday.

We are pleased to see a nice "Un-
ion Jack" floating over our school.
Thanks to the efforts of Miss Whin-
field and her pupils.

CUSHING.

Miss Alice Davidson spent Monday
of this week in Lachute and St. An-
drews East.

Mr. D. V. Cameron and son Peter
were the guests of Mr. and Mrs. W.
Burke on Sunday.

Miss Ruth Dobbie and Mr. H. Mc-
Comb, of St. Chrysostome, were
week-end guests of Mrs. B. Dobbie.

Mrs. A. Graham spent a few days
in Montreal last week and attended
the graduation exercises at MacDon-
ald College.

Miss Hope Cushing and friend
motored from Montreal Sunday and
visited her aunt, Mrs. W. King. Mrs.
Lochead, of Montreal, was also a
week-end guest.

The Misses Mollie and Edna Fore-
man, Mr. Cuthbert Foreman, and Mr.
Alvin Combs, of Calumet, paid a
short visit at the home of Mr. and
Mrs. A. Graham on Sunday.

The Seven Cushing Ladies who
took part in the play the Uplift So-
ciety in their Concert May 23rd, are
invited to repeat their play in Gren-
ville, in Danseur's Hall, on the
night of June 26th, in aid of the
Grenville United Church and hope a
goodly number of Cushing people
will be there.

Mrs. W. Y. King left on Tuesday
evening for Kingston, to attend the
funeral of her uncle, Rev. Donald
Ross, D.D., formerly Principal of
Queen's Theological College, whose
death occurred rather suddenly on
Tuesday, June 12th, in his 91st year.
The Rev. Donald Ross was the much
beloved pastor of St. Mungo's Church
Cushing, from 1865 to 1878, his first
wife, Mary R. Hill, died while he
was in charge in Cushing and a mem-
orial tablet to her memory was erec-
ted in the Church. His second wife
was Lydia Maria, a daughter of Lem-
uel Cushing, Esq., of Cushing, and
widow of Robert Deveridge, of
Houghton, Mich., who predeceased
her husband some few years.

On leaving Cushing, Dr. Ross went
to Lachute, where he remained a
minister till he was appointed Pro-
fessor in Queen's College in 1883. In
1912 he became principal which posi-
tion he held till 1917, when he re-
signed, owing to failing health.

Dr. Ross is survived by two daugh-
ters.

GRENVILLE BAY.

Miss Keegan is the guest of Mrs.
Brechin for a few days.

Mrs. Harold Gill and Mrs. Lloyd
visited Mrs. Grey last week.

Sunday visitors at Mrs. T. H. Greys
were Mrs. Gladys Grey, Mr. Arthur
Proudfoot, Mrs. J. Cleland and her
two sons Harold and Grant, of Mont-
real.

Miss Lois White was a welcome
guest at the home of Mrs. Grey on
Sunday.

Mrs. John Moncrieff and her son
George were recent visitors at Mrs.
Brechin.

The Ladies of St. Giles were en-
tertained at the home of Mrs. H.
Gill on Wednesday.

Mrs. James Carson who has been
ill for some time has gone to Mont-
real for treatment. We hope for a
speedy recovery.

Sunday guests at Mrs. Brechin were
Mr. David Brewer and daughter
Phyllis, Mrs. Ekin, Mrs. Berman and
Mr. Beverly Berman, all of Montreal.

Miss Grace Moncrieff, of Smith's
Falls, who has been visiting her moth-
er in Brownsburg, called on her uncle
and aunt, Mr. and Mrs. J. Brechin
this week.

Here and There

British Columbia's forest rangers
and patrolmen report a reduction in
forest fires costs of practically 90
per cent, compared with 1926. The
total loss this year was about \$214,-
000.

An air line between Halifax and
New York city for freight, express
and mail, is being considered by
Halifax business interests, accord-
ing to a report made to the United
States Department of Commerce by
Consul Eric W. Magnuson.

The Canadian Pacific Express
Company has extended its service
into the new gold field of north-
western Quebec, reaching Rouyn
over the recently completed exten-
sion of the Nipissing Central Rail-
way. This extension provides a
new and short route into the rapidly
developing mining area.

Turkey raising is a coming in-
dustry in Alberta as a number of
successes at various fairs would in-
dicate. A recent move in this con-
nection is the formation of the Al-
berta Bronze Turkey Breeders' As-
sociation, which is now active in
promoting and extending the turkey
breeding industry.

According to Dr. J. B. MacDou-
gall, Assistant Chief Inspector of
the Ontario Provincial Department
of Education, the operation of the
Canadian Pacific school car in
northern Ontario has proved a more
successful venture than the Depart-
ment had ever expected. He stated
that the progress of the pupils dur-
ing the year of operation has been
remarkable.

The Western Canada Grain Pool
contemplates spending \$5,000,000
during the coming year in exten-
sions to facilities in country eleva-
tors and terminals in Western Can-
ada, according to George H. McIvor,
General Sales Manager of the Pool,
on a visit to Toronto recently. The
building programme includes 100 or
150 country elevator in Alberta; 150
in Saskatchewan and 40 in Mani-
toba. At present there are 160 in
Alberta, 730 in Saskatchewan and
50 in Manitoba.

Trout and Salmon Await Anglers' Flies

With winter snows dispersing
rapidly and ice dissolving into
lakes and streams; with the rising
of sap and budding of trees,
memories of anglers awakened pic-
turing streams where one would
wish to fish, days

"When even the deep blue
heavens look glad,
And gladness breathes from
the blossoming ground."

The waters of Nova Scotia, New
Brunswick, Quebec and Ontario
have all their devoted followers
waiting for the ice to disappear.
These anglers are always eager to
try new fishing grounds, and they
will have new waters this year,
according to Wm. Barber Haynes,
writing in "Outdoor Life and
Recreation." The latest bid for
the favor of the sportsman is the
opening of part of that famous
salmon river, the Restigouche, to
any sportsman who can pay a sum
for a day's fishing. Heretofore, it
has been impossible for anybody
to fish the Restigouche unless he
rented fishing water for a term of
several years. Now the province
has made it possible for men in
ordinary circumstances to put up
money enough for the realization
of anglers' dreams—a week's fish-
ing for the salmon of the Resti-
gouche in New Brunswick.

The season for salmon in New
Brunswick is from May 24—
September 30. In the Restigouche
River and its tributaries, such
fishing is permissible from April 1
to August 15 only; the limit is
30 per week. The salmon season in
Nova Scotia is from February 1
to August 31.

Quebec's trout streams are many
and widespread, and are easily
reached making them deservedly
popular both with Canadian and
American fishermen. Satisfying
sport is to be had in the streams
in the Lake Edward district north
of Quebec City. The Province of
Quebec has a wealth of attraction
for the sportsman. No portion of

the North American continent is
more richly endowed with fish and
game. The innumerable rivers,
streams, lakes and great stretches
of forest offer an almost bewildering
selection to the man planning
a hunting, fishing or canoeing trip.
The trout season in Quebec prov-
ince is from May 1 to September
30 for speckled trout, and from
December 2 to October 14 for the
lake trout.

Ontario's most celebrated trout
country embraces rivers and
streams north of Lake Superior
whose names many anglers are
already familiar with. In this sec-
tion special bungalow camps are
at your service, operated by the
Canadian Pacific Railway, they
afford every advantage of an out-
door life just slightly lightening
the hardships especially for those
who wish to have greater comfort
than a tent and camp outfit
affords. The season here opens
May 1. Distant fields are always
green, and distant streams appear
more green, while pools grow
darker as imagination pictures
fishing days in spring.

Orme Limited, in collaboration with leading Canadian piano manufacturers, introduce to Lachute and district music lovers new art creations in piano designs. This presentation reveals an entirely new idea in piano craftsmanship. No longer do you need a large cumbersome instrument to enjoy the pleasures of a piano, for in the "Prince of Wales" and the "Princess Pat" Pianos the size has been reduced to conform to the present day tendency to compactness and economy of space. Yet this has been achieved without sacrifice of tone. You owe it to yourself to see these magnificent examples of modern piano construction.

WHEN BETTER AUTOMOBILES ARE BUILT—McLAUGHLIN-BUICK WILL BUILD THEM

The Only Car with a Sealed Chassis—fully guarded against dirt, dust and moisture—and offering protected performance

IT is the fashion of the day to place first importance on motor car beauty; and for this the alluring beauty of McLaughlin-Buick's smart, low-slung bodies by Fisher is largely responsible. But keep in mind that you get many things besides beauty when you buy a McLaughlin-Buick. You get unequalled riding ease—vibrationless performance—and above all the unique reliability of the world-famous McLaughlin-Buick Sealed Chassis and Triple-Sealed Engine.

Every vital part of the McLaughlin-Buick chassis is enclosed in dirt-proof, dust-proof, water-tight housings to assure reliability and long life.

And McLaughlin-Buick's proved Valve-in-Head Engine is fully guarded by crankcase ventilator, air cleaner, oil filter and gasoline strainer.

McLaughlin-Buick is the only car offering this twin feature as well as protected performance under all road and weather conditions.

Admire McLaughlin-Buick beauty—but insist upon McLaughlin-Buick dependability. It's a wonderful thing—even in these days when all cars are assumed to be dependable.

The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

ARGENTEUIL MOTOR SALES,

Lachute, Que.

McLAUGHLIN-BUICK for 1928

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

"Establishing A New Standard in Automobiles"

THE DURANT 75

FAST, sustained driving of a Durant "75" involves a minimum of motor energy and a consequent lessening of nerve tension on the part of the driver and passengers. This most desirable modern feature is made possible through the employment of a transmission having four forward speeds.

The high compression Red Seal Continental Motor provides acceleration and speed in excess of all ordinary requirements while the long, low-gravity chassis and scientifically constructed spring suspension ensure riding comfort that is positively luxurious.

In the design of the Durant built Hayes-Hunt body and in the quality of the interior finish and appointments, the demands of the most discriminating have been anticipated.

Drive the Durant "75" . . . to-day if you wish . . . experiment with its power and speed and with its Bendix 4-wheel brakes. Compare it with other high grade automobiles.

Built by Durant Motors of Canada, Limited, Toronto, Canada

WELDEN BROS., Dealers, Calumet and Lachute.

ST. ANDREWS EAST

Mr. Conrad Harrington was in St. Andrews last week.

The W. A. met at the home of Mrs. John Fraser on Thursday.

The Women's Guild met in the United Church hall on Thursday.

Mr. Willie Perks and three friends were at his home here for the weekend.

The Rev. Mr. Ballantyne and Mr. Jas. Ballantyne spent Wednesday in St. Andrews East.

Dr. Ingleby and her mother, of Philadelphia, are guests of Dr. M. Abbott for a few days.

The Rev. J. Macaskill was in Montreal, for several days, attending the second Montreal-Ottawa Conference of the United Church of Canada.

Master John McClintock, the recently arrived son of Mr. and Mrs. Bernard McClintock, was christened on Sunday in the United Church by the Rev. J. Macaskill.

The Quoting Club are now organized for the season and through the courtesy of the Tennis Club are playing on their grounds. The Quoting Club expect a Montreal team to play a friendly game in St. Andrews E., on July 2nd.

The lecture in the Tennis Club House here on Monday evening was a literary treat. The meeting was gracefully presided over by the Rev. Father Dulude. Mr. Justice Serveyer as lecturer gave us a splendid synopsis of the "Maria Chapdelaine" story and much interesting information about Peribonka and other places in the Lake St. John region which have been put on the map in imperishable colours by this beautiful Canadian story. Mr. Serveyer spoke in English, with much greater ease and grace and distinctness of pronunciation than is common with speakers of the English race. After the lecture brief but merry speeches were made by the Rev. Mr. Windsor and others.

STONEFIELD.

Mr. Archie Grahaf spent Tuesday here.

Mrs. R. Welden visited Lachute on Tuesday.

Rev. Mr. Jobb is attending conference in Montreal this week.

Mrs. J. Canning spent the weekend with friends in Lachute.

Rev. Mr. and Mrs. Usher called on Mrs. J. F. Owens last week.

Mr. and Mrs. R. Owens and little son motored to Montreal on Saturday Tuesday.

Mr. and Mrs. Peddel motored up to their summer in Stonefield for the weekend.

Service in St. Mungo's Church, Cushing, on Sunday, was conducted by Rev. Jas. Lloyd, of the South Africa Mission Field, and gave his hearers a very interesting account of his work amongst the dark people which was greatly appreciated by all present.

The funeral of the late Mrs. Alex. Dewar, of Arundel, took place Saturday from the C. N. R. Station, Grenville. Quite a number of relatives and friends attended to pay

their last respects to the deceased lady in spite of the inclement weather. We extend our sincere sympathy to the family.

WEDDINGS BELLS

DE LESSARD-LEMAY

At 8.30 on Monday morning in St. Anastasia Church Rev. A. Gratton, cousin of the bridegroom assisted by Rev. Marsolais of Lachute, and Rev. Granier, of Alfred, solemnized the wedding of Miss Jeanne De Lessard daughter of Mr. and Mrs. P. De Lessard to Germain Lemay, son of Mr. and Mrs. J. Dominique Le May. During the ceremony the musical program was rendered by the Misses M. Anne Robillard, of Montreal; Pauline Paquette, Blanche and Pearl Ayers, Gertrude Lacasse, of Lachute; Mr. D. Champagne, of Ste. Therese.

Mr. J. D. Lemay was witness for the bridegroom. The bride was given in marriage by her father. She wore a gown of Satin Ivoire and Chantilly lace with an embroidered tulle veil draped in bonnet shape with two bunches of orange blossoms on each side and carried a shower bouquet of roses and lily-of-the-valley.

The bridesmaids were Misses Germaine and Gilberte Lemay, who wore georgette and tulle gowns of pastel tone and mohair hats to match their dresses; their bouquets were made of butterfly roses and lily-of-the-valley. The flower girls, Lorraine and Suzanne De Lessard wore peach georgette dresses and bonnet shape hats to match, and held baskets of roses and sweet peas.

Messrs. Emile Dusault and Romuald Gervais were the bestmen. The placing of the guests in church was taken care of by Notary Valois and Dr. Touchette.

Mrs. De Lessard wore a gown made of beige Chantilly lace and mohair hat of same shade, her corsage bouquet being of sweet peas. Mrs. J. D. Lemay wore a navy blue crepe de lux gown, and beige mohair hat, her corsage bouquet being of sweet peas.

After the ceremony a largely attended reception was held at the home of the bride's parents, where the rooms were adorned with spring flowers.

Mr. and Mrs. Germain Le May left for a motor trip, Mrs. Le May wearing a beige ensemble, also furs of the same shade, and a french hat. On their return they will take up residence at Lachute.

Amongst the cut of town guests who attended the wedding ceremony, were, Mr. and Mrs. F. Fredette and daughter Therese, of Ottawa; Mrs. Victor Bourgeois, Miss Alice Brodeur, Mr. and Mrs. E. Brail, Miss M. Anne Robillard, Mr. and Mrs. Paul Dorian, Mr. and Mrs. Louis Dupuis, Miss Joanne Givard, of Montreal; Mrs. Leopold Guay, of Longueuil; the Misses Jeannette Dauphinais, Simone Lacroix, Mr. and Mrs. F. Jette, of St. Hyacinthe.

McOUAT-COWPER.

The marriage of Miss Grace, Isabel Cowper, daughter of Mr. and Mrs. Hugh B. Cowper, of Westmount, to Mr. Thomas Edward McOuat, of Campbell's Bay, son of J. W. McOuat and the late Mrs. McOuat, took place Tuesday evening, at six o'clock at St. Andrews United Church, Westmount. The ceremony was solemnized by the Rev. Dr. Clark. The altar and church was decorated with palms, ferns, lilacs, and gladioli and carnations marked the guest pews.

The bride, who was given in marriage by her father wore an ivory moire taffeta gown with basque bodice, long sleeves, very long semi-bouffant skirt edged with points of net, and a peacock train in continuation from the hemline. Her cap of rose-point lace had clusters of orange-blossoms at each side holding in place her veil of lace. She carried a shower bouquet of butterfly roses and lilies of the valley.

She was attended by the groom's sister, Miss Grace McOuat, as maid of honor, Miss Ruth Hendery and Mrs. Douglas Taylor, as bridesmaids. They were gownned alike in primrose yellow orchid and powder blue respectively, the dresses made with fitted bodices of chiffon taffeta having Elizabethan collars of net and full trailing skirts of net ruffles finished at the sides with large bows of velvet ribbon. Hats of mohair with velvet ribbon loops were worn and they carried arm bouquets of sweet peas in pastel shades. Little Margaret Laurie, piece of the bride, as flower girl was dressed in shell-pink taffeta with frilly pantalettes of net and she carried a basket of sweet peas, rose buds and pansies in trailing effect.

Mr. Harold McOuat, was his brother's best man and the ushers were Messrs. Hume, Grisdale, Kenneth McOuat and Grenfell Cowper. Mrs. Cowper, mother of the bride, was gownned in blue lace wearing a hat of black mohair and lace and carrying pale pink Columbia roses. Following the ceremony, a reception was held at the home of the bride's parents, Douglas avenue, where the reception room was decorated with spring flowers and greenery. Later Mr. McOuat and his bride left to spend their honeymoon in Bermuda, the latter travelling in a green ensemble of silk bengaline and a small wool braid hat.

Now is time for Ice Cream.

Jas. Heatlie & Son wishes to announce that they are ready to supply all customers with good quality Ice Cream in large or small quantities. Orders for picnics, socials and teas receive prompt attention if sent to James Heatlie, St. Philippe, d'Argenteuil, Que.

DOMINION TIRE DEPOT

GEO. Y. DEACON

When the Prince of Wales Cooled Heated Fight Fans

Our Popular Heir Apparent Loves a Good Boxing Bout and Attends Many—Is Always Democratic

WANTS NO FAVORS

With boos and hisses the London prize-fight crowd voiced its ugly temper, roused by the unsatisfactory way things were going. There had been hints—just we are told—of a fake in one of the preliminaries, and one of the main fighters had refused for a time to enter the ring. The angry rumblings of the crowd grew more ominous, and the nerves of the promoter tauter and tauter. It was a bad situation under any circumstances and, to make it worse, at the ringside sat a personage. "Come on, Prince. Give us a speech!" yelled some one in the gallery. The cry grew insistent, and the members of the party with the Prince of Wales became acutely uncomfortable. But not so the urbane and democratic Prince, we are told by Harry Preston in the New York Herald Tribune Magazine. The Prince sized up the situation and the temper of the crowd, and dealt with both coolly. He thought for a moment or two, then got up, climbed through the ropes into the ring, and made a little speech which began simply, "I thank you for the kind way you have received me." That settled it. Roars of cheering broke out, and continued unabated for five minutes, while the audience sang enthusiastically, "For he's a jolly good fellow!" This was the Prince's second fight, and it might, considering the disorders which attended it, have been his last, according to Mr. Preston, a celebrated British sportsman, who has taken the Prince to many matches since then. We read further of the time when the Prince cooled the heated fans:

It was at the Royal Albert Hall, early in 1920. Jimmy Wilde, that extraordinary little man with pipestem arms, but a flat like a steel hammer (the greatest boxing freak in ring history, I think), was fighting Patsy Herman. Bombardier Wells was also having an argument with the formidable heavyweight, Levinsky.

I had ventured, through the medium of Wing Commander Louis Greig, then controller to the Duke of York, and an old friend of mine, to ask if the Prince would join my party for the fight. Louis had presented me to the Prince on the night of the Beckett-Carpenter fight at the Stadium Club, the previous December, and I hoped His Royal Highness would attend some more contests, and so give boxing some badly needed encouragement.

Mack came the reply that the Prince would not be able to dine with me, but that I was to dine with him at St. James's Palace. I called upon Louis Greig at the palace to explain that this was a little awkward for me, as I had already invited my guests for dinner and the fight. "Bring them all," was the laconic reply I received.

Thus, on the night of the fight, I presented myself and my fourteen guests at the palace. There were E. V. Lucas, the novelist and publisher, I remember; Tom Marlowe, the then editor of The Daily Mail; my brother Dick, Louis Greig and his brother, Arthur, and some others.

While we drank our cocktails in the beautiful reception-room upstairs, a message came through that we were not to wait. The Prince was coming up from Northampton, where he had been hunting, and would be a little late.

We went down then to the dining-room, sat at the long table, and began. The Prince arrived half-way through the meal, and I shall never forget the impression he made when he came in, finely flushed from exercise and fresh air, with that something in his eye, that intimate regard peculiar to men who care for sport and athletics—a flash that establishes friendly contact immediately over gulfs of rank and blood and differences of calling. He was comparatively without stiffness, affectation, or self-consciousness.

But we had not occupied our ringside seats at the Hall many minutes before trouble began. The arrangements were very bad, and the balcony crowd, unable to see properly because of the banks of lights put up for the cinema and press cameras, began to shout. The Prince saw what was wrong and said it was a shame the people in the cheaper seats should not get as clear a view as the ringside audience. He asked me to send for the manager.

When the latter came, the Prince asked him if something couldn't be done. He didn't like to sit there with a good view, while other people who had paid their money couldn't see. That made the manager get a move on. They got some wires and ropes, and the banks of lights were pulled higher and to one side.

There had been an incident or two over the fight before the big event. Levinsky was fighting Bombardier Wells. Something went wrong with Levinsky's arm. Some folk in the gallery, scenting a fake, and said so at the top of their voices. Of course, it was a perfectly straight affair, but the gallery was in a bad mood anyway.

To crown everything, Pete Herman was overweight and Jimmy Wilde, who weighed about seven stone, dressed, and was invariably giving away weight, said he wouldn't fight him. He was quite within his rights. But they told him the Prince of Wales

was there, and they mustn't disappoint him.

"Well, I'll fight for the Prince," said Jimmy at last, "but for nothing and no one else." And on that he took the ring and put up one of the greatest fights of his life.

The Prince's interest in boxing, as throwing light on his democratic nature, will some day be considered important by historians. Mr. Preston believes; and he adds that the English like their future King all the more because of his interest in the sport. But not only does he like to watch boxing, we are told. The Prince is a very shrewd judge of boxers' form. We read further:

He eyes them in their corners before the fight begins, and is seldom wrong in his estimate of a man's condition and chances. That is because he himself is something of an authority on training. His average life would knock most men out after a week or two, but he emerges from the most prolonged spells of heavy and arduous public duties, work that exhausts mentally and physically, with plenty of energy left for play—and play of a strenuous kind.

The secret of this is largely intelligent exercise and sparse eating. He is always interested in the technique of getting the most out of the human machine. Indeed, the most vivid memory I have of the Beckett-Carpenter fight, which really put Carpenter on the international boxing map, is not of the fight, which lasted seventy seconds, but of a conversation I had with the Prince about training in youth and middle age.

It was the Prince's debut as a patron of the ring. The scene was the Stadium Club. Carpenter, who had leapt into fame by knocking out the tall Bombardier Billy Wells at Ghent had come to try conclusions with the big Englishman, Joe Beckett. The French boy looked white and drawn beside the burly, well-colored Beckett, and most people agreed with Arnold Bennett, who, before the fight began, told me he thought Carpenter was "a dead man." People were not then aware of the tiger that slept in that pale French boy!

The Prince had come to his first big fight with Louis Greig. This was in December, 1919. The Prince was twenty-four, and just back from his first great post-war tour to Canada and the States. He looked with interest at the crowd—one of the most brilliant and intriguing that ever assembled round a ringside—and up at the movie-camera men, who had their feet in rope loops. Charles Cochran, the promoter, sat beside the Prince, but gave up his seat to me when Louis Greig called me over and presented me. We began to talk of the boxers and their prospects. I had seen both in previous fights and in training.

Mr. Preston then gives us some information regarding the strenuous life that the Prince's position forces upon him, and how he keeps fit for it:

The Prince was exercising very hard then—too hard, I thought. Having indulged in most forms of strenuous exercise in my youth, and having reached the age of seventy without losing my keen zest in life, I feel that I know something about the delicate art of keeping fit. "You ought not to begin to train until you are forty, sir," I told the Prince.

He looked a little astonished at this, but became very interested in my exposition that, unless a man is going in for unusually strenuous athletics, it is a mistake to take too much out of himself while he is young, because he won't be able to keep it up later on, and there will come the time when he has to fight superfluous flesh seriously.

Not that the Prince is ever likely to be worried by adipose tissue. Every ounce of fat on the human body gets there by way of the mouth; and the Prince is a sparing eater. In December last year he joined my party for dinner at the Piccadilly Hotel, with his two equerries, Major the Hon. Piers Legh and the Hon. Bruce Ogilvy, late of the Guards. We were all going on to the National Sporting Club.

The Prince had had a strenuous day. He had been hunting—and had arrived back in town just in time to dress quickly and motor from York House to join us. Yet all he had for dinner that night was a spoonful of caviar, a taste of sole, a slice of woodcock, and a glass of champagne.

I remember on another night last year, when the Prince was joining me for a fight at the Royal Albert Hall, he arrived late and slipped into his ringside seat beside me. He explained that he had dashed up to town from his hunting quarters and had stopped only to change and eat a sandwich. His lunch that day had consisted of a sandwich or two and a glass of sherry, between hunts.

Immigration

Ottawa Droit (Ind. Lib.): The millions spent on increasing the Canadian population by means of immigration have been spent in vain. More than that, they have been spent to the detriment of the country itself, since this intense immigration has caused the departure to the United States of a portion of our Canadian population.

BRITAIN'S HIGH COMMISSIONER TO CANADA

Sir William H. Clark, K.C.S.I., C.M.G., who has been appointed Great Britain's first High Commissioner to Canada, commenced his career in the public service as a clerk in the board of trade department of the government in 1899. He was secretary to the special mission to Shanghai to negotiate a commercial treaty with China in 1901; was a private secretary at the board of trade to Rt. Hon. D. Lloyd George in 1906, and to Rt. Hon. Winston Churchill in 1908; secretary to Lloyd George as Chancellor of the Exchequer from 1908 till 1910; member for commerce and industry of the Council of the Viceroy of India from 1910 to 1916; comptroller-general of the commercial intelligence department of the board of trade from 1916 till 1917, and comptroller-general of the department of overseas trade since 1917.

Bathing Beauty-Contest

Chicago Tribune: As newspaper men we admit that bathing beauty contests are good for the back page and the photo section. But for the purposes of civic betterment they are pure advertisements. . . . We will admit, for the sake of argument, that every beauty who steps into a one-piece suit and what she imagines is the pose of a Parisian mannequin is a home girl, is kind to her mother, loves potted geraniums on the window sill, always goes to bed by 9 o'clock, and is just waiting until true love comes along, regardless of bank accounts. We still contend, nevertheless, that bathing beauty contests are not for art's sake or for love of a Greek ideal of physical perfection. They are, on the contrary, about as close to the ancient slave market, where the bloom of shapely anatomy won young ladies places as dancing girls or as favorite consorts of luxurious caliphs, as anything we have ever developed in this country. We don't think Chicago needs that sort of advertising.

Long Non-Stop Run Makes New Record For British Railway

London.—What is claimed to be the world's record non-stop railway run was made recently by two Royal Scot expresses of the London, Midland & Scottish Railway, one of which made the journey from Euston (London) to Edinburgh, 399 3/4 miles, and the other the trip from Euston to Glasgow, 401 1/4 miles. This railway claims to have held the previous record in the run from Euston to Carlisle, 299 miles, without halt, also done by the Royal Scot.

No disclosure of the intention to eliminate the stop at Carlisle was made when the two record-breaking trains left Euston at 10 a.m., but officials at Carlisle were informed that the trains would pass through. Both trains arrived seven minutes early. Engines with specially large tenders, holding more coal and allowing of a double crew, have been constructed for these long hauls.

First Spectator—Who called the referee a fool? Second Spectator—I dunno. Who called the fool a referee?

Marriage—When a girl exchanges the attentions of a dozen men for the inattentions of one.

Touring

Whenever you put your car away for the night in a strange garage, look at the floor under it. The chances are you'll find puddles of oil and water there. If you didn't discover them until the next morning, you might think your engine had been leaking its vital contents.

It's not a bad idea, either, to make a note of your mileage when putting the car to bed away from home. Any one who happens to see you taking down the figures may be discouraged from borrowing it for a joy ride during the night. If the car is taken out, you'll know it when you check up in the morning.

Don't let garage men push your car around by applying their energy to the headlights. Lamps are easily loosened in this way, or bent out of adjustment.

It's better to leave your car parked with the front wheels pointed out than in toward the curb. Parked cars are sometimes bumped by passing vehicles. If the wheels are pointed in, the car may run up on the sidewalk and injure some one. If the wheels are pointed out, the car will roll away from the curb and into the passing vehicle.

When running at high speed it's a good thing to remove the foot from the accelerator from time to time. The throttle is thus closed, and oil is sucked up past the pistons. This helps to prevent scoring the cylinders.

Into the car and out to the country club for a round of golf is a popular proceeding these days, but watch out for golf shoes with extra wide soles. The accelerator pedal is rather close to the brake pedal on many cars, and a wide sole will often press it when a driver is reaching for the brake.

YUM YUM

Angry Customer (tossing a package on the counter): "Makes washing a pleasure, does it? Does the washing while you wait, does it? It's the little flakes of soap that—"

Grocer: "Madam, one moment, please. This is not soap."

Angry Customer: "Not soap? Not soap?"

"No. Your daughter asked for a half-pound of grated cheese and a half-pound of soap flakes. This is the cheese."

"My stars! And last night I made a pudding."

Texan to Lasso Mexican Lions For Scientists

Brothers Gain Reputation Along Rio for Success in Taking Beasts Alive

Raymondville, Tex.—Hunting Mexican lions, or panthers, as they are called by most Mexicans of the chaparral region of south Texas, is dangerous sport and more especially so when the daring method of capturing the animals alive is attempted.

Bob Snow, of Raymondville, who is widely known for his expertness in roping these denizens of the wilderness, has been selected as professional hunter for the expedition which the Denver Museum soon is to send into Mexico for the purpose of obtaining as many specimens as possible of panthers and other wild animals peculiar to that country. A. C. Rogers, curator of the museum and a representative of the Smithsonian Institution, also will accompany the party.

But for the fact that a variety of animals besides the panther are to be sought by the expedition, the hunting would be done in the vicinity of Raymondville, which is notorious for being the habitat of more panthers than any other part of the lower Rio Grande border.

MEXICAN ROPERS TO ASSIST

Snow will take with him two or three Mexicans who are well trained in the use of the lasso. It is dangerous business for one person to attempt to handle a panther by means of a rope, Snow said. On his trips into the wilds he usually is accompanied by his brother, Sheriff Luther D. Snow, of Willacy County, who is likewise widely known for his success in trailing and capturing alive the ferocious beasts.

Occasionally the Snow brothers serve as guides for sportsmen, who visit this region in search of excitement. Only recently they accompanied R. Bona Ridgeway and John Coffey into the heart of the panther country. They took with them a pack of eight hounds and a fox terrier. It was an exciting experience from start to finish and as results of the chase they brought back to Raymondville two live panthers. The first panther was brought to bay in a tree after a long chase.

NARROW ESCAPE RELATED

"When we came to the spot the animal was standing on a limb about twenty feet from the ground," Ridgeway said in describing the incident. "Luther Snow climbed up a prong of the tree something like ten feet above the ground, and with part of the fifty-foot rope, which he had fixed with a loop and knot so that it would not choke the lion when tightened about the animal's neck, he began his efforts to rope it."

"He was in an awkward position and missed his first throw. The lion was not used to such procedure and turned its fury from the dogs toward this new attack. We on the ground held our breath in suspense in a tense moment when the cat growled and crouched as if to spring on Luther. Luther said: 'Look out, boys! If she jumps I'll fall out backward.' We were much relieved when the lion seemed to abandon the idea. On the next three throws the lion caught the rope with its mouth and held it a while and then released it. Finally the rope went around its neck and was tightened.

"The dog-holders could not see the lion when she bit the ground because of the dense brush, but we knew, from the earnest yells of the Snow brothers, just what had happened. The noise had slipped off and the lion was free."

HOUNDS RECAPTURE LION

"The brave little fox terrier did its best to catch that bounding lion, but it was soon outdistanced. The tied hounds understood instinctively that they were needed, and all tried to go at once. Their voices were working, too. It was an exciting moment. We could not untie those dogs without help, for fear of their getting away all yoked up. When freed, however, the dogs scattered in every direction and in twenty minutes had the lion up another tree."

"The knot in the rope was adjusted and both ropes were thrown around the lion's neck. When she jumped out she was held at a safe distance until thrown on her back, the natural position they take for fighting dogs. When she ceased the struggle, Bob tied her hind feet together with

FOREGOES HIS PLAYS

Edén Phillpotts, celebrated English author, has announced that he has never seen one of his own plays.

strands from a piece of rope. It was more difficult to tie her front feet; she came near catching him two or three times in her powerful jaws. He threw his tough duck hunting jacket over her head. The frightened and enraged beast bit this full of holes. With this blind on her, he finally got her front feet tied.

LARGE FEMALE TWICE TREED

"We had almost reached the edge of the thicket when the dogs hit another hot trail and treed, some distance back in the thicket. The two trailmakers rushed to the scene as fast as possible, to find a still larger female lion at bay in a mesquite tree. She jumped out as soon as we came up, but was soon treed again. Luther yelled for the ropes, having decided to make a full day of it by capturing the second lion."

"The four of us tried to drive this second lion nearer to the edge of the thicket. She measured about seven and a half feet from tip to tip, and we were tired of packing lions and cutting trails by this time, anyway. There was some danger in this as she was liable to come our way despite our yelling and usually there was not room to pass in the narrow underbrush trails and small open spots. One time she came pretty close to the ax bearer—that caused just a slight chill."

HUNTER FLEES INTO BRAMBLE

"The last time we jumped the lion out of a tree she came bounding straight toward Coffey's little open space, the dogs hot on her heels. He did not hesitate for a moment, but with a mighty yell plunged head first his full six feet into a mass of thorn bushes. The lion missed him about four feet. Coffey was a sorry sight when he emerged from his thorn bed."

"By this time Luther Snow was near the beast's head with a rope, and Bob, with another rope, was working to get to her rear. They scolded and beat the dogs away, and as the lion turned to get up Luther roped her around the neck the first throw."

Rheims to Celebrate

City Will Observe Completion of Reconstruction on June 9

On June 9, 1918, General Gouraud, in command of the Rheims sector, definitely turned back the German offensive against it, and on June 9, 1923, the city will celebrate the completion of its reconstruction by an international exhibition of the "Meilleures Marques." The inauguration ceremony will be attended by the Minister of Commerce and the Ambassadors and Ministers of the principal foreign powers. Later, at a day not yet set, the President of the republic will dedicate the reconstructed Hotel de Ville, or city hall, and the library, the latter the gift of the late Andrew Carnegie.

Of the 8,625 dwellings and shops completely destroyed and over 5,000 damaged, more than 10,000 have been rebuilt. The factories and workshops have completely resumed work, and the exhibition is expected to reveal the remarkable revival of the industries which were ruined from 1914 to 1918.

Aside from the religious fetes of thankfulness and rejoicing, tributes will be paid to the soldiers killed in Champagne on an "Alsace and Lorraine Day," with which the Bishops of Strasbourg and Metz will be associated. Hector Berlioz's "Te Deum" will be sung by a choir of 300 voices, conducted by Gustave Charpentier, and the same composer's "Requiem" will be given in the reconstructed cathedral on the same day.

When Major Fitzmaurice, the Irish member of the "Bremen's" crew arrived at Seven Islands from Greenly Island, he and "Duke" Schiller, pilot of the relief plane, were met by Mr. L. A. Genest, Lower Quebec representative of Christie, Brown & Co. Limited, and Mr. Stewart of the Clarke Trading Company who tendered them refreshments in the shape of hot coffee and Christie's Biscuits which were, naturally, much appreciated. The above picture shows the aeroplane which carried the first shipment of Christie's Biscuits by Canadian air freight from Toronto to Windsor.

Had a Profession.

"He has a profession, eh?" "Sure—you couldn't get him to work."

In a year's time the average human takes approximately one and one-half pounds of aluminum into the body from natural foods. "The mineral, however, does not accumulate in the body."

WANT ADS

FOR SALE.—One Good Work horse, will sell reasonable. Alex. Anderson, Carillon Inn, Que.

FOR SALE.—Kitchen stove, in good order, Gurney-Oxford, Senior. Apply to Z.-N. Raymond, Notary.

FOR SALE.—Good Buggy, Reasonable price. Call at Dr. Rodrigue's, Lachute Mills.

FOR SALE.—Slightly used furnace, in perfect condition. Only been used short time. Will sell cheap and arrange for installation if desired. Cash or terms. Phone 130 Lachute. June 15-3.

PROPERTY FOR SALE.—Dwelling on Corner of Bethany & Catherine St. with all modern conveniences, including built-in Fire Place, Breakfast Nook Cupboards, Ironing Board, Laundry Room, etc. Apply Wm. Cottingham.

HOUSE TO RENT.—On Bedard Boulevard with all modern conveniences. Apply to Geoffrey Bedard, Phone 88, Lachute.

HOUSE TO RENT.—East Ward, now occupied by Mr. Brunt, six rooms, well furnished; cemented basement Wood Furnace; Hot and Cold water and all modern conveniences. Apply to J. W. McQuat.

CARPENTRY and PAINTING.—Prices right. N. Campbell, Lachute.

Province of Quebec,
Municipality of the Parish of St. Jerusalem.

SPECIAL NOTICE

SPECIAL NOTICE is hereby given to all owners or guardians of dogs in the parish of St. Jerusalem, county of Argenteuil, that you are hereby requested and warned to keep your dogs safely muzzled or confined, so as to prevent their escape from the premises of their owners, or guardians. Any person, owner, or guardian, of a dog or cat who allows him to run at large, unmuzzled shall be held responsible for any damages that may occur in connection therewith.

The above warning is given, in virtue of the fact, that according to reports, dogs and cats suffering from the disease of rabies are said to be in our midst, therefore, for the protection of our people, particularly children going and coming from school, etc., the above warning is given.

Signed this 5th. day of June 1928.

DAVID BLACK, Mayor.

J. W. GALL, Sec.-Treas.

LAKEFIELD.

Mr. and Mrs. Wm. Gunson spent the week-end at their bungalow.

Work on the Highway is now in progress; to the great satisfaction of all.

Service in Shrewsbury at 10.30 a.m. at Lakefield at 2.30 p.m., both standard time.

Mrs. Millar and her daughter Miss Lila Millar are in residence at their summer place at Rosemount.

Miss Amy Powles with her brothers Mr. Lionel Powles and Rev. Percy Powles, M.A., were at their cottage on Sunday last.

Mr. Thomas Evans is also working hard on his new home; which, when finished, will also be a great addition to the prosperous look of our little village.

The attractive row residence of Mr. and Mrs. Miles Copeland is now nearing completion and is a distinct improvement to the appearance of the place.

Mr. and Mrs. W. Stone and family were the guests of Mr. and Mrs. C. Foster on Sunday last; Miss Grace Foster returning with them for a stay of a week or two, to their home in Outremont.

On account of Sunday 17th. June being the date of his ordination, Mr. Fiander, our new minister will remain in Montreal, and a friend is coming to take his duties in Lakefield and Shrewsbury on that day.

TENDERS FOR WATER MAIN

Sealed tenders endorsed "TENDERS" will be received at the office of the Secretary-Treasurer of the Town of Lachute until 8 o'clock p.m. Saturday the 30th. day of June 1928, for the laying of about 900 feet more or less of 6 inch class C water pipe, on a depth of 5 feet, from McPaul Bros. Store to the College on Grace Street.

JOHN A. RICE, Sec.-Treasurer.
Lachute Town Corporation.

FARM FOR SALE.—About 24 acres of land, with new house and barn, cement floor in stables, also milk room and ice house. Suitable for chicken and vegetable farm. Vide Sec. Situated on Main Road to Lachute, five minutes walk from Wilson's Milk Stand, C. P. R. Apply to Mrs. Ruth Thompson, R. R. No. 1, Lachute. June 15-1

Overtake the "72"?

... well, hardly!

All cars today seek to approximate Chrysler "72" performance by patterning after Chrysler engineering. But after three years of striving, how close are they to the "72" today? No closer than they were four years ago.

As they have struggled to approach, Chrysler "72" has pulled away and gallops around and past them with more than the ease of the old original Chrysler sensation-car of 1924.

There may be pocket-book reasons for choosing cars of lesser price than the "72." There simply cannot be a valid reason for paying as much or more for any car other than the "72."

2-pas. Coupe (with rumble seat), \$1995; Sport Roadster (with rumble seat), \$2060; Royal Sedan, \$2060; 4-pas. Coupe, \$2060; Town Sedan, \$2205; Convertible Coupe (with rumble seat), \$2265; Crown Sedan, \$2335. All prices f. o. b. Windsor, Ontario, including standard factory equipment (freight and taxes extra).

Leave All Your Old Ideas at the Showroom Door

WHEEL
BRAKES
AND
LOVEJOY
SHOCK
ABSORBERS

UNLESS you have already examined the New Series Pontiac Six and driven it . . . your ideas of six-cylinder car value are due for radical revision.

Leave those old ideas at the showroom door. Come in and see the car. Then drive it.

Get the feel of the big, smooth six-cylinder engine, with its GMR cylinder-head. Let the car leap forward at a touch of your toe on the accelerator. Bring it to a swift stop with a gentle pressure of the positive four-wheel brakes.

And, all the time, experience the easy-riding comfort of the four Lovejoy Hydraulic Shock-Absorbers and the luxury of perfectly-appointed, beautiful Fisher bodies.

Then—learn Pontiac's amazingly low price—and you have discovered a six-cylinder value that upsets every preconceived idea you may have had.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

Mr. A. Roberts, of Montreal, is spending a two week's visit with friends in Lachute and Chatham.

Ma. Geo. Macintosh and daughter Audrey, of Montreal, were weekend guests of Mrs. R. E. Carkear.

Mr. and Mrs. Geo. Calder have opened their cottage at 16 Island Lake, where they will spend the summer months.

Mr. Kenneth Beaton, of Weir, Que., is spending this week in town the guest of his sisters Mrs. Sam Clifford and Mrs. Joseph Tassie.

This week our young folk are busy at the Exams prior to summer closing. Quite a number from outside are trying for their entrance.

Mr. and Mrs. George Graham and Mr. Norman Jackson spent a few days guests of Mr. and Mrs. Chas. Graham, of Pine Hill.

Mr. and Mrs. R. C. Andrews and Miss May Evans, of Verdun, are the guests of their mother, Mrs. Robt. Evans, Lakeside for two weeks.

Mr. L. McAdam, of Chapleau, and Mr. Arthur Tooke, of Papineauville, visited friends in Chatham, Stonefield and Lachute over the week-end.

When coming to Lachute, don't forget that a good place to meet your friends is at "The Splendid Confectionery, opposite Banford's store. Launches quickly served.

Messrs. Cottingham Limited are rushing to completion the new Gas Station of the Muir boys on their recently acquired property at the corner of Bethany and Main.

Mr. and Mrs. W. Bramley, Miss Irene Bramley, Miss Irene McWilliams and Miss May Yelland, of Montreal, were guests of Mr. and Mrs. Jas. Yelland on Sunday.

An attractive Wrist Watch is to be presented to the Girl or Boy in Grade Eleven taking the highest marks in History covering the whole year.

The Koenigsberg Chemical Co. of Montreal have placed a medicine for sale at Charland's Drug Store. All the drugs supplied by this Company are fully guaranteed and are most effective in results. Ask Mr. Charland for particulars.

Mr. Chamberland has secured the services of Mr. J. A. Chevrier, Ph.O.O.D., of Montreal, who will make monthly visits to his store for the purpose of sight testing and fitting of glasses. Appointments can be made at once as Mr. Chevrier will make his first visit at Mr. Chamberland's Store on Monday, June 25th.

A very elaborate reception was held in McArthur's Hall, on Monday last, to welcome the return of Mr. and Mrs. Germain Lemay. About 100 guests were present and a most enjoyable time spent, as an excellent programme of songs, recitations and musical selections were rendered. Dancing and cards, with a plentiful supply of choice refreshments, filled out a really pleasant evening.

A new innovation for the travelling public has been created by the Gatineau Bus Line who have established a service between Lachute and Ottawa, calling at Brownsburg en route. The buses are of the newest design with comfortable roomy accommodation and make the journey in 4 hours and 50 minutes. Three services each way are on their schedule.

THE LATE FELIX JOLICOEUR

The death occurred somewhat unexpectedly on Wednesday morning of Mr. Felix Jolicoeur at his home on Grace Street. Deceased was resident in Lachute for upwards of 43 years being a native of Chute-au-Blondeau. Mr. Jolicoeur was 66 years of age and had been in poor health for some time. He leaves a loving and devoted wife, two daughters Cordelia and Laura (Mrs. Sylvestre, of St. Jerome) and two sons Wilfred and Felix to mourn his loss. The funeral will take place on Friday morning at 8.30, service being held in the Church of Sainte Anastasie.

THE LACHUTE FAIR

Fine weather is now the only requisite to make this year's fair one of the best in its history. Never before has there been such a complete entry of cattle as are now gathered in the grounds awaiting the finals for the coveted colored cards and ribbons, in the very keenest of competition with contestants even from Charlottetown, P. E. I. which goes to show that our fair is a rare drawing card.

The Society are as usual much indebted to its worthy President Mr. J. T. Ayers, who spends much of his time and energy in promoting its best interests, the effect of which may readily be seen in the splendid improvements that have taken place. Everything is arranged for general convenience. A new stand has been erected for those interested in cattle judging. Two new stock stables have been added as well as some 60 new horse stalls all of which are in perfect conformity with the whole surroundings. A new innovation has been created by the illumination of the main ring around which the public have been given a nice promenade with protection from motorists who will be lined up a few feet from the ringside instead of closing in tight as in previous years. All these things have required much thought and careful planning but no one visiting our fair will be able to leave us without paying tribute to the precision and care and general beauty of our Exhibition Grounds setting with its wonderful outlook from the Grand Stand of a town that is one of the most prosperous in the whole Province.

There is keen competition as usual among our local breeders but this year we have a number of new competitors in whom we notice Messrs. Jones and Kennedy from Charlottetown, P. E. I. who are exhibiting their Holstein Herd, Mr. A. Ayer, of Hampton, Ont., has some 41 sheep and Mr. J. W. Balson of Hampton, has a large showing of sheep and poultry; Mr. Bertwick Blackburn, of Uxbridge, Ont., is on hand with a fine turn out of Aberdeen Angus and Shorthorns and Garnet Kerr, of Campbellford with a herd of Jerseys, Hector Charpentier, Albani and Ernest Sylvestre with their French Canadian and many others. Wm. Nesbitt and N. W. Minogue have a fine turn out of fancy horses, jumpers, etc., which will furnish good ring events.

Hon. Senator Donat Raymond, of Raymondville Farm, Vaudreuil, has a splendid herd of Holsteins and Mr. J. T. Ayers has brought down his large herd of Herefords, so those interested in cattle will see a line of animals the equal of any in the Dominion.

The Main Building has taken on an added interest, for it contains a splendid exhibit of pianos, pianolas, gramophones and orthophones, which provide lots of good music from the well-known music house of Orme's Limited of Ottawa.

Mr. H. Levesque of the E. W. Gillett Co. Limited are daintily fixed up as a kitchen in which an experienced young lady, Mrs. Y. M. Coulombo is demonstrating in actual cookery the advantageous use of Magic Baking Powder.

Messrs. J. P. MacKimmie and Sons, with Mr. Berthiaume as representative of the Western Canada Flour Mills have a nice exhibit for Purify Flour.

With his customary enterprise, Mr. H. M. Lavigne has seized the opportunity of capturing the Ladies by a large display of Dresses and Dress Goods. The Canadian Gypsum Co. are demonstrating the many uses of their product and the use of Alabastine and Mr. W. D. McQuat has a good demonstration of paints and varnishes.

Messrs. G. Y. Deacon has also a neat exhibit of his varied lines and Mr. Jno. Simon with his representation of Moody Implements.

No exhibition is complete without a Midway and the Canada Amusement Company, under management of Mr. D. Harovitz is furnishing lots of fun for all in the merry-go-round, ferris wheel and the varied booths in which couple dolls, lamps and other articles are played for in the games of chance.

One of the most interesting, of course, is the splendid exhibit of Ayers Limited, in which an elaborate display of blankets, rugs, etc. are shown. It is with pride that the residents of Lachute will be able to show strangers and visitors just what is being produced by this progressive Company who are undoubtedly the backbone of our town and largely responsible for its general advance. Unfortunately the mills are situated at the extreme West End where the public do not come in contact, but an inspection of their goods should satisfy all who see that Lachute has an industry of world-wide import.

The Memorial Park will present a beautiful picture in a few days, as the peonies will be out in bloom and lend a charm to the general surroundings. Every day sees many visitors winding in and out its pathways, and wending their way to the monument which stands as a loving tribute to those who fell in the Great War. It is a sacred spot and as such we must keep it.

Giant Among Grain Elevators to Stand at Lakes Head

The world's largest elevator, according to its builders, is now being erected at Port Arthur, Lake Superior. The directors of the Saskatchewan co-operative wheat pool recently awarded a contract for the superstructure of Terminal 7, which will have a total capacity of 6,900,000 bushels, and should be ready for operation on Oct. 15. Reinforced concrete is the material used in construction.

The completion of the terminal will give the Saskatchewan co-operative wheat pool a total storage space of 22,975,000 bushels at the head of the lakes, which, together with a 2,000,000-bushel terminal elevator at Buffalo and the space provided by the pool's country elevator system in Saskatchewan, will give a total grain storage capacity of more than 50,000,000 bushels for the 1928-9 crop year.

The new elevator is on the Lake Superior front, near the boundary between the cities of Port Arthur and Fort William. It will be served by both the Canadian National and the Canadian Pacific railways, and will be able to receive as many as 500 cars

of grain a day during the rush season. Its normal working capacity will be 300 cars every ten-hour day—a car every two minutes—and it will be able to ship out and load grain into ships at the rate of 150,000 bushels an hour.

The workhouse itself will have a storage capacity of 900,000 bushels of grain, and there will be two annexes with a capacity of 3,000,000 bushels each. In one of these annexes equipment will be installed for unloading grain from vessels moored to the elevator dock, while the workhouse will be equipped with nine shipping spouts.

The rapid handling of grain will be facilitated by the use of eleven 150,000-pound scales, twenty receiving cleaners in addition to thirty-two other cleaners of various kinds, and twenty-three belt conveyers, with a total length of more than 34,000 feet. The cleaners will handle 60,000 bushels an hour, and the drier which will be installed will dry 1,000 bushels of grain an hour when necessary.

The total length of Terminal 7 will be 1,344 feet and the width 226 feet. The elevator trackage will provide space for 225 loaded cars to be "spotted" at one time, ready for dumping.

Ex-Premier Scores Reds

Ramsey MacDonald Resents Moscow Order to Oppose Laborites at the Polls

The issue of instructions from Moscow that the British Communists must put candidates into the field against those run by the Labor Party ought to put an end to the political fable that, when all is said and done, we are but a kind of Communist and that, had we the chance, we should do here what the Communists have done in Russia. The fact is that the Moscow International, which has issued these orders to its British dependents, has known perfectly well that the political power which was keeping the evolution of British politics upon democratic and constitutional lines was not "Torism" but Labor.

Communism is the native growth of reactionary soil; it is the scraggy and spiky bush that grows up under the political conditions of dictatorship of an elaborate police and spy system, of exile and political prosecution and persecution. Communism in Russia is cardroom with the victims on the seats of authority, using both Cheka and Siberia for their own purposes. As the responsible Government settles down to handle the practical problems of administration it departs from this, but the irresponsible revolutionary high priests of Communist doctrine who control the Third International have abandoned no delusions which possessed them when they overthrew the Russian Government ten years ago.

This origin of Russian Communism goes down to the roots. Democracy and it cannot go together. When its ballot boxes and press and courts of justice are open, it may continue its name, but its spirit and its methods will have changed.

Unbridgeable Difference
Another unbridgeable difference between Communism and the Labor Party is the belief of the former that a radical reorganization of society must be preceded by a revolution of force in order to seize political power. Upon that the Labor Party makes two decisive observations.

First of all, what cannot be done by the ballot box cannot be done by a revolution, and, secondly, what is sought to be done by a revolution cannot be done even if the revolution succeeds. The social and economic problems which the revolutionist has to face so soon as the revolution has given him power are just those that the successful democratic politician has to face, and they call from the revolutionist the same diplomatic and creative skill as they call from the politician. The Russians found that to be true when they decreed the nationalization of land. The peasants would not have it, and no revolution could impose it upon them. Also, later on, they had to adopt a new economic policy because no revolution could readjust the economic laws of exchange and markets. Communism here teaches the absurdity that whoever has power can use it just as he likes.

Communism as a way of effecting social change is a vain show. It brings suffering which it cannot compensate the paralysis which it effects while engaged in its revolution is not followed by a new life it has to retreat upon the old economic order so that it may begin its creative reconstruction.

It is also curious how the Russian parentage of communism is stamped upon the features of every Communist party in the world. Its method is the revolutionary method under the Czar. Policies have to be plotted in the dark and worked out on secret known as "nuclei." These must be instructions given to small groups obedient to orders. The Moscow Committee is like the "Secret No. 1" of all conspiracies whose word must be obeyed.

Communist Allegiance
Communism is essentially a conspiracy. The allegiance of the Communist is not to the colleagues with whom he is working, nor to his own judgment. It is to his headquarters. No one, therefore, can work with him comfortably because no one knows what he is. In his pocket are his secret instructions. He is a tool, and tools are impossible colleagues. He is an alien using his enfranchisement in obedience to his foreign control, and an alien puppet can only be cast out.

The old Russian revolutionists of the Kroustkin and Stepanik type were men who took their lives in their hands, and who accepted the conditions of conspiracy under the shadow of the executioner. Their surrender of liberty was of the heroic kind and the moral reaction was sublime.

That is not the case when the secret plot is against men who live in the open and with whom one is supposed to co-operate. Conspiracy under the conditions of freedom of discussion reacts towards a mean and debased lack of scruple and honor. It selects its tools from the most worthless. The generalities of common action are stifled; the conspirators cease to care who their masters are, provided they find employment, and they use any weapon by which they can do their work.

In stressful times like these they use misery to make more misery and lead their followers to knock their heads against stone walls. They cover their failures by hy words and keep the pursuit after something not yet found by raising will-o'-the-wisp after will-o'-the-wisp. Where they have been trusted with administration they have invariably let their organization down or have fallen back in their impotence upon moderate policies which they gained influence by attacking. Thus, both in our trade union and political movements communism is an influence of personal deterioration and organization disruption.

The opposition which I am explaining is seen in the position of both the political and industrial wings of the labor movement to-day. The order issued from Moscow that the advance of the Labor Party is to be checked by the running of Communist candidates to defeat certain types of labor leaders has its counterpart in the industrial policy of communism.

The purpose is to bring industry to

What Scout Wouldn't Like To Be

SULTAN OF SWAT BECOMES A MEMBER OF THE BOY SCOUTS

The commander of the Boy Scouts swore in Babe Ruth as a member of the organization at a father and son banquet of Troop No. 1, Flushing. The slugger is seen autographing balls for the boys.

a standstill, to paralyze it by industrial civil war on the assumption that after the wreck there will arise a new order. The General Council of the Trade Union Congress takes the labor view. Progress comes from peace. Peace, however, does not mean slavery and surrender it means negotiation upon conditions and a settlement that permits of acquiescence and of improvement.

The two policies are irreconcilable. No compromise is possible between them. They belong to two totally different political inheritances. Our inheritance is the democratic one; theirs, the autocratic one. Our method is that of a changing public opinion under the influence of reason, conscience and imagination; theirs is that of the individual will hardened and sharpened by dogma, breaking its way through barriers and establishing itself by the exercise of dictatorial power.

Thus, the conflict does not arise from diversity of remote aim or goal, but from the day-to-day attitude we take to our tasks. It is raised by every move we make either in Parliament or on an industrial council. That is why there is no possibility of accommodation between the British labor movement and communism—and Moscow knows it.

Johnny: "Yes'm; I'm going to be a dialect writer."

Australia Obtains Full Rights for British Pictures

Melbourne Firm Secures Contract to Extend Over Five Years

Melbourne, Vic.—To secure rights for British films in Australia, Charles R. Herschell, managing director of British Dominion Films Pty. Ltd., left Melbourne with a contract for five years by which his company will receive the whole of the productions of the Gaumont Company, British Instructional Films, Ltd., and the New Era Film Production Company. The last mentioned includes seven subsidiary companies. This will be good news to Australian picture fans, who have had a satiety of the American production.

Mr. Herschell says that the film industry in Great Britain is prospering, the chief reason being that the quota system has been introduced. The companies with which he made his contract represent a paid-up capital of £10,000,000.

Forty-three British pictures for exhibition in Australia were brought by Mr. Herschell, and he proposes to establish the exchange system here. Exchange centres are to be established immediately in Melbourne, Sydney, and Wellington, N.Z., and branches are to be formed in the smaller Australian centres of Adelaide, Perth, Brisbane and Hobart.

Pups in Boots

MEXICAN CHIHUAHUANS

Pups in boots has nothing on this pair of reputed dogs, exhibits in the show at Madison Square Gardens. They are the property of Mrs. Harriet Peaster of Philadelphia and are highly valued.

English Influence Called the Basis of Indian Advance

Professor Says Renaissance Has Become Great Moral Force in India

Bombay.—The first gift of the English of India was universal peace or freedom from foreign invasion and internal disorder, observed Prof. Jodu scholar, who is the Vice-Chancellor of Calcutta University, in a lecture he gave recently.

The speaker added: "The English have admitted us to the entire outside world; not only in Asia, but in all other continents as well; and they have admitted the rest of the world to us in a degree not dreamt of under Moslem rule. India has now been switched on to the main currents of the great moving world outside and made to vibrate with every economic or cultural change there. An isolated life is no longer possible even for our remotest villages."

"It is, therefore," continued Prof. Sarkar, "of peculiar advantage to us that in this age of world-forces our official language is English and that it has diffused itself all over India as the medium of trading and political and cultural correspondence. No other European language has the world-wide currency of English, or is used by such a large proportion of the human race. And English literature is the richest in the world on account of its own original works as well as the translations from all other languages in almost every branch of thought."

The greatest gift of the English besides universal peace and the modernization of society—and indeed the direct result of these two forces—is the renaissance which marked our nineteenth century. Modern India owes everything to it, literature, education, thought, and art; but in the last generation it became a moral force and reformed our society and religion; still later, in the third generation from its commencement, it has led to the beginning of the economic modernization of India," concluded the Vice-Chancellor.

Britain Signs Treaty of Amity With Persia

Series of Conventions Grants Tariff Autonomy as Preliminary to Airways Negotiations

London.—An important series of conventions was signed a few days ago by the British Minister at Teheran and the Persian Acting Minister for Foreign Affairs. They constitute an arrangement regulating the chief questions between Great Britain and Persia which had been increasing in number and growing somewhat more acute. They go far toward establishing Anglo-Persian relations on a more stable, more friendly basis.

The new treaty recognizes Persia's tariff autonomy and makes provision for transitional arrangements pending the conclusion of a treaty of commerce and navigation. The Persian note provides for the regulation of the legal position of British subjects. It is agreed that British subjects shall be amenable to the Persian police courts, but fines only can be imposed.

Further notes have been exchanged with reference to the British demand that facilities be accorded for the flight of Imperial Airways airplanes over Persian territory, this being an essential link in the altered air route. The Persian Government assets its intention of creating aerodromes and agrees that there is no reason to refuse permission to Imperial Airways, on certain conditions, to use them. It is prepared to negotiate with them experimentally.

The operation of the proposed air line from Cairo to India had long been delayed owing to the failure of ratification of the original agreement concluded by the British Government on behalf of the Imperial Airways in 1925. These difficulties now promise to be removed.

The Shah announced in April last year his intention to secure the consent of foreign Governments to the abolition of capitulations. The consent has been given and the measure now promises to be removed.

The closer we get to them the less steep seem life's hills.

Baldwin Talks on Amateur Writers

Amusing Remarks at Luncheon of Institute of Journalists

London.—The Prime Minister, Mr. Baldwin, in an amusing speech at a luncheon given by the Institute of Journalists to Viscount Burnham, a former president, at the Savoy Hotel, Strand, said:

"I am a sexagenarian. My colleagues are popular and in request. I have never yet had a single offer of any kind to make my contribution on any subject to the press."

"I am not of a jealous nature. Sometimes—and I am not referring to Lord Birkenhead—when I read what has been solicited and rewarded by what seems to be a remuneration of full value, I cannot help feeling that if I tried, and my friends were patient with me, I might produce what might be worth, if not a penny a line at least a penny a mile."

"I could write quite an interesting history of the fall of the Coalition and, as other people have given their views about me, I might have some views about others."

"I cannot tell whether they have any money value. I am but a simple amateur; but I beg you to think over this because, after all, when I retire and take to some other form of work, I should like to feel that at any rate there is one kind-hearted ass, who, out of pity or whatever motive there might have been, did once make me one offer to see my name with my own stuff over it, and I lay stress on that." (Laughter.)

Lord Birkenhead, speaking later, said: "Those who have undergone a long apprenticeship to journalism as Lord Burnham and I have done—(laughter)—do not invite, and propose by every legitimate means in our power to resist the inclusion of sexagenarian amateurs."

Mr. Baldwin, in Parliament last week, when questioned about the journalistic activities of Lord Birkenhead and Mr. Churchill, said that Lord Birkenhead had been guilty of an "error of judgment" in writing while a Minister a recent article on "Women in Politics" for "Good Housekeeping."

Prophecy for Lovers

Spring will not walk the windy ways
Ever again, nor tread the sward
As once, when she had Youth for lord.

Spring will not gather sixty days
Into the semblance of an hour,
As once, with all the world in flower.

Autumn will spread a bed of leaves,
Myrtle and bay shall close above:
And you shall sleep, and dream of love.—Gwen Clear.

Final figures give the total salmon pack in British Columbia for 1927 as 1,360,364 cases.

Blessed is the man who, having nothing to say, abstains from giving us wordy evidence of the fact."

SMATTER POP—By Payne

Life in Arctic Regions Full of Incidents and Adventure

Canadian Geologist's Diary Tells of the Joys of the Messages Received From "Home" by Radio—Christmas Day Celebrated

Ottawa—Not so much to the adventurer and the explorer, fascinating as their trips may be, as to the government servant must go the credit for the opening up and development of Canada's great white wastes north of latitude 60. Whereas the polar dashes by dog-team or airplane are necessarily brief and sporadic, the departmental "work" goes on continuously, year in and year out, a little here and a little there, co-ordinating and consolidating every step and piecing new patches on the vast quilt of the Dominion.

During the last five years a government steamship has been making an annual cruise along the fringe of the arctic archipelago between Baffin Island and Greenland and as far north as Ellesmere Island, within 700 miles of the pole. And with the ship go Royal Canadian Mounted Police, geologists, botanists, surveyors and other technical men to be exiled for a year or more in lonely fords for the advancement of natural science and the fur-clad native.

Crowded With Incident

These men do not refer to these expeditions as exile, however. Their time moves quickly and not too smoothly, often enough crowded with incident and adventure and always steeped in the allurements that makes the call of the wild almost irresistible to those who have once heard it.

The diary of L. J. Weeks of the Geological Survey affords fascinating glimpses into the home life of such pathfinders. In August, 1926, Mr. Weeks and an assistant, M. H. Haycock, were left at Pangnirtung, Baffin Island, to make a study of rock formations about the Cumberland Gulf region. This was an excessively populous point, there being a church and mission, a detachment of police and a Hudson Bay post—as many as four white men and several scores of Eskimos—so that there was plenty of "social" life, when the geologists were not exploring.

The House That Fell Not

The first entries in the diary read like a chapter from "Robinson Crusoe," as they describe the building of a three-room shack. Dr. L. D. Livingstone, of the Department of Indian Affairs, had been marooned with the others, and as he was to occupy one room he also turned carpenter and labored with hammer and saw. The three amateurs made such a good job of it that when the arctic winds blew and the rains descended and beat upon that house it fell not. The first test came on September 22, when there befell "the most terrific gale yet. The wind lifts the water right out of the flood in water spouts 400 feet high." It also ditched a barrel of gasoline from the beach, resulting in an exciting and unsuccessful

ful chase by motorboat through tempestuous seas.

Early in November, when the sun was wearing the horizon and the mercury was dropping below zero, social calls upon the minister, the factor and the Mounties became the chief attraction. The last named possessed radio. One needs to spend a year in the arctic to really appreciate a receiving set.

"Nov. 13: Below zero and blowing To-night KYW, Chicago, is to radiocast messages to us, so we all go over to the police in the evening." Unfortunately they failed to get the station. But the following evening conditions improved. "Radio came in fine for our set. We get a concert from the Commodore Hotel, New York, from WBZ and WJY." On November 19, "We go over to the police and at 10.40 KFKX starts to broadcast to the arctic. They give us concerts for 3½ hours, and then messages to Greenland for half hour. Then one hour's news' summary since July 15; an hour of messages for men from Bache to Burwell, and from Godhaven to Alaska; then an hour of 'Radio Special to the North Pole.' Got home at 7 a.m."

But the real news is home news, sent on the air from cozy firesides 2,000 miles away. One night, while the "worst gale of the year" is blowing until it seems as though the shack must be swept away, he hears from his mother in far-off sunny France.

One gets a hint of the glory of arctic night from the entry of Dec. 18: "The moon is very high and nearly full, so that the nights are brighter than the days. Moon up nearly all the time"; and Dec. 22: "The shortest day. Brilliant aurora at night." Then, by way of contrast, comes the most laconic of all daily entries: "Got a haircut."

On Dec. 24 the men gather in the "barracks" and receive "Best wishes for a Merry Christmas and a Happy New Year" from folks at home. And Christmas indeed proved as merry there on the top of the world as any "down below."

"Awoke at 11.15 and dress up. Give Alookey a plaid dress and a necklace. We all give Talker a dress. Oojoahlio gave me a white fox skin. Koakseek gave me two whitecoat (baby seal) skins. We have a very bright breakfast. At 5 p.m. we go to the company post and have a Christmas dinner. . . . We repair to the police where all the natives are having a dance. We have a sing-song with proper refreshments." The grand occasion would up with the receipt of radio messages from distant friends and relatives.

Such diaries prove that "the friendly arctic" is not a misnomer and that the polar regions may even become "popular" in time.—Christian Science Monitor.

What's a Jag?

"Drunk Means Drunk," Asserts Magistrate, Pointing Motorist to Freedom's Gate

Few Tests For Liquor Pests

"Leith Police Dismisseth Us," Line That Starts a Fuss

London.—"Drunk means drunk." Thus bluntly and, according to his opponents, obtusely, did Henry C. A. Bingley, London police magistrate, answer the new problem which confronts the ancient common law, to wit: whether the same standard of drunkenness should be applied to motorists as is applied, for instance, to pedestrians, trap drivers or after-dinner speakers.

It was one of those cases of drunken driving which arise daily in all countries where civilization has mixed gasoline with alcohol. The evidence, as in most of these cases, was conflicting. The police surgeon, a conscientious man, testified as follows:

"If the prisoner had been a pedestrian I would have said he was sober, but as a motorist he was drunk—he was not capable of operating a car safely."

Decision Heightens Problem
"The prisoner must be acquitted,"

said Magistrate Bingley. "The surgeon's view is not the law. . . . In a case before the Superior Court a short time ago the Lord Chief Justice, our highest authority, stated that drunk means drunk. Case dismissed."

The case was dismissed, but the problem remains. Many of Mr. Bingley's fellow-magistrates disagree with him, and the medical fraternity is ranged almost solidly against him.

In the old days London's view of drunkenness was less strict. It was expressed by the constable who, having propped his prisoner up against the bar, was giving his evidence on the case. "What was the prisoner doing?" he was asked. "E was a lying in the gutter, sir." "Was he drunk?" he was asked. "I wouldn't say that, sir—I seen 'is finger move." With the coming of the automobile, however, this amiable view was progressively revised. The police courts learned that what they had hitherto regarded as a mild illumination might flame up, behind a steering wheel, into a blooming catastrophe. And, with motor cars all over the streets, they found it necessary to frown even on those formerly harmless citizens who habitually made their way home late at night by rolling, wriggling and crawling on all fours.

Tests for Inebriates

Then began the various police tests for intoxication which have caused so much dispute in recent years. The prisoner was asked to walk a chalk line, turn, and walk back, or to pro-

nounce "Truly rural," "British Constitution" and "The Leith police dismisseth us."

These tests created more difficulties than they solved. Loud protests were heard. Scores of innocent lispers and stammerers, it was claimed, were being railroaded to jail. The chalk-line test was denounced as unfair for ordinary men, but pie for tight-rope walkers, however tight. Medical men, on the other hand, alleged that agile-tongued drinkers could make a Roman holiday of pedestrians and lampposts with their motor cars, and then pass their elocution tests summa cum laude.

At this point appeared a device, said to have been invented by American chemists, which promised a scientific solution of the whole problem. It was called the "football bladder test." The suspect would be ordered to inflate the bladder with his breath. The bladder would then be deflated into certain test tubes and the percentage of alcohol in the prisoner's system calculated with chemical precision.

The millennium in booze testing seemed to have arrived. But it soon developed that the learned scientists had left out of account a factor of which the veriest barfly could have told them, namely, that some men are more affected by four drinks than others are by fourteen. A veteran police sergeant of unquestionable sobriety, for example, was found to have considerably more alcohol on his breath than a Cambridge freshman, just arrested for staging a one-man riot from Piccadilly Circus to Russell Square. The football bladder was declared offside.

Roll Your Hoop To Health

PERHAPS TO BE POPULAR WITH REDUCERS
Girl in gymnastic Ayro wheel spins round Trafalgar Square, London. This new athletic device, which has become a fad in Europe, has been tested and passed by the British army.

Physicians Devise Formula

Finally, in despair, several London physicians devised the formula which is causing the present legal controversy. The prisoner, they held, should have a full examination from a committee consisting of both doctors and laymen. This examination should be heart to heart, breath to breath, and wholly friendly, thus giving the prisoner no opportunity to "pull himself together," thus defeating the entire object of the test. The whole should be a "when shall we join the ladies" or "where do we go from here" kind of affair.

After an hour of chumming up with the prisoner in this way the committee should withdraw and debate upon the question of whether the prisoner "was, owing to alcohol, incapable of doing safely the work on which he was engaged at the time specified in the charge."

On this formula most of the doctors and half of the magistrates of London have been able to unite. It establishes, definitely, separate bibulous standards for the aviator, the motorist, the bicyclist, the elevator operator, the steam shovel engineer, the over-the-audience vaudeville trapezist, the oyster shucker and the already referred to trap-drummer, after-dinner speaker and pedestrian.—N. Y. Herald Tribune.

There's nothing against the inferiority complex, except that it doesn't affect the right people.—Publishers Syndicate.

When there is nothing more to be said some boob always says it.

Short Skirts Increase Award for Ankle Injury

London.—The influence of women's fashions on the law was demonstrated recently when a young girl, Joan Barker, of Heavall, Cheshire, won an award of \$7,250 damages at Liverpool Assizes for injuries to her ankle in an automobile accident.

Counsel for the plaintiff contended that in these days of short skirts a permanent disfigurement of ankle or knee must be considered just as important as disfigurement of the face. The court, in upholding the unusually heavy damages awarded, agreed.

The Birth of "Sunlight Soap"

In 1875 the Trade-Marks Act had come into operation, and Lever realized that the first thing to be done was to secure a good name for the soap which he was thinking of marketing, for there was but little "good will" in an article bearing such a name as "Lever's Pure Honey Soap." Any other wholesale grocer could market a soap and call it "Pure Honey," "Honey" being only a fanciful name and one commonly applied to a type of soap the color of which was suggestive of honey. Soaps in those days were supplied by manufacturers in bars and stamped with the name of the grocer who sold it and possibly with the name of the maker as well, but Lever's idea was to establish a soap which would be of unrivalled quality, and which under a registered name could be advertised and sold universally.

On his return from his Hebridean holiday the first thing which he did was to call upon the best trade-mark and patent agent in Liverpool—the late W. P. Thompson—and discuss with him the question of a suitable trade-mark. It had to be a name easy to remember, easy to pronounce, and one which could be upheld in a court of law if an imitator came along, and, in order to overcome the obstacles which the Trade-Marks Act very properly erected, it had to be descriptive of the article, or refer to quality, or be geographical. Thompson turned up his lists and, after thinking for a while, scribbled down half a dozen names on a sheet of note-paper. At first none of these names appealed to Lever, and, putting the slip of paper in his pocket, he went away feeling disappointed. During the next few days, however, whenever he had a few minutes to spare, he took the list out and studied it. Amongst the half-dozen names suggested was the word "Sunlight." Suddenly, on the third or fourth day, it flashed across his mind that this was the very word. Then he was seized with the terrible thought that while he had been thinking the matter over someone else might have appropriated the word and had it registered. He accordingly took the first train to Liverpool and called upon Thompson to inquire if the name was still available; to his great delight it was, and he promptly instructed the agent to register it. Later inquiries showed that the word could not only be registered in Great Britain, but in every country where a Trade-Marks Act of one kind or another was in force; a fortunate coincidence which added greatly to its value.—In "Viscount Leverhulme," by His Son.

Experts Study

Dead Village Sites of Alaska

Expedition Seeks Evidence Tracing Indians to Descendants of Asia Race

Washington.—Further extensive archaeological explorations in Alaska should be undertaken without delay, believes Dr. Ales Hrdlicka, anthropologist of the Smithsonian Institution, who has discovered evidences in that region that the American Indian is a descendant of an Asiatic race.

Numerous "dead villages" and old sites already have been found during a survey of about 900 miles along the central and lower Yukon and the shores of the Bering and Arctic Seas, he reported to the National Academy of Sciences, adding that some are "buried in the banks and evidently are of a considerable, though not geological, age."

It is Dr. Hrdlicka's belief that Asiatics, migrating probably in small boats by way of the "natural bridge" between Siberia and Alaska, settled first in the latter region and moved slowly southward as they sought more favorable living conditions.

"Collections along the Yukon show characteristic and hitherto unknown forms of implements and other articles," he told the academy, "and one of the sites has also given some highly interesting and distinctive skeletal material. This site is in urgent need of excavation, for it is being cut away by the river."

"In the Bering Sea and the Arctic sites traces of an old and remarkably high grade ivory culture were discovered, different from that of the later Eskimo, and connecting apparently on the one hand with deep down in Asia, and on the other hand with the Indian culture of the northwest coast."

College is just like a washing machine: you get out of it just what you put in—but you'd never recognize it.—Dartmouth Jack o'Lantern.

Mexican Saloon Retains Sign Posted for Lindbergh

Mexico City.—Lindbergh's name continues to adorn at least one, perhaps more, of the Mexico City saloons that tore down their former signs and relabeled their places in honor of the famous flyer when he was here last December.

It reads: "Lindbergh Cantina, Saloon, Barroom, Drinks." Also a "Lindbergh cocktail" was invented during the visit of that renowned but abstemious young man. It had quite a vogue, despite its devastating qualities. The Mexicans were determined to honor Lindbergh to the utmost, even if it involved gulping liquid dynamite.

A department store modeled on American lines has been opened in China, a charge for entrance being made at the door. Well, who can't get a dollar's worth of fun in a "dime store" for ten cents?

Who said "Oriental calm"—Boston Transcript.

A GREAT WOMAN PASSES

One does not need to approve
everything that the late Mrs. Pank-
hurst did in order to admire her for
the courageous and undaunted soul
she was. Nobody can recall the cam-
paign of terrorism which set laun-
ched and carried on in behalf of Wo-
men's Suffrage without something
like abhorrence. The most ardent
woman's suffragist will regret that
such a campaign was necessary in
order to obtain equal political rights
for women. It is the necessity, more
than the fact, that is abhorrent.
Clear shining after rain enables us
of to-day to see that, however un-
womanly many of the things Mrs.
Pankhurst and her followers had to
do to win their victory, they were
justified by the triumph they won and
the consequent enlarged opportunity
they have given all women almost
everywhere.

Emmeline Pankhurst, militant
though she was, was first of all a
humanitarian. It was among the
poor of Manchester slums, and as an
elected Guardian of the Poor, that
she first of all realized the hopeles-
ness of all efforts at social amelio-
ration unless the great heart and
practical mind of woman could be brought
to bear on the shaping and adminis-
tration of legislation. The crushed
and poverty-stricken masses of the
Old Country had no greater friend
than Mrs. Pankhurst was, for her
crusade for "Votes for Women" was
in reality a campaign of hope for
men who were hopeless, and for wo-
men, too. That this woman has pro-
foundly affected the life of nations
and possibly changed the course of
history is true. That no women can
ever again be so completely deprived
of the rights of citizenship as before
Mrs. Pankhurst threw down her
woman's gauntlet in the face of ty-
ranny and complacency is equally
true.

Canada had a special interest in
this departed leader of women. Here
in Canada she made her home for
some years and did much good social
service amongst us, particularly in
directing attention to the social evil.
It seems somewhat of a pity that
she did not live to be elected to the
British House of Commons for which
she was to be a candidate at the next
General Election. But perhaps her
real work had been done outside Par-
liament or legislature. She will be
remembered for many things but
most of all, maybe, for her courage,
that rare brand of courage that made
her willing to face the terrors of
prison for the sake of a principle.
Ernest Crosby sang, "Wee to the
cause that hath not passed through
a prison" and Mrs. Pankhurst saw
her cause pass through prison to Par-
liament, triumphant because she,
with many other courageous souls of
her sex, faced the prison cell, meet-
ing the fate with gladness and count-
ing themselves worthy to suffer for
righteousness sake.

CUSHING.

Miss Allen, of Montreal, spent the
early part of the week at Mascot
Lodge.

Dr. Harold Cushing, of Montreal,
accompanied by his sister, Miss Flo-
rence Cushing and by Miss McDougall
paid a visit to his property here last
Sunday.

Mr. and Mrs. S. Whelehan and little
daughter, Helen, also Miss Katie
Whelehan of Montreal, spent the
week-end in Cushing with their
friends.

Mr. and Mrs. Wilfred Hartley and
little daughter Muriel are spending
a couple of weeks with the former's
mother, Mrs. S. O. Hartley.

Mr. James Mattison, of Winnipeg,
is a guest of Mr. Leonard Young at
the Bungalow at present.

The Misses Poupore of Montreal,
were guests of Miss C. L. White on
Saturday.

We regret to report the some-
what serious illness of Mrs. E. Daw-
son of Stonefield Heights.

Mr. A. C. Pinkerton, of Montreal,
visited his home here last Sunday.

Miss Muriel Nicholls of Montreal,
who returned last week from a trip
to Thorold, Ont., visited friends here
last Sunday.

Rev. F. L. Jobb of St. Mungo's
is away on a fishing trip up the Lau-
rentians this week.

Mrs. S. McKiddie of Vide Sac,
visited her aunt, Mrs. Geo. Nicholls
on Monday.

Mr. C. F. Watson is engaged at
present assisting in the construction
of a residence for Mr. Cowans, of
Montreal, at St. Andrews for which
Mr. W. Cottingham of Lachute, has
the contract.

CUSHING.

The next meeting of the C. C.
Club will be on the night of June 30.
Mr. and Mrs. James Weir of Mont-
real, were the Sunday guests of Mrs.
T. Weir Sr.

Mrs. Wallace and daughter, of
Montreal, were guests of Mr. and
Mrs. Ferguson for the week-end.

Miss S. Wilson of Shawville, was
the guest of Mr. and Mrs. W. Can-
ning on the week-end of June 10th.

Mr. James Armstrong and son Ed-
gar, of Lachute Road, were guests
of Mr. and Mrs. A. Graham on Sun-
day.

Mrs. W. Candlish Sr. and Miss M.
Candlish spent the week-end of June
10th. at the home of Mr. and Mrs.
John Somerville.

Mr. T. Weir Jr. arrived home from
Thorold, on Saturday night after
spending a week there the guest of
his brother, Henderson Weir.

Miss Elsie Graham left on Friday
to be the guest of Miss Gertrude
Parker of Montreal, at her summer
cottage at Lake Guindon, for a time.

St. Mungo's Camp is being put in
shape for the first contingent of
boys, under the directorship of Mr.
Martin, which are due to arrive
shortly.

LAKEFIELD.

Mrs. Gillespie, of Montreal, is a
guest of Mrs. Albert Tomalty.

Archdeacon and Mrs. Overing are
spending a few days at Oerlochen.

Rev. H. P. Mount, of Longueuil, is
spending a few days at his country
home here.

Mr. Brasill of the Diocesan Col-
lege, took the duties of Mr. Flander,
on Sunday last.

Services next Sunday are: Dunany
11 a.m.; Louisa 2.30 p.m.; Lakefield
7 p.m. All standard time.

Miss Lila Millar has returned to
Montreal, after spending a week with
Mrs. Millar at their summer home.

Mr. and Mrs. Charles Andrews and
Miss May Evans, of Montreal, are
spending a vacation at Mrs. Robert
Evans.

A largely attended meeting of the
W. A. was held at the residence of
Mrs. Allan Mount last Wednesday.
A lot of business was transacted.

Mr. and Mrs. Mann were at their
bungalow for the week-end. Mr.
Mann's music was much appreciated
at the service in Trinity Church.

Miss Nellie Forrester of New York,
Mr. and Mrs. Gibson Brown and
young son, are guests of Mrs. Lau-
rence Overing at their summer place.

Mr. and Mrs. Stanley Andrews and
friends have rented Mrs. G. L. Ro-
ger's pretty bungalow for the sea-
son. Mr. and Mrs. Burges, of Mont-
real, were visitors at Mrs. Wm.
Evans lately.

Mr. and Mrs. Walter Naylor, Miss
Janet Naylor and Miss Norah Cross,
of Toronto, were recent visitors at
Rosemount; also Mr. and Mrs. H.
Millar and two children of St. Eus-
tache; Mrs. John Chalk and daugh-
ter, of Hudson, Mass.; Mr. and Mrs.
Ernest F. Mount and two children;
Mr. Fred and Miss May Milner, Mr.
Peter Millar and Mr. Naylor Mount.

Country trade is now City trade

Realize the immense change
in conditions—in just a few
years—that the telephone
has helped bring about.

The store in the smaller
town now carries pretty
much the same up-to-date
styles as the big city store.
Thanks to Long Distance,
Manufacturers' or Whol-
salers' warehouses are prac-
tically at the storekeeper's
elbow. The time required
to telephone an order by
Long Distance is now only
a few minutes; connections
are now often made at once,
without hanging up the
receiver.

And the cost of Long Dis-
tance messages is small—
is often quite a little less
than is generally supposed.

Call up our Manager and
ask him the rate to points
you are interested in.

ANGELICAN S. S. PICNIC

The scholars from Lachute and Brownsburg Sunday Schools combined together for their annual picnic, which was held in Patterson's Grove on Saturday, June 16th. Delightful weather favored the occasion and a varied program of games and athletic events proved highly entertaining to both old and young. The call for refreshments found everyone eager to rest their tired limbs and appease the hungry feeling which a day outdoors creates. Thoughtful parents and willing adult church workers anticipated the enjoyment which an occasion of this kind brings to the hearts of the little ones, and had provided ice cream and candy in addition to a plentiful supply of cakes, sandwiches, etc. After the refreshments had been served, Rev. J. A. Lackey presented prizes to the successful competitors and the occasion was brought to close with the singing of the National Anthem. Thanks are due to all who contributed toward the success of the event.

PRIZE WINNERS.

Little Girls' Race—Minta Butler, Shirley Leggett, Marion Birch.
Little Boys' Race—Arthur Castle, Gerald Ardill, Geo. Leggett.
Girls 7 to 11 years—Margaret Graham, Alvira Ward, Blanche Ardill.
Boys 7 to 11 years—Sam. Milnes, Lloyd Graham, John Ardill.
Boys 12 to 13 years—Robert Miller, Louis Becroft, George Castle.
Girls 12 to 14 years—Doris Boyd, Lulu Miller, Dorothy Steere.
Ladies' Race—Mrs. Conley, Mrs. Milnes, Mrs. Graham, equal; Miss Valpy.
Girls' Three-Legged Race—Gordie Morrison and Alvira Ward, L. Miller and Doris Boyd.
Boys' Three-Legged Race—David Golpin and George Castle, Robert Miller and Lloyd Graham.
Ladies' Three-Legged Race, Free for All—Dorothy Steere and Ruby Bradford, Mrs. Talbot and Mrs. Butler.

ST. ANDREWS EAST.

Mr. John Fair and Miss Fair were at their home Abernethy, for the week-end and visited the proposed Golf course, going in over the new gravelled road.
Mr. B. H. Robertson and daughter Enid were in Montreal during the week.
Mr. and Mrs. J. W. Rodger and Mr. Stanley and Miss Margaret Rodger attended the Cowper-McOuat wedding at Westmount on Tuesday.
Dr. Robert Simpson and Mr. Shirley Simpson were at their home for the week-end, and we understand the family is to spend the summer here.
Mr. Irving Drummond and Miss H. McGregor were in St. Andrews on Saturday.
Mr. and Mrs. Douglas Jeffrey and their three children were guests of Mrs. G. Jeffrey on Sunday, as were also Mr. and Mrs. Hamilton, of Montreal.
Miss Maggie Dewar's house is now open and ready for summer guests.

ARUNDEL.

The Rev. Mr. Labelle, of Nampy, was a visitor to Arundel on Thursday last.
We regret to chronicle the continued illness of Dr. C. C. Brymer, and hope for his speedy recovery.
Mr. Dennis Stanforth, Principal of the Consolidated School at Brownsburg, spent the week-end with his parents at Huberdeau.
Beautiful weather is prevailing here, now, and after the cold and rain, is very welcome. Hay and grain crops are in good condition. The growth for the last few days has been wonderful.
Mr. C. M. Davis, Post-master and Mr. Gallup, Station Agent, of Weir, were in Arundel last Thursday, attending the meeting of the Masonic Lodge.

The Mayor, Mr. C. J. Stanforth, spent Thursday and Friday of last week in Montreal, motoring home on Friday evening with his son, Mr. P. Stanforth.

There will be Divine Service in Laurel Church on Sunday, June 24, at 10.30 a.m. and in the Glen Church at 2.30 p.m. with Grace Church, Arundel at 7.30 p.m.

The Women's Auxiliary of Grace Church, are meeting at the home of Mrs. Wm. Gray, in the village on Thursday p.m., June 21st, at 2 o'clock in the afternoon.

The "Barkmere Golf Club" have purchased the farm, formerly belonging to Mr. Arthur Graham, and are laying out thereon a splendid 18 hole course. When completed, it will offer an extra attraction and pleasure to its members and their guests.

Our congratulations to Mr. Gavin Graham, who has successfully completed his course at McGill receiving his Degree and also his High School Diploma from the Quebec Central Board of Examiners, and as well the Misses Etta Laughren, Hazel Cooke and Gertrude McMahon, who have received their Diplomas from MacDonald College.

The Bishop of Montreal will visit the Parish of Arundel on Tuesday and Wednesday of next week, and services will be held in all the churches in the Parish, during those two days. The complete list is as follows:—

Rockway Arundel	2.30 p.m. 8.00 p.m.
Laurel	10.30 a.m. 2.30 p.m. 8.00 p.m.
The Glen Weir	2.30 p.m. 8.00 p.m.

His Lordship will address the congregation at every service and at several the Rite of confirmation will be administered. Everyone is cordially invited to attend and it is hoped that large congregations will be present at all services.

After a long and painful illness, which she bore with patience and Christian fortitude, Mrs. Alex. Dewar died at her home here recently. The funeral service was held at the family residence and was very largely attended. The body was taken to Grenville for interment. She leaves a husband and one son to mourn her loss. To them both are extended, the sincere sympathies of the whole community.

Another very sad and regrettable event was the sudden death of James W. Bailey, of L'Annunciation, which took place last week, at Clova, on the Transcontinental near the headwaters of the Gatineau River. Mr. Bailey, who was engaged in the Fire Patrol service there contracted pneumonia and passed away very suddenly. The body was brought to Arundel for burial in the Cemetery of Grace Anglican Church. The death occurred on Saturday, June 9th, and funeral was held on the 12th, and was very largely attended.

To the aged parents, his widow, who was Miss Eva Moore, of Arundel, and the other members of the family, may we express our assurance of deep regret and heart-felt sympathy at their sudden and lamentable bereavement.

"Keep in mind you're
Riding on Air!"

AIR lifts the load off the road. The heavier the load the more air it takes. That's why tire makers have worked out the correct inflation pressure for every size of tire for different loads.

Know the correct pressure for your tires, and stick to it. Don't guess it—gauge it. Two or three pounds under pressure cuts miles off the life of a tire.

Keep in mind you're riding on air, and if there isn't sufficient air, you're riding straight into trouble.

Pay a weekly visit to a Dominion Tire Depot and have your tires examined.

You are never far away from a
DOMINION TIRE DEPOT

GEO. Y. DEACON

Nine Years' Progress in European Aviation

Proposal Made That Airway Chiefs of Europe Should Assemble to Outline Concreted Plans for Improve-
Most Urgently Needed

By HARRY HARPER

London.—At a critical stage of their progress, when they are emerging from a phase of experiment into one of practical operation, the passenger airplane lines of Europe are preparing to celebrate the completion of their first nine years of pioneer flying.

It was on Aug. 25, 1919, that the world's first daily airplane express was instituted between London and Paris. With the arrival this summer of the ninth anniversary of that historic occasion, it is proposed that airway chiefs of Europe should meet together to discuss the lessons learned during these nine years of trial and error, and to outline concerted plans for improvements now seen to be urgently necessary.

The two most urgent requirements are to increase the comfort of the airborne passengers, and to stimulate a larger all-the-year-round volume of aerial traffic. As examples of long-distance air transport, it may be mentioned that this summer, ascending from London, travelers will be able to reach Tangier (Northern Africa) in 18½ flying hours, Constantinople in 26, and Teheran (Persia) in 50.

Only Two Passengers

The first passenger airplane on the airline between London and Paris carried two people in a tiny cabin. To-day, as many as 15 and 20 passengers are accommodated in the saloons of European air expresses of 1928, and the standard of aerial comfort has been raised considerably. But it does not compare favorably, yet, with the luxury of a Pullman-car train. The noise especially proves trying to many aerial travelers.

The British Air Ministry is now appointing official experts to fly to and fro between London and the Continent, tracing with special instruments the mingled sounds which assail the ears of passengers in the saloons. In the cabin walls, built more stanchly than has been the case before, sound-deadening materials are to be employed. Engines are not only to be fitted with more efficient silencers, but are to be placed on mountings which will absorb vibration. Important experiments are also in hand with propellers having blades curved specially to reduce noise when rotating.

More Aerial Comfort

The result of these improvements, when incorporated in new passenger-planes, should be to carry aerial comfort a definite stage farther. It is to enable such developments to be carried out without undue delay that the British Government is drawing up with Imperial Airways, the State-aided airline company, a fresh agreement which will enable new airplanes to be acquired much more frequently than has been the case hitherto. The importance of this cannot be over-emphasized.

The chief problem that stands revealed, after nine years of aerial experiment in Europe, is the persistently seasonal character of airplane passenger traffic. During the summer many companies have difficulty in finding enough machines to accommodate the influx of holiday travelers. But in winter the tale is different, passenger figures fall to a low level.

Regularity of Service

Undoubtedly one of the most urgent needs is to insure that in winter the air expresses fly with the same reliability attained during the summer. The overhaul and maintenance of passenger airplanes has reached such a high level of efficiency, particularly in the case of British machines, and the pilots have become so experienced, that the airways between London and the Continent now function almost as dependably as railways in all conditions save those involving mist and fog.

This question of flying in mist and fog, when viewed in the light of nine years' experience, is seen to be one mainly of providing a pilot with some form of artificial vision to replace ordinary vision when he is about to alight upon a fog-obscured airfield. At the start of a journey, provided he has a clear maneuvering space before him, he can take off in fog and climb above it, being guided during his journey by wireless direction-finding. But when he is a mile or so from the airfield which is his destination a problem arises that has not yet been solved.

Valuable Time Lost

Between the time when a pilot has asked to be told his position, and the moment when this information reaches him by wireless telephone from a ground station, his machine will have moved an appreciable distance through the air. During cross-country flying this will not matter. All the pilot needs at such times is an approximate indication of his position. But when an airman is groping through fog quite near an airfield, straining his eyes to catch sight of powerful lights on the landing area, he needs some instantaneous method of ascertaining not only his exact position from moment to moment in relation to the fog-obscured earth beneath, but also his precise height above the ground he cannot see.

An apparatus with which the British Air Ministry has begun to make

full-scale experiments, known as the "leader-cable," is an adaptation to flying of the electrified submarine cable systems which have been employed to guide steamships into harbor during fog. In its aerial application the cable is arranged in a circle round a flying ground. From the cable, radiating constantly upward, is a powerful electric current.

Electrical Signals

As an airplane, groping in through bad visibility, comes within the electrical field of this cable, an instrument on the pilot's dashboard begins to flash out signals from a series of small colored lights. By watching these, and steering accordingly, the airman, even when enveloped in dense fog, can maneuver till he is exactly above the cable. Then he proceeds to follow it round, maintaining his position immediately above it according to the tell-tale lights on his dashboard, which inform him instantly of any deviation. At the same time he gradually reduces altitude. In this latter maneuver, also, he relies upon the guidance of the cable.

There is an additional instrument which tells him from moment to moment as he creeps lower his varying distance from the ground, which may still be invisible to him under its layer of mist and fog. Thus guided automatically as to position and height, he steals down foot by foot through the gloom till he comes within view of the fog-piercing lights on the landing-area, and these give him visual guidance for his actual contact with the ground.—Christian Science Monitor.

Hard Facts

Quebec Soleil (Lib.): (Infantile mortality is still very high among the French-Canadian population.) The birth rate is declining throughout the entire world. The stream of German population, which was overflowing before 1914, is three-quarters dried up since the blood baths of the battle-field; in Italy, the exhortations of Mussolini have not succeeded in persuading the Italians to bring new little Fascists into the world; in France practically the same conditions exist; in Britain births do not exceed deaths by more than 30 per cent.; whilst in the United States . . . but we had better not talk about that. Can we believe that the Province of Quebec will escape the contagion indefinitely? We wish it could. But are the facts likely to conform to our wish? There is ample room for doubt. The figures show a slow but sure decline.

"You can start a roll by tapping the safe, if you can't budget without."

Iron and Steel

London Times (Ind.): (The first volume of the report issued by the Committee on Industry and Trade, dealing with the metal industries, has awakened considerable interest among the students of the technical colleges.) The history of the iron and steel industries shows that technical discoveries have frequently been revolutionary in their effect, and the importance of research work is, therefore, perhaps even greater than in many other industries. That brings us back once more to the technical research institutions, the laboratory, and the individual student. There would seem no escape from the conclusion that the future of the British iron and steel trade and of other industries will depend on the young men who are being trained to-day.

THE USE OF HOOKS

Every home owner should invest in a good assortment of hooks. To hook back doors while open is a convenience as nothing has to be hunted up to hold the door from banging shut when it is wanted open. Hook doors on the inside. Hook covers on feed boxes instead of having weights on them. Hook basement storm windows that have to be opened occasionally. Hook gates, tool boxes, and children's playhouse doors. These doors should never be hooked tightly or the children will some time lock themselves in. If a long staple is used and a good deal of it left on top the wood, the hook will hold the door and yet give it play so they can work it open from the inside.

Euphrates, Not Nile, Seen as Culture Source

Chaldea Diggings Show Civilization Advanced Far Beyond Early Egyptian

Kings' Tombs Found at Ur

Human Sacrifice Was Part of Royal Funeral Rites

Paris.—In an article published recently in "Le Journal" Mr. C. L. Woolley, the English scientist engaged in archaeological excavations at Ur in Chaldea, described some of the discoveries made in the royal tombs uncovered there and discussed their importance from the viewpoint of the student of the earliest civilizations. He said:

Royal Tombs Discovered

"Last season our excavations at Ur in Chaldea were highly successful. We discovered in the cemetery which we opened last year five royal tombs, dating from a quasi-prehistoric period. Four of them are undoubtedly tombs of kings and queens. The fifth is probably the tomb of a prince who never reached the throne. All are in every way different from the tombs then constructed for ordinary mortals.

"Inside there are one, two or three rooms. The walls are made of limestone blocks, the roofs of limestone or bricks. The presence of stone is in itself an evidence of wealth, for Ur is situated in an alluvial valley in which one could not find even a pebble. The nearest quarry is at least 100 miles away.

"Still more astonishing is the architecture of these tombs. Two of them have corbelled ceilings. In the others we find arches in baked brick, the oldest known. It is marvelous to think that these first builders were familiar with the art of making columns and arches, while our Western world learned the secret only at a relatively recent period.

Human Sacrifice Practiced

"The tombs of the kings were indicated, moreover, by the traces found there of human sacrifice. This practice had been undiscovered so far in Mesopotamia. No Sumerian or Babylonian text mentions it. But it is demonstrated by the evidence that the funerals of these prehistoric kings must have been preceded by the massacre of at least a sixth of their servants and courtiers. The remains of nine ladies in waiting, with their heads bound in gold braid and surmounted with gold crowns, gold earrings hanging from their ears, lay at the foot of the sepulcher. Under the porte at the door lie the skeletons of the guards, with their bronze helmets and their lances. Other skeletons strew the floor, even the ox-carts are there, their drivers on the seat, the six oxen, supported by the pole, their thighs and their heads ornamented with lapis-lazuli and silver.

By the Queen Shub Ab lie her ladies of honor, in two rows, and also the harpist, whose arms are still crossed over the harp, an admirable instrument, incrustated with gold and ornamented with a gold calf's head, whose hide is made of lapis-lazuli. The queen's chariot was a light, grayish one, incrustated with the heads of lions, bulls and leopards in silver and gold. The chariot was drawn by asses. Near the asses are the skeletons of the little servants who drove them.

Intended Only for Rulers

"It is curious enough that in the ordinary tombs not only are there no human victims, but also no traces of such a practice, no clay figure to represent the real sacrifice, nothing which resembles the mural paintings. The bas-reliefs, the wooden models of Egypt, in which the human sacrifices

of the time of the first kings are recalled.

"Here at Sumer it seems that this practice was not a survival of a general ancient custom, but was rather an appendage of the sovereign alone, so as to indicate that the sovereign is always different from ordinary men.

At a period less remote, in the historical epoch of the third millennium before Christ, the kings of Sumer and of Achad were deified after death, and, later, even in their lifetime. Perhaps in this it must be seen that the monarchs were regarded as gods who ought to be glorified by the blood of men.

"Three of the four tombs were pillaged. But the robbers did not rifle them completely and we have found some treasures. The funeral alcove of Queen Shub Ab was intact. The Queen lay in a coffin. She wore a cloak covered with agates lapis-lazuli and gold. Her head was weighted down with gold bands, crowns, flowers and ornaments resembling Spanish combs. Beside her was a crown decorated with pretty little figures, representing animals, fruits and flowers. Beside her, too, were innumerable gifts, including gold vases and a finely worked calf's head.

Collection of Great Value

"These objects form a collection of incalculable value for a museum. Not but precedent in the last analysis is only are they specimens of the art of an epoch which we did not know before, but they modify profoundly our ideas of the development of civilization. The tombs of Ur are certainly older than those of Menes, the first king of unified Egypt. We know that the civilization of Egypt began with Menes. Now at that epoch the Sumerian civilization was already old. Any one who has seen the finds at Ur cannot consider them the products of an art in its beginnings. We must conclude from this that the Valley of the Euphrates, and not that of the Nile, introduced civilization into the known world and that Egypt, which took the elements of civilization from the East, borrowed them directly or indirectly from the land of Sumer."

Women's Work

H. M. S. S. in the Leeds Yorkshire Post (Cons.): The idea that every woman, to justify her existence, should have a career over and above her home interests is likely to create a feeling of dissatisfaction and an impression that work in the home is of secondary consideration in the minds of those women whose one thought is how soon they can get through an unpleasant job. But those women, "the majority" who form our great, middle class, organizers of happy, smoothly-running homes, have every right to be disappointed with those in the forefront of our women's movements who claim that unless a woman is earning money she is a drag on the community.

Queensland Reef Is to Be Explored by British Party

Life and Habits of Tiny Ocean Organisms Are to Be Investigated

London.—The secret of the formation of the Great Barrier Reef, 900 miles north of Brisbane, will be sought by an expedition of nine members, acting under the auspices of the British Association, which has just left Tilbury docks on the steamer Omodeo for Australia. The party is led by Mrs. Yonge, and includes several other women; it expects to spend 14 months on Low Island, not far from Cairns, a seaport on the coast of Queensland, studying the origin and the lives and habits of the tiny ocean organisms which are responsible for building the reef.

"The ultimate object of the trip is of great economic value," said Dr. Yonge before sailing. "It will cost £10,000. All are looking forward to solitude, but there will be much work to do. We have a wireless apparatus and five tons of scientific apparatus as luggage. We will live in wooden huts, but will sometimes visit the mainland.

The Great Barrier Reef extends more than 1,000 miles along the coast of Queensland and is said to be the greatest coral reef in the world. Its water contains many marine forms which have never been classified. The growth of the coral itself has never yet been satisfactorily explained, and it is hoped that the expedition will be able to ascertain how the mollusks maintain themselves and how they are fed.

According to Sir Matthew Nathan, Governor of Queensland, the chairman of the committee of the British Association, "the original purpose of the expedition is to investigate the food of living organisms in the tropical seas and the growth of such organisms, with special reference to corals. A study is also to be made of the growth of other organisms, some of which have high commercial value, such as the fish, beche-de-mer, which is used in China and Japan for making soup, the pearl oyster and the Trochus shell, from which buttons are made and from which a larger industry may now be expected to develop."

"You're generally left out when you've been taken in."

New Use for 'Gamp'

Womn Hikes Through African Jungle With Umbrella as Main Protection

Bombay.—Hiking through jungles of darkest Africa with no more formidable weapons than a sunshade and an umbrella is a form of exercise that appeals to Mrs. Alicia Renthall, an Englishwoman who makes globe-trotting her hobby, and is now touring India. Mrs. Renthall has already been around the world six times.

For 20 years Mrs. Renthall has been walking wherever she can, using steamers and railroads only when necessity demands it. Her first big tramp was in 1909, when she covered 300 miles on foot across central Africa. Four years later, with only seven or eight native bearers, she crossed the African continent from west to east in 11 months, tramping nearly 4,000 miles.

"I have been quite close to lions and leopards in the bush," she said, "but they have never harmed me or any of my carriers. I always go unarmed, and I think wild animals in the forests know by instinct that I have no desire to kill. I wear just an ordinary khaki skirt, puttees, strong shoes and pith helmet.

Mrs. Renthall has just crossed Africa from east to west. She has visited Tibet and the Himalayas, Arabia, Syria, Palestine, Egypt, Madagascar, Sarawak, New Zealand, French Indo-China, San Pedro, Guatemala, British Honduras and the East Indies.

DOUBLE PURPOSE

A tramp was at the door of a newly-married couple.

"What do you want," demanded the young husband. "Dinner or work?" "Both, please, sir," replied the tramp.

The husband disappeared and presently returned with a plate of biscuits. "Eat those," he exclaimed savagely, "and you'll have both."

Thos. Alva Edison Inventing Wizard

An Appreciation Delivered by
Arthur Williams at a Din-
ner in Honor of Mr.
Edison in New York
on May 24th Repro-
duced in Part

LIFE AN INSPIRATION

The ancestors of Thomas Alva Edison, in which honor we have gathered to-night, came here directly from Holland, landing in this country on the shore of New Jersey, near Staten Island, about 1730. There John, the grandfather, son of Thomas, the great-grandfather of the man to whom this evening's tribute is offered, was born. Following the American Revolution John, who took the side of the Loyalists, emigrated to Canada, where, in Digby, a seaport town of Nova Scotia, in the year 1804, a son, Samuel, the father of Thomas Alva Edison, was born. In 1828 Samuel married Miss Nancy Elliott, the eighteen-year old daughter of Rev. John Elliott, a Baptist clergyman. Later he came to the United States and in the year of 1842 made his home in Milan, Ohio, where, on February 11, 1847, Thomas Alva Edison was born and passed the first seven years of his life.

It is recorded that as a young boy he went through many adventures, perhaps his most thrilling experience, resulted from his building a fire in a neighboring barn which was entirely destroyed. For this young Edison was subjected to a severe whipping, not in his father's woodshed, but openly in the public square. In 1854 the family moved to Port Huron, Michigan, where Edison spent three months in school—his only formal school experience of record.

Perhaps one of young Edison's chief assets at the time was his capable and cultured mother who did much for his education and apparently showed just the right degree of interest and sympathy in the messianic up which was a necessary result of his chemical and other equipment; and the early experiments in which he was constantly engaged.

At one time he engaged in the publication of a small newspaper in which one imagines he was proprietor and manager, reporter, typesetter and pressman and probably postman as well, all in one.

Telegraphy was his next interest. In the year of 1853, at the age of 16, he was considered a full-fledged and expert operator. From here on began the young Edison's marvelous career of invention and development through which modern life in every phase, has been so constructively affected.

His first patent was granted on July 1, 1859, for, as strange as it may seem to-day, a vote recording machine. Since that time no fewer than 1,328 separate patents for original and important work have been granted by the Federal Government. Their scope covers, in addition to the vote recorder, stock tickers, typewriters, telephonic and telegraphic instruments, the phonograph, the incandescent lamp, many controlling features of central power plant construction and operation, electric railways, motion pictures, ore milling, cement manufacture and poured cement houses, storage batteries, mimeograph, and the transmission of electric energy without the aid of wires. His application for the latter patent was made two years before the publication of the work of Hertz. It is interesting to note that so great was his appreciation of the work of Marconi that he disposed of his patents to the Marconi Company, though its competitor's offer was on a very much more favorable basis. One invention, the tasimeter, by which infinitesimal degrees of temperature, however remote, are measured, while a most important scientific contribution, was not patented but was freely dedicated to the public. This instrument is used to demonstrate the heat values of remote stars, such as Arcturus. As important and far-reaching as are the things of which we have been speaking, they become dwarfed with the man himself and his wonderful mind and charming personality.

One of Mr. Edison's outstanding characteristics is his modesty; another his insatiable desire to obtain facts—to learn; nothing seems too small, as nothing seems too great to excite his deepest interest, especially when an item of added information can be gained or something of human service is promised. When visiting an electrical or mechanical exhibition, he will stop and carefully study every example of automatic machinery which eliminates exhausting human labor and the element of monotony in one's work.

Another outstanding characteristic of Mr. Edison is the directness with which he reaches his conclusions and the simplicity and clearness of the language with which he expresses them. An illustration is found in his remarks when he first saw the remarkable illumination of the Buffalo Exposition some years ago—the most extensive and effective up to that time. Gazing upon it, seemingly very much impressed, he remarked to a friend standing by, "All the incandescent lamp filaments through which this marvelous effect is produced would not fill a small-sized man's hat." As interesting indica-

tion of his resourcefulness is found in the way in which he makes old enemies serve his purposes as new friends. Thus on one occasion, while visiting his laboratory, he pointed out that the thing which had bothered him most in the development of the incandescent lamp—the inside blackening which greatly reduced the candle-power—he was using to advantage in his more recent work—I believe in the manufacture of his new storage battery. And it is interesting to note that his work in magnetic separation of iron ore is now effectively employed in removing impurities from fuel before it reaches the boilers of the great power plants of this city.

It is almost unnecessary to mention that throughout his life he has been oblivious to time, food and personal comfort. During the construction of the Pearl Street plant where for months he worked day and night, on the streets and in the building, a bedroom was provided on one of the upper floors that he might not lose time going home or to a nearby hotel. He would sometimes come into the station so exhausted that instead of climbing the intervening stairs he would throw his coat on a pile of Edison underground tubing lying on the floor and snatch a few minutes or hours of sleep as the case might be.

In material as well as human values Edison's work is almost of incalculable magnitude, and judged by which he may well be called "the world's greatest benefactor." If measured in terms of money, there exist to-day well established, conservative enterprises which owe their origin or development in some part to his genius, which closely approximate the value of all the gold dug from the earth since America was discovered. Stated in another way, these values represent no less than five times all the money in circulation or five times the entire stock of gold in this country in the year 1927. The annual contribution of these enterprises to the national life represents approximately one and one-half times all the money now in circulation and, through employment, the genius of Edison provides or influences the support of practically one out of every ten of our population. These figures, as extraordinary as they are, do not include many related industries which in themselves again represent enormous aggregates of value, both material and human.

Entering this building to-night, we passed through that extraordinary area of publicity by light, often called the brightest spot on earth—Time Square. Standing there, thinking of Edison and his work, we may well remember the inscription on the tomb of St. Christopher Wren in St. Paul's, London, "If you would see his monument, look around." And how appropriate is this inscription wherever we find modern life and civilization, in every branch of which is found the genius and spirit of this marvelous man. As long as the world survives, the name of Edison will remain an outstanding symbol of immeasurable genius, accomplishment and public service.

Sal: Gosh! Your new fur "ben-
nie" surely is the cat!

Coast-to-Coast Trip Shows Air Mail On the Job

Correspondent Sees For Him-
self How Planes Cut 3000
Miles to 31 Hours

The air mail has shortened the 3,000 miles between New York City and San Francisco to 31 hours. Mail posted in Wall Street on Monday morning is delivered in Market Street late Tuesday afternoon. To learn how this service operates, The Christian Science Monitor sent a staff correspondent over the line. Here is his account of what the air service is doing and some of the plans for the near future, all of great interest now that Ottawa is considering a trans Canada air way.

By a Staff Correspondent
New York—"Air Mail!"
Men hurried to their posts in the National Air Transport hangar at Haddley Field, N.J., the chief air mail terminal of the East. An airplane appeared overhead, circled the field, and dropped to earth with a perfect three-point landing.

Two men ran out and led it to its mooring. The others removed the mail from its hold and rushed it to a station where clerks sorted it rapidly. Meanwhile a mechanic was warming up the airplane that would soon leave for the West on the first lap of a flight across the continent. I was strapped into a parachute and hoisted into the front cockpit. The motor roared. The anchor blocks were pulled away. We taxied down the field, turned, and took off into the wind.

San Francisco at that moment was 3,000 miles away—the same destination toward which the Pony Express raced less than three-quarters of a century ago. Hard-riding horsemen, dashing over short-relays, spanned the 1,400 miles from the end of the railroad at St. Joseph, Mo., to the Golden Gate. Their speed thrilled the nation; they rode it in eight days.

Coast to Coast

And now, from coast to coast, over more than twice this distance, a letter is delivered in 31 hours. To send a letter winging on its way by air has become as simple as buying a loaf of bread at the corner grocery, and mail is now being carried over the country on more than a score of air routes.

I turned amid the mail sacks and express packages carefully stowed before me in the cockpit and looked at my pilot, Earl Ward, a confident-looking young man intent on his job.

The fields of New Jersey, occasional towns, the rusty hills of Pennsylvania, were flitting by in a moving panorama. We in the plane were a tiny world apart.

Only two phenomena were particularly noticeable. One was the bumping caused by air pockets; the other, the desert-clear quality of the air.

At 4.20 in the afternoon the tower of the Cleveland Union Station pierced the horizon and soon our plane settled on the Cleveland field. We had been in the air three hours and a half.

"I'm sorry," the airport official said, "but we can't send you on to-night. You see, we take the mail into weather where we wouldn't think of sending a passenger."

Air Mail Looks Ahead

In spite of the blue sky at Cleveland, there was rain in the West. The air mail sees all. With its elaborate system of radio and wire communication, it can tell exactly the temperature, barometric pressure, cloud height, or "ceiling," wind velocity and visibility at any spot along the route.

The official said that in Chicago the planes for the West would be delayed and by taking a train I might catch the one reserved for me. On the way to the station the chauffeur told me about Pilot Ward.

"One of the crack fliers in the service," he said. "Used to be a lieutenant in the marines. Holds the record between New York and Cleveland of two hours and 26 minutes."

In Chicago I found that the west-bound plane had left only 30 minutes

Would Be Fine Around A Melon Patch

RATHER SUGGESTIVE OF A "KEEP OUT SIGN"

Part of a barbed wire fence erected at the entrance to a South African diamond mine which has been temporarily closed to prevent the market from becoming flooded with the precious stones, thereby lowering their value.

behind schedule. The management changed my reservation to the following day.

The next night I met Pilot Wagner, a one-time army flier and veteran of seven years in the air mail service, and "one of the best."

We talked of expansion and improvements in the service. National Air Transport operating regular passenger service from Chicago to Dallas, will soon extend that service over the Chicago-New York branch of the route.

Boeing Air Transport, giving mail, express and passenger service from Chicago to San Francisco, is to install three giant passenger planes, three-motored and with accommodations for 12 persons, for week-end excursions.

Testing Radio Beacons
The Department of Commerce is experimenting with radio beacons, to be placed on either side of the charted course.

As soon as these beacons are operating, schedules will be changed so that the flying time from coast to coast will be two nights and one day, instead of two days and one night, as at present.

Seven-thirty, our scheduled leaving time, arrived, but not the mail from Minneapolis. We waited. Overhead a 500,000 candle-power revolving beacon shot its beam for miles. Finally came the cry: "Air mail!" Quickly the sacks were stowed and we were off.

I found the passenger cabin like the interior of a very small coupe. Finished in light green enamel, it had a narrow, leather upholstered seat designed for two lean passengers. Windows, 12 by 17 inches, built into each door, were adequate for sight-seeing. A small dome light hung above and a heater from the exhaust below kept the little stateroom warm enough.

A license, granted by the Aeronautics Bureau of the Department of Commerce, said that the airplane was made by the Boeing Company of Seattle, had a wing span of 44 feet 2 1/2 inches; length over all, 33 feet, 5-16 inches; carried a useful load of 2,470 pounds; had a weight, empty, of 3,230 pounds and a gross weight of 5,700. Its engine was a Wasp, made by the Pratt-Whitney Company. The 36 planes operated by the line are almost identical in design and equipment.

Emergency Landing

The ship flew so smoothly and the motor droned so soothingly that I fell asleep. When I awoke we were circling down to the revolving beacon on the emergency field at Rock Falls, Ill. Fog ahead forced us to make ourselves at home in a cold little shack until morning.

At 6 o'clock we went on to the eastern bank of the Mississippi, where, because of poor visibility, we landed

on another emergency field surrounded by acres of cornstalks. The caretaker drove us to his farm home near by for a substantial morning meal.

Then we were off again for Iowa City and Omaha, where mail and baggage were transferred to another plane and I met my new pilot, E. M. Allison, introduced as one of Boeing's "star-men."

We set out within 10 minutes and bucked a heavy wind to reach North Platte at 3.49 o'clock that afternoon. The farms were laid out in neat 160-acre squares, with fences running directly east and west, north and south, which is of great assistance to the pilots. Two hours later the brightly painted roofs of Cheyenne welcomed us.

There I met Pilot H. A. Collinson, described as "an old-timer in the air mail in these parts and never had a serious mishap." We took off again immediately, making for a break in the fog that covered Sherman Hill. It closed before we could get through and Mr. Collinson wheeled back to town.

Through to Rock Springs

Late at night we got through to Rock Springs, Wyo., the halfway point between Cheyenne and Salt Lake. Red lights outlined the field against a jet background.

We ate at Rock Springs and waited until "unlimited visibility" was reported. In spite of that forecast, we met a rim of fog over the Wasatch Mountains and climbed to 12,500 feet to top it.

At that height we could see over the roof of the "stuff," as pilots call all water vapor collectively. The full moon, lighting the trampling mists, transformed them into glowing, white baby blankets. Mail pilots see more of the beauty of nature every day than the average city dweller in half a hundred two-week vacations.

Crossing the clouds we circled sharply down to the field at Salt Lake City, a drop of 9,400 feet. As soon as the mail was re-sorted, we were on our way again with a new plane and another pilot. We scraped the tops of the Ruby Mountains so closely that pebbles and leaves were easily distinguishable, and then found ourselves in Elko, Nev.

Another pilot, Huking, took the ship. He informed me that the last pilot, Ellis, could "fly anything, anywhere."

Over Mountain Ranges

We flew over mountain ranges and tan-colored valleys, where countless sheep nibbled and on above alkali plains to Reno, with its brave greenery, the air mail gateway to the Sierra Nevada. There I learned that Huking, in spite of his seeming youth, had been in the aviation "game" for 12 years and knew all about aircraft.

The next pilot was C. K. Vance. His lap in the relay led across one of

Continuity

Can you recall that self of long ago?
They ask, the slightest ones, They
do not know
That this brocaded matron that is I,
Upon whose wit and judgment they
rely,
Is the lank child at whom they used
to mock,
With pinafore exchanged for Paris
frock.
How solemnly I wear my staid dis-
guises,
That they should think me suddenly
grown wise!
Oh you who with your stature change
your heart,
When the gray hair in which I play
my part
Is laid aside, the wrinkled skin put by,
Running along the fields of morning, I
Shall seek—and find—some other
child to tell
How well I've fooled you all, my
friends, how well.
—Freda C. Bond.

the most difficult and dangerous stretches of the entire route. "So, you see," one of the mechanics at Reno explained, "they were bound to pick an expert to fly from here to the coast."

Mr. Vance took us over a territory in the Sierra Nevada Mountains of California in which there was no landing for 75 miles—only pine-covered mountains and green ravines, which never would be seen by tourists, were it not for the air line, fitted by the little cabin windows, all too transient in their loveliness.

The plane came down for exactly two minutes in Sacramento to drop a packet, and then winged its way straight to the Oakland Municipal Airport—and journey's end.

We were 17 hours behind schedule, but still two full days ahead of the mail trains.

Discounting my 24-hour stopover in Chicago, I had been en route just 48 hours from coast to coast. We had been delayed by unfavorable weather, but never once by motor or other mechanical trouble. Every link in the air mail chain did its work perfectly.

"Tom is an awful dumb-bell, isn't he?"
"I'll say so! Why, even if he had any brains, he wouldn't know how to use 'em."

Best To Take Your Freckles As You Find Them

If you are troubled with lentigo the only thing to do is to make the best of it, advises Earl C. Gregory in the current issue of "Physical Culture Magazine." Lentigo, by the way is no dread disease but merely the common, though often hated freckles.

Mr. Gregory says, "If you freckle, you freckle, and that's that. The susceptibility is inborn. That is, whoever once develops freckles will have them appear again under similar conditions of exposure to summer sun light."

The writer in "Physical Culture" further points out that one has no more reason to be mortified by freckles than by a head of hair naturally wavy. "Freckles," he continues, "indicate a body high in vitality and there is something about the color and texture of a woman's skin that allows the freckles to harmonize so with the skin that the spots seem to belong; they simply fit."

While freckles can be removed, according to Mr. Gregory, by such preparations as three parts of glycerine to one part tincture of iodine, the effort is not worth the irritation it causes. "And," he concludes, "in order to keep them for reappearing a woman would have to deprive herself of the sun rays, which are necessary to make her a vitally strong woman. Hence she must choose between the ill health of a shut-in without freckles, and the better health of an outdoor woman while taking her chances with the freckles. And what sensible woman would give up her chance of health through outdoor living, to gain a concession to vanity?"

A Chance for Canada

London Daily Express (Ind. Cons.). It has been stated before the Canadian Immigration Inquiry this week that there are 50,000 women and children living in Great Britain to-day whose men-folk have crossed the ocean to Canada. The British Government is willing to pay 50 per cent. of the cost of a great family reunion scheme. We have often criticized the supineness of Whitehall in promoting emigration, but in this instance it is doing all that can be expected of it. What will be Ottawa's answer? The Canadian Government have here a chance to encourage British immigration in the way that will most aid to Canada's immediate and permanent well-being.

LOCAL NEWS.

Miss McCaig left for her home in Huntingdon.

Mr. J. W. Brunt left this week to join his family in Montreal.

Mrs. R. McArthur left on Wednesday for Norway Bay for two months.

Misses Brundage left this week to spend the summer at their home in Marleton.

Mr. Elmer Ryan, of Gananoque, spent a few days in town last week, attending the Fair.

Miss M. Davis, of Ottawa, is the guest of her sister, Mrs. W. J. Deacon, at Lake Louise.

Miss Ruby Goodfellow, R. N., of Montreal, is sailing by S. S. Letitia, on the 29th, for Europe.

Mr. and Mrs. Perry, of Montreal, were guests of their daughter, Mrs. H. Cousens for a few days.

Mrs. Geo. Bennett, of Carillon, is spending a couple of weeks visiting relatives and friends in Lachute.

Miss Nancy Archibald and Miss Phyllis Durant, of Montreal, were week-end guests of Miss Barron.

Miss Emily Barker and Mrs. A. Burnett have opened their cottage at Daleville for the summer months.

Miss M. Mott, of Rawliff, spent the week-end in Lachute, visiting friends and attending the exhibition.

Master Douglas Goodfellow is attending the Ormstown Fair this week with his uncle, Mr. Robert Goodfellow.

Mr. and Mrs. Campbell McQuat, of Cowansville, and Miss Mary Rodger, of Montreal, are guests of Mrs. Geo. Calder.

Mrs. James S. Elliott, of Prescott, Ont., has returned home, after spending a pleasant week with friends in Lachute.

Mr. and Mrs. Howard Nicoll and little son Kenneth, of Montreal, are spending a few weeks in town, visiting their many friends.

Miss Ann Yuisheda and Annabelle Hume motored from Montreal on Saturday spending a short visit at the latter's home in Hill Head.

Mr. Guy Todd, of Montreal, and Mr. George Todd, of Hawkesbury, were guests of their mother, Mrs. J. W. Todd, for the week-end.

Mrs. R. D. Mott and Mrs. Wm. Hanlon, of Montreal, are spending a few weeks with their parents, Mr. and Mrs. R. Mott, of Rawliff.

Dr. and Mrs. Hunt and sons, of New York, were guests of Mrs. A. McArthur, prior to their departure for a six week's visit to Kennebunk.

Mr. and Mrs. McCracken, of Atholton, and Mr. and Mrs. G. Price and son Bert and Miss Willow Lavery of Montreal, were guests of Mr. and Mrs. W. K. McArthur for the week-end.

Mr. and Mrs. Chas. E. Gales and daughter Doris left this week to return to their home in Boston, after spending a very pleasant holiday in Lachute and Montreal, renewing acquaintances.

Mr. Jno. Westgate, of Medford, Mass., is spending a few weeks with his relatives and renewing old acquaintances in Lachute and Mille Isles where he was formerly postmaster and general storekeeper.

Mr. Brunt, would like to take this opportunity of thanking through the paper, the pupils of grades 7 to 11, for the splendid present of books, and to assure them that both the kind thought and the books are appreciated and to wish them success.

James Logan of the Academy has won a silver medal in a competition held among the High Schools of the Province, the writing of an essay on "Canada since Confederation." Eight silver and forty-five bronze medals were awarded, so that he was one of the first eight.

BIRTH.

HILL.—On Sunday, June 24th, 1928, at Lachute General Hospital, to Mr. and Mrs. Leonard Hill (née Mildred Mone Wilson), of Brownsburg, a son. Both well.

ENGAGEMENTS.

Mr. and Mrs. B. F. Rodgers, of Lachute, Que., announce the engagement of their daughter, Catherine Elizabeth to the Rev. W. D. Grant Hollingworth, of Knox Presbyterian Church, Calgary, Alta., son of Mr. and Mrs. J. W. Hollingworth, of Montreal. The marriage will take place in September.

MARRIAGE.

ADAMS.—ARMSTRONG.—On June 23rd, by the Rev. A. George MacKinnon, at the home of the bride's parents, Margaret Elizabeth Grace, daughter of Mr. and Mrs. James Armstrong, Lachute Road, to Eric Edward, George Adams, of Plymouth, England.

TAYLOR.—MACGREGOR.—On June 16th, at Dorval, Que., by the Rev. W. A. Hamilton, Violet Ethel, daughter of the late Wm. and of Mrs. MacGregor, formerly of Lachute, Que., to Leonard Robert, son of the late Herbert J. and of Mrs. Taylor, of Chateaugay, Que.

WEDDING BELLS.

ADAMS—ARMSTRONG.

The wedding of Miss Margaret Armstrong, daughter of Mr. and Mrs. Jas. Armstrong, Lachute Road, to Mr. Eric Adams, of Plymouth, England, took place Saturday afternoon, June 23rd, at five o'clock, standard time, at the home of the bride's parents. The ceremony was performed by the Rev. A. Geo. MacKinnon; the bridal chorus being played by Miss Ruth Todd.

The house was tastefully decorated with ferns, peonies and snow-balls.

The bride, who was given away by her father, wore a gown of white flat crepe and chintilly lace with an embroidered chiffon net veil, draped in bonnet effect. She carried a shower bouquet of pink roses and lily-of-the-valley.

She was attended by her cousin, Miss Florence Armstrong, as bridesmaid, who wore a gown of white georgette with a bandeau of brilliants and carried a bouquet of pink roses. Mr. Douglas Todd acted as best man.

Following the ceremony a sumptuous supper was served.

Later Mr. Adams and his bride left by St. Andrews East, to spend their honeymoon in New York, the latter travelling in a dress of sand flat crepe, casha coat and powder blue felt hat, with shoes to match, and wearing a beautiful fox fur, the gift of the groom.

On their return they will reside in Montreal.

HOSGOOD—MARTIN.

The marriage of Lewena Annie, eldest daughter of Mrs. E. V. Martin and the late Mr. Paul Martin, to Frederick George Hosgood, son of Mr. Geo. Hosgood and the late Mrs. Hosgood, took place on Saturday afternoon, June 16th, in the United Church, Brownsburg, Que., Rev. T. C. Cassidy officiating.

The church was prettily decorated with lilacs and other spring flowers. The bride, who was given in marriage by her brother, Mr. Percy Martin, wore a gown of white georgette trimmed with lace and her veil of lace was caught in place by clusters of orange blossoms and lilies-of-the-valley. She carried a shower bouquet of pink roses.

The bride was attended by Miss Edna Woods, as maid of honor and Miss Doris Reid as bridesmaid, both wearing maize georgette over pink, with maize hats and carrying arm bouquets of pink carnations. Mr. Wm. Brown acted as best man and Mr. Lorne Martin and Freddie Witham as ushers. Mrs. Wm. Cumbers Jr., sister of the bride, played the wedding march.

Mrs. Martin, mother of the bride was dressed in blue silk flat crepe, trimmed with sand and hat to match. After the ceremony a reception was held at the home of Mr. and Mrs. T. Woods, grandparents of the bride, and following the reception Mr. and Mrs. Hosgood left on a motor trip to Ottawa, Nanawee and other points. For travelling the bride wore a powder blue georgette dress with small hat of felt and mohair to match and a navy coat with small fur collar. Upon their return they are taking up residence in Brownsburg.

ZIMMER—VOWLES.

The marriage took place at two o'clock, June 19th, at the Brownsburg Baptist Church, of Ruth, youngest daughter of Mr. and Mrs. F. C. Vowles, of Brownsburg, to Mr. Ernest John Zimmer, son of Mr. and Mrs. E. Zimmer, of Brownsburg. The Rev. J. Ford performed the ceremony. Master Francis Kettle, nephew of the bride, played the wedding march.

The bride, who was given in marriage by her father, wore a gown of duchesse satin, trimmed with pearl beads, and her veil was held in place with sprays of orange blossoms. She carried a bouquet of pink roses and was attended by Miss May Petley. Mr. Theodore Zimmer acted as best man and Mr. D. Tomalty as usher.

Following the ceremony the wedding breakfast was held at the home of the bride's mother.

The happy couple left on the evening train, followed by a shower of confetti and good wishes from their many friends. They will reside in Montreal.

They were the recipients of many beautiful and costly presents.

DEATH.

PASSMORE.—On Monday, June 18, 1928, died at 2426 Paarthensis St., Montreal, William Robert Passmore, beloved husband, of Eunice May Wilson, of Brownsburg, Que.

WOOD.—At Santa Monica, Calif., on Tuesday, June 19th, 1928, James Wood, eldest son of the late Mr. John Wood, and Mrs. Wood, of Vankleek-Hill, Ont.

IN MEMORIAM.

KING.—In ever loving memory of my dear little Grand-child, Dorothy Margaret, infant daughter of Mr. and Mrs. W. King, who was lent to us for only a "little while." I should like to have seen His kind look when He said "Little Dorothy come unto me."

Mystic Jewels Are India's Pride

Diamonds That Weep When Moon is Full, Elephant and Cobra Pearls, Emeralds and Rubies That Bring Rain and Disease, Hidden in the Vaults.

BAFFLE SCIENTISTS

London—Mysterious and inexplicable are the gems that abound in the Indian Empire and Burma, even in these days of the twentieth century. Some jewels come to the notice of the scientists and they cannot explain them or their origin. They are not mere freaks of nature.

There are diamonds that seem to weep when the moon is full; there are pearls from the head of the King Cobra which make rain; there are rubies, scarlet purple in tint, which cure blood poisoning; there are emeralds which remove skin diseases, gems wonderful to behold and almost impossible to value. But these are held secret, hidden carefully for generations in gigantic vaults, the entrance to which is known only to the heads of the old families who are proud to possess them.

Some of them come to light on rare occasions, when an old palace is pulled down to make room for a factory, or a poor agriculturist comes upon a hidden store in a new plot of ground which he is trying to bring under cultivation.

Find a Radioactive Diamond

A few months ago a common-looking antique necklace, belonging to the royal family of Tanjore in south India, was sold in the Sowkarpeth or Bankers Lane in Madras. The purchaser, desiring to give it as a present to his daughter-in-law on New Year's Day, gave it for resetting. The jeweler found that the diamond, hanging as a pendant, was a very peculiar one, brought it back to the owner and suggested that it should be reset as a ring. It weighed five and one-half carats. The owner kept it to consult other jewelers.

On examination it was found to contain wonderful properties. It was generally of a bluish tint, but during the day it took on a rosy shade. The moment it was brought under the direct rays of the sun, however, it turned full blue. When taken into a dark room it gave out no light at all. In the evening he went to open the safe and was astonished to find the whole safe flooded with brilliant moonlight. The diamond was illuminating the whole interior of the safe. He lifted it up and found that the wad of cotton wool on which he had placed the jewel was wet.

It was found that the stone lost its luster when the moon waned and would not give any light during the day. Tradition has it that there are jewels called the sun and moon stones which glow in darkness only when the sun or moon is shining. The mythology of the Hindus gives a story of how Krishna, the eighth incarnation of Vishnu, had to fight a bear demon for the sake of a sun stone.

Elephant Pearl from Ceylon

From Ceylon comes the wonderful elephant pearl. "Until I examined this jewel myself," said Dr. Joseph Pearson, director of the Colombo Museum, "I had been under the impression that the references to these pearls in Oriental literature were more of a kind of mythological legend than reality." Mr. O. Rodrigo, of Borella, Ceylon, the possessor of this unique gem, had taken the elephant pearl to the director for his opinion.

It weighs twelve carats, has shining brilliant hues with creamy golden tint and is supposed to be 2,000 years old. The pearl was examined under a microscope and was found to have the basis of ivory. All the old tests of Indian jewels were tried, and it came out triumphant under them all. It was examined by the American Consul at Colombo, W. A. Leonard, and he found it to be perfect. Under its almost transparent pearl film one could see a complete form of a white elephant, correct in every detail.

Mr. Rodrigo was flooded with requests from New York collectors, who had heard of it through Mr. Leonard, with offers of purchase. "It is one of Ceylon's proud possessions, and it will never leave this island," said Mr. Rodrigo in reply to these requests.

Varaha Mihir, an Indian writer on jewels of the fourth century, mentions that an elephant pearl is found in the head or the root of the tusks of an elephant born when the sun is passing through the sign of Capricorn with the moon in the Pushya or Shravana. "This pearl," he says, "is never to be bored or valued and so in this science of gems I cannot give its value."

Describes Mystic Pearls

Varaha Mihir also gives eight different kinds of pearls that are of mystic value: one, elephant; two, cobra; three, shell; four, conch; five, storm; six, bamboo; seven, crocodile; and eight, wild bear. He gives the properties of the various pearls and indicates how and when they are found. The storm pearl is said to drop from the skies in a first cloud burst and is of the color and size of the pomegranate seed, shining like a flash of lightning and making the

possessor immune from storm accidents or dangers of electrocution.

Tradition says that the cobra jewel shines in the night and that the cobra feeds on the toads and mice and insects that are attracted by its light. The cobra takes it out and puts it on the ground, lying concealed beside it and preys upon the rodents which come near. He swallows it again and goes back to his hole. The jewel is said to melt and turn to poison when he is angry and so it is difficult to get, but there are instances where such jewels are found.

In the Poona district, 200 miles south of Bombay, a rich Zaminder obtained one such jewel. It has the property of curing all snake bites. It sticks to the wound only when there is poison in the bite and falls off when the poison has been absorbed.

Portrait in a Ruby

H. W. B. Moreno, member of the Legislative Council of Bengal, Calcutta, is the proud possessor of a ruby, which contains under its shining surface the image of a dark man, dressed in pagree (the national headdress of the Hindus) and clad in white robes. The face is dark brown and the closer one looks at the image the more luminous does the face appear. The director of the Geological Department of the Government of India pronounced the ruby one of great intrinsic value and said that it was a freak of nature without a parallel. This image appears clear through a thin halo of scarlet cloud forming the surface of the ruby. How the image came to be inside the ruby is a mystery as deep as that of the elephant pearl.

The King Thebaw, of Burma, had in his possession a wonderful pair of earrings made of rubies, containing underneath their surface perfect lotuses. These were stated to have the power of curing all blood poisoning. King Thebaw wore them to the day of his death. He gave them on that day to a devoted servant and they have not been heard of since. The Maharajah of Budi has in his possession an emerald cup of the deepest green tint. All skin diseases are cured by using the water kept in that cup for three hours in the sun.

A chief in Bombay has a mortar and pestle carved out of whole sapphires and gives the medicines made therein as a cure of anaemia. In Travancore state there is an image of Ganesha, the Elephant God, cut out of a ruby and an image of Narayan, or Vishnu, cut out of a blue sapphire. Some of these jewels are only taken out on ceremonious occasions when they are worshipped and then restored to their secret vaults.

Rocket Explosions Propel Motor-Car at Great Speed

Solution Is Sought of Flying in the Highest Altitude of the Atmosphere

Berlin.—The "Opel Rocket Car," propelled forward by the explosion of rockets placed in the rear of the machine, was demonstrated for the first time on the Avus Speedway, attaining a speed variously estimated at 100 miles an hour. Fritz von Opel was at the wheel.

The car started with a terrific roar, emitting a sheet of flame and a cloud of yellow smoke as the successive rockets exploded. The machine gained momentum as one rocket after another, all of uniform power, was shot off, the car taking a lunge forward every time a fresh rocket exploded.

Von Opel said that the machine was not intended to revolutionize motoring, but was a practical step toward a solution of the problem of flying at a terrific speed through the highest altitudes of the earth's atmospheric strata, with the object of making a flight between Europe and America within a few hours or encircling the earth within a day.

A motor-driven airplane, he said, ceases to be effective at the highest altitudes because of inability to carry a requisite amount of oxygen. This obstacle, he said, can be overcome by the rocket system formula, which he said was discovered in an old Latin manuscript of 1420. Herr von Opel did not try for speed, although he said that during recent trials at Russellshelm-on-the-Main, with a driveless motor-car, a speed of 430 miles per hour was attained for a few seconds.

He is of the opinion that there is practically no limit to the speed which could be reached by the new machine, which has the appearance of the ordinary racing car, except that the back part consists of a steel chamber with 12 round openings, out of which penetrate the steel pipes from which the rockets are discharged.

Fuses are connected with the pipes and are linked up on an auto switch-board, and are controlled from the driver's seat. The rockets are discharged by means of an electric spark. The drawback to the new invention is that each rocket costs a small fortune.

Out of every dollar expended on making a movie film of importance, thirty cents go to the actors, nineteen to general expense and overhead, thirteen are divided among directors, authors and cameramen, five are spent on raw film and four on locations and costumes.

"I believe a horse understands more than a dog," "I don't." "Very likely—but I was speaking of the horse."

Six of Europe's Fairest

EUROPEAN COMPETITORS FOR COVETED TITLE OF "MISS UNIVERSE"
These girls will compete against beauties from all over the world at the coming international pageant of pulchritude to be held at Galveston, Texas, June 2nd to 5th. Left to right: Miss Italy, Miss Belgium, Miss France, Miss England, Miss Germany and Miss Spain.

Chinese Famines

The Two Causes of These Recent Famines Are Due to Drought and Flood

Four Million Starving

China, engaged now in destructive civil war, is at the same time beset by her ancient enemy—famine. The reason why famine so often sweeps large sections of that populous country is explained in the following article. The writer of this article, which appeared in the New York Times, was formerly an adviser on railway administration to the Chinese Ministry of Communications.

By JOHN EARL BAKER

In the daily press you have been reading about an appalling famine in China. Four million fellow humans are starving. Ten million are in dire straits. Ten million women, children, old men and old women are wandering about in search of food. Millions have surged into the province of Manchuria, perhaps the largest emigration in history. Perhaps a million have perished on the way. A correspondent estimates that Shantung has lost 3,000,000 of population in twelve months.

Why is China known as the land of famine? The answer cannot be given in a single sentence. The climate of North China is determined by prevailing winds. During the winter months these winds blow easterly from the continental plateau, upon which is the Gobi Desert. During the season, consequently, there is no rainfall and only rarely a light snow. During the summer these winds blow westerly from the Pacific Ocean, carrying with them the moisture which produces the summer rains. Thus the belt lying between Nanking and Peking receives most of its precipitation during June, July and August. This belt extends from the coast back some 400 miles to the plateau.

An occasional snow in winter, an early beginning or a late ending of the monsoon, is a frequent variation from the rule. If there is a good snowfall or two in the winter, one good shower during April and May, North China has a big year—a crop of wheat in June and a crop of millet, sorghum and beans in September. If the snows or the showers fail, there is only one crop—the fall crop.

Floods and Droughts

Frequently it happens that the year's moisture is nearly all crowded into the last two weeks of July and the first two weeks of August. Then rivers burst their banks and, as most of them have beds higher than the surrounding country, devastating

Never Known to Fail

Troy, Pa.—After losing his unemployed maid, via matrimony, Hal Carpenter of this city resorted to advertising as a means to secure another. The ad ran: "Girl Wanted: The most successful matrimonial agency in Northern Pennsylvania wants a good girl for general housework. Two in family, washing done out. Marriage certificate guaranteed in reasonable time. All graduates from our home now happily married to fine men. Delays are dangerous, regrets are vain."

Floods result. Once every forty or fifty years nature withholds the mid-summer rains, and there is no crop whatever. Sometimes the monsoon splits, leaving a drought belt between well soaked counties.

There was a time when the occasional drought found a public granary filled with the surplus of the fat years upon which the poor of each county might draw. There was a time when dikes did not break frequently. This was the period of China's greatness, when government was strong and subordinate officials were under good discipline.

One hundred and fifty years ago, under the great Emperor Chien Lung, the Chinese Empire covered five and one-half million square miles of territory—almost twice the area of Canada. In the days of Chien Kang Hsi, China could have defied the world in battle. At that time China maintained her river dikes and cared for her own poor in time of drought.

While Europe and America have grown strong and rich, China has grown weak and poor. Chien Lung, like Kang Hsi, maintained his great power over the vast extent of China only at the expense of tremendous energy. He was exceedingly active, and spent much of his life on inspection trips from province to province. But his son and his grandson were more ordinary in their physical, mental and spiritual endowments.

The strain of ruling an empire nearly twice the size of Canada, without the help of telegraph, telephone or railroad, was too much for men anything short of heroic stature. Their empire began to crack. By 1850 the Manchu Emperor was no more than a mere puppet. After 1850 mere infants bore the imperial title. In 1900 practically the whole of the Chinese Army refused to obey the Empress Dowager's orders. In 1912 the Manchu dynasty abdicated.

A Period of Decay

During the entire period of decay, river training, dike repair, the public granaries, like everything else connected with government, decayed also.

WILD CANADIANS IN ENGLAND

Over 200 bears, wolves and buffalo (all stuffed) arrived at Wapping from Canada to figure in exhibitions throughout the old land by the Empire Marketing Board.

Chinese Famine Relief Traces Appeals to Sage

Ten Million Face Starvation in Shantung, Birthplace of Confucius and Mencius

Shantung, that province of north China suffering from the greatest combination of afflictions of any portion of the world to-day—war, famine and their inevitable attendants, disease and despair—is regarded by the Chinese as the most sacred of the new provinces, for there were born the two sages, Confucius and Mencius, whose philosophy and teachings have molded thought and conduct in China for nearly 3,000 years.

The teachings of these sages, antedating by several centuries the Christian era, constitute one of China's greatest claims to kinship with the Western world. Proverbs transcending time and place, as filled with wisdom as the Scriptures, applicable. It would seem, to "men of every race, of every age and clime," are to be found in the sayings of these two seers.

Beginning with the basic law of Confucianism, which is the Golden Rule of Christianity stated negatively, "Do not do to others what you would not have them do to you," the sayings of the two are replete with wisdom of a type universal in its application.

Mencius "Second Holy One"

Mencius, known as the "Second Holy One, or Prophet," also had his Golden Rule, which translation renders: "If one treat others as he would be treated by them he shall not fall to come into perfect life."

Confucius was born in 551 B.C.; Mencius, B.C. 381, nearly 100 years after the death of the elder sage.

In many circles to-day moral teachings are not very popular. Even the story with a moral is eschewed. Some have described the theory of any essential relationship between ethics and aesthetics. Yet there is something in the simplicity, the ant Chinese prophets that is akin to poetry.

Said Confucius:

"Your scholar who is bent on studying the principles of virtue, yet is ashamed of bad clothes and coarse food, is not yet fit to receive instruction."

"When you see a good man, think of emulating him; when you see a bad man, examine your own heart."

"He who requires much for himself and little from others will be secure from hatred."

"Alas, I have never seen a man who could see his own faults and assign himself at the bar of his own conscience."

"Observe a man's action; scrutinize his thoughts, take note of the things that give him pleasure. How, then, can he hide from you what he really is?"

"When a man is generally detested, or when he is generally loved, closer examination is necessary."

Much of the traditional pacifism of the Chinese may be traceable to such of Mencius's teachings as the following:

"When one subdues men by force, they do not submit to him in heart, but because they are not strong enough to resist."

"If one treat me unreasonably I will say: 'I must have been wanting in kindness or propriety. How else can this have happened?' If the other continue perverse, I must have self-respect enough to say, 'I must have failed to do my best.' If all is vain, I say, 'Why vex myself about a wild beast?'"

Evidence that famine is an ancient affliction of the Chinese also is found in some of the sayings of the "Second Holy One."

"If there is too much rice in the kitchen, there are starving people on the road."

"When men die of famine, you say it is the season that is to blame. How does this differ from saying, when you have caused a man's death: 'It was not I, but the weapon?'"

Yet there is one phase of the present famine in Shantung where, it is estimated, 4,000,000 people are threatened with starvation and approximately 5,000,000 others are seriously affected, in which it differs from all the others that have afflicted China through the years.

AS IF THAT HELPED

Hubby: You'll have to cut down expenses, that's all.
Wifey: Well, I suppose I'll have to shorten my skirts again.

A Strange Custom

Chinese Village Honors Father Who Killed Son Centuries Ago

Futsing, China.—The nearly mud-walled village of "Father Killed His Son" stands as a monument to the word of a Chinese general who fought Japanese invaders centuries ago.

He was General Ts'i and lived when China was ruled by the Ming dynasty from 1368 to 1644. He was sent to Fukien Province to exterminate Japanese pirates who were ravaging the coast.

From Futsing, General Ts'i was about to start for the sea when informed by signal lights from the coastal hilltops that pirate boats were landing. Before going he drew up his troops and announced that any man who looked back after they left the walls of the city would be summarily executed.

The troops marched out and, when they reached the site of the present village of "Father Killed His Son" the general's own son looked back toward Futsing. The general himself beheaded the lad, and in the strength given by his example of faith to his word the army swept on to victory against the marauders.

See the country!—take down the billboards.

A new airplane is equipped with a card-table, probably to accustom passengers to the grand slam.

NEGLECTED ANAEMIA

Often Leads to the Most Serious Consequences.

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way that anaemia can be overcome is to enrich the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Katie McEachern, Port Hood, N.S., says:—"I praise the day I began the use of Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells, and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Prince of Wales May Revisit East Africa

London.—The Prince of Wales, it is announced, contemplates a tour in Africa in the autumn of this year, and is likely to be accompanied by his younger brother, the Duke of Gloucester.

East Africa and Northern Rhodesia are named as regions that may be visited. Tentative inquiries have been made by the Royal Staff through the Colonial Office with a view to finding out where motor road transport and similar facilities are available, as the Prince desires to make the tour, as far as possible, by motor-car. The date of the tour, it is explained, is contingent on the period during which the roads are suitable for motor traffic.

Lady: "If you were in a tramcar, the seats were all filled, and a lady got in, what would you do?" Boy: "Prefer to be absent-minded."

When Capt. Malcom Campbell completed his world's record automobile drive at Daytona Beach, his first request was for a cup of "good, strong tea." The courageous Captain would have enjoyed Red Rose Tea because it is a blend of choicest Assam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea markets. Sold by your grocer in clean, bright aluminum packages.

Don't Make a Toy Out of Baby—Babies Have Nerves—By RUTH BRITAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

Sir Charles Sykes, former coalition Liberal member of the British House of Commons, is concerned over foreign competition and its effects on British trades. "Drastic remedies are required" he said on arrival in Canada a few days ago on the White Star liner Regina. "If Great Britain is to be restored to that position in the world which she formerly held."

ONLY A CAR FARE
Judge: This man, officer, claims he took only a car fare from his employer.

Officer: Yes, your honor, but it was a car fare to Mexico, you see.

Drivers Who Drink

The automobile driver who drinks to excess is the terror of the road. But should any driver even touch liquor while he is operating a motor vehicle? The moderate drinker is also a menace to safety.

"It is undoubtedly the fact that even a little liquor often upsets the balance and normal attitude of mind of many a person, and affects his operations of a motor car unfavorably. Liquor makes some persons confident. From other persons it takes away confidence and makes them doubtful and hesitating. Liquor does not mix well with the driving of a motor vehicle. A motor car or truck is not improperly called a private locomotive. The driver has to undergo training to operate a machine that weighs a ton or more and can be sent along at a rate of speed of from thirty to fifty miles an hour. The locomotive engineer is required to be an abstemious. The driver of a car should deny himself the use of liquor whether he rides alone or is responsible for the safety of others."—N.Y. Times.

Husband (seeing wife off in train): "Now, dear, just as soon as you arrive you must telegraph." Wife: "All right. How much will I telegraph for?"

Acquire "The Skin that Charms"

The quest and love of beauty—the desire to be personally attractive—is today a dominating trait in men as well as women. Especially is the younger generation not ashamed that it wants and tries to be healthier, happier, and better-looking.

You can be all three of these if you will take Buckley's TRU-BLOOD to eradicate impure and impoverished blood. You can have a clear and colorful complexion, a skin of velvety smoothness. And this has its value and appeal—that those who possess "TRU-BLOOD" complexions may use their favorite cosmetics with greatly-enhanced effectiveness.

With TRU-BLOOD also use Buckley's OINTMENT. It "acts like magic" in rejuvenating the skin, in eradicating blemishes and comedones. Sold at all Drug Stores.

Clears the Skin

FIGHTING FOR BABY'S HEALTH

Is the Constant Care of Every Young Mother.

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so sudden—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or, better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent to any address, postpaid, at 25 cents a box by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

Old-Time Ships

1500-Year-Old Swedish Craft Shed New Light on Seamanship

Stockholm.—Two pre-Viking ships, 1,300 years old, and one car estimated to be 5,000 years old, have been found in Sweden, shedding new light upon ancient Swedish seafaring and seamanship.

The car, made for paddling, was found deep down in a moor in Dalecarlia, and the experts of the historical museum in Stockholm estimated its age by the pollen test. This test consists in examining a piece of the soil where the object was found and where pollen abounds. The geologists have drawn up immigration maps for various plants, fixing the age of their existence in Sweden. On this special occasion they found no pine pollen in the soil examined, and knowing that the pine entered Dalecarlia some time after 3,000 years B.C., they accordingly dated the car as belonging to an earlier period.

This pollen analysis discovered by the Swedish botanist Lagerheim and perfected by another Swedish scientist, Von Post, is looked upon as a revolutionizing method of investigation of early geological periods.

The ancient ships were found on the western shore of Sweden in the province of Halland. The hulls are made of oak timber and fourteen meters long, four meters wide and built on ribs and nailed together by wooden pegs. They were comparatively well preserved.

Authors' Fight for Public Ear Is Told by Hugh Walpole

Many Worth-While Books Fail to Win Recognition, Says British Novelist

London.—Hugh Walpole has been making some remarks about the position of undoubtedly worth-while books in attracting the public attention that merit does not nowadays assure the amount of hearing which it would once have gained.

Speaking at the Institute Francaise in London, where he presented the annual Fénelon-Vie Heureuse prize to Virginia Woolf for her book "To the Lighthouse," he described the increasingly difficult struggle for recognition which writers must face.

"The best doesn't often receive the attention it deserves," he said. "The example of Mary Webb, who has attracted the Prime Minister's admiration, has occurred during the last few days. A short time ago I read two excellent novels, both by women. They were 'Spinsters of the Year,' by Miss Bentley, and 'Dim Star,' by Miss Yates. I have not yet seen any review of them, nor did their publishers include them in their list. Yet they were both very remarkable books."

"Of recent years unless a piece of literature is also a piece of news, like a crime or a divorce, it gets no public recognition at all."

At the same meeting the Bookman prize for a French work of imagination was awarded to Julian Green, who is a young American, born in France. After this year this prize will revert to its original title and be known as the Northcliffe prize.

"Give me your money or I'll blow your brains out," commanded the hold-up. The intended victim calmly laughed in a manner that showed that he didn't care about either. He was a college boy.

In Mexican campaigns the women always accompany their husbands in the army, so the soldiers are always kept in fighting trim.

Auto Production in Canada Gains

April Output 39 Per Cent. Higher Than in March

Ottawa.—Automobiles produced in Canada during the month of April numbered 24,240, marking an increase of 39 per cent. over the 17,478 cars produced in March, but slightly under the 24,611 cars produced in April last year. The advance in April over March was general in all types of cars; open model passenger cars rose to 1,127 from 1,445; closed model passenger cars to 15,318 from 12,805; chassis to 5,493 from 2,967; and trucks to 292 from 257. No taxicabs or buses were made in April as against 4 in the preceding month.

The 24,240 cars produced in the month under review were valued at \$16,585,420, f.o.b. factory, and of this total 17,562 cars worth \$13,713,905 were intended for sale in Canada and the balance, or 6,678 cars valued at \$2,871,515, were made for export.

Customs records show that 5,150 cars were imported into Canada during April as compared with 6,114 in the previous months and 4,917 in April of a year ago. Exports cleared from Canadian ports during April showed 3,656 cars as against 3,592 in March and 4,087 in April, 1927.

A calculation of the number of cars made available for distribution in Canada during April, made by adding the imports of 5,150 cars to the 17,562 made for sale in Canada, gives a total of 22,712 cars. For the first four months of the year the number of cars made available in Canada, thus computed, totalled 60,935.

For the four months ending April, 1928, the cumulative production numbered 662,465 cars having a sales value, f.o.b. plant of \$43,200,132. While this output was 23 per cent. less than the figures for the corresponding period of last year and the value was 15 per cent. lower, conditions generally in the industry were nevertheless much improved in April.

"Hindenburg a Loyal Gentleman," Says Foch

Paris.—"Marshall von Hindenburg is a gentleman of absolute loyalty."

This is Marshal Foch's appreciation of his former adversary.

Andre Rivoltre, the French writer, recently attended a congress of literary men in Berlin. Received by the President of the Reich, he related his experience to Marshal Foch, commenting that the former leader of the German armies had spoken of peace in convincing terms and convinced manner.

Foch was deep in thought for a moment, then, with great deliberation, he paid this compliment to his former adversary.

For Hay Fever—use Minard's.

The bill collector found that the family he was about to dun had had skipped, taking the goods with them. After some inquiry he managed to locate the van driver, but that worthy claimed to have no recollection of where he had taken them. "Come now," said the collector, producing a \$5 bill, "this ought to rouse your memory." "It ought to, sir," the van driver admitted, "but you see mine ain't no ordinary memory, an' it'll take a deal of rousing. Why, it cost \$10 to put it to sleep."

Stranger: "Then there's the Smiths. They were among the first settlers in this town." Shopkeeper: "How things have changed. They're among the last settlers now."

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless, taste-

DOMINION DAY

We in Canada may not make quite
so much noise about the First day of
July as our more enthusiastic neigh-
bours to the South do about the
Fourth but we have just as great
right to do so as they. Perhaps
stimulated thereto by their neigh-
bourly example, we are beginning to
pay more attention to the recogni-
tion of our birthday anniversary, and,
if so, it is one thing at least in which
we can emulate Uncle Sam. We may
not have so much to celebrate by way
of achievement, nevertheless we are
doing very well, thank you, for a
young country.

We can cheerfully celebrate the
fact of having achieved nationhood,
and the full and complete recogni-
tion of it, without having had to "cut
the painter" like our American coun-
sins did. They had to revolt against
the rule of a King George; we re-
joice in possessing another and bet-
ter King George as our titular head.
We have "this freedom" maybe be-
cause they first of all revolted, yet
we have it and are none the lower
in status because we still remain
within the Empire, a self-governing
unit of the greatest commonwealth of
free nations the world has ever
known.

Another just cause for celebration
is that we are now able to realise
that, potentially, Canada is one of the
richest countries in the world. Our
soil is amazingly productive; we
could supply the world with bread.
Our forests are able to furnish news-
print to the press illimitably. Our
mineral wealth is boundless, and prob-
ably makes us from a mineral point
of view richer than any other part
of the Empire or of the world. Yet
we have hardly begun to cultivate
our soil, hew our timber, or mine
our ores. Truly in these things we
find cause for celebration.

Above all we may make joyful cele-
bration this coming Dominion Day
because at last we are sure of our
high destiny. Time was when some
would have had us seek annexation
to our bigger neighbour—this was
many years ago. Time was when
some would have had us meekly ac-
cept the status of colonialism and
seek no higher place within the Em-
pire and amongst the nations of the
world. All that folly has long since
ceased, and the circumstances that
inspired such desire or contentment
have vanished. Now, we know that
we are a nation, that in the councils
of nations we have our recognized
place, and that while the ties that
bind us to the Motherland are firmer
than ever, we have the fullest
measure of self-determination and the
largest liberty to shape our own des-
tiny. That we have chosen to live
our life in the closest unity with the
Mother from whose womb we sprang
is evidence alike of our Mother's
worthiness and our own deep, abid-
ing love for her.

For all these reasons we wish our-
selves, "Many Happy Returns of the
Day."

CUSHING.

Miss Ruth Dobbie is at present at
home enjoying her summer holidays.

Mrs. F. Maguire and family, of
Montreal, have opened their cottage
in Cushing for the summer months.

Mrs. F. Douglass and Miss Doug-
lass, of Montreal, are guests of her
brother, Mr. B. Noyes, this week.

Mr. Robert Starnes spent the week-
end with his wife and children at
their cottage.

Mr. Lathbury, of Montreal, is the
guest of Miss B. Nicholls this week.

Mr. and Mrs. Oliver Armstrong,
visited friends in Lachute last week.

Mrs. J. D. Weir and family, of
St. Anne de Bellevue, are at their
summer home here for two months.

Miss Elsie Graham spent Saturday
the guest of the Rev. Mrs. E. Morris-
son, of Lachute.

On July 3rd, the Women's Mission-
ary Society meets at the home of
Mrs. W. King at the usual hour.

Miss Ivy Graham is spending this
week the guest of Miss Anna Hawke,
of St. Anne.

Miss Doris Leroy spent Tuesday
in Montreal, accompanied by Miss B.
Brown, of St. Andrews East.

Sunday guests at the home of Mr.
and Mrs. A. Graham were Mr. and
Mrs. D. W. Candlish, of Montreal;
Mr. and Mrs. A. C. Hawke, Miss A.
Hawke and Mr. W. Hawke, of St.
Anne de Bellevue, Rev. and Mrs. E.
Morrison and Miss Esther Morrison,
also Mr. and Mrs. R. J. Graham, all
of Lachute; Mr. and Mrs. W. A. Gra-
ham, of North River and Mrs. R.
Black and Miss Annie Black, also
Mr. and Mrs. John Mahon and Miss
Joyce Mahon, of Mabel.

MAKING SEARCH

FOR YOUNG MAN

Seventeen Year Old Youth Not Seen
Since Leaving College at Ironside

A young man, aged 17 years, left
St. Alexander's College, Ironside,
Que., on Wednesday last, June 13,
and has not been heard from since.
He was a student at that college and
wanted to obtain work, especially in
electric or mechanical shops. It is
believed he may have tried to obtain
a bicycle or motorcycle. He wears a
gray suit, knickers, black stockings,
black shoes and soft collar. His hair
is black, fairly long and somewhat
curly, and he wore neither hat nor
cap. His name is written on all his
clothes and initials are L. R. R.

He has been seen at Augers, Mon-
day last, June 18th, and at Monte-
bello, Friday, June 23rd, going to-
wards Montreal, and may have asked
for a drive.

If seen, please notify Wilfrid Jol-
leau, Lachute.

ST. ANDREWS EAST.

Mrs. Wm. Drysdale spent last week
at her home.

Mrs. D. H. Bishop and Mrs. C. S.
Wales were in Montreal last Thurs-
day.

Mr. and Mrs. Douglas Jeffrey and
family motored up from Montreal to
spend Sunday with Mrs. G. Jeffrey.

Mr. and Mrs. Charman are away
for a few days holidays in Montreal
and St. Anne.

Miss J. G. Wales, of Madison Col-
lege, and Miss Evelyn Wales are
home for their holidays.

Miss Vida Brophy and Miss Olive
Sutherland of New York, were in
town over the week-end.

On Monday morning the children
of the Consolidated School were back
at School to receive their reports and
prizes in all Grades up to Grade VIII.

The Rev. St. Aubin, of Montreal,
preached at both services in the Uni-
ted Church, St. Andrews, Sunday,
June 24th. Mrs. St. Aubin accom-
panied him.

Rev. Mr. Macaskill is taking his
holidays the last week in June and
first three weeks in July, and has
consented to supply the pulpit in La-
chute for those Sundays.

CUSHING.

Mrs. Denovan and Miss Carmichael
of Rosemere, spent Wednesday here
visiting their cousin, Miss Corner at
Mascot Lodge.

Mr. and Mrs. Frank Maguire and
family arrived from the city on Sat-
urday and will again occupy the
Green Cottage for the summer.

Mr. and Mrs. R. D. Hartley, accom-
panied by the Misses Grace and Katie
Whelehan and Mr. Charlie Kelly mot-
ored up and spent Sunday in Cushing.

Mrs. W. Davidson, of Como, ac-
companied by Mr. and Mrs. M. David-
son and Mr. A. McDonald were motor
guests of Mrs. Jas. Watson recently.

Mr. and Mrs. Kenrick Dorion, of
Montreal, accompanied by Miss A.
Dorion, of St. Andrews, were motor
guests of Mr. and Miss Whelehan
last Sunday.

Mrs. R. Baxter, of Winnipeg, ar-
rived on Monday with her little son
Douglas on a visit to her parents, Mr.
and Mrs. R. Pinkerton. Before com-
ing to Cushing, Mrs. Baxter spent a
week with her sister, Mrs. Jas. Har-
court at New Glasgow.

Mr. and Mrs. J. Derrick who re-
cently returned from California spent
the latter part of the week visiting
friends in Dalesville and were also
guests of Mr. E. Whelehan on Sat-
urday evening. Mr. and Mrs. Derrick
are leaving again this week to return
to California going by way of Van-
couver and enroute will visit friends
in Winnipeg and Calgary.

LAKEFIELD.

On Sunday, July 1st, Divine Ser-
vice will be conducted as follows:—
10.30 a.m., Celebration of the Holy
Communion at Lakefield. 10.30 a.m.,
Evensong at Shrewsbury. 2.30 p.m.,
Evensong at Lakefield.

Special attention is directed to the
Services conducted by Lord Bishop
of Montreal, during his Episcopal
tour of this parish. Services will
be conducted by His Lordship in the
following order:—

Monday, July 2nd.—2.30 p.m. at
Shrewsbury; 8.00 p.m., Lakefield.

Tuesday, July 3rd.—10.20 a.m. at
Dunany; 2.30 p.m., Louisa. (All ser-
vices Standard Time.)

BROWNSBURG.

Mrs. Alex. Barker was the week-
end guest of Mrs. Dave Black.

Mr. F. Vowles Sr. visited his daugh-
ter in Montreal on Saturday last.

Mr. C. McKiddie was the guest of
his parents for the week-end.

Mr. and Mrs. Dave Steele, motored
from Detroit & will visit their many
friends for a few weeks.

A large number of Brownsburg
people attended Lachute Fair last
week, and claim it to be one of the
best yet.

THE GIRL WHO WAITED

A Short Story of the Dope Traffic in London England

Sally Deane hated Oscar Svensen, the giant Swede, almost as much as she loved and adored her absent sailor-boy, Peter West.

More than all, she was afraid of Chang, the fat, squat Chinaman, who was rich and powerful in Limehouse, and had a shop at the corner of the street where Sally lived, not far from the docks.

Every day, as Sally was either going to her work at the factory in the Commercial-road, or when she was returning home, she would see Chang standing in his shop door.

His almond-shaped eyes would glitter as they looked at her fresh young beauty, and he would crease his yellow face into a horrible leer.

"Longer wait till best boy comes back again!" he would chuckle.

And Sally would feel curiously afraid, though she tried not to show it, and was always polite in her smiling answer.

But this morning, when he spoke to her, she was without fear.

"No more waiting, Chang!" she laughed gaily. "The Ocean Star comes into dock this afternoon. Peter will be home this evening for good!"

"Chang velly glad!" grinned the Chinaman. "Muchee nice boy, Peter West! You like velly well, I see. But Svensen fellow likee you velly well also. Plenty talk about you to me."

"Oscar Svensen?" flashed Sally, tossing her golden curls derisively. "He ain't in the same street with my Peter, Chang; and he knows it. Peter is coming home this time for good. Got a land job, and we're being married in a week or so."

"Allee same, my dear, Oscar Svensen he swear he mally you, and not Peter!" chuckled the Chinaman smugly, sending a chill of fear through Sally as she passed on.

It was not by chance that Oscar Svensen was waiting outside the factory at the time when Sally would be making her way back home that night.

He stepped in front of her, a big and uncouth man with fair hair and cruel blue eyes.

Her mind was full of Peter—she would have passed him by, but he gripped her wrist and swung her round so that she was forced to stand beside him in a dark alley-way.

"You're in an almighty hurry, ain't you?" he sneered. "No time for me to-night—eh?"

"Never did have, Oscar!" retorted Sally coldly. "Let go of my wrist, I'm wanted home to get supper ready. Peter'll be back to-night."

"Will he?" snarled the other. "Maybe, and maybe-not. Supposing he don't come! Supposing he's been kept out in China!"

"Kept out in China!" laughed Sally. "Don't be soft! How'd that happen, I'd like to know!"

"It has happened, anyhow. Chang's seen to it all right."

"Chang—seen to it? What d'yer mean, Oscar?" gasped Sally, startled by the queer certainty with which the Swede spoke.

"You remember, maybe, how the day after the Ocean Star left here this last time for China with your Peter aboard, the police made a raid on Chang's place?"

Sally nodded. The police had expected to find a big haul of cocaine, the drug popularly known as "snow," on Chang's premises. They had received information from someone to that effect.

But the raid had been without effect. Nothing had been found.

Afterwards Chang had talked a good deal about wanting to know who had reported him to the police.

He had mentioned the matter to Sally more than once, now she came to think of it.

"Well," laughed the big Swede harshly, "it was Peter who gave Chang away to the police, only luckily Chang had been cute enough to have the stuff hidden where the police couldn't find it. But Chang didn't forget. Being a Chin, he took care to revenge himself, you can bet. When the Ocean Star got to China this trip, and your Peter went on shore, he was met by some of Chang's friends and—that's the last to be heard of him. So you might as well make up your mind, Sally, that you'll not see him again."

"It's a lie!"

Sally was very near to fainting, so terrible was the fear that gripped at her heart.

She knew enough of Limehouse and Chinamen to understand that if Peter had given Chang away to the police the Chinaman was quite capable of acting as Svensen had said.

Peter, before leaving on this last trip, had been a good deal in Chang's company, and he had let drop in Sally's hearing some angry words about the traffic in "snow" which was going on. Peter had also been very friendly with Detective-Inspector Wade at the Limehouse police station.

Sally, trembling with a sudden dread in the darkness of the alley, tried hard to persuade herself that this story was not true.

"You're trying to frighten me!" she said, wrenching her wrist free from the Swede's hold. "I'm going home, and if Peter ain't there already I'm going to the docks to find out."

But Peter was not at home when Sally reached the house, and, though her mother told her it was early to expect him as yet, fear took her straightway to the dock gates to find

the Ocean Star and make sure if he was on board.

She did not tell her mother the story Oscar Svensen had told her, fearing to worry her until the truth was out.

At the dock gates, however, she was unable to gain admission, owing to some trouble with the dockers, who were striking.

But an official on the gate told her he had heard something about the Ocean Star coming back without one of the crew, who had been ashore and never rejoined ship. He believed he had heard the man's name given as West.

Blindly, with tears in her eyes, Sally began to grope her way slowly back homeward.

It seemed impossible that she would never see her Peter any more—Peter, with his brown curly hair and his laughing eyes, his tender but strong mouth, his heart of gold, his great love for her!

Reaching the corner where Chang's lighted shop stood, she saw the Chinaman inside, talking to the Swede.

The shutters had been put up, and he was ready to close the door. But Sally slipped into the shop.

The Chinaman was asking Svensen to step down into the room beyond. Sally followed, determined to confront the Chinaman with his villainy and to bring him to justice.

Through the open door, she heard Chang speaking.

"You gottee new lot of 'snow'?" he was saying.

"You bet!" laughed the Swede softly, showing a large packet in a capacious pocket. "My pal on the Ocean Star dropped it me as they docked. I wasn't able to get a word with him, so I don't know if he's got any more. Look here! That's all right about West, isn't it. Your friends kept him back in China for good?"

"You trustee Chang to see Mister Westee safe and sound!" chuckled the Chinaman greedily. "Now you mally the pretty little Sally, you thinkee?"

"When she's got over the crying business. But meantime I'm off to get rid of the 'snow' up West—"

"No you ain't!" demanded Sally frenziedly, stepping into the room. "So you two are playing that game, are you? And because my Peter knew of it you've tried to get rid of him? But I'm going to the police. I'm going right away to Inspector Wade at the station—"

"You waitee!" Chang's squat figure prevented Sally from leaving the room, and she recoiled before his almond-shaped eyes. "What for you go to police, pretty little Sally?"

"To have you both put inside!" blazed Sally, aflame with hate and determination to avenge Peter.

"To have that beast of a Swede caught with drugs on him!"

"Your Peter tellee police about me last timee ship in dock," said the Chinaman. "Mister Svensen know that for fact. Didn't you think if he give Chang away, Chang going to gettee own back? But Chang no murderer. You can't prove that to police. Chang know nothing about what happen in China. Chang nice, kind, simple man. Chang velly fond of you. Likee mally you himself. You go to police if you like. Chang know nothing. By time you go police, Svensen hides drugs all away. Better wait a minute—"

Here, to Sally's astonishment and amazed relief, someone pushed a way into the room from the shop beyond.

She could scarcely believe her eyes. It was Inspector Wade himself, with another figure behind him.

"Hullo," he said, as he saw her. "You here, Sally? Hullo, Chang! Has our trap succeeded? Has the Swede another haul on him?"

Svensen, with a sudden cry, flung backwards, one hand held over his capacious pocket with its large packet of cocaine, the other fumbling at his hip. But Inspector Wade had suddenly drawn a gun.

"No, you don't!" said the inspector. "You're trapped, Svensen, and you may as well make the best of it. You've been playing a 'snow' running game for a long while, and we've been waiting to catch you. I've someone here with me who can give evidence against you."

Sally stared in greater amazement than ever.

From behind the inspector there appeared Peter—Peter, whom she had believed to be in China, and lost to her for ever!

In a moment she was enclosed in his arms, kissing him and crying with delight.

"But they told me at the dock gates that a man named West had been left behind in China!" she said, "but Svensen told me—"

"There was another man named West on board," laughed Peter, "and Svensen believed I was to be left behind. But Svensen was wrong. He was told that by Chang."

"But Chang is in with him in this 'snow' business. I heard them talking just now!" urged Sally.

"You're wrong, my dear!" murmured the inspector. "Chang has been hand in glove with me since Svensen tried to put him under suspicion and got us to raid his place. For that is what happened, though he told Chang that your Peter had given him away."

"And Chang never forgives an enemy who stabs him in the back!" smiled the Chinaman insouciantly, rubbing his lean hands together as the

A Big One in Dry Dock

SOME IDEA OF HOW BIG THEY REALLY ARE

The Giant Liner Berengaria as she looks when ashore for her winter overhauling. The vast size of the hull is indicated by the fact that two men working on the ladders are almost completely hidden by one blade of her stern propeller.

handcuffed Svensen was taken off by the inspector.

So the vengeance of Chang ended in a different way from that which Sally, safe in her lover's arms once more, had imagined possible.

JUST THE THING!

Lady Bug: Look at the nice caterpillar neckpiece I got for Christmas!

There were no bakers in the New Year Honors list. We are passing through a time, we might say, when knighthood is not in flour.

"So you want to marry my daughter?" "Yes." "Do you know much about business?" "Not much." "Do you know the difference between an asset and a liability?" "No." "Well, you will after you marry my daughter!"

"CHAPARRAL"

This ungallant verse appears in the Stanford (Kentucky) "Chaparral":—

If traffic's choked for many blocks,
If horns do sound and bumper locks
With bumper, you can bet your socks
A woman's at the wheel.

When taxi drivers dodge and sweat,
And big cops weep, and people get
All set to jump, then you can bet
A woman's at the wheel.

When a car leaps as if 'twere shot,
With gears that scream quite like a lot
Of dying men, then like as not
A woman's at the wheel.

A woman's voice and a woman's smile
May ease dull care, and a woman's
gripe

May bring us joy, but look out while
A woman's at the wheel!

Doctor: As I said, you've just regained consciousness after the crash. I'm Dr. Peter, and— Victim: Oh! For a second you gave me a shock. I thought you said you were St. Peter.

Success of recent experiments with a fuel consisting of mixed gasoline and alcohol indicate that the place for the latter is in the motor, not the motorist.

Sir Thomas Beecham Explains His Antipathy to Broadcasts

He Believes Radio Improves Jazz, But Tones of Great Orchestras Suffer if Wafted into Space as Ether Waves

Sir Thomas Beecham, British orchestral conductor, following his recent debut on the radio as guest conductor of the New York Philharmonic Orchestra over WOR, explained, in part, his antipathy to the broadcasting of orchestral presentations at which he officiates as conductor.

"The broadcasting of jazz over the wireless," said Sir Thomas, "may actually succeed in making it sound better from the loudspeaker than it would sound if one were present in person at the playing. However, orchestral selections may suffer a great deal by virtue of the very complicated nature of the tones from the many and widely different instruments that go to make up the great modern orchestral organization. When one hundred or more instruments are being played harmoniously the resultant tones are extremely complicated in structure. It follows that if they are taken out of their natural medium, the air, placed on a wire as electrical particles, then broadcast into space, they are bound to suffer in quality.

"It is unfortunate that orchestral music, which I consider the highest type of musical presentation, should so suffer in the transfer."

Sir Thomas likened the tones heard from the loudspeaker to one speaking through an obstructing medium so that the tone and modulation of the voice are rendered unnatural in quality. He likened the tones of complicated musical numbers to a mass of threads, all coming to produce the effect desired by the conductor, which are hopelessly thrown out of order by their transfer from their natural medium, the air.

"If a slight detrimental effect is interposed," he said, "the whole suffers."

"I am yet in doubt whether the effect on radio listeners is good or bad when the higher forms of music are put on the wireless," he said, after his debut with the Philharmonic musicians over WOR. "I shall have to listen to a concert in America when the opportunity presents before making a serious decision. Of course, I cannot decide for every one, but at least I can form my own impression of what one can hear over American wireless stations and compare it with what is heard when one is present in the music hall."

The average British listener," he said, "is phlegmatic, and therefore in many cases he may be using a radio receiver which is antiquated and not capable of intercepting and reproducing the radio waves with fidelity. However, I am told that many listeners in England have excellent receiving sets. The Briton is a great home lover. When he arrives in the evening he generally stays home. This makes for the general popularity of wireless receiving sets in England, which are generally found intercepting the lighter musical numbers. When a Londoner wants to hear or-

chestral or good musical numbers he goes to a music hall."

The Famous Quotation

Sir Thomas's famous quotation in regard to broadcast, made less than one year ago, was: "Ever since the beginning of the present century there has been committed against the unfortunate art of music every imaginable sin of commission and omission, but all the previous crimes and stupidities pale before the latest attack on its fair name—broadcasting it by means of wireless."

Just before his radio debut in America he said: "In England I have never played for the radio because I felt that it had a bad effect on the radio audience. I feel that radio receivers are not capable of doing the best for the higher complicated types of music. Possibly radio is more advanced in America and may be capable of reproducing the concert more faithfully. I may have more to say after I broadcast."

Sir Thomas stepped out on the stage at Carnegie Hall when he made his radio debut without the slightest hesitancy at being placed, for the first time, within the hearing of the largest audience before which he had ever waved his baton. The presence of his avowed enemy, the microphone, apparently did not cause him the least bit of worry, for he conducted with vigor and even grasped the microphone stand between his fingers.

During the intermission he made a brief address over the microphone's instrument and thanked the people of America for the wonderful reception that had been accorded him. "So far as I am concerned—I do not speak for the audience—the concert so far has been a complete success," he said.—(N.Y. Times.)

Britain's Dumb Dora

The shade of Dora (historians may remember her more official name of Defense of the Realm Act) still hangs over England. When the lovely lady first appeared to hold up a forbidding hand against the sale within certain hours of various commodities ranging from trips to whisky sodas, there was a war. And, although Britons never will be slaves, they bowed to necessity and submitted to the petty annoyances prescribed by Dora with what grace they could. But when the war was over Dora remained and England has ever since rebelled.

The matter has just been again submitted to investigation and the Dora Committee has made its recommendations. It would not sweep away all the restrictions still left at war-time relics, but it does suggest certain concessions to British love of liberty. It would allow theatregoers to buy chocolates as late as the third act and permit vendors of spirituous liquors, within certain prescribed limits, to sell cigarettes, but it would by no means permit truly open shops—in a merchandising and, not industrial sense of the word. The London Times declares that the recommendations of the Dora Committee will be hailed with general relief, but the Saturday Review wants complete freedom and no compromise. "The majesty of the sovereign British people," it declares, "is indeed, reduced to a low state if we are to imagine it purring with delight at these privileges."

In the campaign being waged against Dora there are certain vague reminders of the reaction to certain laws in this country. It is asserted that it is a restriction upon personal liberty, that despite the pettiness of the regulations imposed by the act an important principle is involved and that it results in contempt for the law.

We wish the English more power in their struggle for freedom and hope that they may uphold Anglo-Saxon traditions relating to the right to personal liberty with greater success than in certain cases we have succeeded in doing in this country.—N.Y. Times.

Natural Resources

Manitoba Free Press (Lb.): The Federal Government is to take up the question of the return of the natural resources to the Prairie Provinces. Action is long overdue on the part of the authorities at Ottawa and in connection with Manitoba the need for an early decision is particularly pressing. The Manitoba Government has asked for arbitration. The matter of right is so obviously on the side of the western provinces that the Federal Government would be well advised to get down to business without delay. The people of the West have had enough jockeying on this matter.

Try It, Men.

One woman writes that her husband is a model because when he is wrong he says so in plain English instead of hiding behind a bunch of roses or a box of candy.—Woman's Home Companion.

Sometimes an idea is so brilliant that it makes people blink and the originator is penalized for not dimming his headlights.—Farm & Fireside.

A Sport Fast Becoming Popular in Canada

THE GREATEST THRILL EVER—STANDING ON AIR

A most unusual picture of two Swedish skiers just as they took off for the big jump on the famous target course near Stockholm. The finish of the jump will land them 100 feet below.

Lachute Fair Scores a Great Success

Fine Tribute paid the Society by Hon. J. L. Perron, Minister of Roads

Although gloowering skies threatened bad weather during the week of the Fair, Lachute was extremely fortunate as the rain held off until its close on Saturday evening and the President, Mr. J. T. Ayers, with his Secretary and Directorate are happy in their lucky escape. For several years, the weather has been against us, but the success of this year will put new heart into those who have devoted so much time and thought in bringing the Fair to such a successful issue.

One cannot speak too highly of the Exhibition as a whole, for everything went like clock-work and there was something doing every minute. A pleasant surprise was given the President, Mr. J. T. Ayers, when the Hon. J. L. Perron, Minister of Roads, made his appearance in the Judges Stand on Saturday afternoon, just as the Grand Parade was taking place. The large ring was almost filled with the splendid herds of Cattle and it is no idle boast to say that nowhere in the Dominion could a finer showing be made.

In speaking of the Fair, the Hon. J. L. Perron exclaimed, "I am truly amazed and most agreeably surprised, for I had no idea that the Lachute Fair could produce anything like the standard of excellence it has attained. It is indeed a revelation and reflects great credit upon its management." Before returning, Mr. Perron took occasion to visit the magnificent display of Rugs, etc., of the Ayers' Limited and expressed himself in glowing terms of the pride and feeling that the Province of Quebec should be favored with a fair which could produce such wonderful goods.

A very interesting, refined and selective programme was provided by the West Sisters and Artists secured from the Keith Circuit. Bob, Bailey's Band furnished excellent music, so that the public had a great choice of entertainment.

It was indeed a pretty sight to see the splendid herds of cattle lined up for competition, and although the first prize for Best Herds went to Jones and Johnstone, of Charlotte-Town, P. E. I. we were glad to see the 2nd prize go to Rodger Bros. and the 3rd to J. T. Ayers. Other exhibitors of cattle were J. H. Black, Estate W. Clarke, Senator Donat Raymond, James S. Parkes, M. & D. Smith, W. J. Rodger, J. P. Bradley, Jas. McKenzie, Wilson Bros., Erskine McQuat, Clarence Miller, B. Blackburn and E. & A. Sylvestre.

G. Arnold, Wm. Nesbitt and T. McAdam & Son were the three prize winners in the ring for horses judged on parade.

Miss Archibald came in for much favorable comment for her clever skill in horsemanship and little Miss Jones won admiration as a real driver with her dainty pony.

One of the cattle exhibits which drew a steady crowd of admirers was the Herefords from Carling Lake Farm, owned by the President of the Society Mr. J. T. Ayers. The MacGeorge boys brought them out in fine shape and took a large share of the Championships. The 3 year old Heifer, Miss Brae Dale, was made grand champion female, and also won the championship ribbon over the Aberdeen Angus for the best beef animal. Her bull calf (Brae Carling) only 4 months old on Show day, was first in his class, (Junior champion) and finally came out to beat the old bulls for the Grand Championship. This is a remarkable calf for his age and will be heard from in future. Many were the favorable comments made on this herd by visitors to the show. They have gone on to Ormstown, where we feel sure they will be much admired and give Lachute a boost as a beef raising district.

There was as usual, very keen local competition in addition to strong entries from outside points and the following comprises a complete list of the prize-winners.

HORSE JUDGING

THURSDAY'S SPECIALS
Hunters over Hurdles.—W. Nesbitt, 2nd, 3rd, and 4th; M. W. Minogue.
Pair High Steppers.—1st and 2nd, W. Nesbitt, W. A. Bradley, Albert Stewart.

Kicking a Tire is no way to test it!

ONLY a pressure gauge can ever give you a true indication of inflation.

There is a correct pressure for your tires. It depends on the size of the tire and the wheel load. At that pressure your tires will give you maximum mileage. If your tire inflation goes three pounds below that correct pressure you cut mileage from the life of your tires.

Use a gauge.

Better still, drop in at a Dominion Tire Depot once a week and have every tire inspected, and the pressure checked. Let an expert search for cuts and bruises. Often a slight repair will prevent a blow-out.

You are never far away from a
DOMINION TIRE DEPOT

Strange Fish in Banff Pool

Banff Mystery Fish Eat Mosquito Young and Likes Hot Water

That the present inhabitants of the hot sulphur pool at Banff are *Gambusia affinis*, the mosquito-larvae-eating fish, is the statement of C. Hearle, Dominion Entomologist. Mr. Hearle visited Banff recently, and after closely examining the finny curiosities that have caused so much speculation and been dubbed the "Banff mystery fish," pronounced this verdict. The "mystery" lay in the fact that these fish live and breed in water whose temperature is 92 degrees Fahr. That a noted authority had stated that in his opinion they were Japanese guppy, particularly as they breed like mammals; that Mr. Hearle had stated they were *Gambusia affinis*, and that he had planted them in the pool in 1918; that government records showed that small fish had been taken from the pool in 1914, sent to Ottawa, and labelled *Cosius Plumbus*, and also that old-timers were willing to take oath that they had seen the fish there in as early a year as 1883. Thus arose the mystery. *Cosius Plumbus*—and *Gambusia affinis*—or just plain guppy—which? Mr. Hearle states that he remembers seeing small native fish swimming around in the sulphur waters when he planted the mosquito destroyers, and gives a very plausible and natural explanation or solution of the mystery.

GREAT CANNIBALS.

There is probably no fish with such cannibalistic propensities as the *Gambusia*; therefore what more natural than that these savages dined on the natives, and that the old-timers, not knowing about the planting of the newcomers, did not suspect that they were looking, since 1918, on a new species altogether.

The mystery is laid, everyone is satisfied, for there is no doubt that *Cosius Plumbus* vanished by the *Gambusia affinis* route. According to Mr. Hearle, these fish will, in their native swamps, deposit from 20 to 50 fully developed young, yet, to his great astonishment, when he dissected one female taken from the sulphur pool, he found she was ready to deposit to less than 220 finny youngsters. That these fish should thus breed more prolifically in Banff waters than in their native habitat is something to wonder at, particularly when it is taken into consideration that Banff is the most

northerly point to which they have been shipped.

Three hundred was the number planted around Banff in 1918, and it is estimated that there are that many thousands there now. The project of shipping some from Banff to Kamloops and Fraser, B. C., is being considered. That they would in a very short time make their work on the mosquito nuisance apparent there is not to be doubted. They have enormous appetites for such small fry, and will devour a great number of mosquito larvae in a very short time. The ones in the hot sulphur pool are practically transparent, in fact, so much so that the color of a person's hand can be seen through them. This is probably due to the hot sulphur water.

814

YOUTHFUL APPEARANCE.

The feminine mode is apparent in a frock of charming printed silk crepe with snugly fitted hips smartly shirred. The band collar of ribbon is stitched across back and tied in bow at front. For formal afternoons select Lelong blue georgette crepe. Black crepe satin or navy blue wool crepe is also practical and smart for everyday occasions. Pattern No. 814 is obtainable in sizes 16, 18 and 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material with 3/4 yards of ribbon. Price 20c the pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

THE YELLOW SEVEN: THE DAUGHTER OF CHAI-HUNG

BY EDMUND SNELL.
ILLUSTRATED BY
R.W. BENTLEY

BEGIN HERE TODAY.

Capt. John Hewitt, Commissioner of Police at Jesselton, British North Borneo. Peter Pennington is detailed by the government to capture the leader of The Yellow Seven, a gang of Chinese bandits. Chai-Hung, influential Chinese, is suspected by Pennington of being leader of the gang. Pennington warns Brabazon, a rubber planter of Ketatan, to beware of The Yellow Seven. Brabazon is an admirer of beautiful women and falls an easy victim to their charms.

NOW GO ON WITH THE STORY.

He was still standing in the same position when the boy came in with the lamp. Brabazon, squaring his broad shoulders, uncorked the bottle. He poured himself out a stiff tot.

He was gazing at an arrow, with a fine metal barb, its butt-end split to admit a long, narrow strip of paste-board. On the side toward Brabazon was a bright yellow surface, ornamented with a series of black circles. He crossed the verandah and plucked the thing from the woodwork. The boy was slipping past him but the planter's hand shot out and swung him round to face him. He held the symbol almost under the creature's nose.

"What do you know of the Yellow Seven?" he demanded roughly.

The Chinaman shivered.

"Nothing, tuan," he stammered fearfully.

Brabazon stuck his legs wide apart and nodded his head several times, a grim smile playing on his lips.

"Bi-la," he said presently. "Clear out!"

Mindful of Pennington's warning and with an uneasy feeling gripping his spine, he sent a watchman with an urgent note to Wallace—one of his juniors, requesting him to join him immediately—and he prepared to stop the night. While waiting for the return of the messenger, he scribbled a note to Pennington and enclosed with it the Yellow Seven.

"Dear Penn," he wrote. "I have just received the enclosed per arrow-post. I'm not particularly scared at things I understand, but this has come as somewhat of a shock.

"Cheerio! G. Brabazon."

Wallace—a genial youth with sandy hair and freckled face—arrived at the foot of the verandah steps at about nine, followed by a coolie carrying a long bamboo pole with a basket of clothes suspended at one end and a pair of field-boots at the other. He was accompanied, moreover, by a large hound, short-haired and boisterous.

"Evening, Brabazon! Don't mind me bringing my dog, I hope? What's in the wind?"

He dropped into a chair and deposited his hat and stick on the floor. "Help yourself to a drink," invited Brabazon. "To tell you the truth, I'm glad you've trotted that nameless beast along. Some hungry Chinaman or other plucked my fox-terrier a week ago." He released the glass stopper of a bottle of soda-water and handed it across to Wallace. "You remember the Allison affair, of course. It appears that his assassination was by no means an ordinary act of highway robbery, but the deliberately connived portion of an extensive campaign manoeuvred by a secret society. I have very good reason to believe that an attempt is about to be made against myself, and that is precisely why I thought it advisable to send for you."

Wallace drew his chair closer and for more than an hour they sat talking.

Almost a week dragged on. Wallace—who was blessed with considerable inventive genius—suspended an ingenious burglar-alarm from the bushes that encircled the bungalow, a network of cotton and home-made bells that the dog succeeded in agitating so often that they were compelled to tie him up!

On the seventh day Brabazon woke to find himself becoming sceptical with regard to the whole affair.

That afternoon, he sent Wallace back to his bungalow, dog and luggage and everything, and gave the watchman instructions to cease his nocturnal perambulations and hand in his rifle. He would have destroyed Wallace's burglar-alarm if he had noticed it, but he didn't, and at a few minutes after midnight, it rang!

Swearing softly to himself, he took the hurricane lamp and the revolver that recent occurrences had brought to light, and went out.

The line of tinkling bells rang for a second time and he held the lamp well above his head, peering into the night. Suddenly he started back in amazement and quickened his steps in the direction of a crouching, trembling figure that shrank back from him as he approached. The hard lines of

his face softened as he went, and presently he stooped and lifted the slim form of a girl to her feet. She was simply clad, in a long-sleeved jacket of light-blue silk, bordered with black, and quaint trousers of the same material. It dawned upon Brabazon, as he surveyed her in wonderment, that she was of a class superior to that to which he was accustomed, that her skin was rather white than alive, and that she was possessed of a beauty he had never imagined possible in a Chinese girl. Her hands were small and well-formed.

"Who are you?" he demanded in Malay.

She replied to him softly.

"Suey-Koo," she thought she said.

"Where do you come from?"

"I am the daughter of Chai-Hung."

She uttered a little nervous laugh.

"I am the daughter of Chai-Hung. The police have driven my father from his home. They came and searched the house—and I ran away. In the darkness, I saw the lights of your windows."

He took her cold, trembling fingers between his own and forced her, half-unwillingly, up the steps to a comfortable chair. She sat on the extreme edge, staring with childlike surprise at the unaccustomed surroundings.

"You must have something to eat, Suey-Koo," he said.

She shook her head.

"I am not hungry. I only want to go home."

He remembered that he was clad only in the sarong and singlet in which he was accustomed to sleep.

"Wait just a little while," he told her, "and I will take you."

As he changed with feverish energy into the suit of khaki drill he had so recently discarded, the wave of feeling that her coming had provoked swept like an ever-swelling stream through his whole being, overwhelming the voice of Reason. Forgotten—in his wild eagerness for conquest of this timid, fragile creature, lovely as the lotus-flower—were the immutable laws of east and west, the warning of Pennington, her very connection, in fact, with the bandit who controlled the dread movements of the Yellow Seven.

Suey-Koo had stumbled into the burglar-alarm that Wallace had made, and yet it never occurred to Brabazon—secure in the fool's paradise that his own frailty had built up—that the unerring finger of the great Chai-Hung was behind all this, and that this seemingly helpless girl was but

Bid goodbye to every day scenes. Forget the crowded streets and city din; see the things you've longed to see; visit the places you've read about; hit the open road that beckons to fun and adventure, for a week, a month or a year. WALTER ANDREWS LIMITED, 346 Yonge St., Toronto, Ont.

another of the astute Oriental's cunning instruments; instructed to decoy the planter to her father's lair!

A girl in Kuala Lumpur had told Pennington that Brabazon was irresistible! Whatever the significance of Suey-Koo's midnight mission may have been, with the homeward journey barely half completed, she found herself nestling contentedly within the Englishman's encircling arm, for all the world as if that member had every right to be where it was.

Brabazon!

From somewhere behind him, the planter heard himself called by name. He released the girl and swung round.

Standing in the open space between the hutments that he had just left, he saw Wallace and the Pathan watchman. Brabazon waited until they had caught him up.

"What is it, Wallace?" he demanded.

"Look here, Brabazon, I'm sorry to butt in and all that, but isn't this a trifle unwise? The area beyond our wire's simply swarming with Chai-Hung's men."

Brabazon started.

"Who told you that?"

"Pennington," returned the assistant. "I've just seen him. He told me to advise you to send the watchman with Miss Chai-Hung."

"Pennington!" Brabazon's brain reeled. "How the devil did he know?" He bit his lip. "I suppose he's hanging around on one of his stunts. Of course Chai-Hung's men are about. They're looking for the girl. She's lost."

He faced Wallace defiantly. The assistant dropped a hand on his shoulder.

"Don't go any farther—tonight. It's too risky."

Brabazon felt for his pipe.

He strode back to where the girl waited.

"My watchman will see you home," he said.

Her face fell. Her hands stole to his sleeves. The look she bestowed on him stirred the fires within. Trembling with an emotion that was utterly beyond his power to suppress, he pressed her fingers to his lips. In all this monotonous existence of which he was fast growing tired, Suey-Koo was the brightest thing he had encountered.

"You will come and see me?" she whispered presently.

"Where can I find you—and when?"

When Brabazon again joined Wallace, the latter noticed that the cheeks of the manager were flushed beneath the tan of yare. Until they parted at the spot where two paths met, neither spoke a word.

The residence of Chai-Hung was surrounded by a high palisade. There were three gates, set close together—a large portal with narrower entrances on either side. The tall China-

WRIGLEYS

Add to the joy of the open road—this pleasure-giving refreshment. A sugar-coated gum that affords double value. Peppermint flavor in the sugar coating and peppermint flavored gum inside.

Between Smokes

man in gray black who leant against this effective screen was rolling a cigarette with practiced skill, using tobacco which he fished from the inner recesses of a rubber pouch. He clipped off the stray ends with a pair of folding scissors, shielded the match with his hands, then reached up and swung himself over on to the other side, dropping on to the soft earth within a bare twenty feet of a bamboo joss-house with an open front. There were tiled steps leading up to a long altar, illuminated with paper lanterns, and on the altar itself rested two bronze urns in which charcoal was burning.

(To be continued.)

For Rheumatism Minard's Liniment.

The hydrostatic equipment of the whale enables it to alter its buoyancy at will. When it wishes to sink it compresses its lungs and the blow-hole valves yield to the pressure; to rise it expands its body.

Several generations of two or three Japanese families have kept records of dates when bamboo bloomed, and it is found that certain sorts flower once in 120 years simultaneously with others which flower once in sixty years.

Gum-Dipped Tires Save You Money

Gum-Dipping is an exclusive Firestone process. It insulates and impregnates every fibre of every cord with rubber and prevents the cords from chafing against each other.

In ordinary tires these cords are uninsulated. In flexing they chafe against each other, causing internal heat and friction which softens the rubber, causing blowouts and tire failure.

These better tires cost you no more, yet they give thousands of extra miles. See your nearest Firestone Dealer.

Two Britishers Deserted French Foreign Legion

Now in Canada—Intend to Work Way Across to Pacific—
Warn Beau Geste Aspirants Against Joining

NO ROMANCE THERE

Former Captain J. A. Martin, D.C.M. and bar, M.M., and his companion T. W. Marshall, both deserters from the French Foreign Legion in Africa, are now in Canada with a tale of suffering and hardship hardly to be equalled.

In escaping from the Legion, Marshall at one time had to swim out into the Mediterranean to escape his pursuers. He was picked up by a British ship. Captain Martin fled with a companion across the desert and managed when almost exhausted with effort and starvation to reach Spanish Morocco.

Captain Martin is a tall, good-looking man, who is 31 years of age. He joined the British army the night war was declared in 1914 and went to France with the Grenadier Guards. In that regiment he won the Distinguished Conduct Medal and bar and the Military Medal. Having won his commission also, he was transferred to the Cameron Highlanders. After the war he was in Ireland with the British army and then served three years in India.

Returning to England the idea of joining the French Foreign Legion came to him when he was told that a friend of his won a commission with the Legion. His home is in Slough, Bucks, and he speaks French, English and Hindustani.

Mr. Marshall is a still younger man—only 27. In 1915 he joined as a bugler in the Royal Engineers. He was then 14 years of age. Too young to be sent to the front, he was kept in England until 1918, when he was sent to Germany with the army of occupation. He bought his discharge in Germany and for a year sold motorcycles in that country.

"I joined the Legion after reading 'Beau Geste' and other legion stories," Marshall's yarn of his experiences in the Legion and of his escape provides much that makes fine food for thought for prospective legionaries.

Signed Unwittingly

"Arriving at the legion bureau at Dunkirk," he says, "we were given a paper to sign. It was entirely in French. At that time I could not read it. It was only afterwards that a chap named Scott who joined with me, discovered that we had signed on for five years at a pay of one half-penny per day. We were given ten francs and a railway ticket to Marseilles. Fortunately we had some money of our own or we would have starved on the journey, as ten francs would not buy one meal.

"The men in the legion are of all nationalities and stations in life. Some are fairly wealthy men in search of adventure, others are men driven through poverty and trouble to join the Legion. The barracks rooms with such a gathering was a continuous babel. Mental tasks of peeling potatoes and cleaning fish the next morning started to wear the romance off the venture, but we were assured that such treatment would end, when we joined the legion in the field.

"That evening we left for Oran, Algeria. Those who saw us 'marching' must have laughed to think that we were going to join a great regiment. We were a slouchy looking lot. Sea-sickness during the voyage made life even worse before we arrived on the other side.

"Our departure to Sidi-Bel-Abbes was delayed for some reason and that night we were all put into a small room to sleep, while the guards with fixed bayonets stood over us.

"Eventually we arrived at Sidi-Bel-Abbes—the place we had all imagined as a place where legionaries took life at ease while the mellow African sun, made everyone happy. Never was an impression so far out. My uniform was sizes too big for me. Big men in the party received small ones.

Filled With Forebodings

"When we saw a squad of recruits going through drill, we were filled with forebodings. If a man was slow he was more than often struck by some huge sergeant. If that did not suffice he would be ordered to run around the drill square, nearly a mile square. If he did not do that fast enough he would be ordered to do it again.

"While we were at Sidi-Bel-Abbes Cameroon Day arrived. On this day we celebrated some victory of the Cameroons and each soldier is given the luxury of a bar of chocolate, a slice of cake and three cigarettes.

"The food I found to be rank bad and scarce. Coffee is given before starting the early morning duties. At 10.30 a.m. a thin soup and beans or rice is served. The same meal is duplicated about 6 o'clock. Once a week there is an issue of camel or horse meat. The only luxury is a cup of wine served two or three times a week. It is generally used for bartering for cigarettes.

"The next day our first route march took place. It was ten miles long. The order of the legion is that on such marches the legionaries must sing all the time. As 80 per cent. of the members are Germans, all the songs were in that language. As Scott and I were the only English-speaking members of that party it would have been useless to strike up 'Tipperary'."

"The marching was terrible as no socks are issued to legionaries. Rags have to be wound round the feet and

until one learns the knack, it is torture, as the wrinkles wound the feet sorely. Twice a week we had to march to a mountain over a dozen miles away, collect firewood, load it on mules and march back. Dozens fainted on these marches, but no matter what condition they were in they had to finish the march even if they took all day about it. Twice weekly we went to the shooting range. Each man fired five rounds. If the officer was not satisfied he had to fire extra rounds until the officer was satisfied. For every extra round, a man had to serve extra nights of duty.

Had to Find Bullets

"When the 'cease fire' sounded every man had to make a race for the ground behind the targets and collect the bullets he had fired. To those who were fast there was no trouble in getting five rounds, but the first ones usually collected some extras for the next time. In this way the last ones up would have a hopeless search.

"Scott, with terribly blistered feet, was always last in these rushes and, while most of us got back from the shooting ranges around ten in the morning, Scott would not return sometimes until four o'clock in the afternoon.

"We could not talk to each other and when we could there was only one topic, desertion. The authorities knew this and elaborate care was taken to keep us from doing it. Every week four or five would try to get away only to be caught.

"A reward is payable for anyone bringing in a deserter—dead or alive. Prowling Arabs are constantly on the lookout for this reward.

"The only chance was to have about 1,000 francs with which to bribe an Arab to smuggle one of the coast. Even then there was a danger that the Arab, having received the thousand would turn the deserter in to collect the regular reward as well.

"After two months I determined to try to escape in company with a Dutchman. We planned to slip away from the camp bareheaded in the hope that if we were seen we would be mistaken for English tourists and left alone.

"We also planned to walk by night and sleep by day, but we found by bitter experience that it was actually better to walk by day when we could see what was ahead, as we several times in the dark nearly stumbled on Arab camps.

Hill Stones Found

"Our bread lasted until the third night, and during that time we were also fortunate enough to strike plenty of streams at which to quench our thirst. On the fourth day we had no food, and it was not until late in the afternoon that we had an opportunity to quench our thirst. We were staggering along, parched with thirst when a miracle happened.

"I saw, under a shady bush, some halfstones which had fallen the night before and which the sun had not yet had time to melt. They helped us a lot.

"For the next seven days we were less fortunate. We did not strike any water during that time, and the only moisture we had was the juice of occasional green grapes we found.

"We dare not approach any hut, for we knew the Arabs would take us back.

"On the eleventh day after our desertion we finally saw the waters of the Mediterranean in the distance. We reached a small village on the coast and, thinking we were in Spanish territory, went up to a small house.

"To our dismay, it turned out to be a post of the French Port Police. We had not gone far enough west.

"They identified us as legionaries and arrested us.

"We had walked 420 miles. We had suffered hunger and thirst. We had been scorched by day and frozen by night. We knew our punishment would be years of imprisonment.

"In desperation that night we ripped a hole in the roof of the little hut and, with bleeding fingers, dropped to the ground. We just struck it when someone gave the alarm. I hid in a bush. The Dutchman was caught. For four hours I stayed in that bush until I was afraid daylight would give me away. I dropped down, mingled with the searchers, slipped down to the water's edge and, unnoticed, plunged in.

Drifted to Sea

"I meant to work my way along the coast westward until I struck Spanish territory, but in my weakened condition my swimming would not combat the tide, and I drifted out. I had almost lost consciousness when I was picked up by the crew of an English boat. They took me to Spain and from Gibraltar the authorities sent me to England."

Captain Martin had a much longer time in the legion. His story of hardship is much the same as Marshall's. He says:

"I was in the ranks for thirteen months. I tried to attain to the rank of corporal. But I was sent back from the corporal's school.

"The wages. In Algeria we got a half-penny a day during our three or four months' training. But when

World's Long Distance Champion

NEARLY 500 MILES STRAIGHT AWAY
England's high class locomotive which ran from London to Glasgow without stopping averaging approximately 60 miles an hour for the whole trip.

we were sent to Morocco we received three half-pence a day until eighteen months' service was completed, when the pay jumped from 11 francs 20 centimes per 15 days to 42 francs. Should anyone have the misfortune to be returned to Algeria, down came the pay.

"We were fed best at Fez, the headquarters of the Third Regiment, to which I belonged.

"Life in the legion is something that you have to live before you can believe. Nobody objects to your stealing kit or money except the person from whom the things are stolen. But you must never ask anyone anything about himself.

"Why he joined and what he had been—or more probably done, before he became one of the legion—is his own business.

"After thirteen months I made up my mind to clear out.

"My chum, Charles Leclair, and I managed to get civilian clothes. We started out in style in a motorbus after having dumped our uniforms. At Meknes, 38 miles away, we ran bang into two officers of the legion, who looked at us rather closely. My heart started to beat like a machine-gun.

Bluff Won Out

"But as bluff was the only way out of it, we lit cigarettes and started towards a cafe. One of the officers followed. But when he heard us talking English he smiled and wished us 'Good Day!' We told him we were on a walking tour of Morocco and, after a brief chat, he left us. We went on into the cafe to find two policemen sitting there.

"Talk English like the Dickens," urged Leclair. We did, until I could hardly talk as the coffee I was drinking was scalding my tongue. When one of the policemen started to talk to me I was scared to death and my nerves were jumpy. We had a long wait in Meknes for the train that was to carry us away, and during that time a legion sergeant and a squad of men eyed us until we were faint with fright.

"Fortunately there were some English ladies on the platform also waiting for the train to Souk-Arba-du-Ghar, and I went up to one of them and explained everything. They were most plucky and laughed and chatted with us until the train left. An inspiration on the part of Leclair caused

us to buy return tickets to Meknes.

"The next stage was a 43-mile walk over country to the Spanish border. After fourteen hours of arduous walking we managed to board a Spanish motor truck and were taken to el-Araish. From there we got a bus to Tangier.

"From there it was plain sailing."—Montreal Star.

Immigration and Population

Quebec Action Catholique (Ind.): The question has been asked: Is it true that immigration has caused the appreciable deficit in the population? The question, capacious though it may be, is nevertheless a confession. Since there is a deficit in the population in spite of the intense immigration, it proves that immigration has not produced the results expected. And since our Canadians are emigrating, it is a curious remedy to try and replace them with immigrants.

Willie: Daddy, will you buy me an X-Ray machine?
Father: What in the world do you want with an X-Ray machine?
To find 'X' in my Algebra problems!

THOUGHTFUL TOMMY

"Mamma," inquired Tommy, "will the pudding make me sick, or will there be enough for everybody?"

A "HOT" TIE

Sambo: "Rastus, dat tie what yo' got on shuah am a flamer!"
Aastus: "Dis tie is supposed to be a flamer, niggah, 'cause Ah bought it a fire sale."

The only things cheap now are talk and human life.

State Places Ban on Showing Dogs With Cropped Ears

Bill Passed in Massachusetts
Greatly Strengthens Move
Against the Practice

Cropping of dogs' ears is forbidden in Massachusetts, and the ban enforced by a prohibition also against exhibiting animals with cropped ears in dog shows, under a bill which has been passed by the Massachusetts Legislature and signed by Governor Alvan T. Fuller.

Announcement of the Governor's action closed a legislative chapter which began with one of the most largely attended committee hearings of the session. The act will go into effect Sept. 1.

The statute imposes a fine of \$250 for any violation and makes the possession of a dog with freshly cropped ears prima facie evidence of an offense. Heretofore, according to sponsors of the measure, it has been practically unquestioned that cropping was a violation of the statute against cruelty to animals, but conviction could only be obtained when the dog owner was taken in the act. The provision against exhibiting dogs with cropped ears will make the act enforceable, its proponents believe.

A number of dog fanciers and veterinarians favored the bill during its consideration in the Legislature and declared the breeds whose ears in the past have been cropped for show purposes would continue their popularity under the new standards. Provision is made for registration of dogs whose ears have been cropped before the effective date of the statute.

The Younger Generation

Lady Neish in the London Morning Post (Cons.): The cynics distrust liberty. They had none themselves and they would deny it to the youth of today, who will not be denied. Liberty is the finest and best teacher they can have. The young may make blunders, but they gain experience, and from experience come patience and tolerance, understanding, and even meekness. Why do critics never realize the value of praise as against condemnation?

Environment and Character

Glasgow Herald (Cons.): Environment is not the last word in human life; it does not spell our fate. Character is wrought to finest quality in spite of untoward conditions, and often is majestic in its scorn of circumstance. Were it otherwise, the galaxy of genius would not shine so brightly in the firmament of life. The best environment on record, the Garden of Eden, was not (so the theologians tell us) eminently fruitful.

Paris Septuagenarians Race for Methusalem Cup

Paris—The Methusalem Cup, offered as an annual prize, brought out four aged cross-country runners in the first race held recently. Four men, from 70 to 78, averaging exactly 75 years old, ran and walked an even two miles through the Bois-de-St. Cloud to show that they could do. The winner came home in 22 minutes 43.45 seconds, decidedly over the world's record but esteemed very satisfactory for grey-bearded men.

This Methusalem race is the outgrowth of the Old Ancestors race, established in 1915 for men more than 40. The age limit had to be raised to 50, because there were too many contestants.

British Interest in Canada Grows

Export Houses Seek Connections,
Commissioner Reports

Manufacturers of Great Britain are turning more and more to Canada as an outlet for their goods, while Canadian firms are seeking connections with British export houses, according to data in the hands of the British Trade Commissioner.

Increasing interest in Canadian markets by Old Country manufacturers is indicated by the record number of travelers and sales representatives of British houses here this season, officials report. They are more numerous than at any time since the war, it is said. Representatives are also studying Canadian needs and preferences in order to more easily compete with American goods.

Textiles, cottons and other materials with the exception of artificial silk, are finding an increasing outlet here, reports to the British Government show. There is a possibility of the British light-weight automobile entering the sales field here in view of the attempt to consider the structural changes that would be necessary to suit Canadian conditions.

Members of the British Sales Managers' Association are scheduled to arrive here early in July. The organization last year, at the advice of the Prince of Wales, entered upon a scheme to promote greater inter-empire trade. They will visit Montreal, Ottawa, Winnipeg and Quebec.

Prince of Wales to Fly Only to Keep "On Time"

London.—The announcement that the Prince of Wales will travel by airplane to keep his public engagements will undoubtedly stimulate the already growing fashion for air travel by those who can afford it.

The arrangements for the Prince, however, do not provide for joy riding, according to official information, and it is said that he is not learning to fly the machine himself.

An army airplane is to be held ready for him, "when circumstances may make it necessary for him to use one," at the Royal Air Force aerodrome at Northolt, Middlesex, but no special machine and no special pilot is to be devoted to his service. The planes upon which the Prince will have a call, it is said, are all fitted with Handley Page slotted wing safety devices, and his pilot on any occasion will be an officer on duty at the time the call is made.

According to unofficial reports the decision to give him the use of these army machines is due to his motor car having been frequently delayed by enthusiastic admirers getting in his way with the result that he has been made late for public appointments.

Stocking a Fishless District

According to all available reports and information no species of trout has ever been found in the waters of southern Saskatchewan. Beginning in 1924 the Dominion Dept. of Marine and Fisheries planted brown and Loch Leven trout fry in several streams in the Cypress Hills district and closed these streams to fishing. Up to the present the fish have done very well. They have survived three winters; some reproduced last autumn in their third year; and specimens have been caught nearly a pound in weight and over a foot in length. While it is too soon to form an opinion regarding the final outcome of this introduction, the evidence to date is causing much local interest and enthusiasm, as the prospect of angling in a district that has hitherto been devoid of such sport is viewed with pleasure.

Careers for Women

Vera Brittain in the London Daily Chronicle (Lib.): Owing to the breaking of old traditions by the war, and to the great constitutional changes of the past few years, woman has ceased to be a domestic creature who occasionally penetrates, timid and unwelcome, into the working world of men. For good or ill she has become one of the complex economic life of the nation, and as such her opportunities and achievements are affected by every political change, by alterations in social custom, and even by the subtlest modifications in public opinion. A young woman, therefore, should no longer be permitted to choose an occupation without having the slightest knowledge of those outside influences which may well determine either her failure or her success.

British Art

London Sunday Express (Ind. Con.): Some day the British people will discover that the Royal Academy is not so black as it is painted by the conventional pessimists. This year it is far in advance of the Paris Salon. It is full of vitality, experiment and imaginative creativeness.

Although John L. Sullivan never lectured on Shakespeare, he always brought home the Bacon—Louvillier Times.

Daughter (after severe lecture): "Oh, mum, you're too early-Victorian. This is 1928, not 1848."

Women who practice dentistry have increased in the U.S. from 807 to 2,300 in twenty-seven years, not counting the 200 now enrolled as students.

TENDERS

Tenders (shall be received until June 29th., for the erection of a wood-shed at the Consolidated School Brownsburg.

The lowest or any tender not necessarily accepted.

Plans and specifications may be seen at the office of

Mrs. John McQuat,
Sec.-Treas., School Corporation
Chatham No. 2, Brownsburg.

STONEFIELD.

Mr. Jas. Patton, of St. Philippe, visited Mr. and Mrs. J. Cannig recently.

Mr. R. Morrison, was in Lachute on Friday at the Fair, also on Sunday at home.

Miss Mary Derrick, of Ottawa, spent the week-end with her parents, Mr. and Mrs. A. Derrick.

Mrs. Mac. Pridham and Miss Grace Williamson, of Grenville, called on Stonefield friends last Tuesday.

Meeting of St. Mungo's Ladies' Aid at Mrs. J. Canning this Thursday and a good attendance is looked for.

Mrs. A. Browning and family have moved up from Montreal for the summer and are living at Greece's Point.

Mr. and Mrs. L. McGain and family, of Verdun, are the guests of Mr. and Mrs. Conway for a couple of weeks.

Mr. and Mrs. W. W. Cooke and Miss Cook, of Primrose Ave., Ottawa, were guests of Mr. and Mrs. J. Russell Owens last Sunday.

The Misses Violet and Florence Moncrieff, of Montreal, spent the week-end with their parents, Mr. and Mrs. G. Moncrieff.

Mrs. Conway went to Montreal last Wednesday, returning in the evening with her daughter, Miss Helen, who is attending the McKay Institute.

Mr. and Mrs. Arthur Peddle and family, of Montreal, spent the week-end at their summer home here.

Mr. and Mrs. Jas. Densmore Jr. & little daughter are visiting friends in Montreal.

Miss Ellen Hawkins and her sister Mrs. James Densmore Sr. motored to St. Anne on Wednesday to see their brother, Mr. Thomas Hawkins, who we are sorry to say is seriously ill at present.

No news last week as everybody had to go to the Fair myself included and must say it was well worth while as it was the best ever and the president and his associates are to be congratulated on their success, also the exhibitors on their splendid showing of livestock, and the programme was greatly appreciated especially the Scottish dancing by the 5 young ladies and of course the clown and his donkey had their share of the fun, and everyone went home happy.
