Don't forget to send in your order as soon as possible for pasteurized milk or cream. We expect to have it on the market very shortly. We will also deliver natural milk and cream to those who still want it. All milk and cream delivered will be in steam sterilized bottles for the first time in the history of Lachute.

Phone your orders to "Lachute Dairy," C. R. Bradford and P. A. Matthews, Props. Phone No. 74, Lachute Mills.

COMING EVENTS

The Women's Auxiliary extends a cordial invitation to an illustrated lecture entitled "A Travelogue Through England and Scotland and over the Battlefields" to be given by Rev. Dr. H. C. Sutherland, D.D., of L'Orignal, Que., in East Settlement United Church, on Tuesday evening, Nov. 6th, beginning at 8 p.m. Other items also on the program. Admission 25c.; children free. Refreshments will be served.

DANCE

D. C. Co. Employees' Social Club, Brownsburg.

A Masquerade Dance will be held on Friday, November 2nd, 8:30 p.m. to 2:00 a.m. A good orchestra will be in attendance. Gents 50c. Ladies 25c. N-2-3.

The Lachute Fire Brigade are holding a Thanksgiving Dance in the Auditorium, on Friday evening, Nov. 9th. A hearty welcome is extended. Special music and the usual good time is promised.

Members of the Loyal Orange Lodge of Louisa, No. 717, will hold their Annual Dance on Monday, Nov. 5th. Gents \$1.00. Come and have the usual good time.

Members of the Loyal Orange Lodge, No. 2231, will hold a Dance in McArthur's Hall, on Friday, Nov. 16, at 8 p.m. Gents \$1.00. Good music. Refreshments served. Come and enjoy yourselves.

ARMISTICE DINNER

An Armistice Dinner will be held in the Lachute United Church, Friday Nov. 9th. Dinner served from six to eight. Music provided. Admission 50 cts.

A Business Meeting of the Lachute Dramatic Society will be held in the Academy on Tuesday next, at 8:15 p.m. to which all members are asked to attend.

—Homstitching and Pekoe Edge, properly done. Quick Service. Telephone 71 ring 2-4.
Mrs. A. Habib, Brownsburg, Que.

—I wish to remind the public generally that I am prepared to supply monuments of any size, quality or description on shortest possible notice. Re-lettering & adjustments of stones already erected will be carefully attended to by H. J. Hammond, Monumental Works, East Ward, Lachute.

Large Assortment of
**CHINA WARE — CUT GLASS
WATCHES, RINGS**
and all kinds of small fancy and useful articles for all occasions.
A. C. LAPIERRE,
Watchmaker and Jeweller
Bethany Street, Lachute.

THE LATE MRS. WM. JAMES.

There passed away at Lachute, Que., on Oct. 30th, 1928, one of its oldest and most respected residents at the advanced age of 92 years, in the person of Elizabeth Walker, widow of the late Wm. James who predeceased her twenty one years ago.

Mrs. James was born at Lachute, Oct. 17th, 1837, at the Walker home-stead, "Glenburnie" The Seignory and spent all her life in the immediate vicinity. She was a life long member of the Lachute Presbyterian Church.

The funeral was held on Thursday, Nov. 1st, from the residence of her grandson C. F. James, to the United Church, the service being conducted by the Rev. G. Campbell Wadsworth, B.D., assisted by the Rev. J. R. MacLeod, B.A., D.D. She leaves to mourn her loss two sisters Mrs. John Tombs, of Westmount, and Mrs. Jas. C. James, of Lachute; one grand daughter Mrs. Emerson Cooke, of Hoosier, Sask., nine great grand children and a host of friends.

The pall bearers were James McPaul, David Todd, Jas. Armstrong, Archie Graham, Albert Scott, Wm. Canning.

THE LATE MRS. W. J. WARWICK

It is with deep regret that we record the death of one of our most loved and respected residents Mrs. W. J. Warwick, of Mabel, Que., who passed peacefully away after a short illness on Sunday last.

Elizabeth Mary Warwick was born about two miles from her home on Jan. 15th, 1865 and spent her whole life in this community. She was married in 1884 to William J. Warwick, who predeceased her in Feb. 1920.

Although in poor health for some time, she was always bright and cheerful and had a very keen interest in church and social life. A loving friend, a kind neighbor, a devoted mother. Her death has cast a gloom over the community. She was for many years a member of the Baptist Church, of Grenville, Que. Her death leaves a vacancy which will be hard to fill.

She leaves to mourn her loss twelve children, all of whom were present at her funeral; Mrs. J. Heatlie, of Ogdensburg, Que.; Jas. of Lachute; John, of St. Anne's; Lawrence, of Hanna, Alta.; Gilbert, of Flint, Mich.; Mrs. S. McKiddie, and Harlow, of Vide Sac; Mrs. C. J. Tomalty, Maude Alma, Raymond and Ross.

The funeral was held at her late home on Wednesday afternoon; the service being conducted by Rev. A. Doree and was very largely attended. The pall bearers were her seven sons. The remains were laid to rest in Ogdensburg cemetery.

The many beautiful floral tributes from the following show the esteem in which the deceased lady was held: A Pillow from the family; Wreaths from Mr. and Mrs. J. Mason, Laurentian Lodge, Chatham Women's Institute; a Spray from friends in Flint; a Pillow from Miss Flora Campbell, of Ottawa; Basket of flowers from Mr. and Mrs. Wyman McGibbon.

Those attending from a distance were Mr. and Mrs. Brown, Mrs. Calvert McKenzie and Miss Flora Campbell, all of Ottawa.

DEATH.

JAMES.—At Lachute, Que., on Tuesday, Oct. 30th, 1928, at the residence of her grandson, Elizabeth (Betsy) Walker, widow of the late Wm. James, aged 92 years.

LOCAL NEWS.

Mrs. Geo. Calder spent the week-end in Montreal.

Mr. Pierre Cantin, of Weir, was in town on Tuesday last.

Mr. Jas. Calder, of Montreal, spent the week-end in town.

Miss Reta Jones, of Mabel, spent the week-end with her parents.

Mrs. K. L. MacPherson, of Montreal, is the guest of Miss Barron this week.

Mrs. L. Tomalty, of Dalesville, visited friends in Lachute on Friday of last week.

Miss Muriel Walker, of Montreal, was the week-end guest of Mr. and Mrs. Geo. Y. Deacon.

Mr. S. A. Filion, Crown Lands Agent of Grenville, was in town the early part of this week.

Mr. and Mrs. Gruay and daughter Margaret, of Ottawa, were week-end guests of Mrs. Thos. Fraser.

Mr. & Mrs. W. Deacon and daughter also Mr. and Mrs. Walker McArthur spent the week-end in Morin Heights.

The Ladies of the United Church Brownsburg, propose holding their Bazaar on Saturday, Dec. 1st. Keep the date open.

—Mrs. Douglas McQuat will receive for the first time since her marriage on Saturday, Nov. 3rd, from 4 until 6 o'clock.

Minae Maria and Iona Westgate, accompanied by their mother Mrs. G. Westgate, visited Mr. and Mrs. Geo. Bennett, of Carillon, last week.

Mr. and Mrs. Raoul Joly and daughters Gabrielle & Mariette were in Ottawa for the week-end, guests of Mr. and Mrs. Leonard Beaulieu.

Mr. and Mrs. Geo. O'Brien, of Thurso, and son Lawson, of Chelsea, motored to Lachute on Sunday and were guests of Mrs. W. W. Hume.

Mr. D. McAdam, of Chatham, and Mr. Arthur Tooke, of Papineauville, retired C.P.R. engineer, were in Montreal and called on Mr. John Shanks recently.

Mr. and Mrs. Donald Beers and Mrs. Wm. A. Ball motored to Montreal on Sunday to attend the christening of Mr. and Mrs. Robt. Beers' daughter, Joan Margot.

The Family Herald and Weekly Star with its wonderful improvements is now regarded as the great Agricultural Paper of Canada and the Family Circle's best magazine.

Mr. and Mrs. J. P. MacKimmie, Mr. and Mrs. W. S. MacKimmie and son Jack left on Monday by motor for a few weeks visit with friends in Chicago and other points.

The many friends of Mr. W. Lamb are pleased to know that he has recovered from his recent illness and has resumed his duties as manager of the Bank of Nova Scotia.

The many friends of Mr. L. E. Dumais who is now an inmate of the Hotel Dieu Hospital, Montreal, will be pleased to know that he has passed a successful operation and is on a fair way to recovery.

Mr. Geo. Blair, of Stettler, Alta., has been in town for the past couple of days looking up his old-time friends. He is looking quite hale and hearty and is visiting for a few months with his daughter in Montreal.

Last week the patrons of the 'Rex' Theatre were privileged to see Buster Keaton in "The Camera Man." This speaks well for Lachute as the film came to our town fresh from New York and is now playing in Loew's Theatre, Montreal. That's going some!

The store window of Jno. McPaul & Son is attracting considerable attention, because of its pleasing and cozy appearance in which a splendid Radio display takes prominent part. Make sure you invest in one of these splendid pieces of furniture, that combines beauty and pleasure.

The High School Rugby Team, of Montreal, motored through Lachute on Friday afternoon en route to play in Ottawa with the Ashbury College. They stopped off for a look around the town and took advantage of our fine wide Main Street to get out the ball and saple themselves up before proceeding on their journey.

The residents of Lachute Road are now enjoying the use of electric light in their homes, and in return for the promptness of the service rendered by the Gathneau Power Co., Mr. W. J. Rodger put up a nice chicken supper in Therrien's Hotel last week to which Messrs. F. D. Foster, J. A. Gosselin, W. H. Blakeley, B. H. Robertson and local stay of workers were present together with a number of friends. There were many nice things said as to the appreciable value of the lighting arrangements all round and now the Power Company have received an application to light up River Rouge, and so it goes until we shall see all our rural communities linked up with the Power System that will carry sunshine to the home worker because of the many advantages to which the electrical energy can be used for lightening the work.

Mr. R. L. Calder, of Montreal, was in town last week.

Mrs. M. Anderson and daughter Glenys left Tuesday for Ste. Agathe.

Last Sunday evening the Fire Brigade responded to a call in the East Ward or at the C. N. R. crossing, where the McLaughlin Sedan belonging to Mr. Fred Palmer, of Huntingdon was all ablaze and a perfect wreck. Fortunately no one was hurt.

All Hallow's Eve was as usual duly celebrated by the young folk and it is pleasing to note that the pranks indulged in were of the harmless kind. The fun was not confined to the youngsters for their visits were accepted with lots of pleasure by the elder folk who freely dispensed their gifts of apples, nuts and candy.

A very interesting lecture was given in St. Simon's Church last Sunday evening by the Rev. Mr. Trivett, a returned Chinese Missionary, and was illustrated by many fine lantern slides the pictures being taken among Chinese life, by Mr. Trivett. The lecturer told of the need of civilization, and Christian belief wanted in China, also of the way the priests deceived the people in order to make money for themselves. He urged that more money be given for the missionary work, for hospitals, asylums, homes for poor, that were hardly known in many Chinese provinces, and the sick, lame, blind etc., were allowed to roam the streets, begging for a living. Many pictures were shown of Colleges and Homes that were erected by Christian workers, which proves that the missionary money is spent in a rightful and helpful way.

HALLOWEEN PARTY.

Members and friends of the Lachute Literary Society had a most pleasant evening on Wednesday last, when they gathered in McArthur's Hall and enjoyed a spicy debate, which was followed by games and dancing. The debate was participated in by four teachers of the Academy the Misses Jones and Ward who took the affirmative in the subject of "The Freedom allowed young people today does more harm than good," the Misses Fraser and Marshall taking the negative. Most interesting and convincing were the arguments brought forward by the speakers which gave the judges a rather difficult task in awarding the honors that finally were won in close margin by the negative.

BREAKS NECK IN MOTOR ACCIDENT.

Last Sunday afternoon, while motoring to Lachute for a visit with friends, Edmund Heneault suffered a broken neck as the result of not making the curve at the St. Jerusalem School house. Heneault was driving with his brother-in-law Telephone Carriere and everything went well until just turning at the school-house, when Carriere said he felt the wheel torn from his grasp as the car ground into the loose gravel and took the ditch where it overturned. Carriere managed to pull himself out and though shaken up miraculously escaped further injury, but Heneault when extricated was found to be dead. He was riding with his hands in his pockets and consequently unable to help himself. Both boys are former residents of Lachute, Heneault having been in the employ of Mr. Hamilton's bakery. He was 30 years of age and leaves a wife and five small children. Dr. Wales was notified and returned a verdict of accidental death.

CUSHING.

Dr. H. B. Cushing entertained a party of friends from Montreal also Mr. and Miss Barron, of Lachute at luncheon at his cottage here on Saturday.

Rev. F. L. Jobb of St. Mugs's was in Montreal the early part of the week and attended the meeting at Erskine Church, on Monday evening of ministers and laymen of the United Church of Canada.

Mrs. (Rev.) F. L. Jobb and daughter Miss Muriel Jobb attended the wedding last week of the former's niece, daughter of the Rev. J. F. McCurdy, of Brantford, Ont., to Mr. Calvin Tuttle, B. Sc., C. E., of Ottawa.

Mr. and Mrs. C. F. Watson accompanied by Mr. E. Dawson also Miss Pearl and Mrs. Ray Dawson, of Stonefield Heights, motored to Morin Heights and visited relatives on Sunday last.

Mr. C. J. Hartley received news on Monday of the death in hospital at Saskatoon of his brother-in-law, Mr. Duncan Campbell, of Watson, Sask. The deceased gentleman who had been ill for some time was about fifty years of age and was married in 1917 to Miss Stella Hartley, of this place, who with four young daughters survives him.

Mr. Geo. Nicholls and daughter, Mrs. T. Weir Jr., attended the funeral at Mount Maple on Wednesday of the late Mrs. W. J. Warwick, the news of whose death on Sunday last was heard with much regret by her many friends in this vicinity. The sympathy of this community is extended to the bereaved family.

IN MEMORIAM.

MORRISON.—In ever fond and loving memory of T. Alexander Morrison, son of Mr. and Mrs. Walter Morrison, of Arundel, Que., who died on October 31st, 1921, at Vancouver, B. C. Ever remembered by Father, Mother and family.

Nine Years' Progress in European Aviation

Proposal Made That Airway Chiefs of Europe Should Assemble to Outline Concrete Plans for Improvement—Most Urgently Needed

By HARRY HARPER

London.—At a critical stage of their progress, when they are emerging from a phase of experiment into one of practical operation, the passenger airplane lines of Europe are preparing to celebrate the completion of their first nine years of pioneer flying.

It was on Aug. 25, 1919, that the world's first daily airplane express was instituted between London and Paris. With the arrival this summer of the ninth anniversary of that historic occasion, it is proposed that airway chiefs of Europe should meet together to discuss the lessons learned during these nine years of trial and error, and to outline concerted plans for improvements now seen to be urgently necessary.

The two most urgent requirements are to increase the comfort of the airborne passengers, and to stimulate a larger all-the-year-round volume of aerial traffic. As examples of long-distance air transport, it may be mentioned that this summer, ascending from London, travelers will be able to reach Tangier (Northern Africa) in 18½ flying hours, Constantinople in 26, and Teheran (Persia) in 50.

Only Two Passengers

The first passenger airplane on the air-line between London and Paris carried two people in a tiny cabin. To-day, as many as 18 and 20 passengers are accommodated in the saloons of European air expresses of 1928, and the standard of aerial comfort has been raised considerably. But it does not compare favorably, yet, with the luxury of a Pullman-car train. The noise especially proves trying to many aerial travelers.

The British Air Ministry is now appointing official experts to fly to and fro between London and the Continent, tracing with special instruments the mingled sounds which assault the ears of passengers in the saloons. In the cabin walls, built more staunchly than has been the case before, sound-deadening materials are to be employed. Engines are not only to be fitted with more efficient silencers, but are to be placed on mountings which will absorb vibration. Important experiments are also in hand with propellers having blades curved specially to reduce noise when rotating.

More Aerial Comfort

The result of these improvements, when incorporated in new passenger-planes, should be to carry aerial comfort a definite stage farther. It is to enable such developments to be carried out without undue delay that the British Government is drawing up with Imperial Airways, the State-aided airplane company, a fresh agreement which will enable new airplanes to be acquired much more frequently than has been the case hitherto. The importance of this cannot be over-emphasized.

The chief problem that stands revealed, after nine years of aerial experiment in Europe, is the persistently seasonal character of airplane passenger traffic. During the summer many companies have difficulty in finding enough machines to accommodate the influx of holiday travelers. But in winter the tale is different, passenger figures fall to a low level.

Regularity of Service

Undoubtedly one of the most urgent needs is to insure that in winter the air expresses fly with the same reliability attained during the summer. The overhaul and maintenance of passenger airplanes has reached such a high level of efficiency, particularly in the case of British machines, and the pilots have become so experienced, that the airways between London and the Continent now function almost as dependably as railways in all conditions save those involving mist and fog.

This question of flying in mist and fog, when viewed in the light of nine years' experience, is seen to be one mainly of providing a pilot with some form of artificial vision to replace ordinary vision when he is about to alight upon a fog-obscured airfield. At the start of a journey, provided he has a clear maneuvering space before him, he can take off in fog and climb above it, being guided during his journey by wireless direction-finding. But when he is a mile or so from the airfield which is his destination a problem arises that has not yet been solved.

Valuable Time Lost

Between the time when a pilot has asked to be told his position, and the moment when this information reaches him by wireless telephone from a ground station, his machine will have moved an appreciable distance through the air. During cross-country flying this will not matter. All the pilot needs at such time is an approximate indication of his position. But when an airman is groping through fog quite near an airfield, straining his eyes to catch sight of powerful lights on the landing area, he needs some instantaneous method of ascertaining not only his exact position from moment to moment in relation to the fog-obscured earth beneath, but also his precise height above the ground he cannot see.

An apparatus with which the British Air Ministry has begun to make

full-scale experiments, known as the "leader-cable," is an adaptation to flying of the electrified submarine cable systems which have been employed to guide steamships into harbor during fog. In its aerial application the cable is arranged in a circle round a flying ground. From the cable, radiating constantly upward, is a powerful electric current.

Electrical Signals

As an airplane, groping in through bad visibility, comes within the electrical field of this cable, an instrument on the pilot's dashboard begins to flash out signals from a series of small colored lights. By watching these, and steering accordingly, the airman, even when enveloped in dense fog, can maneuver till he is exactly above the cable. Then he proceeds to follow it round, maintaining his position immediately above it according to the tell-tale lights on his dashboard, which inform him instantly of any deviation. At the same time he is gradually reducing altitude. In this latter maneuver, also, he relies upon the guidance of the cable.

There is an additional instrument which tells him from moment to moment as he creeps lower his varying distance from the ground, which may still be invisible to him under its layer of mist and fog. Thus guided automatically as to position and height, he steals down foot by foot through the gloom till he comes within view of the fog-piercing lights on the landing-area, and these give him visual guidance for his actual contact with the ground.—Christian Science Monitor.

Hard Facts

Quebec Soleil (Lib.): (Infantile mortality is still very high among the French-Canadian population.) The birth rate is declining throughout the entire world. The stream of German population, which was overflowing before 1914, is three-quarters dried up since the blood baths of the battle-field; in Italy, the exhortations of Mussolini have not succeeded in persuading the Italians to bring new little fascists into the world; in France practically the same conditions exist; in Britain births do not exceed deaths by more than 30 per cent.; whilst in the United States . . . but we had better not talk about that. Can we believe that the Province of Quebec will escape the contagion indefinitely? We wish it could. But are the facts likely to conform to our wish? There is ample room for doubt. The figures show a slow but sure decline.

"You can start a roll by tapping the safe, if you can't budget without."

Iron and Steel

London Times (Ind.): (The first volume of the report issued by the Committee on Industry and Trade, dealing with the metal industries, has awakened considerable interest among the students of the technical colleges.) The history of the iron and steel industries shows that technical discoveries have frequently been revolutionary in their effect, and the importance of research work is, therefore, perhaps even greater than in many other industries. That brings us back once more to the technical research institutions, the laboratory, and the individual student. There would seem no escape from the conclusion that the future of the British iron and steel trade and of other industries will depend on the young men who are being trained to-day.

THE USE OF HOOKS

Every home owner should invest in a good assortment of hooks. To hook back doors while open is a convenience as nothing has to be hunted up to hold the door from banging shut when it is wanted open. Hook doors on the inside. Hook covers on feed boxes instead of having weights on them. Hook basement storm windows that have to be opened occasionally. Hook gates, tool boxes, and children's playhouse doors. These doors should never be hooked lightly or the children will some time lock themselves in. If a long staple is used and a good deal of it left on top the wood, the hook will hold the door and yet give it play so they can work it open from the inside.

Euphrates, Not Nile, Seen as Culture Source

Chaldea Diggings Show Civilization Advanced Far Beyond Early Egyptian

Kings' Tombs Found at Ur

Human Sacrifice Was Part of Royal Funeral Rites

Paris.—In an article published recently in "Le Journal" Mr. C. L. Woolley, the English scientist engaged in archaeological excavations at Ur in Chaldea, described some of the discoveries made in the royal tombs uncovered there and discussed their importance from the viewpoint of the student of the earliest civilizations. He said:

Royal Tombs Discovered

"Last season our excavations at Ur in Chaldea were highly successful. We discovered in the cemetery which we opened last year five royal tombs, dating from a quasi-prehistoric period. Four of them are undoubtedly tombs of kings and queens. The fifth is probably the tomb of a prince who never reached the throne. All are in every way different from the tombs then constructed for ordinary mortals. "Inside there are one, two or three rooms. The walls are made of limestone blocks, the roofs of limestone or brick. The presence of stone is in itself an evidence of wealth, for Ur is situated in an alluvial valley in which one could not find even a pebble. The nearest quarry is at least 100 miles away.

"Still more astonishing is the architecture of these tombs. Two of them have corbelled ceilings. In the others we find arches in baked brick, the oldest known. It is marvelous to think that these first builders were familiar with the art of making columns and arches, while our Western world learned the secret only at a relatively recent period.

Human Sacrifice Practiced

"The tombs of the kings were indicated, moreover, by the traces found there of human sacrifice. This practice had been undiscovered so far in Mesopotamia. No Sumerian or Babylonian text mentions it. But it is demonstrated by the evidence that the funerals of these prehistoric kings must have been preceded by the massacre of at least a sixth of their servants and courtiers. The remains of nine ladies in waiting, with their heads bound in gold braid and surmounted with gold crowns, gold earrings hanging from their ears, lay at the foot of the sepulcher. Under the piers at the door lie the soldiers of the guards, with their bronze helmets and their lances. Other skeletons strew the floor, even the ox-carts are there, their drivers on the seat, the six oxen, supported by the pole, their thighs and their heads ornamented with lapis-lazuli and silver.

By the Queen Shub Ab lie her ladies of honor, in two rows, and also the harpist, whose arms are still crossed over the harp, an admirable instrument, incrustated with gold and ornamented with a gold calf's head, whose hide is made of lapis-lazuli. The queen's chariot was a light, grayish one, incrustated with the heads of lions, bulls and leopards in silver and gold. The chariot was drawn by asses. Near the asses are the skeletons of the little servants who drove them.

Intended Only for Rulers

"It is curious enough that in the ordinary tombs not only are there no human victims, but also no traces of such a practice, no clay figure to represent the real sacrifice, nothing which resembles the mural paintings. The bas-reliefs, the wooden models of Egypt, in which the human sacrifices

of the time of the first kings are recalled.

"Here at Sumer it seems that this practice was not a survival of a general ancient custom, but was rather an appendage of the sovereign alone, so as to indicate that the sovereign is always different from ordinary men. At a period less remote, in the historical epoch of the third millennium before Christ, the kings of Sumer and of Achad were deified after death, and, later, even in their lifetime. Perhaps in this it must be seen that the monarchs were regarded as gods who ought to be glorified by the blood of men.

"Three of the four tombs were pillaged. But the robbers did not rise them completely and we have found some treasures. The funeral alcove of Queen Shub Ab was intact. The Queen lay in a coffin. She wore a cloak covered with agates lapis-lazuli and gold. Her head was weighted down with gold bands, crowns, flowers and ornaments resembling Spanish combs. Beside her was a crown decorated with pretty little figures, representing animals, fruits and flowers. Beside her, too, were innumerable gifts, including gold vases and a finely worked calf's head.

Collection of Great Value

"These objects form a collection of incalculable value for a museum. Not but precedent in the last analysis is only are they specimens of the art of an epoch which we did not know before, but they modify profoundly our ideas of the development of civilization. The tombs of Ur are certainly older than those of Menes, the first king of unified Egypt. We know that the civilization of Egypt began with Menes. Now at that epoch the Sumerian civilization was already old. Any one who has seen the finds at Ur cannot consider them the products of an art in its beginnings. We must conclude from this that the Valley of the Euphrates, and not that of the Nile, introduced civilization into the known world and that Egypt, which took the elements of civilization from the East, borrowed them directly or indirectly from the land of Sumer."

Women's Work

H. M. S. S. in the Leeds Yorkshire Post (Cons.): The idea that every woman, to justify her existence, should have a career over and above her home interests is likely to create a feeling of dissatisfaction and an impression that work in the home is of secondary consideration in the minds of those women whose one thought is how soon they can get through an unpleasant job. But those women, "the majority" who form our great middle class, organizers of happy, smoothly-running homes, have every right to be disappointed with those in the forefront of our women's movements who claim that unless a woman is earning money she is a drag on the community.

A Couple of the Big Boys

BRITISH LION IS SHOWING HIS TEETH

Queensland Reef Is to Be Explored by British Party

Life and Habits of Tiny Ocean Organisms Are to Be Investigated

London.—The secret of the formation of the Great Barrier Reef, 900 miles north of Brisbane, will be sought by an expedition of nine members, acting under the auspices of the British Association, which has just left Tilbury docks on the steamer Omond for Australia. The party is led by Mrs. Yonge, and includes several other women; it expects to spend 14 months on Low Island, not far from Cairns, a seaport on the coast of Queensland, studying the origin and the lives and habits of the tiny ocean organisms which are responsible for building the reef.

"The ultimate object of the trip is of great economic value," said Dr. Yonge before sailing. "It will cost £10,000. All are looking forward to solitude, but there will be much work to do. We have a wireless apparatus and five tons of scientific apparatus as luggage. We will live in wooden huts, but will sometimes visit the mainland.

The Great Barrier Reef extends more than 1,000 miles along the coast of Queensland and is said to be the greatest coral reef in the world. Its water contains many marine forms which have never been classified. The growth of the coral itself has never yet been satisfactorily explained, and it is hoped that the expedition will be able to ascertain how the mollusks maintain themselves and how they are fed.

According to Sir Matthew Nathan, Governor of Queensland, the chairman of the committee of the British Association, "the original purpose of the expedition is to investigate the food of living organisms in the tropical seas and the growth of such organisms, with special reference to corals. A study is also to be made of the growth of other organisms, some of which have high commercial value, such as the fish, beche-de-mer, which is used in China and Japan for making soup, the pearl oyster and the Trochus shell, from which buttons are made and from which a larger industry may now be expected to develop."

"You're generally left out when you've been taken in."

New Use for 'Gamp'

Womn Hikes Through African Jungle With Umbrella as Main Protection

Bombay.—Hiking through jungles of darkest Africa with no more formidable weapons than a sunshade and an umbrella is a form of exercise that appeals to Mrs. Alicia Renthall, an Englishwoman who makes globe-trotting her hobby, and is now touring India. Mrs. Renthall has already been around the world six times.

For 20 years Mrs. Renthall has been walking wherever she can, using steamers and railroads only when necessity demands it. Her first big tramp was in 1909, when she covered 300 miles on foot across central Africa. Four years later, with only seven or eight native bearers, she crossed the African continent from west to east in 11 months, tramping nearly 4,000 miles.

"I have been quite close to lions and leopards in the bush," she said, "but they have never harmed me or any of my carriers. I always go unarmed, and I think wild animals in the forests know by instinct that I have no desire to kill. I wear just an ordinary khaki shirt, puttees, strong shoes and pith helmet.

Mrs. Renthall has just crossed Africa from east to west. She has visited Tibet and the Himalayas, Arabia, Syria, Palestine, Egypt, Madagascar, Sarawak, New Zealand, French Indo-China, San Pedro, Guatemala, British Honduras and the East Indies.

DOUBLE PURPOSE

A tramp was at the door of a newly-married couple.

"What do you want," demanded the young husband. "Dinner or work?" "Both, please, sir," replied the tramp.

The husband disappeared and presently returned with a plate of biscuits. "Eat those," he exclaimed savagely, "and you'll have both."

Thos. Alva Edison Inventing Wizard

An Appreciation Delivered by
Arthur Williams at a Din-
ner in Honor of Mr.
Edison in New York
on May 24th Repro-
duced in Part

LIFE AN INSPIRATION

The ancestors of Thomas Alva Edison, in which honor we have gathered to-night, came here directly from Holland, landing in this country on the shore of New Jersey, near Staten Island, about 1730. There John, the grandfather, son of Thomas, the great-grandfather of the man to whom this evening's tribute is offered, was born. Following the American Revolution John, who took the side of the Loyalists, emigrated to Canada, where, in Digby, a seaport town of Nova Scotia, in the year 1804, a son, Samuel, the father of Thomas Alva Edison, was born. In 1828 Samuel married Miss Nancy Elliott, the eighteen-year old daughter of Rev. John Elliott, a Baptist clergyman. Later he came to the United States and in the year of 1842 made his home in Milan, Ohio, where, on February 11, 1847, Thomas Alva Edison was born and passed the first seven years of his life.

It is recorded that as a young boy he went through many adventures, perhaps his most thrilling experience, resulted from his building a fire in a neighboring barn which was entirely destroyed. For this young Edison was subjected to a severe whipping, not in his father's woodshed, but openly in the public square. In 1854 the family moved to Port Huron, Michigan, where Edison spent three months in school—his only formal school experience of record.

Perhaps one of young Edison's chief assets at the time was his capable and cultured mother who did much for his education and apparently showed just the right degree of interest and sympathy in the meager up which was a necessary result of his chemical and other equipment and the early experiments in which he was constantly engaged.

At one time he engaged in the publication of a small newspaper in which one imagines he was proprietor and manager, reporter, typesetter and pressman and probably postman as well, all in one.

Telegraphy was his next interest. In the year of 1853, at the age of 16, he was considered a full-fledged and expert operator. From here on began the young Edison's marvelous career of invention and development through which modern life in every phase has been so constructively affected.

His first patent was granted on July 1, 1869, for, as strange as it may seem to-day, a vote recording machine. Since that time no fewer than 1,328 separate patents for original and important work have been granted by the Federal Government. Their scope covers, in addition to the vote recorder, stock tickers, typewriters, telephonic and telegraphic instruments, the phonograph, the incandescent lamp, many controlling features of central power plant construction and operation, electric railways, motion pictures, ore milling, cement manufacture and poured cement houses, storage batteries, mimeograph, and the transmission of electric energy without the aid of wires. His application for the latter patent was made two years before the publication of the work of Hertz. It is interesting to note that so great was his appreciation of the work of Marconi that he disposed of his patents to the Marconi Company, though its competitor's offer was on a very much more favorable basis. One invention, the tasmeter, by which infinitesimal degrees of temperature, however remote, are measured, while a most important scientific contribution, was not patented but was freely dedicated to the public. This instrument is used to demonstrate the heat values of remote stars, such as Arcturus.

As important and far-reaching as are the things of which we have been speaking, they became dwarfed by the man himself and his wonderful mind and charming personality. One of Mr. Edison's outstanding characteristics is his modesty; another his insatiable desire to obtain facts to learn; nothing seems too small, as nothing seems too great to excite his deepest interest, especially when an item of added information can be gained or something of human service is promised. When visiting an electrical or mechanical exhibition, he will stop and carefully study every example of automatic machinery which eliminates exhausting human labor and the element of monotony in one's work.

Another outstanding characteristic of Mr. Edison is the directness with which he reaches his conclusions and the simplicity and clearness of the language with which he expresses them. An illustration is found in his remarks when he first saw the remarkable illumination of the Buffalo Exposition some years ago—the most extensive and effective up to that time. Gazing upon it, seemingly very much impressed, he remarked to a friend standing by: "All the incandescent lamp filaments through which this marvelous effect is produced would, no, all a small-sized man's hat."

tion of his resourcefulness is found in the way in which he makes old enemies serve his purposes as new friends. Thus on one occasion, while visiting his laboratory, he pointed out that the thing which had bothered him most in the development of the incandescent lamp—the inside blackening which greatly reduced the candle-power—he was using to advantage in his more recent work—I believe in the manufacture of his new storage battery. And it is interesting to note that his work in magnetic separation of iron ore is now effectively employed in removing impurities from fuel before it reaches the boilers of the great power plants of this city.

It is almost unnecessary to mention that throughout his life he has been oblivious to time, food and personal comfort. During the construction of the Pearl Street plant where for months he worked day and night, on the streets and in the building, a bedroom was provided on one of the upper floors that he might not lose time going home or to a nearby hotel. He would sometimes come into the station so exhausted that instead of climbing the intervening stairs he would throw his coat on a pile of Edison underground tubing lying on the floor and snatch a few minutes or hours of sleep as the case might be.

In material as well as human values Edison's work is almost of incalculable magnitudes, and judged by which he may well be called "the world's greatest benefactor." If measured in terms of money, there exist to-day well established, conservative enterprises which owe their origin or development in some part to his genius, which closely approximate the value of all the gold dug from the earth since America was discovered. Stated in another way, these values represent no less than five times all the money in circulation or five times the entire stock of gold in this country in the year 1927. The annual contribution of these enterprises to the national life represents approximately one and one-half times all the money now in circulation and, through employment, the genius of Edison provides or influences the support of practically one out of every ten of our population. These figures, as extraordinary as they are, do not include many related industries which in themselves again represent enormous aggregates of value, both material and human.

Entering this building to-night, we passed through that extraordinary area of publicity by light, often called the brightest spot on earth—Time Square. Standing there, thinking of Edison and his work, we may well remember the inscription on the tomb of Sir Christopher Wren in St. Paul's, London, "If you would see his monument, look around". And how appropriate is this inscription wherever we find modern life and civilization, in every branch of which is found the genius and spirit of this marvelous man. As long as the world survives, the name of Edison will remain an outstanding symbol of immeasurable genius, accomplishment and public service.

Coast-to-Coast Trip Shows Air Mail On the Job

Correspondent Sees For Him-
self How Planes Cut 3000
Miles to 31 Hours

The air mail has shortened the 3,000 miles between New York City and San Francisco to 31 hours. Mail posted in Wall Street on Monday morning is delivered in Market Street late Tuesday afternoon. To learn how this service operates, The Christian Science Monitor sent a staff correspondent over the line. Here is his account of what the air service is doing and some of the plans for the near future, all of great interest now that Ottawa is considering a trans Canada air way.

By a Staff Correspondent
New York—"Air Mail!"
Men scurried to their posts in the National Air Transport hangar at Hadley Field, N.J., the chief air mail terminal of the East. An airplane appeared overhead, circled the field, and dropped to earth with a perfect three-point landing.

Two men ran out and led it to its mooring. The others removed the mail from its hold and rushed it to a station where clerks sorted it rapidly. Meanwhile a mechanic was warming up the airplane that would soon leave for the West on the first lap of a flight across the continent. I was strapped into a parachute and hoisted into the front cockpit. The motor roared. The anchor blocks were pulled away. We taxied down the field, turned, and took off into the wind.

San Francisco at that moment was 3,000 miles away—the same destination toward which the Pony Express raced less than three-quarters of a century ago. Hard-riding horsemen, dashing over short relays, spanned the 1,400 miles from the end of the railroad at St. Joseph, Mo., to the Golden Gate. Their speed thrilled the nation; they rode it in eight days.

Coast to Coast

And now, from coast to coast, over more than twice this distance, a letter is delivered in 31 hours. To send a letter winging on its way by air has become as simple as buying a loaf of bread at the corner grocery, and mail is now being carried over the country on more than a score of air routes.

I turned amid the mail sacks and express packages carefully stowed before me in the cockpit and looked at my pilot, Earl Ward, a confident-looking young man intent on his job.

The fields of New Jersey, occasional towns, the rusty hills of Pennsylvania, were flitting by in a moving panorama. We in the plane, were a tiny world apart.

Only two phenomena were particularly noticeable. One was the bumping caused by air pockets; the other, the desert-clear quality of the air.

At 4.30 in the afternoon the tower of the Cleveland Union Station pierced the horizon and soon our plane settled on the Cleveland field. We had been in the air three hours and a half.

"I'm sorry," the airport official said, "but we can't send you on to-night. You see, we take the mail into weather where we wouldn't think of sending a passenger."

Air Mail Looks Ahead

In spite of the blue sky at Cleveland, there was rain in the West. The air mail sees all. With its elaborate system of radio and wire communication, it can tell exactly the temperature, barometric pressure, cloud height, or "ceiling," wind velocity and visibility at any spot along the route.

The official said that in Chicago the planes for the West would be delayed and by taking a train I might catch the one reserved for me. On the way to the station the chauffeur told me about Pilot Ward.

"One of the crack fliers in the service," he said. "Used to be a lieutenant in the marines. Holds the record between New York and Cleveland of two hours and 26 minutes."

In Chicago I found that the west-bound plane had left only 30 minutes

Would Be Fine Around A Melon Patch

Part of a barbed wire fence erected at the entrance to a South African diamond mine which has been temporarily closed to prevent the market from becoming flooded with the precious stones, thereby lowering their value.

behind schedule. The management changed my reservation to the following day.

The next night I met Pilot Wagner, a one-time army flier and veteran of seven years in the air mail service, and "one of the best."

We talked of expansion and improvements in the service. National Air Transport operating regular passenger service from Chicago to Dallas, will soon extend that service over the Chicago-New York branch of the route.

Boeing Air Transport, giving mail, express and passenger service from Chicago to San Francisco, is to install three giant passenger planes, three-motored and with accommodations for 12 persons, for week-end excursions.

Testing Radio Beacons

The Department of Commerce is experimenting with radio beacons, to be placed on either side of the charted course.

As soon as these beacons are operating, schedules will be changed so that the flying time from coast to coast will be two nights and one day, instead of two days and one night, as at present.

Seven-thirty, our scheduled leaving time, arrived, but not the mail from Minneapolis. We waited. Overhead a 500,000 candle-power revolving beacon shot its beam for miles. Finally came the cry: "Air mail!" Quickly the sacks were stowed and we were off.

I found the passenger cabin like the interior of a very small coupe. Finished in light green enamel, it had a narrow, leather upholstered seat designed for two lean passengers. Windows, 12 by 27 inches, built into each door, were adequate for sight-seeing.

A small dome light hung above and a heater from the exhaust below kept the little stateroom warm enough.

A license, granted by the Aeronautics Bureau of the Department of Commerce, said that the airplane was made by the Boeing Company of Seattle, had a wing span of 44 feet 22½ inches; length over all, 33 feet, 3-16 inches; carried a useful load of 2,470 pounds; had a weight, empty, of 3,230 pounds and a gross weight of 5,700. Its engine was a Wasp, made by the Pratt-Whitney Company. The 26 planes operated by the line are almost identical in design and equipment.

Emergency Landing

The ship flew so smoothly and the motor droned so soothingly that I fell asleep. When I awoke we were circling down to the revolving beacon on the emergency field at Rock Falls, Ill. Fog ahead forced us to make ourselves at home in a cold little shack until morning.

At 6 o'clock we went on to the eastern bank of the Mississippi, where, because of poor visibility, we landed

on another emergency field surrounded by acres of cornstalks. The caretaker drove us to his farm home near by for a substantial morning meal.

Then we were off again for Iowa City and Omaha, where mail and baggage were transferred to another plane and I met my new pilot, E. M. Allison, introduced as one of Boeing's "star" men.

We set out within 15 minutes and bucked a heavy wind to reach North Platte at 3.40 o'clock that afternoon. The farms were laid out in neat 160-acre squares, with fences running directly east and west, north and south, which is of great assistance to the pilots. Two hours later the brightly painted roofs of Cheyenne welcomed us.

There I met Pilot H. A. Collinson, described as "an old-timer in the air mail in these parts and never had a serious mishap." We took off again immediately, making for a break in the fog that covered Sherman Hill. It closed before we could get through and Mr. Collinson wheeled back to town.

Through to Rock Springs

Late at night we got through to Rock Springs, Wyo., the halfway point between Cheyenne and Salt Lake. Red lights outlined the field against a jet background.

We ate at Rock Springs and waited until "unlimited visibility" was reported. In spite of that forecast, we met a rim of fog over the Wasatch Mountains and climbed to 13,500 feet to top it.

At that height we could see over the roof of the "stuck," as pilots call all water vapor collectively. The full moon, lighting the trampling mist, transformed them into glowing, white baby blankets. Mail pilots see more of the beauty of nature every day than the average city dweller in half a hundred two-week vacations.

Crossing the clouds we circled sharply down to the field at Salt Lake City, a drop of 3,400 feet. As soon as the mail was re-sorted, we were on our way again with a new plane and another pilot. We scraped the tops of the Ruby Mountains so closely that pebbles and leaves were easily distinguishable, and then found ourselves in Elko, Nev.

Another pilot, Huking, took the ship. He informed me that the last pilot, Ellis, could "fly anything, anywhere."

Over Mountain Ranges

We flew over mountain ranges and tan-colored valleys, where countless sheep nibbled and on above alkali plains to Reno, with its brave greenery, the air mail gateway to the Sierra Nevada. There I learned that Huking, in spite of his seeming youth, had been in the aviation "game" for 12 years and knew all about aircraft.

The next pilot was C. K. Vance. His lap in the relay led across one of

Continuity

Can you recall that self of long ago? They ask, the sightless ones. They do not know. That this brocaded matron that is I, Upon whose wit and judgment they rely, Is the lank child at whom they used to mock, With pinafore exchanged for Paris frock. How solemnly I wear my staid disguise, That they should think me suddenly grown wise! Oh you who with your stature change your heart, When the grey hair in which I play my part Is laid aside, the wrinkled skin put by, Running along the fields of morning, I Shall seek—and find—some other child to tell How well I've fooled you all, my friends, how well.
—Freda C. Bond.

the most difficult and dangerous stretches of the entire route. "So, you see," one of the mechanics at Redo explained, "they were bound to pick an expert to fly from here to the coast."

Mr. Vance took us over a territory in the Sierra Nevada Mountains of California in which there was no landing for 75 miles—only pine-covered mountains and green ravines. Valleys, canyons and streams, which never would be seen by tourists, were it not for the air line, flitted by the little cabin windows, all too transient in their loveliness.

The plane came down for exactly two minutes in Sacramento to drop a packet, and then winged its way straight to the Oakland Municipal Airport—and journey's end.

We were 17 hours behind schedule, but still two full days ahead of the mail trains.

Discounting my 24-hour stopover in Chicago, I had been en route just 48 hours from coast to coast. We had been delayed by unfavorable weather, but never once by motor or other mechanical trouble. Every link in the air mail chain did its work perfectly.

"Tom is an awful dumb-bell, isn't he?"
"I'll say so! Why, even if he had any brains, he wouldn't know how to use 'em."

Best To Take Your Freckles As You Find Them

If you are troubled with lentigo the only thing to do is to make the best of it, advises Earl C. Gregory in the current issue of "Physical Culture Magazine." Lentigo, by the way is no dread disease but merely the common, though often hated freckles.

Mr. Gregory says, "If you freckle, you freckle, and that's that. The susceptibility is inborn. That is, whoever once develops freckles will have them appear again under similar conditions of exposure to summer sun light."

The writer in "Physical Culture" further points out that one has no more reason to be mortified by freckles than by a head of hair naturally wavy. "Freckles," he continues, "indicate a body high in vitality and there is something about the color and texture of a woman's skin that allows the freckles to harmonize so with the skin that the spots seem to belong; they simply fit."

While freckles can be removed, according to Mr. Gregory, by such preparations as three parts of glycerine to one part tincture of iodine, the effort is not worth the irritation it causes. "And," he concludes, "in order to keep them from reappearing a woman would have to deprive herself of the sun rays, which are necessary to make her a vitally strong woman. Hence she must choose between the ill health of a shut-in without freckles, and the better health of an outdoor woman while taking her chances with the freckles. And what sensible woman would give up her chance of health through outdoor living, to gain a concession to vanity?"

A Chance for Canada

London Daily Express (Int. Con.): It has been stated before the Canadian Immigration Inquiry this week that there are 80,000 women and children living in Great Britain to-day whose men-folk have crossed the ocean to Canada. The British Government is willing to pay 50 per cent. of the cost of a great many return schemes. We have often criticized the supineness of Whitehall in promoting emigration, but in this instance it is doing all that can be expected of it. What will be Ottawa's answer? The Canadian Government have been a chance to encourage British immigration in the way that will most aid to Canada's immediate and permanent well-being.

Tells of the Aims Of Conservative Party in Canada

Hon. R. B. Bennett Is Guest of Honor At Monster Banquet in Montreal Last Thursday.

"What are the aims and purposes of the Conservative party? The aims and purposes of the party to which I belong are to safeguard Canada's institutions, safeguard and develop Canada's natural resources and bring to our people health happiness and prosperity."

In these words, Hon. R. B. Bennett, Conservative Chief Minister, at a monster banquet tendered in his honor in the Mount Royal Hotel, Montreal, on Thursday last and at which about 50 of the most prominent supporters were present addressed the Conservatives of the Province of Quebec. From as far east as Gaspe to the Atlantic Coast, to as far west as the Ontario-Quebec boundary, from as far south as the strip of the Province south of the St. Lawrence to the most northern districts, Quebec Conservatives were present. The assemblage was representative, federally and provincially. The hall-room in which Mr. Bennett spoke was crowded and it was necessary for him to divide his speech and address an overflow gathering in the piazza. Broadcasting arrangements carried the Conservative leader's address over a radius of 900 miles.

Aims and Purposes

The aims and purposes of the Conservative party, Mr. Bennett declared, could best be accomplished by the maintenance of Canada's integrity as part of the Empire and the safeguarding of the constitution and the rights of the minority.

"What of the future; what of the tomorrow?" the Conservative leader asked. "What are we doing to safeguard our natural resources not only for today but for tomorrow?" Mr. Bennett referred to the increasing importations of butter under the Australian treaty. "The dairy industry cannot be built in a day or a year," he declared. "It is being destroyed. There has been no safeguarding the agricultural life of this country."

Steady Increase

There had been, Mr. Bennett proceeded, a steady increase of importations of fruits and vegetables. "What of the time," he questioned, when the Canadian fruit industry having been destroyed, a monopoly is able to demand whatever prices it may desire." He went on: "Shall we safeguard the natural resources of Canada, the water powers of Canada or shall we see them exhausted by people to the south who require them and deny us the right to sell within their country the goods we produce?"

Importations of boots and shoes from the United States were increasing and in September last \$419,000 worth were imported from the United States. Mr. Bennett put the question: "Shall we safeguard our industrial life or not? Which is better? That Canadians from the province of Quebec should be living in the United States making boots and shoes for the people north of the 49th parallel or that French-Canadians should make boots and shoes in this country necessary for our people?" The purpose of the Conservative party was to safeguard industries, he continued, so that Canadians would have opportunity for employment in this country.

Touching upon immigration, Mr. Bennett stated that the problem was not the "getting of people into this country" but keeping the people we have here.

Ramsay MacDonald, British Labor Leader, Mr. Bennett proceeded, had declared that conditions in the Dominion were due to the magnetic appeal of the larger body, the United States, for a smaller body. Mr. MacDonald has expressed the hope, the Conservative Leader said, that Canadians could accumulate sufficient magnetism to offset the situation. "Canadians," Mr. Bennett declared, must accumulate the magnetism sufficient to hold their own people. The aim of the Conservative party is to create that magnetism. Fair opportunity to compete with other countries must be offered Canadian citizens.

Foreign Speculators

The Conservative leader made reference to the array of Quebec party stalwarts in attendance. "This is not a mere demonstration of men and women supporting the Conservative cause," he remarked, "but a gathering of people who have not always

seen eye to eye with the Conservative party and who feel that the time has come when we must consolidate our forces."

Hon. Andre Fauteux, former Solicitor General in the Meighen administration, warned against the "great seductive danger of American influence." This danger, he said, was today "disguised as economic co-operation."

Hon. Arthur Sauve, Quebec Conservative leader, said Mr. Bennett had given ample proof of his excellent public spirit and high conception of conception of conditions essential to the harmony and progress of Canada. The new Conservative leader "wished to avoid quarrels on race and religious question."

Mr. Bennett spoke of the aims and purposes of the Conservative party to maintain peace, preserve our resources and have a contented people. The accomplishment of these aims could best be brought about, he declared, by the maintenance of integrity as part of the Empire and the rights of the minority. "When the aims and purposes of the Conservative party," he declared, "cease to be these the mantle of leadership will be handed over to those who entrusted it to me."

The safeguarding of institutions, preservation of natural resources and the health, happiness and prosperity of the people were essential, he went on. These were the days, though when \$1,280,000,000 worth of goods composed largely of farm, mineral and forest products were being exported largely. Of this total, \$440,000,000 was obtained from the soil; about \$280,000,000 from mines and minerals and between \$200,000,000 and \$300,000,000 from the forests.

"These three are the great producers of natural wealth," Mr. Bennett remarked. "What was being done to safeguard these natural resources, he questioned. There had been a steady increase of exports in butter, vegetables and fruit and a steady increase of imports."

The consequence was destructive to our own industries. Our exports in automobiles had decreased, while our imports had been steadily increasing, he stated. Our workmen were being deprived of fair opportunity for work here. "So long as we continue in this manner," Mr. Bennett stated, "so long as we increase our imports and decrease our exports the opportunity will be denied to Canadian people to find self-expression."

"Why is it," he asked, "that the supporters of the Republican presidential candidate are stating that if they come into power they will increase the toll on Canadian goods?" The reason was a desire to protect Americans. That same spirit of safeguarding our national life should be for the good of our people predominate in Canada, Mr. Bennett stated.

CUSHING.

Miss S. Wilson, of St. Andrews East, was the week-end guest of Miss D. Leroy.

Miss Hylda Shaw, of St. Andrews East, was the guest of Miss Margaret Canning, on Friday.

Miss Alberta Cleland, of Montreal, arrived on Thursday of last week to spend a few days at their cottage.

Miss Ruth Garrett, of Hawkesbury, Ont., was the guest of Miss Muriel Jobb on Friday.

Mrs. L. Shaw, of Montreal, was a guest of Miss B. Nicholls on Friday, returning on Saturday with Mr. Maw and family.

The W. M. S. meets at the home of Mrs. T. Weir Jr. on Tuesday, Nov. 6th, at the usual hour.

Mrs. P. Gaston, Mrs. J. Chambers and family also Mr. Roy Gaston were guests of Mr. and Mrs. Earl Bryerton on Sunday.

Mrs. S. Beecher, of Montreal, was the guest of Miss B. Nicholls. Mr.

Hawkesbury, Ont.

Beecher and sons and Mr. Percy Brown motored up and spent Sunday.

Mr. and Mrs. Albert Lighthall, of Parry Sound, who have been the guests of Mr. W. and Mrs. J. Chambers Sr. for the past month, returned home on Tuesday.

On Sunday, Oct. 11th, Special Armistice Service will be held in St. Mungo's Church at the morning service. An invitation is given to all, who wish to commemorate Armistice Day.

Week-end guests at the home of Mr. and Mrs. A. Graham were Miss A. Hawke, of St. Anne's, Miss E. Frost, of Lachine, Miss E. Jones, of N. D. G., also the Misses Ivy and Elsie Graham, of Montreal North and Verdun.

Miss Evelyn Mitchell, Field Secretary, of the Women's Missionary Society, Montreal Presbytery, will give an address in St. Mungo's Church, on the night of Nov. 12th. (Thanks giving night) at half past seven. A large attendance is requested and a hearty invitation given to everyone.

A very successful event was the "Chicken Pie Supper" held in St. Mungo's Church, on the evening of Friday, Oct. 26th, the church being filled with old and new friends and a very enjoyable supper served.

A very good program composed of a beautifully played Piano Solo by Miss Ruth Garrett, of Hawkesbury, (a pupil of Miss Muriel Jobb); a quartette composed by Mrs. Bezanon, Mrs. Cooper, Mr. D. Todd, of St. Andrews and Mr. C. Duncan, of Lachute delighted the audience. Duets and solos were also rendered by the latter two persons.

Mrs. Macaskill of St. Andrews, was particularly appreciated in her rendering of two sketches, one decidedly humorous; the other a grave little temperance lesson.

Miss Leroy, of Cushing, and Miss Wilson, of St. Andrews, were also appreciated in their portraying of the young lady in search of her sweetheart's visit to the Clairvoyant, and who mistakes her for the young lady who has made an appointment with her to help find her poodle, with the result that the young lady hears very strange things about her sweetheart; but like all stories, everything came out right in the end.

Rev. Mr. Macaskill was called upon to render a speech, and pleased one and all with his pleasant and witty remarks, and last but by no means least our old favorite reciter, Miss Whelan favored us with an Irish selection, which ought to go a long way in helping our young folks to decide whether it is best to marry for love or money.

Two papers in one—The Family Herald and Weekly Star, Montreal—one for the farm, the other for the home, both of superior excellence. One dollar a year covers them subscription, or three years for \$2.

Lord Nelson at Halifax Opened

Above, the Lord Nelson viewed as from the Botanical Gardens. Inset is a very charming corner of the lounge, showing the bust of Lord Nelson in the corner. Mr. E. W. Beatty was the guest of honor on the formal opening.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, in speaking as guest of honor at the banquet which marked the official opening of the Lord Nelson Hotel at Halifax, referred to the tourist attractions of Nova Scotia as being second to none on the continent. This from a well travelled man as the head of the World's Greatest Travel System was a decided appreciation. "In addition to the opportunities for sport which are unsurpassed and attract tourists from both the United States and Canada, you have the historic associations such as typified by the Evangeline legend which the Canadian Pacific and Dominion Atlantic Companies have successfully preserved and featured. It seems to us only right that the railway which came into existence as a fulfilment of one of the terms of Confederation should encourage such travel to your cities and other historic places," he said. "That travel has grown apace during the last few years and it was because of this fact among others that at the solicitation of your business men we joined with them in the building of this hotel. It is for the same reason that we are building a modern hotel with other tourist facilities at Digby."

The Lord Nelson Hotel, while operated under the direction of the Canadian Pacific Railway is the result of a sincere effort on the part of the people of Halifax who have long been working for a modern hotel which would adequately take care of the business which offered in the city. It is situated in the heart of the city and fronting on the Botanical Gardens that have helped to make this old city famous.

Within and without, the appearance of the hotel reflects great credit on its architects and builders. In building and in decoration it is Georgian in character, and throughout the hotel and particularly in the public rooms, a most successful effort has been made to express the period recalled by the historic name associated with it. Immediately inside the front doors is a handsome and spacious lobby, which at once gives the keynote of Georgian decoration. The hotel offices are here as also are

other public services such as elevator lobby, telephone room, cigar shop, etc.

The mezzanine floor and ladies waiting room leads up from this, and on one side of the lobby is a short flight of steps leading up to the assembly lounge. In this room and in the adjacent assembly hall the attempt to recapture the atmosphere of two hundred years ago has been particularly successful. The chief feature is the fine fireplace over which is an excellent copy in oils of the full length portrait of Lord Nelson which was painted shortly before his death. In one corner stands a fine copy of the well known bust of this hero, and on the center table is a splendid model of his ship "The Victory."

The end of this room opens into the assembly hall which is large enough to seat about 250 people comfortably. At one end is an ample stage with the usual dressing rooms and disappearing footlights.

Leading from the other side of the lobby up a short flight of marble steps is a foyer, and beyond that the main dining room. On the floor beneath the lobby are a series of fine shops opening on the street, and here also is the spacious grill, which in keeping with the nautical flavour notable elsewhere in the building, is termed "The Ward Room."

Its woodwork is of oak and its ceiling crossed by heavy beams. It is lit by ships lanterns of brass and by candelabra designed from binnacle lights and ships steering wheels. The furniture also is of stout oak. Other features of this floor are a barber shop, beauty shop and the usual public services.

The bedroom floors include a number of fine suites of which the Royal Suite is an outstanding example. Like the other its character of decoration is in keeping with the rest of the hotel. It consists of sitting room, dining room and two bedrooms, and its furnishings include some fine examples of early Georgian. The bathrooms and general plumbing and heating arrangements throughout are up to the most modern standard as also are all the facilities for public service.

ST. ANDREWS EAST.
Mr. Harold Willett is at his home for a few days.
Mr. and Mrs. E. Charman are in Montreal for a few weeks' holiday.
Mr. and Mrs. Buttress, Née Little Woods, of Montreal, have a baby boy.
Miss Fair entertained about thirty of her friends at Abernethy, on Hal-lowe'en Oct. 31st.

A number of people from St. Andrews attended the Chicken Pie Social at St. Mungo's, Cushing, last Friday, and said they had a good time.

Mrs. Cooper and daughter Lillian went to Toronto on Saturday to join Mr. Cooper who has a position there.

Miss B. Robertson, Miss Elizabeth Walsh and Miss Gertrude McOuat returned to their homes for the week-end.

Mrs. T. MacAdam, Mrs. Charlie Hyde, Miss Gladys Hyde and Mr. S. MacAdam were in Vankleek Hill, on Saturday.

The girls of the C. G. I. T. were given a demonstration of Home Nursing by Miss Evelyn Wales, R.N., last Friday at their regular meeting.

Rev. and Mrs. J. Macaskill, Miss Helen Perks, Miss Jean Brown and Mr. Clarence Brown attended the Convention of the Quebec League last Monday.

The Young People's Society of the St. Andrews United Church entertained the members of the congregation and their friends on Tuesday, Oct. 30.

BROWNSBURG

Mr. and Mrs. J. McVicar and Miss McVicar, of Montreal, were guests of Mrs. John McCluskey last week.

Mr. and Mrs. Geo. Gardiner and Mr. Charlie Gardiner, of Montreal, West, were guests at the home of Mr. and Mrs. H. Gardiner on Tuesday of this week.

A Meeting of the Chatham Council was held here on Monday of this week.

LAKEFIELD.

Rev. A. E. Mount and family have left to spend the winter months in Montreal.

Mr. and Mrs. R. C. Andrews also Mr. D. Sanderson, of Montreal, spent the week-end guests of Mrs. Robt. Evans.

Mrs. Robert Evans is on a short visit to her daughter, Mrs. R. C. Andrews of Montreal.

AUCTION SALE

There will be sold by Public Auction at the residence of

RICHARD COUSINS,

Seventh Range of Grenville,

THURSDAY, NOV. 15th., 1923

The Following Effects:— Twelve milch cows, 2 calves, 1 team of horses 9 sheep, 2 pigs, 23 turkeys, 50 fowls 2 lumber waggon, 1 express waggon buggy, cutter, rack sleigh, set wood sleighs, mowing machine, horse rake, plow, set of steel harrows set of double harness, 2 sets of light harness, a large quantity of hay and straw, a quantity of oats, also a quantity of potatoes and turnips, about 20 cords of dry hard wood for stove, 2 factory cans, 5 coolie cans and pails, bed couch, lounge, kitchen table dining room table, and many other articles too numerous to mention. Sale to commence at 10 a.m. sharp.

TERMS: \$10.00 and under cash, over that amount 9 months credit on furnishing approved joint notes, 4 per cent off for cash.

RICHARD COUSINS, Proprietor.

Owing to many requests, the players in "The Mummy and the Mump" gave a repeat performance in the Auditorium on Tuesday evening. There was a goodly attendance and the play was thoroughly enjoyed, the artists themselves rendering their parts as real old timers. It is hoped that more of this good work will be continued during the winter.

Attractive Window Display.

Those who have not seen the Window Display of John McFaul & Son will do well to take a walk up town and have a look. Mr. E. McFaul who is agent for the famous Rodgers and Atwater Kent Radios has them well displayed in a miniature living room and will be pleased to give any information required as to their qualities. Step in side and ask him about them.

Giant Among Grain Elevators to Stand at Lakes Head

The world's largest elevator, according to its builders, is now being erected at Port Arthur, Lake Superior. The directors of the Saskatchewan co-operative wheat pool recently awarded a contract for the superstructure of Terminal 7, which will have a total capacity of 6,900,000 bushels, and should be ready for operation on Oct. 15. Reinforced concrete is the material used in construction.

The completion of the terminal will give the Saskatchewan co-operative wheat pool a total storage space of 22,975,000 bushels at the head of the lakes, which, together with a 2,000,000-bushel terminal elevator at Buffalo and the space provided by the pool's country elevator system in Saskatchewan, will give a total grain storage capacity of more than 50,000,000 bushels for the 1928-9 crop year.

The new elevator is on the Lake Superior front, near the boundary between the cities of Port Arthur and Fort William. It will be served by both the Canadian National and the Canadian Pacific railways, and will be able to receive as many as 500 cars

of grain a day during the rush season. Its normal working capacity will be 300 cars every ten-hour day—a car every two minutes—and it will be able to ship out and load grain into ships at the rate of 150,000 bushels an hour.

The workhouse itself will have a storage capacity of 900,000 bushels of grain, and there will be two annexes with a capacity of 3,000,000 bushels each. In one of these annexes equipment will be installed for unloading grain from vessels moored to the elevator dock, while the workhouse will be equipped with nine shipping spouts.

The rapid handling of grain will be facilitated by the use of eleven 150,000-pound scales, twenty receiving cleaners in addition to thirty-two other cleaners of various kinds, and twenty-three belt conveyers, with a total length of more than 34,000 feet. The cleaners will handle 60,000 bushels an hour, and the drier which will be installed will dry 1,000 bushels of grain an hour when necessary.

The total length of Terminal 7 will be 1,344 feet and the width 226 feet. The elevator trackage will provide space for 225 loaded cars to be "spotted" at one time, ready for dumping.

Ex-Premier Scores Reds

Ramsey MacDonald Resents Moscow Order to Oppose Laborites at the Polls

The issue of instructions from Moscow that the British Communists must put candidates into the field against those run by the Labor Party ought to put an end to the political fable that, when all is said and done, we are but a kind of Communist and that, had we the chance, we should do here what the Communists have done in Russia. The fact is that the Moscow International, which has issued these orders to its British dependents, has known perfectly well that the political power which was keeping the evolution of British politics upon democratic and constitutional lines was not Toryism but Labor.

Communism is the native growth of reactionary soil; it is the scraggy and spiky bush that grows up under the political conditions of dictatorship of an elaborate police and spy system, of exile and political persecution and persecution. Communism in Russia is a cardom with the victims on the seats of authority, using both Cheka and Siberia for their own purposes. As the responsible Government settles down to handle the practical problems of administration it departs from this, but the irresponsible revolutionary high priests of Communist doctrines who control the Third International have abandoned no delusions which possessed them when they overthrew the Russian Government ten years ago.

This origin of Russian Communism goes down to the roots. Democracy and it cannot go together. When its ballot boxes and press and courts of justice are open, it may continue its name, but its spirit and its methods will have changed.

Unbridgeable Difference
Another unbridgeable difference between Communism and the Labor Party is the belief of the former that a radical reorganization of society must be preceded by a revolution of force in order to seize political power. Upon that the Labor Party makes two decisive observations.

First of all, what cannot be done by the ballot box cannot be done by a revolution, and, secondly, what is sought to be done by a revolution cannot be done, even if the revolution succeeds. The social and economic problems which the revolutionist has to face so soon as the revolution has given him power are just those that the successful democratic politician has to face, and they call from the revolutionist the same diplomatic and creative skill as they call from the politician. The Russians found that to be true when they decreed the nationalization of land. The peasants would not have it, and no revolution could impose it upon them. Also, later on, they had to adopt a new economic policy because no revolution could readjust the economic laws of exchange and markets. Communism here teaches the absurdity that whoever has power can use it just as he likes.

Communism as a way of effecting social change is a vain show. It brings suffering which it cannot compensate the paralysis which it effects while engaged in its revolution is not followed by a new life it has to retreat upon the old economic order so that it may begin its creative reconstruction.

It is also curious how the Russian parentage of communism is stamped upon the features of every Communist party in the world. Its method is the revolutionary method under the Tsar. Policies have to be plotted in the dark and worked out on secret known as "nuclei." These must be instructions given to small groups obedient to orders. The Moscow Committee is like the "Secret No. 1" of all conspiracies whose word must be obeyed.

Communist Allegiance
Communism is essentially a conspiracy. The allegiance of the Communist is not to the colleagues with whom he is working, nor to his own judgment. It is to his headquarters. No one, therefore, can work with him comfortably because no one knows what he is. In his pocket are his secret instructions. He is a tool, and tools are impossible colleagues. He is an alien using his enfranchisement in obedience to his foreign control, and an alien puppet can only be cast out.

The old Russian revolutionists of the Krouotkin and Stepanik type were men who took their lives in their hands, and who accepted the conditions of conspiracy under the shadow of the executioner. Their surrender of liberty was of the heroic kind and the moral reaction was sublime.

That is not the case when the secret plot is against men who live in the open and with whom one is supposed to co-operate. Conspiracy under the conditions of freedom of discussion reacts towards a mean and debased lack of scruple and honor. It selects its tools from the most worthless. The generalities of common action are stifled; the conspirators cease to care who their masters are, provided they find employment, and they use any weapon by which they can do their work.

In stressful times like these they use misery to make more misery and lead their followers to knock their heads against stone walls. They cover their failures by hy words and keep the pursuit after something not yet found by raising will-o'-the-wisp after will-o'-the-wisp. Where they have been trusted with administration they have invariably let their organization down or have fallen back in their impotence upon moderate policies which they gained influence by attacking. Thus, both in our trade union and political movements communism is an influence of personal deterioration and organization disruption.

The opposition which I am explaining is seen in the position of both the political and industrial wings of the labor movement to-day. The order issued from Moscow that the advance of the Labor Party is to be checked by the running of Communist candidates to defeat certain types of labor leaders has its counterpart in the industrial policy of communism.

The purpose is to bring industry to

What Scout Wouldn't Like To Be

SULTAN OF SWAT BECOMES A MEMBER OF THE BOY SCOUTS

The commander of the Boy Scouts swore in Babe Ruth as a member of the organization at a father and son banquet of Troop No. 1, Flushing. The slugger is seen autographing balls for the boys.

a standstill, to paralyze it by industrial civil war on the assumption that after the wreck there will arise a new order. The General Council of the Trade Union Congress takes the labor view. Progress comes from peace. Peace, however, does not mean slavery and surrender it means negotiation upon conditions and a settlement that permits of acquiescence and of improvement.

The two policies are irreconcilable. No compromise is possible between them. They belong to two totally different political inheritances. One inheritance is the democratic one; theirs, the autocratic one. Our method is that of a changing public opinion under the influence of reason, conscience and imagination; theirs is that of the individual will hardened and sharpened by dogma, breaking its way through barriers and establishing itself by the exercise of dictatorial power.

Thus, the conflict does not arise from diversity of remote aim or goal, but from the day-to-day attitude we take to our tasks. It is raised by every move we make either in Parliament or on an industrial council. That is why there is no possibility of accommodation between the British labor movement and communism—Moscow knows it.

Australia Obtains Full Rights for British Pictures

Melbourne Firm Secures Contract to Extend Over Five Years

Melbourne, Vic.—To secure rights for British films in Australia, Charles R. Herschell, managing director of British Dominion Films Pty. Ltd., left Melbourne with a contract for five years by which his company will receive the whole of the productions of the Gaumont Company, British Instructional Films, Ltd., and the New Era Film Production Company. The last mentioned includes seven subsidiary companies. This will be good news to Australian picture fans, who have had a satiety of the American production.

Mr. Herschell says that the film industry in Great Britain is prospering, the chief reason being that the quota system has been introduced. The companies with which he made his contract represent a paid-up capital of £10,000,000.

Forty-three British pictures for exhibition in Australia were brought by Mr. Herschell, and he proposes to establish the exchange system here. Exchange centres are to be established immediately in Melbourne, Sydney, and Wellington, N.Z., and branches are to be formed in the smaller Australian centres of Adelaide, Perth, Brisbane and Hobart.

Baldwin Talks on Amateur Writers

Amusing Remarks at Luncheon of Institute of Journalists

London.—The Prime Minister, Mr. Baldwin, in an amusing speech at a luncheon, given by the Institute of Journalists to Viscount Burnham, a former president, at the Savoy Hotel, Strand, said:

"I am a sexagenarian. My colleagues are popular and in request. I have never yet had a single offer of any kind to make my contribution on any subject to the press."

"I am not of a jealous nature. Sometimes—and I am not referring to Lord Birkenhead—when I read what has been said and rewarded by what seems to be a remuneration of full value, I cannot help feeling that if I tried, and my friends were patient with me, I might produce what might be worth, if not a penny a line at least a penny a mile."

"I could write quite an interesting history of the fall of the Coalition and, as other people have given their views about me, I might have some views about others."

"I cannot tell whether they have any money value. I am but a simple amateur; but I beg you to think over this because, after all, when I retire and take to some other form of work, I should like to feel that at any rate there is one kind-hearted ass, who, out of pity or whatever motive there might have been, did once make me one offer to see my name with my own stuff over it, and I lay stress on that." (Laughter.)

Lord Birkenhead, speaking later, said: "Those who have undergone a long apprenticeship to journalism as Lord Burnham and I have done—(laughter)—do not invite, and propose by every legitimate means in our power to resist the inclusion of sexagenarian amateurs."

Mr. Baldwin, in Parliament last week, when questioned about the journalistic activities of Lord Birkenhead and Mr. Churchill, said that Lord Birkenhead had been guilty of an "error of judgment" in writing while a Minister a recent article on "Women in Politics" for "Good Housekeeping."

Prophecy for Lovers

Spring will not walk the windy ways
Ever again, nor tread the sword
As once, when she had Youth for lord.

Spring will not gather sixty days
Into the semblance of an hour,
As once, with all the world in flower.

Autumn will spread a bed of leaves,
Myrtle and bay shall close above:
And you shall sleep, and dream of love.—Gwen Clear.

Final figures give the total salmon pack in British Columbia for 1927 as 1,360,364 cases.

Blessed is the man who, having nothing to say, abstains from giving us wordy evidence of the fact."

English Influence Called the Basis of Indian Advance

Professor Says Renaissance Has Become Great Moral Force in India

Bombay.—The first gift of the English of India was universal peace or freedom from foreign invasion and internal disorder, observed Prof. Jodu scholar, who is the Vice-Chancellor of Calcutta University, in a lecture he gave recently.

The speaker added: "The English have admitted us to the entire outside world; not only in Asia, but in all other continents as well; and they have admitted the rest of the world to us in a degree not dreamt of under Moslem rule. India has now been switched on to the main currents of the great moving world outside and made to vibrate with every economic or cultural change there. An isolated life is no longer possible even for our remotest villages."

"It is, therefore," continued Prof. Sarkar, "of peculiar advantage to us that in this age of world-forces our official language is English and that it has diffused itself all over India as the medium of trading and political and cultural correspondence. No other European language has the world-wide currency of English, or is used by such a large proportion of the human race. And English literature is the richest in the world on account of its own original works as well as the translations from all other languages in almost every branch of thought."

The greatest gift of the English besides universal peace and the modernization of society—and indeed the direct result of these two forces—is the renaissance which marked our nineteenth century. Modern India owes everything to it, literature, education, thought, and art; but in the last generation it became a moral force and reformed our society and religion; still later, in the third generation from its commencement, it has led to the beginning of the economic modernization of India," concluded the Vice-Chancellor.

Britain Signs Treaty of Amity With Persia

Series of Conventions Grants Tariff Autonomy as Preliminary to Airways Negotiations

London.—An important series of conventions was signed a few days ago by the British Minister at Teheran and the Persian Acting Minister for Foreign Affairs. They constitute an arrangement regulating the chief questions between Great Britain and Persia which had been increasing in number and growing somewhat more acute. They go far toward establishing Anglo-Persian relations on a more stable, more friendly basis.

The new treaty recognizes Persia's tariff autonomy and makes provision for transitional arrangements pending the conclusion of a treaty of commerce and navigation. The Persian note provides for the regulation of the legal position of British subjects. It is agreed that British subjects shall be amenable to the Persian police courts, but fines only can be imposed.

Further notes have been exchanged with reference to the British demand that facilities be accorded for the flight of Imperial Airways airplanes over Persian territory, this being an essential link in the altered air route. The Persian Government assents to its intention of creating aerodromes and agrees that there is no reason to refuse permission to Imperial Airways, on certain conditions, to use them. It is prepared to negotiate with them experimentally.

The operation of the proposed air line from Cairo to India had long been delayed owing to the failure of ratification of the original agreement concluded by the British Government on behalf of the Imperial Airways in 1925. These difficulties now promise to be removed.

The Shah announced in April last year his intention to secure the consent of foreign Governments to the abolition of capitulations. The consent has been given and the measure now promises to be removed.

The closer we get to them the less steep seem life's hills.

S'MATTER POP—By Payne

Life in Arctic Regions Full of Incidents and Adventure

Canadian Geologist's Diary Tells of the Joys of the Messages Received From "Home" by Radio—Christmas Day Celebrated

Ottawa—Not so much to the adventure and the explorer, fascinating as their trips may be, as to the government servant must go the credit for the opening up and development of Canada's great white wastes north of latitude 60. Whereas the polar dashes by dog-team or airplane are necessarily brief and sporadic, the departmental "work" goes on continuously, year in and year out, a little here and a little there, co-ordinating and consolidating every step and piecing new patches on the vast quilt of the Dominion.

During the last five years a government steamship has been making an annual cruise along the fringe of the arctic archipelago between Baffin Island and Greenland and as far north as Ellesmere Island, within 700 miles of the pole. And with the ship go Royal Canadian Mounted Police, geologists, botanists, surveyors and other technical men to be exiled for a year or more in lonely flocks for the advancement of natural science and the fur-clad native.

Crowded With Incident

These men do not refer to these expeditions as exile, however. Their time moves quickly and not too smoothly, often enough crowded with incident and adventure and always steeped in the allurements that make the call of the wild almost irresistible to those who have once heard it.

The diary of L. J. Weeks of the Geological Survey affords fascinating glimpses into the home life of such pathfinders. In August, 1926, Mr. Weeks and an assistant, M. H. Haycock, were left at Pangnirtung, Baffin Island, to make a study of rock formations about the Cumberland Gulf region. This was an excessively populous point, there being a church and mission, a detachment of police and a Hudson Bay post—as many as four white men and several scores of Eskimos—so that there was plenty of "social" life, when the geologists were not exploring.

The House That Fell Not

The first entries in the diary read like a chapter from "Robinson Crusoe," as they describe the building of a three-room shack. Dr. L. D. Livingstone, of the Department of Indian Affairs, had been marooned with the others, and as he was to occupy one room he also turned carpenter and labored with hammer and saw. The three amateurs made such a good job of it that when the arctic winds blew and the rains descended and beat upon that house it fell not. The first test came on September 22, when there befell "the most terrific gale yet. The wind lifts the water right out of the fford in water spouts 400 feet high." It also fished a barrel of gasoline from the beach, resulting in an exciting and unsuccessful chase by motorboat through tempestuous seas.

Early in November, when the sun was wearing the horizon and the mercury was dropping below zero, social calls upon the minister, the factor and the Mounties became the chief attraction. The last named possessed radio. One needs to spend a year in the arctic to really appreciate a receiving set.

"Nov. 13: Below zero and blowing. To-night KYW, Chicago, is to radio-cast messages to us, so we all go over to the police in the evening." Unfortunately they failed to get the station. But the following evening conditions improved. "Radio came in fine for our set. We get a concert from the Commodore Hotel, New York, from WBZ and WJY." On November 19, "We go over to the police and at 10.40 KFKX starts to broadcast to the arctic. They give us concerts for 3½ hours, and then messages to Greenland for half hour. Then one hour's news summary since July 15; an hour of messages for men from Backe to Burwell, and from Godhaven to Alaska; then an hour of 'Radio Special to the North Pole.' Got home at 7 a.m."

But the real news is home news, sent on the air from cozy fireplaces 2,000 miles away. One night, while the "worst gale of the year" is blowing until it seems as though the shack must be swept away, he hears from his mother in far-off sunny France.

One gets a hint of the glory of arctic night from the entry of Dec. 18: "The moon is very high and nearly full, so that the nights are brighter than the days. Moon up nearly all the time"; and Dec. 22: "The shortest day. Brilliant aurora at night." Then, by way of contrast, comes the most laconic of all daily entries: "Got a haircut."

On Dec. 24 the men gather in the "barracks" and receive "Best wishes for a Merry Christmas and a Happy New Year" from folks at home. And Christmas indeed proved as merry there on the top of the world as any "down below."

"Awoke at 11.15 and dress up. Give Aloukee a plaid dress and a necklace. We all give Talkee a dress. Oojoosahk gave me a white fox skin. Koosahk gave me two whitecoat (baby seal) skins. We have a very bright breakfast. At 5 p.m. we go to the company post and have a Christmas dinner. . . . We repair to the police where all the natives are having a dance. We have a sing-song with proper refreshments." The grand occasion would up with the receipt of radio messages from distant friends and relatives.

Such diaries prove that "the friendly arctic" is not a misnomer and that the polar regions may even become "popular" in time.—Christian Science Monitor.

What's a Jag?

"Drunk Means Drunk," As-serts Magistrate, Pointing Motorist to Freedom's Gate

Few Tests For Liquor Pests

"Leith Police Dismisseth Us," Line That Starts a Fuss

London.—"Drunk means drunk."

Thus bluntly and, according to his opponents, obtusely, did Henry C. A. Bingley, London police magistrate, answer the new problem which confronts the ancient common law, to wit: whether the same standard of drunkenness should be applied to motorists as is applied, for instance, to pedestrians, trap drummers or after-dinner speakers.

It was one of those cases of drunken driving which arise daily in all countries where civilization has mixed gasoline with alcohol. The evidence, as in most of these cases, was conflicting. The police surgeon, a conscientious man, testified as follows:

"If the prisoner had been a pedestrian I would have said he was sober, but as a motorist he was drunk—he was not capable of operating a car safely."

Decision Heightens Problem
"The prisoner must be acquitted,"

said Magistrate Bingley. "The surgeon's view is not the law. . . . In a case before the Superior Court a short time ago the Lord Chief Justice, our highest authority, stated that drunk means drunk. Case dismissed."

The case was dismissed, but the problem remains. Many of Mr. Bingley's fellow-magistrates disagree with him, and the medical fraternity is ranged almost solidly against him.

In the old days London's view of drunkenness was less strict. It was expressed by the constable who, having propped his prisoner up against the bar, was giving his evidence on the case. "What was the prisoner doing?" he was asked. "E was a lying in the gutter, sir." "Was he drunk?" he was asked. "I wouldn't say that, sir—I seen 'is finger move."

With the coming of the automobile, however, this amiable view was progressively revised. The police courts learned that what they had hitherto regarded as a mild illumination might flame up, behind a steering wheel, into a blooming catastrophe. And, with motor cars all over the streets, they found it necessary to frown even on those formerly harmless citizens who habitually made their way home late at night by rolling, wriggling and crawling on all fours.

Tests for inebriates
Then began the various police tests for intoxication which have caused so much dispute in recent years. The prisoner was asked to walk a chalk line, turn, and walk back, or to pro-

Roll Your Hoop To Health

Girl in gymnastic Ayro wheel spins round Trafalgar Square, London. This new athletic device, which has become a fad in Europe, has been tested and passed by the British army.

nounce "Truly rural," "British Constitution" and "The Leith police dismisseth us."

These tests created more difficulties than they solved. Loud protests were heard. Scores of innocent Haps and stammerers, it was claimed, were being railroaded to jail. The chalk-line test was denounced as unfair for ordinary men, but pie for tight-rope walkers, however tight. Medical men, on the other hand, alleged that agile-tongued drinkers could make a Roman holiday of pedestrians and lamp-posts with their motor cars, and then pass their elocution tests summa cum laude.

At this point appeared a device, said to have been invented by American chemists, which promised a scientific solution of the whole problem. It was called the "football bladder test." The suspect would be ordered to inflate the bladder with his breath. The bladder would then be deflated into certain test tubes and the percentage of alcohol in the prisoner's system calculated with chemical precision.

The millennium in booze testing seemed to have arrived. But it soon developed that the learned scientists had left out of account a factor of which the veriest barfly could have told them, namely, that some men are more affected by four drinks than others are by fourteen. A veteran police sergeant of unquestionable sobriety, for example, was found to have considerably more alcohol on his breath than a Cambridge freshman. Just arrested for staging a one-man riot from Piccadilly Circus to Russell Square. The football bladder was declared offside.

Physicians Devise Formula

Finally, in despair, several London physicians devised the formula which is causing the present legal controversy. The prisoner, they held, should have a full examination from a committee consisting of both doctors and laymen. This examination should be heart to heart, breath to breath, and wholly friendly, thus giving the prisoner no opportunity to "pull himself together," thus defeating the entire object of the test. The whole should be a "when shall we join the ladies" or "where do we go from here" kind of affair.

After an hour of chumming up with the prisoner in this way the committee should withdraw and debate upon the question of whether the prisoner "was, owing to alcohol, incapable of doing safely the work on which he was engaged at the time specified in the charge."

On this formula most of the doctors and half of the magistrates of London have been able to unite. It establishes, definitely, separate bibulous standards for the aviator, the motorist, the bicyclist, the elevator operator, the steam shovel engineer, the over-the-audience vaudeville trapezist, the oyster shucker and the already referred to trap-drummer, after-dinner speaker and pedestrian.—N. Y. Herald Tribune.

There's nothing against the inferiority complex, except that it doesn't affect the right people.—Publishers Syndicate.

When there is nothing more to be said some boob always says it.

Knights of the Racquet

United States team selected to play the Chinese in the American Zone Davis Cup finals: Lott, Junior Coen, Tilden, Hennessy.

England's New

Silver Pieces

The Royal Mint of England has issued four new silver coins, the designs for which were approved by the King's proclamation last November. The coins having the new design are the half-crown, florin, shilling and sixpence.

The Bank of England, which will distribute the coins, has received more than £100,000 of them and they will be put in circulation.

The police guard which has for many years been on watch at the Royal Mint will be withdrawn in the near future to be replaced by guard of ex-service men.

Experts Study

Dead Village Sites of Alaska

Expedition Seeks Evidence Tracing Indians to Descendants of Asia Race

Washington.—Further extensive archaeological explorations in Alaska should be undertaken without delay, believes Dr. Ales Hrdlicka, anthropologist of the Smithsonian Institution, who has discovered evidences in that region that the American Indian is a descendant of an Asiatic race.

Numerous "dead villages" and old sites already have been found during a survey of about 900 miles along the central and lower Yukon and the shores of the Bering and Arctic Seas, he reported to the National Academy of Sciences, adding that some are "buried in the banks and evidently are of a considerable, though not geological, age."

It is Dr. Hrdlicka's belief that Asiatics, migrating probably in small boats by way of the "natural bridge" between Siberia and Alaska, settled first in the latter region and moved slowly southward as they sought more favorable living conditions.

"Collections along the Yukon show characteristic and hitherto unknown forms of implements and other articles," he told the academy, "and one of the sites has also given some highly interesting and distinctive skeletal material. This site is in urgent need of excavation, for it is being cut away by the river."

"In the Bering Sea and the Arctic sites traces of an old and remarkably high grade ivory culture were discovered, different from that of the later Eskimo, and connecting apparently on the one hand with deep down in Asia, and on the other hand with the Indian culture of the northwest coast."

College is just like a washing machine: you get out of it just what you put in—but you'd never recognize it.—Dartmouth Jack o'Lantern.

Short Skirts Increase Award for Ankle Injury

London.—The influence of women's fashions on the law was demonstrated recently when a young girl, Joan Barker, of Henwall, Cheshire, won an award of \$7,250 damages at Liverpool Assizes for injuries to her ankle in an automobile accident.

Counsel for the plaintiff contended that in these days of short skirts a permanent disfigurement of ankle or knee must be considered just as important as disfigurement of the face. The court, in upholding the unusually heavy damages awarded, agreed.

The Birth of "Sunlight Soap"

In 1875 the Trade-Marks Act had come into operation, and Lever realized that the first thing to be done was to secure a good name for the soap which he was thinking of marketing, for there was but little "good will" in an article bearing such a name as "Lever's Pure Honey Soap." Any other wholesale grocer could market a soap and call it "Pure Honey," "Honey" being only a fanciful name and one commonly applied to a type of soap the color of which was suggestive of honey. Soaps in those days were supplied by manufacturers in bars and stamped with the name of the grocer who sold it and possibly with the name of the maker as well, but Lever's idea was to establish a soap which would be of unrivalled quality, and which under a registered name could be advertised and sold universally.

On his return from his Hebridean holiday the first thing which he did was to call upon the best trade-mark and patent agent in Liverpool—the late W. P. Thompson—and discuss with him the question of a suitable trade-mark. It had to be a name easy to remember, easy to pronounce, and one which could be upheld in a court of law if an imitator came along, and, in order to overcome the obstacles which the Trade-Marks Act very properly erected, it had to be descriptive of the article, or refer to quality, or be geographical. Thompson turned up his lists and, after thinking for a while, scribbled down half a dozen names on a sheet of note-paper. At first none of these names appealed to Lever, and, putting the slip of paper in his pocket, he went away feeling disappointed. During the next few days, however, whenever he had a few minutes to spare, he took the list out and studied it. Amongst the half-dozen names suggested was the word "Sunlight." Suddenly, on the third or fourth day, it flashed across his mind that this was the very word. Then he was seized with the terrible thought that while he had been thinking the matter over someone else might have appropriated the word and had it registered. He accordingly took the first train to Liverpool and called upon Thompson to inquire if the name was still available; to his great delight it was, and he promptly instructed the agent to register it. Later inquiries showed that the word could not only be registered in Great Britain, but in every country where a Trade-Marks Act of one kind or another was in force; a fortunate coincidence which added greatly to its value.—In "Viscount Leverhulme," by His Son.

Mexican Saloon Retains Sign Posted for Lindbergh

Mexico City.—Lindbergh's name continues to adorn at least one, perhaps more, of the Mexico City saloons that tore down their former signs and re-labeled their places in honor of the famous flyer when he was here last December.

It reads: "Lindbergh Cantina, Saloon, Barroom, Drinks." Also a "Lindbergh cocktail" was invented during the visit of that renowned but abstemious young man. It had quite a vogue, despite its devastating qualities. The Mexicans were determined to honor Lindbergh to the utmost, even if it involved gulping liquid dynamite.

A department store modeled on American lines has been opened in China, a charge for entrance being made at the door. Well, who can't get a dollar's worth of fun in a "dime store" for ten cents?

Who said "Oriental calm"?—Boston Transcript.

The Provincial Bank of Canada

QUARTERLY DIVIDEND No. 100
NOTICE is hereby given that a dividend of two and a quarter per cent (2 1/4 p.c.) being at the rate of nine per cent (9 p.c.) per annum, upon the fully paid up shares of the Capital Stock of this Bank, has been declared for the three months ending the 30th of November, 1928. This dividend will be payable on and after the first of December, 1928, at the Head Office or branches of this Bank, to Shareholders of record on the 15th of November, 1928.

The Annual General Meeting of the Shareholders will take place at the Head Office of the Bank, 221 St. James St., West, in the City of Montreal, on Wednesday, the 6th day of February, 1929, at 12.30 p.m.
BY ORDER OF THE BOARD OF DIRECTORS

Chs. A. Roy,
General Manager.
Montreal, October 29, 1928
N-30-5.

It seems hardly fair

Fathers and mothers used to look forward bravely, but not always happily, to the time when the boys and girls would go away to school in a distant city. It so often meant a break in the habits of home life—a sore trial.

Thanks to Long Distance—the boys and girls at school or college can still be kept within the family circle.

But don't expect them to pay for Long Distance calls out of their slender allowances. That seems hardly fair. The demands upon their none too fat purses are too frequent and too insistent.

Fix a day and hour when you will call them, and you'll find them eager to talk with you and welcoming the voice that can best cheer them on their way.

"Every Bell Telephone is a
Long Distance Station."

WANT ADS

TO LET.—House, newly decorated & painted, latest lighting system, hot water throughout, Bath, Furnace, also garage. Apply to Mr. Robert Cleland, near the premises.

FOR SALE.—Two Deer Hounds. Apply to J. S. Thompson, Box 212, Brownsburg or Phone 71 r 1-3.

TO RENT.—Two rooms, (heated), kitchen furnished, electric stove, at a moderate price. Apply to Mrs. P. H. Masson, Lachute, Phone 185m. X.

LOST.—At J. S. Parkes, Dunany, a black dog with white markings. If not claimed within five days, same will be destroyed.

HOUSE TO LET.—On Bethany St. Immediate occupation, \$30.00 per month. Apply to J. W. Cottingham, Lachute, L.V.

HONEY and APPLES FOR SALE.—The best of honey and apples from the Laurentian Fruit Farm on the Brownsburg Road. Call 119 r 2-2 or secure your supplies through most of the town stores.

THE HAPPY FAMILY

"They do have such good times together!" Little Mrs. Turner's eyes followed wistfully the disappearing figures of the MacDougall's her neighbors across the way. Lunch - and camera - and sweater-laden, with the dog bounding joyously before them, they were off - father, mother, and the three young MacDougall's - for a Saturday tramp in the woods.

"I was asking Mrs. MacDougall only yesterday," Little Mrs. Turner went on, "how it is that although they all have special friends and hobbies of their own, they still manage to work and play and plan together so many good times. And do you know what Mrs. MacDougall answered. She laughed and said, 'Well I really think more than anything it's The Youth's Companion! In fact, I'm so sure of it that I should like to order it for a year as a present from our family to yours. Six months from now you can tell me if I wasn't right.'"

The MacDougall's are just one of thousands of households where The Youth's Companion is bringing not only entertainment in its fine book-length novels, serials, and short stories, but fresh interests, new ambitions, and deeper understandings through its feature articles and many special departments. Every page offers happiness to young and old alike. Don't let your family be without the treat of this great monthly magazine!

Just send your subscription order to the address below and you will receive:

1. The Youth's Companion, 12 big monthly numbers, and
2. Two extra numbers to new subscribers ordering within 30 days, and
3. A copy of "WE" in 12 colors, framing size 18 x 24 inches. All for only \$2.

LOCAL NEWS.

Mr. A. G. Jones spent Sunday with friends in Edina.

Miss Maude Dobbie of Montreal, spent the weekend at her home here.

The Misses A. and M. Smith of Montreal, spent the week-end in town.

Mr. Perry of Montreal, was the week-end guest of his daughter, Mrs. Rev. Cousins.

Mr. Glen McAllister of Vancouver is home here owing to the illness of his father, Mr. Geo. McAllister.

Miss Violet Paul returned home on Sunday after spending the past few weeks in Montreal, visiting friends.

Mr. H. Sutton has returned home after a two months vacation in Sault Ste. Marie, Mich., and other western States.

Mrs. Wm. Ball left on Sunday for Stettler, Alta., where she will be the guest of Mrs. H. A. Blair for the winter months.

Mr. and Mrs. Bothwell were in Dunham this week attending the funeral of Mrs. Bothwell's sister, Miss Marjorie Gilbert.

The Misses A. and E. Riddell returned home on Saturday evening from a visit with friends in Grand Rapids, Mich., and other points.

Mr. Cecil Graham of Detroit, Mich., arrived home on Sunday for a few weeks visit with his parents, Mr. and Mrs. A. Graham, of St. Philippe.

Messrs Earl and Kenneth Kirpatrick and Miss Aggie Williams of Mille Isles, were guests of Mr. and Mrs. E. J. Ward on Sunday last.

Mr. Jno. Boyd purchased the double tenement house of Mr. A. Warwick on Grace Street, which was sold by Auction last week for the sum of \$3,600.

Mrs. R. L. Calder of Montreal, was in town this week attending to her private affairs now being made to their pretty little summer home on the North River.

Messrs Hadden McDonald, Jack Silverman, Jack Hughes, Russell Rogers and Wilfred Cooke returned home on Saturday after spending three months in Melville, Sask.

The many friends of the Rev. P. A. McEwen are pleased to see him in town for a couple of weeks while he is renewing old acquaintances and supplying the Pulpits of the Baptist Church.

Mrs. Arthur Gauley, of Calumet, Mr. and Mrs. James Gauley, Miss Nellie Welburn and Mr. Melvin Dewar of Rivington, Mr. and Mrs. Roddie Campbell and family of Harrington were the week-end guests of Mr. and Mrs. Howard Gauley.

Fire destroyed the home of Mr. Wm. Kidd at Boyd's Lake, Dunany, on Thursday last. Mr. Kidd was away at Black Lake at the time, and although considerable help gathered nothing could be done to save the building which was soon a mass of ruin.

Miss Chamberland wishes to announce that she will give private lessons to any one desirous of learning the French language. Arrangements can be made by calling at her residence on Main Street, above the jewelry store of Mr. Chamberland.

The many friends of Sir George H. Perley, our Federal representative at Ottawa extend their sympathy to him in the loss sustained by the sudden death of his sister, Mrs. E. Webb, of Quebec which occurred on Saturday afternoon at the Ritz Carleton Hotel, while visiting in Montreal.

Among those attending the funeral of the late D. Joss, from a distance were the Misses Wilma and Francis Joss, Mr. and Mrs. Jas. Armstrong, and Mr. and Mrs. Jaoust of Montreal, Mr. and Mrs. Chas. Joss and Mr. R. Carpenter of Three Rivers and the Rev. Mr. Carleton of Drummond.

A very exciting Soccer game was held on Friday afternoon last, between Lachute Academy and Brownsburg School. The match was played on the D. C. Company's Grounds and among the spectators were many teachers and friends of the visiting team. Many thrilling incidents took place in the game and the play on the whole was very even, resulting in a score of one to one.

TOWN COUNCIL

The regular meeting of the above Council was held in the Victoria Hall on Wednesday at which were present, Mayor H. M. Gall and Aldermen P. Dobbie, A. Larocque, A. J. Elliott, H. M. Lavigne, C. R. Miller, T. Dal-laire and Dr. Sauvé.

It was ordered that a hydrant be installed at the corner of Grace and Mary Streets. A resolution was passed that all arrears of taxes would be handed in for collection. A light was also ordered to be placed on Wilson Street, near Mr. Pominville's property.

A resolution was passed requesting Mr. Bernier to close his Bowling Alley on Sunday afternoon.

A letter was received from the Literary and Dramatic Society concerning the bed and stretcher which they presented to the town, setting forth suggestions and conditions of their usage.

THE LATE FRED. H. HOOPER

The whole community of Brownsburg is overcast with gloom through the death of one of its most honored and beloved citizens, which occurred in the early hours of Monday morning, in the person of Mr. Fred. Hall Hooper. Deceased was born on Feb. 16th, 1868, at Windham, Maine, and came to Brownsburg about 50 years ago, when but a youth of 12 years. He was an honored employee of the Dominion Cartridge Coy. in which he spent the greater part of his life and retired from active service some three years ago.

"Fred," as he was generally known was a man of sterling qualities and a true friend. Everyone knew him as a kind and generous man, always ready to extend the helping hand to those in need, and his passing away means a great loss to the community.

Mr. Hooper was a member of the Municipal Council of Chatham and had served in many capacities, giving ungrudgingly of his time for the betterment of community life.

The funeral took place on Wednesday afternoon, being held in the United Church. It was one of the largest ever held in Brownsburg and many were unable to gain admission to the Church. The Rev. Mr. Cassidy conducted the service, after which the remains were taken to the Lachute Cemetery for interment, the pallbearers being, Messrs J. T. Ayers, E. J. Johnson, Major Mitchell, C. E. Richardson, H. R. Ardill and Ira McFaul.

Mr. Hooper is survived by his devoted wife, formerly Louise Mathieu, and his two sons, Dr. Harold Hooper of Grand Mere, and Dr. Willis Hooper of Lachute.

THE LATE DAN JOSS

News of the death of Mr. Dan Joss which occurred in Montreal on Saturday Nov. 3rd., was learned here with deep regret. For years Mr. Joss had been the caretaker of our Post Office which duties he faithfully filled until failing health forced him to relinquish active work some time ago. Owing to his daughters' teaching in the city, Mr. and Mrs. Joss took up residence in Outremont. Deceased was in his 71st year and leaves to mourn his loss a devoted wife and four daughters, Mrs. (Rev.) Carleton, Mrs. Armstrong and the Misses Francis and Wilma.

The remains were brought to Lachute for interment, the service being conducted in the United Church by Rev. Mr. Cassidy, assisted by Dr. McLeod, there being in attendance a very large gathering of sympathizing friends.

The pallbearers were Messrs H. W. Gilles, H. M. Gall, E. H. McCoy, Jas. W. Gall, J. A. McGibbon and W. M. Scott.

THE LATE WM. J. LISTER

It is with deep regret that we record the death of one of our loved and respected residents, in the person of Mr. Wm. J. Lister, who passed peacefully away on Tuesday, Oct. 30th., after a long illness, at the age of 68 years. Deceased gentleman was born at Shrewsbury on Oct. 7th., 1860 and had spent most of his life in this vicinity. He was a devoted husband and kind father, and will be greatly missed by all who knew him. The funeral was held on Thursday Nov. 1st., from the residence of his son-in-law, E. J. Ward and was largely attended by sympathizing friends and by the Orange Lodge No. 716, of which he was a member for 51 years. The service was conducted by the Rev. G. Campbell Wedsworth. He leaves to mourn his loss a loving wife and two daughters, Mrs. S. Sullivan, Hamilton, Ont., and Mrs. E. J. Ward, of Thomas' Gore, also one sister, Mrs. Wm. Snuggs of Pointe Claire.

The Pall Bearers were Messrs E. J. Ward, Fred. Gain, Jack Gain, Geo. Peet, Jas. Morrison and S. Berry. Those attending from a distance were Mr. and Mrs. R. J. Copping, Mr. and Mrs. A. C. Ward, and Mr. Ed. Morrissey of Montreal, Mrs. F. Sullivan of Hamilton, Messrs Wm. and Herbert Snuggs of Pointe Claire, and Messrs Wm. Walter and Albert Ward of Shawbridge.

ANOTHER MOTOR FATALITY.

The road between St. Hermas and Lachute seems to be rather unfortunate for motor accidents, another fatality having occurred Monday last, when Paul Levesque succumbed to injuries sustained in an accident at McRae's Hill.

It appears that a west-bound car was making the rise of the hill when its occupants saw reflected in the overhead wires, the lights of an approaching east bound car and they had hardly drawn to the ditch with merest margin of safety, when the other car was on them and in order to avert the collision, Levesque made a quick swerve and took to the ditch. Levesque was so badly injured that he died shortly afterwards, while his wife and several other occupants of the car received a severe shaking up. They were locally treated and made a sorrowful return to the city.

The many friends of Mrs. F. Jenkins are pleased to see her home again after her serious operation in the Royal Victoria Hospital.

How to conduct a Business Meeting. This is to be the subject of a talk to be given to the Literary and Dramatic Society, at their meeting in the Academy on Tuesday evening of next week.

AIR PLANES ARE TRICKY AND ACT AS IF "POSSESSED"

Odd Mishaps to Pilots in Which the Elements of Comedy and Tragedy Mingled

Two recent airplane accidents, one here and one in South Africa, bring to mind a number of queer mishaps that have occurred in the short history of aviation, especially during the war period. Many of these have never been explained; some were tragic and others provided a comic relief from the monotony of training embryo aviators or from the nervous tension of flying in wartime.

When Lieutenant R. H. Hicks's plane took off on its own accord from Mitchell Field airport recently it was not the first time that such an event has taken place. Several years ago a pilot landed on a flying field in England to visit a friend. Taxing up to the hangars, he jumped out and left his engine running, intending to return almost immediately. This was a double infraction of the regulations. In the first place, he should not have left his engine running and, in the second instance, he should not have left the control lever unhitched, which he did.

What happened, apparently, was that a sudden puff of wind got under the starboard ailerons, forcing the control stick over to one side, thus sharply striking the throttle lever, which was fixed to the side of the fuselage. The next instant the plane, engine full on, was careering madly down the field. Being stable, it rose of its own accord and was soon lost to view. Eventually it was found, more than a mile away, a complete crash.

The cause of a similar accident is much more mysterious. A line of seven or eight heavy bombers of the pusher type were being loaded on an aerodrome in France, preparatory to a raid. At one side of the line another machine was being wheeled out of the hangar. For some reason or other it was left facing the end of the line of planes, about 100 yards further along the field. A mechanic, so he said afterward, thought the switch was on and promptly threw it out. It appeared that the switch on this particular machine was upside down, and the mechanic, instead of throwing it out, threw it in, but the moment he did so the engine started up in some mysterious way, carrying the plane straight for the line of bombers. With almost instinctive precision the bottom port plane caught each of the rudders of the waiting machines, causing them to fall heavily backward upon their tail booms.

PAINTS IN AIR

Lady Heath's recent experience in fainting in the air from an attack of sunstroke and yet landing safely but unconscious on the African veldt was one that had several parallels in wartime aviation. In the early part of the war some British pilots saw a British plane coming away from the lines in a long, steady glide. It passed low directly over an aerodrome, and yet the pilot made no attempt to circle and land. Suspicious that a German had got hold of a British machine and was attempting a landing on their side of the lines, the officers in question seized a tender that happened to be at hand and drove off at high speed in the direction in which the plane had disappeared.

Ten minutes later they came across the machine in the middle of a large field, its propeller stopped, and the pilot and observer still sitting in their respective cockpits. The officers, stopping the tender, shouted to them, but there was no response. Still thoroughly suspicious, they approached the silent machine—both pilot and observer were stone dead. Closer in-

vestigation showed that the observer had been shot and instantly killed, while the pilot, mortally wounded, had had presence of mind before he lost consciousness to head his plane home and switch off the engine. He probably had died on the way down.

Perhaps one of the queerest accidents that ever happened occurred when a certain young pilot took off at night on a heavy bomber for a raid across the lines. The machine, instead of rising from the ground toward the end of the flare path, ran straight through it, off the flying field proper on to a soft field at the end, where it gradually slowed down and finally turned on its nose in an easy, gentle motion, at least so it appeared in the uncertain light of dusk. When the machine was reached a minute or so later it was found that the observer had been thrown head first into a mudhole, and was in the comical process of scraping the mud from his face when the rescuers arrived. The pilot, however, was dead with a broken neck, and yet the plane was not in the least damaged and was flown that very night across the lines.

FLEW IN KILTS

More humorous was the case of a pilot who was known as the "Mad Highlander," partly because he always flew in kilts and partly because he was intrepid to the point of idiocy. One day, having flown for about ten hours all told, he took up an Avro to about 5,000 feet, where he put it in a spin and spun down from that height straight into the ground. The engine was buried nearly three feet deep, while the fuselage and wings were reduced almost to splinters—but from the midst of the wreckage the "Mad Highlander" emerged, complaining loudly that he had cut his knee!

Still funnier was the case of a certain squadron commander who never saw except twice a year to qualify for his flying pay. No one, so far as is known, ever encouraged him to go up, for when he did he invariably crashed. On one occasion he discovered that he must immediately forfeit a not inconsiderable part of his income. A machine was wheeled out for him, the nominal owner looking ruefully on. The wind was blowing across some greenhouses to one side of the field, and there was not a man present who did not feel exactly what form the inevitable disaster would take—so much so, indeed, that the flight commander sent some mechanics to the edge of the field nearest the glass houses.

The gallant major walked breezily out of his office, clad like an Eskimo, though it was a warm summer day. "Nominal Owner" shook his head sadly, threw a parting kiss to his cherished plane and walked hastily away in the direction of the officers' mess. Before taking off the major instructed a mechanic to note his time in the air with a stop watch—it was only necessary for him to fly twice a year; the regulations were delightfully vague concerning the length of each flight.

Finally the chocks were taken away from the wheels and the major rushed away in a dust to the centre of the field, the plane swaying to port and starboard like an angry cat's tail. Up he went—straight into the greenhouses. The plane, as usual, was almost a complete write-off, but the major, cheerful as ever, was also as usual, unharmed. Tearing back to the mechanic with the stop watch he yelled, "Did you get the time?" "Yes, sir," responded the mechanic, dryly, "forty-five seconds." "Good!" said the major. (N.Y. Times.)

Farm Notes

SPRING CARE IN MARKETING EGGS

Why is it that farmers who give the utmost care to their milk, to cool it and keep it clean, who carefully sort the potatoes they send to market, persist in selling dirty eggs? The question is one which puzzles those interested in the egg trade—men who know the depressing effect these dirty eggs have on the market. Farmers will sort their potatoes because they know that consumers do not want a small, scabby, ill-appearing product. They will keep their milk clean because they know that nothing will turn consumers against milk more than dirt. The same consumer preference is exerted in eggs, as is instanced by the success of standardized egg grading, but all farmers do not seem to have realized the necessity of producing and marketing clean eggs.

A very interesting commentary on this matter was provided recently by Mr. E. J. Smith, manager of the Whyte Packing Co. of Brockville, Ontario, when he stated that dirty eggs and their related evil, washed eggs, represented one of the greatest problems and biggest sources of loss in the egg trade, a loss which eventually the producer has to bear.

"Dirty eggs," said Mr. Smith, "are repulsive to the consumer and lessen the demand for all eggs. Washed eggs deteriorate quickly and, if stored, usually come out of storage spoiled and unfit for use. It would be a decided advantage to producers if they would give a little care to keeping nests, poultry houses and yards clean and we are confident that a little at-

tention to sanitary conditions would result in much better prices. It would also add much to the attractiveness and pleasure of doing business."

Mr. H. R. Gray, managing director of Gumm, Langlois & Co. Ltd., Montreal, and president of the Montreal Produce Merchants' Association, in a recent interview goes a little further and explains why nature's covering on the egg should not be removed.

"Dirty eggs," said Mr. Gray, "should never be washed if they are going to be sold and marketed through the regular channels. Every farmer knows that the egg is wet when laid. This moisture, or mucous, dries on the shell and serves the purpose of filling the pores of the shell without sealing them, thus filtering any air that may pass through. The shell itself with its two inner membranes forms the protective wall of the egg, and by washing the egg one will remove the gelatinous coating on the shell which serves as a protection for the contents. When this coating is removed the egg has a tendency to deteriorate faster, especially if they are placed in storage."

"Cleanliness of shell effects the quality of the egg directly, that is, if the egg is clean it will hold up better in storage than a dirty or stained egg. Cleanliness effects the price also. The Canadian Egg Standards require that Fresh Extras be clean and Fresh Firsts reasonably clean, so that if producers market dirty eggs they must be sold either as Seconds or in the class of Cracked and Dirty Eggs."

"If eggs are going to reach the market in good condition the first step must be taken by the farmer in proper care of handling. A poor quality egg will always remain an inferior product. The fundamental thought in handling eggs should be to preserve

Strange Friends

YOU CAN'T GET THIS DOG'S GOAT

This spaniel has appointed himself official guardian of this kid on Catalina Island, the spot made famous by George Young, and takes the best care of his little playmate.

the original quality of the eggs. Good care on the farms is essential as a step in marketing good eggs."

Mr. Gray summed up his interview by stating that his firm is absolutely opposed to handling any washed eggs. **FARM AND GARDEN FERTILIZERS.**

Fertilizers are not the doubtful products they were a generation or longer ago, nor are they limited to a few brands and descriptions. Plant food materials and mixtures occupy a considerable place in commerce and industry, and their production involves heavy investment of capital and occupation. In all Canada more than sixty firms are turning out fertilizers of simple or complex form involving almost three hundred brands. These, with the exception of certain standard materials including sulphate of ammonia and superphosphate, have all to be registered with the Dominion Seed Commissioner whose branch, of the Dept. of Agriculture administers The Fertilizers Act. In this administration the many brands of commercial fertilizers are inspected and analyzed to see that the buying public are not imposed upon or defrauded when the fertilizer is purchased subject to analysis with manufacturers and importers are required to guarantee in percentage of nitrogen, phosphoric acid and potash, the three essential plant foods. The results of these analyses are each year published for the information of those who are interested.

The analyses carried out during the fiscal year 1926-27 are reported in Pamphlet No. 86, distributed by the Publications Branch of the Dept. at Ottawa. These analyses cover 133 complete mixed fertilizers, 92 fertilizers containing only two plant foods, and 18 containing only one of the three recognized essential plant foods. In the entire year's work but twenty-one brands were found by analysis to fall below the guaranteed analysis of the trade. It was found necessary to conduct five prosecutions and to issue warnings for several minor offences. Incorrect labelling was the principal

offence other than failure to meet the guaranteed analysis. The report which contains the results of analyses of samples of fertilizers taken by inspectors during the registration year, reports the increasing use of fertilizers in Canada as indicated by an estimated excess of 20,000 tons over the previous year, bringing the amount up to about 180,000 tons used for commercial purposes.

The Great Dane.

"Did you know Shakespeare devoted one of his plays to a dog?" "No—which one?" "His play about Hamlet the great Dane."

NEOLOGISMS

A couple of new words have recently swam into our ken. Professor Jastrow in a recent article advised mentally tired folk to "Take a relaxative." Entirely new that, we believe. The other word is of the portmanteau variety. It is from the Kalends: "No longer will estimated costs be 'guesstimated.'" Expressive words! Instead of speaking of a "rough estimate" we shall presently be calling it a "guesstimate," thus saving two letters and a syllable.

The French Senate has rejected a plan to conscript women in time of war. Anybody who has ever tried to conscript a woman will understand why.

Free Time For Children

Viola Woodville

No mother ever loved a child better than Mrs. Winter loved Margery nor tried harder to give her every advantage. That was the whole trouble. She tried too hard. "She stood up so straight that she leaned over backwards," as my dear father used to say. Well, Mrs. Winter nearly killed Margery, and I'll tell you about it, just as she told me after Margery had become a rosy-cheeked high school freshman.

"Margery grew so thin and listless," said Mrs. Winter, "though she was faithful to all her work, that I saw the scientific care that I gave her, I could not understand it. One morning she wouldn't get up to do her practising and there was nothing for it but to call the doctor."

"Dr. Stevens was as much like an old-time family physician as exists now-a-days, and I had known him all my life. He scarcely knew Margery, though, because she had always been so well. When he came he merely had a little visit with the child and then talked with me out in the hall."

"Is your daughter usually an active child?" he asked.

"She used to be a little dreamer," I answered, "until I trained her out of it. I wanted her to get the full use of all her time, and now she accomplishes a great deal."

"I meant, what exercise does she get?"

"Her play time is supervised at school, and I see to it that she has a walk very often. I go with her myself, and we study birds and plants. With her extra lessons I want her to have plenty of outdoors."

"Then I told him how much talent Margery had for drawing and music and how I saw to it that she had opportunities that very few children enjoyed. 'She has accepted a very high standard,' I added, 'as the goal she is working towards, and I feel that she

will be creative in one or both of these lines.'

"When he questioned about her diet I could tell even to the number of calories she had in her well balanced meals. 'Can you wonder, Doctor,' I asked, 'that I am surprised that with all my care she is now in bed with nothing much the matter?'

"Nothing but nervous prostration!" he burst out, 'a ridiculous condition in a child with a mother as intelligent as I thought you were, Caroline. Poor little thing! Even her walk a study period. No time to herself. A little slave to her mother's ambition.'

"Careful, Doctor!" I had to throw in. "Now, Caroline, you are going to let your old friend tell you that no good intentions are going to alter the fact that you have put this child to a program that few grown people could stand. Her whole nature has rebelled. No matter how exactly you weigh her food it isn't going to nourish her body if her spirit is in a cage."

"Children need time to dream, time to plan their own games, time to do nothing at all. They may have little duties—should have them—but not the large responsibilities that you have put on your child. Think it over, and you'll know I am right. Give Margery wholesome food, but let her choose for herself what she likes, and how much, for a time. Stop so many extra lessons while school is in session, and above all let the child alone. Because her mother loves her, she'll be all right soon. Let me see her again before long."

"The good old doctor took himself off, and I brought out a book of fairy stories that I had hidden and gave it to Margery," concluded Mrs. Winter.

And I will say for her that she used the same intelligence in relaxing her vigilance that she had used in holding Margery to her system.

Canadian Racing Dates List Fort Erie and Hamilton Tracks

Toronto, Ont.—The schedule of the first series of race meets under the jurisdiction of the Canadian Racing Association as announced by that body shows the Fort Erie and Hamilton tracks listed despite reports that both of these jockey clubs might drop out due to losses last season.

The schedule follows:
May 19 to May 26, Ontario Jockey Club, at Woodbine Park, Toronto.

May 28 to June 4, Thorncliffe Park Racing and Breeding Association, Toronto.

June 6 to June 13, Connaught Park Jockey Club, Ottawa.

June 16 to June 23, Montreal Jockey Club, Blue Bonnets, Montreal.

June 25 to July 2, Hamilton Jockey Club.

July 4 to July 11, Niagara Racing Association, Fort Erie.

July 14 to July 21, Dorval Jockey Club, Montreal.

A cub reported, frequently reprimanded for prolixity and warned to be brief, turned in the following: "A shocking affair occurred last night. Sir Edward Hopeless, a guest at Lady Panmore's ball, complained of feeling ill, took a highball, his hat, his coat, his departure, no notice of his friends, a taxi, a pistol from his pocket, and finally his life. Nice chap. Regrets and all that."

Husband (on phone)—"So, honey, I'll be awful busy at the office and won't be home till late." Wifey—"Can I depend on that?"

Like Fish in Pond, Cat on Land, Is Neither

Eldorado, Kan.—A real curiosity is being displayed here in the business district. A queer creature about one foot long, which was found in a pond near here, appears to be half fish and half animal. The creature's body is that of a fish, having gills, head and tail like a channel cat. Large bunches of tendrils are back of each gill. It has four strong legs with feet similar to a frog's. It moves freely, like a lizard, when on the ground. When in the water occasionally it swims to the top, catching flies and snapping like a dog.

Blackmail Victims Aided

For some time it has been noticed that prosecutors in British blackmailing trials had remained incognito. The reason was divulged to have originated in a plan of the London Judges, made known on March 1 in a case tried at the Old Bailey, when a servant named John Wright was sentenced to three years' penal servitude for attempting to blackmail his master, "Mr. B," and his fiancée, "Miss A."

Wright, it was declared by the prosecuting counsel, Francis Peregrine, had demanded "enough hush money to take him out of the country." "Miss A." was taken into the secret and advised "Mr. B" not to pay, that she herself would handle the blackmail. She made an appointment with him which he failed to keep. Then he came to her house. She left him for a moment and telephoned the police. When, on her return, Wright demanded £100 for some letters and a hotel bill, the police entered and arrested him.

When the counsel for the defendant demanded that the plaintiff should be put on the stand and identified, the Recorder, Sir Ernest Wild, K.C., said that this could not be done, and he explained the agreement entered into by the London courts not to expose the prosecutors in blackmailing cases. He added:

"Blackmail is the only class of crime where there is a consensus of judicial opinion that the names of persons blackmailed should not be published. Otherwise such persons might be afraid to bring an offender to justice. The result has been that a number of persons have lodged complaints who otherwise would never have dared to do so. The procedure, it is believed, will in time measurably reduce the practice of the crime."

Socially impossible. Mother — (disappointedly) — "You find the Baron socially impossible!" Daughter—"Yes, he's so lacking in manners, mother."

Of course we will know more about the virtues of this new marriage idea when we see how many golden weddings are celebrated on the companionate basis.

"dough." Dough sticks to your fingers.

A Long Voyage For a Small Ship

LONDON BIDS ADVENTURERS "BON VOYAGE"

Crowds lining the dock as the 25-foot Dutch sailing boat, said to be unsinkable, leaves Westminster pier on start of voyage across the Atlantic.

Australia's Great Bird Man Bert Hinkler Sets High Mark

In a \$3,500 Plane and a Trip Cost of \$250 He Blazes a New Path in Air Performances in Flight From London to Australia

OPENS NEW VISTAS

Twelve thousand miles flown in fifteen and a half days in a tiny British flivver plane, at a cost of two cents a mile, through a variety of treacherous climatic conditions—that is the accomplishment by which Hinkler, the Anzac ace, has won the applause of the British Empire and the praise of the world. Making a new speed record from London to Australia, he "flew a machine costing but \$3,500," notes the Washington Star in a congratulatory editorial, "with a motor developing less than thirty horse-power. Including food, fuel, and accommodations, his expenses from Croydon airdrome, outside of London, to his home-town field in Australia, were two hundred and fifty marks that this trip," coupled with dollars." And The Star goes on to the nine-hundred-mile flight of the Ford flivver plane on fifty-two gallons of gasoline, demonstrates that air-plane cost and maintenance is rapidly being developed to conform to the average pocketbook. Such a trend we are told will automatically open up an entirely new field for aviation, for:

Potential flyers all over the world will prick up their ears when it is brought home to them that flying is being made as cheap as motoring. It has long been the dream of manufacturers to produce a small, safe, economical machine, and such exhibitions as have been given by Hinkler in Australia and Brooks in America lead to the conclusion that the time is not in the too distant future when the dream will become an actuality.

FIVE NEW RECORDS.

Hinkler's flight is said to have established five new air records, "which surely," for praise of his achievement as one of the most remarkable feats of skill and endurance in the history of flying. Specifically: The five claims in his behalf are that this is the first non-stop flight between London and Rome, the fastest journey between England and India, the fastest flight between England and Australia, the longest light-plane flight ever made, and the longest solo flight in any kind of plane.

The last-named item particularly impresses the imagination. New air-plane speed records between England and India and between England and Australia are achievements to be proud of, but this latest chimp, like Lindbergh, is a "lone eagle," and that fact intensifies the respect that is felt for him, just as it has heightened admiration for the American. It takes super-courage as well as a super-confidence in one's vehicle to set forth on one of these tremendous adventures single-handed. Another feature reminiscent of the American flyer is the statement that on the trip to Port Darwin he reached all of his fifteen stopping points "on time." Another perfectly functioning pilot in a well-nigh perfect machine!

A WONDERFUL PLANE.

And the plane itself is far from the least remarkable part of the Hinkler flight. It is said that the primary object of his trip was to test a new under carriage of his own invention. His plane is fitted with a swinging undercarriage and folding wings, enabling the machine to be housed in a garage and making it easily handled by one man. That a diminutive plane of this description should prove capable of flying across Europe, Asia, and the Indian Ocean without mishap, and in record time, may be accounted another of the aerial miracles of the twentieth century.

ADVENTURES ENOUGH.

After leaving Europe's fogs (which he had feared), he says: After that for a long time I seem to remember nothing but endless stretches of desert. Once I sighted a group of Arab tents with tethered camels. A whole day I was lost in Libya, and as I was trying to clear a space in the desert for a take-off, a party of Arabs cantered up. It was an anxious moment. There were friendly overtures on my part, and then they helped me with the clearing. A few minutes later I was again pushing on over the desert, and then at last came the stony wastes of Palestine.

In India I remember three things—blistering heat, air-currents that threw us about like a shuttlecock, and endless crowds of kind-hearted people pressing hospitality upon us. Whenever the East Indies are mentioned I shall think of rain-storms and my gallant little machine plowing on through rains so heavy one couldn't see the ground.

And then last night came the coast of Australia, a clearing in the jungle, a native hut, and mosquitoes, droves and droves of them. There was a hasty filling up from a dump of gasoline tins, and only 1,000 miles remained between me and home.

The last stage from Blima to Port Darwin, I will never forget. I flew for hour after hour over an unbroken expanse of sea with not a ship in sight, guided only by my compass and estimating the drift by guesswork. Almost to the minute I calculated, the loom of land appeared on the starboard. It became sharper, the nearer it grew, until I saw Bathurst Island,

the first glimpse of my native soil for eight years.

AS THE PRESS SAW IT.

A lyrical note creeps into the British papers over Hinkler's achievement. James Douglas, editor of the London Sunday Express, writes:

He is like one of those mighty Australians who used to lean lazily against the Nelson Column plinth in Trafalgar Square while they were on leave from Armageddon.

These Antipodean giants help us to look even a Lindbergh in the eye when we happen to forget our own Titans with humdrum names like Smith and Brown, Segrave and Campbell. They enable us to see our prodigies as others see them. Hinkler is a true antidote to our poison of self-humiliation.

He provides history a hundred years hence with an excuse for saying that there were giants in those days. He robs us of any pretext for fearing that our young men are inferior to the best that ever have been. A race which breeds a Hinkler is not exactly degenerate.

The air seems to develop a new sense in the birdman. It is like the unknown sense which enables migrant birds to steer their course across seas and continents. I used to sit on the Virgin's Rock at Biarritz and watch the birds flying from France to Spain, on their way to Africa. They knew their route.

A strange thing happened one evening during a voyage from Alexandria to Naples. The Mauretania was half-way across the Mediterranean, with no land in sight. Suddenly the swift ship overtook a cloud of birds. They were flying from Africa to Europe.

They were wise enough to take a lift. They settled on the funnels and the masts. Some of them were so wing-weary that they tumbled on the deck. Next morning they had all gone. They had taken their rest and then resumed their journey. They knew where they were going.

A hero like Hinkler is half a bird and half a man. He has the bird sense of direction, in addition to his scientific instruments and his maps. Flying seems to refine and aerate the brain. It brings into play latent and dormant powers of the intellect. If Hinkler had been a chauffeur he would never have been a winged victory.

The air is making men masters of their own mental and physical machinery. It is teaching them the highest qualities of self-control. It is giving them a new moral poise and rhythm. The airman can not be an eagle without being a man.

There is hardly a point of piloting in which Hinkler will not rank with the best of any country, but his outstanding qualities are endurance and persistence. Among British civilian pilots there are, perhaps, some half-dozen who are absolutely first-class in the matter of "hands" on the joystick. Probably the three names which occur first to the mind are Courtney, Broad and Hinkler.

As for high speed work, the last time that Great Britain entered civilian pilots for the Schneider Cup (in 1925, at Baltimore) our team consisted of Broad, Bland and Hinkler. Last year, when there was difficulty in finding a test pilot to take that very novel Schneider seaplane, the Crusader, off the water for the first time, Colonel Bristow sent for Hinkler, who, knowing that he risked his life, carried out the tests.

If one turns to cross-continent flying, every man in the street will know the two names Cobham and Hinkler. But, for long-distance work in small single-seaters Hinkler's name stands alone. That means that as a navigator he is almost as good as he is as a pilot.

All last summer Hinkler was banking after his native Australia. It is undoubtedly par excellence the flying country of the future. It may be doubted whether Australia yet has need for such a super-pilot as Hinkler, while Great Britain certainly does need him.

Class War

H. A. Fisher in the Contemporary Review (London): (Trotzky says that the struggle between the two classes is rapidly driving Britain to revolution). Trotzky takes hopes for realism. There are no two classes struggling to the death in Britain. We are far too intelligent and humorous a people to indulge in such forms of fanatical suicide. Moreover, the country is too prosperous. We pay our debts, we maintain our exchange. If some old industries show signs of decline, others are springing up to take their place. The Savings Bank returns do not indicate a society suffering from a mortal economic disease. Since the beginning of this century we have become a nation of investors, of men and women who stand to lose by listening to counsels of force. And so, should violence be resorted to, victory would not go to the secretaries of Communism.

It would seem from the reports that the proper spelling is "companionate marriage."

And These Were The People To Suggest "Down Arms"

CEREMONIAL OF WORLD'S LARGEST ARMY
Just a bit of the big parade of Russia's defenders. The soldiers of the Soviet's Red army were drawn up in Red square, in the shadow of the Kremlin, for final inspection by their chiefs.

Everyone Interested

Prince of Wales is Given Delicate Hint Suggesting Marriage

London.—The Evening Star diplomatically suggests marriage to the Prince of Wales in the following editorial:

"You will not get far without the help of the women," said the Prince of Wales. "With it you can do almost anything."

"We hope we will not be considered indelicate to point out that without that help the Prince himself has got as far as his 35th year nor, it will be conceded, has he fared so badly, so far. But, if in his state of bachelor loneliness, he has achieved so much, what might he have done had he that added advantage to which he pays such tribute. We have poetical authority for the rather contrary belief that, even to the steps of the Throne—he travels the fastest who ravel alone—but the Prince was on the steps of the Throne to start with, so the inferred handicap hardly applies.

"You will not get far without the help of the women." Out of his own mouth—out of his own tribute—it is a high compliment, but there is a higher one still which a bachelor prince could pay."

The Prince's tribute to the women was delivered in an address to a social organization.

A Good Reason.

Mr. Lamp—"Why don't you marry me, Miss Clock?"
Miss Clock—"I could never marry any one who goes out at night as much as you do!"

New Stamp Initiates Tale On Kings Head

Standerton, S. Af.—A certain South African woman was most indignant when she discovered that the new Union stamps no longer bear the head of King George. At first she refused to buy the new issue. She told the post officials that she did not want penny stamps bearing an old-fashioned ship in Table Bay—she wanted only those with the King's head on them.

The officials shrugged their shoulders, and finally she was forced to take the stamps, despite the old-fashioned ship. By way of protest, however, she had a die specially manufactured for herself and with this she presses the King's head on each envelope just next to the stamp before posting a letter.

Man Victoria Kissed In '63 Dies in Ulster

Ballymoney, Ireland.—Daniel McCoy, whose proudest boast was that he was kissed by Queen Victoria, is dead.

The Queen was inspecting the Sherwood Foresters Regiment in 1863, when she saw young McCoy, a trumpeter and not yet sixteen years old. Stooping, she gave the lad a motherly kiss, then said: "I think you are too young to be a soldier yet. It is at home with your mother you should be."

Chicagoism

Forum (New York): The lawlessness of Chicago and of the United States is partially explained by a lack, not of leaders, but of all desire to follow intelligent and noble leadership. All our standards, save the money standard, are thus being ruined. "Followership" is almost unknown in the land. . . . As a well-known writer has pointed out, there is a sort of Gresham's law of mental currency, by which good, well-considered opinion is being constantly driven out by that which is hasty, impulsive and bad. Our problem is to counter-act this tendency. Our problem is to establish the habit of following leaders who have decent and informed standards. Whether this can be done by grafting an aristocracy upon our democratic social substructure I do not attempt to say. The point is that if America is to avoid sinking into the mire of mediocrity, lawlessness, and crime which we may call "Chicagoism," followership must be established soon. Otherwise all nobility and all standards will go.

A Toy

As children that with lingering looks,
When the time ends for play
Put up their pretty picture-books
And tidy toys away.

So now, with your deep faith for guide,
We see the rubric run,
And reverently must lay aside
Your love and mine, dear one.

Yet ev'n as wistful girls and boys
At reading, writing, sums,
Plan ever and anon new joys
Ere the next playtime comes.

May we not warm our hearts with dream
And vision—maybe vain!
Through darkness catch the roseate gleam
Of dawn that breaks again?

—Dermot Preger in the Cambridge Review.

If the fuelless motor proves practical, the only thing needed to make the automobile complete would be a driverless back seat.

Found Gems Too Late

Ten-Year Limit Bars Frenchwoman From Recovering Necklace

Newspapers of Nice relate the story of a diamond necklace which having been buried in Russia in November, 1917, by a Mme. Giraud, was identified by her in a Nice jeweler's the other day.

She told the local police that she had purchased the necklace at Nice for 40,000 francs in 1905, and had taken it to Russia where her husband had business. When the Bolshevik revolution broke out she buried it, with other valuables, on her property, and left the country.

She accompanied the police to the jeweler's, where the price marked on the necklace was 500,000 francs. She is said to have identified it beyond question with the evidence submitted by the jeweler from whom she had purchased it in 1905. The other jeweler, on his side, proved his good faith with a record of the hands through which the necklace had passed since 1918.

So far as has been discovered under the French law, Mme. Giraud cannot recover her property. Abandoned property cannot be claimed after ten years' abandonment; stolen property cannot be recovered if the present possessor received it in good faith from a person who had no connection with the theft.

Help! Help!
Duckpin — "Spare me!"
Ball—No, no, I'm going to "strike" you!

The Occupation of Egypt

New Statesman (London): It is futile to lose our temper with the Nationalists, and to gird at them, as some of our newspapers are doing, for their "Oriental ingratitude." Of course, we have during the past half-century conferred great benefits on Egypt, and there are few Egyptians who do not appreciate our services. But the benefits were after all forced upon them, and for our own sake as well as theirs, as they know very well. And, as we know very well, peoples who are asking for freedom are not easily persuaded to accept prosperity in lieu of it.

Bootlegger Dupes Customs Officer

Changed Seats With Vancouver Pastor, Who Sat on the Whisky

Vancouver.—One sunny morning, not long ago, Lieut.-Col. G. O. Fallis, pastor of the Canadian Memorial Church in Vancouver, and instigator of International Good-will Day, boarded the Seattle train on his way to Bellingham.

Shortly before reaching the Customs at Blaine, a rather drowsy down-at-the-heel looking fellow, who occupied the seat across the aisle, enquired of the clergyman if he would be kind enough to exchange seats. "I have not been feeling well of late," said he, "and would like to take a sleep in the sun."

"By all means," replied Col. Fallis, who is intensely human and always ready to "serve." "Just roll up here and make yourself comfortable and if there is anything I can do for you, let me know," and without any intervention the exchange was executed, the clergyman occupying his time with a copy of the London Illustrated News, while his newly formed acquaintance developed his drowsiness into a well ordered snore.

A mile or two more of glittering steel and the Customs officer was seen ambling down the aisle.

"Good morning Col. Fallis. Going down to Bellingham?"

The man across the aisle pulled himself together, evidently wishing the crisis was over, as he glanced at the ever-observant eye of the examiner.

"No, sir," replied the man.

"Stand up," said the officer, then proceeded to search the seat.

Faking in his efforts, he passed on, assuring himself that all was well. Half an hour later the train pulled into a country station. "Excuse me," said the man across the aisle, as he bent forward and pulled from under the seat where Col. Fallis was sitting two bottles of Scotch.

Hello New York, Paris Speaking

Telephone Service Inaugurated by Engineers Who Spoke Across Ocean in 1915

New York.—The first words heard across the Atlantic Ocean have just been repeated here with the inauguration of commercial telephone service between the United States and Paris. "Good night, Shireene," said B. H. Webb as he sat before a telephone in the director's room of the American Telephone & Telegraph Co. here. And almost instantly, Col. M. E. Shireene, who, at the Eiffel Tower in 1915, had heard the first voice to span the Atlantic, replied from the Parisian end of the line.

The two engineers who participated in the first successful trans-Atlantic telephone experiments, with 18 others who took part in the pioneer work, were present at the inaugural of service between the United States and France.

W. S. Gifford, president of the American Telephone & Telegraph Company, and Maj.-Gen. J. J. Carty, vice-president, conversed with M. Maurice Bokosowski, French Minister of Commerce and Industry, and M. H. Milon, director of telephones of the French Ministry of Posts and Telegraphs.

Speaking to Mr. Gifford from Paris, Gen. John J. Pershing termed the new service as "instrumentality of peace." He referred to the new link between nations of the world as "a means of improving social relationship and developing a common economic and social viewpoint."

The Occupation of the Rhineland

G. E. R. Gedyse in Foreign Affairs (New York): It is all very pleasant in these days on the Rhine—no alarms or excursions on either side. But even if none ever recur, it will presumably dawn on somebody someday to enquire, *why* none? It would also be interesting to consider what chance there is, now, of dismemberment schemes have themselves been dismembered, of the French insisting on remaining on the Rhine were the British authorities to indicate that they had spent quite sufficient on this amusement and proposed, accompanied or not, to move this very year.

She—"I've forgotten more than you ever knew."
He—"I was wondering what was the matter with you."

THANKSGIVING

So far as we have observed or discovered, we Canadians are the only one of a family of nations which make up the British Empire that has established a National Thanksgiving Day. Our American cousins have set us a good example in that respect and the following of their example in regard to Thanksgiving is a bit of Americanization to which no good Canadian can raise objection.

It is a good thing for a Nation to be thankful, as it is for an individual. The cultivation of the thankful spirit is well worth while. Man to a great extent, is the architect of his own fortunes but there are circumstances and contributory factors without which failure might as easily be registered as success. The same is true of nations. If the hand of God is to be seen and recognized in the shaping of history, as is true, then the making of this Canada of ours, the endowing it with such illimitable riches, and the inheriting of it by the mere handful of nine millions of people, who constitute the Canadian Nation is something for which every Canadian worthy of the name should be deeply grateful to God.

We Canadians should be thankful for our mighty heritage, this Canada, for our membership in the community of nations known as the Commonwealth of British Nations; for our nearness to the Republic of United States which enables us to interpret the British people to the American, and vice versa, as well as to provide the world with the most outstanding example of two great peoples living side by side with unfortified boundaries in continuous peace; for our bountiful land; for our prospering people, and for the great vitality and the strength which are our portion as a by product of the wonderful climate we possess. So let us be thankful and rejoice.

THE ZEPPELIN MORAL

Crossing the Atlantic has become a matter of such frequent occurrence in these days that our pulses have been but slightly stirred by the feat of the Germans in bringing their monster Graf safely to this side of the ocean and safely taking it back. Yet it is an epoch making event and one fraught with deeper significance than almost any event of the past decade. Apart from the pleasure it will, or should give all of us to see our late enemies achieving things in the domain of peace, that happily, they could not in the region of war—if we are good sports, that is how we shall feel about it—the witnessing by the world at large of another triumph over the elements by man is something to cause general rejoicing and satisfaction.

— ARMISTICE DAY. — LEST WE FORGET

"Then pause you — each and all wherever you may be..... In silent tribute to the splendid dead. For you, in distant fields, their brave young lives were shed."

Once more on November 11th, we are asked to pause amid the rush of the day's duties, and observe the silence which commemorates a great sacrifice made on our behalf. What are the thoughts that come to our minds as we stand with bowed heads during those solemn moments. There are fathers and mothers who think of a little lad, of his dear boyish ways, of the day he marched away — "a man among men", of the gap in the family group, the lonely years, the longing to see their loved one who never comes home when the others gather beneath the family roof. Have we hearts quick with sympathy for those whose loved one sleeps in that lonely far off grave? What have we done for those who came back, maimed in body, yes, and in soul. Are we trying, as the years pass by, with every means in our power, to help any cause that has for its object world peace? Unless we have done all this and more, we are not worthy of our great dead. May this Armistice Day remind us that each one has a tribute to pay to the dead, and a debt to pay to the living which the passing years can never cancel, "Lest we forget."

"But what if yet the battle should be lost?"

They gave their all.
Lest heroes maimed and shattered by the strife

Stumble unheeded through the maze of life,
And still, within our borders, wide and fair,

Thousands lack food, and shelter, ing healing care
Lest crashing chariot wheels or Greed and Pride,

In that deep slumber trouble those who died,
Let us take care."

MRS. CAMPBELL McQUAT,
Provincial Convener on Canadianization and National Events, Quebec Women's Institutes.

Victoria Scene of Yuletide Festival

Empress Hotel, Victoria

"Who does not love the very name of 'Christmas', asks Dickens in 'The Christmas Carol' knowing well enough that there is no such person, and that if there were his punishment would probably be nothing less horrible than that which proved so effective in the case of the unpleasant Mr. Scrooge. And where, one may ask, is the proper Christmas spirit more truly observable and more thoroughly enjoyed than in England. Back in the dim middle ages Christmas was an English institution and it came down the centuries losing nothing of its charm although customs of celebration changed a little now and then as time went by. But Christmas remained English and is to-day as English as ever wherever English people are gathered.

Outside the British Isles there is no place so English as Victoria. The climate is English, better still its scenery is English, and best of all, its people are English. Great holly bushes "with red berries bright" grow in profusion, and English ivy enshrouds the walls of mansion and cottage—what better setting for English revels?

Victoria is this year going to celebrate Christmas in right good Christmas fashion. Old customs,

old carols, old music—a Christmas festival that will pull at the heart-strings of English people no matter how many years or generations they have been away from "Home". The celebration will last from Christmas to "Twelfth Night" and will center around the Empress Hotel as one of the musical and historical festivals that have been organized by the Canadian Pacific Railway.

Among the features of the Festival will be a presentation of "The Chester Mysteries", a nativity play that had its first performance at Chester Abbey, Christmas, 1328, just 600 years ago, when Edward III was on the throne, and about twenty-five years before the battle of Cressy. Christmas customs down through the ages to the time of Dickens will be observed in the costumes of their period and there will be a Christmas play based on Mr. Pickwick's famous Christmas Frolic at "Dingley Dell Farm". The celebration will wind up with a fancy dress ball, and as Victoria is Canada's most popular winter resort the event will be attended by people from all parts of this country and the western States.

CUSHING

Mr. and Mrs. R. D. Hartley spent Sunday here.

Messrs C. F. Watson and C. J. Hartley motored to Morin Heights last Sunday.

Mrs. Jas. Harcourt of New Glasgow spent the latter part of the week with her parents here.

Mr. Lawrence Warwick of Hanna, Alta., who was home for the funeral of his mother, the late Mrs. W. J. Warwick, of Mabel, was the guest of his Aunt, Mrs. Geo. Nicholls on Saturday.

Dr. H. B. Cushing accompanied by Mr. Huntley Davis, motored up from the city and visited his property here on Sunday.

Mrs. Usher of Pte. Fortune and Miss Lois Kentley were guests of Mrs. Jas. Watson and called on other friends last Friday.

Mr. W. Burke and family moved last week from Cushing to the farm of the late Theo. Gray in Grenville Bay, the property which he occupied here having been purchased by Mr. Lemay of Staynerville, who is moving in this week.

As in all Churches throughout the Dominion, an Armistice Service will be held at St. Mungo's United Church on Sunday next, commencing at 10.50 a.m. and the program will be in accordance with that specially arranged for this service, by those in charge.

Rev. F. L. and Mrs. Jobb, of St. Mungo's and Miss Muriel, were in Grenville on Saturday, where Mr. Jobb officiated at the funeral of the late Alex. Steele, son of Mr. Chas. Steele, whose death occurred somewhat suddenly last week. The deceased was a promising lad of 15 and his untimely passing is a cause of much regret.

A well spent and useful life came to an end last week when they passed away on Friday at Dr. Smith's Hospital in Hawkesbury, Mr. Albert Viau, of Greeces' Point, after a long and very painful illness. The deceased would have reached his sixtieth birthday in a few days and had spent practically all his life in this locality, where besides his faithful and devoted wife, he leaves many friends who sincerely mourn him. The funeral which was held on Monday was attended by all his neighbors, regardless of race or creed. Service at St. Philippe Church was conducted by Rev. Mr. Bazinet and the remains were laid to rest in the adjoining cemetery.

TOY SHOP FOR LACHUTE

The Boy Scout of to-day, in his neat and workmanlike uniform, is familiar to all of us but, unless we are directly interested, few of us know the amount of good they do in the community. Their motto is, "BE PREPARED" and one of their unwritten laws is "Do a good turn every day". To most of us Christmas seems a long way ahead, but the boys of the 1st Lachute Troop are trying to live up to their motto in preparing now to open a Toy Repair Shop. These boys are principally intended for distribution amongst children of the town and district who in the usual run of things are not overburdened with presents and good times at Christmas. The surplus, if any, will be made up into parcels and mailed to families of new settlers who are spending their first Christmas in Canada.

Last year the Boy Scouts in Lachute took it upon themselves to perform a "Christmas Good Turn" by collecting discarded clothes, books and toys which were then made up into parcels and distributed amongst families in the town and district. This year they are carrying on with the good work but intend that it shall be done on a somewhat larger scale. In this they need the help of everyone but the aid they need is such that in helping them you will be helping yourselves to do a "Good Turn".

Now, good folks, let us help them with a will by gathering up all the discarded toys we have. If the paint is all rubbed off or if they are broken and seemingly beyond repair, do not hesitate but pack them up as the job of the Toy Repair Shop is to repair these toys. Discarded clothing and books for the children will also be gladly received.

Christmas will be here in less than seven weeks and, as you know, it takes time to prepare these things properly, so do not delay but get them ready now.

If you will communicate with either C. L. Duncan, P. O. Box 201, Lachute, (Phone No. 57) or the Assistant Scoutmaster, Mr. A. G. Leggett, Lachute Mills, (Phone No. 226) they will be only too pleased to send one of the boys for your parcel. To make it still more convenient, you may leave your parcels at Mr. Alex. Bradford's Bicycle Store, (near the Fire Hall) on Main Street.

BROWNSBURG

Mrs. W. J. Fletcher is a patient in the Montreal General Hospital, where she is receiving treatment.

Miss Agnes Minett of Montreal, spent the week-end the guest of Miss C. V. Moncrieff of Edina.

Mr. and Mrs. William Cameron motored to Montreal on Saturday, spending the week-end with friends. On their return they were accompanied by Mr. and Mrs. Donald of Lakeside.

ST. ANDREWS EAST.

Miss Jennie Dewar was in town last week.

Mrs. G. Jeffrey is in Montreal for a couple of weeks.

Miss Nora Christie is visiting Miss Evelyn Wales this week.

Mr. Austin Willett of Macdonald College, was at his home here for a few days.

Mrs. D. Bishop and Mrs. O. S. Wales were visiting friends in Montreal on Thursday.

Among the arrivals from Montreal recently were Dr. R. Simpson, Mr. and Mrs. Cowan and daughter.

Rev. Mr. Windsor is home and we are glad to report that he was able to be in the pulpit on Sunday last.

The Rev. Dr. Ballantyne and Mrs. Ballantyne arrived in St. Andrews last week and will soon be settled in their new home. We welcome them as permanent residents of our community. Dr. Ballantyne has accepted a call to the Presbyterian Church in St. Andrews.

On Friday evening, Nov. 2nd., Prof. McCullagh of McGill University, delivered an interesting lecture in the Presbyterian Church Hall, the first of the Lyceum Lectures to be given this winter.

His Subject was, "A Bicycle Tour through France, Switzerland and the Battlefields." The views exhibited were particularly attractive and Prof. McCullagh's descriptions racy and instructive. The lecture was thoroughly enjoyed by school pupils and grown up people alike.

LAKEFIELD

Lest it be thought that life here is entirely extinct, the W. A. of Trinity Church will provide a Chicken Supper in Gibb Hall on Monday, November 12th at 7 p.m.

On Sunday Armistice Day, there will be service with Special Sermon at Shrewsbury at 10.30 a.m. and at Lakefield at 2.30 p.m. This being a day of General Thanksgiving, an effort should be made by everyone to attend these services.

Summertime, summer folk, busy summer life now being but memories there remains with us the reality of "quietness that can be felt." The men of "dynamic" importance have left what perhaps is more lacking than "footprints on the sands" good roads. There is almost, we suppose, really in some parts, "concrete evidence" of their having been here.

GRENVILLE

Mr. Weymouth P. Gaudry of Greenfield Park visited his mother here on Saturday last.

Mrs. T. Grey spent a few days with her brother, Mr. T. Cousins and his family during the past week.

Mr. Alex McPhee of Outremont, spent a couple of days with his cousins Mr. and Mrs. Steele recently.

We extend our heart-felt sympathy to the family of the late Mrs. W. J. Warwick in their loss of a devoted mother. She will be sadly missed in the Baptist Church of which she was a faithful and earnest worker.

Mrs. W. Eaton and Miss E. Steele of Montreal, are spending a few days with their sister Mrs. J. Gauley, and during their stay attended the funeral of their nephew, the late Alex. Steele.

The death of Alexander Gordon Steele, only son of Mr. and Mrs. C. R. Steele of Grenville, which occurred at Dr. White's Hospital, Hawkesbury, on Thursday November 1st, 1928, removes one of Grenville's bright and promising boys. Deceased young man was fifteen years of age on July 21st, and was in the Second Form of the Hawkesbury High School.

The funeral was held on Saturday afternoon Nov. 3rd., in the United Church Grenville, and was conducted by the Rev. F. L. Jobb of Cushing and Rev. J. Irving of St. Matthew's Church and was very largely attended.

Beautiful flowers were sent by the teacher and pupils of Grenville Village School, which Alex. had attended for six years. Flowers were also received from the Staff and Pupils of Hawkesbury High School and from other friends.

He will be sadly missed, not only by his parents, sister and other relatives, but by a host of friends, both young and old, for owing to his kind cheerful and happy disposition, he was beloved by all.

After the sermon, Miss Muriel Jobb sang very sweetly, "My Lord will be there." The remains were buried in Calumet Cemetery. May God speak Peace to his parents and only sister Lillian.

The Family Herald and Weekly Star of Montreal with its wonderful improvements is recognised as the greatest money maker for farmers in Canada, while its magazine section is a gem unrivalled.

First Aid Champions of C.P.R. Lines

The Shaughnessy grand challenge cup, emblematic of the First Aid Championship for all lines of the Canadian Pacific Railway Company was carried off recently by the Toronto Freight Offices in competition with the Western Shops of Winnipeg, holders of the western lines cup. The competition took place at the Place Viger Hotel in Montreal recently between the two teams who were declared winners of eastern and western lines competitions held prior to the final tests. The winning team secured a total of 419 points out of a possible 610, while the Winnipeg team were 16 points behind. The competitions were in accordance with the St. John Ambulance Association requirements.

In addition to the all lines championship, the Toronto Freight Offices team was winner this year of the Wallace Nesbitt Cup won in competition with over 40 teams from all railroad organizations in Canada and the states of Maine and Michigan.

COAL COKE AND WOOD

Jack Frost & Company
COAL COKE AND WOOD

Your Fuel bills tell the story

THE story of wasted fuel—of the heat that escapes through the roofs of non-insulated houses—is told to ninety per cent of Canadian home owners every time they open a coal bill. This leakage amounts to one ton of coal in every three, or a waste of nearly thirty-five per cent in the cash you pay for your fuel.

TEN/TEST not only prevents heat escape, it shuts out forever cold, dampness and draughts, thus protecting the health of your family all winter long.

From the standpoint of health, fuel economy, good building practice, and year round comfort, TEN/TEST is a profitable investment.

FOR YOUR INFORMATION

You will note that Mr. John Brown (representing a real home owner) has saved the tidy sum of \$60.52 on his winter coal. This is a dividend that he will receive each year for his investment in TEN/TEST Insulating Building Board.

INTERFERING WITH NATURE

BY JACK MINER

In glancing over the many articles written on the crow in our Canadian papers, I notice several writers fall back to this old worn-out argument, "interfering with the balance of Nature." Now, dear readers, I would like a full explanation of the meaning. Does it really mean that no person should attempt to assist Nature? If that is what you are trying to tell me, let me kindly say you are wrong, for I have tested it out and know if man will take God at His promise and work in harmony with Him that man can even change the migrating route of the fowls of the air.

Now remember, I only have an A. B. C. Sunday school education, but there are few of His lovely promises I have been privileged to test out and I know they are true. For illustration, I ask you to read Genesis 1:21-26 and 28 when He said let man have dominion over all. Could anything be written plainer. Last summer our Nettle raised sixty bred-to-lay Plymouth Rocks. We killed and ate twenty-two of the twenty-five roosters. The pullets started laying in October. Now, if we had left the twenty-five cockerels with the thirty-five pullets, would we have had eggs all winter? Don't forget the fowls of the air are all ours and they will come to us for our assistance and protection.

Forty-eight years ago this spring our family moved here on the farm that was then all woods, but on our arrival we were terrorized by the rattlesnake stories we heard, and really I was expecting to see snakes as large as clothes props that would strike you at a distance of ten or fifteen feet away and then all was over except a brief report in the weekly town paper—"Those who knew him best, loved him most," and so forth. Well, in a few months I got well acquainted with these rattlers, but, believe me, they were only a little larger than our largest garter snakes and could only strike about a foot or eighteen inches. I have killed as high as six on one Sunday. In fact, I would hunt for hours to find a rattler just to tease him and get him striking a stick. But in a few short years the danger was all over, for, where the snakes were, grew the fields of waving wheat and corn, but mind you, in order to do this we had to "interfere with Nature." Which was for the best for humanity—a rattlesnake jungle or a productive grain field?

My esteemed friend, Mr. Thos. Baty of London, Ontario, kindly says: "If Jack ever had a pet crow, he never would kill it." Really this makes me laugh. Say, I wonder if there is a man in America who has gathered up more pets from the woods than I have. Crows, crows, why bless your life, I have had them for the dozens and I will admit they are just as cute as they are black. I once had one that would say "Look out" so plain and sharp that he would cause you to inch, but I never kept but one to be over a year old. Then he, like the rest, died guilty of murder in the first degree.

In 1898 I enclosed four acres with a wire fence seven feet high. There I raised English and ringneck pheasants for profit. This pheasantry was right alongside of my brick and drain tile manufacturing plant. I could watch my machinery and overlook the pheasantry all from the same spot. In this way I made my hobby more than self-sustaining and gathered stores of knowledge about the enemies of our birds, and let me say to any young man, breeding game birds for profit is a lovable occupation and there is good money in it. The seven-foot fence is not necessary. All that is required is a dog-proof fence, but remember, unless you educate yourself how to destroy their many enemies, you had better give up the job about two weeks before you start, for this little innocent-looking weasel that is no larger than a Northern Ontario chipmunk will kill from twenty to thirty of your baby pheasants in one night and crawl through one-inch-mesh wire netting to do it, but remember, you are "interfering with the balance of Nature" if you kill him.

I believe the indoor naturalist calls him the Mouse Weasel because the majority of his food is mice. Crows must be checked or they will steal every egg laid unless your brood pens are under netting. But, after the young pheasants are hatched, I found the hawks and weasels their worst enemy. Fifty rods due north of this

engine room door is an elm tree and morning after morning have I seen a crow perched in the top watching my neighbor's turkey hen come through the line fence just ninety rods east of the tree. Mr. Crow would sit and watch, and the very minute the turkey came out of the fence row and started back toward home, he would fly straight over and get the egg she had laid. This could all be seen with my field glasses. Smart? I should say so. They are the shrewdest thieves of the bird family, but you say to kill one you are "interfering with the balance of Nature" for God put them here. Yes, I say, God also put the bedbug here, but He gave man dominion over them and the present generation wouldn't hardly know one if they saw it. Crows! God did not put them here to control our poultry, nor our song, insectivorous and game birds. He did not even allow them the privilege of controlling themselves. He left all of this for man to do. Please think that over and look up what he says regarding this point. And, as for the grasshoppers the crows eat, this turkey hen's family would condense all them into a Thanksgiving dinner or into twenty-five or fifty cents a pound, just as you choose.

Now I am not contradicting a word which has been said about the crows eating a few wire worms and grubs and so forth, but here is what I know about it. If he can find them, he will rob at least one hundred of our more desirable birds' nests in order to raise his family or four or five, while, if any one of those murdered song and insectivorous birds were left to mature, they would do twice as much good than a crow ever did.

Now if a man wants to make money that man must study money. The prospector is more apt to find earthly gold than the astronomer. In other words, if a man concentrates on one line he is more apt to catch something on that one hook.

My friend, Mr. Baty, says if I had had a pet crow to study their habits I would know more about them. Let me reply to my friend and kindly say, when he has studied them enough to catch them by the thousands he will know more about them. Personally I have studied birds more than I have my financial obligations, and I am glad of it. They have brought me closer to God and man. If my life's study hasn't taught me something about the habits of the crow, how did I catch five hundred and ten of those organized murderers at one catch? Will you please think that over. I do wish there was nothing but good in the ways of all birds for I don't want to kill any of them, but how can I be humane and protect a baby murderer?

In the spring of 1914 I drove to Point Pelee, a distance of about fifteen miles, where my intimate friend, Mr. Forest H. Conover, and I pulled three hundred and sixty little red cedar seedlings out of the sand. There were none of them over a foot in height. I brought them home and planted them in the clay on May 15, 1914. I cultivated them for five years and today fully ninety-five per cent. of the mare over twelve foot high and has been bearing fruit for the last three or four years. Now, isn't that "interfering with Nature"? This is where the five robbers that wintered here got their food and, oh say, this winter we have had a Cardinal added to the songsters and there hasn't been a day but what he has sung for me, and he has fairly set me Cardinal crazy or wise and is going to be the cause of more of my "interfering with Nature," for I am going to import some of these winter and summer singers. I am going to put a pair in each cage. Then, in March, I will let the male bird out, but will feed him on the outside of the cage. Here he will stay, just flitting and singing among the trees, but will not go far from his mate who is still in captivity. Then, after he has got well acquainted with the whole outside proposition, I will let her out and in this way I expect to have the whole place Cardinal with song.

Dear readers, don't let me try it first. Jump in ahead of me. It can be done. Yes, if you are privileged to live in the country, you can make your home into a little earthly heaven by "interfering with the balance of Nature," as you call it, but as I term it, "assisting Nature," for you can get seedling trees from our government forestry departments, free of

England Makes Americas Bells

A MELODIOUS GIANT

It was cast at Croydon recently for Riverside Church, New York, weighs 19 tons and is the largest bell in the world.

The Crocuses That Wore Nightcaps

You can't blame the crocuses for coming up too soon. It was really Beryl's fault. One day Beryl ran a little errand for Jerry the Gardener, and the next time Jerry passed by, he popped in and left six crocus bulbs for Beryl, and told her exactly what kind of a place to plant them in, and how deep to put them, and what kind of soil they liked, and everything else he could think of.

When Jerry had gone, Beryl walked round the garden three times, and each time she stopped right underneath her bedroom window and said: "This is the best place to plant them, where I can pop my head out every morning and see if they are coming up. This is where I will plant them."

A Snug Corner.

Now it happened that the stone chimney from the open fireplace in the dining-room was right beside the crocus bulbs, so, although it was a very cold winter, the little crocuses were just as snug as could be, with the warm chimney so close to them.

And then, very early in the spring, long before anybody expected it, the weather suddenly became very mild for a few days, and the snow all melted away, and the ice on the pond turned soft and slushy, and the sun shone all day long. And the little drops of melted snow that trickled down past

the crocus bulbs seemed to say: "Spring has come! Spring has come! Wake up! Spring has come!"

And the crocus bulbs woke up, and started pushing their little leaves up through the ground to see if it were really true, and a morning or two later a little sparrow in the apple tree nearly fell off his perch with surprise, and had to blink his eyes three times before he could really believe that six little crocuses were peeping up at him.

"Tweet! Tweet-tweet!" he said. "Tweet-tweet-tweet-tweet!" and he tweeted so loudly in his surprise that he woke Beryl, and when Beryl peeped out of the window and saw the six little green specks down below she could hardly wait to get her clothes on to go out and see if they really were the crocuses. Then off she skipped to tell Jerry the Gardener.

Jerry's Advice.

But Jerry shook his head. "They came up too soon!" he said. "The frost will nip them!"

"But I don't want the frost to nip them!" said Beryl.

"Well, then," replied Jerry, after rubbing his chin and thinking seriously for a moment, "Well, then, you must make some nightcaps for them!"

"Nightcaps!" laughed Beryl. "Nightcaps—for crocuses!"

"Certainly," replied Jerry, "to keep them warm at night. See, I'll show you. You get a piece of paper, and twirl it into a cone—"

"Why, that's a dunce's cap!" interrupted Beryl.

"That's a nightcap," said Jerry.

"You twirl it into a cone, and you twist the tip tightly so that it won't come undone, and every night you must pop one over each crocus to keep it cosy and warm and keep the frost away, and every morning you must take the nightcaps off, so that the crocuses may get the sun."

And that is just what Beryl did. And soon the tiny flower buds began to come, and they got bigger, and bigger, and bigger, until one morning when Beryl took their nightcaps off, there were six beautiful crocus blooms looking right up at her.

Every night Beryl popped their nightcaps on, and every morning she took the nightcaps off again, and though the weather turned frosty again, the crocus blooms lasted such a long time, for the frost couldn't nip them at all.—Christian Science Monitor.

Dr. Paul R. Hoyt, who discovered that the world weighed 6,000,000,000,000,000,000 tons, is said to be attempting a recalculation this year. The skeptical ones are at liberty to weigh it themselves.

Business depression cycles will go when the wheels of industry turn steadily.

Jack Miner And the Swans

Kingsville Naturalist Offers Help to Wandering Birds

J. R. Williams, Secretary of the Game Protective Association of Niagara Falls, Ont., notified Jack Miner that 400 swans went over Niagara Falls recently, one half being killed outright and the balance being wounded at the foot of the falls between the rapids and the whirlpool.

Jack Miner immediately wired Ottawa officials requesting them to wire authorities at Niagara Falls to catch all wounded and live birds which are in this death-trap, and express same to him and he would doctor their broken wings and legs and place them on his sanctuary at Kingsville.

Came to Kingsville

For the last five years the swans, numbering many thousands, have come to the lake shore at Kingsville instead of to Niagara Falls. But as the ice was slow in leaving the shore at Kingsville and the weather in North Carolina was so warm, they were compelled to leave their winter home early, and the only open water they could find along the Great Lakes was above the falls at Niagara. There they alighted, only to drift down the river with the current, and during the night and heavy fog drifted over the falls, taking several hundred feet of a drop, which killed or crippled them.

Jack has wired the authorities at Niagara suggesting they discharge firearms in the air above the falls and keep the birds from alighting on the river, only to meet their death. There is open water at Kingsville now, and between 500 and 1,000 have arrived there. It is hoped by discharging firearms in the air above the falls that other flocks will head toward Kingsville, where a Mounted Police officer is on duty night and day keeping birds from being molested. This protection is provided for in the Migratory Bird Treaty Act.

No Deaths For Years

"Fifteen years ago this species of swan was nearly exterminated, but by being given absolute protection, and by Jack Miner attracting them to Kingsville away from this Niagara death-trap, there has been until now for the last five years practically none go over the falls. Last spring it was estimated there were between 4,000 and 5,000 in the vicinity of Kingsville, which were cared for by a Dominion officer and Jack Miner.

German Donkey Notifies Engineer Where to Stop

Berlin.—Railway officials employed at the little station of Cochem in the Rhineland, or on jerk-water trains stopping there, have given up an unequal battle with a donkey.

This donkey is owned by the local milk dealers' association and has the important mission of pulling the cart with the milk intended for shipment to the station. He has taken it into his head, however, to stop at a certain point alongside the track and to insist that the baggage car must come to a halt there. Attempts to get him to move toward the baggage car in case it was carried a bit beyond him proved futile. He was beaten, tickled, the hose was turned on him—in vain. He would not budge.

The engineers have been instructed to humor the beast and bring the milk car exactly where the donkey decrees that it shall stop.

Wall Street's Hold on the Empire

London Referee (Cons.): The rapid financial penetration of Canada (by the United States) has been made possible by reason of the uniformity of United States and Canadian traditions, national necessities, geographical position, and language. Those factors have always existed. The germ of Empire disruption has always resided therein. . . . And now, when the danger to Empire unity is realized, our Statesmen are falling into the error of believing that these permanent and natural liabilities can be counterbalanced by sentimental rhetoric and preferential markets. . . . They have replied to Wall Street's powerful attacks upon the body and soul of the Empire with such unutterably silly slogans as "Eat Canadian apples." . . . An apple a day will not keep Wall Street away, nor will it keep the Dominion of Canada within the Empire. . . .

S'MATTER POP—By Payne

Smooth Stuff.

Judgment Refuses Copyright To Advertising Agents' Copy

Mr. Justice Astbury, After Four-Day Hearing, Definitely Decided in Favor of Advertiser Against Agency Which Claimed Ownership

London.—A case of great importance to advertisers, advertising agents, and publishers has just been heard in the chancery division of the High Court of Justice. It concerned the point, which apparently had not been raised before in British law, whether copyright in an advertisement prepared by an advertising agency remained the property of the agency or was the property of its client, the advertiser.

The case in question was complicated and somewhat obscure, but the final decision of Mr. Justice Astbury, after a four-days' hearing, was definitely in favor of the client and against the agent, who had brought the action in the endeavor to obtain an injunction restraining both the advertiser and one of the London newspapers from using an advertisement the agent claimed to have prepared.

The agent had prepared an advertisement which his client had inserted in one of the London dailies and on which the agent received his usual commission. Subsequently, the client caused the advertisement to be inserted in another paper, acting directly and without the services of the agent. At this point the agent applied for an injunction prohibiting the further use of the advertisement, on the ground that it was a literary work and as such came within the Copyright Act, under which title would remain in the author, who appeared as plaintiff.

The decision held that no copyright existed so far as the agent was concerned, and that in employing the agent to prepare the advertisement, the advertiser and the agent had, in

Great "Hopper" Plague Over New South Wales

London.—An "Evening News" dispatch from Sydney says the approach of a great plague of grasshoppers is reported from southern New South Wales. The advance guard of the insects was described as twenty miles wide, behind which are swarms extending ten miles, rapidly consuming what was an abundant grass crop. Fences in the area are draped with thousands of insects, while motorists passing through it reported that their radiators were clogged and their windshields covered.

effect, contracted themselves out of the copyright Act. It further held that the agent's interest in the advertisement in question only existed so long as the advertiser continued to use the agent's services. As no contract existed by which the advertiser was bound to continue to use these services, and no copyright as applying to original literary work existed, the agent's application for an injunction against both his former client and the newspaper must fail.

It is assumed that the points of contention in the case can in future be clearly covered in the written agreement between agencies and clients, but in view of the delicate personal relations existing between such parties and of the fact that many firms frequently change their agents, the prospect is not a very pleasant one for the agencies.

Heavy Weather

SEAS ROUTED AUTO PASSENGERS

So high did the waves rise recently at Durban, South Africa, that passengers in passing motor cars were forced to abandon their vehicles and take to flight. Huge sea broke over the promenade.

Abd el Krim Passes Long Days As Exile Cultivating Garden

Ex-Sultan of Riff, Who Led Tribesmen in Revolt, Enjoys Placid Existence

Abd el Krim, onetime master of the Riff and the man whose hardy mountaineer tribesmen reached the very gates of Fez before they were hurled back by the French in one of the fiercest series of engagements since the World War, says "The London Daily Mail," is supporting his banishment at Saint Denis, in the island of Reunion, in the Indian Ocean, with true Oriental patience.

"The Sultan of the Riff" took with him only two wives out of his numerous harem. They were his favorites, Fatima and Aicha. His other companions in exile are his brother, Si Mohammed, and his uncle Abdeslem, his mother and his sisters and the families of his brother and his uncle. During the long voyage from Casablanca, the chief port of Morocco, to Reunion, a son was born to him, so that he now has three sons.

Abel el Krim's brother discarded his Moorish attire as soon as the ship reached Marseilles, but Abd el Krim himself did not adopt European clothing until he reached Reunion. He is living in a country house rented specially to lodge him, and which has been somewhat hastily dubbed "the Chateau de Maurange." In reality the house has nothing of a castle about it, but consists of only a ground floor and a first floor, with a vegetable garden, an orchard and a meadow adjoining.

His first care was to furnish his new home as comfortably as possible and set his wives and his family at their ease. When he left Morocco he knew only the rudiments of the French language, but he has set himself to study it deeply, and to-day he speaks it as fluently as his brother, who is renowned as a good French scholar.

Abd el Krim's two elder children at-

Runner Insures Legs For \$50,000

Galt, Ont.—Cliff Bricker of Galt values his legs. One of Canada's chief hopes in the marathon race at the Olympics this year, Bricker has taken out a \$50,000 insurance policy on his limbs as a precautionary measure. The policy covers Bricker for the loss of use of his feet, legs, knees or toes as well as in the event of amputation of any of these parts.

tend the local college every day. They speak the Chleuh dialect at home, but the rest of the time they converse fluently in French with their French playmates.

But though Abd el Krim now dresses in European clothes, he continues to observe the customs of his country, and the fullest freedom is allowed him in this respect. He has made the acquaintance of a large number of people on the island and he often passes long hours with his friends, the most intimate of whom is the lieutenant of gendarmes.

The former Riff chieftain spends a great deal of his time cultivating his garden, which he is doing with no little success. His two wives, his mother and his two sisters take frequent walks in the country, but always dressed in their native costumes.

Teacher—"Tommy, you've not done a stroke of work this morning, and I've told you again and again that the devil finds work for idle hands to do." Tommy—"Yes'm." Teacher—"Now take your copybook and write that out 20 times."

Duchess Honors Irish Guards and St. Patrick

DUCHESS OF YORK PRESENTS SHAMROCKS TO GUARDS ON ST. PATRICK'S DAY
The Duchess of York presented shamrocks to the First Battalion of the Irish Guards at Chelsea barracks on St. Patrick's Day. This illustration shows the Duchess of York inspecting the Guards before the presentation.

Empire Shopping Week in Canada Canada Produced is Empire Produced

New Empire Booster is No New Method to Interest British in the Empire's Products During Week of April 21st to 28th Inclusive

ALL TO TAKE PART

The Executive Committee of Empire Shopping Week in Canada holds strongly to the view that the type of civilization and its promise of development as shown in countries of British Empire, is one that Canadians all desire to encourage for the sake of the present and the future generations. All this, it is conceived, is intimately bound up with the economic and business side of affairs that play so great a part in the daily lives of so many Canadian citizens.

Empire Shopping Weeks are not a novelty. They have been tried with great success in other parts of the Empire, notably in Australia, British West Indies and in Great Britain. These weeks enjoy the cordial approval and co-operation of the Empire Marketing Board, now doing such valuable work in Great Britain and other parts of the Empire. The underlying principle on which the EMPIRE SHOPPING WEEK IN CANADA will operate is the same as that in force in Empire Marketing Board activities. One main thought steadily kept in mind is that a natural first preference be given to goods that are the products of the country in which the week is held, other Empire products receiving the next preference. Produced in Canada is produced in the Empire.

Provincial and local committees are being formed throughout Canada including local representatives of the nine national organizations already interested through the Advisory Council and many other public spirited bodies.

The Mayor of each town in Canada has been invited by Hon. James Macleod, Honorary President of the Council, to take a leading part in the local movement.

The formation of local committees is thus a part of the approved general plan.

The method adopted and approved by the Executive Committee to start Canadian Chamber of Commerce, whose President is on the Advisory Council, along with eight other Presidents of national organizations, and which is represented on the Executive Committee and the Finance Committee of Empire Shopping Week in Canada, outline the Shopping Week movement and organization to all Boards of Trade and Chambers of

Commerce in Canada, and mention a few things that have been carried out by local committees in Empire Shopping Weeks elsewhere.

The last meeting of the Executive Committee authorized the Honorary Secretary to get in direct touch with the local Boards of Trade and Chambers of Commerce with respect to the weight given to activity of local committees and local papers in considering the extent of space to be used in newspapers and other publications for general advertising.

It may, perhaps, be interesting to consider what is being done elsewhere in Canada. Within two weeks of the first notice being sent, the following towns and cities have actually formed local committees, or have definitely taken steps to do so.—Winnipeg, Moose Jaw, Medicine Hat, Amherst, Vancouver, Halifax, Brockville, Hamilton, Trail, B.C., St. Catharines, Prince Rupert, Brampton, North Bay, Grenfell, Sask., Edmonton, Victoria, Belleville, Prince Albert, Fort William, Quebec, Toronto, Calgary and Montreal.

There is much more in this than the effort to sell goods at retail. Many people think there is scarcely time to do all that should be done locally even with the beginning made immediately. The local publicity gained by the organization of a representative local committee would be the most effective means of reminding manufacturers of their obligation to subscribe, which forms an added reason for acting promptly.

Your Mayor or Reeve has an invitation from the Honorary President to take part in your local movement. Half a dozen or more local branches of National organizations, and a number of other local organizations, are ready and waiting the call from your organization to whom was entrusted the leadership in the community effort.

The General Executive Committee is composed of men acting in a representative capacity representing their national organization on the Executive Committee specially selected from the whole group of national organizations whose Presidents form the Advisory Council of the organization.

They have approved of the wording and design of electros for newspaper use, of a broadside to the retailer, tell-

ing him the full story, and of show cards and window streamers in liberal quantities for distribution by local committees where they desire to do so.

They will have to consider in the near future the question of the copy that will appear in the newspapers which is an important question demanding the very best thought and most serious consideration. Full consideration with respect to local newspaper space will be given in proportion to the activity and interest displayed locally by the committee and newspapers.

These are simply a few out of the host of national things that the Executive Committee must deal with.

Obviously the General Executive Committee, through the necessity of retaining constantly in their minds the national point of view and national questions, with the best will in the world towards individual localities, cannot undertake definite personal activities on local committees and this outline clearly shows that every dollar from general subscribers will be required for general purposes which are all to help you.

Devolvement of duties had to be worked out. For instance, the Canadian Manufacturers' Association undertook the distribution of the booklets to Canadian manufacturers, the Department of Overseas Trade undertook their distribution to other parts of the Empire, the Retail Merchants Association interested their provincial divisions and local organizations, as did also the Canadian Manufacturers' Association for local purposes. The other national organizations are all doing their part in keeping their members informed and serving the general interest in many other ways.

The development of local committees can all the very important purpose, in which your locality should be taking a lead to make Empire Shopping Week the most stirring event that has happened since the war.

Local Committee activities take the form of making sure that departmental stores and retail stores are definitely co-operating to put on a show during Empire Shopping Week, 21st to 28th of April, arranging for possible municipal co-operation, welcoming the Mayor who has been invited to participate by the Honorary President, or welcoming any representative delegated by him. There are many other ideas such as brief addresses over the radio, cooperation with motion picture houses and all sorts of other features that will help to interest the general public in the movement and provide the small funds necessary for carrying on local work.

This method gives full scope for the use and development of individual initiative in each place which is of the utmost value in devising plans that suit the particular locality and

Ring Your Bell

"I don't need to advertise: I have been in business in this town for 30 years. Every man, woman and child here knows where I am and what I sell." The advertising salesman looked across the street and saw a church. He asked how long it had been built. The storekeeper replied that it had been there for half a century. "And yet they ring the church bell every Sunday morning," the advertising man remarked.

enable local committees to achieve splendid advance publicity.

The General Executive Committee is arranging for the supply of show cards and window streamers, stickers for use on stationery, electros for newspaper publishers use, a considerable supply of posters and the general display advertising along inspirational and economic lines. The Executive Committee will gladly welcome news of your activities, ideas and suggestions that may be distributed for use in other places.

Under these exceptional auspices Empire Shopping Week in Canada is certain to be a tremendous success. It will do a great work in cementing the bonds of Empire anew and will give Canadians a closer and more interesting "close-up" of The Empire as it is—vast, far-reaching and firmly knit within itself, a great power for good in the world to-day.

Canada to Open Ships-to-Cities Air Mail Line

Planes Will Meet Liners on Arrival, Then Speed to Montreal and Toronto

May Link Winnipeg in 1929 Flyers Effective in Opening Northwest Territory

Montreal.—Plans have been completed by the Canadian Post Office Department for an extension of the air mail service connecting large cities, such as Montreal and Toronto, with the first land stop of trans-Atlantic liners. The winter tests have been proceeding for air mail service from St. John's and Halifax to Montreal. Last fall service was successfully maintained from St. John and Halifax to Montreal and between Rimouski and Montreal. The latter service is to be resumed and extended down the north shore of the St. Lawrence to Murray Bay and Anticosti Island.

A more important extension is to be inaugurated with the carriage of mail to and from ocean liners between Rimouski and Montreal and Toronto. The contract for the service to Toronto is to be awarded in the near future. It will give Toronto quick delivery of letter mail to and from Europe. If the Toronto service proves successful, in another year an extension of it as far west as Winnipeg will be made.

This last step, if it can be achieved, will go far toward establishing a regular transcontinental airway, across Canada. The actual need for such an airway at the present time is doubted by some business men who have given their unqualified support to the development of air lines covering territory north and south of the transcontinental railway system.

The airplanes have proved an effective instrument in opening up territory in the northwest of Canada. The air operations through this district, which presented many handicaps to the pilot, and where forced landings were extremely dangerous, have been fairly successful.

The Western Canada Airways operates a regular service from Winnipeg into the mining districts to the north. A fleet of Fokker Universal planes, delivered to the Winnipeg base this winter by Bernt Balchen, now maintains a regular service into this district.

British Budget Surplus Shown

London, April 1.—The Chancellor of the exchequer Saturday made good the prediction of Winston Churchill on March 23 that the budget would show a surplus for the first time in three years. It announced that for the fiscal year ended today there was a surplus of £4,239,124. Total revenue was £842,824,465, and expenditures were £838,585,341.

New Type Fast Tanks

THE WHIPPETS ON PARADE
This isn't any tin-pan parade. It is the "march past" of the speedster model tanks which was an impressive feature of the military display at Tallinn.

She—"One doctor claims that love is a disease."
He—"Thank goodness, I haven't been vaccinated."

For a bit of a likeness twirl motors an dmen, you don't have to search very far! much depends on what's under the hat of a man, and what's under the hood of a car.

Extend Your Present Home Wiring at Little Cost

Now that you have experienced the undeniable benefits of electric wiring, why not increase the scope of this matchless servant by giving it more outlets?

For a surprisingly small outlay, you can add additional outlets to your present circuit.....to provide for extra lights or the convenient use of radio, iron toaster vacuum cleaner, washing machine or other appliance.

Have the advantage and fire safety of electric outlets in barns and out-buildings to furnish light as well as power for milking machines, cream separators, grinders and small tools.

Our nearest office will gladly give you an estimate.

More reading matter in a week than any other Canadian Farm paper in a month—the Family Herald and Weekly Star, Montreal. Only a dollar a year or three years for \$2, now making wonderful improvements.

The Watchman has a nice stock of Personal and Private Greeting Cards for Christmas and New Year. All orders are executed on the shortest notice and the prices are very reasonable.

The happy merchant

Never before in the history of the world has it been possible for a merchant in good credit to do so much business with so little capital locked up in stock.

One important reason for the present prosperity is, that instead of having to buy a big stock at the beginning of each season, he is now able to buy small stocks and replenish them promptly by Long Distance.

Keep your customers for miles around coming to you for whatever they need. Invent ways of inducing them to visit your store, or to order from you by Long Distance—and they tell us—you will not be seriously bothered by competition.

Long Distance is making happy merchants in some towns. Don't overlook its great possibilities.

Order your **PERSONAL Xmas Cards NOW!**

STONEFIELD

Mr. Leo Villeneuve of Paugan Falls, was the guest of his brother Mr. Guy Villeneuve recently.

Miss Daisy Densmore of New York, is expected home this week, to spend the winter months with her aunt, Miss E. Hawkins.

Mr. and Mrs. J. McMeekin Sr., were visitors to Lachute last week.

Mr. and Mrs. W. Bradshaw of Grenville are spending a few days of the guests of Mr. and Mrs. Rus. Owens.

The Rev. J. and Mrs. Irving called on a number of their friends in Stonefield last Monday.

Messrs R. Owens, W. Bradshaw, T. Canning and J. Densmore Sr., spent Tuesday last in St. Jerome.

Mrs. J. Innes of Cushing was the recent guest of Mrs. J. Canning.

We were pleased to see our old friend, Mr. Thos. Derrick of Ottawa, who spent a couple of days with his brother Mr. A. M. Derrick and also took in the Halloween Frolic at the same time.

There was quite a pleasing entertainment in our school house on Halloween night, when Miss Smith and her Pupils carried out a real Halloween Programme which all enjoyed.

The varied costumes of the night Parade which were of various colours and the make-up were quite amusing.

The many friends of Mr. Ovella Alford and his son Hermas, will be pleased to hear that they have both returned home from Dr. Smith's Hospital, recovering from an operation for Appendicitis.

Mr. Ryan, traveller for the Pedlar People called on Mr. G. C. Conway last week, who is agent for his firm in Stonefield.

Mr. and Mrs. Ross Matthew and family were the guests of Mrs. R. Dewar on Sunday.

Don't forget the Armistice Supper in Morrow's Hall, Grenville on the 13th. Only 35 cts., a good supper and a good time with your friends.

LOCAL NEWS.

....

Mrs. R. Miller is spending a few days in Montreal this week.

Mr. and Mrs. G. Y. Deacon spent the week end in Ste. Agathe.

Mr. J. J. Campbell of Montreal, spent Monday last in town.

Mr. Chas. Henderson spent the week end at his home in Huntingdon.

The Misses Maria and Iona Westgate spent the holidays at their home.

Miss Eleanor Yelland of Montreal is the guest of Mrs. H. Stansfield this week.

Miss Louise Parker of Montreal, was the guest of Mrs. A. Beers for the week end.

Mr. and Mrs. Perry of Montreal, are the guests of the Rev. Mr. and Mrs. Cozens.

The Misses Violet and Hilda Brown were the guests of Mrs. A. Chapman during the holiday.

Mr. and Miss Rosner of Cote St. Paul were the week end guests of Mr. and Mrs. H. Stansfield.

Mr. and Mrs. Geo. Bennett, of Carleton, spent Thanksgiving with Mr. and Mrs. Geo. Westgate.

Mr. and Mrs. F. E. Earle spent the week end as guests of his mother Mrs. Earle of Cornwall, Ont.

Miss Rosamond Lamb of Macdonald College, spent the week end with her parents Mr. and Mrs. W. Lamb.

Miss Grace Seale of Morin Heights and Mr. J. M. Dobbie of Harrington were holiday guests of Mrs. F. Dobbie.

Mrs. McGowan, Mrs. Bissett and Miss Ruth Bissett of Lachine are the guests of Mrs. J. M. Mackie for this week.

Mr. and Mrs. A. McVicar and family of Montreal, were the week end guests of Mr. and Mrs. Thos. Stewart.

Rev. and Mrs. Sommerville and daughter, Mrs. E. Andrews and Mr. E. Young were guests of Mr. and Mrs. P. Dobbie this week.

Mrs. H. Campbell of Lost River, is spending a few days with friends in town before leaving for Montreal, where she will spend the winter.

Mr. Jas. C. Logan and Mr. Louis J. Davis, of McGill University, spent the holidays the guest of the former's parents, Mr. and Mrs. Jas. Logan.

Mr. and Mrs. G. H. Stanforth spent the Thanksgiving Holidays at Three Rivers, being accompanied on their return by Mr. and Mrs. Theren Carpenter.

Mr. Gordon McQuat of Toronto, Miss Janet McQuat and Miss Brice, of Ottawa, were the week end guests of the former's parents, Mr. and Mrs. A. A. McQuat.

Miss Cameron, Miss Florence Armstrong and Mr. McMillan of Ottawa, also Mr. Linton Armstrong of the United Theological College, were the holiday guests of Mr. and Mrs. Geo. Armstrong.

Farming First.—The Family Herald and Weekly Star, Montreal, Canada's National Farm Journal and a home magazine included. A year for a dollar or three years for \$2.00 Wonderful.

Miss Muriel Burk of Joliette, Que. and Miss Alice Burk of Cleveland, Ohio, spent Thanksgiving with their parents, Mr. and Mrs. W. J. Burk. The latter will remain with them for a short vacation.

Every issue of the Family Herald and Weekly Star of Montreal is worth the year's subscription price to the farmers of Canada, and farmers' families rejoice in getting the addition of a superb magazine.

The Ladies' Auxiliary of the United Church, Brownsburg, propose to hold their bazaar on Saturday, December 1st, 1928, consisting of fancy and useful articles and home made cooking etc. Afternoon tea will be served. Doors open at 3 p.m.

Holiday guests at the home of Mr. and Mrs. J. P. Scott were Mr. and Mrs. K. D. McDougall, Miss Hughes of Lachine, Miss May and Mr. A. Parker of Montreal, Mr. and Mrs. J. W. Scott, Mr. and Mrs. J. D. Campbell and Miss Katie Reid of Lachute.

Last Thursday an effort was made to burglarize the C.P.R. station by cutting a round of glass from one of the windows of the baggage room. Failing to secure entrance in this way the party endeavored to force the door with a pinch bar, but was evidently scared away by the approach of the agent on his return to duty.

The Department of Roads have given sanction for a well known firm of tree experts to handle the work of cutting and trimming trees on the right of way of the Power Lines, which relieves the Power Companies of the responsibility of this work, although they foot the bills for its execution. Last week the men engaged on this work were unlucky in cutting two of the high tension wires which broke the power circuit for the afternoon. While it proved most inconvenient for many, accidents will happen and the work of renewing contact was completed about 6 p. m. and it is to be appreciated that no one was hurt.

Miss A. J. Cowan of Huntingdon, spent the week end at her home here.

Mr. and Mrs. A. Barker of Montreal, were the guests of Mrs. H. Barker for the holidays.

Messrs Fred. Davis and Ross Todd of Ottawa, were week end visitors in town, renewing old acquaintances.

Miss Hazel Morrison and Mr. Garner of Montreal, and Miss D. Morrison spent the holidays at their home here.

Mrs. J. Wiswall and daughter of East Angus are spending a few weeks with her parents Mr. and Mrs. A. W. Muir.

Miss M. Davis of Ottawa and Mrs. Davis of Morin Heights, were the holiday guests of Mr. and Mrs. W. J. Deacon.

Mr. Jno. McGibbon of Foss Mill, Ont. was the guest of his parents Mr. and Mrs. A. McGibbon, for the week end.

Miss Yearcheley of the Montreal General Hospital Staff was the week end guest of her sister Mrs. Wilbur Fraser.

Miss Hazel Todd of Hawkesbury, Ont., spent the week end the guest of her aunt and uncle, Mr. and Mrs. H. J. Hammond.

Mr. and Mrs. L. Demerise and Mr. and Mrs. Constable and son of Montreal, spent the holidays the guests of Mrs. M. Demerise.

Mr. and Mrs. E. Taylor and infant daughter of Montreal, Mr. and Mrs. Lorne McArthur and two daughters were the holiday guests of Mr. and Mrs. W. K. McArthur.

The Ladies' Aid of the Presbyterian Church held a most successful sale of work and home-made cooking on Saturday last, by which they realized upwards of \$350.00.

Miss Nora DeLisle, Miss McNab and Miss Corley of Ottawa, Mr. and Mrs. Rutherford and daughter Doris of Hawkesbury were the holiday guests of Mrs. J. E. McQuat.

The Armistice Supper given by the Ladies Aid of the United Church on Friday last proved a great success and they are able to report the sum of about \$380.00 to be added to their treasury.

The collection taken up at the Service of Thanksgiving on Monday last in the Presbyterian Church, in aid of the Verdun Hospital, amounted to \$26.00, which has been forwarded to that worthy institution.

THE LATE EDWARD SECKER

Death came suddenly to one of Brownsburg's old and respected residents on Saturday morning last. Deceased gentleman who was in his 68th year was born in London England and came to Brownsburg about 15 years ago to join other members of his family who had arrived a few months ahead. He obtained a position on the office staff of the Dominion Cartridge Company and soon endeared himself to all with whom he came in contact, by his likeable disposition. Quiet and reserved of manner he found the greatest pleasure and comfort within his own home. About 10 months ago, he was compelled by ill-health to seek medical attention, and although able to care for himself up to the time of his death, his condition gradually weakened and he passed away suddenly on the morning of November 10th. The funeral service took place in St. Simon's Church Lachute, and was conducted by Rev. J. A. Lackey on Monday Nov. 12th. Interment was made in the Lachute Cemetery. Deceased leaves to mourn his loss, a loving wife, three sons, Edward and Walter of Toronto, and Herbert of McGill University Montreal, also two daughters, Mrs. Harold Butler and Miss Edith, both of Brownsburg.

THE LATE JOHN SMITH

The death of Mr. John Smith, occurred on Wednesday last at his home in the East Ward, at the age of 79 years. Deceased was born in Thos. Gore where he lived until coming to Lachute some six years ago. He was married to Janet Murray in 1881, who with his three children, Mrs. Kerr of Indian Head, Mrs. Wm. Boa of Hill Foot and Alex. of Thos. Gore survive him.

Mr. Smith had been an invalid for some years and although unable to go out and mingle with the community, he had a large circle of friends and devoted acquaintances, who would visit him in his home and for whom he always had a kindly word. The funeral takes place on Friday afternoon at 2 p.m. where service will be held at the house, conducted by the Rev. Mr. Wadsworth.

THE LATE WM. HILLS.

The sudden death of Mr. Wm. Hills of Chabro, has caused deep sorrow in the community. He was taken suddenly ill on Sunday afternoon and removed to Smith's Hospital at Hawkesbury, where he passed away on Tuesday. He leaves two sisters, Mrs. Smith of Montreal and Miss Mary at home, also his brothers Abraham of Depot Harbor, Ont., and Charles of Buckingham. Deceased was 56 years of age and was foreman of construction in the Canadian National Railway and was deservedly popular and highly respected. The interment was made at Chute-au-Blondeau.

THE YELLOW SEVEN

The Barrier of Fire

By EDMUND SNELL

Illustrated by R. W. SATTERFIELD

This unusual series of stories deals with the exploits of "Chinese" Pennington, a detective sent by his government to British North Borneo to run to earth The Yellow Seven, a gang of Chinese bandits.

Enid Bromley—dark, small-featured and effective, dropped her racket on to the grass and sank into a chair by Hewitt's side.

"I'm afraid I gave you an awful let-down in the last set," she murmured. "I'm frightfully sorry."

Captain John Hewitt—Commissioner of Police at Jesselton, B. N. B.—passed a hand through his dark hair. "Not at all," he returned gallantly. "Just fancy," put in Monica. "She says she hasn't touched a racket for eighteen months. You look tired, Mr. Dawson."

"She smiled toward a stout, red-faced man who blinked back at her through a sea of perspiration.

"I'm not tired, Mrs. Viney," declared Dawson. "I'm hot!" He settled himself down on the turf at their feet.

"You'd scarcely credit it, Miss Bromley, but I've been spending the best part of three weeks groveling on my tummy, wriggling like some jolly old serpent after a Chinese brigand with a fancy name."

"It sounds thrilling."

"It wasn't half so thrilling as it sounds. Mrs. Viney—the charming widow on my left—has snuffed the affections of the only man on the island who can wriggle gracefully and effectively—and that's Chinese Pennington."

"Did you catch your bandit?"

Dawson had turned again and was gazing down the slope toward the palm-clad shores of the bay.

"Not altogether," he confessed.

Enid looked puzzled.

"Dawson's endeavoring to achieve the impossible," broke in the Commissioner. "He's trying to appear deep! Taken on the whole, Borneo's a nice, comfortable little place; but for some time past we've been having trouble with an Oriental who calls himself Chai-Hung. Pennington and Dawson set out together to round up the Yellow Seven—that's the somewhat picturesque title of the gang. Chai-Hung was too clever for them, but, in the sort of general mix-up, his second-in-command was put out of action together with several of his immediate bodyguard. To all intents and purposes, Chai-Hung controls the movements of every Chinaman on the island."

"Isn't that rather serious? I believe father said that all his coolies were Chinese."

"The majority of managers employ Chinese labor. The allegiance of the more scattered members of the organization is fortunately passive, but so great is their fear of the bandit himself and the little yellow card with the seven black dots, that they would think twice before disobeying his commands."

"Jack," said Monica, touching her brother's sleeve, "when you've finished frightening Miss Bromley with tales of your brigand, do you think you could muster up energy to order something with ice in it?"

The Commissioner started to his feet.

"By Jove! I'm fearfully sorry. Come along Dawson."

The two men mounted the wooden stairs together and passed through an open doorway, making their way toward the general room in which the bar was situated.

Hewitt had just completed the order for his sister and Enid Bromley and was turning in search of Dawson, when his eye lit upon two long legs protruding from the lower portion of

a long chair. He crossed the intervening space on tip-toe. The occupant of the chair beamed up at him.

"Hullo, old son! I was wondering when you were going to turn up."

"Peter!" returned the Commissioner reproachfully. "If you have lost every shred of respect for regulations—and myself, you might at least have the decency to report your arrival to Monica!"

The man with the Chinese eyes remained unmoved.

"I called at the bungalow—but your orderly informed me you were eating the air! I came on here to find you absorbed in a game of tennis."

"Hullo, you old devil!" greeted Dawson.

Pennington rose wearily. "Jack, who's the lady?"

"They converged around a bamboo table and a Chinese boy set a tray in front of them."

Hewitt robbed his hands together. "What'd you think of her? Not bad, eh?"

"She's not bad," conceded Pennington. "Bit on the thin side! Not feeling smitten, I hope?"

Hewitt changed the subject abruptly. "How's the Yellow Seven affair proceeding?"

"You know we settled Nyi-Hau—the feller responsible for looting a train!"

The Commissioner moved restlessly. "Dawson told me. I gather Moorhouse had a narrow squeak. Chai-Hung escaped by a window—and you followed. What happened then?"

Peter Pennington crossed his legs and stared pensively through the doorway.

"I set my jungle-telegraph buzzing, rounded up my little crowd of brown-skinned agents and succeeded in roping in the young men of a local village. We got going and fell upon the bandit's bodyguard hip and thigh. Chai-Hung wormed his way out of the charmed circle, headed for the river—and left the island in a long-kong, disguised as cargo of some sort or other."

Hewitt sprang to his feet. "You don't mean to tell me he's left Borneo?"

The other nodded.

"It's even whispered that he spent a couple of nights in Singapore; but," he added reassuringly, "he's sneaked back again and succeeded in making a landing at Kudat—under the eyes of our own people."

Dawson whistled softly. "Know where he is?"

"Within limits—yes. There's something afoot, however, that I don't exactly understand. My chief of staff—Rabat-Pilat—knocked across a prominent member of the Yellow Seven the night before last. I haven't inquired too closely into the exact methods employed to extort the information, but the blighter went as far as admit the possibility of a gigantic coup."

"Where is this feller now?" asked Dawson.

A far-away expression had come into Pennington's eyes.

"It turned out that he was the man who held Rabat-Pilat's arms while Chai-Hung tortured him."

Hewitt shuddered.

"I don't think you need tell us any more."

"I shall be going up-country again tomorrow. To tell you the truth, I've been having a pretty tough time of it. I just ached for a suit of decent clothes, a smell of the sea and a look at you all."

The steward approached them. His tray held two empty glasses from which straws protruded—and a leaf torn from Monica's note-book. Hewitt glanced at it.

"The girls have gone on home," he announced. "Dawson, old son, we're counting on you for makan." He looked at Pennington. "You'll dine with us, of course?"

"Thanks. I'm still in ignorance as to the identity of your charming partner at tennis."

Dawson grinned.

"The lady with the blue-black tresses is a certain Enid Bromley—daughter of Chard Bromley, new manager of the Baniak-Baniak rubber estate. Sheltering himself behind the plausible excuse that the late manager was assassinated by the Yellow Seven and that the district wasn't any too healthy for a white girl, our scheming superior has arranged for Miss Enid to occupy a spare room in his bungalow and keep Mrs. Viney company."

"Shut up, Dawson! The point that ought to interest you, Peter, is that Bromley's London directors are offering a reward of \$1,000 for the arrest of Chai-Hung."

"Are they, by Jove? A new manager at Baniak-Baniak, too! That accounts for the activity I noticed when I passed through."

"What sort of activity?"

"They're tackling that new area; got a crowd of natives heaving the forest all round them."

A group of government men ushered in the fall of darkness, followed at intervals by club members of varied callings, who waited in by twos and threes to swell the numbers of those who were already in occupation.

A young Englishman—evidently a newcomer—paused on the threshold as if in search of somebody—then

walked straight up to Pennington.

"How do, Penn?"

The man with the extraordinary eyes came to his feet.

"Gwynne! What the devil are you doing here?"

The newcomer lowered his voice. "There's not a lot going on in Singapore, so they thought I'd like the trip. I caught sight of Chai-Hung for a couple of seconds outside Raffles, tracked him to Labuan—and then lost the trail altogether. I'm to report to you for duty."

"Good man! Hewitt, this is Jocelyn Gwynne. Dawson—Gwynne! Mr. Gwynne—Mr. Dawson."

He sat down again.

"So you actually saw Chai-Hung?" said the Commissioner presently.

Gwynne nodded. He was a short, sturdy youth, square-headed and fair-headed.

"Just before the trouble began out here, I met Chai-Hung at Johore—and his face is not one that easily slips the memory. Since then, of course, the old blighter's lost a hand, which makes identification easier."

(To be continued.)

Government Defined

A young lady was inquiring of her old nurse, the widow of a superintended government servant, how she was getting along. "Badly enough, darlint, only the government intends to do something for us."

"And what's government, Nora?"

"Is it jokin' ye are, Miss? Sure ivery child knows what's the Government. It's a half-a-dozen gentlemen an' the lotkes, maybe, that meets an' thinks what's best for themselves, an' then says that's best for us—an' that's the Government."

Minard's Liniment for Every Pain.

"Darling, I'd go through purgatory for you!" "You say so, but how can I prove it?" "Be my wife."

Minard's Liniment cleanses cuts, etc.

Self Discipline

If we are to improve, we must discipline ourselves. The reason why most of us do not is that we go day to day doing the same old thing in a routine way. We have allowed ourselves to pick up whatever ideas we could absorb without effort; consequently we have become mentally lazy and inefficient. In order to improve our condition, we must necessarily discipline ourselves by exercising the mind, making it subservient and obedient to the will. This discipline is necessary for the welfare of any business.

In Great Britain and Scandinavia young men are placed in stores to serve an apprenticeship, just as they do in any other trade. They are first taught obedience to discipline. They are thoroughly trained, even to the minutest detail. Unfortunately, in America no such apprenticeship system exists. The average young man is attracted to, and is free to accept the position which pays the largest salary. To secure a position without training is decidedly not for his best interest. No greater misfortune could possibly be his. More young men have been ruined by drawing large salaries early in their business life than by any other cause.

The young man, generally speaking, feels that while he is young and before he settles down he "must see something of the world," as he expresses it. Instead of devoting his spare hours to reading and study to improve his mind, he often passes them in idleness and dissipation. Ere long not only has he acquired bad habits that are hard to break, but his health may have become impaired. It is absolutely impossible for a young man to spend the night in dissipation and be at his best the next day.

Kindness Pays

The wisdom or unwisdom of whipping as a means of discipline and training of children is a subject of frequent discussion. In his annual report to the Legislature Mr. J. J. Kelso, Director of the Children's Aid Branch, has this to say about it:

"There are special occasions when corporal punishment is a necessity, but in the general upbringing of children the emphasis must always be on a patient sympathetic understanding of child-nature and the development of good thoughts and habits by example as well as precept. Children are too often the victims of bad temper and of a hasty decision. They realize keenly the injustice done them and their lives and characters are embittered and hardened by it."

Where Severity Begins

"For the very young, the inexperienced, the first offender, the policy of kindness and patience should be the rule, but of course there is a limit to all this and there comes a time when severity and corporal punishment may be necessary to teach these young people that they cannot continue to do wrong with impunity. One boy who was allowed to go with a warning on eight different occasions simply looked upon the whole procedure as a joke, whereas if he had been given a smart whipping on his third appearance he would not have been so indifferent and defiant."

Belong to the "400"

"Mrs. Heavystyle belongs to the '400,' doesn't she?"

"Oh, yes—she weighs at least that much."

Styles by ANNETTE Paris—New York

No. 899—Graceful Lines. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material with 1/4 yard of 36-inch contrasting.

No. 127—Popular Coat Dress. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1/4 yard of 36-inch contrasting and 1/4 yard of 18-inch material for separate vest.

No. 135—Smartly Simple. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1 1/4 yards of binding.

No. 944—Entirely New! This style is designed in sizes 34, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 3/4 yards of 40-inch material with 2 1/4 yards of binding.

No. 948—Important School Frock. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material with 1/4 yard of 18-inch contrasting.

No. 846—Dainty Bolero. This style is designed in sizes 6, 8, 10 and 12 years. Size 8 requires 1 1/4 yards of 40-inch material and 1/4 yard of 18-inch contrasting and 3/4 yards of ribbon.

ALL PATTERNS 20 CENTS IN STAMPS OR COIN (COIN PREFERRED). WRAP COIN CAREFULLY.

Kindness Pays How to Make Good Mincemeat

So often the mincemeat from the store is dry, tasteless, or too-highly flavored to suit the individual taste. A recipe for a delicious home-made mincemeat that can be prepared now for the Thanksgiving pies.

Three pounds of lean beef; 1/2 pound of suet; 1 gallon of tart cooking apples; 1 pound of currants; juice and rind of 1 lemon; salt, nutmeg, allspice, cinnamon and cloves to taste.

Boil beef until tender, pare and chop apples fine. When meat is cold remove bone, chop fine and put with apples through food chopper. Add suet, currants, flavoring, and lemon. Put all in granite kettle and add 1 cupful of sugar and 1 quart of cider. Bring to a boil and simmer for 1 hour, or until ingredients are tender. Stir frequently while cooking. Pack in pint jars and seal. This makes a rich juicy mincemeat easily prepared and possessing a superior flavor.

An itinerant collector of old iron was trundling his barrow along a very narrow road. Behind him was a somewhat elderly motor car, the impatient driver of which was hooting and tooting in his anxiety to pass the old iron barrow. The old iron merchant looked around at the car and then addressed the owner:—"Orl right, guv'nor, I'll call for that to-morrow."

Mother—"I don't think, darling, that you should play cards on Sunday." Small Son—"But, mummy, we are not playing properly, we're only cheating."

STYLISH FROCKS AT LITTLE COST

By Mae Martin

Depending on the season or the season before can be made stylish again. They are so easily transformed by a few changes in lines and the quick magic of home tinting or dyeing.

Anyone can tint or dye successfully with true, fadeless Diamond Dyes. Brilliant, stylish tints or shades appear like magic right over the faded or out-of-style colors. Diamond Dyes never disappoint, they don't streak, spot or run. They never give things that redyed look. They have been perfected by over 50 years of dye-making. Tinting with them is easy as bluing and dyeing takes just a little more time to "set" the color. You can get all the fashionable shades from them. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Just write Mae Martin, Diamond Dyes, Windsor, Ontario.

Dutch Guiana Negroes Keep African Culture

An Expedition to a Little-Known Country Brings Back Objects of an Ancient Art Which Has Persisted In the Jungle of the Western World

By H. GORDON GARBDIAN

The strange and fascinating story of a unique people which still adheres to the primitive culture of the African jungle while living on the edge of Western civilization in South America is related by the scientific expedition headed by Dr. Morton C. Kahn representing the American Museum of Natural History, and Dr. Melville J. Herskovitz, representing Northwestern University, which returned recently from two months' study of the Djukas, or Bush negroes of Dutch Guiana—descendants of slaves who won their independence 200 years ago from their Dutch masters.

The Djukas live a peaceful and contented life in their little villages of thatched huts in the jungles above the cataracts of three rivers—the Surinam, Marowayne and the Saramacca—which they control. Only a few white men have ever penetrated the country, and fewer still have observed closely the customs and the craftsmanship of the medicine, the religion and the form of government of this people. The Djukas do not welcome white intrusion and keep themselves so isolated from the affairs of the outside world that they first heard of the World War from the scientific expedition which visited them.

Wearing only breechcloths and communicating with each other in a language that is a mixture of African, Dutch, French and English, they go about finding their own living. Game, fish, oil-bearing nuts and a little fruit are furnished by the jungle. The land is fertile, and although a terrific battle must be constantly waged to keep back the ever encroaching jungle and the insect and bird pests, each village has its little provision ground, which furnishes cassava, yams, peanuts, and occasionally sugar-cane and peppers. When the Djukas are not busy stalking through the jungle with his bow and arrows and a shotgun, or speeding along the turbulent waters in his frail canoe, he is usually found cross-legged in front of his hut carving wood.

EXHIBITION BROUGHT BACK

An idea of the way in which the Djukas live is given by the collection of 900 weapons, household utensils, religious and ceremonial objects and gods, clothing and ornaments which the scientists have brought back.

The collection, soon to be displayed at the American Museum of Natural History, includes many beautiful examples of delicate wood carving and of basketry and pottery. There are carved combs, bracelets, necklaces and other decorations used as gifts to woo a wife; carved paddles; carved stieks, with one end for stirring food and the other for combing hair, and a large number of charms and gods, all of which have their special purpose in warding off "the evil spirits." Among the rarer objects are the pieces required for playing the game of adiboto, in which a board and some red seeds are used. Also brought to New York are some of the antique seats of office of the old men's assembly of the village of Lombe. Another object is an elaborately carved drum which is used to hold "telegraphic communication" with other villages.

Polygamy, the marriage of a widow to her dead husband's brother, the functioning of the chief in settling legal disputes, the setting up of food taboos, associated with a system of clans, and the decoration of the skin by incisions into which charcoal is rubbed are among the customs of the Djukas. The practice of skin decoration is particularly common among the women, few of whom dare to make any claim to beauty without a pattern cut at one place or another upon their bodies.

DRUM SPEAKS TO GODS

Strongly suggestive of the culture of the Dark Continent is the highly developed system of drum telegraphy found among the Surinam River Djukas. The telegraph drum is hollowed out of a single log. It is about two feet long a foot in diameter. Like most of the articles of the natives, it is covered on all sides by an elaborate snake motif. With a code signal system of drum calls, the signaler in one village beats on one side of this instrument with his fist. On a clear night the sound can be heard three or four miles away. The "telegrapher" may signal: "The white man comes," "Come quick, sick," "Beware of visitor in canoe," or "Call the Gran Mau" (the captain or ruler of the village). Arrivals are heralded in the same way by this tomtom code, and if the visitor has made a bad impression the news is sent up-river. The blacks will refuse to assist or travel with the offender. Uncomfortable indeed is his plight.

But telegraphy is not the only purpose for which the drum is used. Some of the natives employ it for communicating with their "Gran Gadu" or great spirit, as they feel that the throbs of the instrument are more likely to reach celestial destinations than mere words or thoughts. A third use for the telegraph drum is at dances and special religious rites, one of which the returned scientists were privileged to see. The natives, seized by the spirit of the drums and the gods of the place, their faces painted with the sacred red and white clay, dashed about in a frenzy of religious

fervor. With razor-edged cutlasses they slashed about, foaming at the mouth, destroying what came to hand, while others swam the dangerous rapids up-stream, aided by their supernatural strength. This particular manifestation of religious ecstasy of the Bush negroes had never before been witnessed by white men, according to the explorers.

Art is esteemed very highly by the Djukas. They decorate everything. Even their sticks for stirring pots are finely shaped and delicately engraved. While collecting specimens of their wood carvings the scientists found the Djukas loth to part with their implements. They finally succeeded in obtaining the specimens only by offering exceptional inducements.

MONEY LITTLE VALUED

Money was not among those inducements. The Djuka holds money in little or no esteem. Candy or leaf tobacco is, however, quite another thing, and with leaf tobacco the expedition did most of its bartering. The use to which the natives put the tobacco is unusual, to say the least. Instead of smoking it as we do, most of them prefer to draw up through their broad nostrils a dark brown fluid made by soaking the tobacco leaf in water to which a little wood ash has been added. They offer to their guests a small vessel containing this liquid, as we would offer a friend a package of cigarettes.

But some treasured possessions the natives would not let go even for the much-desired leaf tobacco. It was, for example, only after many unsuccessful attempts that a specimen of one of their most valued objects, the telegraph drum, was obtained. And the final attempt was successful only because its owner had lately been ostracized from his village and was willing to trade his drum for provisions. One young woman, however, surprised a member of the expedition by voluntarily offering him a bracelet of delicately filed iron because she said that his eyes reminded her of her dead husband. This incident is taken by the scientists to mean that sentiment is not absent among the Djukas.

To win a wife, a man must show ability in artistically decorating kitchen utensils, household objects and articles of personal decoration. The man who is able to carve in wood is looked upon with high favor by the women of the tribe and he has also the respect of his own sex. The ability to hunt, fish and successfully to provide for a family are qualities essential in every young man seeking a wife, but these are taken more or less for granted, as few Bush negroes cannot hold their own on the game trails or along the swiftly swirling rivers.

DIVORCE IS EASY.

After winning a wife, a man must continue his output of highly adorned domestic articles, or he will lose her. Divorce is easy to obtain. All a wife has to do to get it is to show the council of the tribe that the husband is not doing his part and she divorces him.

The Djukas men decorate practically every implement which is used in the daily life of the tribe. Small wooden paddles are gracefully decorated and the low stools and fantastically shaped benches upon which they sit. Combs used for keeping their kinky hair in order, the small, low tabourettes which serve at times as tables, the calabash gourds which are used for plates and spoons are always splendidly wrought.

There is one curious and striking exception to the rule that the Djuka decorates every object that he uses. The two gods in the collection of the scientists consist of a single piece of hardwood, about three feet high, with two seeds for eyes in a crudely carved face. A charm of ordinary grass, the significance of which the expedition could not learn from the natives, is hung around the neck. Each village has its own separate god, and there are a number of minor deities such as the alligator, the silk-cotton tree and the boa constrictor.

The Djukas allow their dead to remain for days in the tropical heat before burial. They do their best, often, to alleviate the suffering of the living. Their priests and witch doctors have a concoction highly prized as a cure for snake-bite. It consists of the roasted head and tail of a venomous snake, and is believed to have the power to turn poisonous reptiles from one's path.

THE MEDICINE CITY.

Buried in the thickest part of the jungles is the sacred medicine city of Dahomey far up the Surinam River. White men are not permitted to enter this domain, for it is thought that the god who watches over it would be deeply offended by their presence. To this sacred place the seriously ill are brought from nearby villages and ministered to by special witch doctors.

There is little doubt in the minds of the members of the expedition that the origin of the Djukas is wholly African. "Experienced ethnologists who have made a special study of negro art have arrived at the conclusion that this art work (that of the Djukas) and the motif displayed, though now modified in some degree, is very probably a survival of the

The Rise of Canada's Production in 1900-1928

Canada's rise to eminence as a wheat-producing country forms by all odds the most far-reaching feature of the Dominion's economic advance during the present century, and the preliminary estimates of this year's production, as recently issued by various authorities, indicate that the 1928 crop will, in volume, surpass all previous records. While the final results may vary considerably from the best early estimates, the preliminary report of the Dominion Bureau of Statistics forecasts a wheat harvest amounting to roughly 550,000,000 bushels.

The successive stages by which Canada has achieved its present immense volume of wheat production furnish

one of the fascinating pictures of Canadian development. It is hard to realize that the wheat crop for the opening year of the twentieth century fell below 60,000,000 bushels and that not until 1905 did the harvest for the first time reach 100,000,000 bushels. In the ten years following 1905 new records were reached in almost every other year, culminating with the phenomenal crop of 1915. The 1915 harvest was literally a 'wonder' crop, and established a new mark which stood as the record for a longer period than any other crop since the opening of the century.

Finally, in 1922, the output of 1915 was exceeded, and in 1923 another heavy harvest set the record which

held good for the following four years. Now, according to the best information, the 1928 crop has well exceeded the coveted figure of 500,000,000 bushels, and the Dominion has for the eleventh time since 1900 surmounted all previous high marks for wheat production.

Country's "National Resources"

From now on Canada can scarcely expect to establish new levels in wheat output as frequently as in the earlier years of the century, but it is assuring to know that the ultimate wheat-producing capacity of the Dominion, as estimated by the experts who have most carefully studied the country's land resources, is yet far from being attained.

Pay a Visit to Your House

Have you ever considered the guest in your house? To really understand how such a person must feel in the home that is so well known to you why not pay a visit to yourself?

Eat one meal in the guest's seat at your table. Many a hostess would be surprised to find that the guest at her table has a particularly ugly view through an open door or window while the hostess is enjoying a lovely view from her own place. Or perhaps the guest faces a blank or caste an unavoidable shadow upon her own plate. Because of these facts it is impossible for a guest to carry away a pleasant remembrance of that home.

Sleep one night in the guest room. Perhaps the bed is not as comfortable as it seems. Or it may stand so that a glare from the window disturbs the sleeper very early in the morning. Perhaps you had forgotten the inconvenience of not having a lightstand within reach of the bed—a real calamity in a strange room. Do you have one or more seats so placed in your living-room that a guest naturally faces the lovely view from your most pleasant window?

To Develop Peat Fields

The fuel branch of the interior department is about to launch out in the peat business, and the minister, Hon. Charles Stewart, accompanied by technical officials recently inspected the experimental station at Alfred highway between Ottawa and Montreal. The bog there is very extensive. At different times, over a long period, experiments in drying of peat have been conducted with varying success but a system has now been evolved for economical treatment. A large quantity of the fuel is promised at economical rates.

Hearing an alarming crash of glassware one morning Mrs. Blank called to her maid in the adjoining room. "Norah, what on earth are you doing?" "I am doin' nothin', m'm," replied Norah. "It's done."

Jack Miner's Views on Women Smokers

"The other morning, while on the train en route from a lecture in New York City and Boston, Mass., while waiting for my breakfast to be served, a morning paper was handed me, in which on the front page, in capital letters, I read the words: 'Henry Ford Hospital Nurse Discharged for Smoking Cigarettes.' I then thought of several requests I have had to put in print the impressions I had of Mr. Ford. I say this alone shows the calibre of Mr. Henry Ford and his interests in the moral side of life and in the born and unborn generations, and this fact, connected with the character of Mr. Henry Ford, will go down in history.

If more men will take Mr. Ford's example and have a backbone instead of a wishbone, it will help slow this world up a bit, and children a century from now will have healthy reasons to thank him. So many ask why I am so opposed to women smoking and in reply I will say: The biggest asset the world has is its babies, and the hope of the world for permanent peace is more love and education among its babies, who will profit by the mistakes of their forefathers. But what a pitiful thing if these babies' growth, intellectually and morally, is going to be stunted through the motherhood of the land smoking cigarettes months before they are born. Right here let me say to the world, I will give more for any child's nine months health and education before he is born than I will any pins years after. I think every human being wants to see the world take a step forward and not backward, and who, in the name of God, can say by women smoking it makes this world better."—Jack Miner.

Heathens are slow to accept the white man's religion, but they see the need of it after they adopt his vices. —Easton Express.

Patient: "What do you think of a warmer climate for me, doctor?" Doctor: "Good gracious man! That's just what I am trying to save you from."

A Happy Boy vs. a Spotless House

By Little M. Saunders

"Mother, may I make some cookies?" asked nine-year-old Billie Dean. "I should say you may not!" quickly answered his mother with startled surprise. "What in the world ever put such an idea into your head?"

"Well," replied the lad in rather a ashamed tone, "Tommy Rogers' mother let him make some and they tasted awful good 'cause he gave me a whole handful of them. He said he made 'em all by himself and I know I could, too. Please mother, let me try just once an' if they are not good, I'll never ask again. Honest I won't. Mother," he added earnestly.

"Well, I'm not willing and that settles it. I'm not going to have you messing up my kitchen. Go on out and play with your wagon."

"Oh, shoot!" exclaimed the disappointed boy. "I want to make some cookies. I'm tired of playing with that old wagon."

"Billie Dean, that's not an old wagon and you know it," said his mother. "Why, shame on you! You've had it only a week. Now go on out and keep still, I say." Billie slouched out, shutting the screen door with a bang that caused his mother to exclaim impatiently, "That you! What shall I do with him?"

Her aunt from another town happened to be visiting her. In answer to the mother's perplexed query she replied, "Mary, I think you are making a serious mistake in not permitting Billie to make those cookies when he wants to so badly. If he were my boy I'd be only too glad to have him want to do such things."

"But, Auntie, just think what a mess he'll make," protested Mrs. Dean.

"I don't see why he should," returned the older woman, "and even if he did he could clean it up, couldn't he?"

"Oh, maybe he could, but he wouldn't."

"Well, have it understood that if you let him make the cookies he is to leave everything just as clean, and orderly as he found it. Anyway, Mary dear," continued her aunt, "don't you consider it all a part of your job as mother and house-maker? You can't just feed and clothe your boy and call him raised. You've got to study him, live with him and for him, love him and show him you do. I've been here three days and I've not once seen you play with Billie, or show the least interest in his affairs. He's such a fine little fellow, too, I wish he were my boy," she added wistfully.

"Oh, I don't," quickly replied the mother with a laugh. "I want him myself, but he does drive me half frantic sometimes—always wanting to be doing some unheard-of thing."

"Well," returned her aunt, "that's the way Columbus happened to discover America. You'd not want him miffing around like a dummy, would you? Anyway, I like to see a boy take an interest in housework. Mary, if you let Billie make those cookies I'll see that he leaves everything in good condition."

"All right, Auntie dear, you win. I'll call Billie." She found him sitting disconsolately in his wagon back of the house.

"O, Billie, come here," she called. "What you want?" asked the lad, sulkily.

"Well, come and see," returned his mother. "I've changed my mind about those cookies. You may make some if you want to and will clean up afterwards."

The lad gave a bound and let out a yell of joy. "Oh goodie, goodie, Mother! You bet I'll clean up afterwards! You'll see. And I'll make you some good cookies, too."

Postal Regulations

It has been brought to the attention of the Post Office Department that some persons have made a practice of requesting rural mail couriers to carry parcels, etc., to residents on the line of the several mail routes for which they paid the couriers a nominal fee. As the Post Office Act clearly defines that several classes of mail matter and the rates of postage chargeable on such matter it is a violation of the said Act for a mail courier to convey parcels, etc., on which the postage has not been properly paid by postage stamps affixed to the article of by the impression of an authorized stamping machine or in the case of a large number of circulars mailed by one firm in bundles when the postage may be paid by affixing to the wrapper of each bundle, postage stamps sufficient to pay the postage on each place included in such bundle. The obligation of the rural mail courier is quite clear and all concerned in a further infraction of the Act will be dealt with accordingly to law.

Aprons are Popular

The province of the apron is certainly varied enough to keep it in popularity ad infinitum. Aprons are, like work, a year-round staple, but at Christmas and bazaar times, the apron does bask in an even brighter limelight.

"Come, come Peter," said the elderly governess, "you surely know the Latin word for 'left.' 'Spinster!' he replied!" triumphantly

MR. HOOVER'S ELECTION.

Naturally Canada feels an interest in the political affairs of the neighboring Republic. Our nearest neighbour and our best customer is always in our minds. There is so much traffic between the two countries and so constant an intermingling of the two peoples that we should be nothing less than self-centered provincials not to mind who, for example, is elected President of the United States. The choice of Mr. Hoover for the highest position in the gift of the American people will meet with general approval from the people of Canada. We know him as an efficient administrator during war-time and as a sincere friend of the British people at all times. He looms up as one of the biggest men the United States possesses, perhaps has ever possessed, and with his practical knowledge, acquired on the spot, of other countries than his own—which few Presidents have had—he should make an ideal Chief Executive for the times in which we live. Probably the defeated Al would have made a good President too.

Already alarmist propaganda is being put out in Canada concerning the likelihood of the new President bringing about changes in the tariff which will work to the disadvantage of Canada, and also doing his best to compel Canada into linking up with the United States in building the proposed St. Lawrence Waterways. None of us however would expect other than that Mr. Hoover, or any other President for that matter, will do the best for his own Country. This is his plain simple duty. If in the line of his duty, he should feel it incumbent upon himself to recommend that the American people should levy higher duties on food stuffs they import, making such imports higher in price and automatically raising the price of their home grown food stuffs well that is his business, not ours. Doubtless we shall find market for our own products elsewhere, if the American people cannot afford to buy them. Our wheat seldom goes begging for buyers anyhow.

As to the St. Lawrence Waterways, if Canada is willing to have them built, they will be built, not otherwise. Not even a Hoover could force us to build them or to consent to their being built. It is really a question for the Canadian people to decide for themselves and no government would sanction such a proposal if the majority of the people of Canada opposed it. If Canada can be shown that the proposed waterway scheme is best for her, without imposing due limitations upon her future, or mortgaging her birthright, Canada will approve, but she has to be shown Mr. Hoover will recognize this position and govern himself accordingly. We admit a sense of inferiority when we admit that Mr. Hoover's election is likely to prove injurious to Canada. Nobody and nothing can harm us except our own inferior thinking. We look across the St. Lawrence to the people of the limited states as friends and neighbours, as equal, not as enemies or inferiors, and while we look we need not fear what anybody can do to us. In every way, we should welcome Mr. Hoover's election and preserve our self-respect by not admitting the possibility of being compelled to do anything we don't want to do.

MONSTER WOLF IS CAUGHT IN TRAP.

St. Scholastique District terrified by Marauder which killed livestock. Reports reaching here from Ste. Scholastique tell of the capture in a trap of a monster wolf, weighing 190 pounds and measuring six feet from tip to tail. This animal, one of the largest ever seen in that part of the country, is believed to have been responsible for the serious depredations suffered within recent weeks by farmers in the district.

Inhabitants in the region north of St. Scholastique have been terrified by an unseen marauder for several weeks and recently when children became so panicky that they would not go to school alone, hunting parties were organized, but no wild beasts were sighted. One farmer lost 15 sheep, another nine and still another half a dozen. A cow was killed by the animal who ate only the choice "sweetbread portion" about the neck. Donald Carruthers, a farmer in the district where the heaviest losses of sheep had been recorded, decided to set a trap. On the following morning he found the paw of a bear, apparently gnawed off by the animal to make his escape from the trap. The next morning, he found the big wolf. No further damage has been reported.

On the tenth anniversary of Armistice, Canada celebrates not the winning of the Great War, but war's memories which are sacred to her national life,—the heroic sacrifice of her sons for world peace. Our Garden of Memories—in Argenteuil, as in every home and every heart in the Dominion—is sheltered by walls of affection for those who gave all for us, and in giving all, have passed beyond the surging flood of battle's tide..... On this tenth Anniversary of Armistice, the Dominion honors her fallen heroes, with a gratitude unshaken by a decade of that Peace and Victory they died to win.

Let us again remind our readers that the Watchman is their paper and we are pleased to receive the doings of town and country interest, but we are dependent upon the good will and help in acquainting us of what is going on. Our phone is No. 27 and items of interest will always be appreciated.

Extensive arrangements have now been completed for the entertainment of 500 junior farmers of the province who will be the guests of the Ontario Government for a visit to the Royal Winter Fair at Toronto next week. The itinerary includes a dinner at Hart House by the Government tour of the Toronto Stock yards, several big industrial plants, a number of the big stores, the Parliament buildings and an inspection of the city by motor bus. A number of luncheons by various concerns will also be tendered there. The party will arrive in Toronto on November 20th.

STONEFIELD

Mr. E. J. McMeekin was the guest of his parents over the Holiday.

Miss G. Smith spent the week end holiday at her home in Lachute.

Mr. E. Brayden was the guest of Mr. and Mrs. R. Dewar for the week end.

Mr. Percy of Grenville is spending a few days with Mr. and Mrs. Conway.

Miss Mariel O'Brien of Hawkesbury was the guest of Mrs. J. F. Owens recently.

Mrs. Gordon Walker of Lachute, called on many of her old friends here on Wednesday of this week.

Mr. Arthur Peddle accompanied by his parents from Montreal spent Thanksgiving Day at their summer home here.

Miss Mary Derrick arrived Sunday from Ottawa, and stayed for the holidays with her parents Mr. and Mrs. A. M. Derrick.

Mrs. Herbert Densmore and little son Drummond have been visiting the former's mother Mrs. Telfer in Montreal recently.

Quite a number from here attended the Armistice Supper in Grenville, and all enjoyed the splendid supper put on by the W.A. of St. Matthews Church.

Mr. L. McGain and son Ashley, also Mr. and Mrs. E. Armour and son Bruce of Montreal were the guests of Mr. and Mrs. G. C. Conway for the holidays.

We are enjoying real Indian Summer at present and another week or two of the same variety on the part of the weather man will pay up for the wet weather experienced during October and also let the farmers catch up with their work before winter sets in.

SHREWSBURY

Miss Susie Good spent the Holiday with Mr. and Mrs. J. A. Good.

Mr. Wesley Copeland was the guest of his parents Mr. and Mrs. A. Copeland for the Holiday.

Mr. Gerald Buck spent the week end with his grand parents Mr. and Mrs. G. B. Robinson.

Miss Grace T. Copeland spent a few days recently visiting friends in Dunany.

Miss Violet Copeland, of Dunany, accompanied by her sister Mrs. Wm. Horwood of Montreal, have been the guests of Mrs. A. Copeland.

HIGGINSON & STEVENS

Hawkesbury, Ont.

"Give me youth again and I should not hesitate to come to Canada," said John Garton, prospective president of Britain's largest organized group of farmers — the National Farmers' Union of England—who has been touring the country, especially western Canada on a special mission for the British Ministry of Agriculture. "There are greater opportunities here for the young man with a little knowledge of farming than almost any other country in the world." In company with Arthur Amos, "doctor of the University Farm at Cambridge, England, Mr. Garton has been investigating farm organization and labor-saving devices in Canada, with a view to reporting on what might be profitably applied to British farming. "Remember it? I should say I do!" The big man's face beamed with happy recollection. "Somebody had, in more or less of a business way, spoken of the Youth's Companion. And just the mention of its name—so far as business was concerned—broke up that meeting. But what fun those busy men had swapping recollections of the days when the arrival of the Youth's Companion was the high spot in the whole week."

Rare indeed are the pleasures that we remember so warmly over half a century of years. But the Youth's Companion is still among them.

Isn't there some boy or girl that you would like to make happy with a year's subscription?

In its new enlarged and improved form as a monthly magazine the Companion has more to offer its young readers than ever before—a full book-length novel complete in each issue; short stories and serials so thrilling they will never even suspect them of being a "good influence" or the "right kind of reading"—articles by outstanding men and women that will fire their young ambition—comments on current affairs—puzzles poems guides to the best in books and moving pictures—special departments for both boys and girls covering their own favourite activities.

1. The Youth's Companion, 12 big monthly numbers, and 2. Two extra numbers to new subscribers ordering within 30 days, and 3. A copy of "WE" in 12 colors, framing size 18 x 24 inches. All for only \$2.00.

THE YOUTH'S COMPANION S.N. Dept., Boston, Mass.

Subscriptions received at this Office.

Here and There

(173)

More than 20,000 acres of Indian lands, which include some of the best agricultural areas in the Peace River district, are likely to be sold at auction in the near future. This action will in all probability follow a survey that is being made in the north country by W. Morrison, Inspector of Indian Agencies for the three western provinces, with headquarters at Regina.

A new industry—badger farming—may be started in Saskatchewan by John Rothenberger, farmer, of Vanguard. Last spring Mr. Rothenberger caught a badger and four pups. He built a large pen, about 15 feet long and 4 feet wide. During summer he fed the badgers until they are now quite tame, and are said to be larger than any badger running wild. Their coats are in excellent condition and offer of \$18 for each skin have been received.

A new world record was set by the Canadian Pacific Railway recently when a train of grain more than a mile in length was operated between Stoughton and Arcola in Saskatchewan. It was the longest and heaviest grain train in history, consisting of 135 loaded grain cars, each approximately 40 feet in length, a water car, a caboose and engine. The gross weight was 8,722 tons and the total contents of the cars were 202,000 bushels of grain.

The enthusiasm of the citizens of Quebec is so infectious that it is an easy matter to interest visitors in winter sports, stated J. G. Strathdee, winter sports manager of the Chateau Frontenac, in giving a forecast of this winter's programme. Skating, skiing and tobogganing will be in full swing as usual; the dog derby will most certainly take place; and the ice carnivals and storming of the Citadel will probably be featured again. Mr. Strathdee mentioned the splendid co-operation given the winter activities at the Chateau Frontenac by the Quebec Winter Sports Association.

The number of disciples of Isaac Walton, Canadian and American, who have piled rod and reel in Canadian waters during the past season is greater than ever before, states A. O. Seymour, general tourist agent of the Canadian Pacific Railway at Montreal in announcing the winners of the Ontario bungalow camp fishing trophy competitions. Phillip Peterman of Laurium, Michigan, won the Nipigon River contest for speckled trout, Edmund Sleebart of Chicago won the French River "musky" prize, and Theodore Kipp of Winnipeg caught the largest bass entered in the Devil's Gap camp competition.

England will have enough Canadian apples shortly to keep the doctor away for the next year, if there is any truth in the proverb, as ships sailing for the old country this autumn are carrying many boxes of souvenir apples shipped by Canadians to their friends overseas. This has been the custom for the past few years and according to J. B. Martin, manager of the foreign department of the Canadian Pacific Express Company, it is becoming increasingly popular. So great has been the demand for fresh Canadian apples each autumn for shipment to Europe that producers throughout the country now have standard size boxes for shipping and special low rates are granted by the express company.

Golf in the heart of the Canadian Rockies is becoming so popular that a miniature course has been opened at Castle Mountain Bungalow Camp in Vermilion Pass on the Banff Windermere Highway. This new course is probably the highest, smallest and most effectively situated of any golf links in the British Empire. The ingenious layout of the course is the handiwork of Stanley Thompson, internationally known golf architect, who also designed the recently enlarged links at Banff.

Another recruit has joined the ranks of the famous Contented Cows at the Carnation Milk Farms at Seattle, Washington, the Canadian Pacific Railway supply farm at Strathmore having sold one of their prize heifers to the Carnation Milk company. The animal, bred at the C. P. R. farm, is the first Holstein female from the prairie provinces to be accorded the grand championship at the "A" circuit shows in the west, an honor which had previously been won by cattle either from Ontario or from the Pacific coast.

So notorious a reputation has the fisherman won for himself as a prevaricator that he must needs enter his fish in competitions with a duly signed and witnessed affidavit. The latest record catch to be reported to the General Tourist Department of the Canadian Pacific Railway is a six and a quarter pound speckled trout hooked at Pine Portage near Nipigon River Bungalow Camp. It is the largest so far to be entered for the local fishing trophy, although many fine fish have rewarded anglers in the neighbourhood this summer.

The Japanese coronation ceremonies in November will probably result in a demand for more motor cars from this continent, said J. A. Langley, Canadian Trade Commissioner in Tokyo, who sailed recently from Vancouver aboard the Canadian Pacific ship Empress of Asia. The forthcoming coronation procession in which ox teams and other picturesque means of locomotion have participated in the past, will probably be largely motorized on this occasion, he said.

CUSHING

Mr. and Mrs. C. McFaul of Chuteau-Blondeau, spent Friday last in Montreal.

Mr. Lathbury of Montreal, spent the holidays, the guest of Miss B. Nichols.

Mr. Floyd Innes of Montreal, spent the holidays the guest of his parents, Mr. and Mrs. John Innes.

Mr. L. Cooke and Mr. Lorne MacRostie of Ottawa were visitors here last Monday.

Miss Helen Pridham of Ottawa, spent Thanksgiving with her parents Mr. and Mrs. A. MacL. Pridham.

Mr. and Mrs. Dr. Lefebvre of Montreal, were the guests of Mr. Thos. Cummings for the week end.

Mr. Dan. Morrow, of Montreal, was the guest of friends here on Monday last.

The Ladies of the W.A. held an Armistice Supper on Tuesday night, which was largely attended.

Mrs. Garnet McIntyre of Magog, was the guest of Mrs. D. McIntyre.

The visitors at Mrs. Harold Gill's on Sunday last were, Mr. J. Gill, Mr. and Mrs. Wm. Gill and Mr. and Mrs. Hillicker. Rev. Mr. and Mrs. Tucker and Mr. Dave Gill of Ottawa.

Mrs. Leonard Cooke of Detroit, visited friends in Grenville recently.

BROWNSBURG

A very impressive "Armistice Day" service was held on Sunday at the Cenotaph, when the Girl Guides, the Rover Scouts and Cubs in charge of their Captains, viz: Miss Hanson, Mr. Frank Vowles and Mr. W. Prosser and also the "Returned Soldiers", assembled to pay silent tribute to our boys who paid the "Supreme Sacrifice" in the Great War.

After the raising of the Flag, Mr. Taylor played the Last Post and when the plaintive notes of the Bugle died away, all paraded to the United Church which was filled to capacity.

Two minutes silence was observed when all the vast congregation bowed their heads in prayer.

The Rev. Mr. Cassidy spoke of the great heroism of "our boys" who at the call of Duty were willing to give up all that made life dear and go forth and lay down their lives in defence of our Country; he paid tribute also to the men who by the Grace of God were permitted to come back to Home and loved ones.

We were all proud of them for the part they had taken, but earnestly pray that "Peace" should continue in our Empire and so end all "Wars."

The Captains went forward to receive Wreath from bearer and placed it in front of Rev. Cassidy, who in very appropriate terms "Dedicated" it and thanked God for "our boys" who had entered into that home our Saviour went to prepare for them.

"Greater love hath no man, than that he lay down his life for his friends."

Mr. Taylor then played "Reveille" on the Bugle and sounded the Last Post.

The Captains, with Girl Guides, Boy Scouts and Cubs, accompanied by most of the congregation repaired to the Cenotaph, when Miss Lily White, (Wreath bearer) accompanied by Fred. Witham and Alex. Beckingham as Guards of Honor, placed the Wreath at the foot of the Cenotaph.

The National Anthem was then sung and the Benediction pronounced by the Rev. Mr. Cassidy and once more the mournful notes of the "Last Post" rang out.

The Meadow Mouse, the Pole-Trap and the Owl

By DALLAS LORE SHARP

On my neighbor's chicken farm recently (it is one of the largest egg-producing farms hereabouts) I saw two pole-traps—steel traps mounted on small platforms at the tops of bare, tall poles above the hen yards. This neighbor is an enlightened man, and more; he is a lover of all wild life. A man of dogs and wild pets. His large fruit orchard and larger henery, like most of our places here, is carved out of the woods, a brook-drained swamp and a rocky stretch of forest almost surrounding him.

He is not an ungenerous or a cruel man. I doubt if he ever killed a chicken; or could, his business being the production of eggs and so systematic, scientific, and predictable has the work become as quite to remove it from the field of farming and place it among the factories. He loves his work and his thoroughbred stock, and if compelled to slaughter the old birds which leave his flocks for market, he would have to find some other occupation.

But here are the terrible pole-traps for the hawks and owls. Like all sentimentalists, his mercy is by favor and not by principle. It covers his flocks, but does not extend to the birds of prey that occasionally raid his hen yards. The owls come by night unseen, and so the trap is set as a rest, high in the air, by night and day, for any passing bird to light upon, the innocent and the guilty alike.

We are all much like him in this ancient attitude toward wild life. I can think of no essential good quality not possessed by the man, nor do I know a man so wise in the ways of the woods or of the field, or happier there. I called his attention to these traps not to accuse him, but only to wonder at his inconsistency, his thoughtlessness, and to his ancient enmity and grudging mind toward nature, who asks an aim occasionally, and who, at times, takes a little without asking, of the abundance which she has in no small part helped him to produce. Out of the woods come the hawks and owls; and out of the same woods, as a vital part in the whole favorable scheme of things, come his abundant crops and flocks. Does he owe nature so little as not only to begrudge her a taste of chicken now and then, but also to menace her as a constant enemy, inflicting undeserved and unimagined pain?

For this is contrary to his own nature and knowledge, and against the proved facts of science as applied to the very business of his farm. He knows that the loss by hawks and owls is almost negligible small, that the good these birds do in the round of the year, and in the interplay of all the natural forces at work for him and against him, far outweighs the harm. Four years ago he lost several hundred dollars' worth of young orchard trees during a long spell of deep snow when the meadow voices girdled the trees just above the wire guards about their trunks. These destructive mice are the natural prey of the hawks and owls. A few more of these birds in his woodland might have prevented this serious loss in comparison with which the loss of a chicken now and then is as nothing.

In every kind of business one shares with nature a margin of loss from weather and weak stock and accident is allowed for, no business being entirely free from hazards. Knowing that exhaustive and careful scientific study has shown the whole order of the birds of prey to be friendly and positively beneficial beyond calculation, especially to farmers, the time has come when we should cease making war upon them, counting their small depredations for what they actually are in the total account of profit and loss.

I have seen a little screech owl taken from a pole-trap with a dead meadow vole clutched in its mangled claws. Could nature make a bitterer, more convincing protest than that? Death came to the mouse with the unseen, lightning stroke of the talons, but to the bird, dangling and writhing in its beating wings ceased to flutter, death came as the lizard hawks dragged their cruel length across the endless night, and dawn came, and heat and thirst finished the work of the trap.

Business is business, hens and eggs for my neighbor; but life for him, and for us all, is business and something more. Hobby Burns behind his plow one day stopped in the furrow and explained the whole difference to a mouse, the very mouse which an owl from the belfry of the village kirk would pounce upon as soon as darkness fell across the stubble field. It is hard to explain these things to a mouse, and harder yet to explain them to a man. The best-laid schemes of mice and men gang no after a-while than their minds and manners, at least of men.

I preach to my neighbor while secretly I am confused by my own mixed motives and ashamed by my inconsistent conduct. I feed the squirrels in winter and find myself obliged to war upon them in the fall. The crows at corn-planting time drive me distracted, but no bird about these Hingham hills is more constant and comforting to me in the dead of winter. I lie on my back these autumn days and watch the hen-hawks circling and whistling high in the glorious blue, creatures of the clouds

and of my own soaring fancies, and I think of my neighbor who lies on his back as often as I do and dreams on the wings of these very hawks, and sets his traps for them, too.

But I have thought my way through and beyond the steel-trap. I never had to kill a hawk nor an owl during the many years I kept hens, though the woods extend in every direction far about me. I am convinced that all birds, the whole race, and all that are left upon the face of the globe, are more than friendly, are economically necessary, and of an aesthetic and spiritual value utterly incalculable, and that the time has come, is already long past, when any slaughter of them for any reason or purpose, must be outlawed, as we must outlaw the slaughter of men in war—"Our Dumb Animals."

Done Differently In Nile Valley

Every Drop of Rain is Conserved and No Fertilizer Used

I have seen several "Valleys of the Nile." Those rich alluvial plains of the lower Mississippi are "Louisiana's Valley of the Nile." The North Platte River is "Nebraska's Nile." And the real boosters who tried to lift Florida out of the swamps and her reputation out of the mud by their own rubber boot straps went even further and called it "America's Valley of the Nile." The local enthusiasts in nearly any fertile farming region in the United States or Canada occasionally make this boast, as old as the historic river itself.

At last, before us lay the only and original Nile, Egypt's own, not only the most famous agricultural valley of the ancient world, but with the assistance of modern engineering destined to become one of the most remarkable irrigation farming districts of today. It was a great day for us when Jim and I finally lay down on the muddy banks of the White Nile at Kosti, Anglo-Egyptian Sudan, and drank. We drank deeply. It was the first running water we had seen in 2,000 miles of travel eastward across the parched sands of the Sahara. Sixty miles farther east we would find the Blue Nile which flows down to join the White at Khartoum, 200 miles away. In this vast V between the Blue and White Nile partners lies the Gezira irrigation district, three million acres of land, as level as a football field.

The word "Gezira" means island. The district has received this name because it is nearly surrounded by the two Niles. But between two rivers as it is, this Gezira plain is dry. A little below Khartoum another river, the Atbara, joins the Nile, but from there on to the river's delta at Cairo, 1,500 miles away, there is not one other tributary to the great river system. Imagine the Mississippi River flowing all the way from St. Louis to the Gulf of Mexico without one single tributary and you have the age-old Nile on its 1,500-mile march through the eastern African deserts. It rises in the mountains of Abyssinia and in the tropical jungles of southern Africa, but its only outlet to the sea is across those hundreds and hundreds of miles of flat, dry, desert wastes, a solitary artery, the only water in all North Africa. It has never failed—and it won't for the sacred Nile is as dependable as the seasons, as ancient and as certain as the pyramids past which it runs. For instance, the annual overflow occurs, just as it has done for countless ages, within a few hours of the same time every year, and the waters rise to within a few inches of the same height just as they did ten thousand years ago. The fall for the last few hundred miles is about two inches to the mile.

Jim and I rode what was left of our motorcycles across the gap in the V between the two rivers, and then followed the Blue Nile for about 150 miles down to its convergence with the White at Khartoum. We saw thousands of acres of the original undeveloped plain lying in all its nakedness, level and dry and dead. And then we saw the green fields of cotton on the new project below the Sennar dam. Each of these two was the absolute limit in its class. The one represented the utmost in primitive farming against the most discouraging odds. The other was the most beautiful irrigation project I have ever seen in the world.

An official government handbook describing the Gezira says, with true British accuracy: "The monotony of the flat unending plain is only occasionally broken by a clump of trees or a village of straw huts. It would be difficult to imagine a stretch of country of more unpromising aspect." And this is the famous Valley of the Nile—unwatered.

A young English engineer stationed in this "island" between the two Niles was asked by his mother to send home some photographs of the country in which he was working. He made prints from the two negatives, one exposed entirely black and the other not exposed at all, pure white. "One shows exactly how this country looks by day," he wrote, "and the other how it looks by night." There is nothing to photograph, nothing to see. There is nothing for the reader to imagine if he wishes to know how it looks unless he can picture in his mind's eye a perfectly flat and level black plain bounded on all sides by nothing but the cloudless horizon. In this upper crotch of the V between the Blue and White Niles, the

If Mussolini Agrees

MIGHT BECOME THE KING AND QUEEN OF ITALY

The Duke and Duchess of Apulia. There are rumors that King Victor Emmanuel may abdicate the throne in favor of the duke, his second cousin, owing to Fascism.

rainfall averages from nothing at all to sometimes as high as ten inches a year, almost all of it falling during July, August and September. And yet this supports a population of thousands of black farmers, their families, and their flocks. They do it with dura. This dura is a kind of grain sorghum which they sometimes call millet.

Occasionally there will be a large enough low spot in this great expanse of flatness to support a well, and about this well as the center of all their life and activity will be found a few black families in round mud huts. They sell water to itinerant stock owners, and caravans, attend to their farming, and regard the heavens. Their "farms" are little patches of ground usually some distance from the community center which is the well.

In order to preserve absolutely every drop of rain that falls on the ground each farmer throws up a "tera" about the lower side of his field. This tera is simply a low dirt dyke, usually not more than a foot high. It extends across the width of the lower side of his field and half or two-thirds of the way back along the two ends tapering down in height as it approaches the higher end of the field. In brief, it is a wall about the field which makes the field a watertight tank. No farmer allows any of his precious water to run off of his farm onto his neighbor's. The ground is so level—and the amount of water so little—that in a great many cases a small ridge only a few inches high is sufficient.

When the field is properly walled in it is ready for cropping, for little or no soil preparation is ever done. As soon as the land has been soaked and the rains are assured, or towards the end of July, the dura is sowed. The farmer walks along in more or less of a straight line across his field punching holes for the seed. The rows are about three feet apart and the seed holes themselves are about two feet apart. The rest of this grain drill consists of a few boys who drop any where from a half-dozen to a dozen seeds into each hole, which they cover by raking the loose soil with calloused black toes. They sow from seven to ten rows of seed per feddan, which means from seven to ten pounds per acre. When the crop is planted there is nothing more to do but go back and lie down to regard the heavens.

When the dura is about a foot high, the plants are thinned and four or five plants are left in each hole. On an average the land is hoed or

"fassed" twice. A fas is a short-handled hoe shaped like an adze. It is made of iron and is usually dull and the two-foot handle is slightly curved. Four good men are supposed to "fas" an acre in one day, but since there are hardly that many good men in the whole Sudan, it usually takes longer.

An average period of growth for the early maturing duras or millets is 90 to 95 days, but if the crop is hastened through lack of water, a fair yield is obtained in 70 to 75 days. When the grain is ripe, the heads are stripped off with a wicked looking knife and carried in to the community threshing floor on the heads of the wives and slaves and piled in a heap. The threshing is simply a process of beating the grain out with sticks. These Sudanese do not even use a respectable flail which would at least be a little easier. It takes a good many licks to pound up those heads so that all the grain is broken out. But the people might as well be pounding their grain as continuing to regard the heavens.

When the grain is sufficiently threshed—and when the wind is just right—the grain is cleaned. The broken heads and the grain are scooped up by hand into a big tray made of woven grass and a woman gently shakes the tray high above her head. The grain falls on the hard dirt floor in a little pile about the woman's toes. If the wind is too strong, the grain is blown away and wasted; if not strong enough the chaff falls with the grain. The only thing to do is sit down and regard the heavens until the right kind of a wind happens by. At best, the grain cleaned in this way contains a great deal of dirt and small stones.

The average yield varies, according to the director of agriculture, from one ardeb per feddan up to four or five, with a fair average of two or a little better. He means by that an average yield of about 700 pounds per acre.

The threshed and cleaned grain is stored in a dug pit called a matmura. The most common matmuras hold about 100 bushels, but the larger ones, which sometimes hold as high as a thousand bushels are more efficient. The grain is thrown right into the dirt hole until within a foot or so of the surface. Then the chaff and cleanings are piled on and the last few inches filled with earth heaped up in a mound to drain the water off, if any. These Sudanese natives are generally improvident, but they do fill their mat-

muras in the good years to tide them over the lean. They and their ancestors have been learning this simple lesson of saving up for a dry day for countless centuries. Those who did not learn to save usually died of starvation before they were old enough to have descendants and so only the sons of the provident have survived the ages.

The dura stalks are fed to the cattle, sheep and goats, and the dura itself supports the animal and human population. It is the base for the national drink, "merissa," a form of native beer. Every Sudanese mud hut usually has a pot of the dough-like food made from this versatile grain and the people feed themselves pot-bellied upon it. I have tasted it and sometimes have even been glad to make a meal upon it when there was nothing else within the limits of that unbroken horizon, and when baked like a huge pancake two or three inches thick, it is really not so bad.

The live stock industry is taken very seriously by these Sudanese farmers, but very often not for the purpose of making money. A man's wealth and general social and political standing is largely reckoned upon the number of camels he owns, for instance. In spite of the demand for camels as carriers and in spite of the fact that some are maintained for their milk, there is a considerable surplus of animals which are kept only for the pleasure and reputation of the owner. He must have his camels—and this is no an advertisement. The eastern Sudan exports several thousand camels every year to upper Egypt for slaughter for meat. They are marched down by desert routes, and take a month or more on the journey.

As a whole, the unirrigated part of the Gezira triangle between the two Niles is not the kind of country that real estate boosters have in mind when they refer to their own country as "The Nile Valley of the Nile." It is an inspiration to look upon it, those hundreds of square miles of flat black plain, several feet deep in a stiff loam of windborne soil with a considerable percentage of clay, and stretching as far as one can see as level as a floor, as smooth and even as a football field. What would it be like if it could be irrigated? It would be the perfect irrigation district I thought as I recalled those crooked little ditches that struggle about the hills in my own irrigated homestead in Wyoming. To-morrow we would visit the great dam, two miles long, across the Blue Nile at Sennar, and below that we would see Egypt's real Valley of the Nile.

The Angler Bites

"Sometimes it would seem that anglers are greater fish than the trout. They will bite on anything." Such is the observation made from a fund of experience related by National Park Rangers in the recently published Stanford University Press Book, "Oh, Ranger!"

"They will trudge miles upon miles, with nary a grumble, because somebody has told them of seeing whopping big trout in a certain remote lake. That recalls a fishin' story. One time when a newspaper writer was visiting Yellowstone he noticed a big club near the cabin occupied by a ranger stationed at Slough Creek.

"What's the club for?" asked the writer.

"Aw, that's my fishin' club," explained the ranger.

"Fishin' club?"

"Yeah, fishin' club. I take it when I go fishin' down the stream. There's a big trout in there that's grabbed every fly I had but one and bit the leader in two. I take the fishin' club along to whang the big devil over the head and drive him away so I can catch some of the other fish."

"I hear you are not going to marry Mr. Newcome after all. Why is that?" "Oh, father thinks his position isn't good enough and mother thinks he is too old for me. My aunts think he is too good-looking to make a satisfactory husband, and my Uncle Jim says he has heard rumors about him. My cousins tell me he is a flirt, and I—" "Yes, and you—what do you think about it all?" "Oh, I think I ought to wait until he asks me."

When Thanksgiving Comes

As Told By Our Friends

From a Grandma

Thanksgiving comes but once a year, but our hearts should be filled with thanksgiving every day of the year for being placed in this beautiful land of peace and plenty.

I am thankful that there has been no deaths in the family this past year, and that a dear son, whom we feared had tuberculosis, has nearly recovered, after having had his tonsils removed. I wish we might go to grandmother's, but I am grandma now, with eleven lovely grandchildren. I expect three married sons with their wives and five children (one daughter with six can't come), my husband's sister and her husband, and as there are three sons and two daughters at home, one son's best girl, we will have quite a tableful.

I am not very strong, so don't have very elaborate dinners. Just oyster soup, and crackers, roast chicken and dressing, potatoes, turnips and squash, celery, bread and butter, jelly, pickles, cabbage salad, suet pudding with sauce, pumpkin and berry pie, cake (cocoa) and coffee and new cider or grape juice.

After the dishes are done, we will have some music on the piano and violin, also singing, and perhaps speaking. The younger ones play tricks and games. Then we have nuts and pop corn and then some eat a "bite" before leaving for home, and then they should be thankful if they are not sick next day.

Company From the City

As our parents are gone, we have no grandma to take our three boys for an old-fashioned Thanksgiving dinner. Instead, I am planning to invite my brother and family of four children, two young men and two young ladies from the city.

Our children are young men also, and that will be company for them as well as us. We will have music and visiting. If the weather will permit will take snapshot pictures.

Menu for the Thanksgiving dinner:

Oyster Soup
Roast Yellow-legged Chicken with Sage Dressing
Mashed Potatoes Giblet Gravy
Baked Squash
White and Brown Bread and Butter
Mixed Pickles Corn Relish
Celery Cranberry Sauce
Quince Jelly
Cinnamon Drop Cookies
Fried Cakes Rolled in Sugar
Pumpkin Pie Coffee
Candle Salad

Home-made Candies, Nuts and Fruit
We are thankful we are farmers and have health to enjoy all the blessings and good things from the farm.
L. MOTHER.

A Heart Full of Thankfulness

I am most thankful for my good home and for my ability to prepare and share with others some of the good things God has so bountifully provided for us at this Thanksgiving season. We are planning to spend Thanksgiving Day with grandmother and grandfather, who, if all their children and grandchildren could come, would have thirty-six, but only about half that number can come. We will have for dinner, roast turkey with dressing and brown gravy, cranberry sauce, mashed potatoes, baked squash, pickles, pumpkin pie, doughnuts, rolls, butter, cheese, sweet cider and tea. The children will be entertained with children's games, the older ones will spend the time visiting and helping grandma with the dinner, as grandma has no maid.

The Foreign Menace

Ottawa Droit (Ind.): Is it absolutely certain that by increasing the proportion of British in our population the bond which unites Canada to the British Empire is going to be made more solid? Is it not admitted today that 4 1/2 the French-Canadians who, since 1760, have at least twice saved our Dominion for the Empire? British historians who know the facts do not comment on this any longer, it has become so obvious to all sane people. Besides, who severed New England from Old England, a time of the American Revolution? The fathers of the Republic to the South were themselves of British descent.

EXPECTING A LOT

"Say, caddy, this change you gave me is a dollar out of the way. Can't you count?"

"Say, what are you expecting of the company? A chauffeur and an accountant too?"

The difference between some campaign orators and other big winds is that the latter carry all before them.—Philadelphia Inquirer.

PALM BEACH PAYS AN IMPRESSIVE TRIBUTE TO VICTIMS OF THE HURRICANE

The crowd at Woodlawn Cemetery, West Palm Beach, on the day proclaimed for memorial services to the dead of the Florida storm.

WEAK AND NERVOUS

A Condition Due to Watery Blood—Easily Corrected Through the Use of Dr. Williams' Pink Pills.

Thin, pale girls lack the power of resistance to disease that rich, red blood gives. Nervous breakdown is the result of thin blood. So is indigestion, headaches, backaches and many other troubles. Girls suffering from thin, impure blood need just the help Dr. Williams' Pink Pills can give. For many years Dr. Williams' Pink Pills have been a world-famous blood-builder and nerve restorer. They actually make new, rich, red blood which imparts new vigor and life to all the organs of the body. Their first effect is usually shown by an improved appetite; then the spirits revive and restlessness at night gives way to health restoring sleep. For sufferers from anaemia, nervousness, general weakness or physical exhaustion Dr. Williams' Pink Pills are a restorative of the utmost value. This is proved by the experience of Miss Sarah A. McEachern, R.R. No. 3, Brule, N.S., who says:—"About three years ago I became very weak and nervous. I had pains in my side and back. I also had frequent pains in the back of my head and neck. I was very pale and very weak. I had attacks of nervous irritability, and at times I was so nervous that life seemed hardly worth living. While in this condition a friend strongly advised me to take Dr. Williams' Pink Pills. I began taking these pills and used them for about two months with the result that there was such an improvement in my condition that friends would ask me what I was taking, and I was only too glad to tell them it was Dr. Williams' Pink Pills. I am now enjoying good health and am glad to give this statement for the benefit it may be to some other sufferer."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Again Vesuvius Makes a Threat

Columns of Smoke and Deep Rumbles Warn of Fiery Activity Going On

Naples—Vesuvius is fretful. She is flashing red by night and by day pouring into the blue sky a column of sulphurous smoke, which floats off in a breeze for miles upon miles, or in calm air rises straight toward the vault of the sky for many hundreds of feet.

Vesuvius in normal mood shows only a wisp of smoke and does not make the night over her red with sudden flashes of fire, nor does she rumble so. A few weeks ago she was, to all appearances, sound asleep. She takes long sleeps: she has been known to sleep for 500 years. So long did she sleep after her destruction of Pompeii and Herculaneum that it became almost a legend and was forgotten by the peasants dwelling about her. Goats grazed in the crater upon the rich green grass that grew along the shores of two lakes deep within that mighty hole.

The Eruption of 1631

Then suddenly she gave warning, which few heeded, and poured seven rivers of fire down into the surrounding villages, destroying them and killing hundreds. One of these rivers rushed pell-mell into the Bay of Naples, where the water boiled for days. This was the great eruption of 1631. The peasants dwelling in Torre del Greco and in Massa di Somma and other small settlements that were wiped out took it that demons lived somewhere under the mountain.

Now Vesuvius is again in eruption; not a tremendous one such as the recorded eruptions of the past, but one at least showing she still has vitality. She has not driven the population away from her base, but her grand pyrotechnical display has again become a lively attraction for visitors.

The best time for a visit is at dark.

What is more satisfying after the bridge game than a cup or two of Red Rose Tea? Millions of Canadians prefer it to any other because of finer flavor, remarkable strength and dustless purity. Put up in aluminum—the only material which completely protects good tea.

NEW

The great bulk of the mountain is outlined against the sky and the reflection of Vesuvius's fires plays above the crater like sheet lightning on a summer evening. Flash after flash illuminates the sky and gives a coral pink color to the smoke.

The automobile has to be abandoned as the tortuous trail becomes cluttered with lava and cinders. A horse becomes your companion. You must put your trust absolutely in his good sense. He has climbed the mountain many a time before and knows the tricks and pitfalls of the sliding lava. If men prefer to go in comfort by a funicular railway in the light of the sun, let them go. Why seek mystery and grandeur and beauty where raucous voices suddenly bring you back to city streets and food and the commonplaces of life?

The faithful horse trudges slowly. Cinders and lava slip from under his feet, but he seems to sense every danger. The climb becomes so steep that in many places you feel as though you might easily slide backward from your mount. The way is lit now and again by red flashes against the smoke clouds above. At length it becomes too steep and too rough for further horse travel. You must go on afoot. A feeling of greater security comes as you stand again upon your own feet and trust to your own judgment and your own sight.

You have perilously advanced from the sea level, passing first vineyards and gardens, then a growth of various trees, including some where a feeble attempt has been made at reforestation, and at length pass through scrub pines and several varieties of hardy vegetation to a stretch of utterly lifeless burned rock. Nothing grows here; nothing could grow in such a waste.

The red flashes continue to light your way as you step from one jagged piece of lava to another. Then suddenly a cloud, a fog bank such as London knows, blows under the smoke, dims them. It moistens your clothes and makes the air distinctly chilly. A the edge of the crater the fog has wrapped you in oblivion. Gray mist has made you blind.

You feel that if this is all, at least you have been repaid, for you have seen the approach to the world's most famous fire and one of its most destructive. Presently there is a sound, an appalling sound. It is neither thunder nor the roar of heavy seas on a coast, but rather a weird combination. It makes you stand and listen, half wanting to hear it again, and yet, somehow, dreading it. It comes again and again, seeming particularly weird in the enveloping fog.

Now the fog lifts slowly. Through it you make out fires in fantastic shapes as pale as glow worms. Brighter and brighter they grow as the mist dissipates, and before you fully realize it you are looking into a mighty abyss where fire paints strange patterns in the dark below. It is the color of the red sun as it sinks into the horizon of a tropic sea. The never-ceasing red flashes tell where the active crater is. You feel drawn on like a moth drawn to a lamp. As you move toward it the rumbling grows louder and louder. The flashes become more blinding in the darkness. Over jagged rock formations, on, on toward that place of awe, you grope your way, halting here for the fiery sky to point the next rock upon which to leap. It is necessarily slow, but it gives exhilaration. Suddenly through the cracks beneath you see a red glow. Twenty feet below is fire. A further advance and it shines in your face, only ten feet down. Now it is five. Then a wide vent in the rocks appears and you see, rolling by, a river of fire!

Close by the Flames

You wish for a gas mask. The smoke from crevices all around is charged heavily with sulphur. The winds, however, befriend you and the fumes are blown here and there, allowing frequent breathing spells.

Shall we dare a further advance? Could the miracle be greater by challenging fate more imperiously? A terrific rumbling far below, the grinding rocks as they fall back into the crater, a sky illumined as only such a fire could illumine it.

And this mighty mountain is but one of a group that once stood near by. The whole Bay of Naples is the crater of a volcano that baffles the imagination. Under that sea other cones dwell. Etna and Stromboli are but children gone a little astray. Now, back to the horse. How dark it is below! It will take a long time to reach the nearest light, but we shall halt at a little hovel half way down the mountain and take a glass of Lacrima Christi, the wine of the district, and rest the horse. Far away in the distance he lights—such little

Mayor's Gift

"Lindy" was a citizen of the North Ontario Woods. He is now a citizen of the United States, although he has not taken out many papers. He chews every paper he sees. The gift of Mayor Houde of Montreal to Mayor Jimmie Walker of New York. "Lindy," as Mr. Walker named him, was the first shipment to be handled by the Canadian Pacific Express Company, on its daily Montreal-New York air service. What he thinks of this pioneer air service has not been recorded, but Canadian Pacific officials who greeted him at the New York end state that he was in fine fighting fettle on arrival. Several hundred pounds of other express matter accompanied him.

Light men can make—form a crescent around the Bay of Naples, stretching from Naples to Sorrento. Behind, the flashes and rumbles go on.

A LAUGHING BABY IS A GREAT JOY

What can give more joy to the home than a laughing, happy baby. The well child makes everyone happy with his tuneful gurgle and bright, laughing eyes. It is only the sickly baby who is not a laughing baby, for it is the little one's nature to be happy when well.

Mothers, if your baby is cross, if he cries a great deal and no amount of attention seems to make him happy, give him a dose of Baby's Own Tablets and he will soon be well and ready to radiate that happiness through the home again.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels and sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fevers and correct those troubles which accompany the cutting of teeth and in doing those things—and doing them well—they make baby happy and keep him happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"A strong wind has driven many a man out to sea."

Canada's Status

Quebec Soleil (Lib.): The High Commissioner of Great Britain to the Government of Canada has arrived in Ottawa. This marks an epoch in the history of the political evolution of the Dominion. . . The nomination of a High Commissioner was inevitable from the day when the Governor-General ceased to be the agent of the British Government. We are autonomous, completely autonomous, but we have not broken our association with Great Britain; for different reasons it will pay us to maintain that relationship.

Fifteen nations signed the peace treaty, and one thing all have in common is the conviction that fourteen aren't to be trusted. —Muskogee Phoenix.

We assume that the first day of the millennium will be given up wholly to wets and dries agreeing as to how the liquor problem could be solved. —Louisville Times.

With the campaign at full blast, and with hurricanes and tornadoes hitting here and there, it might not be inappropriate to refer to 1928 as the "Year of the Big Wind." —Seattle Times.

Minard's Liniment for aching joints.

FINANCIAL NEWS

Cockshutt Plow Expands Its Scope.

Owing to the fact that Cockshutt Plow Company has signed a contract to market Allis-Chalmers Co.'s tractors in Canada, and to the fact that this latter company has decided to enter the tractor business, which will involve sales of about \$6,000,000 in 1928, or one-fifth of the total business, it is thought that this expansion will be reflected in the activities of Cockshutt Plow. As American companies this year have found their most lucrative field for tractors this year in the Canadian West, and the tractor business itself has proved one of the most profitable lines handled by farm implement companies, this is a development of major importance to Cockshutt, and estimates are that sales of the tractor will increase the company's turnover by from \$2,000,000 to \$3,000,000 a year, with corresponding increase in net profits. Tractors enter Canada duty free, and Cockshutt's sales offices will handle the tractors on the same basis, as though they had been manufactured in Canada. It has been an expanding and profitable line for Allis-Chalmers.

Cockshutt is building several new warehouses in Western Canada to take care of its increasing business. It is also having better business in the east, and not alone from the farm community. General Motors and Ford have proved good customers for the department which manufactures motor truck bodies.

Unscrupulous Tactics in Buying and Selling Mine Shares

That there have been unscrupulous tactics used on the part of certain traders, with a view to breaking the market on various listed mining stocks, has been brought to the attention of the Financial News Bureau. One house received a call, to all appearances from a responsible trader, to sell a block of 4,200 shares of Teck Hughes at the market. This order, when executed, broke the stock badly. Later, the man absolutely repudiated the order and a trail on the long-distance call found it to have come from a "gay" station.

Similar instances have been cited. Fictitious buying orders on a certain low-priced producer, in the names of various doctors and professional men recently moved this stock up sharply. As a result of these tactics, brokerage houses are checking the orders very closely.

Mining Briefs

Amulet has the street guessing at present. It was rumored that important ore was cut in diamond drilling. Further reports came from Rouyn to the effect that the drills had cut 40 feet of high-grade copper-zinc ore at a depth of approximately 220 feet. At the time of the report the drill was said to still have been in ore and it was thought that this was an entirely new body, lying about 200 feet to the east of the "C" ore body.

Another despatch dealt with development and it was stated that the shaft was now down 225 feet, with timbering completed to that depth. Work is now said to be in progress on the foundation for the new hoist which is expected to be on the property by November 1st.

IN WHAT

"She says she's all in." "She can't be referring to her clothes, I'm sure."

Just a tasteless dose of Phillips' Milk of Magnesia in water. This is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

The Wife Hunts Too

"I am not prepared to say that your wife will make a success of it—I don't know your wife (I don't know my own)—but you should be sufficiently well acquainted with her to tell whether she would get a kick out of it or a grouch." Captain Paul A. Curtis, "Field and Stream" shooting editor, suggests in the November issue of that magazine that the hunter include his wife on a trip.

"Women are now fighting for ring-side seats for a title bout instead of for standing room on the sofa when a mouse appears on the horizon," he says, "and when they are successfully swimming the channel, making transatlantic hops, holding up payrolls as well as hubby's bankroll, and visiting the interior of Uganda for elephants, it's a bit flat to say what they cannot do. It is not a question of what they can stand, but what they are willing to put up with."

"Tell her she has got to forget that new fur coat," advises this "Field and Stream" writer. "If it's a bear hunt you contemplate, or if it's just a few days' duck shooting at some local resort, that she has got to forego the possession of a little hat she scooped for in Madame Chez Blois. If she passes that test she is eligible—no woman will pass up a new hat for an idle fancy, not if she's sober!"

"Let it be known and thoroughly understood that she is going out to do a man's job, that it really is not a woman's vocation and that she must face it entirely from a masculine point of view if she is to make good."

"To begin with her equipment must be right," adds Capt. Curtis. "It is only fair to you, to her guide and to herself. She must wear two pairs of woolen socks in a clumsy pair of shoe-pacs for the same reason you and the guide do, even though she never wears any but the sheerest silk at home and abhors wool. For the rest let her equipment be just what common sense would direct you to take for warmth and protection from wind and rain. Remember it is a man's game; so she needs a man's equipment."

Veterinaries use Minard's Liniment.

Labor and Its Life

London Observer (Ind.): Labor in its most ambitious mood has no desire to take over a country made bankrupt by industrial disensions. It realizes, too, that weak though capital may be when confronting a democracy, it has an immense economic advantage. Its mobility permits it to abandon a stricken field whereon Labor must stay and starve. Appreciating these facts, Labor is formulating two principles of action—in politics, independence; in economics, co-operation. It may go forward confident that its political opponents understand and welcome its attitude.

Immortality

London Daily Mail (Ind. Cons.): It is a truism that the famous can have no private life. The relations and friends of a great man, more particularly when he is dead and has passed into history, must resign themselves to seeing the weak points of his character as well as his virtues exposed to the public gaze in the interests of truth. If all biography is not to be reduced to a monotonous level of meaningless eulogy these things must be.

Perhaps the most convenient way to pass an interstate bus while en route is on any parallel road in the adjoining county. —Detroit News.

Sour Stomach

You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

War Trophies

Manchester Guardian (Lib.): The other day a local council decided that a gun displayed in a public place as a trophy of the Great War should be broken up and flung on the scrap heap. The Mayor of Southwark is raising the same question on a larger scale. He intends to consult the Metropolitan Mayor's Association and find out whether they share his opinion that it is useless to continue the exhibition in public buildings and parks of guns and other munitions captured from the Germans. His view is that it would be much better to sell them, if possible, or else to scrap them. He finds a widespread dislike of these grim exhibits, not only among people who hate war, but among ex-service men who object to being reminded of what they went through.

Worthy of His Hire

London Evening Standard (Ind. Cons.): It is infinitely better that men of ability and enterprise should leave Westminster for the city than that they should stay in politics and bleed of the meagreness of their material rewards or devote their energies to the increase of those rewards rather than to single-minded service of the country. We want in these days men of diverse types in politics. There will continue to be men bred and trained to the political life who will dedicate themselves—and that usually—to politics entirely, but to have the Houses and the Government filled by these is to give ourselves over to an ver-stiffening bureaucracy.

**—WEDDING BELLS—
KELLY—FARARA**

The marriage took place recently at the home of the bride's parents in Calumet of Ruth, third daughter of Mr. and Mrs. Farara, to Elmer Kelly of Avoca, Que.

The Rev. Mr. Somerville of Avoca United Church officiated.

The house was artistically decorated with flowers and ferns. The bridal party stood under an arch of autumn leaves, entwined with blossoms.

The bride, given in marriage by her father, was very sweet and dainty wearing a filmy gown of white crepe, a wedding veil held in place by clusters of orange blossoms and carried a bouquet of shell pink and white dahlias and maiden hair fern.

Miss Annie Farara, who was bridesmaid for her sister, wore a draped gown of mauve chiffon over satin.

Mr. Laurence McGill of Point-au-Chene acted as best man. Mrs. Farara, mother of the bride was gowned in navy crepe satin. After the ceremony a delicious wedding supper was served by the Misses May and Grace Farara, after which Mr. and Mrs. Kelly, travelling by motor, took their departure carrying with them the good wishes of their many friends.

CALLAGHAN—JONES

A very pretty wedding was solemnized at the Thos' Gore Church on Saturday Nov. 10th, at 5 p.m., when Miss Dorothy Jones, daughter of the late Mr. and Mrs. F. Jones of Montreal, was united in marriage to Jaa. Callaghan, son of the late Mrs. T. Callaghan of Dublin Ireland. The ceremony was performed by the Rev. Mr. Wadsworth. The bride was given away by Mr. David Maxwell, the wedding march being played by Mrs. E. Inglis and was attired in a pretty dress of white satin and veil, carrying a bouquet of pink roses and lilies of the valley. The bridesmaids were Miss Amy M. Maxwell, dressed in blue taffeta, Miss Amy Jones, who was gowned in mauve. Miss Kathleen Maxwell as flower girl looked sweet in rose taffeta and pink roses. Mr. M. Corner was best man. The groom's gift to the bride was a rope of pearls, to the bridesmaids, bar-pins and to the flower girl, a bracelet. A reception was afterwards held at the summer home of the bride's parents, at which about 140 guests were present. Those attending from a distance were—Mr. and Mrs. D. Maxwell, Mr. P. Maxwell, Mr. S. Maxwell Sr., Mr. S. Maxwell Jr., the Misses Amy M. and Kathleen Maxwell, Miss Amy M. Jones and Mr. Wm. Jones, Mr. and Mrs. Russell Sylvia, M. H. Sylvia, the Misses M. Jones, P. Covant, R. Patterson and H. Gaudy, Mrs. Geo. Patterson, Mr. E. Tingman Mr. J. Morgan and Mr. J. Anderson.

He works with MAGIC

THIS MAN is putting up telephone poles. Early in the morning he is out making a way for the wire that is to come. At night when the gang gets back to camp he is tired. But he likes it. There is zest in the work he is doing, for he is in new country. There have never been telephones here before. He is blazing the trail. After him will come families and homes and stores and factories to make another city. Over the wires on the poles he plants there will be voices and laughter, business will hum, all the world will draw closer. He works with magic. The wire transforms time and distance. Today you can lift the telephone at your elbow and within seven minutes hear the voice of your friend in England say: "Are you there?"

THIS MAGIC in the telephone has not come in a day. It has come with year after year of experiment and improvement. The telephone of today is no more like the first telephone than a machine gun is like a bow-and-arrow. And the telephone of tomorrow will surpass the telephone of today. Tomorrow perhaps, this telephone at your elbow will bring you the face of the person you talk with, will hold new magic we now do not dream of.

THIS IS the urge to improve—to seek and to find something always better—which has been the definite policy of the telephone business since the first crude instrument reproduced the voice of its inventor fifty-odd years ago. By no other policy could the telephone have kept pace with this country or contributed to its progress as it has done in reducing Canada's wide distances and differences of geography. And by no other policy can the telephone now meet the responsibility of serving Canada's future.

CANADA'S FUTURE is at least twenty years of unprecedented growth and prosperity. All the signs and barometers of business point to it. All the shrewdest prophets of business predict it. The signs and the prophets are so sure, and the future is so unmistakable, that within the next five years more money will be needed for extension of the telephone system in Ontario and Quebec than was spent by the business in all its first forty years.

THE MAN pushing poles and wire into a new country and the foresight which now is planning over one hundred million dollars of new plant to meet the needs of the next five years come from the same policy and the same purpose—to give Canadians facilities of communication worthy of their country and its future.

Published by The Bell Telephone Company of Canada to tell you something about the telephone business and the people in it.

Messrs Bradford & Matthews take great pleasure in announcing the opening of their new dairy situated at the west end of Grace Street, namely the "Lachute Dairy."

This Dairy is equipped with the most up-to-date machinery for the handling of milk and all produce is pasteurized unless otherwise ordered and is contained in thoroughly washed and steam sterilized bottles.

Those wishing to patronize us and promote the health of the town will do well to phone their orders to No. 74, or communicate with the driver, who may be seen on practically every street in town.

Phone No. 74, Lachute Mills.

COMING EVENTS

Community Entertainment.

A Community Entertainment consisting of two short plays and a Christmas Tree for the benefit of those attending the Academy and the Rural Schools, will be given in the Auditorium, Lachute, on Thursday, December 20th, from 7 to 9 p.m., by the Literary and Dramatic Society.

The Intermediate C.G.I.T. of the United Church intend holding a Tea and Sale of Home Cooking, on Dec. 28th. Keep the date open.

SHOOTING MATCH.—Will be held on Saturday next, November 24th, at the farm of Mr. Geo. Stanforth, on the Brownsburg Road, to commence at 12.30 p.m. sharp.

WHAT EVERY WOMAN KNOWS
This is the title of the 4 Act Play which is to be presented in the Lachute Auditorium on Friday Evening December 7th., by the Lachute Dramatic Society. The Plays given in the past have been well patronized and highly appreciated, so don't miss this one as it's going to be GOOD.

BAZAAR

The Ladies' Aid of the Lachute United Church are holding a Sale of Fancy Work, home made Cooking and Candy in the Church Hall on Thursday afternoon, November 29th. Tea will be served from 3 to 6 o'clock.

INFORMAL TALK

The Literary Section of the Literary-Dramatic Society is very glad to announce that Mr. J. W. Brunt, the former principal of Lachute Academy will be with them on Tuesday evening Nov. 27, at 8.15 o'clock, in MacArthur's Hall. Mr. Brunt, as speaker of the evening, will give an informal talk on "Some Modern Authors." All members of both sections are cordially invited to be present to meet Mr. Brunt again. A short but important general business meeting will be held at the close.

NOTICE

I will be in Mr. Russell Rodgers store on Nov. 23rd and 24th, also on Nov. 30th and Dec. 1st, for the purpose of Collecting the School taxes for the Parish of St. Jerusalem.

LOCAL NEWS.

Miss Ethel Dixon spent the week-end with friends in Montreal.

Miss Louise Parker of Montreal, was the week end guest of Mrs. A. Beers.

The Misses S. and E. McGibbon spent the early part of the week in Montreal.

Miss Ethel Doig spent the week end in Chateaubourg the guest of Mrs. John Douglas.

Mr. and Mrs. J. D. Campbell are spending a few days with friends in Montreal, this week.

Mrs. L. Tomalty of Dalesville, is spending a few days with her mother Mrs. D. MacPhail this week.

Mrs. Thos Grey of Grenville Bay was in town on Tuesday last and paid the Watchman a friendly visit.

Mrs. Parker and family of Smith's Falls, Ont., returned home after a pleasant visit with her father, Major S. E. Smith.

Miss E. Hamilton of Montreal, spent a few days the guest of her parents Mr. and Mrs. R. Hamilton last week.

Mr. and Mrs. J. P. McKimmie, Mr. and Mrs. W. S. McKimmie and son Jack returned home from a pleasant visit with friends in the States.

Mr. E. Dority accompanied by his little son Norman, returned home on Sunday from a pleasant visit with friends in Windsor, Ont.

We have been treated to all kinds of weather of late, but this morning we awoke to find the ground covered with snow and the trees looking beautiful in their winter garb of pure white.

The Watchman has a nice stock of Personal and Private Greeting Cards for Christmas and New Year. All orders are executed on the shortest notice and the prices are very reasonable.

Mr. Norman Drysdale left last week for Dalhousie, Que., where he has secured a position. Norman apprenticed with T. McQuat and Son in 1925 and has continued working there ever since. We wish him every success in his new work.

Mr. J. M. Wiswall of East Angus, was the week end guest of Mr. and Mrs. A. W. Muir and on his return home was accompanied by Mrs. Wiswall and little daughter, who have been the guests of her parents for the past two weeks.

Quite a number of our progressive farmers are taking in the Royal Winter Fair at Toronto this week and two car loads of stock are there in keen competition. We doubtless will have good reports of their success as Argenteuil generally manages to land some of the coveted trophies.

Mr. and Mrs. Duncan McPhail held a reception at their home on Wednesday last in honor of the marriage of their son Roy to Miss Gertrude Grisdale. A large number of friends were present and the bride was the recipient of many handsome and useful presents. The happy couple leave this evening (Thursday) for a few days in Ottawa en route for their home in the West.

The "Euchre" given in the Auditorium last Tuesday evening proved a wonderful success, over four hundred participating in the pleasures of the evening. The purpose of the gathering was to secure funds for the further embellishment of the Catholic Cemetery in the West End and a substantial sum was realized for this worthy cause. We congratulate our Catholic friends in their desire to make "God's Acre" a place of beauty where, when it comes to the end, their loved ones may be laid away in pleasing surroundings. It is a mark of respect that we should keep such places in true reverence.

BROWNSBURG UNITED CHURCH

Sunday, November 25th,
11 a.m. and 7 p.m., the Pastor will preach.
10 a.m., Sunday School.
Friday at 7 p.m., Choir Practise.
A welcome to all.

WEDDING BELLS

McPHAIL-GRISDALE

A very pleasing event took place in Ottawa on Monday of this week at the Gospel Tabernacle, when Miss Gertrude Grisdale of Ottawa, was united in marriage to Mr. Roy McPhail, only son of Mr. and Mrs. Duncan McPhail of Lachute, Que., the ceremony being performed by the Rev. W. E. Powers. The bride wore a dress of powder blue georgette and cut velvet with hat to match, her only ornament being a pearl necklace, the gift of the groom. She was attended by Miss Gertrude Baird, who was gownned in fawn georgette and velvet with hat to match and wore the groom's gift, a gold bar pin with a ruby. Mr. Shannon acted as best man. After the ceremony, a buffet luncheon was served at the home of the bride's brother, Dr. J. H. Grisdale. Mr. and Mrs. R. McPhail are spending a few days with his parents, prior to leaving early next week for their home in Glen Ewen, Sask.

HYSLOP-McFARLANE

On Tuesday evening November 13, a pretty marriage was solemnized at Knox Manse, Saskatoon, when Miss Elizabeth Ellen McFarlane of Hoozier Sask., and formerly of Upper Lachute became the bride of Joseph Anderson Hyslop, also of Hoozier. The ceremony was performed by Rev. J. A. MacKenzie and was witnessed by a group of relatives and friends. Mr. and Mrs. Hyslop will reside in Hoozier.

CUSHING

Mr. A. Graham spent Monday last in Montreal.

Mrs. L. M. Gaston spent Friday in Hawkesbury the guest of her father Mr. A. Gray.

Miss Alice Davidson left on Monday night to visit Mrs. Archie Kains of Ottawa, for a few weeks.

Mr. and Mrs. Johnston Smith were guests on Thursday of last week at the home of their daughter Mrs. Fred Wilson of North River.

Mrs. F. Douglas and daughter Mildred, who have been spending a few weeks at the home of her brother, Mr. E. Noyes, have returned to their home in Montreal.

The Community Club is holding a little Social Evening on Friday night of this week when a short programme will be put on for the entertainment of the members and their friends. All welcome.

Miss Evelyn Mitchell, the travelling Field Secretary of the W. M. S., gave a very interesting address on Monday night of last week and was the guest of the Rev. and Mrs. Jobb, while in Cushing.

A very pleasant meeting of the Ladies' Association was held at the home of Thos. Weir, Sr. on Thursday last and among other business, it was decided to put electric lights in the Manse, stable and barn, to change the lights in the church, so that they would not be so glaring and to have a Christmas Tree in the Church on Friday night Dec. 21st, at St. Mungos.

SCOUT NEWS

The Fox Patrol was complimented on its successful efforts to have the hall nice and warm. It was indeed a pleasure to work in comfort and we hope it will be as well heated next week.

Scouts will be on the lookout from now on for any toys that are of no benefit to the present owners but which will gladden the hearts of less fortunate children.

The competition is getting near its close for this month. Last week's competition on the Scout Law sure was a booster for points. The Patrol stands as follows,—

Wolf patrol, 361 points.
Bulldog patrol, 357 points.
Crow patrol, 355 points.
Fox patrol, 327 points.

BIRTHS

McCULLOUGH.—At Isle aux Chats, on Thursday November 15th, 1928, to Mr. and Mrs. Proven McCullough, a daughter.

Fresh from the Gardens

THE YELLOW SEVEN

The Barrier of Fire

By EDMUND SNELL

Illustrated by R. W. SATTERFIELD

BEGIN HERE TODAY

Captain John Hewitt, Commissioner of Police at Jesselton, British North Borneo, has as guest Enid Bromley, daughter of Chard Bromley, new manager of the Baniak-Baniak rubber estate. Peter Pennington, engaged by the government to apprehend Chai-Hung, leader of The Yellow Seven, a gang of Chinese bandits, loves Hewitt's sister, Monica Viney. Jocelyn Gwynne comes to Jesselton and tells Pennington that he knows Chard Bromley and that Bromley has no daughter.

NOW GO ON WITH THE STORY

"Anyhow, I had been having a spot with Chard Bromley at the hotel. Just as I was thinking of pulling off, a notorious old had tried to catch him for money. Bromley's a pretty decent little chap, taking him all round, and I thought my interference was justified. Soames hadn't heard what I'd said to Bromley, but I gathered from the look he gave me when he cleared that he understood what had come between the planter and his generosity. I followed him out, partly out of curiosity and partly because I wanted an excuse for going—and, leaning against the stone parapet, I saw Chai-Hung. He was in pukka evening-kit and his shirt front was immaculate. About half a dozen paces from him a large car was waiting. Soames walked straight up to him and, before I could collect my senses, they had driven off together."

"Soames and Chai-Hung," murmured Pennington. "I don't think I remember Soames."

"Oh, he's an actor-feller—rather a clever impersonator as a matter of fact—who washed out of a revue company while they were playing at Singapore. Drugs were his chief trouble, I understand."

"Chard Bromley's over here now," said the Commissioner. "By the way, you referred to him as a little feller; I should hardly call Bromley little, would you, Dawson?"

Dawson shook his head ponderously. "Scarcely."

Gwynne looked from one to the other in amazement.

"Are you sure?"

"Positive." The Commissioner smiled condescendingly at the younger man, who had crimsoned to the roots of his hair. "His daughter's staying at my place now."

"Daughter?"

"People do have daughters, you know," put in Dawson.

Pennington laughed.

"Come along, Gwynne. We're going to rope you in for dinner with us. You'll be able to see for yourself then. You've got hold of the wrong man, old son; done it myself, scores of times."

"I tell you I met Chard Bromley in the bar at Raffles. He was a little man, and I'm prepared to wager he hadn't a daughter with him."

Hewitt rose to his feet, the others following suit.

"Someone's been pulling your leg," he told him. "Chard Bromley's here all right. I happened to see his credentials myself, and they were perfectly in order. He's talking about arranging a gigantic house-warming, by the bye, in the bungalow the late manager never lived to see completed."

WRIGLEYS

The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure.

It cleanses the mouth after eating—gives a clean taste and sweet breath.

It is refreshing and digestion aiding.

ISSUE No. 44—28

A voice that Hewitt dimly understood was his own replied.

"It wasn't like this—until you came."

It looked too dark for him to see the look of triumph in her eyes. They had closed, moreover, by the time he had realized that her parted lips were tantalizingly near his own—and had bridged the distance with an impetuosity that was new to him. He awoke at last that the hour-glass of their exquisite pleasure was fast running out, that Monica would be wondering what had happened to them.

At the foot of the garden, Enid made him stop.

"Jack," she whispered, "you needn't tell them—yet—unless you like."

He started.

"I shall have to," he said. "There'll be no end of a scandal if I don't."

"I see. I had a note from father this evening. I've got to join him immediately. He's lonely up there. You'll come up to our house-warming, won't you? and bring everybody you can. I want it to be a big success."

And Captain Hewitt promised.

Dawson had gone back to the rest-house and Monica was evidently in the act of undressing, for she contented herself with calling to them over the partition that separated her room from the verandah.

"How late you are—you two!"

"We came down to meet you," said Enid. "I don't know how we missed you. Are there two ways?"

"There are—and Jack knows them both. He ought to have remembered that we never take the path through the trees. I suppose that's how you missed us," she added, with a touch of malice.

There are decided drawbacks to talking through a wall—even if only a wooden one. Hewitt felt this.

"Aren't you coming out?"

"No, I can't."

"You can slip on a dressing-gown. Be a sport!"

"Not me," laughed Monica. "Peter's hanging about somewhere—and I've more self-respect than to let him see with my war-paint off."

"I've something to tell you." He almost said "we," but checked himself in time.

"I can hear you perfectly from here. What is it?"

In some respects Hewitt was sensitive. He was particularly keen on seeing for himself the effect of his statement upon his sister. Nor was he altogether satisfied that Monica liked Enid.

"Enid—Miss Bromley's going up-country tomorrow," he said, suddenly endowed with a happy inspiration.

"In which case," asserted the exasperating voice which might have been at the far end of a long-distance 'phone, "the sooner she gets to bed—the better. The train leaves just after breakfast."

The Commissioner went to his room, walking with unnecessary emphasis. Enid paused outside her own door and blew a kiss to him from the tips of her fingers.

As Hewitt had predicted, almost everybody who mattered went to Chard Bromley's house-warming.

The Commissioner and Monica were among the first arrivals, Dawson putting in an appearance an hour or so later in company with Moorhouse, district officer at Bukit-Iban. Chinese Pennington was presumably keeping a watchful eye on the movements of the Yellow Seven, for neither he nor Jocelyn Gwynne showed up at dinner. Besides Enid Bromley and Monica there were seven other women—wives of planters and officials. The meal was served under a vast awning, illuminated by means of an electric light plant installed by the late manager. (To be continued.)

"Now-a-days when one smells tobacco on a child's breath one knows it has an affectionate mother."

Minard's Liniment for Grippe.

Empire Marketing

Glasgow Evening Citizen: The economic prosperity of the Dominions has a very important bearing upon the problems of emigration and of unemployment in this country. Empire settlement and Empire marketing go hand in hand. From the purely economic point of view, it does not perhaps matter where we buy our food and other necessary imports. But this is not a question simply of buying and selling.

Or What Have You?

Room for gentlemen or legislators. Ad in the Baton Rouge (La.) State Times.

Styles by ANETTE Paris—New York.

CHIC ONE-PIECE DRESS.

A chic one-piece dress of patterned wool jersey, that has become a favorite with women of good taste for everyday occasions. The deep rever shawl collar with attractive scalloped edge, and narrow scalloped turn-back trimming pieces of cuffs of long sleeves rather full toward wrists, choose plain jersey in harmonizing shade. It's easily made with its straight one-piece back; with front in two sections, with the plaited section, a separate piece of material stitched to right front. It is very smart and serviceable in sheer tweed in beige and tan tones, black lustrous crepe satin, navy blue wool crepe, tobacco brown flat silk crepe, and new plum shade in canton-faille crepe. Style No. 277 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Pattern price 20 cents in stamps or coin (coin preferred). Wrap coin carefully.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

Explorers to Fly Over Antarctic

Eielson Tells of Plans for Expedition to Regions Near South Pole

Buenos Aires, Argentina.—Plans for hazardous flying over unexplored antarctic wastes are revealed in an interview here by Lieut. Carl B. Eielson, who was the companion of Sir George Hubert Wilkins on his north pole flight.

Eielson, who will be Wilkins' companion on his coming antarctic exploration trip, said the expedition expects to get within 800 miles of the south pole, but would not attempt to reach the pole itself. He said the expedition probably would leave Montevideo for Deception Island, in the Antarctic Ocean, which will be the main base.

Eielson revealed that a base will be established on the fringe of the Antarctic from which reconnaissance flights of a thousand miles or possibly longer, would be made. Later, a flight of 2,500 miles to the Bay of Whales would be attempted. The flight would follow the Antarctic coastline, along a route over which Wilkins would establish meteorological stations to be used in forecasting seasonal conditions.

The expedition will carry two planes, in one of which Wilkins and Eielson will fly. The other will carry Joseph Crosson, pilot, and Orval Porter, mechanic. The trip is not expected to take more than six months. The planes will be equipped for landing on the ice and will be well-provisioned.

I doubt whether people will be such fools about autographs. Remember the tulip boom in Holland 300 years ago? There is more sense at that in paying \$1,000 for a tulip than for a letter—even for a letter of mine.—George Bernard Shaw.

YOUR SKIN

Hero Wanted to Aid Skunk

Manistee, Mich.—Someone with a penchant for heroic deeds can win the gratitude of Manistee residents by a simple deed of kindness to a dumb animal.

A skunk wandered blindly about lawns of the residential district today with a tin can over its head, evidently caught there as the animal ate from somebody's junk barrel.

Volunteers are sought to remove the can, as the skunk is in danger of starvation. Should not such an article be: "Head or Brains Wanted for Human Skunk?" People who leave cans with open ends, which permit cats, dogs or wild animals to become imprisoned, are not fitted to be called anything but the most unpleasant names. It is so easy to tramp cans flat.

Mickey Likes Bible Stories

Princess Helen Daily Reads Bible to Rumanian Ruler

Mimalea, Rumania.—King Michael, seven-year-old sovereign of 18,000,000 Rumanians, has finished a memorable summer's vacation at his palace on the Black Sea. His majesty's days were not wholly given up to play. Princess Helen, his mother, is a firm believer in the rule that "all play and no work does not sharpen little minds."

The young ruler passes a half hour daily in Bible study with his mother. He was enraptured over the story of David and Goliath and said that he would like to be a king like David.

FOR **NEURALGIA**

BAYER ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child—of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, there's nothing quite like Aspirin. Just make certain it's genuine; it must have Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Surveyors Back From Hudson Bay

Member of Party Describes Eskimos as "Jolly But Dirty"

Halifax, N.S.—Flight Officer Brian Carr-Harris, of Ottawa, one of the six picked Canadian pilots who have been making a hydrographic survey of the Hudson Straits for the past 15 months, returned to Halifax recently on the steamer Canadian Voyageur, six days out from Port Burwell. The remainder of the party are en route home aboard the steamer Larch and Montcalm, the former due at Halifax some time this week, and the latter proceeding to Montreal. Two mechanics also returned on the Voyageur and two of the six Fokker planes used by the party, were landed here.

The expedition sailed from Halifax in the summer of 1927 to make a complete hydrographic survey of the movements of ice in the straits, to chart the coast line and to determine the feasibility of a sea route whereby western grain might be shipped to world markets via Hudson Bay. The findings of the expedition are expected to have a large bearing in deciding the old argument as to whether or not the Hudson Straits are a safe summer route for steamships.

Disease is rampant in the north-land. It was said, 19 natives having died in Port Burwell alone while the expedition was there. White men's habits were decimating the Eskimos, the airmen stated.

Eskimos delighted in airplane riding, the aviators said, and would work

almost a week for a chance of taking a flight. "What are they like as a people?" a member of the expedition was asked. "Jolly, but dirty," was the reply.

British Immigrants

Ottawa Journal: When Mr. Mackenzie King told the Canada Club in London that "no bigger, untruth was ever offered in respect to a nation and a country than to say that Canada does not wish to have immigrants from the British Isles," he spoke what every fair-minded Canadian knows to be the truth. The Journal would not want to go back for the immigration record of Mr. King's Government; we think of Mr. King's Government; it has never included antagonism to British immigration. How that notion—the notion that there was a conspiracy somewhere in Canada hostile to British immigrants—came into being we cannot for the life of us understand.

How An Idea Is Born

We get many an idea for a work of art which gradually sinks into our unconsciousness, reaching a condition which we think and speak of as forgetfulness. But it continues to figure in our experiences, mysteriously drawing sustenance from them and developing independently of our efforts or knowledge. And one day it may happen to emerge again out of the depths of the mind. It is remarkably altered, and seems to admonish us: Now at last I am ripe for the purpose which I was meant to serve from the beginning; now for the first time we are worthy of each other. Let us both fulfill our destiny; create your work. —Arthur Schnitzler in Vanity Fair.

Repairing the damaged fin of the Graf Zeppelin at Lakehurst to enable the giant dirigible to make its return journey.

Discovery of Gold Opens Canada Rush

World Spreads of Find in the Patricia District Between Cat and St. Joseph Lakes

Interest in Manitoba Tin

Toronto.—Another gold rush is on. For several days word has been spreading of a gold find in the district of Patricia, situated between Cat Lake and Lake St. Joseph.

It was at first believed this had reference to the gold discoveries in the Kawingans River, Pickle Lake and Crow River. But this is not the case. The new discovery had been kept a close secret.

Montreal and Toronto mining men are showing great interest in the discovery of tin ore in the Province of Manitoba, including interests connected with the Lindseys. Noah Timmins has been considering participation through purchase of a large block of stock.

Gold in Canada

The chief sources of Canada's gold production continue to be the gold quartz ores of Porcupine and Kirkland Lake, Ontario; the copper-gold, sulphide ores, and the quartz veins of British Columbia; and the placer deposits of Yukon. Small amount of placer gold is obtained also in British Columbia. Lode gold is recovered from quartz veins in Nova Scotia and Manitoba, and as by product of the treatment of copper ores in Quebec.

The effects of tea are generally beneficial, conducive to contentment, clear thinking and sobriety. —Sir James Crichton-Brown.

Canada's Premier in Paris

CANADA'S REPRESENTATIVES HONOR THE UNKNOWN SOLDIER

Hon. Philippe Roy, new Canadian minister to Paris, Rt. Hon. Mackenzie King, prime minister of Canada, and Gen. Gouraud, military governor of Paris, observing two-minute silence when the Canadians visited tomb of the unknown soldier.

Earth Speeds Up Baffling Science

Shrinkage in Crust Believed to be Responsible for Phenomenon

Cambridge, Mass. — Calculations showing that the earth is continuing to rotate faster than its regular speed of 24 hours per day were presented to the American Association of Variable Star Observers in annual convention here last night.

The interest to many people in the calculations lies in their possible application to the study of earthquakes, rather than to any appreciable change of the faster speed is suspected to be the contracting of the earth's crust. Explanation was made of periods in which the rotation of the earth's crust and of the possible relation of both contraction and swelling to earthquakes.

The calculations were presented by Ernest Brown, Sterling professor of mathematics at Yale University. They were based on 33 observations in 1927 taken all over the world, of occultations of the moon; that is, of the obscuring of stars when the moon passed in front of them. The variations of these observations.

"The earth's rotation," said Prof. Brown, "is our clock for determining time. We might also, if we wished, use the moon or any other body in the solar system as the clock, but comparison of the earth with the other bodies showed that one of the clocks was wrong, and observations have fixed upon the earth's rotation as the time instrument which varies."

"Of course we know about the slowing down of the earth's rotation due to the friction of the tides. That is an old story. But the periodic variations, in which the rotation is sometimes too fast, and sometimes too slow are something different. The first indication of these variations was given by Simon Newcombe, the American astronomer, about 60 years ago, but only in late years have we been able to test the matter. The rotation will sometimes hold the same pace

for many years together. Some of the changes have occurred very abruptly. They amount to about one-thirty millionth of the day, or one three hundredth of a second.

"The cause of the variations is unknown. The only theory that seems to fit the facts is that the earth swells or contracts from time to time. How it does so, and why, we do not know. The amount of swelling, if it exists, is very small at most, only a few inches, perhaps 1 or 12, and this would be unobservable, because everything, sea and land, would move in the same way."

The Miner-Harvesters

Toronto Mail and Empire: In this successful experiment there is a lesson that should be turned to account by our Immigration Department. Why not adopt as a permanent practice the plan of bringing thousands of selected British people here every year for a season's probation. The miners, with relatively few exceptions, proved themselves fit to make an honest living here, and proved themselves acceptable to the country. If every year a like opportunity were held out to British workers to make a test of their adaptability to this country and its needs, there is scarcely a doubt that the result would be extremely beneficial to Canada and conducive to the welfare of the British workers thus tried out.

Oil Shale and Tar Sands

Canada has vast resources of oil shale and bituminous sands, the former occurring in the Maritime Provinces and the latter in Alberta. These deposits have long been considered as potential sources of products generally obtained from crude petroleum. As a result of recent modifications in refining methods these raw materials may now be seriously considered as sources, to be drawn upon when needed to help in supplying the rapidly increasing demand for motor fuel.

I am afraid the clergyman's God is too often the head of the clerical profession.—Dean Inge.

Stop Coddling British Doctor Warns Against Common Error

Stop coddling children, warns Dr. Leonard Hill, foremost British child specialist, writing in the November issue of "The Forum".

"Let mothers and teachers see to it," he writes, "that by adequate exposure to open air and sunshine, by well-chosen food, by inculcating temperance in all things and strengthening character, they raise up a fine race of men."

"A charter for the freedom of children ought to be drawn up. To dress them up like dolls and limit their activity for fear of spoiling their clothes is criminal. They should be allowed to tumble about scantily clad in the open air and join in healthy games with their fellows. Above all, they should be kept in their mental training from sentimentality and introspection. Let us scrap the perambulator and stop coddling them."

Dr. Hill, in his "Forum" article, advocates exposure to cold. "Children when ill with feverish complaints are confined to stagnant, heated air with clothes piled on them, when they need the very opposite—open-air treatment."

Empire Preference

Rockhampton Capricornian (Queensland): Empire preference, to be anything more than a mere sounding-board for windy orators, has to effectively protect the markets of the Dominions in Britain for raw products and foodstuffs, as well as the markets in the Dominions for British manufactured goods. Nothing short of that will count.

Activity in Aeronautics

Increased activity in flying in Canada has led to the establishment of flying schools by commercial firms, to fill the growing demand for pilots and air engineers. The Department of National Defence, to encourage the popular use and knowledge of aeronautics, is assisting in the establishing of flying clubs in the principal cities of the Dominion.

Homeward Bound

Graf Zeppelin Once More Ventures Across the Atlantic

Takes Northern Route

Lakehurst, N.J.—The Graf Zeppelin took off for Germany at 1.54 a.m. to-day (Monday).

Dragged tall first from the hangar at 1.35, the greatest of all airships lifted easily into a moonlight night and was soon but a vanishing smudge against the stars.

On the trip started this morning it was expected to follow the northern great circle course and, with the aid of favoring winds, to complete the flight in about fifty hours.

At 1 o'clock the passengers were bundled on board and the ground crew surrounded the ship.

Officers said that the wind was only seven miles an hour and down hangar, permitting the ship to be safely taken out the east doors.

There were many, however, who clung to the conviction that there would be no take-off this morning.

At 1.15 sailors grasped the cables dropped from the great bag and prepared to walk the Zeppelin from the wide-open eastern doors into the moonlight night.

Our New Industry

Value of Tourist Industry to Canada Placed at \$300,000,000

"The tourist industry in Canada is growing by leaps and bounds, and the season just closing is regarded as a record in the number of tourists it has brought from other countries into Canada, and in the volume of travel engaged in by Canadians themselves," said C. W. Johnston, assistant general passenger traffic manager of the Canadian National Railway.

"The value of the tourist industry to the Dominion of Canada has now reached a total in excess of \$300,000,000 annually. This brings the export of memories of Canada's scenery into second place among our exports in point of total value," he pointed out.

While the figures for the year 1928 are not yet available, railway bookings show a tremendous increase over those of the previous year. Holiday resorts in all parts of the Dominion have been filled to capacity with Canadians, Americans and people from the European countries during the season, and the fine weather of this autumn has resulted in an extension of the holiday season into September and October this year.

As a result many of the operators of holiday resorts have found that their bookings extended well into October for the first time in their history. In addition there is an increasing number of conventions being held in Canadian cities each season.

Germany Prospers

Berlin to Build "Palace of Youth" As \$1,000,000 Welfare Center

Berlin—Plans for the construction of Berlin's "Palace of Youth" have been approved calling for expenditures totalling \$1,000,000.

It is designed to serve as a social welfare center where organizations connected with the German Youth Movement will have their headquarters. The former Kaiser's Bellevue Palace was considered at one time, but proved too small.

Great building projects are afoot in other parts of the capital. These include a new Department of Justice building costing \$2,500,000 and the largest covered swimming pool in the world. A glass dome 500 feet in diameter will span a water source sixty-five feet wide. A sandy shore with artificial sunshine and seaside mural paintings will create the impression of outdoor bathing.

It will be heated in winter and cooled in summer and will provide accommodations for 32,000 bathers daily. There will be medical baths of all kinds and physical exercise halls equipped with modern apparatus. The cost is estimated at \$2,000,000 and a small entrance fee will enable the promoters to operate the establishment at a profit.

Sir Austen Goes Home With Health Improved

San Francisco Cal.—Sir J. Austen Chamberlain, Secretary of the British Foreign Office, left last night by train for Seattle and Vancouver on his way to sail for London from Quebec.

"Before leaving California I wish to express to the representatives of the press my grateful thanks for the courtesy and consideration which they have shown me," said Sir Austen.

"They have respected my wish to keep my visit purely private, with the result that I have enjoyed a perfect holiday in glorious sunshine, amid lovely scenery and with the kindest and most hospitable of friends."

"I thus start on my homeward journey with health completely restored, and ready to resume the heavy work and great responsibilities which await me on my return to London."

When the Graf Zeppelin Flew Over New York

A STRIKING VIEW OF GERMANY'S QUEEN OF THE AIR

This view of the Graf Zeppelin is most interesting when it is considered that the weather was cloudy and dull. A fair idea is given of the great American city.

Milk Shippers Discuss Prices of Milk

Day, Black, as Representative, receives vote of confidence.

One of the largest meetings in the history of the Milk Shippers' Association was held on Saturday, at which some important matters were thoroughly thrashed out. The meeting had been called by President E. J. Wood, owing to ugly rumors circulated in which it had been reported that Mr. David Black had not followed out the wishes of the Lachute Branch of the Milk Shippers' Association, when at a meeting held on September 15th, they had recommended to the advisory board that the price of milk for the winter months should be 33cents per gallon. The advisory board is composed of delegates from local branches in Montreal and district and Mr. David Black is its President, with Mr. W. H. Moore as secretary-treasurer. His report to Lachute Shippers was that in view of prices already set in Toronto, Hamilton and Ottawa, they considered the best to be secured was 29cents for the 8 months, to which the dealers agreed.

Following a report read by President E. J. Wood from David Black, who entirely vindicated his stand, a vote of confidence was moved by E. J. Walker, seconded by Wm. Heatlie and carried by the meeting.

In order that others not at the meeting may rightly understand the situation, we publish the report in full as follows:—

MONTREAL MILK PRODUCERS' ASSOCIATION

Circular to Branches

47 William St., Montreal, Sept. 21, '23
A Meeting of the Board of Directors of this Association was held in this office on Wednesday last, to consider the price of milk for the Fall and Winter period. In addition to the Directors there were also present three Representatives from the Lachute District. At this meeting the following information was available: In Toronto the Winter price of Milk went into effect on September 1st, 1923, as follows:—Per 8 gallon can, delivered at the Dairies, September \$2.30, January \$2.20, February, March and April \$2.00. The average of these prices is \$2.20 per 8 gallon can, or \$2.60 per hundred pounds delivered at the Dairies, and it costs the producer 30c. per hundred to deliver their milk. The price per February, March and April, \$2.00 per can, means \$2.42 per hundred pounds. The retail price in Toronto is 14c. per qt. straight, or 9 quart tins for \$1.20.

In Hamilton the price to the producer is \$2.66 per hundred without a sliding scale. In Ottawa the producers met the dealers the first of this week and asked \$3.75 per hundred for milk delivered, for seven months from the first of October, but their demand was refused by the dealers, and no agreement was made. Another meeting will be held next Monday to try and reach an agreement.

Your Directors had before them letters from three Branches, two of which stated that the price should be 32c for 8 months and the third 33c. As 32c was out of the question these letters meant that 33c would have to be asked, which would be equal to \$3.20 per hundred pounds, delivered at the railway stations, Montreal. If this price could be obtained, it would mean that milk would be attracted to Montreal from points outside of our present shipping districts, that we would have surplus milk on this market all winter and that by Spring the milk market would be so disorganized that it would be impossible to obtain a reasonable price for next summer. For instance, in February, March and April with milk worth \$2.42 per hundred pounds, delivered at the Dairies in Toronto, it would be very profitable to bring milk from Toronto shipping territory to Montreal if our price was as high as \$3.20. Your directors therefore decided that they would ask 42c per gallon for the 8 months from the first of October to May 31st, and 25c a gallon for the four following months, namely, from June 1st, to September 30th.

Your Directors met the City Dealers yesterday, together with representatives from two Associations that have been organized in six Counties in the near vicinity of Montreal. We made out request on the above basis and the dealers counter offer was 29c for 7 months, and it was only after a long debate that a unanimous agreement was reached for 29c for 8 months from October

BY GEORGE!

I wish I'd bought a Rogers myself

WHO are the men in this community who are saying, "By George! I wish I'd bought a Rogers myself"? Invariably, they are those who bought the first electric radio they happened to see. Without comparison. Without investigation.

Later on, such men hear the Rogers-Batteryless in action in some friend's home. They learn that it was first in the field; that it is backed by a four-year record of proven performance; that more Rogers-Batteryless Radios are sold than all other electric sets combined! And their regret is unmistakable.

The moral is plain: Don't buy any new electric radio without first hearing the pioneer Rogers-Batteryless. We will gladly arrange a free demonstration in your home any evening you name. Come in or 'phone us.

Get yours now

The demand for the new, 1929 Rogers-Batteryless Models is so great that the factory is approximately 2000 Sets behind in deliveries. Therefore, if you are planning to purchase a Rogers-Batteryless Radio for Christmas, choose the model you want now, pay a deposit and let us deliver the set at Christmas time.

S. McFaul, Main St., Lachute

Rogers
"Four-Ninety" Console
(Closed)

A superb new 1929 Model for those who want the utmost in radio reception. Single dial tuning with illuminated dial. Automatic Volume Control, Rogers Output Filter, Phonograph "Plug-in" Jack, Improved Electro-Dynamic Speaker, Genuine Walnut Cabinet by Malcolm. Price complete \$395.00

The Rogers "Four-Eighty" Table Model in the illustration above has exactly the same radio equipment without speaker. Price complete (except Loud Speaker), \$275.00

1st to May 31st. This is equivalent to \$2.80 1/2 cents per hundredweight and is a much better price than the Toronto producers are getting. With regard to the four summer months no actual Agreement was reached, but the dealers stated that they were sympathetic towards the idea of a reduction of only 1c a quart on the first of June, and that at our Spring Meeting they would be agreeable to this unless the prices of dairy produce should be so low that it would be impossible to maintain a price of 13c per quart in the City. As it was impossible to make an Agreement for the 12 months, we finally agreed to leave the four months in abeyance, the more especially as the prospects now are that the price of cheese and butter next Spring will be on a higher level by the end of May than they were last Spring. Your Directors feel that the establishment of the month of May as a Winter month and a term of 8 months for the Winter price, is the greatest accomplishment in the history of the Association.

On behalf of the Board,
DAVID BLACK, President,
W. W. MOORE, Secretary.

Considerable discussion arose in connection with the returns of milk shipments on the basis of butter-fat which in one instance appeared to be unfair, because in that district Record of Performance work had been carried on by the Dominion Government since 1921 and hard test averages have run as high as 4.2. In the receipts secured from shipments the returns were considerably lower than the record of performance tests and consequently dissatisfaction arose but it was thought there would be no further trouble along this score. A strong appeal was made by President Wood for more hearty co-operation on the part of the Shippers in backing up the good work of the Association.

QUEBEC GOVERNMENT WILL BE PETITIONED FOR FRANCHISE FOR WOMEN.

Undiscouraged by frequent failures to induce the Quebec Government to see eye to them in the matter of the provincial vote for women, another attempt is being made to draw attention to the fact that Quebec stands alone, out of all the provinces, in her refusal to grant this privilege to her women. Quebec women feel very keenly the disability under which they labor in this important respect, and many of the more important among her women's organizations are using influence, persuasion and diplomacy to secure the desired result. During the Autumn and early winter months a petition-signing campaign mothered by the Provincial W.C.T.U. is being vigorously carried on. Both French and English speaking women over the age of 21 are being given the opportunity to sign the petition simply asking for the granting of the franchise to the women of Quebec Province.

Whatever may be the result of this movement, it will at least have the effect of reminding the government at Quebec that the women of the Province have no intention of abandoning their cause, and have sufficient faith in it to believe that in the fullness of time it is bound to triumph. The fact that women in Quebec in common with all others in the Dominion, have the Federal franchise, and use it intelligently and fully, may be taken as logical proof that they are quite capable of using it in provincial matters as well. At any rate, as a citizen and tax-payer, a worker and an obedient subject of the laws of the province, woman is entitled to the ballot and should have it.

M. ELIZABETH McCURDY,
Prov. W.C.T.U. Supt. of Press.

CUSHING

Mr. S. and Miss K. Whelehan also Mr. Owen Keatley of Montreal, spent Sunday in Cushing.

Mrs. Jas. Watson also Mr. C. F. Watson and Mr. Franklin Keatley were in Lachute on Saturday last.

Miss Smith of Lachute, who is teaching at Stonefield was a guest of Mr. and Mrs. C. F. Watson last week end.

The Messrs Desforges, Morrow and C. F. Kains of Groceries' Point motored to Montreal on Thursday last to witness the opening of the Hockey season in the match between Canadiens and Maroons at the Forum.

Those who attended the meeting in St. Mungo's Church on Thanksgiving night enjoyed a rare treat in the splendid address of Miss Evelyn Mitchell, Dominion Field Secretary of the W. M. S. of the United Church. A large Thank Offering was received and the Auxiliary is greatly encouraged.

Armistice Day, November 11th was observed in St. Mungo's Church by an impressive service when the pamphlet issued by the Armistice Ceremonial Committee was used. There was a very large congregation and all entered reverently into the spirit of the service.

After the "Two Minutes of Silence and Prayer" a beautiful Poppy Wreath offering to fallen heroes was presented by the Ladies' Aid.

Rev. F. L. Jobb preached a strong inspiring sermon on the text, "Seek peace and pursue it" and a solo entitled, "The Phantom Legion," by Ward-Stephens was beautifully rendered by Miss Muriel Jobb. The Organ Voluntarys were Harvey Paul's "Chant of Dead Heroes" and "Pomp and Circumstance" by Elgar.

BROWNSBURG

Mrs. H. J. Deacon was in Montreal on Monday last.

Mrs. Peter McQuaig spent last week with friends in Montreal.

Rev. Mr. Emard of Gaspe has come to take charge of the Roussillon Baptist Church.

Mrs. L. VanBuren who was a visitor here for a few weeks, has returned to Cornwall, Ont.

Miss Evelyn Martin entertained on Friday evening last with cards and dancing, when a very pleasant time was spent.

Visitors at Mr. and Mrs. John Graham's on Sunday last were Mr. and Mrs. Chas. Graham, Mr. and Mrs. G. Graham and Mr. N. Jackson, of Lachute.

The Chatham Women's Institute held a special meeting in the United Church Hall on Thursday afternoon last. We were glad to see such a splendid attendance of members and visitors to welcome Miss McCain from Macdonald College, who gave a very pleasing and edifying address on Textile, Household Science and Sewing. Her description of flax being woven into thread, thence into beautiful articles of linen, took one's mind back to the time when a home was incomplete without the spinning wheel; when a girl would commence at a very early age to make garments etc., for her "Hope Chest."

Miss McCain touched briefly upon "Household Science," and stressed the necessity of every girl taking this "Course."

Next she spoke about Sewing and advised people, when making or choosing garments, to study color effect and so make the best of their appearance.

She strongly advised Health Inspection of School Children. Lots of trouble in Adult life could be avoided if this were enforced.

The meeting closed with all heartily joining in singing the National Anthem.

Then a pleasant hour was spent socially, the members of the Institute dispensing tea and dainty refreshments.

Everyone went away feeling the time had been well spent.

Z. L. C., President.

The members of the Chatham Women's Institute will hold their next meeting in the Social Club Room on Thursday afternoon the 6th of December at 2.30 o'clock.

New members will be welcomed.

We are pleased to say that Howard Tomalty, who came first in Grade IX at Brownsburg School in the year ending June 1923, has received the local bursary of forty four dollars offered by the Brownsburg Victory Loan Committee (1919).

There being a tenth Grade in the School now, the bursary will apply to that Grade, the terms being that the interest of the Committee's invested fund shall be given to the scholar coming first in the highest and whose studies are to be continued.

Here and There

The Department of Public Works, at Ottawa, will shortly invite tenders for the first part of the public undertakings, designed to make Prescott, Ont., the transfer terminal for lake traffic. The ultimate outlay at Prescott is estimated at approximately \$5,000,000, covering rail facilities, docks and elevators. It is understood that plans are now being prepared for the railway layout in which both the large railway companies are concerned.

The Lord Nelson Hotel, containing 100 rooms and decorated in the Georgian style, has just been opened in Halifax, Nova Scotia, facing the city's beautiful Botanical Gardens. The opening ceremonies were marked by a dinner given by the Board of Trade to R. W. Beatty, chairman and president of the Canadian Pacific Railway. Up to date in every particular and quietly and tastefully decorated in the period of design recalled by its name, the new hotel will fill a long felt want in the province.

Snow and dry teams are lacking in "It's Destiny," a seven reel film produced by British Canadian Pictures Limited of Calgary, stated Guy Weadick, general manager of the company. The mountain scenes shot around Banff and Lake Louise are the finest backgrounds possible for an outdoor picture, he said. The Governor General and Lady Willington appear in the part showing the Calgary Stampede, and 800 horses are used in a round up scene in this all Canadian film.

An interesting and remarkable feat in railroad engineering is now being effected on the main line of the Canadian Pacific Railway near Toronto. Span by span the old steel bridge built in 1833 is being dismantled and replaced by heavier girders resting on new concrete piers without causing any interruption in traffic. During a six hour interval in the train schedule during the daytime tracks and ties are ripped up, an old span removed, and a new section weighing 46 tons is swung into place by a great crane especially constructed for the purpose. The short gap left between the new and the old spans is temporarily filled by special trestles, new ties and track are laid by gangs of workmen, and the bridge is open to trains again. Preparations are then made to tackle the next of the thirteen spans.

Farm Notes

FEEDING STEERS LOOSE OR TIED

Steers feeding for the market in loose pens made better and more economical gains at the Lennoxville, Quebec, Experimental Station than those fed tied in the stalls. During a period of nine years in which these methods of housing have been under test, the cattle running loose gave the best returns in all but two seasons. Last year the steers tied in stalls made slightly better gains, amounting to 1.99 pounds per steer per day at a cost of 7.10 cents per pound of gain, as against 1.75 pounds per steer per day at a cost of 5.69 cents a pound for those running loose in the pens. From his experience with these tests the superintendent of the station, in his report for last year, published by the Department of Agriculture at Ottawa, reports that steers fed in loose pens make the more economical gains taking one year with another.

FISHMEAL IN THE POULTRY

In a feeding test at the Fredericton, New Brunswick, Experimental Station, fishmeal proved more valuable in the ration than an equal amount of beef scrap. In the same experiment skim milk proved superior to either beef scrap or fishmeal. The test was carried on for a six-month period, ending at the end of May last year. Each of three pens was made up of fifteen Barred Rock pullets. The scratch grain mixture consisted of two parts cracked corn, two parts wheat and one part oats. The dry mash was made up of 100 pounds of wheat bran, 100 pounds wheat middlings, 100 pounds cornmeal, 100 pounds crushed oats and 5 pounds of charcoal. This mixture was uniform for all the pens, but one of them received in addition 45 pounds of beef scrap. Another received skim milk fed at a rate of a quart daily for fifteen birds, and the third received 45 pounds of fishmeal. Records were kept of the eggs laid, their value per bird, and the returns per bird over the cost of feed. The cost in feed for the eggs laid amounted to 21 cents per dozen for those getting beef scrap, 18 cents per dozen for those getting skim milk, and a fraction over 18 cents from the birds getting the fishmeal. The profit on the birds was on a corresponding scale. It is further shown in the report, which is published by the Department of Agriculture at Ottawa, that the mortality in the chicks at three weeks of age was highest from the birds getting the beef scrap, amounting to almost 45 per cent. The lowest were those from the eggs from skim milk fed birds, amounting to 10 per cent, whereas the mortality from the eggs from the fishmeal fed pen was midway between, amounting to 22.5 per cent. Experiments during three years showed that skim milk has given better egg production and a larger profit than beef scrap.

DAMAGE TO APPLE TREES BY MICE AND RABBITS

The girdling of trees by mice or rabbits is one of the greatest hazards in the growth of a young orchard, but it can be almost, if not entirely eliminated by the adoption of precautionary measures. When the mice or rabbits find their natural food scarce they will turn to the young, succulent bark of the tree and chew it all around, causing the tree to suddenly wilt down and die. There are two ways of protecting young trees against these ravages, according to a Dominion Department of Agriculture bulletin on the Cultivation of the Apple. One way is by using wire or metal protectors. Fine meshed galvanized wire netting is the most lasting material. It is fastened by small pieces of wire, and is made large enough to allow for the trunk expanding as the tree grows. Expanded metal, such as is used in building, is a good material for this purpose, and it is better when both galvanized and dipped in paint. As in the case of the wire netting, it is fastened around the trunk by small wire fasteners. Another method is to cut building paper into strips about six or eight inches wide, wrap it fairly snugly around the trunk of the tree and tie it with binder twine top and bottom. A little earth should be mounded up around the base to prevent the mice from working under the paper. The disadvantage of using building paper is that it must be renewed every year. The bulletin, which may be obtained from the Publications Branch, Department of Agriculture, Ottawa, also describes the proper treatment of injured trees.

FINISHING BEEF CATTLE

The finishing of beef in Southwest Ontario is a profitable industry when wisely carried out. At the Harrow, Ontario, Experimental Station, twenty-four grade yearling steers, bought in the spring, run on pasture until the middle of November, and then put on a fattening ration, made a reasonable profit in addition to 210 tons of manure valued at \$2 per ton. The cattle when purchased averaged 640 pounds in weight; when they came off the pasture they averaged 915 pounds, and during the 139 days of finishing they made an average gain of 153.7 pounds. They were purchased at 12 cents per pound and sold at seven cents. Unfortunately,

one steer died, but even with this loss there was about \$150 profit in addition to the manure. The superintendent of the station, in his report for 1927, that is available at the Publications Branch of the Department of Agriculture at Ottawa, tells how the cattle were fed during the winter months. They ran loose in a yard with a shed open to the southwest for shelter. The steers had all the corn stover they could consume and about four pounds of alfalfa hay per head per day. They received a grain ration of corn fed on the cob and a mixture of oat and barley chop and an occasional feed of oil-cake meal. At the beginning the corn was fed at the rate of six pounds of shelled corn per head daily, which was gradually increased to eight and a half pounds. This was given night and morning and at the noon meal oat and barley chop was fed along with the alfalfa.

THE STORAGE OF VEGETABLES

A low temperature, slightly above freezing, is the best for the storage of all vegetables except squash and pumpkins, which keep best in a moderately warm room with dry air. It is not possible to store vegetables satisfactorily in a cellar containing a furnace, unless a room is partitioned off with access to the outside air for ventilation. It is better to store in a room with an earth floor, as it gives more humidity and less drying out of the root crops, such as beets, carrots, and turnips. Onions, on the other hand, do best in a fairly dry air, and conditions which give dry foliage. It is necessary, however, that the roots of celery plants be in moist soil, so that the foliage will not wilt. To keep plants moist and the foliage dry a reasonable circulation of cool air is necessary. Closed-up rooms invite decay. If the temperature is high, wilting of root vegetables may be prevented by covering with sand or sawdust.

Leaving the storage room open, particularly at night, is advisable until freezing weather approaches, when a cotton screen may be placed over the window, which will aid greatly in giving a uniform temperature. Later the ventilators should be closed during very cold weather.

The larger the bulk of the vegetables the greater the need for a ventilating system to give a rapid change of air and allow the escape of warm air resulting from storage. Slatted-bottomed shelves one foot apart for onions, and two feet apart for cabbage, give excellent storage facilities. Cabbage may also be tied roots up to cellar joists.

A small area of parsnips and leeks should be left for digging in the spring. The parsnips should be dug early in the spring and placed in the storage for later use.

FEEDS AND WEEDS THAT AFFECT THE FLAVOR OF BUTTER

Turnip tops should not be fed to milk cows, and if turnips are fed they should be given to the cows after milking, according to a new bulletin of the Dominion Department of Agriculture, on Creamery Butter-Making. Rye, decayed ensilage, leeks, onions, and apples, when given in large quantities, injure the flavor of butter. In the pasture fields, ragweed, stink-weed, sage-brush, leeks and garlic produce objectionable flavors in butter made from cream from cows that have access to them. The eradication of such weeds from pastures is the only practical method of avoiding second grade butter from this source.

Thangsgiving

By VIOLET ALLEYN STOREY
God, listening now above all autumn fields

That, vastly silent, pray,
Hear, in this field, the prayer of thankfulness
My little words would say.
I have come out from walled-in house and church
To feel November's sun,
To place my feet upon this patient ground.

Whose harvesting is done,
You who look kindly on these dull, stacked husks
And see in them frail seeds,
Fresh, trembling shoots, then sturdy grain that gave
Its strength to meet man's needs.—
See, in my weariness, some work well done—

The thought, the eager toil,
The altruism grown from self as plants
Grew green from this drab soil,
You who know well this field but rests awhile
That it may once more be
Prepared to give again, teach me to rest
Thus, God, unselfishly,
You who, at harvest's end, when autumn's gold
Is tarnished and the white
Of winter has not cleansed the earth, still keep
Round pumpkins, yellow, bright,
Among dry sheaves—wise God, keep laughter's gold
In my tired heart to-day,
That with the joyful wisdom of this field
I, too, may stand and pray!

Hands Up!

Miss Statia Watkins will entertain the members of the pan-hellenic association with a bridge party at her home on Woodford Avenue on Saturday afternoon. She will be assisted by Mrs. John Hilliard and Miss Frances Hinson.—Fort Myers (Fla.) paper.

Modern Woman Uses Spinning Wheel

To many people in the larger communities a spinning wheel is a nice looking antique to set in a corner of the living room, but to Mrs. Phillippe Croteau, of the Canton of Figueri, in the parish of Sainte-Therese, in Abitibi, —not far from Amos on the transcontinental line of the Canadian National Railways,—a spinning wheel has a definite utilitarian purpose. In this particular instance, Mrs. Croteau is providing the material with which to provide warm "cooles" for her grandchild. Mrs. Croteau, widowed head of a large family of boys and girls, and practically penniless, led her thirteen children into Abitibi and undertook to clear 200 acres of forest land. That was in July, 1916. To-day the Croteau farm is 300 acres in extent, with modern houses, barns, garage, good horses, good stock, electric lighting, mechanical aids, a tractor and motor cars, all the result of the courage and industry of a woman who loving her children and born to the land, battled successfully with Nature to win, first, a living, and then a competence. While admitting the modern comforts, Mrs. Croteau believes that yarn spun in the old-fashioned way is best of all and practices her own doctrine. The wonderful achievements of this woman who set out from her home parish near Joliette, twelve years ago with the scanty proceeds of the sale of her old home and a loan of fifty dollars, have been recognized by the Government of the Province of Quebec in presenting to her the highest possible award for agricultural merit.—(Canadian National Railways Photograph).

Orange Rinds

You can't eat your cake and have it, too, but you can eat your orange and still have the rind to use in countless ways if you can only find proper tools and methods for utilizing it. Here are several ways to use this colorful outer skin of the orange:

Candied Orange-Peel

Peel of 4 oranges, 2 cupfuls sugar, 1 cupful water in which orange-peel is cooked.

Remove the peel in lengthwise quarter-sections. Cover with cold water. Bring to the boiling point; cook slowly until tender. Drain, saving 1 cupful of water for the syrup. Remove the soft inner portion of the peel with a spoon. Cut the remaining yellow peel into thin strips. Add the sugar to the 1 cupful of water in which the orange-peel was cooked and boil together until a little dropped in cold water will form a soft ball (238 cupful cupfuldegrees 7.). Add the peel and cook slowly until most of the water has evaporated—about 10 minutes. Drain, and drop a few pieces at a time into a paper bag containing granulated sugar and shake until the pieces are well coated. This candy will keep for a long time if put into covered containers.

Orange and Nut Confection

Three oranges, 3 cupfuls sugar, ¼ teaspoonful cream of tartar, ¼ pound shelled pecans.

Slice the rinds of the oranges very thin. Cover with cold water and bring them to a boil. Drain. Rinse. Add more water and boil till they are tender, changing the water frequently during the boiling if you wish to avoid a strong flavor. When the rinds are tender drain again, add a little water, together with the sugar, orange-juice and cream of tartar. Boil this till the soft-ball stage is reached. Cool slightly. Beat till the mixture is creamy. Add the nuts. Pour into an oiled pan. Cool. Cut into squares.

Orange-Ice

Two cupfuls orange-juice, 4 cupfuls water or ginger ale, 2 cupfuls sugar, grated rind 2 oranges, ¼ cupful lemon juice, few sprigs mint.

Boil the water and sugar together for about 5 minutes. Add the crushed mint and other ingredients if water is used, and set aside to cool. If ginger ale is used, prepare the same way, but do not add the ginger ale until the

mixture is quite cold. Strain and freeze.

Orange Frosting

"We are all familiar with the frosting made by blending an egg yolk with ¼ cupful of butter, cupfuls of powdered sugar, and a mixture of lemon-juice to 3 parts of orange-juice. Let stand for 5 minutes. Strain and use in frosting."

Escape

Some day there would be an escape, she knew;
Escape from endless toil of sun to sun,
Escape from lonely twilights cold and blue,
From pain and strife and hunger
... every one!
And so her fingers moved unceasingly
About the old, old house and
candle's gleam
Fell golden on her aging brow, as she
Moved lightly as the shadow of a dream.

And neighbors now can hear outside their door
When nights are silent, and they lie awake,
Familiar feet, a voice stilled long before,
And they can hear the limbs of poplars shake
With falling leaves that bear the summer's rust ...
Remembering the freedom of the dust.
—Daniel Whitehead Hicky,
in the Commonwealth.

NOT CONSIDERED IN HER CLASS

1st College Girl: Miss Brown and Miss Jones are in your class, aren't they Miss Nouveaurich?
2nd College Girl (haughtily): I've never considered them in my class, Miss Poore.

There is something in the gypsy temperament that rebels at a settled and peaceful life.—King Rats-Lace.

Chinese Rulers Act to Abolish Opium Traffic

Nationalists Name Central Committee to Stop Use and Sale of Narcotics

Shanghai.—Living up to its promise of adopting effective suppression of opium as soon as the northern expedition has been accomplished, the Nationalist government has created the Central Opium Suppression Committee for the prohibition of the plant and drug throughout China. The committee is entrusted with full authority to curb narcotics. According to the Chinese vernacular press, orders have been issued by the committee to the authorities of the different provinces for the immediate closing down of all the opium bureaus and for stopping the growth of the poppy as a first step to the centralization of the suppression work. The attitude of the government is uncompromising. With no concern for revenue, the government regards suppression of the drug as one of its chief duties in improving the welfare of the people.

A national opium suppression conference will be convened soon under the auspices of the government, in which methods for effective suppression of the evil will be discussed.

Educational Campaign Waged

Every since it was organized in 1924, the National Anti-Opium Association has been fighting for only one purpose, and that is to rid China of the opium and narcotic evil. Its activities are twofold. It has been sending out a great volume of anti-opium literature among the people to arouse public opinion, and petitions in the form of concrete plans were repeatedly presented to the Nationalist government. What the association has laid down as its fundamental principles is here summarized:

1. The work of opium suppression should be in the hands of a committee, which should consist of people's representatives.
2. New regulations should be set up, with complete suppression as the sole aim.
3. Income from opium suppression shall be used solely for the purpose of suppression and anti-opium education.
4. Abolish the farming system and use no opium traffickers.
5. The registration of opium addicts must be prompt and thorough and they should be given different time limits for dropping the habit.
6. Establish anti-opium hospitals in every district throughout the country.
7. Make a thorough investigation of the extent of illicit traffic in and use of narcotics.
8. Severely punish all those officials who have in the last year either encouraged the cultivation of or the traffic in opium, or neglected their duty as officers of opium suppression.
9. Total and immediate prohibition of the cultivation of the poppy.
10. All officials in the service of the Nationalist government who are found to be opium smokers or engaged in opium traffic should be immediately dismissed and punished.

In the Chinese vernacular press of the last few weeks are found letters to the members of the Nationalist Opium Suppression Committee from many representative organizations voicing the popular support of the suppression movement.

Scientist Near to Discovery of Plant Growth

Process of Manufacturing Food by Leaves is Approaching Solution

One of Nature's most important secrets which has hitherto escaped scientists, may be solved by recent experiments of Prof. E. C. C. Baly of the University of Liverpool, and explained by Dr. E. E. Free, in his Week's Science. This is photosynthesis, the way in which the leaves of plants manufacture all the food in the world.

"From the air these green leaves absorb a gas called carbon dioxide," says Dr. Free, "the same gas that makes the bubbles in soda water. Traces of this gas are always present in the open air. The plant roots absorb water which is then drawn up into the leaves. The leaves absorb sunlight. These three things, sunlight, water, and carbon-dioxide gas, the leaves use to manufacture a variety of sugar which is the raw material of plant growth as well as the material for producing the starch that plants like wheat store in the grain or that plants like the potato store in their tubers."

"All the animals that eat plants, as well as human beings who eat both these animals and the original plant foods, really get their living from the work of the green leaves. In spite of years of effort, scientists have never been able to duplicate this important process artificially. The living plant has always been needed to do the task. Professor Baly himself has been at work for years trying, always successfully, to duplicate the action. At last he believes that he has succeeded. A fine powder of the carbonate of nickel or of cobalt is suspended in water containing the carbon-dioxide gas and is exposed to sunlight. Sugar is produced. This is probably not exactly the same way in which the living plant does the same trick, but, it may serve, Professor Baly believes, as a starting-point from which to complete the full discovery of the plant's secret."

The results of Professor Baly's experiments are being closely followed by scientists all over the world. Should they point the way to a discovery of a process that will duplicate Nature there will follow a complete revolution in man's present methods of securing his supply of food.

Great Britain Bars Communists From Naval Works

Government Decision Seen in Case of Dismissal at Woolwich Arsenal

The British Government has decided not to allow Communists in naval and military works. The decision was disclosed in a case in which a Communist, named Percy Glading, was dismissed from Woolwich Arsenal.

Glading is a member of the Amalgamated Engineering Union, a workers' organization of 160,000 members, which has appealed to the general council, the Trade Union Congress, representing 4,500,000 workers.

In this connection, an authoritative statement from the Admiralty says that Glading was given an opportunity to renounce the Communist doctrines but declined to do so, therefore, was dismissed under the government policy that Communists would be no longer employed in any Admiralty establishment or royal dockyards. It is impossible, therefore, to accede to any request for his reinstatement.

"Communism," the statement continues, "is regarded as being outside any political party. The Admiralty considers this issue not as a political but as a revolutionary one. The Communist Party is avowedly a revolutionary party with definite revolutionary aims, and the Communists cannot be looked upon as loyal workmen, particularly in such establishments as Woolwich Arsenal or the dockyards, where great damage and mischief might be done in time of a national emergency."

"We cannot entertain the suggestion that this action amounts in any shape or form to political victimization."

NEW HE'D FALL FOR HER

Anna: Why do you call him Autumn?
Belle: As soon as I saw him I knew he'd fall for me.

So bad has become the situation here that if the Angel Gabriel were Director of Public Safety here, blowing his horn all day, there would always be somebody intimating that he was not blowing it for any good purpose and would want to take it away from him.—Mayor Mackey of Philadelphia.

Genuine Westinghouse Electric Iron FREE

Buy Big Ben by the Vacuum (air-tight) tin, which keeps the plugs in the same perfect condition as they were when they left the factory.

If your wife has always wanted a genuine Westinghouse Electric Iron, here is your opportunity to obtain a fine one for her, FREE. A "Poker Hand" is attached to every plug of Big Ben Chewing Tobacco. Enjoy this rich, full-flavoured chew—save only ten sets of "Poker Hands"—and the Electric Iron is yours.

Chew **BIG BEN**
and Save the "Poker Hands"

"I thought your wife's name was Elizabeth?"
"So it is."
"Then why do you call her Peggy?"
"Short for Pegasa."
"What has that to do with it?"
"Why, Pegasa is feminine for Pegasus."
"Well?"
"Well, Pegasus is an immortal steed."
"What of that?"
"Not so loud! She's in the next room. You see, an immortal steed is an everlasting nag—so there you are."

NEARER THAN THAT

Teacher: "Tommy, where is the island of Java?"
Tommy: "I dunno."
Teacher: "Don't you know where most of the coffee you drink comes from?"
Tommy: "Sure. We get most of ours from our next-door neighbor."

The trouble with most men who turn over a new leaf is that they use the loose leaf system.

Golfer (to partner): "Just look at that girl dressed like a man. What are her parents thinking of, anyway? I think it's disgraceful."
Partner: "That, sir, is my daughter."

Golfer: "I beg pardon. I didn't know you were her father."
Partner: "I'm not. I'm her mother."

The London Hunt and Country Club is widely known for the excellence of its afternoon teas. For several years this progressive club has used no other tea but Red Rose Orange Pekoe—a blend that leads all others in flavor and full-bodied richness. Put up only in bright, clean aluminum packages.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

No Kidding

Caught in the west Miramichi River near the mouth of the Calais River in New Brunswick in water open to the public, this 46 pound salmon was landed by W. E. Kidder of Kalamazoo, Mich., on the last day of the open season.

Canada's Foreign Office

Manitoba Free Press. The right of Canada to look after her external affairs is as indefeasible as her right to domestic self-government; and the widening exercise of this right will keep pace with the growing need for representation abroad. Our past system . . . has been to demand from the official representatives of Great Britain a service which they are not equipped to render at the cost of the British treasury. The system is not creditable to us nor fair to the British Government; and the service Canada receives from it, while better than we deserve under the circumstances, is not what this country requires, nor what its people will demand as Canada grows in international importance as a trading country and in political power.

TO THE MOTHERS OF ALL PALE GIRLS

If Your Daughter Shows Signs of Anemia a Tonic is Needed.

Anaemia is simply a lack of blood. It is one of the most common and at the same time most dangerous troubles from which growing girls suffer. It is common because the blood so often becomes impoverished during development, when girls often overwork and overstudy. It is dangerous because of the stealthiness of its approach and because of its tendency to grow steadily worse. Every growing girl should occasionally take a tonic to ward off this insidious trouble. It is because of their powerful action in rebuilding the blood that Dr. Williams' Pink Pills have made a world-wide reputation. The case of Miss Claire Sullivan, Pincher Creek, Alta., amply proves the value of this medicine. Miss Sullivan says: "During my school days I suffered a great deal from thin and watery blood. I was continually weak and tired; my appetite was poor, my sleep unrefreshing and I was troubled with backaches. To make matters worse I was attacked with acute appendicitis and the operation left me in a very weakened state. My mother, learning of the value of Dr. Williams' Pink Pills, had me take them and after using them for some time I can say the result was simply wonderful, as they completely restored my health, and now when opportunity occurs I always recommend these pills to weak, pale girls suffering as I did."

You can get the pills from your drugstore, or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Britain Building 20 Times As Many Ships as America

London—American competition in shipbuilding, the greatest menace to British supremacy between 1916 and 1920, has now ceased to exist, in the opinion of British investors.

With a general depression, which makes it a real trial of competitive strength, England is building twenty times as many ocean-going vessels as the United States and 50 per cent more than all Continental countries put together.

Within the last few weeks British shipbuilders have obtained contracts from the United States, Norway, Sweden, France, Spain, Canada, Argentina and Chile. One firm on the Tyne has booked the biggest order on record, that of ten ships for Canada.

Appetizer

The young people of the First Baptist Church will have a little petting-party at the church parlors on Friday evening. A light lunch will be served afterwards.—Owa paper.

Minard's Liniment for Backache.

"Canada a Nation"

Leo Maxse in the National Review (London). Canada is steadily drifting away from the Mother Country in the economic sense as Mr. Joseph Chamberlain feared it would without a conscious concerted effort to counteract centrifugal forces. The optimists of Ottawa imagine that their country can become a commercial annex of their mighty neighbor, while retaining her political independence. This is what "Canada a nation" means in their eyes, but all history is there to refute them. They must make up their minds as to whether they wish to become effective members of the British Empire, or so many States in the American Union. Our Statesmen must do likewise and decide whether they wish to see Canada outside or inside the Empire.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with gripping pains; is seized with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to set him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and indigestion and allay teething pains. They quiet the nerves and promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Barefoot Tropics

Earliest Footgear, However, Is Traced in Warm Lands, Such as Egypt and Irak

Washington—Falling to wear shoes has been against the law in Portugal since October 1. Because of the many adults who have been in the habit of going barefoot, in the cities as well as in the country districts, the authorities, according to dispatches, see difficulties in enforcing the new statute. "This unusual law draws attention to the great number of people in the world who still go unshod," says a bulletin from the headquarters of the National Geographic Society, "and to the varied kinds of footwear in use from the polar regions to the tropics. The tropical countries are the strongholds of the great unshod. In Africa, parts of Central America, the northern portion of South America and in southern Asia, the majority of the human feet are devoid of covering through the seasons and from the cradle to the grave. In the cooler parts of the earth, both rigorous weather and the greater activity of the people have made foot-coverings necessary during the winter months at least."

"It is in the warm regions just outside the tropics, such as Egypt and Mesopotamia, that we can trace civilization farthest into the past. There the slaves and lower classes could go comfortably throughout the year without protecting their feet, but the use of shoes for the upper classes developed at an early date. The primary consideration was to protect the bottoms of the feet. Therefore, the sandal was the first type of shoe to be invented. It was merely a flat piece of some protective material bound loosely to the foot. Since wood was difficult to obtain both in the Nile and in the Tigris-Euphrates Valleys, sandals of crudely plaited straw and reeds were first used. Later the Egyptians made sandals and light shoes of beautiful workmanship from leather and kid."

"In Palestine the ancient Hebrews wore sandals made of a heavy piece of leather, of cloth, or less frequently, of wood. A few of the latter, for rough use, were shod with iron. The Greeks and Romans, starting with a simple sandal, improved on it in time by adding edges which turned up along the thumbs passed over the top of the foot and around the ankle, foreshadowing the closed shoe. The thumbs became sheets of leather and shoes and boots were born in Europe."

"In central and northern Europe the cold winters made it necessary, of course, to cover the feet and legs when out-of-doors. In early times, crude sacks of skins were made. Grass was stuffed in under the soles of the feet and around them to add warmth. Later, well-made boots of leather replaced this crude footwear."

"The greatest single factor in the development of modern shoes was the invention of shoe-making machinery. American inventors were first in this field and, as a result, the United States leads the world in shoe production. In 1926 more than 324,000,000 pairs of boots and shoes were turned out by the factories of the United States. This one year's production was worth nearly \$1,000,000,000."

Break Colds with Minard's Liniment.

We have in England the ridiculous situation of more and more writers determined to write books and more and more people not very anxious to read them.—Hugh Walpole.

When your
Children Cry
for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Strongest medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

LEONARD
EAR
OIL

Improves Hearing, Relieves Head Noises

Nine out of ten cases of DEAFNESS and HEAD NOISES are caused by catarrhal mucus (matter) in the Eustachian Tubes, which connects the nose and the ears. Leonard Ear Oil removes the MUCUS, OPENS UP THE TUBE and the OTHER AIR PASSAGES OF THE HEAD, and the result is improved hearing and relief from Head Noises. It is not put in the ears, but is "INSERTED IN THE NOSTRILS" and "RUBBED IN BACK OF THE EARS" and special instructions by a noted Ear Specialist in each package for different kinds of Deafness and Head Noises tell you exactly how to take care of your own case. Leonard Ear Oil is not an experiment but has had a very large and constantly growing sale since 1907, and every year it has relieved thousands of people of their Ear Troubles. No matter how long you have been deaf, nor how deaf you are, or what caused your deafness, or how many things you have already tried which have failed to relieve you, Leonard Ear Oil has relieved many such cases as your own. Why not you? The price is \$1.25. Leonard Ear Oil is for sale at Druggists, or direct postpaid upon receipt of price.

WHITE STAR LINE CANADIAN SERVICE
J. S. GILES, Agent, Lachute.

HON. J. E. PERREAULT TO BE BANQUETED.

A great dinner for the sportsmen of Quebec, with Hon. J. E. Perreault as guest of honor, is to be given in Montreal on Saturday, December 8th. The dinner is both revival of an old tradition and beginning of a new activity in the sporting life of the province. It is to be given by the Province of Quebec Association for the protection of Fish and Game and will be attended by important figures in Canadian public life.

Invitations to the dinner have been sent to His Excellency, the Governor-General, Hon. Narcisse Perreault, Lieutenant-Governor of Quebec, Premier Tachereau, E. W. Beatty, Sir Charles Gordon, Senator W. L. McDougald, Senator Smeaton White, and many other prominent public men, and sportsmen from all parts of the province will attend.

The association for the Protection of Fish and Game was founded nearly seventy years ago in 1859 and for many years its annual dinner was a famous event.

The last dinner was held in 1912 and then the war interfered. But now, after sixteen years, a group of young and active sportsmen have come into the association and its activities, including this dinner, are to further the interests of sportsmen and to safeguard the vast resources of public wealth which the province of Quebec owns in its streams, lakes forests and fields.

Hon. Mr. Perreault, as the guest of honor of the evening, will be the chief speaker and will outline the work and plans of his department as Minister of Colonization, Mines and Fisheries for the province of Quebec.

There will be other important speeches and an entertainment suitable to the occasion with parts taken by guides and hunters and songs by chanteurs. The menu will match the entertainment. It will be a real hunter's fare with pea soup, beans, pie and doughnuts.

The dinner will be held in the Rose Room of the Windsor Hotel at seven-thirty on Saturday, December 8th. Arrangements are in the hands of Charles de B. Bouthillier and a committee representing all parts of the province. Tickets are now available at five dollars each at the offices of the association, 610 St. James St., Montreal, in care of J. R. Innes, Sec.-Treasurer.

The other officers of the association are:—Hon. President, J. O. Tetreault; President, J. S. Hall; Vice-President, C. de B. Bouthillier; Hon. Treasurer, C. R. Rolland. And the executive committee includes Chas. G. Coristine, A. Daillie, G. Ross, H. Sims, James Bos, D. E. Saunders, J. A. Turcotte, E. M. McCarthy, L. Beauvais, C. H. Godfrey, D. Geo. Fisk, J. C. Donner, M. C. Oswald, F. A. Rolland, J. R. Beattie, S. V. Sugret, L. J. Tarte, L. A. Ekers, D. W. Kelly, Hugh Cannell, Phillip MacKenzie, J. A. Rolland, H. M. Banks.

MONUMENTS

—I wish to remind the public generally that I am prepared to supply monuments of any size, quality or description on shortest possible notice. Re-lettering & adjustments of stones already erected will be carefully attended to by H. J. Hammond, Monumental Works, East Ward, Lachute.

DOUGLAS G. SIMON, Proprietor.

Edgar Boyd, Auctioneer.

NEW CITIES

THIS MAN is a business prophet. He does not really look into a crystal ball but he reads the future nevertheless and he sees new cities yet unbuilt. He is important in the telephone business.

He judges the future from the facts of the present and it is his job to judge with accuracy. He must judge with accuracy because, in a telephone system, plans must be made for years ahead and millions of dollars are involved.

With a railway there must be tracks and stations before trains can run. With a telephone system there must be conduits and central exchanges before telephones can go in.

To wait until people are clamoring for telephones is too late.

THE BUSINESS PROPHET does not wait. He comes to the management with his charts and graphs and figures and says: "In 1930 the demand in Ontario will be 80,000 new telephones. They will be wanted here and here and here."

Or he says: "Within the next five years the Province of Quebec will need at least forty per cent more exchange capacity."

And the management does not wait either. They know it is up to them to prepare now. If they don't they will be falling down on their job; they will not be keeping pace with the country.

BECAUSE THE BUSINESS PROPHET spoke in time and the management acted promptly there are 139,000 telephones being installed in Ontario and Quebec this year. Without them there would be inconvenience and confusion now in thousands of new homes and offices.

Next year the business outlook calls for spending over twenty-seven million dollars to extend and renew the system and plans have been made to do so.

For the next five years the telephone expansion definitely known to be needed in the two provinces means over one hundred million dollars.

FINDING THE MONEY is a problem. It is as great a problem as the complications of engineering and organization.

Every year as the country grows there must be new money ready so that the telephone system may keep pace.

Every year thus far the money has been ready because the policy of the telephone system has been fortunate in attracting the support of conservative and reliable investors who have not been subject to the influence of market fluctuations.

THAT IS HOW the business prophet and his graphs have been made effective. And that is why the telephone management has always met Canadian progress with confidence and enthusiasm.

Published by The Bell Telephone Company of Canada to tell you something about the telephone business and the people in it.

EVERYTHING TO BUILD ANYTHING

J.W. COTTINGHAM LIMITED

LOCAL NEWS.

Mr. J. G. Lacasse spent Friday last in Montreal.

Mr. and Mrs. Archie Graham spent Tuesday with friends in Lachute.

Mr. and Mrs. Fairbanks Monette are spending this week in Montreal.

Mr. Robert Beers and Mr. Donney, of Montreal, spent the week-end in town.

Miss E. Crewe of Montreal, spent the week-end in town, the guest of her parents.

Mrs. Scott, of Montreal, was the week-end guest of her mother, Mrs. J. M. Mackie.

Mr. Barron & Miss Catherine Barron, of Montreal, spent the week-end at their home here.

Miss Grace Smith, of Stonefield, spent the week-end at the home of her father Major S. E. Smith.

Mr. and Mrs. F. Wilkins, of Montreal, spent the week-end the guest of Mr. and Mrs. Earl Bryerton.

Mrs. P. Monette returned home last week after a pleasant two weeks' visit with her sister at Levis, Que.

Mrs. Robert Beers and infant daughter returned home last week, after spending two weeks with her mother Mrs. Kidd.

Mrs. J. E. Arnold has returned from Montreal and MacDonald College, where she attended the funeral of her brother-in-law, Professor A. W. Kneeland.

The Rev. Campbell Wadsworth has received a call to Westminster United Church, Winnipeg, as assistant pastor to Rev. Dr. Christie, on which he is now considering.

With teas, bazaars, and card parties the ladies of our town have been kept pretty busy during the last two or three weeks, attending these functions which have been quite numerous.

Mr. David Black was in Toronto this week, attending a meeting of the National Dairyman's Council of Canada. He is one of the outstanding representatives in looking after the interests of the milk shippers which means much to our community, for that is one of the chief industries in this County.

Rev. A. Penman, of Buckingham, Que., has accepted an invitation to become the Pastor of the Daleville, Brownsburg and Lachute Baptist Churches and will begin his work on Sunday, December 23rd. (Evangelist A. G. Turkington, of Birmingham, N. Y., is supplying the churches during the interval.) Mr. Penman and family will occupy the manse at Daleville.

For the conveniences of our customers in Brownsburg, Lachute and vicinity we have imported direct from Italy a big assortment of Hand-made art laces, linens, and embroideries, consisting of Dollies, Oblong Runners, Pin cushions, Centre pieces, Vanity sets, Tea sets, Napkins, Luncheon sets, Bridge sets, and towels, all trimmed with fillet and points de Venice Lace.

A. HABIB, Brownsburg, Que.

ALL SET FOR CHRISTMAS

The store of Mr. Frank E. Earle has undergone a real transformation. His growing trade has necessitated an enlargement of the premises and an invitation is now extended to the general public to secure their Christmas Gifts from the splendid line, which he is now able to display to better advantage than before. Call and see for yourself. Our prices are right.

Frank E. Earle, Jeweller.

Main St., Lachute.

DO YOU KNOW

'WHAT EVERY WOMAN KNOWS?'

Maggie Wylie is only a stone-mason's daughter living in a small town in Scotland; but she is a woman—and she knows! The players of the Literary-Dramatic Society have discovered the secret in J. M. Barrie's play which they will present to you at the Auditorium, on Friday, Dec. 7th., at 8.15 p.m. Family affection, Scottish ambition, love, politics, and philosophy are blended, as only Barrie knows how, to produce thrills, chuckles and perhaps the odd tear. Throughout the whole, one's interest is keenly sustained by the career of John Shand, a Scotchman who, not until later in life, discovers a sudden sense of humour.

That Personal Touch!

WEDDING BELLS.

MEIKLE - TROTTER.

A pretty wedding took place at the home of Mr. and Mrs. W. H. Lamb, on Saturday afternoon, November 24th., when their cousin, Katherine Grace, only daughter of the late Rev. L. A. and Mrs. Trotter, of Victoria, B. C., was united in marriage to Mr. Gerald Keith Meikle, of Montreal, son of Mr. and Mrs. Douglas Meikle, of Winnipeg, the Rev. G. Campbell Wadsworth officiating.

While the Wedding Hymn "O Perfect Love" was being sung by the quartette of Lachute United Church, the bride entered the drawing room on the arm of Mr. Lamb who gave her in marriage. She wore a gown of powder blue georgette with velvet hat of the same shade, and carried a bouquet of pink roses, lilies-of-the-valley and white heather.

Miss Rosamond Lamb, the bride's only attendant, wore a rose georgette gown with black velvet hat, and carried pink roses. Mr. Francis Scrase was best man.

The drawing room, where the ceremony took place, was a bower of greenery and pink mums, and the dining room decorations were bronze and yellow chrysanthemums.

Among the out of town guests at the wedding were Dr. Kenneth Cunningham, Mr. and Mrs. C. O. Jost, Miss Marion Jost, Mr. Basil Jost, Mr. R. H. Barron, Mr. Sterling Pollock, Mr. Keith Christie and Miss Catherine Barron.

C. G. I. T. CONFERENCE

The Canadian Girls in Training of Lachute and St. Andrews, held a Girls' Convention the 24th, 25th, November, to which they invited all teenage girls, and all women interested. The attendance was as follows:—Lachute 68; St. Andrews 18; Brownsburg 22 and 17 visitors.

The leaders sent by the Provincial Girls' Work Board of the Religious Education Council of the Province of Quebec were, Miss Marjorie Trotter, Girls' Work Secretary and Miss Milly Brisbane, President of the Girls' Work Board. These were kindly assisted by Miss Van Rodden, Miss A. MacKinnon and Mrs. F. S. MacGibbon.

The theme of the Conference was "To be a Pilgrim", and the Conference Hymn was "Valiant Song."

After registration, Miss Trotter conducted a Sing Song, which was thoroughly enjoyed by visitors and girls alike.

The address of welcome was given by Miss Freda Mason, and responded to by Miss Bessie Woods of St. Andrews.

In the election of officers, following this, Miss Gwen MacKinnon was elected President, and Miss Florence Thompson, Secretary of the Conference.

Miss Trotter explained the theme of Conference, and asked all present to join in silent prayer for help to be good Pilgrims.

The Conference was then divided into discussion groups, for girls and leaders.

Following this Miss Van Trotter took the girls for a hike, and later to the Presbyterian Church for games.

Soon after their return to the United Church, supper was served. At the close of supper, toasts were proposed to the King, Church, Home, Community and to the C. G. I. T. Movement, and afterwards the girls enjoyed a Sing Song and several other pastimes.

On Sunday at 9.25 the girls met in the Presbyterian Church for morning Watch.

The closing service was held in the Presbyterian Church, Sunday evening at 6.45. Miss Trotter took as her theme "Come Wind, Come Weather," and gave the girls some very helpful advice to carry with them in their knapsacks, on their journey as Pilgrims along the Road of Life. She urged that they try to be such Pilgrims as Browning describes "One who never turned his back, but marched breast forward." Her closing message, however, was that they would find their best example, and companion in Christ, the greatest Pilgrim of all.

To close the service, the girls, singing their Conference Hymn, formed the "Friendship Circle." Each girl had a candle with which she lighted that of the girl next her, and in this way, all the candles were soon aglow. Then the girls joined in singing "Follow the Glean," and after that, Taps. The collection which amounted to \$11.13 is to be devoted to Christmas Cheer for the needy.

SCOUT NEWS.

Several parcels of toys, books etc., were received this week and we were pleased to receive them. Any people, who may have undesired toys or books, have only to let a scout know and we will be only too willing to collect them.

The Bull-Dog Patrol won the competition for the month of November. The new competition will start next Wednesday.

The standing of the points are: Bull-Dog Patrol,—384 points. Wolf Patrol,—382 points. Crow Patrol,—380 points. Fox Patrol,—344 points. The patrol with lowest number of points is appointed duty patrol for the following month.

Great Shannon Power Scheme Will Drive Ireland's Industries

Army of Irish and German Workers Carry on Task of Harnessing River's Flow—Undertaking Called Second Only to Niagara

Dublin—Ireland's great need has long been for cheap, home-produced power to take the place of imported coal, and, the Shannon electricity scheme is the first bold, well-planned attempt to meet this need.

To-day, huge, repainted, electric standards stretch spider-like from the Shannon works, covering the country with a network of cables through which it is confidently predicted that next year the industries and towns of the Free State will be supplied with light, heat, and power.

Previous schemes for utilizing the water power of the Shannon have come to nothing because of the natural difficulties. The problem facing the engineers was to get a continuous fall of sufficient volume, summer and winter, to maintain a constant supply of power. The Shannon is a river of variable flow. It fluctuates from 1,600,000 cubic feet in winter to 75,000 cubic feet in summer.

The plan of the Shannon scheme is: 1 To secure an adequate storage basin. 2 To construct a canal—the head race—from this basin that will lead the water to the point where the deepest fall is possible. 3 To guide the spent water through another canal—the tail race—back to the Shannon.

Lakes as Reservoirs

Three lakes—Lough Derg, Lough Ree and Lough Allen—are natural reservoirs, which can be drawn on to maintain the water supply. From Lough Derg to Limerick the Shannon flows in a winding course of some 30 miles, gradually dropping about 100 feet. The head race for the power development has been planned to begin where the water level of Lough Derg can be retained with the least effort.

In the present "partial development" scheme, only Lough Derg will be required for water storage. But in the "further development" which is anticipated to be reached by 1937, Lough Ree and Lough Allen will be used, while in the "final development" the storage capacity of the three lakes will be more than quadrupled by artificially raising the level of Lough Derg about 7 feet.

The weir and the intake building are situated about four miles from Killaheo. The intake building is a massive wall of reinforced concrete set at an angle to the river. Three pierced openings will admit the water to the head race. There is a smaller opening for navigation. Boats going from Limerick to Killaheo will be able to proceed direct through the head race and the tail race by means of a lock instead of by devious ways of river and canal.

Flooding of Low-Lying Ground.
The weir will restrain the Shannon from entering its natural bed and will help to raise the upstream water level by some 33 feet. Six great sluice gates will regulate the outflow. Owing to the elevation of the water level, low-lying ground up the river will be flooded except where protective embankments are built. A fish pass will be provided in the weir to enable salmon to reach Lough Derg.

Some 4000 men are employed on the works, and of these over 400 are Germans. Close by is a small German village of wooden huts, gayly curtained, with flowers on the window sills. Fair-complexioned, flax-haired women may be seen swinging sturdily across this Irish mountain side passing from one hut to another.

The canal bed has been cut through the hills—the tail race for the most part being cut through solid rock. Mechanical diggers are at work. Caterpillar excavators crawl up the side. The town of Limerick is used to the sullen boom of the blasting. Notice boards in German are frequent and trucks bearing the legend "Krupps" or "Siemens-Bauunion" rumble up and down.

The strange mechanical "banker" weighs 350 tons. It keeps two mechanical diggers working at full capacity to supply its needs. This machine, brought over from Germany in sections, is busy making the bank of the huge canal, smoothing the side, picking up sand and gravel with one continuous pull.

Turbine at Power House

The center of all the work is the great power house at Ardara, where each of the turbines will generate electricity to the extent of 30,000 horsepower. The sluice house, an immense dam, stretches across the canal, pierced by six holes. Three of these holes lead to pipes 20 feet in diameter and 145 feet long. They convey water to a tapering spiral, like a gigantic snail shell, 100 feet below. These turbines are among the largest in the world and each bearing weighs 20 tons.

When the scheme is working, 105 tons of water a second will enter each intake pipe, and the bearing will carry a total weight of 502 tons, which is the greatest known strain any single bearing has to stand.

The engineer, overwhelmingly proud of this Irish achievement, said: "It is second only to the power station at Niagara Falls, and we had to make every bit of this, while that was ready-made. Anyway," he added, with an Irish twinkle, "we shan't waste so much power here!"

When the work is completed, the water will trickle slowly in over a period of three months, during which time the bed of the canal will settle. Searching tests will be made for leakage. Then, in October or November next year, driven by Shannon power, electric lights will blaze and the wheels of industry hum throughout Ireland.

from off his chest, and the asthma immediately returned."

FATHER AND A TOOTH

To superstitious beliefs there is apparently no end in Wales. Here are some mentioned by Prof. Gwynne Jones:

A man is expected to suffer from toothache before the birth of a child to his wife, and to lose a tooth every time a child is born to him.

A girl will know that she will get married if she is able to retain in her mouth a drink of water from a well, while she walks three times round the well.

A marriage will be unlucky if the bride returns to a house in which no fire has already been kindled.

A bird flying against a window at night is a portent of death; a tree that falls has a similar significance.

Work

Writes the author of "The Simple Life," "When I am forced to contemplate the idleness of some men's lives, a great sadness takes possession of me, with such deep distress does the emptiness of all this vanity fill me; but I never tire of watching a workman at his task, on account of a certain lofty dignity, a certain majesty, that surrounds him in my eyes."

Evil will it be for any country when work comes to be generally despised, and the idleness of the very wealthy is admired as the ideal condition.

A GREAT COMFORT

A rich but very eccentric man died. The clergyman, who was young and new to the parish, thought it a fitting opportunity to call and comfort the widow. "You must not grieve," he told her. "The body that lies here is not your husband. It is merely a husk, an empty shell—the nut has gone to heaven."

"You do so remind me of a telescope, Mr. Simms." "My appearance, do you mean?" "Partly, but you're so easily drawn out, seen through and shut up again."

Said J. J. Tunney to G. B. Shaw, "The brain is mightier than the jaw." "Yet, both I find, can earn big money," said G. B. Shaw to J. J. Tunney. —Boston Transcript.

The Singing Leaf

By ALICE WETHERELL

Brown Leaf should have been lonesome. For she was the only leaf on the whole oak tree without a gay, gay dress. But she wasn't lonesome really. For Brown Leaf had a secret that made her very happy. So happy, indeed, was Brown Leaf, that all her sisters on the tree began to talk about it.

Brown Leaf heard their whispers. For after listening very closely to the birds all summer long, Brown Leaf heard very, very quiet sounds. She used to waken in the morning to the sweet little chirp of the baby thrush. And that is a very soft sound. Yes, Brown Leaf's sisters were whispering about her, but what did she care? She had her secret.

"What makes Brown Leaf so happy?" she heard her sister in the scarlet dress say. "If I looked as dull as she does in that brown dress I'd cry my eyes out."

"I can't understand," whispered Orange Leaf, another sister. "You'd think to see her smile that she had a dress as gay as any of us. But then she could have had it if she had bathed in the sunset pool as we did, instead of listening to those thrushes all the time."

"Well," said Purple Leaf, "perhaps now the thrushes have gone away she will take a bath in the sunset pool, and still change the color of that dull dress."

"It certainly will be a dull party for her if she stays that color," said Scarlet Leaf.

Now Brown Leaf heard every single word her sisters said. But she was happy, for she had her secret still. Brown Leaf did know that the party was to be a fancy dress one. For the King of the Winds had issued an order to that effect. In fact, it was that order that had made all the other leaves bathe in the sunset pool. But Brown Leaf had not cared to be gay-colored. She had chosen brown herself.

Brown Leaf Chooses

"I'd like to be the color of your feathers," she had told the thrush.

"Bathe in the moonlight and listen to my song," the thrush had said. Night after night, she had bathed in the moonlight and listened to the thrush's song. And one morning she had wakened with this pretty new brown dress. Oh, if she could only get her great wish as easily as she had changed her color.

It would be easy to get her great wish. When she had asked the thrush about it, he had said:

"Watch the sunset every single night, and think of the loveliest sound you ever heard."

This advice was easy to follow. For Brown Leaf had always watched the sunset from her sheltered spot behind the thrush's nest. When the thrushes had been here, she had watched it with them as they sang to her about the lovely colors that she saw. "And think of the loveliest sound you ever heard." That, too, was easy, for wasn't the thrush's song the loveliest sound that she had ever heard?

Would she get her greatest wish if she did all this night after night? Brown Leaf couldn't tell, but she could try. She had got her other wish by trying. But this great wish was so much more important. She had wanted it ever since she had first heard a baby thrush whisper to its mother. Then she had wanted it more than ever when the young thrush had sung his first song to the sunset. She had wanted it so badly that she had sat and listened to that song instead of bathing in the sunset pool with all her sisters. She wouldn't move a tiny bit from behind the thrush's nest.

"I want to listen to the thrush. I want to learn to sing," Brown Leaf had said. And of course the other leaves had laughed at her.

A leaf said: Who had ever heard of such a thing? What was Brown Leaf thinking of? She had wanted a brown dress and now she wanted to sing. Why couldn't Brown Leaf be like all the others?

Brown Leaf was sorry she had told her greatest wish. But she hadn't told her secret. She hadn't told them how she was going to learn to sing. Perhaps she would surprise them yet, even though they laughed at her.

The Fancy Dress Party

At last there came the night of the autumn party. Brown Leaf could hear the approaching music of the Frolicking Winds as they came, led by their king.

"Poor Brown Leaf!" she heard her sisters whispering. "She will have a poor time at a fancy dress party in a dull, dull gown like that."

And so that she might not hear their voices, Brown Leaf kept repeating to herself:

"Watch the sunset. Think of the loveliest sound you have ever heard."

"Who, who, who, who are you?" the winds kept singing as they came. And in a minute Brown Leaf saw that all her sisters were up and dancing, while the winds were singing to keep time.

On and on the sisters danced, until at last they dropped from weariness. "Stop, winds, we're tired. We're going to sleep," they all were calling.

And when Brown Leaf looked down she saw that the winds had left her sisters down among the flowers in the garden.

"We're not tired," the winds kept singing.

"No, we're not tired," said the King of the winds. "This is the time for our real music." Then he came up quite close to Brown Leaf and whispered:

"Sing a lullaby, and we shall play our harps."

"The King says I can sing. The Thrush was right," thought Brown Leaf. Then, as the winds began to play their harps, Brown Leaf watched the sunset, and thought harder than she had ever thought before of the Thrush's lovely song.

And as the winds played on their harps, Brown Leaf began to sing a lullaby to her sisters, who were lying in their cozy beds among the flowers. And Brown Leaf was very, very happy when she saw their looks of understanding and of thanks.—The Christian Science Monitor.

Townley: "What have you got in your garden this year?" Subdule: "My neighbor's Plymouth Rocks, Leghorns and Rhode Island Reds."

Boy Matadors Thrill Spain

Feat in Bull-Ring Revives Interest in Old-Time Joust

Barcelona, Spain—A last desperate attempt to revive the past glories of the bull-ring is being made in Spain by means of two schoolboys, Manolo and Pepe Mejias, aged fifteen and fourteen.

Since Gallito, Spain's greatest matador of recent years, met his death in the bull-ring it has been generally felt in Spain that the days of the bull-fight were numbered. And as no other star of his magnitude came forward to take his place, this feeling grew.

Now, however, these two schoolboys, descendants of a long line of bull-fighters, have suddenly stepped into the arena, and have won even the applause of the veteran torero-ids of yesterday.

Manolo and Pepe Mejias' names are on every one's lips, and their photographs in all the Spanish newspapers. When they killed six young bulls in the Monumental bull-ring in Barcelona the other day, there was not a place to be had in the vast building. Seats which normally cost about two shillings were sold at a premium of from thirty shillings to three pounds.

Pepe, the younger, an unassuming child with soft brown eyes, looked even younger than his years, and once he had discarded his glittering costume of gold sequins, it was easier to picture him as a schoolboy rather than as a killer of bulls.

Manolo, his brother, a typical Spanish youth in appearance, was equally unperturbed by the tumultuous reception they had received that afternoon.

"Splendours of Sport"

"The people of Spain," said Manolo, "are neglecting the bull-ring for the football field, but we, descendants of a mighty race of bullfighters, have sworn to revive the splendours of our national sport."

"Bullfighting has lost its hold on the Spanish people because of timid toreros whose first thought has been for their own safety, and not for the glory of the arena and the tradition of the real bullfighter, who would die before he would run away from the bull."

Pepe said that his greatest desire was to stare with his brother the honor of becoming Spain's most famous matador.

The boys confessed that they had become bullfighters much against the wish of their father, Bienvenida, who was twice severely injured in the bull-ring at Madrid.

If Manolo, three years ago, had not confided to his brother his intention of jumping into the bull-ring at Seville with an old cloak of his father's which he had hidden under his jacket, the boys might never have achieved their ambition.

This action of Manolo's, although he was found out and severely punished at the time, proved to the father that nothing would thwart the boys' desire to become matadors.

Since then, under the experienced tutelage of their father, the boys have gone from triumph to triumph. Manolo is described by authorities on bullfighting as the more stylish exponent of the "art," but Pepe is the more daring, and it is from this child of fourteen that the bullfighting "fans" of Spain are expecting great things.

King Amanullah Gets Air Wise

Afghanistan Monarch Wants Plane Service to India

London.—An Afghan-Indian air service is one of the latest developments in King Amanullah's drive to Westernize his country.

Reports from Peshawar, in North-west India, say that Amanullah has issued instructions to the Governor of Jalalabad to prepare four landing grounds in his province. At the same time three Afghan Air Force officers arrived at Dhakka for the purpose of picking a landing site there.

Providing Afghanistan can reach an agreement with the Indian Government, this means that an Afghan mail passenger route will soon connect Kabul with Peshawar, and bring remote territories within easy and quick access. Already two air services are operating in Afghanistan—one a half-Russian enterprise between Kabul and Tashkent, in Russian Turkestan, and the second, a purely Afghan venture, which now carries mail and passengers from the capital to Mazar-i-Sharif in the north.

Soviets Press Sale of "Godless" Books

Moscow.—Henceforth all government-run bookstores throughout the Soviet Union will display anti-religious books in their show windows. Emelyan Yaroslavsky, secretary of the Communist party and chairman of the "Godless" Society, and Artem Halstov, head of the state publishers, addressed a circular letter to the bookshops telling them to push the sale of anti-religious literature.

What has become of the old-fashioned business men whose evenings were spent "on the books?"

Educated Welsh Still Believe in Witch Doctors

Foolish Superstitions Are Extant Among People of All Classes

MOLESKIN CURE

Incredible though it may sound in this matter-of-fact age, witchcraft is still widely believed in and practiced in Wales, and among its devotees are people of education as well as simple folk.

This fact was announced at the jubilee congress of the Folk Lore Society which is being held in Burlington House, Piccadilly. It occasioned no surprise in the audience, for this consisted entirely of men and women who have spent years in delving deep into the mysteries of the world's superstitions.

According to Prof. Gwynne Jones, belief in witchcraft is particularly strong in Cardiganshire, Montgomeryshire, and along the English-speaking border.

Bewitched Cow

"A medical friend of mine," he said "told me the other day that a young woman university graduate who had distinguished herself in science came to him and asked him if he could cure one of her father's cows, which, she declared, had been bewitched."

Another case which had come to his knowledge was that of an extremely intelligent and well-read man who, suffering from depression, journeyed 40 miles to consult a witch-doctor, though at the time he was being attended by his own family doctor.

There are many witch-doctors to be found in Wales, it seems, and their aid is sought by sufferers from all kinds of complaints.

A man who was suffering from asthma and could get no relief from ordinary medicines went in despair to one of them and was given a piece of moleskin to wear on his chest. "I am told," said Prof. Gwynne Jones, "that the man was cured of his complaint. Then one day his doctor came to him and removed the piece of moleskin

ADAMSON'S ADVENTURES—By O. Jacobsson.

WOMEN OF MIDDLE AGE

Need Rich, Red Blood to Maintain Good Health

After passing the age of forty every woman has reason to grow anxious about her health. This time of trial, with its attacks of faintness and fits of depression, its often violent headaches and back pains is rightly dreaded by women; but if reasonable steps are taken to safeguard the health, no serious ill-effects will arise. At this turning point in life Dr. Williams' Pink Pills have given a helping hand to thousands of suffering women who were fighting a hopeless battle against poor health and waning strength.

The very best help for any woman of middle age is the health help given by Dr. Williams' Pink Pills. These pills reinforce the blood supply, enriching and purifying it. In doing this they nourish the starved and over-taxed nerves and give new strength and vitality to the whole system. By this natural process Dr. Williams' Pink Pills completely dispel all pains and weakness, and a better, happier condition of health and spirits arises.

Every woman of middle age should take advantage now of the wonderful health-help of Dr. Williams' Pink Pills. They are sold by all medicine dealers or will be sent by mail at 50 cents a box, by The Dr. Williams Medicine Co., Brockville, Ont.

Fight Lone Battle

Farmers Are Lone Individuals, Struggling Against Organized Conditions, It Is Said

London.—The unsatisfactory conditions which are true of agriculture practically all over the world, and their decidedly poor state in England, afforded an interesting topic for Sir Horace Plunkett, who has long been a leader in bringing better living conditions for farmers in the British Isles. Speaking before the Allotments Organization Society and Small Holders, Ltd., which encourages the taking up of small plots of ground to be worked in co-operation with other occupations, he said that the plight of English farmers largely springs from the same causes which bring dissatisfaction in America and elsewhere.

"The business of farming as distinct from the industry of farming is in a state of chaos," said Sir Horace. "The majority of farmers in this country buy everything they require in their industry at retail prices, sell everything they produce at wholesale prices, and borrow money on terms wholly unsuitable to the agricultural industry. The great mistake that farmers make is that they have not learned the meaning of modern conditions of combination. They are individuals struggling against highly organized conditions."

The farmers' plight may also be partly ascribed to the fact that while the slow processes of nature refuse to be hurried, man's inventive genius has made the industrial life of the city more agreeable than they were, continued the speaker. He poked some good-natured fun at certain so-called advances which are much heralded. "I hear a great deal about nitrogen from the air," he said, "about synthetic food and similar stunts. There was a delightful article in the press a while ago upon milk. Some inglorious physicist has discovered that the cow is quite unnecessary for the production of milk. All you have to do is take the grass to the laboratory and make the milk. Physically I dare say it is possible, but I don't expect to see that little industrial revolution in my own time."

Evasion

Evasion is unworthy of us and is always the intimate of equivocation.—Balzac.

There is no "impossible" for the man who can "will" strong enough and long enough.

Red Rose Orange Pekoe has earned the patronage and good will of more tea drinkers than any other high-quality tea in Canada. Judges of good tea gladly give more for Red Rose Orange Pekoe because they know that the value they receive is worth many times the few extra cents they pay.

Dutch Reclaim Zuider Zee and Plan Huge Lock

Project at Ymuiden Will Give Amsterdam a North Sea Outlet by Next August

German Ports Watched

Nearly Eight Million Cubic Feet of Concrete Used

Holland is engaged on two pieces of engineering, each of its kind the greatest in the world. One is the reclamation of the Zuider Zee and the other, the new lock at Ymuiden, Amsterdam's outlet to the North Sea, is nearing completion and will, it is hoped, be wholly finished by August of next year, writes a correspondent of The London Times.

While Rotterdam keeps a jealous eye on Antwerp, Amsterdam watches in particular the German ports, and it is well for Holland that the vigilance does not slacken. The two cities are, indeed, the two great arteries of Dutch economic and commercial life. New industries—electric supply, artificial silk, coal (for coal mining can be classed as new for Holland)—are forging ahead, but, after agriculture, the backbone of Dutch trade is still shipping. Holland is one of the great carriers of the world, of which her colonies are no unimportant part; her area of distribution includes the great hinterland of the Rhine and the Meuse, and, as English shipowners have found of recent years, her share of the export trade of Europe has steadily become greater and greater.

PORTS IMPROVED.

To retain and, if possible, to enlarge her share, Holland is determined that her ports shall be kept abreast of the times and be able to accommodate ships of greater size if the movement for larger tonnage should go still further. In this respect Rotterdam and Amsterdam feel the disadvantages as well as the advantages of their position. Well placed as distributive centres, they are both ideally compact, but the long miles of the approach to them have entailed constant expense not only for maintenance but for enlargement as the existing waterways have been outgrown. Rotterdam has therefore laid its plans for the enlargement of the New Waterway: the new lock at Ymuiden is the reply of Amsterdam to these growing pains.

A journey down the fifteen miles of the North Sea Canal, which connects Amsterdam with the coast, will give some inkling why the Dutch are classed among the world's great civil engineers. On both sides are typical stretches of "polder" land; the sale of the reclaimed meadows contributed more than a quarter of the 46,000,000 guilders which was the cost of the original canal. Drawing near to Ymuiden the boat will pass under the huge steel railway bridge which pivots about its centre to allow a liner or warship to pass up to the shipyards of Amsterdam. At the end of the main channel is the original Ymuiden lock, which was opened with the canal in 1876. Before twenty years had passed the lock had become insufficient for the traffic passing through it, and in 1896 a new and greater lock, 738 feet long, 82 feet wide, and 33 feet deep, was built by its side. This, again, soon proved inadequate, and in 1911 a commission recommended the construction of a new lock 1,180 feet by 131 feet by 46 feet.

EXCEEDS SUEZ IN SIZE.

Partly because of the war it was not until 1917 that the act sanctioning the new work was passed, and by that time it was decided still further to increase the dimensions to 1,312 feet by 164 feet by 49 feet. (For convenience all measurements have been converted in this article from meters to feet. The figures are exact to the nearest whole number.) This is the scale on which the lock is being completed—a scale which will make Ymuiden lock the largest in the world, greater than the lock of the Panama Canal (1,000 feet by 110 feet by 43 feet) or of the Kaiser Wilhelm Canal (1,083 feet by 148 feet by 45 feet). The North Sea Canal will be dredged out provisionally to a depth of 41 feet, but the eventual depth will be 49 feet. The deepening to 41 feet will give the canal a cross-section of approximately 14,000 square feet, which will make it larger than the Suez and about as large as the Panama. Land has also been acquired for its widening. The new excavation at Ymuiden be-

New Zealand Goes in for Rabbits

One hundred of these chinchilla rabbits made a twelve thousand mile journey under the auspices of the Canadian Pacific Express Company from Lincolnshire, England, to Auckland, New Zealand, where they will form the nucleus of a rabbit farm. The express messengers disbursed one ton of feed to them during the voyage.

gan in 1919 and congreting in 1923. Foundations and subterranean water are a difficulty in most Dutch building, and Ymuiden has been no exception. The sandy soil and the great depth of the lock made it necessary to incase the whole pit in steel sheets, reaching to an impermeable layer of clay 125 feet below sea level. The lock itself is of reinforced concrete and is being constructed in three parts, of which one, the eastern entrance, with much of the lock chamber, is already finished. Nearly 8,000,000 cubic feet of reinforced concrete and 15,500 piles will go to the making. Figures, however, at least to the untechnical mind, can convey but small idea of the size of the undertaking.

But stand in the bed of the lock and its immensity becomes apparent. To right and left are the towering walls of concrete broken by the oval mouths of the culverts and the huge recesses for the sliding caisson gates—one at the east end and two at the west, for there is to be a gate in reserve. The recesses are designed also to serve as dry docks for the gates, should the occasion arise. The lock will be closed by rolling gates of steel, each weighing 1,184 tons and having an air chamber of 49,400 cubic feet. The chamber again is divided into sixteen compartments, each of which can be filled separately with water or emptied by compressed air. For normal working the air chamber will be partly filled with water, and the weight of the gate on the runners will be about 120 tons. When all compartments are emptied, the gate will float with a draught of thirty-nine feet.

LAXATIVE FOR BABY THAT "STAYS DOWN"

Baby's tiny system rebels against castor oil and strong purgatives; but here's a medicine that just suits him. And it does the work quickly and so gently that Baby doesn't feel it. Fletcher's Castoria is soothing, cross, fretful babies and children to sleep and making the feverish, constipated, upset ones well and happy, in millions of homes to-day. Castoria is purely vegetable, harmless and endorsed by the medical profession. Avoid imitations. The Chas. H. Fletcher signature marks genuine Castoria.

Small Beginnings

Away among the Alleghenies there is a spring so small that a single ox could drink it dry on a summer's day. It steals its unobtrusive way among the hills, till it spreads out into the beautiful Ohio. Thence it stretches away a thousand miles, leaving on its banks more than a hundred villages and cities, and many thousand cultivated farms, and bearing on its bosom more than half a thousand steamboats. Then joining the Mississippi, it stretches away some twelve hundred miles more; until it falls into the great emblem of eternity. It is one of the great tributaries of the ocean, which, only obedient to God, shall roar and roar, till the angel, with one foot on the sea and the other on the land, shall lift up his hand to heaven, and swear that time shall be no more. So with moral influence. It is a rill, a rivulet, an ocean, boundless and fathomless as eternity.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy for Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

To a Friend

I always pray for you with morning light,
When birds or sunbeams wake me to the day;
It is so sweet for parted friends to pray,
Thus may they help each other in life's fight.

Prayer spans the gulf of circumstance between
Our lives; I spend my thought on eager wings,
God bless my plea, to you a blessing brings,
And in His care I leave your life serene.

I always pray for you at close of day,
When in the quiet of my room I kneel,
With God and you in sympathy to feel;
It hallows sleep for parted friends to pray.

And through the working hours, oft silently
I lift my soul to God in prayer for you,
That He will bless your soul and bear you through,
I wonder—do you ever pray for me?
—Constance M. Savage.

Break Colds with Minard's Liniment.

Saving Giant Tortoise From Utter Extinction

A very short time ago it seemed likely that when the giant Galapagos tortoise at the London Zoo had lived out their long, slow lives there would be no more of them to be seen. Our grandchildren or great-grandchildren would know them only from photographs.

Like many of the other strange creatures of the globe, they were being extinguished by folly, or greed, or carelessness. The Galapagos tortoises are found only on the islands near the Equator, which bear their name, and 60 years ago they were innumerable. In later days whaling ships carried them off for food by the thousand, and left behind a legacy of dogs, pigs, cats and rats, which carried on the work of extermination by destroying the eggs.

When Dr. Townsend, of the New York Zoological Society, went to the Galapagos Islands a year ago, he found that the tortoises had gone from all but a few islands, and there they had taken to the mountains.

The Galapagos tortoise is not of the build for a mountain climber, and this generation of his family would have been the last had not Dr. Townsend captured 150 of them and transported them in safety to places in South and Central America, where they can live protected lives.

Over twenty women claimed as their husband a man who has been in hospital for a month, suffering from loss of memory. With characteristic cruelty the doctors are doing their best to make him fit to leave hospital.

FINANCIAL NEWS

Summarizing business conditions in Canada in November Letter, the Royal Bank of Canada writes optimistically as follows:

With agriculture prosperous, manufacturing plants active, building construction achieving new records in all parts of the country, and mines producing increasing quantities of ore, it is not surprising that the employment index for each month in 1923 should be well above the level of the corresponding month of any previous year. Import and export statistics reveal a large volume of trade and all indices of Canadian business conditions show that the country is enjoying a sound prosperity. A continued broad and steady development of the type indicated by these statistics from agriculture, mining and manufacturing, will be of greater service to the ultimate welfare of the country than a sudden boom. From this viewpoint, the present tightness of money constitutes a healthy restraining influence, preventing over-speculation and too rapid expansion.

With harvesting completed, or nearing completion, throughout the country, the farmers are engaged in fall plowing and in the preparation of the land for the crop of 1924. The Canadian wheat crop as a whole has been the largest on record, amounting to about 575 million bushels.

An average of the crop estimates of the Dominion Bureau of Statistics, the Manitoba Free Press, and the North West Grain Dealers' Association indicates that crops of the three prairie provinces will amount to 540 million bushels of wheat, 315 million bushels of oats, 115 million bushels of barley, 15 million bushels of rye, and 4 million bushels of flax. In the other provinces the season has been normally satisfactory for agriculture.

In the first eight months of 1923, the amount of iron and steel produced in Canada exceeded the amount produced during the same months of 1922 by more than 30 per cent; the new-print production of 1923 exceeded that of 1922 by 15 per cent; that of automobiles by 2 per cent, and that of flour by 14 per cent. In the tables given on the last page of this letter will be found the Royal Bank of Canada index of electrical energy production. The amount of energy generated in Canada for Canadian use in 1923 exceeded the amount generated in these same months of 1922 by 19 per cent. Canadian manufacturing activity has been at a much higher level in 1923 than during 1922, and 1922 was a year of record-breaking activity.

The Dominion Bureau of Statistics' "Preliminary Report of Mineral Production of Canada for the Six Months Ending June 30, 1923" shows that the value of minerals produced in this period was \$105,000,000, compared with \$99,000,000 in the same months of 1922.

The exports of lumber from British Columbia for the first six months of 1923 are 30,000,000 feet ahead of 1922.

Minard's Liniment for Backache.

Exactness

Some think that their exactness in one duty will atone for their neglect in another.—Samuel Rogers.

An explorer says that he has often come across wild tribes who have asked for whiskey, but he has always refused to give them any. No wonder they were wild.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia described by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

More Immigration Fads

Toronto Telegram: Hon. Robert Forke, who, as Minister of Immigration, feels that he must do something to stem the tide of immigration oratory, proposes to establish in England schools for domestics. These, it is presumed, will take girls from the factories and fit them for positions in Canadian homes. But why stop with these girls? Why not schools that will take men from the ranks of the unemployed and turn them into farmers? One proposition seems just as reasonable as the other.

THE KING.

No finer tribute could be paid to George V, who lies critically ill at London England, than that expressed by the Ottawa Journal of last Saturday in its leading editorial when it says:—

In a room in Buckingham Palace, London, England, an elderly English gentleman lies ill. But all over the face of the earth, on two hemispheres, on every continent, over more than a fourth of the habitable earth and wherever wireless can reach to the Seven Seas, men wait with hope and anxiety for bulletins from that bedside.

This is the British Empire! Days were when kings were feared, not loved, by their peoples. That, indeed, is still true of some lands where the monarchical system holds. But the British monarchy—and this should be said without complacency or boastfulness—is different. In all of human history there has been nothing like the trust and loyalty and affection which countless millions of all racial origins and creeds scattered all over the world give to England's King. It is not a loyalty of duty or compulsion; its strength and maintenance do not depend upon treaties or pacts or paper parchment. It is a loyalty and affection compelled by consciousness of what the Monarchy of Britain stands for in the world; what it stands for in justice and human liberty and decency among nations and men; and it is an affection compelled also by the nobility and fine human qualities of the man who for the past eighteen years has sat on England's Throne.

Judged by the old standards of history, George V. may not rank among the great rulers of the world's story. If, indeed, the standard of appraisal applied be love of pomp and power, greed for conquest, ambition to extend empire and to pose and posture in shining armor, he has no place at all. But if the test be the characteristics of a true English gentleman of a lover of peace among his own people and with all the world, of one who, recognizing perfectly his constitutional position, strove with a complete lack of vanity or arrogance but with the highest sense of duty to promote the well-being of his subjects, then, by such a test, George V. has been a great King.

Some outside the British Empire, failing to comprehend its deeper meaning and the secret of its unity, ask, Why a King? If, they enquire, King has no power or voice in your government, why maintain an institution that is obsolete and useless? What they fail to understand is the mighty part which a monarch of the character of King George can play in providing a common rallying ground for the patriotic sentiments and loyalties of widely-scattered peoples. Government, after all, is not wholly embraced in elected representatives, executives, bureaucrats and administrative machinery. There are as well those mystical, impalpable, sentimental things which challenge human emotions and rally and compel human loyalties, things which, rising above the din of party factions cause men to unite.

The British Royal Family today represent the best of the background and traditions and characteristics of the British people. This is not a Court where powdered courtiers cringe and posture, or where spurred and booted diplomats click their heels or where women and men intrigue through days and nights of revelry. Than King George himself there was no more hard worked citizen of the British Empire. Devoted to his duties, mindful always of the well-being of his people, entering with heart and soul into their joys, their failures, their vicissitudes and their triumphs, allying himself with no party or clique or faction, he has been the model Monarch. If today he lies stricken it is because of the sense of duty which, only two weeks ago, led him to stand amid one of London's fogs at the foot of the Cenotaph with his people paying homage to their dead.

And thus it is that today the prayers of countless millions ascend to Heaven for the recovery of George V. Thus that from Australia, "down under," on far Pacific isles, across India, through Africa and over most of this continent and Europe men breathe the invocation, "God Save the King."

QUEBEC LIVESTOCK MAKE FINE DISPLAY AT TORONTO SHOW

Quebec made a good showing at the Royal Winter Fair on Saturday in Toronto. Not only did the province stage the best display of livestock to date in the evening parade, but for the first time in the history of the Royal, Quebec Holsteins won the much sought interprovincial trophy. The massive silver ware offered by the Holstein Breeders' Association of Canada will remain in Montreal for the first time for the coming year.

With selections from the herds of T. B. Macaulay's Mount Victoria farm's outfit of Hudson Heights, Senator Raymond of Vaudreuil; Neil Sangster, of Ormstown, and Wilson Bros., of Lachute, Quebec, brought out a line-up which was hard to beat; in fact, Judge Moscrip of Minnesota declared it was the finest state or provincial exhibit he had ever judged. The parade of livestock completely filling the ring of the arena, featured the program of "Quebec Day". The long procession included Holsteins, Herefords and Ayrshires.

A. McLarni, Buckingham, Qub., was a prominent Clydesdale exhibitor, showing several winners.

PROHIBITION AND THE MOVIES.

A new field for the promulgation of prohibition propaganda has been opened by one of the largest motion picture corporations in America during the past few weeks, and one that the producers, as well as interested friends of the movement, believe will open a new era in education as to the evils of alcohol. The film is based upon data secured from the most recent scientific information procurable, and at the same time reveals an interesting element of romance in the proportion of eighty per cent romance and twenty per cent of fact. It is not the usual series of charts, but a clean, continuous story, portraying the prohibition situation as it exists in modern times.

Professional characters, several of them leading lights in the motion picture world, compose the cast and the film itself was secured at a cost approximately fifty thousand dollars and is of a character which will appeal not only to the intellectual public, but also to the class which demands amusement first and education afterwards.

There can be no doubt that the motion picture might be a great educational factor in any line in which it is desirable to inform the public. That the prohibition forces are awakening to its value in this respect is proof that they are alive to its possibilities, and is a hopeful sign of the times.

M. ELIZABETH McCURDY,
Prov. Supt. W.C.S.A., Dept. Press
Lennoxville, Que.

BROWNSBURG

Mr. and Mrs. Lonsdale & Mr. Hargrave motored to Montreal on Tuesday.

Miss Leona Thompson and friend, of Montreal, spent the week-end at her home here.

Mr. Archie McArthur, of Clarenceville, was a guest of Mrs. Robinson over the week-end.

Mr. Hargrave Lonsdale, of Springfield, Mass., is visiting his parents, Mr. and Mrs. Wm. Lonsdale.

Mr. and Mrs. Leonard Boyd, of Lachute, were visitors at Mr. and Mrs. Gordon Todd's on Sunday.

The Ladies' Auxiliary of the United Church are busy preparing for their Bazaar to be held on Saturday, Dec. 1st.

The Young People of the Daleville-Baptist Churches are preparing a program for their Xmas entertainment, which they propose holding on Dec. 19th. Notice later.

CUSHING

Mr. Willie Matthews, of Stardale, was the guest of his cousin, Mrs. T. Weir Jr. on Sunday.

Miss Nielson, of Hawkesbury, was the week-end guest of Miss Fairy Jones for the week-end.

Mr. and Mrs. E. Orell and son Donald and Mr. J. Reid, of Montreal, were Sunday guests of Mr. and Mrs. F. Fuller.

Miss Margaret Canning remained in St. Andrews East over the week-end and attended the C. G. I. T. convention in Lachute on Saturday.

Mr. and Mrs. A. Graham and Allan were guests on Sunday of Mr. and Mrs. A. R. Graham of St. Philippe. The Women's Missionary Society meets at the home of Mrs. John Jones, on Tuesday, Dec. 4th, at the usual hour. An Election of Officers for the coming year will take place. Mr. Allister Jones spent a few days in Montreal last week.

Quite a number of people turned out to enjoy the Community Club Program on Friday night, and all seemed to be quite pleased with the numbers on the program, which were: Accordion music by Mrs. D. Richardson; stirring Scotch Marches; Luder's favorites by Mr. Roy Dobbie; a reading (one of Whitcomb Riley) by Miss Doris Leroy; a short dialogue very well acted by the Canning Trio, children of Mr. and Mrs. John Canning, of Stonefield; Habitant selections given by Miss Whelan and Mrs. A. Graham; Mandolin music and songs by Miss M. Jobb, finishing up with a dialogue "Aunt Dinale" in Marimony, by Miss Jobb and Mrs. A. Graham.

ROGERS
BATTERYLESS RADIO

"Four-Twenty" Table Model

The standard model by which all other electric sets are judged. A development of the famous Rogers Model "Two-Twenty". Single Tuning Knob operates Illuminated Drum Dial. Automatic Voltage Control, Rogers Output Filter, Phonograph "Plug-in" Jack. Genuine Walnut Cabinet by Malcolm.

Are You A Hockey Fan?

... then the price of this Rogers-Batteryless will admit you to every Hockey Match this year, next year and just as long as you want to keep this Set. And, of course, every other Sporting Event is no farther away than your den, if you own a Rogers-Batteryless.

The famous Model "Two-Twenty" that preceded this model, sold for \$225 last year. Yet this set, with all the new 1929 improvements added costs only \$165 complete (except Loud Speaker), \$60 less than last year! That's why we say without any "if's", "and's" or "but's" that this particular Rogers Model is the one best "buy" in the whole field of electric radio.

... but don't take our word for it

Come in or telephone and ask to have a "Four-Twenty" installed in your home without obligation. That's the way to find out for yourself what the Rogers-Batteryless will do. Terms to suit your convenience.

S. McFaul, Main Street, Lachute.

ST. ANNE'S EAST.

Mrs. Dr. Shaw made a visit to friends here during the week.

Miss E. Hendry was in Montreal during the past week visiting friends.

Mr. and Mrs. Eccles have taken Mr. Wm. Simpson's home "Pinelawn".

Mr. and Mrs. A. H. Shorey will occupy the home of Mr. George Simpson for the winter months.

Mr. and Mrs. John Fair were here on Saturday to close their home "Abenior" for the winter.

The Steamer Victoria made her last trip of the season on Wednesday, Nov. 21st. St. Andrews is not a winter port.

Mrs. J. Macaskill with a group of C. G. I. T. girls, attended the conference in Lachute on Saturday and enjoyed the afternoon and evening sessions very much.

Mr. Kenneth Sugars, Mrs. Wm. Sowden and the Misses Ellen and Esther Sugars, of Montreal, motored to St. Andrews on Sunday and were welcome visitors at the home of Mr. and Mrs. Allan Sugars and family.

Kicking a Tire is no way to test it!

ONLY a pressure gauge can ever give you a true indication of inflation.

There is a correct pressure for your tires. It depends on the size of the tire and the wheel load. At that pressure your tires will give you maximum mileage. If your tire inflation goes three pounds below that correct pressure you cut mileage from the life of your tires.

Use a gauge.

Better still, drop in at a Dominion Tire Depot once a week and have every tire inspected, and the pressure checked. Let an expert search for cuts and bruises. Often a slight repair will prevent a blow-out.

You are never far away from a

DOMINION TIRE DEPOT

GEO. Y. DEACON

Don't burn coal to warm Jack Frost!

TEN chances to one your roof is a liability instead of an asset. It may keep the snow out this winter, but is that all it is on your house for? Insulation under a roof is just as important as shingles on top of it. It is good practice to keep winter weather outside, but it is just as important to keep paid-for heat inside. A non-insulated roof means you are wasting at least one ton of fuel in every three. This is an established fact; your own architect will confirm it.

The Department of Natural Resources of Canada is doing its utmost to establish insulated Canadian homes.

TEN/TEST is the best and only solid and hydraulically pressed insulating building board manufactured. It is being used from Cape Town, South Africa, to Hudson's Bay, Canada—a Canadian product with a world-wide reputation.

Insulate your home with this material made up into great sheets of insulating lumber.

Let us tell you the rest of this story.

THE YELLOW SEVEN

The Barrier of Fire

By EDMUND SNELL
Illustrated by R. W. SATTERFIELD

BEGIN HERE TODAY

Enid Bromley, daughter of Chard Bromley, is visiting at the home of Capt. John Hewitt, Commissioner of Police at Jesselton, British North Borneo. Bromley is new manager of the Baniak-Baniak rubber estate. He issues invitations to a house warming when he opens his new quarters. Peter Pennington, in love with Hewitt's sister, Monica Viney, is detailed by the government to apprehend Chai Hung, Chinese bandit. Jocelyn Gwynne tells Pennington that Bromley has no daughter.

NOW GO ON WITH THE STORY

Chard Bromley was in his element. His tall figure moved everywhere. He was undeniably handsome and the dark hair going gray at the sides lent an air of distinction. His ordinarily pale cheeks were slightly flushed and, as the meal wore on, his flood of conversation increased in volume until every eye of the room was fixed upon him. It seemed to Monica, who lost nothing, that he had caught something of the sparkle of the vintage he had unearthed; but his glass remained as she had first seen it—and when he joined in a toast his lips touched the surface of the fluid and that was all.

It is possible that Mrs. Viney was prejudiced. She had started with a vaguely conceived dislike for Enid and it was not altogether unnatural for her to extend this animosity toward her father. But, quite apart from this, there was something about Chard Bromley that repelled her. He seemed to be acting a part, to be assuming a cultured accent rather than talking naturally, and—eyeing him furtively—she noticed that he glanced at frequent intervals at his watch.

Enid—pale, glittering and amazingly turned out, greeted Hewitt with affected warmth.

The meal was finished. During the simultaneous pushing back of chairs Monica found Dawson at her side.

"It's all wrong, Mrs. Viney," he was saying. "He can't possibly expect us to dance after this. Two-thirds of the men are bottled already, or well on the way toward it. The rest of 'em have laid such a solid foundation that they won't care about indulging in serious exercise. Hullo! Here's young Gwynne. What an unholly hour to roll up!"

"He's brought a friend, too," added Monica, turning slightly to scrutinize a dapper man in immaculate whites who had not troubled to remove his topie.

Suddenly a woman screamed. It was at that moment Mrs. Viney saw that Gwynne held Chard Bromley covered with a businesslike looking automatic.

"Don't move, Mr. Soames!" he said coldly. "Captain Hewitt, do you mind seeing that Miss Mayne doesn't clear?"

The Commissioner started to his feet, his forehead wrinkled.

"I mean the woman who calls herself Enid Bromley. Soames, now we're all here, perhaps you'll be good enough to tell us why Chai-Hung paid your passage to Borneo!—why you kidnapped the real Chard Bromley and dumped him in a cellar in the Chinese quarter at Singapore!—and what you and your confederate hope to gain by all this!" He concluded with an eloquent sweep of his free hand.

Women looked from one to the other with startled eyes, men sprang from their seats and groped for their hip-locks.

"What's all this mean, Gwynne?" demanded Hewitt.

The younger man beckoned to his companion.

"This is the real Chard Bromley."

"But—" gasped Dawson. The sentence was never concluded, for, with surprising suddenness, every light went out. At the same time a distant, muffled explosion rent the outer air.

There followed a scene of indescribable confusion, of pandemonium above which Gwynne's voice could be heard shouting for somebody to stop Soames.

Hewitt gathered his scattered wits.

"Keep quite still, everybody," he ordered. "Dawson, find that switch."

After an appreciable interval the light came on, revealing a chaotic mingling of overturned tables and scattered or broken crockery. There was no sign of Enid or Soames or the native waiters in the white coats. The man who had been nearest the actor had vanished, too. He returned almost immediately, wild-eyed and breathless.

"It's the Yellow Seven," he panted excitedly. "They've fired the forest. That swine must have known all about it he's been felling trees for weeks. The whole estate's surrounded by a circle of flame. It'll be upon us before we know where we are!"

The real Chard Bromley came forward.

"The assistants had better get their men out at once," he said, "and begin clearing a line round the outer boundary of the estate. As far as I've been able to gather, the outer sections have been more recently planted. There's still a sporting chance if they all pull together, of saving the bulk of the rubber. Which is Mr. Richards?"

A man standing close behind Hewitt held up his arm.

"Is there a boat to get the ladies away in?"

"There was a motor-boat, sir, but I'm afraid this Soames fellow will have taken it."

"Get down after him as quickly as you can. Turn out the coolies—yo!"

A dark form shot from the water, docketed to avoid Soames' fire, then fell upon him.

others—and get busy." He rapped out the words like a man accustomed to command.

"Dawson," said the Commissioner hoarsely, "collect the ladies and get them down to the shore. The rest of us had better hurry to the scene of action right away."

Dawson, amiable, undisturbed, conducted his ladies through the avenue of waving rubber, chatting all the while with the volubility of a Cook's guide. The light from the encircling conflagration aided their progress and they emerged on to a narrow strip of sand to see two figures kneedeep in the shallows, in the act of launching a boat.

As Dawson dashed forward, a dark form shot from the water, docketed smartly to avoid Soames' fire, then fell upon him with the swiftness and judgment of a panther. The two men closed in frenzied combat and the actor's pistol spoke again. The bullet must have singed his assailant's side—so close did the flash seem—and the girl who had called herself Enid Bromley uttered a little gasping cry. She fell against the boat, one hand pressed to her side, then rolled awkwardly downward, splashing beneath the undulating surface of the incoming sea.

There were two things uppermost in Dawson's mind—to aid the man who had tackled Soames and to save the vessel from capsizing. He was relieved from the former duty, however, by sound of an exultant "Got you—my friend," as he came up with them.

"Pennington!"

"You can bet your life!" snapped the other, snapping something over Soames' wrists. "I started out with young Gwynne, but fancied this'd be the locality where some of the amusement'd take place."

"He paid me to do this," he said dully.

Pennington nodded. "I don't think I care what happens to me—now. Every hand was against me over there. I didn't let myself realize what all this preparation actually meant. It's been normal I'd never have shot Richards—or her."

A man came racing from the darkness. He tripped over a root, recovered himself and recognized Soames.

"You swine!" he screamed. "You darned swine. The coolies have struck. They're leaning on their axes down there now. Chai-Hung's told them to, and they're doing nothing till he tells them otherwise. This is your doing!"

It came to Pennington in a flash.

"Shut up, Bourne," he said quietly. "I think I've found a way out."

The other choked down his wrath. "Soames," broke in Pennington, "have you got your make-up box handy?"

Soames started.

"It's in my kit somewhere."

"Then come on, for the love of heaven. Bourne, nip down and tell Hewitt I'm here."

Into the light of the conflagration where white men stripped to the waist tolled like fiends—and swart Chinamen stood sullenly resting on their implements, there walked with placid dignity an immense Oriental with white tunic and baggy black trousers. A gold watchchain stretched across his chest—and his left arm rested in a scarf that was knotted behind his neck. At sight of him the coolies fell prone and the Britishers remained momentarily motionless, staring before them in incredulous amazement.

"My God!" said Hewitt. "Chai-Hung!"

One single phrase, guttural and penetrating, escaped the pursed up lips of the arch-bandit.

"Obey your white masters."

He paused only to watch the electrical effect of his utterance, then strode back through the trees. Hewitt, gazing after him in bewilderment, saw Gwynne slip after him, revolver in hand.

"I don't know what his game is," he shouted back over his shoulder, "but he's not getting away with it like that!"

The Commissioner dropped his axe and ran for all he was worth.

He was ten yards from Gwynne when he fired with deadly accuracy. When Chai-Hung pitched forward on his face, Hewitt was aware of an enormous weight lifted from his mind. He was glad somehow that he hadn't done it; but Chai-Hung dead! It would mean the beginning of a new era.

Gwynne was on his knee. He turned suddenly.

"It's not Chai-Hung. It's—! Hewitt, are we all going mad?"

The Commissioner, a choking sensation in his throat, realized that Soames had played his last part.

Styles by ANETTE
Paris—New York

SMART—SLENDER

A new geometric print in wool jersey that introduces plain jersey for vestee, with rayon velvet in deepest tone of print for collar, belt and applied bands that extend below waistline in loose hanging ends. The belt is fastened with novelty buckle. Style No. 285 is also interesting made of printed transparent velvet with plain velvet, two surfaces of lustrous crepe satin, two tones of crepe, sheer tweed or canton-lille crepe. It is youthful type; decidedly slenderizing and flattering to the woman with mature figure. The panel effect of skirt with plaits at either side, adds considerable length to figure. It's easily made, as shown in small diagrams. Pattern is furnished in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Price 20c in stamps or coin (coin is preferred). Wrap coin carefully.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

Aren't the girls delightful in the water? Yes, and what a relief to have their legs out of Grippie.

Minard's Liniment for Grippie.

Wouldn't Do Here

Women Teachers Must Wear Uniforms in Bulgaria—Silk and Short Skirts Barred

Sofia.—The women teachers of Bulgaria are to be put into uniforms. A circular from the Ministry of Public Instruction has gone out instructing the school mistresses how they must dress. They must all wear cotton or woollen dresses with high collars, long sleeves, and skirts that reach below the knees.

The dresses may be gray, blue, black, white or buff, but all the teachers in each school must wear the same color, which is to be determined by the teachers' council. All the other women officials in the department of education must also wear prescribed clothes.

This order is much in keeping with Bulgarian customs and traditions. Sofia is the quietest capital in the Balkans. Bulgarian towns and villages are rather puritanical. And now many of the leaders of the nation are devoting special attention to moral discipline as a source of strength in the struggle for national recovery from the disastrous effects of the war.

No pupils in the primary and high schools are permitted to go to movies or public entertainments at night without special permission, not even if accompanied by their parents, and the Minister of Education himself keeps this rule as strictly as anyone else.

Death

"I have been half in love with easeful Death."—Keats

I have seen houses lone and desolate: Regret seemed still to linger at the door;

Windows were eyeless; all ash-strewn, the grate;

While trackless ghosts met on the dusty floor.

But I have seen faces that Death left smooth

From wrinkles dug by Care. . . . Where did he find

The twenty years Time lost somewhere since youth,

So that forgotten features came to mind?

And I have thought—if thus the body fare,

Death to the soul of man a good must be;

All stains removed,—what beauty must it wear;

What shadowless peace enjoy, when it is free!

And at a door where Doubt stood with a chill,

I found Death left a smile upon the still.

—Alexander Louis Fraser.

Minard's Liniment for Asthma.

90,000 People Watch

Plowing in Ontario

London, Ont.—The attendance of 90,000 people at the international plowing matches, held annually in the province, and conducted with wonderful success this year near London, represents a great revival of interest in the art of plowing. The usual attendance at the event is 50,000 for the four days, visitors coming from all over the province and from many of the adjacent parts of the United States. J. Lockie Wilson, managing director of the Ontario Plowman's Association, states the recent match here was the largest and most successful ever held in the world. He attributes the interest to the fact that the plow is coming more and more to be recognized as the most important as well as the basic implement of agriculture.

J. C. Elliott, Federal Minister of Public Works, speaking at a dinner which concluded the plowing match program, said the first plowing match in Ontario was held at Toronto in 1847. He cited the rapid growth now being made by the agricultural industry in Canada, stating that production values in all of Canada had increased tenfold since 1900. On the prairies the annual production totals had increased 23 times over since the beginning of the century.

The Mate (savagely, to sailor who has fallen suddenly from the rigging on top him): "Here, where the hell did you come from?" The Sailor (proudly): "From th' north uv Ireland, sir."

Liner Submerged by Huge Comber

Entire Freight Compartment of Liner Berengario Flooded

New York.—The Cunard liner Berengario, docking after her last trip, underwent the unusual nautical phenomena of being almost entirely submerged by a terrific wave, which shook the mighty vessel as if she were a fragile canoe.

Almost on the entire crossing had the Berengario run into rough weather. One day her day's trip was cut to 397 miles by a surging sea and in an unexpected storm on the same day a great comber rushed over the bow, smashed nine windows on the forward hatch, flooding an entire freight compartment.

Later another strong sea broke and a wave, the like of which Captain Sir Arthur H. Rostrand said he had never before seen, swept over the ship, toppling the tall smokestacks and dashing with a roar on the aft deck. Passengers came pouring from staterooms in a frenzy, but were assured that there was no danger by ship's officers.

Sir Arthur could not estimate the extent of the giant wave nor could he estimate the damage done to the ship.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public of last imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

ISSUE No. 45—'28

Canada Grows in Esteem of Europe

Major C. W. Stephens Home After Four Months Abroad

RETURN TO MONTREAL

Former Head of Saar Commission Reports Financial Stability

Major George Washington Stephens, who resigned his position of President of the Government of the Saar a year ago, returned to Montreal recently after a four-months' trip to Europe. He has come back impressed with the rapid return to more normal economic conditions and financial stability that Europe is making, and the desire on the part of the various nations for a peaceful settlement of the problems that still remain in abeyance.

"Canada is still the greatest country in the world to me—it is a land of freedom and progress, and I am happy to be back again," Mr. Stephens said. "In Europe the position of Canada is becoming more and more important and this can be readily understood when you look at the figures and see how her trade is developing. The country, too, is capturing the imagination of people who wish to leave old traditions behind and to start a new life in a land that gives them opportunities under conditions of freedom that they have perhaps never experienced before. And, this is all going to react to the benefit of Canada."

Signing of Pact

"Perhaps the greatest single event of the year in Europe was the signing of the pact to outlaw war, but other steps are being taken to strengthen and make powerful the desire for peace. A new organization is the International Academy of Diplomacy, which has been established as a world forum for the study and discussion of international problems. Sixty-six countries have joined this new association and its membership includes two former presidents of France; 12 former prime ministers; 30 foreign ministers; 14 ministers of state; 23 ambassadors; 23 plenipotentiary ministers; five members of the International Court of Justice, and ten former presidents of the League of Nations."

"This list includes a few of the countries who have joined together in an effort to promote the peace of the world and from it you will see that nations both large and small have shown their interest by joining a group of men in forming a world forum where international problems can be discussed in perfect freedom in an atmosphere of goodwill."

"It is significant that this movement is world-wide and the desire to bring all nations together through the medium of prominent citizens from each country has been responded to almost with unanimity. In this way experts in international questions will contribute their experience and devote their work to the study of solutions of the world's greatest problems. The composition of the academy, which will meet four times a year in Paris, inspires the hope that its work will provide a useful contribution toward solving the great problem of international co-operation."

"It has long been agreed that the distinguishing feature between diplomacy and politics is the art of negotiation, but this art alone seems no longer able to solve the many problems that arise between nations. Great principles and their elaboration require a collective and exhaustive study. The fact that war has been outlawed will probably not rid the world immediately of its scourge, but it is an encouraging note in the dawn of a new civilization with world-peace as the cornerstone, that this forum has been established wherein by reflection and analysis tentative solutions may be discovered for the removal of international difficulties. It is a matter of some pride that Canada has associated herself with this effort to promote peace."

"As regards the Saar, the position today is that things are running smoothly and well and I am quite happy about the state of affairs there."

"In the Rhine area there are still 80,000 French, 12,000 British and 6,000 Belgian troops and they will remain, I suppose, until the major problems that still confront Europe are adjusted."

Internal Conditions

"Internal conditions in Germany are perhaps not all that might be desired as the country is disturbed through the raising of railway rates and the agitation that has sprung up for an all-round increase in the rate of wages. On the other hand, externally Germany is on a distinctly better footing as regards her relations with other countries, especially from the economic standpoint. She is now rated as the third largest ship-owner in power in the world, so this shows the progress she has made."

"Zeppelins are wonderful, and I saw the Graf Zeppelin at Lake Constance before her transatlantic flight. Any spectator at her trials cannot fail to have been impressed with the idea that the soul of a new means of transportation is being created. The 'Graf' is Germany's 137th Zeppelin, so, in judging the progress the country has made in the development of air transport, this fact must not be forgotten, especially when Germany is being

compared with Britain. She has great experience behind her and she has specialized to such an extent that an actual voyage across the Atlantic and back with passengers has been accomplished. But, I cannot see any possibility of even a chance that airships will compete commercially with steamships for many years to come."

Use Right Fuel and Anti-Freeze

Then Owner-Driver Will Have Little Trouble During Winter

NEED NOT BE LATE

Excuse "Couldn't Start My Engine" Will No Longer Go

There's no doubt about it, all the hopeless, futile struggling to start the car on a winter morning is tragic. And the tragedy, from the point of view of the automotive engineer is that so much of the struggle is unnecessary. It is, he says, the product of the car owner's failure to prepare his car for cold weather.

Just how many of those unforgettable instances of "couldn't start the car" that are whispered into the boss's ear when one reports late to work could be wiped off the records by a changed attitude on the motorist's part no one can say. But, everyone can say with certainty that many could thus be deleted.

The essential reform with respect to putting the car into condition for winter has but one beginning point; namely, the realization that cold weather makes a great deal of difference to the motor car. This would seem too emphatically obvious to deserve mention—yet service and repair establishments do a good business thawing out and repairing radiators and cylinder blocks because motorists realize too late the need for an anti-freeze. Every year it's the same story.

Following an orderly procedure, the motorist will find that the task of preparing the car for winter or having someone else prepare it is neither an expensive nor a difficult one.

Anti-Freeze

It begins with having an anti-freeze solution put into the cooling system—and that, too, before the mercury drops so low that the contents will freeze. There are numerous anti-freeze solutions. The favored ones are denatured alcohol and glycerine, although chemically both are alcohols. The glycerine products are sold under a wide variety of trade names.

In their unread counsel in the instruction book they give to the car buyer, most manufacturers suggest either one of these solutions as an anti-freeze. In some cases, the higher viscosity of the glycerine solution puts a burden on the water pump of the car and that militates against its use. The cases are rare, however, and, so far as is known, do not apply to any of the later cars.

Glycerine and alcohol each has its virtues and defects. The former, costing more initially, is not subject to evaporation losses. The latter is—but then, to its advantage, it costs less. Many are willing to pay the higher original price for glycerine to avoid the necessity of having to go to a filling station to have the adequacy of the protective solution tested at regular intervals. Many others are not. It is a matter of choice, but an understanding of both solutions should facilitate the individual's selection.

And the Right Fuel

Then, there is the fuel system. If it is not functioning perfectly from gas tank filler-pipe to manifold parts, the motorist might as well get set now for a hard winter. The fuel system is a chain of lines, valves, floats and the like. They are fine, precise, hard-working units, but a little dirt here and there, or a maladjustment somewhere along the line will quickly and dangerously diminish their effectiveness.

The motorist probably need look back no further than last winter to realize the truth of this statement. In looking, however, he is advised also to learn. The lesson, of course is to have the fuel system cleaned and adjusted so that it may function freely and in the proportion needed when the mercury is nestling against zero or thereabouts.

THE BIGGEST TANK

1st Farm Boy: "We got a bigger tank over to our place than you have."
2nd F. B.: "I know you have. My dad says your dad's the biggest tank in the county."

"I've just given my wife a sabbie coat." "To keep her warm?" "No, to keep her quiet."

No Need To Tell a Fish Story Here

WOUNDED LITTLE BLOW WHALE BROUGHT TO LAND AT SHOREHAM-BY-SEA

The big fish was a rare visitor and created much interest as it lay on the beach. It appeared to have been shot.

Ready Early

British Scientists Preparing to Watch Sun's Eclipse in 1929

Greenwich, Eng.—British scientists rapidly are preparing an expedition to observe the eclipse of the sun in 1929. While they had only a few miles to travel to Giggleswick, Yorkshire, last year to witness the total eclipse, this year they must go to Malaya.

The track of the 1929 eclipse cuts across the northernmost part of Sumatra, the Malay Peninsula, the southernmost part of French Indo-China and the Philippine Islands, and ends in the Pacific Ocean.

Col. Waley Cohen, a member of the expedition, has inspected the sites for two camps. They are situated at Alorstar, the capital of Kedah, and Patani, in southern Siam.

Already the grounds of the observatory here are crowded with equipment and wooden huts and shelters to protect the scientists from wind, rain and sun. In one corner, swathed in

tarpauline, is the telescope which Dr. J. Jackson, one of the leaders of the expedition, has ordered specially for his own use. It is 21 feet in focal length with an aperture of 7 inches.

The advance party of the expedition will sail for Malaya on February 16.

Dutch South Africa

Economist (London): It is possible that many Afrikaners will prove to be dissatisfied even with the present status of the Union in the Commonwealth, just because the status is not at bottom he real trouble. What the Afrikaner is really troubled about is not so much the status of his country as a whole in the Commonwealth system, but his own status as a citizen in his own Union. It is the fear of being swamped, with all his distinctive cultural cargo, that is the real operative force with the Afrikaner. As always, a culture and a way of life that inspires strong attachment and yet feel themselves insecure, force themselves upon politics as one of those issues which are so exasperatingly difficult just because there is in them so little of cool reason and so much of passionate sentiment. The remedy in South Africa lies in a better adjustment of mutual relationships within the country rather than in agitation for further adjustment without.

The truth is always the strongest argument.—Sophocles.

Ancient Mummies Found in Far North

With finds which they believe rank with those of King Tut's tomb in antiquity if not in splendor, nine members of the Stoll-McCracken Expedition of the American Museum of Natural History reached Montreal over the lines of the Canadian National Railways from Prince Rupert, B.C., where they left the Schooner Edna M. Morrissette which had carried them through the Arctic waters. The party consisting of Charles Stoll of New York, backer and Director of the Expedition and his wife, a noted big game huntress; Harold McCracken, Associate Editor of Field and Stream and leader of the expedition; Dr. H. E. Anthony, Curator of Mammals of the American Museum and other Museum experts, left the port of Prince Rupert on May 1st for northern waters, and were at one time 225 miles north of Point Barrow. Their search was for ancient mummies believed to be of Stone Age men, whose presence on the barren islands of the Aleutians group had been reported.

On a barren island, far from the present haunts of men, a burial was discovered in which were four bodies in a rude sarcophagus, constructed of driftwood, cleverly mortised together and held by nails made of walrus bone. The mummies were those of a chieftain; his hunter who was sent on the long journey with him to provide game for his food; a seamstress who had her

sewing equipment for repairing the chief's garments, and a child believed to show the chief's love of children. Beside the body of the hunter, were the stone hatchets and barpoons of his craft. The mummies were splendidly preserved and showed every indication that the people of the Asiatic races, from which these "Stone Age" men were believed to have come used methods of preservation similar to those of the Ancient Egyptians in preserving the bodies of their Pharaohs. The four mummies, including the trunkless head of the hunter which is shown here in the hands of Harold McCracken, leader of the Expedition, travelled to Montreal with the party on the Continental Limited of the Canadian National Railways and will be placed in the American Museum together with the important groups of mammals and birds of the Arctic waters which the party secured during their expedition.

Photographs show the members of the party on their arrival at Bonaventure Station, Montreal; the mummified head of the hunter brought back by Mr. McCracken, and "Tough" a member of the party and the only English bulldog which is known to have ever sailed Arctic waters, enjoying a lookout from the cab of the Canadian National Railways locomotive which hauled their train into Montreal.—Canadian National Railways photograph.

White Woman Invades Home of Cannibals

Bush Telegraph Warns Natives of Danger Which Friendly Words Dissipate

An Englishwoman has travelled alone in a car across the widest part of Africa; now we hear of an Australian woman facing the cannibals of New Guinea.

She is Mrs. Doris Booth, wife of a planter. For three years she has been the only white woman in a wild and remote region known as the Biolo River goldfields of New Guinea.

It is many years since Mr. Charles Booth first set out on the dangerous task of staking a claim in the Biolo district. In 1924 Mrs. Booth left Brisbane to join her husband. It was a desperately hard journey. The goldfields are only about 70 miles from the coast, but those 70 miles are such as might daunt any but the bravest spirit.

LIKE JOAN OF ARC

The track Mrs. Booth took lay over a range of mountains covered with jungle, infested with most dangerous reptiles, where a traveler making ten miles in a day is exhausted at sundown. Many a prospector has left his bones on that perilous track.

Mrs. Booth set out with only a couple of boys, knowing that she was venturing on a road called private by the members of the cannibal tribes who inhabit that country. The immense jungle swallowed up her slight form. Like Joan of Arc, she did not look back.

In one or two villages this indomitable, gentle-voiced woman managed to recruit a helper or two, but the news had travelled through the alien country that a white woman was about to plunge in to the most secret of the native tracks, and the natives went their own way to stop the journey.

A STRANGE NOTE

By that time husband and wife had met and were finishing the trail together. They knew it was impossible to proceed without a guide. No native who spoke broken English was to be found. Search where they might in a village they couldn't discover one. They knew then that the chief of the village had ordered such men as might serve as guides to keep in hiding.

It seemed that the natives had won, that there was nothing for the white man and woman to do but to turn back. Then one of Mrs. Booth's servants caught sight of a villager whose face he remembered. Mr. Booth found means to persuade the native to go with them.

Before they had got out of the village they knew there was trouble brewing. They heard the strange note of a shell being blown and answered, note after note echoing about them, and they knew the bush telegraph was at work. Their new guide told them what the message was; that natives along the track were being warned that two white people had kidnapped a native and were about to imprison him.

The party went on just the same. Suddenly the native boys uttered a warning and out of the undergrowth sprang a wild company of about two hundred natives, armed with bows and arrows. To meet a yelling horde of men who did not forget that their fathers had been cannibals was the last thing Mrs. Booth desired, and for one moment her brave spirit quailed. She got her revolver ready.

FRIENDSHIP BEATS REVOLVER

The leader of the party rushed angrily toward them, his men eagerly awaiting the signal to shoot. Mr. Booth went quietly to meet him and began to explain why he was coming this way. In the end he managed to persuade the chief that they were only making a peaceable journey over the mountains into the goldfield territory. The chief stood aside, and the little party went on. A friendly word had beaten a revolver.

They reached the Biolo camp safely, and Mrs. Booth settled down to live there. The only white woman in the district was naturally much looked up to. There came a time when men thought she was an angel. That was when dysentery swept the valley and people died like flies. Mrs. Booth set up a makeshift hospital, and took the sufferers in and nursed them. Had it not been for her care a large part of the population would have died out.

Now Mr. and Mrs. Booth have been enjoying a well-earned holiday, and have been in London. They will have much to tell their friends at Biolo.

CAME TO NOTHING

"At last she has come to marry Reggie Sapp."
"I always said she'd come to nothing."

Take Advantage of this Special CHRISTMAS Offer

To enable our customers to give their homes the benefit of added electrical service this Christmas, we are offering especially attractive terms on all appliances valued at \$50. or more. They will be sold on terms of from 10 to 18 months, depending on value of appliance, AT THE STRICT CASH PRICE and WITHOUT ADDED INTEREST. Only \$5. down payment required. Delivery on Christmas Eve or sooner if desired.

This exceptional offer applies to the following appliances all with a value of \$50. or more.

Electric Washing Machines
Electric Vacuum Cleaners
Electric Ranges
Electric Ironers
Electric Pumping Outfits

Offer good only between Dec. 1st and 18th, at any of our Branch Stores.

APPLICATION TO THE LEGISLATURE

Canada, Province of Quebec, District of Terrebonne.

Public Notice is hereby given that the Town of Terrebonne, a body politic and incorporated, 7 Edward VII, Ch. 75, and its amendments, will make application to the Legislature of the Province of Quebec, at its next session, for the passing of an Act ratifying the By-Law No. 333 adopted by the Council on the 19th of June 1922, authorising a loan of \$102,000.00 and also to correct and validate any informalities, or illegalities which may be found in the said By-Law and also in the "procès-verbaux" of the Council dated: 5th, 17th, 26th, of December 1923, 9th and 18th, of January 1924, and other purposes.

E. S. MATHIEU, Mayor.

Osaia Vesina, Secretary-Treasurer.

Terrebonne, November 28th, 1928.

D-21-4.

She "CLOCKS"

the Telephone

THIS YOUNG LADY'S JOB is to "clock" the telephone service. She sits there with her decimeter stop watch and measures to tenths of a second the time taken to complete a call. Other "clockers" record the errors made, the speed with which "trouble" is repaired, all the items of telephone efficiency.

If speed and efficiency are not constantly on the climb these are the people who know it first and then there is a grand hunt to find out what's gone wrong.

It is a good game. It gets results. That is why your telephone serves you better this year than it did last year, and next year will serve you better than now. That is why it has contributed its share to Canadian progress.

FOR EXAMPLE, seven years ago the average interval from the time you lifted your telephone receiver until the operator answered was 5.1 seconds. Today the clocker finds the interval cut to 3.7 seconds. Tomorrow it will be still less.

Seven years ago there were 95 slow calls in every 1,000—a slow call being one in which the operator takes ten seconds or more to answer. Today there are only 33 in every thousand.

The number of errors of all kinds has been reduced from 40 in every 1,000 calls to 16, which is over ninety-eight per cent perfect.

FIVE YEARS AGO you ran 27 chances in every 1,000 calls of getting the wrong number. That is down now to 13 chances in 1,000, or nearly 99 times out of the 100 right.

There are only two chances in a thousand now that you will be cut off. There were five chances in a thousand, five years ago.

There used to be eight times in a thousand calls when you would break in on somebody else's conversation. Now there are only two such double connections per thousand.

THERE ARE "CLOCKERS" at work in other directions too and here are some of the things they have recorded.

The time taken to repair "trouble" on a line now has been cut to one-third of the time taken five years ago.

The time taken to install a new telephone used to be three hours and forty-five minutes. It has been cut now to one hour and forty-five minutes. That means something in hours saved, with 139,000 telephones installed in Ontario and Quebec this year.

PRETTY GOOD results. But the clocker isn't satisfied. Nobody in the telephone business is ever satisfied with today's mark. The system tomorrow must always be better to keep pace with the Canada of tomorrow.

Published by The Bell Telephone Company of Canada to tell you something about the telephone business and the people in it.
