Local news of the Week

Master Lloyd Creswell left on Wednesday to resume his studies at Pointe-aux Trembles.

Miss Gertrude Gilmour, and Mrs. Arthur Gaulty spent Saturday visiting friends in Harrington.

Mrs. Howard Hooker, who has been spending the summer in England, arrived home on Sunday last by S. S. Doric.

Miss Doris Boyd of Montreal, spent the week-end the guest of the Misses Elizabeth and Louise Goldsworthy.

Miss Catherine Tossie, of Lachute, spent the week-end the guest of the Misses Edna and Annie O'Brien, of Carillon.

Messrs. Gavin and Mac Walker, of Montreal, spent the week-end with their parents, Mr. and Mrs. J. E. Walker.

Mr. and Mrs. Chas. Joss, of Three Rivers, who were the guests of her mother for a few days last week, returned home on Monday.

Miss Evelyn Hamilton, R. N., and Miss Shirley Hamilton of Montreal, were guests of their parents, Mr. and Mrs. Robert Hamilton over the week-end.

Mr. and Mrs. Geo. Graham, Mrs. David McQuat, of Brownsburg, and Mrs. A. Burnett, of Montreal, left on Saturday by motor for Toronto and other points.

Mr. Arthur Gaulty and Mr. J. Curtain, of Lucerne, Quebec, motored to Ottawa, on Saturday and spent the week-end at the latter's home, returning Sunday evening.

A very successful Tea and Sale of Home Cooking was held in the Presbyterian Church Hall, under the auspices of the Women's Missionary Society on Saturday last. The proceeds amounting to upwards of \$60.

Mrs. C. L. Hamelin and daughter Miss Myrtle, of Windsor, Ont., who have been spending the past two weeks, the guests of Mr. and Mrs. F. E. Dority returned home on Sunday last.

Lachute Valet Service has now opened at 98 Grace St., Lachute. Anyone desirous of having pressing or cleaning done will do well to leave their orders. Prices lower than in Montreal.

—Have you seen and heard the new Philco Baby Grand Radio that everybody is talking about? A 7 tube screen grid set with dynamic speaker for \$95.00. Phone C. McPaul, No. 92 for demonstration.

Sunday guests at Mrs. W. H. Scott were, Mr. and Mrs. Charles Horton, London, Ont.; Mr. Jas. Hodgson and Mr. and Mrs. H. Hodgson and family of Hudson; Mrs. Lena Kerr, Lakefield; Misses Hazel Copeland and E. Scott of Montreal, and Miss Stella Scott, of Morin Heights.

Mr. and Mrs. Archie McKinnon have recently received the sad news of the death of their niece, Mrs. Geo. Ballard, of Los Angeles, Calif. The deceased lady was formerly Miss Annie Simers, of Greece's Point, and her sudden death after an illness of only three days of pneumonia came as a great shock to her many friends and relatives. She leaves to mourn her loss a loving husband, her father, Mr. W. B. Simers, of Montreal, one sister, Mrs. Calvin Hildebrandt, of Seattle, Wash., and a twin brother, Mr. W. A. Simers, C. P. R. Engineer, of Cartier, Ont.

HANDICRAFT EXHIBITION

The Women's Institutes of the County of Argenteuil held a wonderful exhibition of Handicraft work in the Lachute Auditorium on Wednesday, Oct. 1st, at which Lady Perley, Mrs. C. B. Waagen, of Ottawa, Geo. A. Dansereau, M.P.P., for Argenteuil were present, and gave brief addresses, congratulatory upon the clever execution of much of the work displayed. A number of exhibits were also shown by the Handicraft Guild of Montreal. Representations from all sections of the County, in which there were no less than seven active bodies of women working for maintenance of home and community welfare, brought out marked ability in the beautiful and delicate needle and fancy work as seen in the rugs, quilts, bed covers, cushions, centre pieces, traycloths, etc. and a special feature was the operation of the old spinning wheel which brought to many reminiscences of by-gone days when stores were not so plentiful. The object of the exhibition was to provide funds for the projected county hospital, and if the same enthusiasm is maintained as characterized their first effort it will not be long ere the proposed hospital will be filling its purpose in this town. Mrs. K. S. Massiah, who is the County President and Mrs. Kahring as secretary expressed themselves as deeply grateful for the hearty response to their appeals and the splendid co-operation of all the Institutes. Lady Perley gave a special donation of \$20.00 and the Watchman has been asked to pass along the thanks of the members to Messrs. W. M. Cottingham, S. Campbell, S. McPaul, Mayor and Council of Lachute and to R. McArthur and Anglican Church for timely assistance.

TOWN COUNCIL

The vexed question of Town lighting is up again and came in for considerable discussion at the meeting of the Town Council held last evening, when Mr. Foster, representing the Gatineau Electric Light Company, and Mr. Gosselin, local manager of their system in town appeared before the Council with a new schedule of rates submitted to the Public Service Commission as equitable and fair for the territory East and North of St. Jerome. By a comparative statement worked out from the books of the company, a substantial saving of money to the great majority of the customers will result, while a few will be called upon to pay a slight increase. At the present time there are 880 customers and with exception of 192 who will possibly pay an extra 25c. per month the balance stand to save thousands of dollars.

Alderman Dobbie gave notice of motion that at next meeting of Council he would prepare by-law for adoption of this new schedule of rates. Alderman Raymond moved that the matter should be submitted to referendum of the people but his motion was lost on the following vote. In favor of referendum, Raymond, Rodrigue, Lavigne. Against, Lacasse, Dobbie, MacKimmie, Miller, Speight.

WEDDING BELLS.

MESERVEY — INNES.
St. Mungo's Church was the scene of a very pretty wedding, on Saturday, Sept. 27th, when Miss Viola Grace Innes, of Cushing, was united in marriage to Clement Lytle Meservy, of Montreal. Rev. J. W. McLean officiated.

The bride who looked very charming, was dressed in a beautiful gown of beige lace. She carried a bouquet of pink sweetheart roses and baby's breath and was given away by her father. Her sister Miss F. Innes, who was bridesmaid, was gowned in green crepe and carried a bouquet of cream roses.

Mr. James Calkin, of Montreal, acted as best man. During the signing of the register, Mrs. Tremaine Sheppard, of Ottawa, (sister of the groom) sang "All Joy Be Thine." Miss Gladys Freeman, Ottawa, played the wedding march. The young couple are spending their honeymoon in the Laurentians, but will reside in Montreal.

The number of beautiful gifts they received testify to their popularity amongst their many friends. Guests from a distance were Mrs. Meservy, of Ottawa, mother of the groom, also Mr. and Mrs. T. Sheppard; Miss Lytle, Mr. and Mrs. A. McRae; Mrs. J. McAllister Sr., Mrs. M. Cameron, Mr. and Mrs. A. Weir, Mrs. Bowden and Miss Styles, Miss Freeman, also of Ottawa; Mr. and Mrs. W. Ware, Mr. and Mrs. J. Foster, Mrs. G. Vorsteher, Messrs. Floyd and Allister, Innes, all of Montreal. Mr. and Mrs. Johnston, Mrs. K. Marston, Miss M. Wright, of L'Orignal; Mr. and Mrs. J. McAllister and Miss Anne Neilson, of Hawkesbury; Mr. and Mrs. B. Wyman and Mr. and Mrs. J. Kirby, of Chute au Blondeau; Mr. and Mrs. W. Lamb, Mr. and Mrs. J. P. Bradley, of St. Andrews East; Mr. and Mrs. J. Patton, of St. Philippe; Mr. and Mrs. J. Canning, and Miss Eileen of Stonefield.

The church was beautifully decorated with crans, asters, shasta Daisies and other fall flowers.

THE LATE

MISS E. MACNAUGHTON
—:—
The death occurred on Wednesday last of Miss Ellen MacNaughton, after an illness of some months at the age of 74. Deceased lady was born in Dalesville, daughter of the late Alex. MacNaughton.

In her early girlhood, she made her home with the late Mr. Thos. Dobbie, of Chatham, and came with the late Miss Jean Dobbie to Lachute some 19 years ago and was of a quiet, retiring nature and a faithful member of the Presbyterian Church. She leaves to mourn her loss, two sisters, Mrs. Myers, of Vernon, Ont.; Mrs. Thos. Marshall, of Sarnia, Ont.; and one brother, Duncan, of North Bay.

The funeral took place on Thursday afternoon from the Presbyterian Church, conducted by the Rev. H. Cousens. Loving tributes of sympathy were sent from Mr. and Mrs. G. Y. Deacon, Misses S. and E. McGibbon, Mr. and Mrs. Jas. Warwick, The Ladies' Aid of the Presbyterian Church, and Mr. and Mrs. Jos. Bradley, of Carillon.

The pall-bearers were Messrs. J. A. Rice, Allen Hammond, Jas. Anderson, Albert Cleland, David Black, Jas. McPaul.

BIRTH

CRUISE—At Almonte Hospital, on September 26th, to Mr. and Mrs. Robert Cruise, (née Queenie Campbell), a son.

CARD OF THANKS
Mr. Fred Lloyd wishes to sincerely thank all those who so kindly assisted him in his recent sad bereavement.

Delirium Tremens Treated With Insulin in London

London — The London Society for the Study of Inebriety recently heard from Dr. W. K. Wills, its medical superintendent, of a new use for insulin, the substance developed for diabetes treatments by Dr. F. G. Banting of Toronto, and his collaborators.

Insulin, said Dr. Wills, was highly valuable in the treatment of delirium tremens and was used in the same way as in the case of diabetes.

The medical superintendent found

"D.T.'s" declining owing largely to the high cost of spirits and the consequent power consumption by the public.

Insulin has not been used in treating delirium tremens in Canada, Toronto doctors stated. It was difficult to imagine any scientific basis for such treatment, they said.

As a means of restoring appetite and getting the patient to resume eating, it might be of some use, they declared.

Belgium Now Joins The "Great Powers"

In Less Than 12 Years Belgium Has Made a Complete Comeback

Belgium is celebrating her one hundred years of independence by exhibitions of industry, art and science. What King Albert at the Antwerp Exposition described as "the determined and intelligent labor of the Belgian people" has wrought a recovery from war, which is manifested in the rebuilding of towns, improved highways, better standard of living. The fiscal system had to be recast. There were crises in Belgian finance in 1919, 1920 and 1926. But such were the energy and tenacity of the people that all obstructions were cleared away. A visitor to Belgium to-day is impressed by the scale of "the great national festivities which, in less than twelve years, the Belgians have been able to organize."

Thirty nations are represented at the Antwerp Colonial and Maritime Exposition, mainly industrial and commercial. But it finds space for a reconstruction of old Flemish and Walloon houses, shops and cafes of one hundred years ago, "with their occupants and keepers in the costume of the time." It is to lodge that one must go to see the largest exhibits of arts and crafts, in the Palace of Fine Arts and the Palace of Glass and Ceramics. There also is an electricity pavilion in which the uses of lighting and power on the farms and in rural districts as well as in cities are shown. Many of the buildings architecturally impressive, stand along the Meuse River and close to the military parade ground.

In Brussels and also at Mons, the city that figured so tragically in the invasion of 1914, there are exhibitions of pictures, that at Brussels being the finest collection of Belgian paintings ever assembled. At Mons are chiefly even examples of the Walloon painters. Other cities and towns have their attractions, illustrating one hundred years of Belgian industry and art. The pageants are of notable distinction. The festival goes on into the autumn. Tourists may see whether King Albert was right when he said that Belgium had raised herself "in the economic sphere to a place with the great Powers."

Peer Gets No Bids

For Scottish Acres

Glasgow, Scotland—Some of the bonny banks of Loch Lomond are going a-begging.

The Government does not want them, preferring to have the cash, and the private offers of prospective customers have seemed to the owner, the Duke of Montrose, much too low.

He did not receive a single bid at a recent public auction for 25,000 acres of some of the most famous land in Scotland, including the historic isles in Loch Lomond.

It was his idea first to give the Government acreage of value equivalent to the prospective duties, but the Government refused the offer.

Summer Precautions

Begin the day right by eating a substantial breakfast. At noon it will be too warm to eat heartily and at night you may be too tired to eat.

Eat, drink, work and sleep in moderation if you would keep well during the heated term.

Avoid burdensome clothing, heavy hats and light shoes. These retard the circulation and add considerably to the general discomfort of hot weather.

Protect the baby's eyes from the direct sunlight and guard the child from flies—two very necessary health and comfort precautions.

Do not eat large meals and get your necessary proteins largely in the milk and cheese, especially cottage cheese.

Villagers' Secret

Of Long Life Told

Yorkshire has a village where the old folk proudly boast that if their ages were totaled together they would stretch back to the days when Adam was a lad!

Carlton is the place where people live happy and long. It has only 600 inhabitants, but they include sixty old-age pensioners, whose ages reach well over 3,500 years!

A reporter found out why the villagers live so long. They all believe in "adding their own brass" as long as they can, and plenty of Yorkshire pudding and home-made oven cakes keep them healthy and wise if not too fat.

"To be fat, and to be old," is their motto.

Bushmen Rush Johnson Plane

British Airwoman Describes Strange Adventure of Famous Flight

Brisbane, Queensland—Australians do not cease to marvel at the memorable feat of Miss Amy Johnson, the young English airwoman, in forging her way alone from Croydon, Eng., to Australia. Details of the heroic flight still form the leading topic of conversation.

Among the thrilling adventures encountered by Miss Johnson is one that has received less attention than it deserves. It was at Timor, a large volcanic island of the Malay archipelago, where she decided to make a night landing.

No sooner had she come to earth, as she told the people of Brisbane, than she saw a company of black men come running out from little huts near by, brandishing knives, swords and spears.

As soon as they came up to the plane and observed its only occupant, they stopped undecided. At last she heard them say one word—Pastor. Their attitude suddenly changed. She guessed it was a mission.

"One of them," she said, "took my hand and led me over miles of country to the church. The Pastor was there. You may imagine my relief to see him."

Miss Johnson attributes her success mainly to her reliance on divine protection.

"I began with the prayers of my people," said Miss Johnson, "and each day as I hopped off, I asked a blessing on my trip."

"When I was crossing the Java Sea, I was in the midst of rainstorms and could find no opening. I could not see which way to go. I was flying close to the water and did not know at what moment I might strike it. When I felt it impossible to go in any direction, I uttered a prayer. I was flying round and round, when a break in the clouds occurred, and I saw a double rainbow around me. It was a happy manifestation."

Youth Conquers And Age Serves?

A twenty-six-year-old girl flies alone to Australia; Len Bradman, slightly younger, hits up record cricket scores; Lindbergh flew the Atlantic at the age of twenty-five. This is the age of youth, people tell us. To which the proper answer is: "It always has been." Here is proof:

Nelson was in command at twenty-three; Napoleon won famous battles at twenty-four; Stanley and Livingstone were exploring Africa at twenty-five and twenty-seven respectively.

When he was only twenty-three, James Watt was experimenting on steam as a motive force, and another scientist, Edison, was perfecting communication systems at a year older. In music, Wagner had composed his first symphony at nineteen.

As a counterblast to the latest bloom in youth, a company who run a chain of petrol stations in America employ only men over forty! Most of the men who operate the stations are over sixty. They are more careful, have more pride in their work, and are more reliable than younger men, say their employers.—Answers.

Britain Extends

Widows' Pensions

London.—The demand, "Widow's pension, please," was heard recently in nearly every post office in Britain where grants of 10 shillings (\$2.50) weekly were paid out for the first time to 120,000 women whose husbands passed on prior to Jan. 4, 1926.

Widows now for the first time receiving this pension are all between 60 and 70 years. Their husbands must have either subscribed to the state insurance scheme or belonged to one of the classes of workers eligible to subscribe if they passed on before the system was instituted. Widows between 55 and 60 will begin to draw pensions next January.

Frenchman Undeclared

Starts New Mile-long Tube

Havana.—Prof. Georges Claude, French natural scientist whose mile long steel tube for experimenting with Gulf Stream after for electrical production was destroyed recently, said that a syndicate of 1,000 Americans, French and Cubans will underwrite another tube for \$1,000,000.

Professor Claude resumed his experiments at once, although twice disappointed when he seemed at the door of success.

New French liner S.S. L'Atlantique as it was launched at St. Nazaire, France, recently. It is of 40,000 tons and destined for service between France and South America.

Panama Hats Made Of Pine Leaves

Weaving is Done Entirely Under Water and Often Takes Six Month's Time

Contrary to a popular belief "Panama" hats are not made in Panama, says "The Pathfinder." Genuine Panama hats are made of the young, unexpanded leaves of the stemless screw pine, sometimes called the jipijapa, a plant common in the tropics. After special treatment to remove the soft part of the jipijapa leaf the fibre is soaked to make it pliable. The weaving of genuine Panamas is done entirely under water, sometimes requiring six months to complete a hat.

Elge quality Panamas cost anywhere from \$100 up. But when you wish to buy a Panama today you don't have to pay that much for it. This is because there are so many imitations now. In fact, there are so many imitations, and such good ones, that it is truly hard to distinguish a real Panama from an imitation.

Genuine Panama hats come from the hands of native weavers in South and Central America, chiefly Ecuador, Peru and Colombia. They are called Panamas because when they were first exported some 300 years ago they passed over the isthmus of Panama.

The first Panama hat is said to have been made in 1629 by an Ecuadorian, Francisco Delgado.

Broad Shoulders

Back in Style

Baltimore, Md.—Broad shoulders and narrow hips are to be the fall contribution to American men, the International Association of Clothing Designers, in convention here recently decided. Pads and clever tailoring, the delegates said, would be used to assist nature to produce the figure desired by men.

Announcing the forecast of styles, the designers said, "Breadth of chest and blade and slenderness of the waist and lower part of the coat will be the silhouette desired."

High lights of the forecast include the information the modish trouser this fall will be 20 inches around the cuff and will rise higher at the waist, because vests are to be shorter, with lower openings, medium to rather long points and five buttons. Sack coat sleeves will be slender and rather tapering.

Russia Criticizes American Methods

Moscow.—The Commissar of Agriculture, Y. A. Yakovlev, addressing the Communist Party Congress painted an optimistic picture of the successes and future prospects of collective farming. He declared that collective farms which now occupy 90,000,000 acres will provide half the surplus grain of the country this year. He asserted that the mere co-operation of the former petty holdings yielded an increase of labor productivity of 33 per cent. apart from advantages which come from the increased use of tractors. He stated that 70,000 tractors now functioning in Russia are used, more than the same number would be in America because they are communally, not individually owned.

Mr. Yakovlev gave a gloomy description of the state of agriculture in America, saying: "America is living through a severe crisis not only in industry but also in agriculture. The situation of the American farmer is very difficult. Taxes on farm property have grown two and a half times, the indebtedness of farmers has fabulously increased, two-fifths of all farm have insufficient land and must rent more from big owners. America is famous for the abundance of its machines, but in whose hands are those machines? Four-fifths of American farms are without tractors."

Woman Flier Soars To Record Height

San Diego, Cal.—Ruth Alexander, flying a 90-horse-power Barling monoplane, recently soared to a height of 20,000 feet. The former record, made by Miss Alexander about six months ago, was 15,000 feet.

Two hooks, two lookers, two downhangers, four stander and one switch tail—A cow.

There are baseball fans who won't be satisfied that Babe Ruth is earning that \$50,000 salary until he hits one to the new planet.

Furs are being dyed practically any color, so that fashionable women may now have a special fur to wear with every gown.

Women who fall victims to the cigarette habit are stated to be heavier smokers than men; many of them consume up to 200 cigarettes a week.

Daring Feat Successful

Making first successful jump at Roosevelt Field, Long Island, since the death-fall of Buddy Bushmeyer, Billy Bomar is seen here with his chute partly open.

Salesman Covers Territory By Plane—Flown 90,000 Miles

Hattiesburg, Miss.—Joseph Johnston, a sky-riding commercial traveler, who is home when he drops down from the clouds at Hattiesburg, has travelled more than 90,000 miles by air on business for a Cincinnati house and is completely "sold" on the idea.

Like a majority of travelling salesmen, "Sky-man" Johnston pays his own expenses and with the price of airplanes being reduced he declares it a paying proposition to travel by air. A much larger territory can be covered, he says—and the more territory a salesman covers the more clients he meets and the more "John Hancock's" he gets signed on the dotted line on his order blanks.

Mr. Johnston travels the entire South, excepting Virginia, and finds the airplane peculiarly adapted to his field. He says: "In the South, where one can't rush customers and where they will keep you past train time to entertain you, the airplane pays."

The Hattiesburg "sky-drummer" was attracted to flight during his war service, becoming aviation instructor at the Pensacola naval training station. He marked how government officials, particularly army men, almost never go by rail and two years ago procured a plane of his own, and started to use it regularly over his circuit.

Canada's Airways National Asset?

Due to Geographical Position, Airways Are of Special Importance

Canada's geographical position will make her one of the most important units in Empire and world transportation. This fortunate position is a result of the curvature of the world's surface. Long air routes, as long sea routes are laid out along "Great Circles." "Great Circle" is the navigator's name for the shortest distance between two points on the earth's surface.

An examination of a world globe will show that the shortest route from:

(a) Western Europe to Japan, China and the Far East is across Canada.

(b) United States to Northern and Western Europe is over the Eastern part of Canada.

(c) United States to Asia and the Far East is over the Western part of Canada.

On account of Canada's fortunate geographical position and splendid flying climate, our airways are of very special importance and can be made one of our greatest national assets.

Pennies Regulate Famous Old Clock

Do you know how Big Ben keeps time?

Apparently, this famous clock, like the ones in our own homes, may sometimes vary a little from the correct time, but it is never more than about a second out—a truly remarkable record for a tower clock which is going all the time.

The Astronomer Royal revealed the other day how this fine record is maintained. There is a tray about half-way down the pendulum, and if the clock is losing slightly a half-penny or penny is placed on this tray. The effect is that the pendulum vibrates a little more quickly, and so the clock is brought gradually back to the correct time.

On the other hand, if Big Ben is gaining, a halfpenny or penny is removed from the tray, and in this way the pendulum is slightly slowed down.—Answers.

Prince Loses Hat and Tie?

West Hartlepool, Eng.—The Prince of Wales lost a Panama hat and a necktie playing golf with Lord Londonderry, Lord Castlereagh and Capt. Aird here recently. While the Prince said "It doesn't matter really," he hopes it will be found.

The Prince took off his hat and tie and handed them to his caddy, Andrews, but near the end of the round Andrews could not find them.

Scores of persons joined in an unsuccessful search before the Prince was aware of his loss.

Sir Thomas Lipton Is Lauded by Prince

The luncheon tendered Sir Thomas Lipton by the Master Mariners' Company in Fishmonger Hall, London, before he sailed his new challenger, Shamrock V, to Gosport to be out-fitted for her trip across the Atlantic, was a unique event in British sporting annals. The Prince of Wales is president of the Master Mariners, and his tribute to Sir Thomas will be endorsed by sportsmen the world over. "It is his pluck we most admire," said the Prince, and the great audience cheered him to the echo.

He had previously said that, "in the presence of the American Ambassador," he believed it would be as popular a victory in the United States as in England if, at the age of eighty years, Sir Thomas should bring back to England the cup won by America when he was one year old. Ambassador Davies, not to be outdone in sporting generosity immediately arose, asked permission to make a speech, and, gracefully endorsed what the Prince had said. A chorus of approval has come from the American press.

It is the spirit of persistence, the "never-say-die" spirit, the dogged courage that knows no such word as "defeat," that sport-loving people everywhere admire so much in Sir Thomas. Whether he wins the famous cup or not on his fifth attempt, he will have done something of infinitely greater importance—he will have made one more move towards strengthening the mutual faith of Britain and America in a sport-praised by those best qualified to judge on both sides of the Atlantic, and that has been maintained unstained because it has never been commercialized.

Red for Danger

Murphy had obtained a pass as porter to a little country railway station. "Come with me and I'll show you round," said the stationmaster.

Murphy followed, and after he had been shown where everything was kept the stationmaster told him to fill the lamps in the signals.

Five minutes later the stationmaster again visited the oil-shed to see how his new assistant was getting on, and was surprised to find the new hand emptying little drops of oil out of a can on the floor.

"Good gracious, man," he cried, "what ever are you doing?"

Murphy shook his head sheepishly. "I'm looking for the red oil for the danger signals," he replied.—Answers.

HEROISM

"Heroism," said a great preacher, "is nothing but a spark kindled in the household, carried outside, and blown into flame. A thing that a mother does every day of her life nobody celebrates, but let her do it before an admiring crowd, and she is heroic." The virtue is in the spark. If it be necessary to do a noble deed before the world so that its publicity blows it into flame, all honor to the spark that is living ready for the public deed. But, if it be necessary to do the noble deed in the secret corner of the home, all honor to the spark that is living ready for the private deed in which the world sees no heroism.

TOO SLOW

The kind old gentleman was passing the gates of a prison when a party of men who had obviously just been released appeared through a small door. Approaching one of the men the old gentleman said kindly:

"And why were you in prison, my man?"

"For driving a car too slowly."

"Too slowly," echoed the questioner in amazement; "surely you mean too fast?"

"No, I don't," was the reply. "I mean too slowly. The owner caught up with me."

Some men believe in luck because they never have any.

"Great books are not written by rule, they are written by men of genius."—James Branch Cabell.

"There is one thing better than a gift for figures and that is womanly common sense."—Lady Astor.

"The truth is imperishable and immortal and needs no human agency to support it."—Dudley Field Malone.

Tax refunds may be on the square, but why are the big fellows—the only ones dumb enough to make such a takes in their tax returns?

Charm

"Isn't she charming!" we occasionally hear someone say, and then we question, what is charm?

It is alertness, intelligence, interest in things; but not "freshness" nor smart-Alec-ness.

It is sweetness, kindness, amiability; but not mushiness, not the gooeyness of a Dumb Dora. Vivacity, pep; but not nervous restlessness nor jazziness. Poise; but not coldness. Natural sincerity and wholesomeness which radiates through one's entire personality.

The charming woman does not know she is charming; for that self-consciousness would spoil her charm.

Tips

It is perplexing for the traveller to know how much to tip the various bell boys, porters and waitresses who serve him. It is rather expensive business if you do the tipping job "according to Hoyle." You are met at the train by the Red Cap who wants to carry your baggage. You tip him a dime or a quarter according to the amount of your baggage and the distance he carries it.

Sometimes taxi drivers expect tips, besides the taxi fare, but that is not necessary. At the hotel, a door man helps you from your car and carries your baggage to the hotel desk—another dime or fifteen cents, or a quarter if you are extravagant or try to show off. A bell-boy carries your baggage to your room, which means a similar tip. The process is reversed when you leave the hotel.

At mealtime, you are supposed to tip the waitress about ten per cent. of your bill, or, if you are staying for a week and will have the same waitress, tip her one dollar when you leave.

A tip is expected by the bell boy or chambermaid who does you any personal service, such as bringing you ice water or extra towels. On the train the porter of the sleeper or parlor car expects you to hand him half a dollar as you leave. The tipping system adds greatly to the expense of travel and is often much abused, as when attentions which you do not want are forced upon you in the hope of exacting a tip. Hotels and railways should pay employees enough that it would not be necessary for them to bleed the traveller for every little courtesy. But if you really use this service, and it is not included in the regular travel bill, you are a cheap-skate if you are not willing to pay a small reasonable sum for it.

Summer Squashes

Rejoicing to find a summer squash in the market, the grocer told me he "had it for decoration." Too little we housewives appreciate this tasty vegetable. It has the virtue of being bulky and low in fattening qualities, which makes it valuable for reducing purposes. Vegetables and fruits quickly fill the stomach and satisfy the appetite and make one willing to omit heartier foods.

Summer squash is the fruit of the squash vine, and is rich in phosphorus and calcium, and a delicate juice. The tiny variety used while very young, is cooked whole. Crook-necked squash and other varieties are better flavored if more mature, but the skin should be so tender that it is easily pierced with the thumb nail.

To prepare it, remove the skin, seeds and stringy portion; dice it in half inch cubes; boil it in salted water a half hour, or steam it one hour; mash and season, or, best of all, bake it an hour. Some like to fry squash, removing it from the boiling water when nearly tender, dipping it in flour and browning in hot fat.

Squash may be made into a soufflé, or may be used for pies as a substitute for pumpkin. To make a squash soufflé, cook the squash rather dry. To two cups of mashed squash add the yolk of two eggs, melted butter, salt and pepper. Fold in the beaten whites and bake until firm. Squash fritters are made by dipping spoonful of this mixture in cracker crumbs and browning them in hot fat.

The Guest

It is a nice courtesy to take your hostess some little gift, candy or a book. Conform to her plans for entertaining you. Be prompt for meals and in keeping appointments. When you arrive, announce the date of your departure and hold to that date even if she politely urges you to stay longer. Act as though you are having a good time and be cordial with the friends to whom she introduces you. Make as little work as possible and adapt yourself to the customs of the family. Entertain yourself a part of the time to relieve your hostess of a feeling of strain.

Respect the property of the household and do not so medicine or a wet tumbler on a polished dresser, put your feet on the counterpane nor use towels for cleaning shoes.

If your hostess has no household help, assist her with the housework unless you are sure that she prefers to do it alone. Pay scrupulously all telephone or laundry bills you have incurred. When you have left, write within

twenty-four hours, thanking your hostess for her hospitality.

Fashions, Fads, Foibles

The most freakish foible of the hour is the wearing of long, hot kid gloves with the formal dress without sleeves and almost without back in the waist. One sees them at the fashionable dances, sometimes black kid gloves with a filmy white dress. Usually the glove is slipped off the palm of the hand and rolled back at the wrist, resembling the mitts of our grandmother's days.

With the long, filmy formal gowns, the under slip comes only to the knees, leaving a diaphanous curtain of dress below through which show the stockinged legs.

Contrasts are striking, as a white pique collar on a silk dress, or white organdie trimmings on the gown of black lace, or a black wool coat over a light chiffon, or the gloves above mentioned. Jackets of velvet accompany the well regulated party dress of today, or should I say this evening? As for formal footwear there is nothing better than crepe or satin pumps tinted to match one's costume jewelry and emphasize their color.

July Thoughts

If you were born in July, your birthday flower is the larkspur, a pretty blossom.

Sew and kitch out of doors as much as possible. Shell the peas on the back porch and carry your sewing out under a tree.

In sprinkling the garden, remember that a thorough drenching once in a while is better than more frequent sprinklings.

The proper garb for a baby in hot weather is an abdominal band and a diaper.

If you pelly won't jell, try mixing with it the juice of fruits containing more pectin, such as currant or apple juice, or shreds of orange skin or commercial pectin.

To keep the rooms cool, open them to the night and morning air from the outside, but keep them closed, with curtains drawn, during the middle of the day.

Vacations produce a healthier and more efficient people as well as a people with more imagination and capacity for enjoyment.

Don't go through life without learning to swim. Swimming is the best known all-round exercise, as well as a jolly good sport.

Cut your ironing short by folding away unironed the towels, and about half of the rest of the weekly wash.

Sweet Life

"Whenever Life is Simple and sane, true pleasure accompanies it as fragrance does uncultivated flowers."—Charles Wagner.

The Grass

The grass so little has to do—A sphere of simple green, With only butterflies to brood, And bees to entertain.

And stir all day to pretty tunes The breezes fetch along, And hold the sunshine in its lap And bow to everything;

And thread the dew's all night, like pearls, And make itself so fine—A duchess were too common For such a noticing.

And even when it dies, to pass in odors so divine, As lowly spices gone to sleep, Or amulets of pine.

And then to dwell in sovereign barns, And dream the days away—The grass so little has to do, I wish I were the hay!

—Bp Emily Dickinson.

O Earth

O earth! Give comfort to the creatures of earth

Who move on heavy feet across spring grass;

The little cats who once were swift to pass,

And cows who patient wait the ordained birth,

Mares in the meadows, foxes in the wood,

The great-eyed mice behind the wainscote wall,

Leaf-shadowed deer—have pity on us all

Bound each to each in life's strange sisterhood.

Grant to our weakness strength and fierce content

Who form the string by which life's bow is bent.

—Elizabeth Coatsworth, in the Saturday Review.

Tea growers have agreed to a crop limitation scheme by which Great Britain will receive at least 60,000,000 lb. less tea this year than in 1923.

Mistress: "I would like to give you a good reference, but you are never punctual with the meals." Maid: "Well, say she prepared the meals with as much punctuality as she received her wages."

Will Serve Prince?

Muriel and Doris Howe, Blackpool, Eng., as they arrived in Quebec, recently, en route to take up domestic service at Prince of Wales ranch in Alberta.

Hot Weather Dishes

Vegetable Cutlets

These may be made from left-over vegetables. Cut into small squares one medium-sized beetroot, one fair-sized carrot, and half a small turnip. Mix two heaped tablespoons of flour to a smooth paste with a little stock, then put a little more stock in a saucepan and bring to the boil. Pour this slowly into the flour paste, stirring well, then return to the saucepan and allow to simmer for a few minutes.

Put in the cut vegetables and add one cupful mashed potatoes, one ounce cooked peas, a little finely-chopped parsley, one tablespoonful mixed herbs, and a pinch each of salt and pepper. Turn out to a plate, and when quite cold shape into cutlets, brush with milk, and sprinkle with bread-crumbs or oatmeal. Place in a greased tin and bake in a hot oven for twenty minutes.

Swiss Pie

Slice some cold potatoes and arrange a thin layer in a greased pie-dish. Sprinkle with salt and pepper minced onion, and a little grated cheese. Pour over a little white sauce, then repeat the layers until the pie-dish is full and cover with generous quantities of the sauce and grated cheese. Bake in a moderate oven until the pie is a golden brown on top.

Green Pea Soup

Boil some green peas in water in which a pinch of washing soda and a tablespoonful of sugar have been dissolved. When quite soft strain and put through a wire sieve. Return to the saucepan, add a piece of butter

the size of a walnut and a little milk thickened with flour, and allow to simmer gently for a few minutes. When the soup is ready to serve add a piece of beetroot cut into small squares and one or two finely-chopped spring onions.

Vegetable Roll

Soak 2 lb. lentils in cold water for twelve hours, then cook till tender. Cook and wash one medium-sized turnip, then mix in the lentils, two cupfuls breadcrumbs, half a cup grated cheese, and a pinch each of salt and pepper. Press into a well-greased pie-dish and bake in a moderate oven for half an hour. Garnish with fried tomatoes and serve with mashed potatoes.

"Well, judge for yourself. He told me the summer resort he goes to looks even prettier than the pictures."

A Real Thriller

The hammock now has lost its charm; The bump it gives does little harm. If real thrills you seek to gain, You tumble from an aeroplane.

"Saving time is the equivalent of increasing the duration of life."—Glenn H. Curtiss.

Dresden Uses Glass Man As Exhibit To Teach Hygiene at Health Show

By KENDALL FOSS

Dresden

A glass man, six feet tall, with feet apart and arms raised high over his head, stands in a dark room in Dresden awaiting the arrival of inquisitive people who come to push the row of buttons which light up, one after another, every organ and unit of his body. The man is the central feature of the International Hygiene Exhibition, which opened here recently and will continue its mission of teaching the lessons of public health until September.

Sanitary engineers and municipal health officers describe it as the greatest lesson ever given in the science of public health work. It is the largest thing of its kind ever attempted and it covers practically the entire field of prevention of disease and the promotion of health and efficiency. The exhibits range from a magnified cross-section of a piece of skin to the latest thing in street sweepers. In the exhibit of skin one sees a model, many thousands of times enlarged, in which the outer or white part of the skin tissue is some three inches thick and the hairs rise to a height of a foot above the surface. Every blood vessel, nerve fibre, perspiration duct and detail of tissue structure is portrayed as seen through a powerful microscope. After one has spent five minutes contemplating this model there is no reason why one should not remember forever how devastatingly easy it is for blood-poisoning, for example, to find its way into one or another little pipe-line and so into the body.

Models of the Organs

Then there are models of the heart, the lungs, the stomach, the digestive processes, the muscle and nerve structures, the blood system, the vocal apparatus, the head and every other functioning part of the body. A particularly interesting feature is the complete lack of "Please don't touch" signs. On the contrary, the public is requested to touch almost everything. Before the model of the lungs is a lever, pressure on which draws the diaphragm down and fills the lungs. This is wrong, as it means distending the stomach. Another lever allows the lungs to expand through expansion of the chest structure. The difference in effect of the two levers affords a demonstration far more striking than any amount of instruction obtainable in a gymnasium or physical training course.

Beside the model of the heart, which may also be worked, stand two large glass containers. One, approximately a cubic yard in size, is filled with red liquid representing the amount of blood pumped through the heart in an hour. The other contains red pellets as big as raspberries, interspersed with a few white ones. This is a highly magnified representation of the red and white corpuscles of the blood itself.

The management wants people to think hygienically and has set about insuring this with thoroughness and skill. The exhibition is intended for the general public and is made comprehensible to anyone who can read; but it remains equally fascinating to the expert. The lesson it has to teach is never forbidding and repelling, even when dealing with diseases and sicknesses that thrive in poverty-stricken areas where cleanliness is lacking. Yet the designers have not lost the force of their message.

A section, for instance, is devoted to "woman as mother and wife" which presents every phase of childbirth, the proper care and diet of the mother, the proper exercise to be taken, the sort of work to be avoided. Most of the section is primarily designed for the partly uneducated and those ignorant of the simple rules. There is a

small room completely fitted out with everything the doctor and nurse require at the time of birth. The room is spotlessly white and clean, thus emphasizing the necessity of cleanliness.

Another section deals with exercises, though here it must be admitted the exhibit is exclusively devoted to the exercises of children and young people. There is no exhibit devoted to that increasingly important field—the preservation of health in the man or woman between 30 and 40.

Since it is described as an international exhibition it is not unnatural that there exists a "Hall of Nations," where foreign contributions to the science of hygiene are presented. Russia has the finest and most complete of the foreign exhibits. It is not all strictly hygiene, but it gives a detailed picture of the advances enjoyed by Soviet citizens in industrial and agricultural pursuits. The sorriest foreign exhibit is the American. A fine large hall is labelled "U.S.A." but only one corner of it has anything in it. A well-known New York milk firm has taken the trouble to show how they bottle milk and why it is superior to other milk bottled by men in less spotless white uniforms. The rest of the big room is vacant.

But Rumania has an exhibit and so has Turkey and even Japan, to mention a few of the nations who have taken rooms in the foreign quadrangle.

A section devoted to child hygiene is especially worthy of attention. There are statistics and diagrams describing the present fall in the birth rate in Germany, which portray graphically the change which has come over the republic since the days of large families. Eloquent exhibits of playgrounds and the results of the lack of sufficient fresh air and exercise on growing children are there, as well as a model schoolroom and an out-of-doors school adjacent to a group of model houses designed for all sorts of family needs.

There is a model of a house for a family with many children, and one for a couple with none. There is a house with the maximum amount of sunlight in which everything faces south, and a house for a cripple in which things are arranged to avoid long and unnecessary journeys. Climate is treated as a special subject. Figures clothed in costumes of every period from the thirteenth to the present century portray the changes of style and the part that ideas of personal hygiene have played in different ages. The difference between the billowing petticoats and narrow waists of the past century and the styles of to-day are presented in the light of the influence the change has on the health of the wearer.

Mental Hygiene

Mental hygiene is also treated with thoroughness and attention to vivid detail. The care of the nervous, the beaten, the discouraged and, more important, some charts and diagrams, and photographs illustrating ways of preventing these conditions, are to be seen. The first part of this department is devoted to ways and means of avoiding the transmission of unfavorable characteristics from generation to generation. The second calls attention to the wearing effects which city life has on the nervous system and shows how best to resist the ill effects of noise and confusion; how to make the most of rest time, and how to regain ground once lost to the forces of din and worry.

"Superstition and Health," which might equally well be called "From the Medicine Man to the Modern Doctor," adjoins in space as well as in subject the section on mental hygiene. It displays a wealth of historical matter and a collection of some of the more common beliefs in regard to sickness and cure. It is the only section which indulges in irony. The illustrations of the art of the magnetopath, the astropath, the mental curer and how they work are vivid and ridiculous to a high degree.

The exhibits presented by the Reich, the German States and the cities, while more technical and less easily comprehended by the layman, are rich in their data on the development of public health measures, sewage, refuse handling, street cleaning and the administration of public health ordinances. They also display statistics and charts on the cost and handling of unemployment insurance, State sickness insurance, the fight against tuberculosis, social diseases, alcoholism, the care of infants and children and a host of other "social" matters in which Germany has long been recognized as a world leader. A first attempt is made, too, to exhibit a hospital in which some seventy different types of model rooms are shown. These deal with every stage in hospital work from the reception of the patient to operating rooms, X-ray rooms, rooms with strange apparatus for holding broken bones in place, laboratories and sunny convalescent rooms.

Aerial Photography in Canada

An examination of the photographs taken by the Royal Canadian Air Force for the Department of the Interior during 1923 shows that approximately 46,000 square miles have been photographed obliquely and 24,000 square miles vertically.

George Washington's Head

Head of George Washington, 60-feet high, carved by Gutson Borglum on Mount Rushmore, Black Hills, South Dakota, which was recently unveiled.

BUSINESS IMPROVING

With the coming of autumn a general
resumption of trade activity is to
be expected. There are ample reasons
to believe that the Canadian
farmer will benefit materially from
the crop now being harvested. While
the crop in the West has been spotted
the general yield will be satisfac-
tory and apparently close to normal.
In the States, the corn crop
has been a failure and cattle raisers
are feeding wheat to their stock as
it is now selling at ten cents less per
bushel. This will render it impos-
sible that the republic will have any
large amount available for export
and will thus be a negligible factor
in the world market. The wheat
crop in France and Italy has been
below normal in Germany fair and
in Switzerland a failure. This will
react very favorably toward Canadian
wheat and as a result a greater
degree of prosperity may be looked
for in the Dominion than if normal
market conditions prevailed abroad.

The factories generally appear to be
increasing their output, and in
some lines business is better than it
was a year ago. Wholesale trade is
slightly improving and retail collec-
tions are fair. There is every likeli-
hood that since the American tariff
wall has again been raised against
Canada that the new Conservative
government will take pains to foster
the Canadian industry by raising the
duty on many items. This should
force American manufacturers to
build more factories here. There is
now a considerable amount of dump-
ing going on, both of manufactured
and farm products. In some cases
after the American market has been
glutted the surplus production is
dumped in Canada at prices which
Dominion manufacturers could not
duplicate without going into bank-
ruptcy. The building of more Amer-
ican factories in Canada will mean
taxes paid to the Dominion provin-
cial and city governments which were
never paid before, additional work for
Canadian contractors in the erection
of buildings, etc., and wages for Cana-
dian workers.

With these facts borne in mind it
may be taken for granted that the
municipalities of the Dominion will
be better able to engage in cam-
paigns of betterments and extensions
than has been the case in some time.
Speaking of this matter the other
day in Toronto Mr. W. J. Forbes,
President and General Manager, of
the Municipal Engineering Company,
Limited, C. P. R. Building, stated
that his house expected to do a great-
ly increased volume of business this
fall and winter as compared with
the same period last year, while next
summer, at which season most street
and other excavatory work is done,
should be even better. Not only has
his concern had a gratifying number
of inquiries but this appears to be
the experience of other contemporary
houses in his line.

The Municipal Engineering Com-
pany, Limited, is one of the amply
financed and firmly established con-
cerns of the kind in the Dominion.
It carries full and complete lines of
waterworks, paving, road-building &
similar supplies. It handles engi-
neering specialties and everything, in
fact, which municipal engineering de-
partments made use of. It repre-
sents a number of leading American
and British manufacturers and its
facilities are of the most compre-
hensive character. Mr. Forbes is well
known in the trade and has built
up a business which is a very im-
portant factor in its line.

SUCCESSFUL SCHOOL FAIR

One of the most interesting School
Fairs of the season was held in Morin
Heights, Argenteuil County on Sat-
urday, September 20th.

In spite of the unfavorable weather
the children turned out in large
numbers and brought a splendid lot
of exhibits.

This School Fair has shown great
improvement in the quality of ex-
hibits during the three years it has
been in operation. The organization
work has been in charge of the Local
Women's Institute and the District
Agriculturist, Alex. Bothwell.

Messrs. Nettote and Granger of
the Provincial Department of Agri-
culture acted as judges of the vege-
tables and cereals while Mrs. E.
Hughes, of Montreal and Mrs. R.
McCullough of Morin Heights, judged
the girl's work.

Mrs. Douglas Davis, of Morin
Heights, and Mr. Taylor from La-
chute, handled the sports' program
which was very keenly contested by
the boys and girls, some twenty
events taking place. Messrs. Gué-
nette and Brown acting as judges.

The following are the prize win-
ners:—
Quart of Oats—Marcel Groulx, L.
Guénette.
Sheaf of Oats—Marcel Groulx.

Sweet Corn—Betty Silverson, D.
Brown, Louise Silverson, Ruby Sil-
verson, Elma Goldthorpe.
Onions—Joe Baldwin, Elma Gold-
thorpe, R. Guénette, Dorothy Brown,
Yvette Guénette.
Parsnips—Ruby McCullough, D.
Brown, Marjorie Doherty, Dorothy
Woods, Lillian Basler.
Pumpkins—Lillian Basler, Elma
Goldthorpe, Elsie Basler, Betty Sil-
verson, Louise Silverson.
Beets—René Guénette, W. Silver-
son, Elma Goldthorpe, Paul Beaumel,
Ronald Boyd.
Carrots—Joe Baldwin, Rita Seale,
Veronica Ivall, Louise Silverson, R.
McCullough, Charlie Beaumel, Walter
Silverson.
Cucumbers—Veronica Ivall, Elsie
Basler, Dorothy Brown, Elma Gold-
thorpe, Ethel Baldwin.
Potatoes, (10)—Sterling Dawson,
Charlie Beaumel, Harold Brown, R.
Guénette, Joe Baldwin.
Potatoes, (Gallon)—Paul Beaumel,
René Guénette, Harold Brown, Mar-
cel Groulx, Joe Baldwin.
Weeds—Harold Brown, L. Brown.
Beans (Brittle Wax)—H. Brown,
Joe Baldwin, René Guénette, Charlie
Beaumel, Walter Silverson.
Milked Stool—Charlie Beaumel,
Walter Silverson, George Campbell,
Raymond Campbell.
Collection of Wood—Walter Sil-
verson, Harold Brown, Joe Baldwin,
Raymond Campbell.
Hammer Handle—Walter Sil-
verson, Paul Beaumel, Harold Brown, J.
Baldwin, Raymond Campbell.
Canned Fruit—Jean Campbell.
Canned Vegetables—Jean Camp-
bell, Eileen Senogles.
Tea Biscuits—Elma Goldthorpe, J.
Campbell.
Sweet Peas—Rita Seale, Yvette
Guénette.
Cookery (Cake) 6-10—Pat Davis,
Audrey Watson, Marjorie Doherty.
Cake (11-14)—Mildred Syrett, J.
Campbell, Veronica Ivall, Elma Gold-
thorpe.
Pyjamas—Jean Campbell, Eileen
Senogles.
Pillow Slips—Elva McCullough, E.
Goldthorpe, Jean Campbell.
Apron—Jean Campbell.
Darning—Jean Campbell.
Towel—Pat Davis.
Patching—Pat Davis, J. Campbell.

SPORTS

Race, 25 yd. dash, Girls 8 years &
under—Marjorie Doherty, R. Gué-
nette, Audrey Watson.

Dorothy Woods.
High Jump—Boys 14 years and
under—George Campbell, L. Watson.
High Jump, Boys 12 years and
over—Curtis Kerr, Paul Beaumel.
Stone Throw, Boys 12 years and
under—Lloyd Watson, Charles Beaumel.
Stone Throw, Boys 12 years and
over—Harold Brown, Paul Beaumel.

BROWNSBURG

Last Friday evening in the Maple
Ave. Baptist Church, Brownsburg the
Gold Group, the losers of the B. Y.
P. U. Contest, treated the Silver
Group, the winners, to a programme
and banquet. Mrs. Earl Smillie acted
as chairman, and a short program
was enjoyed by all.

Election of Officers for the next
six months were held and Mrs. E.
Smillie was elected President; Mrs.
J. McDonald, 1st. Vice-President;
Miss Hilda Townsend, 2nd. Vice Pre-
sident; Mrs. W. Pettley, Secretary;
Miss Lillian Kennedy, Treasurer and
Mr. Herbert Graves, and Mr. Hector
Mason, Group Captains.

Mr. Earl Smillie made a splendid
Toastmaster and toasts were the
order of the evening. Miss Alta Mc-
Donald proposed a toast to the King.
Mr. Prosser a toast to the Church,
responded to by the Pastor. Mrs.
E. Smillie, a toast to the B.Y.P.U.,
responded to by Miss Helen White.
Miss Phyllis Campbell, a toast to the
Silver Group, responded to by Miss
Edith Brown. Short speeches were
given by Mr. John Mason, Mr. J. Mc-
Donald and Mr. A. E. White. A
very enjoyable evening was had by
all.

A Rally Service was held in the
Maple Ave. Baptist Church last Sun-
day and this service was well attend-
ed. Next Sunday will be Mr. Wal-
tho's last Sunday, as he leaves for
McMaster University to continue his
studies.

The Navy Looks Her Over

Expert criticism of the Cana-
dian Pacific's new 24,000-ton
liner, "Empress of Japan", is de-
picted in the above picture, which
shows two British blue jackets
gazing at the graceful trans-
Pacific greyhound, lying at her
berth in Vancouver, B.C. The new
White Empress, which broke all
records on her first voyage, by
steaming from Yokohama to Van-
couver in 8 days, 6 hours and 27
minutes, will make Honolulu a
regular port-of-call on her voy-
ages to the Orient.

GRENVILLE BAY

Nurse Larose spent Sunday at her
home here.

We are pleased to say Mrs. D.
McIntyre is well again.

Mr. T. D. McMichael and Mr. P.
Young spent Sunday with Mrs. H. A.
Cameron.

Mrs. J. B. McJannet, of Montreal,
spent the week-end in the Bay, the
guest of Mr. and Mrs. Brechin.

We are pleased to learn that Mrs.
Edgar Larose is improving, after a
serious operation and will soon be
home again.

We are sorry to learn that Mr.
Thos. McMichael, who has been ill
for some time, has gone to Hospital,
to be treated by Dr. Kelly. We
hope to see him home soon.

Best for All Your Baking

My favorite Christmas Cake—
so delicious, yet so easy to make

(From "Letters to Mother"
by a Modern Canadian Housewife)

"How time does fly, Mother! Christmas will soon be here again. Bob said one evening, 'don't you think it's about time you were making the Christmas cake?' So I set to work and made it the other day, and it's going to be a great success.

Bob says he thinks my luck is changing because my baking is so much better, but it isn't luck at all—it's Purity Flour (only I don't tell him so).

I always imagined fruit cake was so difficult to make—until this year, but it is much like making any other cake. Good results depend chiefly in the blending of the ingredients from the start: the richer the cake recipe is in butter, the more cautiously must the mixture be worked to a smooth cream as one gradually works the sugar into the butter. The oven must be even and moderate.

I am looking forward to having you and Dad with us for Christmas, Mother."

Your loving Betty

3014

Betty's Recipes

Purity Flour Light Christmas Cake

2 cups white sugar
4 eggs
1 cup butter
1 lb. shredded coconut
dry

1 lb. mixed peel, chopped
1 lb. almonds, chopped
cup press salt
bottle of oil
teaspoon vanilla
cup Purity Flour
tsp. baking powder

Method: Cream the butter, add sugar, 4 eggs beaten, add coconut, mixed peel and almonds, half of your flour, then the cherries and vanilla, then the milk, finally the rest of the flour with the baking powder in it. Bake in oven 225° for 1 hour.

Send for the Purity Flour Cook Book, 200 pages, over 700 tested recipes mailed to any address for 50 cents.

PURITY FLOUR

CUSHING WEST.

Mr. and Mrs. J. Derrick, of Lakesville, called on their friends in this locality on Monday.

Messrs. C. F. Watson and C. Hartley motored up from Lacolle for Saturday and Sunday.

Mrs. R. Pinkerton was the guest of her daughter Mrs. Jas. Harcourt at New Glasgow last week.

Mr. A. C. Pinkerton, of Montreal, was the guest of his parents, Mr. and Mrs. R. Pinkerton on Sunday.

Dr. Cushing and family, also Mrs. Turbayne and daughter, of Niagara, spent the week-end at the doctor's residence.

Mrs. Usher and her son Mr. Owen Keatley with their guest Miss E. Smith, of Montreal, motored to Ottawa, on Thursday last, returning on Friday.

Mr. and Mrs. E. J. Mahoney, of Montreal, and Miss Tessie Robert, of Lachute, were guests of their mother, Mrs. R. Pinkerton, at Monalea, on Sunday.

Week-end guests of Mr. and Miss Wheelahan were their nieces, the Misses Grace and Katie Wheelahan and Mr. and Mrs. Douglas Hartley and son Kenneth of Montreal.

Mrs. C. L. Cooke who recently underwent a serious operation at the Montreal General Hospital, arrived home on Thursday last, and we are pleased to report that she appears greatly improved in health.

Miss Olive Hartley entertained a number of her girl friends at a very jolly house-party at her mother's residence here over the week-end. The party included the Misses Beatrice Couper, Jean Morrin, Ann Logan, J. Rutherford, G. Symmons, J. Brain, M. Leone and Doris Robertson.

Here and There

(598)
A spectacular high line trail ride about 7,000 feet above sea level from Banff to Lake Louise has just been inspected and found feasible by J. Murray Gibson and Jim Brewster. It is 27 miles west of Banff over timber line to a ridge looking down on the little known glacier-fed Taylor Lake and following the 7,000-foot contour to the Consolation Lake trail leading to Moraine Lake. It commands magnificent views of the glacial country north of the Canadian Pacific Railway west as far as the Bow lakes and south to Mt. Assiniboine. It is 60 miles long and will probably be used for the annual official camping trip of the Trail Riders of the Canadian Rockies next year.

"I do not believe that the talking films will ever take the place of the legitimate stage. . . . People still appear to be building ordinary theatres," said Lady Diana Manners, famous English society beauty and equally famous as the heroine of "The Miracle" during its New York and Boston productions, who arrived at the Windsor street station, Montreal, recently, on her first visit to Canada.

The Quebec Festival of French-Canadian Folk Lore and Handicrafts at which habitation artists born and bred on the soil of Quebec province, and well-known artists from far and wide rival one another in recovering the spirit of Old France, and old New France and the age-old culture of the Gaelic race, will be held this year October 16-18, according to an announcement made by the Canadian Pacific Railway, organizers of the Festival.

Travelling in two Canadian Pacific special trains, about 250 of the most eminent figures in the British medical world left Montreal for Winnipeg to attend the first convention of the British Medical Association held in Winnipeg. They were preceded by a group of 60 members of the British Tuberculosis Association, who attended a convention of tuberculosis specialists at Ninette, Man., before going to Winnipeg.

"In view of the fact that this is the last year in which Canada has a seat on the Council of the League of Nations, I could not resist the request made to me by the Prime Minister to represent the Dominion at Geneva," said Sir Robert Laird Borden, former Prime Minister of Canada, as he sailed for Europe recently aboard the Empress of Scotland.

Every activity of the Canadian Pacific Railway was stressed this year at the National Exhibition at Toronto, which was opened formally by E. W. Beatty, chairman and president of the road. An outstanding feature of the company's exhibit was the model of the new 42,500-ton Empress of Britain, greatest inter-oceanic passenger vessel, launched by the Prince of Wales last June and to be in service between Quebec and Great Britain next year.

Province of Quebec,
District of Terrebonne,
Municipality of Lachute Town.

Public Notice is hereby given that the Corporation of the Town of Lachute has made application to the Quebec Public Service Commission for authorization to borrow money for installation of sewer pipes on Bedford Boulevard and from the corner of Boulevard Bedford and Main Street to the North River, without having recourse to a referendum of the rate-payers of the Town of Lachute. The bearing of the petition will take place before the Quebec Public Service Commission in Montreal, at the Court House (old), on the 25th day of October 1930, at 10:30 a.m. All of which the interested parties may take note of and govern themselves accordingly.

Given at Lachute, this 25th day of September 1930.

GERMAIN FILION,

Secretary-Treasurer.

Women's Victories Challenge to Men

The male population of the world must have gasped when the news was flashed from Bisleigh Camp, England, that a woman had won the King's Prize. Their first thought would be: What happened to the men? Nothing, except that they found they were not quite good enough. And the finest of the marksmen were there, doing the best they could. One hundred crack shots from all parts of the Empire, among them six former winners of the trophy, took their places at the historic ranges. Enough to break the nerve of any man, but not the cool, keen-eyed, steady-handed woman who battled her way through to victory. Hats off to Miss Marjorie Foster!

There appears to be no limit to the achievements of woman in the fields of activity hitherto regarded as the exclusive domain of man. In business, in the professions and in the arts she is firmly established, and in the realm of lighter sports she is challenging the supremacy of male contenders. Some weeks ago an English girl, absolutely alone, piloted an aeroplane through the vast space that separates the British Isles and Australia, thus establishing herself as a worthy classmate of the wonderful Lindbergh. Later another young English woman showed the way to the most famous aviators of the day in a flight of several hours' duration.

And now another daughter of the little island, in competition with the great marksmen of the Empire, captures the King's Prize, the most coveted trophy that can be won at the ranges. It all is very amazing, and gives notice to mere man that he can no longer regard himself as the lord of creation. A few humiliations of this kind may do him good.

G.B.S. Bored While Editing Own Works

London.—George Bernard Shaw, who will shortly be 74 has begun editing his whole literary output, not caring to leave the task to posterity. An edition of 50 volumes, now in preparation, is limited to 1,000 sets. He has laid aside all creative work for this purpose. But he is bored with the job.

"It looks as if I shall spend the rest of my life at this job," he complained the other day. "It won't do; it's holding up my other work and it's a worrying task."

It took a woman to outwit the Irish sage. She wrote asking Shaw for a free copy of his latest book for a newly organized woman's society. Shaw wrote across her letters: "Damn it, no; a woman's society that cannot afford to pay 15 shillings for a copy of my book has no right to exist."

He signed the note and returned it to the woman. A fortnight later she again wrote Shaw to inform him that a bookseller had traded her a copy of the book for the letter bearing Shaw's autograph.

Shaw had the last word, however. Across the bottom of the woman's second letter he scrawled:

"What fools women are! If you had taken it to the right place you would have got \$150 for it." And he signed that, too, and sent it back.

He once rejected an offer of one million dollars for his cinema rights and when the Nobel prize for literature was awarded him for his play, "Saint Joan," he gave the \$22,000 award away to further Anglo-Swedish literary relations.

Again, when a wealthy American woman offered Shaw a fee of \$25,000 just to cross the Atlantic, dine with her, talk a little to her guests and catch the next boat home, he promptly declined.

When London becomes too sooty and foggy, Shaw flies off to his country home, a substantial, ivy-clad, brick house at Ayot St. Lawrence, in Hertfordshire.

His house stands at one end of the village of about 100 inhabitants. It commands a wide view, has much window space and is enclosed by a well trimmed hedge fence. Barbed wire around the extreme limits of the estate keeps out intruders.

Youthful Princess Goes Shopping

Forfar, Scotland.—Little Princess Elizabeth, daughter of the Duke of York, went shopping here recently carrying her own purse and paying her own bills.

She is staying with her mother, the Duchess of York, at Glamis Castle near here and came to town escorted by her maternal grandmother, the Countess of Strathmore, to buy a book. Several were shown to her which, after much examination, she rejected, saying: "I've seen that already."

Finally she found one that was new to her and asked the price. Then she said, "I will take that," and produced her purse with dignified self-possession and paid for it.

"Divorce ought to be so easy that it could be got at Woolworth's for five cents,"—Cosmo Hamilton.

"Why so depressed, old man?" "The horrible cost of living; constant bills for materials, paint and shingling." "What, your house?" "No, my daughters."

World's Largest Liner

New 27,000-ton White Star motorship, Britannic, world's largest cabin liner, as she arrived at New York after maiden westward transatlantic voyage.

New Process Will Double Gas Output

Standard Oil and German Company Organize to Control Rights

New York.—Oil companies representing about 80 per cent. of the refining capacity in the United States have become associated in a new organization, the Hydro-Patents Company, to control and develop a process believed to be capable of doubling the amount of gasoline now yielded from fuel oil, according to a recent statement made by the Standard Oil Company of New Jersey.

The new process, which is known as hydrogenation, consists of the addition of gaseous hydrogen at high pressures and temperatures, in the presence of chemical agents known as catalysts, to crude oil or heavy fuel oil, building it chemically into thinner oil or gasoline. The operating conditions may be varied, it was said, to obtain the particular product desired.

The process has been developed during the past three years, the announcement said, by the Standard Oil Company's research engineers in collaboration with the I. G. Farbenindustrie Aktiengesellschaft of Germany and is owned by the two organizations.

The importance of the process in the oil industry was indicated by experimental data already obtained by the Standard Oil Company's research engineers on the multiplication of the yield from Venezuelan crude oil, it was said. As Venezuela is one of the largest producers of crude oil in the world, the increase of gasoline from this source alone will make the control of the new process one of the most important factors in meeting the overproduction of crude oil and price cutting of the last few years.

As an example of the value of the new method, Standard Oil Company's research engineers explained that at present half a barrel of heavy fuel oil is left over from every barrel of crude oil after the distillation of gasoline. Under proper operating conditions the new process may be made to yield 100 gallons of gasoline from every 100 gallons of crude oil.

The production of gasoline in the United States, having risen gradually from 26,000,000 barrels a year to almost 500,000,000 barrels at present, the amount of fuel oil produced in its manufacture far exceeds all demand for it.

Shares in the Hydro Patents Company are held by the various users of the process in proportion to their crude oil-refining capacities, the announcement said, with a minimum holding of 500 shares. In return for control of the process in the United States, the new company will pay a

Air, Water, Soil and Sunlight Will Supply Power to the Future Generations

London.—The passing of the coal age and the approach of a new era when the people of the world will harness the air, water, soil, and sun to provide all their requirements, was discussed by Dr. Herbert Levinstein in his presidential address at the recent forty-ninth annual meeting of the Society of Chemical Industry in Birmingham.

"Chemical science has now reached a stage when it can obtain direct access to new sources of coal-tar products by a synthetic process, instead of being confined to geological formations," Dr. Levinstein said. "A complete reduction of carbonic acid obtained from the air, to methane or coal gas, has been accomplished, which in turn can be almost completely converted in an arc oven, into acetylene or changed into tar, half of which consists of benzene. The world's available raw material has thus become inexhaustible, as carbonic acid exists in the atmosphere in unlimited quantities."

fixed and running royalty to the two organizations which have developed and own it.

N.Y. Hears Aviator 5,800 Miles Away

New York.—Capt. Lewis Yancey, transatlantic flier on a good will tour of South America, talked from an airplane 4500 feet over Buenos Aires, with several persons in the United States recently.

Although his voice and that of his radio operator, Mr. Bouck, are being transmitted over a distance of more than 5800 miles, they were heard in New York as plainly as though the conversation were being carried on over a local telephone line.

Fred E. Melnholtz, manager of the New York Times radio station, was notified that a call was coming through from the Argentine and five minutes later the operator said: "Stand by, Captain Yancey at Buenos Aires wishes to speak with you."

Almost immediately the aviator's voice was clearly distinguished. Captain Yancey said he was flying above Buenos Aires and that the weather was very cold. When he had talked for six minutes, Mr. Bouck came on the line. He said the plane's voice transmitter was operating on the 24-meter wave.

The conversations were intercepted by radiophone station LSN of the International Telephone and Telegraph Company in Buenos Aires, where the

'About 15 generations will see the exhaustion of the world's principal coal deposits, and as the human race is learning how to use air, soil and sun to the best advantage, and make the earth more productive of food and raw materials by using atmospheric nitrogen, so the next step must be the extraction of carbonic acid from the air to obtain raw materials now produced from coal.

"Britain's wealth depends on fossil wealth, namely coal for power, instead of on tides, water, the wind and the sun's radiation. The coal age, when passed, will have lasted a shorter period than the Moorish occupation of Spain, which then seemed so important to Christendom, but vanished, leaving a palace or two and a few romantic tales. As the losses of the Napoleonic wars were made good by development of steam and coal, so the last war's losses must be made good by a more effective use of natural forces for industrial work."

voice was reradiated to New York on a 14-meter wave. The short waves from South America were intercepted at the Neteong (N.J.) American Telephone & Telegraph Company short wave receiving station and carried by wire to the New York Telephone System in Walker Street.

"The cheap car is here to stay," writes a motoring correspondent. But we prefer the car that will go.

Old Gardner (to his boss, on being offered a refreshment): "Thank ye, sir." (Receives the drink): "Did ye put in the whiskey or water first, sir?" "The whiskey." "Thanks. I'll maybe come to it by and by."

Long-Winded Speakers Warned by Lights

Not everyone can start a speech. Even fewer can bring one to a timely conclusion. An orators' club in Worcester, Mass., has made a novel provision for the latter class by installing at the chairman's elbow a series of signal lights—yellow, green and red.

When the speaker draws near his time limit, the yellow light warns him to hasten toward his close. The green light tells him his time is about exhausted. The red light means "sit down."

But why should such a provision be necessary? Do speakers, once having the body of their address well in hand, neglect the conclusion, thinking it of

Bucharest, Rumania.—While letters continue to arrive telling of the Oklahoma City giant gusher Rumania's famous gusher enters its twelfth month of brilliantly illuminating the country's greatest oil field. The well, belonging to the Standard Oil Company, came in with a terrific and unexpected bang May 23 last year, and friction of stones did the rest. Since then it has been making Rumanian history, and probably world history in the annals of oil well fires.

The well was one of the first to enter the Meotie or deep strata, the two other layers of sand having been exhausted. Although the eruption has been one of the most powerful yet encountered in Rumania, estimates of escaping crude oil have never reached more than 10,000 barrels a day.

Method after method for extinguishing oil well fires has been tried, but of no avail. Foreign experts have come and they have failed. The sudden shock from a field cannon has been known to succeed in making the blaze of an oil well disappear.

Recently the writer spent two days with an engineer friend who lives within a mile of the well. During the long evenings there was no need of turning on electric lights, but for the stranger it was very difficult to sleep, due to the glare and the thundering noise. Those living there have become accustomed to the great light and know that they will regret the day when it disappears.

A lot of men can read their wives like a book, but they can't shut 'em up like one.

"Whenever you see a quitter," said Uncle Eben, "you're liable to see a man dat wa'n' much of a beginner in de fast place."

Beauty in Clover Has Been Ignored

Summer is the time to study the clovers. This plant suffers injustice; it has for centuries been a most valuable forage crop, but its beauty is much overlooked. This, however, is no loss to the clover, for it does not bloom for people, but for the bees and butterflies.

Emily Dickinson said: "The pedigree of honey does not concern the bee, A clover, any time, to him is aristocracy."

A field of red clover in bloom, swaying in the wind, is a beautiful sight, but we do not need landscapes to teach us its beauty. Just one clover blossom studied carefully, and looked at with clear-seeing eyes, reveals each floweret beautiful in color, interesting in form, and perfect in its mechanism for securing cross pollination.

The clover is especially renowned for its partnerships with members of the animal kingdom. It readily forms a partnership with man, gladly growing in his pastures and meadows, while he distributes its seed.

For many years clover was regarded as a crop helpful to the soil, and the reason given was the great length of the roots. Thus the roots of the red clover often reach to the depth of several feet, even in heavy soil, but it was also learned that little "nodules" on the roots of clovers are able to free nitrogen of the air, and make it available for plant food.

The red clover came to us from Europe, but is a native of Asia. It is the clover most widely cultivated in America and a great friend of bumblebees. Bumblebees had to be imported into Australia before clover seed could be produced there.

The white clover is the most beautiful of all. Its leaves make a rug for our feet in every possible place and is known to all. It is the best beloved by honeybees; and the person who does not know the distinct flavor of white clover honey has missed something. It is probably a native of North America, yet it is truly cosmopolitan and may be found in almost all regions of the temperate zones. It even cheers Siberia with its presence.

The yellow or hop clover is a friendly little plant, filling waste places with brilliant green leaves, dotted with small yellow flower heads, and is not recognized as a clover by those who are not observant.

The rabbit foot or stone clover is not easily recognized. Here the flowerets occur in long, dense heads. The calyx is very silky, and the lobes are longer than the white corollas, thus giving the flower head a soft, hairy look, something like the early stages of the blossom of the pussy willow.

Alfalfa is the veteran of all the clovers, for it has been under cultivation, for twenty centuries. It is a native of the valleys of western Asia. In America it was first introduced into Mexico by the Spaniards. It was brought from Chile to California in 1854, where it has been since that time a most important crop. In fact, there is no better hay than alfalfa.

There are numerous other clovers, but sweet clover must not be overlooked. In driving through country roads we find ourselves suddenly immersed in a wave of delightful fragrance, and if we look for the source we may find there in the most forbidding and hardest soils of the roadside this friendly plant, that, growing as a weed, diffuses sweet perfume. When the soil is generous the sweet clover often grows very tall, sometimes ten feet high. It is a cheerful, adaptable and beneficial plant.

No wonder Andrew Lang wrote: "Hush, ah hush, the scythes are saying, Hush, and heed not, and fall asleep; Hush, they say to the grasses swaying, Hush, they sing to the clover deep."

Emigrants to the number of 3,473 were helped to go to the overseas Dominions last year by the British Legion.

Of the 80,000 tons of blended butter sold in England every year, 60,000 tons contain a proportion of inferior butter from abroad.

Three of a Kind!

Striking view of Royal Air Force seaplane squadron as they appeared recently at annual pageant at Hendon aerodrome, London.

Mistaken Motives

By RENE M. WORLEY

He came to No. 17, Harman Street, on a pouring wet night in a month early in the year. The unfavorable weather conditions, combined with the lateness of the hour, and the fact that Aunt Emmeline knew he was speaking the truth about other houses being "full up" proved to be his good fortune. She took him in. True, as she said to Jean, her niece and general "help," it wasn't her practice to take in strange young men late at night, without much luggage or a reference.

"But I can always be safe for a few nights, anyway, by asking for a week in advance," she ended up complacently.

Jean was in bed when her aunt came panting up the stairs. She was tired and not very attentive, and she dented her head into the comfort of her pillows and murmured sleepily:

"Oh, I expect he's all right! Burglars don't pick on a small boarding-house in a side street for a good haul!"

So Jerry Stevens came to be a lodger at No. 17. He seemed a nice enough young fellow. Aunt Emmeline was completely "won over" because he didn't want bacon for breakfast, and he always stood up when she came into the room. Aunt Emmeline had kept a boarding-house for the ten years of her widowhood, and she could only recollect three other gentlemen lodgers who had treated her so courteously and cost her so little to keep. Trust Aunt Emmeline to know a gentleman when she met one!

"You mark what I say, Jean Caroline Matthews," she said solemnly to her niece, "that young man has known better days."

By which she meant that Jerry Stevens had been brought up in a decent home, and was not one of your regular "diggings" fellows. He had a nice little air about him of being able to order a taxi whenever he felt inclined, and he played golf on Sundays as naturally as you pleased without talking about it over breakfast.

Yes, Aunt Emmeline knew a gentleman when she met one, and, to tell the truth, she liked having Jerry in her house because he gave a nice "tone" to the drawing-room, where he spoke in that pleasant voice of his to everybody, from Simpson, the shop-walker, to little Miss Jordan, who sold sweets in the High Street.

Jean Caroline Matthews liked his being there as well. Directly they saw each other—she was coming up the stairs and he promptly ran back again to let her pass—they looked at each other, the sort of direct, long look that just escapes being a rude stare by reason of a little mutual "something" in the eyes of both. And when he said "good-morning," and she replied, they both passed on their separate ways with a feeling that they had known each other for ages.

"It's very funny," said Jerry, when, a day or so later, he was friendly enough with her to talk in this strain. "What is funny?" asked Jean, flushing in spite of herself.

"It's funny the way I feel towards you—I mean, as if I've known you all my life," he answered firmly.

And Jean felt her cheeks grow so hot that she dared not look up at him, but murmured an excuse and ran away to the kitchen. There, in the mirror, over the sink, she looked into her own eyes and confessed to her heart peeping through them something that a moment ago had seemed almost incredible in its unexpected wonder.

"I love him!" she told herself.

Then she was confused and bothered, and started to strain off the potatoes with such agitation that they rolled into the sink.

Now this might have been quite a straightforward love story had it not been for the arrival of Madeleine Sinclair. She was an actress—tall, willowy, and blonde—and on and off for three years she had occupied the first floor front during those periods known in the theatrical profession as "resting." This time, Madeleine Sinclair told Jean ruefully that she was resting for a long time, because her voice had "croaked" and her varicose veins were so bad no manager would even look at her.

"So I shall have a nice long rest and get myself up to concert pitch again," she said hopefully.

Jean was very sorry for her, because obviously her days for securing juvenile leads were past, and her vanity would never let her acknowledge this.

From the very first, when they met each other at dinner, Madeleine Sinclair took to Jerry as a duck takes to the water. They discovered a mutual interest in antiques—Jerry was assistant in an antique shop—and from discussing china and old gold they passed to more personal topics, and soon were on the friendliest terms.

Jean was miserable about it—not for one moment, mark you, that she thought that her chances of Jerry were slipping in Madeleine Sinclair's direction, but because, with so much monopolizing, Jerry very rarely encountered Jean on his own, and they could not speak to each other in greater detail about that "feeling-I've-known-you-for-ages" they shared.

When Jean one evening took the coffee into the drawing-room, Jerry was sitting on the settee with Madeleine Sinclair, radiant and gushing in geranium-colored silk and enormous earrings bobbing on either side of

her fluffy blonde head. She had her jewel-box on her lap, and she was showing Jerry some of its contents. Her jewels were a source of great admiration and envy among the female population of No. 17, although, as Aunt Emmeline said with a sniff:

"No real lady would come down to breakfast in three different kinds of jewellery!"

"Now, this necklace!" said Madeleine Sinclair, with enthusiasm. "Count Bombasi gave it to me when I was playing Rose in 'Love Flies.' It's very precious, and almost antique, having been in the count's family for years!"

Jerry looked very attentive and very polite. He even threaded the pearls in and out of his fingers and held them up to see their effect in the light.

"Beautiful!" he murmured appreciatively; but his eyes were on Jean, meeting the blue of her eyes, and she set down his cup with a hand that trembled slightly, because, though she couldn't quite be sure, she felt she wouldn't be far wrong in her guess that he meant her, and not the pearls.

It was three days later that Aunt Emmeline answered the front door and encountered the fierce regard of a police inspector.

"Mr. Jerry Stevens live here?" he inquired abruptly; and she only just restrained herself from screaming by clapping her hand over her mouth. She panted into the kitchen, her cheeks positively sagging with fright.

"Lawdy, Jean Caroline Matthews!" she gasped. "There's a policeman on the step and he's come to take Mr. Stevens!"

Jean went to investigate, and a few seconds later returned to her distracted aunt with a triumphant and smiling face.

"Silly! It was only about his firearms license—he hadn't notified his change of address!" she reproached gently. "Surely you didn't think Jerry had done anything wrong!"

It was a morning of incidents. After the inspector came a telegraph-boy with a wire for Miss Sinclair, and within a few moments of its delivery came a wild rushing of feet, and a distracted Miss Sinclair, in a no less distracting kimono, who fopped her head on Jean's shoulder and sobbed about her brother being desperately ill—wasn't it awful?

"You'll have to go to him; I'll help you to pack!" said Jean sympathetically.

The sobs increased, the weight on Jean's shoulder was lifted, and the tragic eyes of the actress, streaming tears and eye-black, looked at her.

"Yes—yes, of course!" she murmured brokenly. "I'll go at once—no, to-day; to-morrow, or perhaps the day after. He's in Paris, you see!"

Next day Madeleine Sinclair came down to breakfast and announced brightly that she was going to Paris. Everybody stopped eating. It was marvellous, they considered, to be able to go to Paris as quickly and easily as all that!

So Madeleine Sinclair went off, and Jean stood on the step waving goodbye to her. Then she went upstairs and started on the beds. She left Jerry's room until last. It was fun to dust his room and arrange the things on the dressing-table. She lingered a long time over his brilliantine, his comb, and his brushes.

Just as she was moving the case that held his brushes something rattled inside, and out fell a pearl necklace. She recognized it at once—she had seen it too many times, heard its story too often, to mistake it. It was the valuable one Madeleine Sinclair had been showing him a night or two ago.

It was a terrible shock. Jean recalled the visit of the policeman—his tale about a firearm license might have been bluff so as not to scare her.

Oh, what a little beast she was to distrust Jerry so easily! Still, here were the pearls in his brush case, and the policeman had called, and Aunt Emmeline had taken him in without a reference, and—Oh, it was too hopeless, too horrible! She didn't want to suspect Jerry—one half of her simply refused to think of such a thing—but there was the practical intelligent half of her that read of such cases in the newspapers, that had to face facts as she saw them.

Even if Jerry had—had stolen the pearls, she loved him just the same, and maybe it was only an impulsive action. She suddenly picked them up, and clasping them in her hand she walked resolutely into Madeleine Sinclair's room opposite and put them in the drawer of the dressing-table.

When he came home that night, she beckoned him into the pantry; and, pale and unhappy, she told him what she had done.

"I was dusting your dressing-table, and I found the pearls there," she said steadily. "Look here, Jerry, I've put them back in Miss Sinclair's room, I—I don't think you meant to take them; anyway, if you did, I still love you, and no one else will ever know—see?"

Then she covered her face with her hands and cried and cried, until he moved them with his strong fingers and held them tightly against his lips.

"Oh, my dear, so you saved me from being a thief?" he murmured tenderly. She raised her face to his—very pale it was, with furrows of tears on her cheeks.

"But, darling, you've mistaken my motive," he continued gently, and laughter fringed the edge of his tones. "You see, I was asked by a very distressed lady, with a brother sick in Paris, whether I would buy her valuable pearls to enable her to afford

Brave Sea and Sharks to Rescue Woman

Diving from "A" deck of the Canadian Pacific liner "Empress of Russia" into the shark-infested waters of the China Sea, midway between Hong Kong and Shanghai, on May 25, Tom Ellworthy, ship's carpenter, battled for the life of Mrs. Katherine Makaroff, one of the passengers. When he saw his shipmate in danger, D. R. Dean, intermediate fourth engineer, went over the side to his aid and the trio were picked up by one of the ship's boats. Both Ellworthy (left) and Dean (right) have been officially cited for their heroism.

Horses Honored at the Capital

By ANNE MERRILL

Great homage was paid to the horse, due to the assistance of this noble and useful animal. Mr. Bower Henry, president of the Ottawa Horse Parade Association, spoke of the horse as "mankind's greatest servant in peace or in war," and added amidst applause, "We are giving honor to the most faithful dumb animal we have."

After the parade had passed by, I was walking up to the House of Commons with Mrs. George Black, F.R.G.S., of the Yukon, when Mr. Felix Quinn, M.P., of Halifax, joined us. Mr. Quinn made the comment that he had no idea there were so many beautiful horses in Ottawa, to which Mrs. Black retorted that the recent statement of the horse having become "a museum piece" must be untrue.

The lady from Dawson, when asked what impressed her most about the horse parade, said that the men looked to be so interested in their animals, and their carts were so freshly done up with paint, and generally ship-shape.

I liked the Ottawa Journal's comment that the animals were "proudly displaying little extra decorations which to equine consciousness must have brought realization of a very special occasion."

The "little extra decorations" were fascinating. There were big black horses with rows of tiny pink rosebuds or lines of red tulips stiffly perched along the ridge of their braided manes, and an additional rosebud or tulip stuck at a jaunty angle in many a braided tail. A touch of humor was introduced by groups of boys riding on parade carts who made laughing faces at envious youngsters standing along the route.

There might have been livelier horses, suggested the Ottawa Citizen, but certainly none that felt superior to Liz, aged twenty-five, a roan who had seen seventeen years' service; or Barney, aged twenty-seven, with an equal number of years' service to his credit. These two four-footed heroes were given special awards by the Ottawa Humane Society.—Humane Pleader.

the trip to see him. A very proud lady it was, who didn't want anyone to know she had been forced to raise money on her jewellery.

Jean's eyes were shining. "Oh, Jerry!" she breathed, and was too ashamed, too terribly fond of him that moment, to say any more.

"It's all right, dear. I think you had every justification for thinking I was a thief. The only thing that mat-

ters to me is that you could say you loved me in spite of all!" he said swiftly. "And you can leave the pearls in Miss Sinclair's room, because I was returning them to her anyway."

"You see, darling, they're not worth a penny of the four pounds I gave her for them, poor old thing! I know, because I happened to sell them to Count Bombasi for seventeen and six!"—Answers.

Fathers Open Garden

Here is a scene in the monastery garden which a religious order known as the White Fathers have opened at Heston, England. The fathers go to all parts of Africa.

POPULARITY

A group of university co-eds adopted a formula for popularity which is worthy the study of the young miss and her fond mamma who wants her to get on well. It is this:

1. Always be a "lady."
2. Use good taste in selecting your clothes and do not let your actions belie that taste.
3. Always be a good sport. Do what the majority wants, but not to the detriment of your own convictions and ideals.
4. Play bridge, tennis, golf, swim and dance.
5. Read the papers. Know your current events, politics and athletics. It is well to converse on serious topics as well as light ones.
6. Handling a "line" is helpful. This "you-great-big-wonderful-boy" stuff does get over.
7. Do not neck, and do not try to be a gold digger.
8. There is no harm in kissing a boy friend of whom you are particularly fond, but do not kiss promiscuously.
9. Dress attractively, but not necessarily expensively. A boy notices the general effect you produce, so be as pretty as you can.
10. First, last and always—be feminine. Don't emulate men in dress, language or conduct.

FROSTING HINTS

Cakes which are to be frosted should be cool and have a crust free from crumbs. A boiled frosting should not run nor soak into the cake.

Keep the edges of the cake even. If the layers are not even, place them so that the cake, when frosted, will be uniform in thickness.

Frost the top of the cake first, putting the frosting in the centre and working it lightly to the edges. Next frost the sides, keeping the utensil free from crumbs. Use quick, deft strokes.

To make a boiled frosting, pour a half cup of boiling water on three-fourths cup of sugar. Add one-fourth teaspoon of cream of tartar or a tablespoon of white corn syrup. Either of these will make the frosting less likely to crystallize. Boil this mixture until the syrup is the soft ball stage or spins a thread. To tell when it is this, drop a little of it into a cup of very cold water. If it forms a very soft ball which loses its shape when removed from the water, it is as you want it. Add it to the stiffly beaten white of an egg. The egg should be beaten until it will hold up in a peak, but not until dry. If it is over-beaten the frosting has a curdled appearance. Pour the syrup over the egg while in a fine stream, beating constantly. Add a little flavoring, and beat the frosting vigorously to make it smooth and fluffy.

To make "uncooked" frosting, sift about two and a half cups of confectioners' sugar. Add two teaspoons of hot water to a stiffly beaten egg white. Add the sugar until the mixture is the right consistency to spread, then flavor and beat thoroughly.

SUNSHINE MEALS

Those who live on the farm have the best chance to be healthy chiefly because they can eat sunshine meals; that is foods which have been growing in the sunshine and have absorbed its powerful rays. Fresh, green vegetables are the first of these. In the same class are fresh eggs, laid by healthy hens who live out in the sunshine, and milk from cows who spend all day in the sunny pasture. Such foods are rich in vitamins.

When cooking greens, use the least

possible amount of water and cook them as short a time as will make them palatable. Otherwise you destroy the vitamins and wash away the valuable mineral salts. If you can eat them raw, that is ideal. Carrots may be chopped and used in salads, or served in slices, raw; and many other raw vegetables can be used in salads.

If you do not live on a farm, make an especial effort to provide sunshine meals for your family. They are cheaper than doctor bills. Many mysterious ills come from a diet deficient in vitamins; calcium, iron, phosphorus and other mineral salts.

PLAY

"All work and no play makes Jack a dull boy"—and Jill a dull girl. Adults as well as children need play. Is your nose constantly at the grindstone or do you have some joyous activity which stretches your muscles, makes you laugh and feel gay, and which encourages your loyalty, team-spirit, courage, self-control and co-operation?

Play is the business of children. It makes them physically strong, mentally alert, and spiritually rich. They will not thrive without it. Begin with the toys on the living room floor, and the sand pile, lead up through dolls, marbles, bat and ball, skates and all sorts of games, to basketball, football, tennis and volley ball. And keep it up with golf, chess and cards until the curtain is drawn on the last game.

CLEAR CLOSETS

Do not hoard a closet full of things you think you may possibly use some time. They attract moths and hold dust and make it hard to keep the closet airy and sweet smelling. Those things will not grow more valuable but rather more out of style. If you cannot use them now, it is likely you will care less for them as time goes by. Another consideration is that there are poor people, who have been out of work, whom you could make more comfortable with some of those outgrown or slightly worn clothes. Thriftiness could make them over for large broods of needy youngsters. There are probably enough garments hanging unused in the closets of the well-to-do to clothe in comfort all the poor. Ready-made clothing is so inexpensive to-day that it is folly to hoard cast-offs on the presumption that you may use them some time.

COMFY NIGHTS

Night, the time for recuperation and renewal of vigor for the next day's enterprises, falls of this when one tosses and turns with indigestion through long "nights devoid of ease." To sleep well, one must have a comfortable stomach. This means eating a light supper and your heaviest meal in the morning or at noon.

At evening time, one feels worn and craves something special to tone her up. She thinks it is food, but it is not. A light meal with rest or play afterwards, will turn the trick. After a night of discomfort and wakefulness caused by indigestion, the next day will look gloomy enough and one is certain to be very inefficient. Put the dimmers on your appetite at evening time if you would make your days happy and full of achievement.

FOOT AILMENT

Many adults have a foot disease, caused by a vegetable parasite which flourishes on the floor of public dressing places, shower boards and mats, bath tub, bathroom and bedrooms. The malady is rarely serious, but is annoying. After one believes the disease is cured, it may break out again, as the fungus will lie dormant in the skin for a long time. One may be rid of this pest by the persistent use of a strong disinfectant ointment rubbed into the soles at night. Tourists would do well to slip on bedroom slippers before stepping on hotel floors, and to spread a newspaper on the floor of the shower bath.

EGG SALAD

Add chopped nuts to chopped hard-boiled eggs, pile on crisp lettuce leaves and cover with mayonnaise.

MRS. SOLOMON SAYS:

Neighborly love is the sauce which makes delicious the dry bread of everyday living.

Lady Luck

Luck is your own making. Luck means rising at six in the morning, living on one dollar a day if you make two, minding your own business, and not meddling with other people's. Luck means the hardships, privations which you have not hesitated to endure; the long nights you have devoted to work. Luck means the appointments you have never failed to catch. Luck means trusting in God and your own resources—a religion whose motto is: "Help yourself, and Heaven will help you." Luck comes to them who help themselves and know how to wait.—Max O'Rell.

My son, if sinners notice thee can send thee not.

DE FOREST CROSELEY

THE ARIA, \$189.50, with tubes
THE ARIA. Introducing new standards of efficiency and value in every phase of radio performance — the Aria brings the true depth and brilliance of full harmonic amplification to radio for the first time. The perfect harmony of a matched burl walnut escutcheon panel, with wing panels brilliant with cross fire, and a lacewood base give distinctive individuality to the cabinet of original De Forest Crosley design. Eight-tube Standard Harmonic Screen Grid Chassis.

THE TROUBADOR. Incorporating new De Forest Crosley developments in phonograph engineering added to the Harmonic Series Eight Tube Screen Grid Chassis the Troubador brings to both types of reproduction all the glorious character of new harmonic reproduction. The cabinet reflects perfectly moulded lines of modern motif—with all the beauty of a new natural soft lustre finish—deep warmth of color in a matched burl escutcheon panel—and brilliant cross fired walnut side panels. The tone quality and aristocratic dignity of the Troubador is instantly appreciated.

THE TROUBADOR, \$278.00

On Demonstration at
J. W. Lefebvre, Agent, Lachute

SIMONDS "RED STREAK" HACK SAWS

Special notice is hereby given by the undersigned Albini Lamarche, Sec.-Treas. that I will be in Brownsburg Club House, Saturday, the 4th day of October from 10 a.m. to 8 p.m. for the collection of Municipal taxes.

Province of Quebec, Municipality of the Township of Chatham.

Special notice is hereby given by the undersigned Albini Lamarche, Sec.-Treas. that I will be in Brownsburg Club House, Saturday, the 4th day of October from 10 a.m. to 8 p.m. for the collection of Municipal taxes.

A. LAMARCHE, Sec.-Treas.
 DE. W. M. HOOPER,
 Dental Surgeon
 Office in the McPaul Bldg.
 Main Street, Phone 289.

Right in the Town of Lachute

Lachute has learned to stand on her own feet, in many lines, particularly in the building sphere, so why consult outside firms for information and estimates? Now—no building is too large or too artistic for Alcidas Laurin to erect, and specifications may be obtained upon application.

ALCIDAS LAURIN

Fall Shoes

For Men, Women and Children, extra special in footwear for school. All supplies in haberdashery; hats, caps, shirts, collars, ties, etc. Fine assortment of hosiery, club bags and trunks. Men's and Boys' suits made to order. Dr. Scholl's Foot Comfort Service.

W. G. STANFORTH,
 Phone 65, Main Street

Automobile Body Repairs

To everybody who knows something about auto body work. Why send your body work, trimmings and roofings to the garage when you can get a better job for less money. Special equipment and workmanship. Ten years' experience in the best body work shop in Montreal. If you have any work to be done on your car call for our special price. Everyone knows that our experience in new springs and repair work has always given satisfaction for the past 10 years.

For your order Phone 306 at
TRUDEL & GUAY

WANT ADS

PRESSING — CLEANING
 Suits and dresses pressed and cleaned on Shortest notice. Prices reasonable. All orders called for & delivered. Lachute Valet Service, 98 Grace St., Lachute.

GIRL WANTED. Experienced in selling, to work in dry goods store. One speaking both languages preferred. Apply Assaly Store, on Main St., Lachute.

FOR SALE. Farm, consisting of about twenty-five acres in the third Range of Grenville, with 50 apple trees, some plum trees and other small fruit trees; house and barn; well suited for poultry raising; price reasonable. For further particulars apply to Mrs. Robt. Hamilton, Proprietor, % D. M. Rowat, N. P., 360 St. James St., Montreal.

FOR SALE. Registered Hackney mare, three and a half years old. Completely sound. Apply to Dr. A. Lavigne, Lachute, Que.

NURSING. Those requiring the services of competent nurse in maternity nursing may call upon Mrs. Amon Hodge, Lachute, R. R. 6.

HEATED FLAT TO LET. Modern heated flat, corner Bethany and Foundry Streets. Apply Mrs. A. Perrault.

FOR SALE. A Nickel trimmed cooking stove, in good condition. Bargain to quick buyer. Apply Mrs. Marchand, Bethany St., Lachute or the Watchman Office. Phone 27. O-17-3 p.

FOUND. On Monday last, September 27th, 1930, a Ford Wire Wheel and Tire for Ford Truck. Owner can have same by paying for this advertisement and trouble. E. McGibbon, Phone 56 r-2, Lachute Mills.

Henry Prevost's Lunch Rooms is now open. You will get a good meal for 50c. if you come to see me on Foundry St., opposite the C. P. R. Station. O-17-4 c.

CHURCH NOTES

BAPTIST CHURCH SERVICES
 Rev. A. Penman, Pastor.
 Lachute 11.00 a.m., Standard Time
 Brownsburg 3 p.m., Standard Time
 Dalesville 7.30 p.m., Standard Time.

Anglican Church Services will be held (D.V.) as follows.—St. Simeon's Church, Lachute, every Sunday at 11 a.m., also the first, third and fifth Sundays of the month at 7 p.m.
 St. George's Church, Brownsburg, at 7 p.m. on the second and fourth Sundays of the month, and at 3 p.m. on the first, third and fifth Sunday.

LACHUTE PRESBYTERIAN CHURCH
 Rev. H. Cousens, B.A., B.D.
 Sunday School 10 a.m.
 Morning Worship 11 a.m.
 Evening Worship 7 p.m.
 Brownsburg Worship 3 p.m.

LACHUTE UNITED CHURCH
 Rev. W. B. Rosborough, B.A., B.D.
 Sunday School 10 a.m.
 11 a.m., Morning Worship. Subject: "Holding Forth The Word Of Life."
 7 p.m., Evening Service. Subject: "Judging Others."
 Is it ever right for a Christian to pass judgment upon the life and character of another, and if so, what principles should be followed when one presumes to pass the words or deeds of another under review?
 2.30 p.m., Service at East Settlement.
 A Cordial Welcome to All!

BROWNSBURG UNITED CHURCH
 Rev. A. E. Hagar, B. A.
 October 5th, 1930
 10 a.m. Sunday School.
 Service 11 a.m., Holy Communion.
 Friday evening, October 2nd., Preparatory Service.
 Saturday, 2 p.m., October 4th. Sunbeam Mission Band in the Church.
 Everyone cordially invited.

MAPLE AVE. BAPTIST CHURCH
 Brownsburg
 Student Pastor, John E. Walther, B.A.
 The Pastor will preach his farewell sermons this coming Sunday, October 5th., as he is leaving to continue his studies at McMaster University.
 Sunday School 10 a.m.
 Morning Worship 11 a.m., Communion Service. Subject: "Dwelling at the Upper Springs."
 Evening Worship 7 p.m., Subject: "Shouting."
 Friday evening, Oct. 3rd., at 7 p.m. Ladies' Aid.
 B. Y. P. U. and Prayer Meeting every week.
 On Sunday, Oct. 12th., Rev. C. J. Cameron, of Toronto, will be the special speaker.
 These services are open to all. Come and worship God with us.

CUSHING
 Mrs. W. Canning spent Thursday in Montreal.
 Rev. J. W. McLean was in Montreal on Wednesday and Thursday of last week.
 The Misses Fairy and Viola Innes were in Montreal on Wednesday of last week.

Mrs. J. Canning returned from a few day's visit in Ottawa on Monday of last week.
 Miss R. Dobbie and Mr. R. Dobbie visited friends in town on Wednesday of last week.

Capt. and Mrs. J. D. Weir and family of St. Anne de Bellevue, spent the week-end in Cushing.
 Mr. Grant Bryerton, of Verdun, was the guest of his brother, Mr. E. Bryerton during the past week.

Mr. Geo. Bradford, of Chute au Blondeau, was the guest of his son Mr. John Bradford on Monday.
 Mr. and Mrs. Jas. Catton, of Lachute, were guests of Mr. and Mrs. A. Graham on Wednesday of last week.

Miss Ruth Dobbie spent the week-end and part of this week at the home of Miss Helen McNaughton, of Lachute.

Mr. and Mrs. Arthur Weir, of Ottawa, were week-end guests of Mrs. T. Weir Sr. also Mr. Gordon McAllister of Hawkesbury.

Mrs. F. Douglass and daughter Mildred left on Tuesday of last week for Montreal, after spending a few days with her brother, Mr. B. Noyes.

Mr. and Mrs. Arthur Mullen and Miss Stafford of Hudson, were guests of Mr. and Mrs. Jno. Douglas on Tuesday.

Sunday guests at the home of Mr. and Mrs. W. Canning were Mrs. A. Fraser, Miss Grace Fraser and Mr. Donald Fraser, also Mr. Leslie Cook, of Ottawa.

The Misses Ivy and Elsie Graham of Montreal, spent the week-end with their parents. Mr. and Mrs. D. W. Candlish, of Montreal, were also Sunday guests.

Mrs. Henry Smith, of Brooklyn, U. S., who has been spending the past week with Mrs. O. E. Leroy is with her sister Mrs. W. J. Burke, of Centerville, this week. Mrs. Smith expects to leave for home the end of this week.

ST. ANDREWS EAST.

We regret to report that Mr. E. Larmouth is now very ill.
 The W. A. met at the home of Mrs. Victor Willett last Thursday.
 Mrs. Kate Chisholm, of Montreal, spent last week-end in St. Andrews.
 A valuable cow, belonging to Mr. Even Albright has been struck and killed by the oil-burner train.

The teachers of our Consolidated School attended the Teachers' Convention at Lachute on Tuesday.

The Rev. Mr. Williamson, of Point Fortune, is to take the evening services in the United Church here.

The United Church Congregational Social next Tuesday will be in charge of Mrs. B. McClintock and committee.
 Mr. John Patton and his sister, Mrs. McCaffrey, of New York, spent a few days with Mrs. Florence Patton.

The two Misses Ross, of Kingston, and Mr. Charlie Kains, of Greece's Point, made a call on Mrs. C. T. Wales on Friday.

Mr. Billingham and family have moved to Mr. McGibbon's farm on Beech Ridge, and Mr. Billingham is taking charge of it.

Miss Alberta Cleland during the past week has been making sketches of some of the beautiful North River views at St. Andrews.

Mr. and Mrs. Roswell Brown have moved to Lachute. They have not gone far, but we are sorry to lose them from this community.

Mr. and Mrs. F. G. Daddmun and Mr. and Mrs. Thomas Lockhead, of Montreal West, and Mrs. Wm. Andrews, of East Angus, were guests of Mr. and Mrs. Charman during the week.

The good people of St. Andrews were well entertained at the Concert, in the Town Hall, Saturday evening (the 20th.). The audience was large and very appreciative, the music being of an exceptionally high order. The singing continued for nearly two hours — and no one seemed weary. The Kollmars, besides playing beautifully both the ordinary and the Hawaiian guitar, told some very funny stories to enliven the meeting. The community is under obligation to Mr. Herbert W. Flower of Montreal, for arranging this delightful entertainment, and to all of the company who took part.

GRENVILLE.

Mrs. Thomas Welden, of Montreal, is spending a few days at his brother's, Mr. Lorne Cooke's home.

We are very sorry to hear of the sad accident which befell Henry Stewart, when he broke his leg for the second time.

Rev. Mr. and Mrs. J. Irving and children were guests of Mr. and Mrs. John Stewart on Friday.

Mrs. A. V. Gaudry visited friends at Calumet on Sunday and Monday.
 Mr. Lorne Cooke, of Pogan Falls, spent the week-end at his home.

Mrs. Doree and three daughters are spending a few weeks with her father, in Ontario.
 Mr. Wesley Dodd, of Gatineau Pk., spent Saturday with his children at Mr. and Mrs. Picketts.

The Ladies' Aid of St. Giles' Presbyterian Church met at the home of Mrs. Lorne Cooke on September 24. After business was attended to, a very pleasant afternoon was spent. The next meeting will be held at the home of Mrs. William Davidson.

An Opportunity for Farm Boys

Scholarships Available for Course in Agriculture.

Farm boys need more information than they possess if they are to compete with those in other types of enterprise. They ought to read and study as well as practice. Work alone will not suffice.

Spend the winter at MacDonald College studying crop rotation, soils and fertilizers, fruit and vegetable growing, live stock, poultry, engineering and economics, plant and animal diseases and pests, and other fundamentals of profitable farming.

A number of scholarships of \$75.00 to \$100.00 each (together with allowance on board from Quebec Government for Quebec boys), are available & will be awarded to boys with best credentials and who need such help.

Now is the time to make your plans for taking the course this winter which opens Nov. 1st. and closes March 31st.

Write for booklet and full particulars of courses and scholarships.

"SALADA" GREEN TEA

'Fresh from the gardens'

APRIL ESCAPADE

By KATHLEEN NORRIS

SYNOPSIS

The O'Hara family, poor but happy, is supported by Martin and Mary Kate, the two oldest children. Martin, who is studying medicine at night, gets a chance to go to Germany with Dr. Anstern, but turns it down because of the family. Mary Kate, who wants him to take the opportunity because it will mean a great deal to him, tries to plan some way to get the money which will enable Martin to go.

Mary Kate and a young chap, Cass Keating, are in love and plan to be married as soon as possible. They tell Mrs. O'Hara of their engagement, and the older woman shows disapproval.

CHAPTER VII.—(Cont'd.)

"Cass isn't poor!" "I'm not talking of Casimir Keating," Mrs. O'Hara said impatiently. "I don't know why you aren't then, Mother!"

Instead of answering, the older woman began a sort of monologue, in a dreaming, sing-song voice.

"There's no love in the world—there's no happiness in the world—can get the best of poverty and sickness. The cold shuts down as if it was a hood placed between you and the very eye of God, and you creepin' under it wonderin' will you ever stand up straight under the blue skies and feel the summer wind blowing over you again. Maybe the two children you have are croopy, that you wouldn't dare leave without you'd have a neighbor's child watchin' them, and the third one under your heart, and weighin' you down every step you take to market."

"How's your husband this mornin', Mrs. O'Hara?" "Well, it's still at home in bed he is, God help the poor soul, he feels the strength of a great weakness that's be upon him, and will get back to work before Monday we don't know at all. And the both of the little ones is very allin' the mornin'." She paused, her face working.

"Well, heavens, Mother, every family has those down times!"

"Many's the day I'd go into church—" The older woman was merely thinking aloud; her fine eyes were fixed upon far space. She still held her widow's bonnet with its dangling veil in her hand. "Many's the day I'd kneel in the old Saint Elizabeth's," she remembered. "And you and Mart climbin' in and out of the pew, and droppin' my purse all over the floor, and there I'd kneel, thinkin' of the little nuns—safe at home in Ireland—" She paused again, shook her head.

"You have to have a vocation, to be a nun!" Mary Kate said unsympathetically.

"And you ought to have a bank account to get married," her mother capped it.

"Why don't you like Cass?" the girl demanded, on a new tack.

"Cass?" her mother asked dreamily. "Oh, Mother, don't go off into a coma, like that! Cass Keating, that I'm engaged to!"

The fine, piercing eye pivoted about; Mrs. O'Hara looked through the fibers of her daughter's very being.

"Since when?" she demanded blankly.

"You make me crazy!" Mary Kate gritted, through set teeth. She looked into space; spoke levelly.

"Well, upon my word this is the

first I've heard of that!" the older woman said freshly.

"Perhaps you want the fire department to come and tell you," the girl suggested sullenly.

"I have no objections to the young man at all, but as for you marryin' him, there'll be no talk of that until he's able to offer you something more than dishes and dainties!" Mrs. O'Hara summarized it firmly.

"Good night!" the daughter said abruptly, from the doorway.

Mrs. O'Hara made no sign, and the girl watched her for a moment irresolute. Then, apparently changing her mind about leaving the kitchen, Mary Kate walked across to one of the windows down which soft rain was still twisting and shining in the black night outside. Her mother sat on, at the table, the dingy bonnet with its dangling veil still balanced on one big hand. Her tired kind eyes were absent, filled with dreams.

The kitchen was lighted by but one light, a green-shaded lamp on the table. It was very warm. Bubbles died away in the half-finished glasses of ginger ale; rain beat gently on the roof.

There was a long silence. Then Martin came in, spattered with rain, tired and disheveled and dirty, his eyes deep in shadowy circles.

Mary Kate went to the pantry, cut him a great double slice of bread, and buttered it lavishly, placing it before him. She also placed on the table a soup-plate of honey in which crumbs and bits of butter were lodged.

"Tea, Mart?"

"Oh, Lord, no! This is grand." His eyes went alertly from his sister's flushed, troubled face to his mother's sphinxlike one. "Didn't you go to the dance, Mary Kate?"

"If you'd seen what I saw, when I come back from the pitchers with the girls—" Mrs. O'Hara began, in a high, emotionless voice.

"Petting?" Mart surmised, with a bright, amused look for his sister.

"And kissin', and talk of marryin'," the mother completed it sternly.

"Marryin'!" Mart echoed, thunderstruck. He looked amazement at Mary Kate. "Cass Keating, hey?" he asked.

"Mother," Mary Kate said bitterly, "all but threw him out of the kitchen! I never saw anything like it! What he'll think we are is more than I'll ever know."

"It's the greatest nonsense ever was in it, and you nineteen," the older woman persisted sternly.

Martin's look moved through pus-

element to amusement, and finally became businesslike.

"What have you got against him, Ma?"

"Nothing, because nobody could have!" Mary Kate interpolated passionately.

"He wouldn't have to be a murderer for me not to want him to run off with Mary Kate," Teresa O'Hara said with dignity.

"Well, don't worry," the girl said, acidly, "for he'll never come back to this house!"

"The roof'll stay on," her mother predicted calmly.

Martin looked uneasily at his sister, who had seated herself at the end of the table opposite him. She had planted her bare elbows on the dark red oilcloth, her chin was, in her hands, her expression was angry. But down her cheeks the swift unwelcome tears were beginning to roll. Mr. O'Hara, cast one glance at her, raised her chin, continued her stony contemplation of distant spheres.

"Maybe Mother's right," Martin began craftily.

"That's right, sk!" against me!" his sister said hotly.

The boy leaned back in his chair; her hard eyes met his. Only for the fraction of a second their looks crossed then Mary Kate continued her interrupted staring into space. But her tears were dried by magic.

"Now you hear your brother!" Mrs. O'Hara said, gratified.

"Here's what I think, Ma," Martin said, gulping down flat ginger ale, "Mary Kate'd be a fool to marry a fellow like Cass Keating."

"Well, now you see," his mother said nodding, with a shrewd triumphant glance for the girl.

"Even if he was in love with her—" Martin pursued.

Mary Kate was regarding him with a placidity that secretly surprised her mother. But then the child had always taken everything from Mart!

"A fellow like that doesn't know his own mind," Mart added.

"Well, now you see!" Mrs. O'Hara put in a kindly, triumphant aside for Mary Kate.

"He'd break her heart," the boy continued.

"He would, Mart. He would that!"

"What do you like about him, Mary Kate?"

Mary Kate deigned no reply. She was sitting at the end of the kitchen table her elbows on the red oilcloth, her chin cupped in her palms. She cast a glance of bored, magnificent disdain at her interlocutors.

"I like him," Mart confessed cordially, "taking an enormous mouthful of bread and honey. 'But not for Mary Kate.'"

"Well!" Mrs. O'Hara said, in satisfaction.

"Settle it between you," Mary Kate urged them. And her look at her brother was a little puzzled, and a little reproachful.

"He's making good, he's going to be rich," Mart went on, with enthusiasm, "and it'd be a constant reproach to her that we'd hold him down."

His mother's complacent, dreaming expression suddenly altered; a slightly disturbed expression clouded her fine eyes.

"How would we hold him down, Mart?"

"Well, a man doesn't marry his wife's family, Mother."

"How do you mean he doesn't marry his wife's family? Who wants him to marry his wife's family?"

"I mean that what with the children to raise and educate, and me with years of schooling ahead—and Tom to settle in something—"

Mrs. O'Hara's eyes came about at

"THRILLING" . . . 25 YEARS AGO!

When the unsophisticated "buggy-ride" was providing transportation thrills a quarter of a century ago, men were getting their first real smoke thrill from Wilson's Bachelor—100% Havana filler—cigar. Buggy-rides are now a thing of the past but, today, foil wrapped to preserve freshness, Wilson's Bachelor is smoked more extensively and better liked than any other ten cent cigar.

her son with a flash of white, like a horse's eye.

"You mean I'd settle down and be a bur'n on him, is that it?" she demanded mildly—too mildly.

"Oh, not a burden, exactly," Martin apologized politely, perfunctorily.

There was another silence, during which Mary Kate, her eyes deep in thought, her mouth occasionally twitching slightly, looked straight ahead of her, and Mrs. O'Hara mixed a cereal in a blue saucer-pan. (To be continued.)

"Why does that pitcher make all those funny motions before he throws the ball?"

"Wants to impress the manager of the club with the fact that he is earning his salary."

Inhale Minard's Liniment for Asthma.

To-day

Lay down your pen, and set aside your book—

Time will come soon enough for those. Now music sways the brook. Youth hints the rose.

Now winds pipe merrily on ready reeds.

And silvered crystal cups the skies; Pale lilies tell their beads To dragonflies.

The sun is sweet and heady with content. And idles through a shadowed way— Leave books to time unspent. Give me to-day!

—Susan Maitland, in the New York Evening Post.

There's practically nothing left for Admiral Byrd to hunt for now, unless he drops a collar button.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

WHO would let their hair go this way?

Your pride prompts you to keep your hair well groomed . . . then for the same reason smarten your dull, unpolished shoes regularly with a glossy "Nugget" shine—waterproofs the shoes as it polishes.

"NUGGET" SHOE POLISH

The NUGGET TIN opens with a twist!

FLAVOR

Full of long lasting delicious flavor and made of pure chicle and other ingredients of the highest quality

WRIGLEYS

comes to you in perfect condition. All of its goodness is sealed tight in the clean wax wrapped packages.

The days work goes much easier with WRIGLEYS to sustain and refresh.

Homesickness—And a Cure!

It's your mother, Mary!" exclaimed Hazel Wright, Mary's room mate in the college dormitory.

"Mother!" cried Mary Strong who had thrown herself on the bed in a fit of homesickness.

As she poured out her heart to her mother and from the very sound of her parent's voice gathered strength to overcome that homesickness which only those who have experienced it can appreciate, Hazel Wright wondered how anyone could do without a telephone even as she herself expressed it "if it took the last cent."

Distance makes no difference and the cost nowadays for out-of-town calls is surprisingly low.

Fingerprints Used by Chinese For Signatures in 400 A.D.

London.—The British Museum has placed on exhibition part of a remarkable collection of Chinese manuscripts which were found in an almost forgotten spot in Kansu China after having been walled up for nine centuries. The manuscripts which were brought to England by Sir Aurel Stein, cover 600 years, the earliest dating from about 400 and the latest 100 A.D.

The manuscripts indicate a high degree of commercial development, many relating to contracts for the purchase or exchange of goods and for the lending of money on interest. There is a phonetic dictionary of the Chinese language in the form of a roll 34 feet long, dating from the ninth century.

Mutual benefit societies were prominent among the Chinese in the ninth century, as they are to-day. One manuscript is a circular issued by the

officers of such a society calling on the members to bring in their contributions of wheat and millet. Fines were levied for failure to pay and for unpunctuality.

Among the uneducated classes signatures of principals and witnesses was by fingerprints, and in some cases entire families signed as witnesses of documents. From the eleventh century comes a "Polite Letter Writer," one letter being a delicately phrased model of the first epistle to be written by a newly married wife to her husband's parents.

Another manuscript details a debate between tea and wine concerning their respective merits. After each has praised its own alleged virtues, water brings the argument to an end by showing that it is a great deal more important than either.—Taken from "The Christian Science Monitor."

Non-Athletes Are The Best Scholars?

Investigation at American School Shows 54 of 102 Seniors Find Study a Burden

New York.—The results of two investigations, made public recently by members of the public educational staff, show that high school pupils engaged in athletic extra-curricular activities attain poorer scholarship than those active in non-athletic affairs and that many seniors dislike school on account of home-work assignments.

The first survey, undertaken by Herman Schulman in the Evander Childs High School, New York, led to the conclusion that extra-curricular activities in general caused little deterioration of scholastic work but that the "scholarship of the non-athletic extra-curricular group appears to be slightly higher than that of the athletic group."

The latter conclusion was based on a table showing that the athletic group had an average per capita failure of about half of one subject and that the other group had a corresponding failure average of only 25 per cent. of a subject per pupil.

The intelligence quotients of the two groups were found also to point to higher attainments on the part of the non-athletic group. The latter, having a mean intelligence quotient of 112, were superior to the athletically minded by three points.

Non-Athletes Better Scholars

"The scholarship of the two groups seems to be dependent upon the I. Q.," Mr. Schulman said. "For example, the I. Q. of the non-athletic extra-curricular group is three points higher than that of the athletes. The average scholarship of the former is higher than that of the latter and the subject failure per pupil is lower for the non-athletic extra-curricular group. Thus the success of the non-athletic extra-curricular group is superior throughout and correlates synchronously with their three points of superiority in the I. Q."

It was pointed out, however, that the athletes, as well as the students engaged in academic activities beyond regular school hours were superior to the average student. For example, the athletes rated three points higher in the I. Q. test than the general student body. The failures in both extra-curricular groups were lower than the average for the whole school.

The average marks prior to and during term of activity of the two groups were compared as follows:

Athletic group, average mark prior to term of activity 72.00%, average mark, term of activity 69.00%; Non-athletic extra-curricular students average mark, prior to term of activity, 74.46%, average mark, term of activity, 73.15%.

From these and other compilations the investigator concluded that extra-curricular affairs "exert practically no detrimental effect upon the scholarship of the students involved," but that neither did "the activity seem to exert a beneficial effect upon either group," and that, finally, scholarship seemed to be independent of extra-curricular activity, being more closely correlated with the intelligence quotients.

Girl's School Surveyed

The other investigation was made at the Girls' Commercial High School in Brooklyn, New York, by Ralph B. Guinness, who reported to the Bulletin of High Points, published by the Board of Education every month. The bulletin also printed Mr. Schulman's study.

Of the students interviewed, in three senior classes fifty-four said they did not like school and forty-eight that they did. Of the former, twenty-five gave homework as the reason, twelve reported school "not interesting," one saw "no future use" for schooling, and eight gave no reason for their attitude. Those who enjoyed school gave the following reasons:

Friendship—5 students; advantages—4; better than business—5; interesting—4; No reason—28.

From the replies of those who gave no ground for their answer, it is apparently much more difficult to explain a favorable than an unfavorable attitude toward the educational institution.

Fault was found with homework as

signments mainly because they were too long. A curious medley of replies was obtained to a question on the best-liked subject. The answers were scattered, "indicating perhaps that most didn't like any subject or were doubtful," but the largest number, 12 students, reported accounting as the best subject, 6 liked English, 3 economics, 2 stenography, 2 music appreciation, 2 Spanish and 2 science. History was not even mentioned.

Only 16 of the girls enjoyed "outside" reading, 52 "found it a burden, 4 had no time for it, 9 couldn't easily find readings, and 10 found the reading assignments too long."

"When lovers exchange glances it's an even exchange."

Your City and Mine

Night lights, white lights, Lights neatly spaced in a row, Red lights, green lights, Lights spelling words as they go.

Wall lights, tall lights, Lights fairly chuckling with glee; Great lights, wee lights, Lights playing "peek" through a tree. There are lights overhead; There are lights underfoot; There are lights in the midst of the street.

These lights seem to fly; Those slowly creep by; This glides a wide path to my feet.

Circled gay lights towered mass

With lights in long serpentine rows; Swing-car lights shooting star lights Shower sparks in a cascade that flows.

Street lights, house lights, Lights that are friendly and true. Frosted lights, latticed lights, Lights in the window for you.

Head lights, tail lights In sequence bob merrily by. Flash lights, search lights With eager eyes scanning the sky.

Far lights that gleam, Near lights that stream, You amber lights distant and cold Sound long rays aquiver Across the calm river, Like organ pipes wrought in pure gold.

Royal road lights, loyal load lights, Brave lights through the darkness that shine!

Needful night lights, blessed bright lights; The lights of your city and mine.

—Anne Weeks.

CHERRY PITS YIELD UP ROUGE AND SALAD OILS

The U.S. Department of Agriculture recommending obtaining oil from cherry pits for making cosmetics and other pharmaceutical preparations. The statement says that the oil from cherry pits is similar to that of almond, apricot and peach kernels and that it should prove useful as a salad oil, as well as in the manufacture of commercial products.

Limited quantities have been used and have given good results, C. S. Jamieson and S. I. Hertler of the U.S. Bureau of Chemistry and Soils, report.

Marjorie (at dance): "I don't understand why you stayed outside so long with such a splendid dancer as Jack." Betty: "He showed me some new steps—and we sat on them."

"ADAMSON'S ADVENTURES"

The Early Bird Gets a Banquet.

Three Dawns Ago

Three dawns ago I heard a lark,
But cannot find the place again
From which he rose, I did not mark
Him save by pleasure and by pain.
He made the world be reverent
By his rich rapture of ascent,
He filled and thrilled the bright, the dim,
To his serene self a thrill,
Glad, not that all looked up to him,
But glad that he looked out on all.
I cannot find the place again,
I did not mark it with my eye
But by my pleasure and my pain—
Pleasure, because the song was glad;
Pain, for it breathed of English sky
And English earth, and left me sad.
I felt that sky, that earth belong
To me, and lost them with the song.
—Storrs Nicholas, in the Sydney Bulletin.

Wanted—"Flown Covers"

The latest collecting craze is for "flown covers"—in other words, envelopes which have been carried by air mail.

Special air-mail stamps are issued by a number of countries, and many youngsters collect them; but "flown covers" are mainly a specialty of the adult collectors.

Those in greatest demand are the covers carried by a famous pilot, on a flight that has made air history. In some cases such covers were signed by the pilot, a fact which increases the value. Naturally, too, the fewer the number of letters carried on a flight of this kind, the greater the value of each of the "flown covers."

Among the covers that can be bought are those of the first air mail from London to Windsor in 1911; and those carried by Sir Alan Cobham, Colonel Lindbergh, Mr. Bert Hinkler, and others on famous flights.

Goodwill

Nothing cements and establishes friendship and goodwill so much as confident communication of concerns and affairs.—Locke.

Gold: "I want a mirror." Silver: "A hand-mirror?" "No; one for my face."

Canada's Car Industry Shows Huge Increase

Canada is now one of the leading exporters of motor cars among the commercial nations of the world her exports being, in fact, exceeded only by those of the United States. In the last fiscal year, Canada shipped automobiles to over 50 different countries and automobile tire casings to almost as many. The Canadian industry has made rapid growth in recent years, though there have been fluctuations owing to special conditions. Production in the present year has shown a downward trend, but the calendar year 1929 saw a new record established. The fiscal year 1929 also witnessed the highest export of cars in the history of the Canadian industry.

Production of automobiles in Canada in 1929 started at a higher rate than in previous years, with a total of 21,000 cars in January. It then rose rapidly to a new monthly output record of 49,821 cars in March, but this was in turn surpassed in April, when the greatest monthly output in the history of the industry was reached with 41,901 cars. May marked the first recession from the rapid rise, and output then declined steadily each month, with the exception of October, to the lowest level of the year, and the second lowest monthly total of recent years at 5,495 cars in December. Production for the year was 263,295 cars. This was 3 per cent. greater than the previous record of 242,054 cars attained in 1928, and 29 per cent. over the record of 204,727 cars in 1926, which was the third best year for the industry.

Consecrating a Friend

Deliberate long before thou consecrate a friend; and when thy impartial judgment concludes him worthy of thy bosom, receive him joyfully and entertain him wisely; impart thy secrets boldly, and mingle thy thoughts with his; he is thy very self; and use him so: if thou firmly believe him faithful, thou makest him so.—Quarles.

The only time a horse gets frightened on the road nowadays is when he meets another horse.

She Was Only . . .

She was only a baker's daughter, but she did need the dough.

She was only an orchestra leader's daughter, but she beat the band.

She was only a confectioner's daughter, but she took the cake.

She was only an artist's daughter, but she put the paint on thick.

She was only a parson's daughter, but she had a fine collection.

She was only the colonel's daughter, but oh, how she attracted the knutts!

She was only a fisherman's daughter, but she had a permanent wave.

She was only a distiller's daughter, but she was full of good spirits.

She was only a farmer's daughter, but she made hay while the sun shone.

She was only an author's daughter, but she always did right.

She was only a photographer's daughter, but she was so positive.

She was only a tinker's daughter, but oh, she was so potty!

She was only a golfer's daughter, but she was so green.

She was only a banker's daughter, but she would dress in checks.

She was only the policeman's daughter, but she was hard to beat.

She was only a dustman's daughter, but she was not so dusty.

She was only a glazier's daughter, and oh, so transparent!

She was only a greengrocer's daughter, and the apple of his eye.

She was only a milkman's daughter, but the cream of all the crowd.

She was only a printer's daughter, but very true to type.

She was only an airman's daughter, but she was very fly.

That's all!

—Peter Cavan, in "Answers."

What is the League of Nations and its Purpose?

The League of Nations is an association of Countries (54 in all, in January 1930), pledged by treaty to work together "to promote international co-operation, and to achieve international peace and security."

The Future

The only way to forecast the future is to build the character and do the thing to-day which will shape it.

A Bloodless Revolution

Peruvian students at Lima, thoroughly entering into spirit of recent bloodless revolution, drag around a mutilated bust of ex-president just to show what they think about it.

Why Modern Life Is Worth Living

Noted Novelist Declares Work Is Chief Zest in Life

Life is more interesting to-day than ever before within living memory.

There are more kinds of pleasure. The things that give zest to life, however, are somewhat different from those which made it worth living in our grandparents' time.

The comforts of religion are dependent upon less, the joys of work more.

So Florence Finch Kelly, novelist and critic, has discovered through an informal questionnaire with which she has been plying her friends and acquaintances for several years. In presenting the fruits of this symposium in the August North American Review Mrs. Kelly recalls that half a century ago the English philosopher, W. H. Mallock, wrote a book entitled "Is Life Worth Living?" and answered the question in the negative. She continues:

"All the English-reading world was a bit shaken and aghast, its spokesmen inclined to deprecate such an inquiry. Even on remote college campuses in this country young people read and discussed the book, and felt satisfyingly audacious. And newspapers chronicled an increased number of suicides."

"Then Punch sardonically remarked, 'It depends on the liver!' and all the English-reading world laughed and quickly forgot about its momentary doubt."

The key-note of any civilization, we are told, is in its attitude toward life. How does our own age feel about it? Mrs. Kelly has sought the answer in modern fashion by collecting and classifying many views based on actual experience, and drawing conclusions from them. Since her inquiries were confined to her own circle, mostly professional people, "the investigation does not afford a cross-section of life," she admits, "but its results do show certain definite and significant trends."

Taking first the answer given by the largest number of people, Mrs. Kelly says:

"If what these many persons said to me is a fair indication of modern human feeling, then more people get their chief satisfaction in life out of work than from other sources. Here are a few typical answers:

"Life would be decidedly dull for me," said one middle-aged man, "if I did not have the constant stimulus of the thousand and one demands that my work makes upon me every day, and so I suppose that, considering everything, it is my work that gives me the deepest, steadiest, and most dependable satisfaction."

"A good job that you are interested in, that calls out the best you have in you, and gives you an adequate material return," was another answer to my query."

Again:

"It's the love that makes life worth while for me," exclaimed a woman who has lived long enough to test many of its values. As long as there is anybody I can love and anybody to love me—husband, children, relatives, friends—I shall enjoy and cherish life, and want to keep right on living. But I shall want to die at once if the time ever comes when there isn't any one to love and be loved by."

A group engineer finds life worth living because of the beauty of the world, while a successful artist has settled down to the conviction that what gives life the most zest for him is the use of his muscles in outdoor sports.

"If all these many persons with whom I talked spoke truly about their reactions to life—and there is no reason to doubt the sincerity of any one of them—then, since they are all normal and representative individuals the people of this present time are getting out of life more pleasures and a greater variety of them; and so are finding life more interesting and worth while, than did those of any other time within living memory."

Lettuce Called Chief Aid To Beauty of Women

Paris.—Canadian and American women owe their beauty to lettuce, in the opinion of Mlle. Paulette Bernège, a dietician who has just completed a three months' tour of the North American continent.

"Vitamins are their chief concern," Mlle. Bernège said. "They drink a good deal of orange and tomato juice, which are great contributions to health and beauty."

But Mlle. Bernège thinks American women are under-nourished. It is her contention that a happy medium somewhere between the typical French and the typical American diet would be very nearly ideal.

"Starvation may prove temporarily helpful," she said. "But in the long run it will shorten life, rather than lengthen it."

Detraction

Those who propagate evil reports frequently invent them; and it is no breach of charity to suppose this to be always the case; because no man who spreads detraction would have scrupled to produce it; as he who should diffuse poison in a brook would scarce be acquitted of a malicious design, though he should allege that he reported it of another who is doing the same elsewhere.—Duke.

With the Prime Minister and three of his Ministers in Britain, there is little, if any, falling off in the pace which Mr. Bennett set for the departments of Government when he took office in record time, assembled Parliament in record time, put through a record volume of tariff changes and emergency unemployment relief and prorogued the House in the record period of fifteen days. The imprint of Mr. Bennett's decisiveness and energy has been communicated to his colleagues, a fact which is reflected in the conservatism of Civil Servants who can't recall a time since the war years, when departments hummed with activity as they have since August 7th.

Of the measures which arose out of the special session of parliament those affecting the tariff, either by direct alteration or through extension of authority in fixing valuations, awakened the greatest degree of public interest and public interest in their operation will continue to be of the most vital importance to the government. Thus far the records of the department of labor indicate that upwards of 10,000 employees have been added to the staffs of the industrial affected by tariff changes. In many instances only those required to reorganize plant equipment have yet been employed and his estimate is made in Government circles that before the turn of the year more than 40,000 men and women will have been provided with employment as a direct result of the changes in fiscal policy which Premier Bennett made effective during the fifteen-day session of Parliament which terminated on September 22. Before next March, when Mr. Bennett's first account of his stewardship is given the House, it is predicted that 50,000 will owe their employment to measures which he made effective last month. In addition the claim will be advanced on behalf of the Government that, had Mr. Bennett's remedies not been brought in, another 50,000 would have been forced out of employment under economic conditions which then obtained.

Thus far, if reports received by the Departments of Labor and of Trade and Commerce are to be accepted, the Government finds that manufacturers affected by tariff changes have remained by their pledge that no advantage would be taken of higher protection to increase prices to the consuming public. The Department of Labor has been specially charged to observe this feature of economic developments. The principle was clearly laid down that bigger markets and greater production should result in lower—not higher—prices to the consumer and in this manufacturers agreed. Many of them gave Mr. Bennett their undertaking in writing that such would be the result and already there are instances of lowered prices. There are none, as yet, of higher prices. A major interest, of course, centres in prices of agricultural implements. In the matter of tractors it will be some time before Canadian plants are capable of meeting the demand and until then the old rates of duty will apply.

The Department of Finance is already at work assembling general information respecting the complete revision of the tariff which Mr. Bennett has promised will be introduced at the regular session of parliament after the New Year. When the Prime Minister returns from Britain after the Imperial and Economic conferences he will at once put his energies into the general revision. It is possible, though not probable, that a new Minister of Finance will be inaugurated before Parliament meets again.

The fact is that the whole Bennett program of Canadian development is indissolubly interwoven with the fiscal policy of the Dominion and until that has been re-cut according to his convictions, Mr. Bennett must actually be the deciding factor in the fiscal department. Whether or not he carried the title of Minister of Finance he must direct that department, and in the meantime he is saving the country the emolument attaching to a portfolio.

CUSHING WEST

Mr. Kendrick Dorion, of Montreal, was a Sunday visitor at Mr. E. Wheelahan's.

Mr. E. Pinkerton is at present visiting his daughter Mrs. Jas. Harcourt at New Glasgow.

Mrs. Jas. Harcourt, of New Glasgow, spent the latter part of the week with her parents here.

Messrs. A. Power and J. McLay, of Montreal, were week-end guests of Mr. W. H. Robert, at Monalea.

Mrs. Chas. Bradbury, of Montreal, was a guest of her sister, Miss C. L. White at Mascot Lodge, the latter part of the week.

Guests of Mrs. C. L. Cooke during the past week included her cousin, Mrs. Gauley of Grenville, also Miss McPhee, of Avoca.

Mr. Neil McLean has secured a position with the Beaumont Power Co., and left to assume his duties the early part of the week.

Mr. E. and the Misses Mary and Katie Byrne motored to Lucerne on Sunday last and visited the beautiful grounds and buildings at Log Lodge.

The contract for grading and gravelling the Montie between Vachon's corner at Chabot and the Front Road has been given to Mr. Laurendeau and the work is progressing rapidly.

Miss Olive Hartley and Miss Doris Robertson spent the latter part of the week here. Mr. and Mrs. C. B. Cutten and Mr. and Mrs. Rogers also motored up from the city on Sunday and were guests at Mrs. Hartley's residence.

Rev. Mesdames Usher and McLean, accompanied by Messrs. O. Keatley and N. McLean motored to Montreal on Friday last, where the ladies attended the W. M. S. Conference held in the American Presbyterian Church.

Miss Muriel Cooke was in Montreal the latter part of the week for the Teachers' Convention and also attended the luncheon at Windsor Hall, given by the directors of the Junior Red Cross which was honored by the presence of Lady Willingdon.

ST. ANDREWS EAST

Miss Maggie Dewar is taking some holidays in Montreal.

Miss Jean Brown is visiting Miss Betty Flower, in Outremont.

Mrs. Hal. Leroy and two daughters are at Mrs. Alex. Leroy's.

Miss Maud Hopper, of Moncton, is visiting her sister, Mrs. E. Charman.

Mr. Jack Howell, of Montreal, was with his parents here over the week-end.

Misses Carrie and Minnie Hooker have been in Montreal for a few days.

The Rev. J. W. McLean, of Cushing, preached at the pre-communion service in the United Church on Friday last.

The Women's Guild held their meeting in the United Church Hall on Thursday.

Mr. and Mrs. Mock, of Montreal, and their son, spent the week-end in St. Andrews.

Miss Gertrude McQuat spent the week-end with her parents, Mr. and Mrs. Henry McQuat.

Mr. and Mrs. Arthur McGregor are now occupying an apartment over the Bank of Nova Scotia.

Mr. Wm. J. Rodger, of Lachute Road, came second in the "Merite Agricole" contest this year.

The Anglican Church was beautifully decorated with fruits and flowers for their Thanksgiving Service, Sept. 28th.

The three teachers the Misses Waldron, Clark and Leroy were attending the Teachers' Convention in Montreal on Oct. 2-4.

Mr. and Mrs. Hugh Robertson, who motored from British Columbia in nine days, is visiting his parents, Mr. and Mrs. Wm. Robertson.

The St. Andrews Reading Circle will hold a meeting, Monday evening (the 13th.) at home of Mr. W. Pitcairn. We hope all members will be present.

We regret to announce the death of Mrs. Anna Morrison, widow of the late Rev. Dr. D. W. Morrison, at the home of her daughter, Mrs. P. E. Corbett, Montreal, at the age of 82. She was a sister of Dr. B. N. Wales, of this place.

"Virginian" the classic cowboy picture will be shown in the Rex Theatre, on Friday and Saturday, after a two week's success in the Princess Theatre, Montreal.

BIRTH

MUIR.—At Lachute, Que., on Friday, October 3rd., to Mr. and Mrs. Ross Muir, a son.

DEATH

MacDONALD.—At Brownburg, Que., on Sunday, October 5th., Mrs. Jno. MacDonald, in her 86th. year.

CARD OF THANKS

The family of the late Mrs. John MacDonald wish to thank all friends and neighbors and the members of the Baptist Church for kindness and sympathy shown during their recent sad bereavement.

IN MEMORIAM

DE HERTEL.—In loving memory of my dear and only sister, Edith E. deHertel, who departed this life on October 11th., 1929. Always in our thoughts. Inserted by sister and brothers.

Mrs. A. Graham spent Friday and Saturday in Montreal and Monday in Hawkesbury. Mr. Allan Graham also spent Monday and Tuesday in Hawkesbury.

THANKSGIVING DAY AND ARMISTICE DAY WILL BE HELD ON NOV. 10

Following a Cabinet meeting it was announced that Thanksgiving Day this year will be on Monday November 10th. The usual proclamation declaring the date will appear in the next issue of the Canadian Gazette.

Here and There

As a nerve tonic more effective than anything conceived by medical skill, Canada's rocky highlands and glacial lakes were given first place by Sir William Osler, M.D., F.R.C.S., interviewed recently at Lake Louise where he resided after attending the annual convention of members of the British Medical Association held last month at Winnipeg.

A note of confidence and sincere optimism in the soundness of Canada's economic position at the present time and faith in her future development was sounded by E. W. Beatty, chairman and president of the Canadian Pacific Railway, at the banquet given recently at Saint John by the Board of Trade of that city in celebration of the first sailing of the Princess Helena, new C.P.R. coastal steamer, on the Saint John-Digby route. Mr. Beatty said he hoped to see a second boat run alongside the Princess Helena in the not distant future.

Determination of the Canadian Pacific Railway to maintain for Canada the pride of owning the largest, fastest and finest ocean liner on the Pacific and the company's foresight in providing for needs beyond those of the present in the realm of transportation were lauded at Vancouver recently, at a dinner held aboard the liner Empress of Japan, new 25,000-ton Pacific vessel. Hon. R. Randolph Bruce, LL-Governor of British Columbia, added his tribute to those of nine other speakers at the function.

Mrs. L. N. Calverley, wife of the famous British surgeon, was credited with taking the largest fish, other than salmon, to be caught in British Columbia waters this season, when she landed an 13 1/2 lb Rainbow trout from the sparkling waters of Shuswap Lake recently. She is a cousin of Lady Diana Duff Cooper who as Lady Diana Manners gained world-wide fame as the heroine of "The Miracle."

The Banff Highland Gathering of 1930 goes down not only as the greatest yet so far as events and entrants are concerned but also for attendances since more than 10,000 spectators were present. Eight events ran continuously and concurrently; athletic events were confined to Alberta and British Columbia; dancing events added Manitoba to the list, while the piping contests brought in the whole of Canada, Scotland, China and the State of Washington.

Marking the earliest opening of the apple shipping season from Halifax to Europe, over a week in advance of last year, the first overseas shipment of the fruit went September 2 in a cargo estimated at about 4,000 barrels of Nova Scotia apples.

The Domestic Employee

Is it any wonder that household help is so difficult to obtain, considering the indignities to which this type of labor is subjected? Doing housework is really a pleasant way of earning a living, but it is the treatment to which those employed in the home object.

Housework itself has variety; is not too much strain ordinarily; is usually in a pleasant and healthful environment; is in line with woman's traditional activity; gives opportunity for individual thought and planning; affords a living and a chance to save something above it; and has many other advantages. But there are drawbacks.

The title "servant" or "hired girl" is offensive and "maid" is no better with its smack of inferiority. Girls in domestic service would like to be called by their names, "Miss Jones" or "Miss Smith" just as any other individual, or the stenographer in an office.

Uniforms are offensive as they put them in a class apart below those who employ them. It is difficult to swallow if one eats alone, for it is hard to get past the lump in one's throat. Eating was meant to be a social function. Other annoyances are: no place to entertain the boy friend; no assurance that they can have regular hours off; and above all, the humiliation of having to use the back door.

YOUR COLOR

This is a color-mad, or color-gladd age. But however we choose to designate it, we are out of step with Madame Grundy if we do not adjust ourselves to it.

If we are to adopt color, we must know which color becomes us best. Color has distinct effects on objects which it is near and we want it to improve our appearance. We cannot buy a dress simply because it is a pretty color, but we must consider, "What will that color do to me?"

Black is one of the smartest colors—if the cut is distinctly smart, if the quality is excellent, and if the wearer has the poise to wear it with dignity. Otherwise it is a dowdy color. Black, dark blue and grayed down or elusive shades make one look slimmer. The aggressive colors—such as white, red, yellow, orange, purple, and brilliant blues make one look larger. These pure, bright colors also emphasize age and defects of the skin.

Dead white is hard to wear, unless the complexion is perfect, but near-white is easy for the average skin. Colors which make one look sallow are: white, henna, cold green and light green and light blue and tan shades.

Color emphasizes the color it is near. Blue may bring out the blue of your eyes; brown may deepen the brown of your hair—but do not wear a color which will emphasize your bad points, as the wearing of red if you have a red nose or an over-florid complexion.

Color should enrich your charm, but not eclipse your personality. If you have a delicate or negative coloring, wear soft tints of pink, rose beige, orchids, warm tans, and delicate peach. Vivid shades of red, purple, blue, green or yellow would proclaim themselves but put you in the background.

TABLE LINEN

Spreading the cloth is a very important matter in the correct and attractive meal. Whatever it is, it should be laid with care and exactness, not thrown on the table, slipshod.

For the formal dinner and other formal meals, the damask tablecloth is the most appropriate thing. Have the center fold exactly in the center of the table, and all the edges should hang evenly, of the same width. For the informal meal, lace or linen-and-lace table covers will serve. For luncheons, luncheon sets of gay colors are used. The table is more "bare" with much of the wood showing.

For dinner, whether or no—it is formal, the dinner set napkin is used. For luncheons, the small napkin, folded in quarters, is laid at each place. It usually matches the luncheon cloth. The napkin is laid flat on the plate at each place or at the left, beside the forks.

PLACING THE PIANO

The back of an upright piano should be against an inside wall, since temperature changes affect the strings and mechanism as well as the finish of the case.

The piano should sit where the light from a window falls on the music rack. A floor lamp is convenient for evening playing, unless the center light in a room falls strongly upon the music rack. The music cabinet belongs conveniently near the piano.

COMFY BEDDING

For the sleeping porch, or fresh air room in chilly weather, or for camping trips make sheets and pillow slips of cooling flannel. They are

much more cozy than cold muslin and they do not show so much the lack of ironing if you short change them in that respect, as many a wise housewife will do. Hang on the clothesline on a breezy wash day the wrinkles will blow out and they will dry fluffy and smooth. Their gray color looks clean and attractive whereas the frequently washed muslin sheet may lose its pristine whiteness and look grimy.

NEWER HOUSES

Some of the modern improvements added to more recent houses are: broad outside chimney for fireplaces; casement windows opening fully; tile floors in vestibule and bath room, with tile wainscoting in the latter; built-in corner cupboards; storage space in the attic; entrance to basement with rooms for laundry; large livingroom with outside exposure on three sides; bedrooms with windows on two sides for excellent ventilation; a sloping porch over the garage; plenty of cupboards in the kitchen.

SAD TONSILS

Let the physician peer into your mouth once in a while to judge the condition of your tonsils. Diseased tonsils act as hot beds of disease germs, where they multiply and throw poisons into the blood stream. Many mysterious diseases, such as rheumatism, arthritis, and neuritis, are caused by diseased tonsils.

The imbedded tonsil, which looks healthy on the surface but is corrupt at the roots, is particularly dangerous. Only a physician can detect its condition.

SMOKED FISH

Smoked fish is tasty, if sliced very thin and served as the filling for sandwiches. It need not be cooked first. It may also be cut in cubes, and served in salads. If cooked, it is not necessary to soak it first. Place it over the fire in cold water; let it come slowly to the boiling point, then drain this water off, and rinse it with fresh water, then proceed as if it had been soaked.

PRUNE-CHEESE SALAD

Cook large prunes and cut them in halves, removing the stones. Spread these neatly on a lettuce leaf and pile on each a cream made by beating cream cheese with cream. Lay half a pecan nut on top of the creamed cheese and serve with a French dressing to which is added a little thick ketchup and a few drops of Worcestershire sauce.

MRS. SOLOMON SAYS:

No home is ideal without music, good pictures, and good books. They nourish vision and good fellowship in the family circle.

APPLE CIDER

Through its amber sweetness there are pink blossoms blowing. And a rain of blossoms, blurring an old hill. And in its clustered bubbles there is sunlight showing. And the moonlight of many a night, lingering still.

There is tang of autumn in its clear, gold gleaming. The scent of ripe apples, heavy down the wind. And the gray beauty of a winter orchard dreaming. Its heavy burdens lifted, its heavy branches thinned.

There is more than cider in this bottled treasure—All my girlhood dances through it, glad and free; The wild exhilaration that I know beyond all measure. Laughs its golden laughter across the years to me.

Orchards of my youth float there, and my heart goes leaping. At a spray of blossoms or where red globes swing—Apple cider? apple cider holds with its keeping. Every old time autumn, and every old time spring. —By Grace Nell Crowell, in the New York Herald Tribune.

ONE UP FOR ADAM

How much are you worth? No, this isn't another way of asking how much money you've got in the bank; you may not have a cent there and still be worth quite a lot.

A number of scientists have recently been trying to get out figures as to the average economic value of each of us. According to them, a man of thirty is worth \$11,350 to the country to which he belongs, and a woman of the same age is worth \$9,475.

The figure, however, must vary from individual to individual. A clever inventor or organizer whether man or woman, must be worth far more to the State than any ordinary person can ever hope to be. But the feminists who claim "equal pay" for men and women may note that science seems to think that, on the average, members of the sterner sex are worth more.

Glamis Beacon

Glamis Beacon, the burning of which recently announced to the country the birth of a baby princess to the Duchess of York in Glamis Castle. Huge pile is here seen covered with protective tarpaulin waiting for news that sent it into flames.

Wins First Prize For Layer Cake

Mrs. W. McKenzie, 9 Fernwood Ave., Ave., Toronto, was awarded the first prize for layer cake at the Canadian National Exhibition, Toronto. As there were a large number of entries of cakes of various kinds we believe our women readers will be interested in securing Mrs. McKenzie's recipe, which follows:

Golden Layer Cake

½ cup butter, 1 cup sugar, yolks of 6 eggs, ½ cup milk, 1½ cups flour, 4 teaspoonful Magic baking powder, 1 teaspoonful of orange extract. Cream butter and sugar, add well beaten yolks and beat again with butter and sugar until very light. Sift flour and Magic baking powder together and add to first mixture alternatively with milk. Beat lightly for about one minute, put into greased layer pans and bake. Temperature 400 deg. F. Time about 20 minutes. Put together with lemon filling and ice with boiled frosting.

Lemon Filling

1 lemon and rind, 1 cup cold water, 1 cup sugar, 1 egg, 1 tablespoonful flour. Beat lemon rind and egg together. Stir in lemon juice and sugar. Dissolve flour in water. Cook in double boiler till it jellies and spread.

(Boiled) Frosting

Dissolve a cup of granulated sugar in ¼ cup of hot water. Wash down

the sugar from the sides of the pan, cover and let boil three or four minutes, uncover and let boil to a rather firm soft ball stage. Pour in a fine stream on the whites of 3 eggs, beaten dry, beating constantly meanwhile. A few maraschino cherries chopped and added to the frosting gives a delicious and pleasing flavor.

PEELINGS

Never peel an eating apple unless the skin is definitely tough and indigestible. Much of the goodness of an apple is in the peel.

Cucumber is less indigestible if the dark green skin is left on it. If the cucumber is sliced very thinly the dark green rim is far from unattractive looking.

Tomatoes for salads or sandwiches are best peeled. Drop the tomatoes into a cup of hot water for a few seconds, then take out with a fork and peel. The skin will come off easily. Leave to cool before cutting up.

Oranges required for salads or other sweets should be treated similarly and left for five minutes in enough boiling water to cover them. The skin and the white pithy part will then come off quite easily.

Orange peel must not be despised, however. A small piece of orange peel eaten every now and then is said to make the eyes bright.

Onions to be peeled should have boiling water poured over them. If they are peeled immediately after this they will not make your eyes smart or water.

LIGHTING-UP MADE EASY

The very latest thing in cigarettes is a variety which can be lit without the aid either of matches or lighter.

This self-lighting cigarette is tipped with a special preparation. When you want to light up, you take a cigarette out of the fire-proof packet in which they are contained and rub it gently along the side of the packet. It lights at once.

Will smokers cease to buy matches when these cigarettes are available everywhere? They would be quite useful when you wanted to light up in a wind—but so is a lighter. And the lighter hasn't driven matches off the market, and doesn't seem likely to do so.

"Biologists can be as sensitive to heresy as theologians."—H. G. Wells.

Little Rustic Cemetery Doomed Says Ontario Health Official

Toronto.—The little rustic cemetery, usually seen alongside most small churches, is doomed, like the little red schoolhouse. In these days of big business and amalgamation, that have seen smaller schools consolidated into substantial seats of learning, the little church graveyard has not got much of a chance. "Its days are over," said Dr. W. J. Bell, Deputy Minister of Health for Ontario, addressing the 44th convention of the American Cemetery Superintendents in session here.

"I hope to see small cemeteries amalgamated with larger ones, and thus remove the cause of neglected cemeteries," the speaker continued. He explored the fact so many of them, particularly in rural sections, were neglected. "The attitude of this generation toward the pioneers is reflected in the care they show for the last resting places of the pioneers," Dr. Bell said, "and unfortunately many of these cemeteries are falling into a state of bad repair."

Ode to a Waterfowl

Whither midst falling dew
While glow the heavens with the
last steps of day,
Far through their rosy depths dost
thou pursue
Thy solitary way?

Vainly the fowler's eye
Might mark thy distant
do thee wrong,
As, darkly painted on the crimson
sky;
Thy figure floats along.

There is a power whose care
Teaches thy way along the path-
less coast—
The desert and illimitable air—
Lone wandering but not lost.

Thou'rt gone, the abyss of heaven
Hath swallowed up thy form; yet
on my heart
Deeply hath sunk the lesson thou
has given
And shall not soon depart.
He who from zone to zone
Guides through the boundless sky
thy certain flight
In the long way that I must tread
alone
Will lead my steps aright.
—Wm. Cullen Bryant

1,200 Kinds of Reptiles Found in African Desert

Pretoria, S. Africa.—A scientific expedition to Kalahari has returned here after an absence of six months. Thousands of specimens of flora and fauna of the desert were collected, and will be divided between the Transvaal Museum, the Field Museum of Chicago, the British Museum and the American Museum of Natural History in New York. Herbert Land, the expedition leader, said a systematic biological survey had been conducted and had added much to the knowledge of Kalahari and Ngamiland, hitherto virtually unknown in this respect. Little game of interest was encountered in Kalahari, but on Mababe Flats blue and red wildbeestes were found in great numbers, while lions were numerous, groups of 20 or more having been seen. The collection includes 90 different kinds of mammals, 300 specimens of birds, 1,200 of reptiles, 600 of fish, molluscs and crustacea, and 25,000 of insects.

"Your little brother says your father said you were crazy to marry me." "He misquoted papa. Papa said I'd be insane if I married you."

Britain's Youngest Airman

Youngest airman in Britain is Master Tony Porter of Surrey, seen here taxiing over the water near Surrey in his specially built miniature seaplane.

What New York is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished with Every Pattern

Here's a charming model that the woman of average full figure will receive with hearty welcome.

Every detail has been thought of to achieve a slim silhouette.

The overblouse in wrapped arrangement is shirred into a straight band is knotted at the side in chic manner. The slight blousing above has a decided slimming effect on the hips. The skirt is fitted at the waist with an elastic. It is lengthened with a circular flounce.

Style No. 2690 can be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It adapts itself to canton crepe, flat crepe, wool crepe and featherweight tweed.

Size 36 requires 3½ yards of 39-inch material.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

WARMING TREES BY AEROPLANE

In several parts of the world where delicate fruit crops are grown frost is a deadly enemy. It has been discovered that ground frosts are unlikely in cloudy weather, since the clouds act like blankets and prevent the soil from giving up its heat. On clear nights it has long been customary to protect orange, lemon, and other citrus fruit trees by lighting smoke fires.

The heat of the fires is trifling, but their smoke clouds provide the necessary counterpane. Recent experiments have shown that aeroplanes can be used for tucking up fruit trees for the night. The plane flies to and fro over the orchard, emitting a dense cloud of smoke, and the trees are kept warm.

Sometimes forest fires destroy thousands upon thousands of acres of timber. To replant these in the ordinary way would be almost impossible, but wonderful results have been obtained by using aeroplanes to distribute tree seeds over the burnt-out lands.

Doing Ourselves Better

"Statistics show that the standard of living is four times higher to-day than in 1880," said the Marquis of Lothian in a recent speech.

Two Negroes who had been engaged to mow the lawn of a big hotel were quarrelling. "Niggah," said one, "does yew know what I done with? I done wish dat hotel yonder had a thousand rooms in it, and that yew was laid out dead in ev'ry room!"

There has been no execution for murder in Denmark since 1892.

Do You Value Your Health?

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches and backaches; if your digestion is bad you may depend upon it that these symptoms come from an impoverished state of the blood. That unless this condition is remedied a complete breakdown may follow. Dr. Williams' Pink Pills are a perfect medicine for any one in this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. M. Andrews, Halifax, N.S., writes:—"I always keep Dr. Williams' Pink Pills in the house. When I was a young, anaemic girl, they completely restored by health. After marriage my health broke down and once more these pills brought me back to health. My friends all tell me how well I look and for this Dr. Williams' Pink Pills deserve all credit."

You can get these pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

THRIFT WITH COLD VEGETABLES

Too many vegetables are sometimes cooked in the best regulated houses. Far too often, also, these are thrown away as uneatable when, with a very little trouble, they could be made very palatable.

Cold greens, for instance, should be placed in a saucepan of boiling water and covered for two minutes. The water should then be strained from them, and when the vegetables are served they will be found to be as good as when first cooked.

It is quite useful to keep carrots ready dressed for use in an emergency. They should be cut in round pieces about an inch thick, and warmed in butter sauce or thick gravy. Cold carrots may also be cut into any shape to serve with ragouts or hashes, or they may be cut into narrow strips and used in soups. To give parsnips a second life they should be mashed with butter, milk, and salt, and heated in the oven in a small buttered basin.

Onions, of course, do not look well when they are re-warmed, as they are likely to turn black. They will do nicely for flavoring soups or curries, however, provided that they are placed in when the soup or curry is boiling.

Potatoes can be served for a second time in a variety of ways. Mashed and mixed with a little milk and water they can be formed into buttered shapes, floured and browned in the oven, or baked in the oven. When they are whole they can also be dipped in bacon fat or dripping, sprinkled with salt and floured, and baked in the oven in a tin. Another way to deal with potatoes when cold is to try them in batter. To do this they should be cut into rather thick slices and dipped in a mixture made by beating an egg with a tablespoonful of flour and a tablespoonful of cold water, and then fried in plenty of fat.

BRAMBLE JELLY

Gather rather under-ripe fruit and wash if necessary. Put into a preserving pan with enough cold water to half-cover it. Cook berries slowly for an hour or longer, bruising them down with a wooden spoon to extract all juice. Strain through a jelly cloth and leave to drip all night. Measure the juice next morning, return it to a clean preserving pan and let it boil for fifteen minutes. Add three-quarters of a pound of sugar (warmed in the oven) to each pint of liquid. Stir until dissolved, then boil all together until jelly will set.

Practice Needed

Wilson was suffering badly at the hands of the barber. After the third cut he decided to make a protest.

"I say, my man," he said, "I notice you have a sign outside your shop, 'We Aim to Please.'"

"That's right," returned the barber merrily, "that's our motto."

"Then don't you think you'd better take a day or two off for target practice?" came the customer's retort.

Lawyer: "Have you ever been in jail?" Witness: "Yes, sir, once." "Ah! For how long?" "Long enough to whitewash a cell which was to be occupied by a lawyer who had robbed dozens of his clients."

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once, The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Louisiana Honors Evangeline

Kirtles and Normandy caps, the traditional dress of the Evangeline period, were the official costume of this group of pretty girls, who formed an important and attractive section of Louisiana's delegation of Acadians to Grand Pre, N.S., on August 20, for the celebration of the 175th anniversary of the expulsion of the Acadians, held under the auspices of the Dominion Atlantic Railway. The group posed for the camera beside the memorial church in Grand Pre Park, centre of the festivities, which were attended by Acadians from all parts of the United States and Canada. Official Dominion and provincial, French and American representatives were in attendance.

Bobbed Hair Does Not Need Brushing?

It may be imagination, but with the coming and staying of short hair, the brush and comb seem to have fallen into neglect. A regrettable thing, for if these fall into neglect the hair falls into neglect, too, and is swift to show signs of it, just as it is swift to respond to care and attention.

Long hair always seems to receive more brushing than short hair, but short hair has the advantage that it is easier to brush it upwards as well as downwards. It is very good for the hair to brush it from the nape of the neck upwards—the wrong way of the hair, as it were.

The stiff bristled brush is always best for the hair unless the hair is exceptionally fine and comes out a good deal. Hair is apt to come out in the spring and autumn when new hair is growing and the dead hair automatically gives place to it, but this is nothing to worry about. When hair comes out habitually it is wise to abandon anything in the way of vigorous brushing for the time being; it is also wise to try to find some remedy, of course.

Brushes should be washed as often as the hair is washed, or more often if the hair is not washed every fortnight or so. Clean brushes help to keep the hair clean. Always rinse the brushes in cold water, standing the bristles downward in the water. This helps to keep the bristles stiff. When silver brushes are being washed care should be taken to keep their frames out of the water.

Best Out of Sight

Combs must be cleaned even more frequently, for with short hair they seem to be in almost perpetual use, and once they get clogged with dust you can never be quite sure that the dust does not go back into the hair again. Keep a special comb for your handbag, and a bigger and more important one to keep your brush company. Never on any account leave hair comings in your comb. It is an unhealthy, dust-collecting habit, besides being an extraordinarily unsightly one. Keep a hair tidy of some description handy or, if you use a waste paper-basket in your bedroom, deposit your hair comings there.

Last but not least, have a brush and comb bag. A square of checked gingham left over from one of your summer frocks will make an admirable one if you have not one already. Keep your brush and comb in this, and so keep them free from dust. The habit of leaving a brush and comb out on the dressing table or chest of drawers is another unhealthy and dust-gathering one. Brushes and combs, like most other toilet accessories, are best kept out of sight, and safe from harm's way in your dressing table drawer.

"The workers put as much interest into their politics as they do into their football matches we could after the face of England in the next 10 years."—Ellen Wilkinson, M.P.

John—"May I have the last dance with you?" Jean—"You've just had it."

Minard's Liniment a household friend.

Give Confidence To Young Mothers

A simple and safe remedy for the common ills of babyhood and childhood should be kept in every home where there is either a baby or a young child. Often it is necessary to give the little ones something to break up a cold, allay fever, correct sour stomach, and banish the irritability that accompanies the cutting of teeth.

Experienced mothers always keep Baby's Own Tablets in the home as a safeguard against the troubles that seize their little ones so suddenly and the young mother can feel reasonably safe with a box of these Tablets at hand and ready for emergencies.

Baby's Own Tablets are a mild but thorough laxative that act without gripping and they are absolutely guaranteed free from opiates or other harmful drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

HEREDITARY KEY BOUGHT FOR FINGERPRINT PATTERN

Iowa City, Iowa.—It won't be long until science will be able to remark that Junior has his daddy's eyes, his grandmother's nose and his mother's fingerprints, Dr. John A. Larson, University of Iowa psychiatrist and criminologist, believes.

And when that time comes, Dr. Larson says, danger of babies being mixed up will be almost wiped out.

Dr. Larson is the inventor of a new "single point" system of classifying fingerprints, and he is also credited with having perfected the first working model of the "lie detector" now used for examination of suspected criminals.

Though science has not yet discovered accurately just what features of a fingerprint pattern constitute its "dominant" and "recessive" hereditary factors, Dr. Larson is convinced that there are such inherited characteristics, just as facial or bodily configuration among relatives betray family kinship.

"Your wife must be awfully in love with you. She has written to you every day since she has been away." "These are only little notes to tell me to send her something she forgot to put in her trunk."

12-MILLION-YEAR-OLD LOG FOUND BURIED IN BASALT

A log of a seven-foot tree, found 150 feet below the bed of the Yakima River, in the State of Washington, and estimated to be 12,000,000 years old, was reported last week by the Department of Agriculture at Washington. The log was found when a tunnel was being bored under the river by the United States Reclamation Service. Arthur Koehler, expert on wood identification, designated the tree as a species of sequoia. It lay in solid basalt, believed to have been poured out of one of the Columbia plateau volcanoes.

PLAYING WITH TOTO

The old lady was sitting on a bench near the eighth green of the golf course.

Presently an unseen golfer hit a ball onto the green, and Toto, the old lady's dog, ran out and promptly seized it.

The next moment the golfer came over the crest of a hill and began waving his arms and shouting indignantly.

"Put the ball down, Toto," cried the old lady. "Here comes the kind gentleman to knock it for you again."

Minard's Liniment aids tired feet.

Owl Laffs

Farming is man's most delightful occupation—if he can sit in the shade and get somebody else to do it.

Carl—"May I hold your hand?" Helen—"Are you frightened?"

A lot of week-end wrecks are caused by week-end drivers.

Vitamines and Calories

Methuselah ate what he found on his plate.

And never, as people do now, did he note the amount of the calorie count.

He ate it because it was chow. He wasn't disturbed, as at dinner he sat.

Destroying a roast or a pie, to think it was lacking in granular fat.

Or a couple of vitamins shy. He cheerfully chewed every species of food.

Untroubled by worries or fears, lest his health might be hurt by some fancy dessert.

And he lived over nine hundred years.

The folks who find fault with the modern dances are either old or fat, or both. Yeah, you bet.

"Darling," he cried, falling on his knees and covering her little white hands with kisses, "can't you see that I love you?"

She drew herself up to her full height. "Well," she said, "I should hate to think this was just your way of behaving in company."

We can hardly claim to be civilized until we abolish the present day funeral expenses.

The Seven Mistakes

There are seven mistakes of life that many of us make, said a famous writer, and then he gave the following list:

1. The delusion that individual advancement is made by crushing others down.
2. The tendency to worry about things that cannot be changed or corrected.
3. Insisting that a thing is impossible because we ourselves cannot accomplish it.
4. Refusing to set aside trivial preferences in order that important things may be accomplished.
5. Neglecting development and refinement of the mind and not acquiring the habit of reading and study.
6. Attempting to compel other persons to believe and live as we do.
7. The failure to establish the habit of saving money.

Aunt Martha (shopping for a parrot)—"Now can you assure me it isn't given to the use of shocking language? Where did you get it?"

Proprietor—"From a sailor, ma'am. But—"

Aunt Martha—"Oh that's all right. Just so you didn't get it from one of those fappers."

An ice cream vendor's pushcart in Richmond, Ind., bears this sign: Give Your Tongue a Sleigh Ride. Ice Cream Cones, 5 Cents.

The modern girl never worried about her complexion going flat. She always carries a spare.

Analogy

Louise is beautiful, but too slow; She shakes her head when I entreat; She's like a Florida bungalow—Modern, but no heat.

A woman says it is impossible to go through life without telling a fib. She says she just has to say something nice about her husband once in a while.

Credit Customer—"I'm not the worst liar in town."

Mercant—"On the contrary, you are the best."

An ounce of silence is worth a ton of explanations.

He who laughs last sometimes gets the horse laugh for being so dumb he couldn't see the joke at first.

Among what is known as the "car-purchasing" class in Great Britain, ten motor-cars are bought for every baby born.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect. Avoid lubricating oils which only grease the machinery and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pills.

Who said "Blue Monday?"

WASHDAY—hardest in the week for many women. Especially if there are children.

But it needn't be "blue." When you begin to feel tired, make yourself a cup of tea. It will rest you!

RED ROSE TEA

"is good tea" 116

TWO QUALITIES -- RED LABEL & ORANGE PEKOE

I CANNOT TELL

I cannot tell how all the stars Retain their rhythmic way, Or how the sunset's golden bars Shut out the light of day— But I can tell when loving eyes The secrets of my heart surprise.

I cannot tell how migrants wing Their course o'er land and sea, Or how returning summers bring Their bounteous gifts to me— But I can tell how love for love O'er all earth's treasures ranks above.

I cannot tell how this round earth Revolves about the sun, Or how the autumn's priceless worth From cloud and clay is won— But I can tell how kindness may Fill life with sunshine every day. —A. B. Cooper in "Tit-Bits."

"Will you marry me?" said Archie. "I don't know," replied Muriel; "I've always said the man I marry must be both brave and intelligent." "Well, didn't I save you from drowning?" said Archie. "Yes," agreed the girl; "I admit that was brave, but it didn't prove you to be intelligent." "Oh, but it did," said Archie. "I upset the boat on purpose."

"All my life I have been a sojourner on this planet rather than a native of it."—George Bernard Shaw.

The Perfumed Touch that Makes Your Toilet Complete

Cuticura Talcum Powder

Delicately Medicated and Antiseptic

Hay Fever

and catarrh are offensive ailments. Heat and inhale Minard's a few times daily, as for colds. It stimulates and relieves the membrane.

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria! Harmless as the recipe on the wrapper: mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—the pure vegetable preparation is usually all that's needed.

DIZZINESS

Caused by Blood pressure

Doctor ordered Kruschen

"Five years ago this month I had a serious attack of blood pressure, and my medical man ordered me to take Kruschen Salts daily. Evidently I am a stubborn subject, because I use every morning a small teaspoonful and a half in a glass of hot water, and this acts splendidly and keeps my head right. If I don't have the action mentioned, I feel cold, stupid and liable to fall from dizziness. Therefore I can't do without my Kruschen on any account. Some time ago I tried some other salts which were cheaper, but they pained me so much that I had to stop them. There is no pain with Kruschen. I have told hundreds of my little wonder-working bottle."—(E. C. Ferguson.)

Dizziness is a symptom of a deeper-seated disorder. It is one of Nature's danger signals—her urgent warning of an impure blood-stream which, if not attended to in time, may wreck the entire health with some dangerous, indeed lifelong, disease. The six salts in Kruschen keep the blood-stream pure and vigorous by ensuring the complete elimination of poisonous waste matter from the system every day.

Picture of Health Now

"In May and June I was badly rundown and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Funnicky, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound

DE FOREST CROSLY

THE ARIA, \$189.50, with tubes
The ARIA. Introducing new standards of efficiency and value in every phase of radio performance — the Aria brings the true depth and brilliance of full harmonic amplification to radio for the first time. The perfect harmony of a matched burl walnut escutcheon panel, with wing panels brilliant with cross fire, and a lacewood base give distinctive individuality to the cabinet of original De Forest Crosley design. Eight-tube Standard Harmonic Screen Grid Chassis.

THE TROUBADOR. Incorporating new De Forest Crosley developments in phonograph engineering added to the Harmonic Series Eight Tube Screen Grid Chassis the Troubador Electro Dynamic Radio-Phonograph brings to both types of reproduction all the glorious character of new harmonic reproduction. The cabinet reflects perfectly moulded lines of modern motif — with all the beauty of a new natural soft lustre finish — deep warmth of color in a matched burl escutcheon panel — and brilliant cross fire walnut side panels. The tone quality and aristocratic dignity of the Troubador is instantly appreciated.

FIERI FACIAS DE TERRIS.

Canada,
Province of Quebec,
District of Montreal,
No. 27225.

DAME L. N. MOLNAR, of Montreal, plaintiff, vs. **JOHN BORI**, of Sainte Sophie, defendant.

As belonging to the said defendant the following immovables, to wit:

A farm situated at New Glasgow, parish of Sainte Sophie — with two houses, one barn, with the stable therein enclosed and generally all the appurtenances thereon erected; the said farm composed of the lots numbers three hundred & five, three hundred & eight, three hundred & nine, three hundred and twenty-five, three hundred and twenty-six, and three hundred & twenty-seven (Nos. 305, 306, 308, 309, 325, 326, 327) on the hypothecary cadastre of the parish of Sainte Sophie, county of Terrebonne, the said lots having a superficial area: No. 305, eighty-five acres and fifty perches, No. 306, eighty-two acres and fifty perches, No. 308, seventy acres and fifty perches, No. 309, one hundred and five acres and seventy-five perches, No. 325, one hundred and one acre and fifty perches, No. 326, one hundred and one acre and twenty-five perches, and No. 327 one hundred and five acres and seventy perches. The word "acres" is written in french, in all the measures of the said lots "arpents." To be distracted from the above mentioned lots 305 and 306 at their depth a tract of land of ten acres in length by the whole width of those two lots, to be computed from the line of the county of Montreal coming to the south, as it appears by two deeds registered at Registry office of the county of Terrebonne under Nos. 46499 and 51087 respectively.

To be sold at the Catholic parochial church door of Sainte Sophie, county and district of Terrebonne, the TWENTY FIFTH day of OCTOBER, 1930, at ONE o'clock of the afternoon.

"Caterpillar"
will never pack
the bottom of the furrow

The "Caterpillar" Tractors ride on unplowed ground. They ride on an even keel, without faltering, without slipping, without strain on nerves or machine. The long "Caterpillar" tracks grip in soft soil, wet soil, any kind of soil. Straight, clean furrows behind the "Caterpillar" that steers at a touch and "swings on its heel" close up to the fence. "Caterpillar" Traction and "Caterpillar" power will make a better, quicker and cheaper job of Fall plowing.

MAGIC BAKING POWDER

never varies

Its uniform leavening qualities give the same satisfactory results with every baking.

3 out of every 4 Canadian housewives, who bake at home, say they use it because it does give consistent, better baking results.

If you bake at home, the New Magic Cook Book will furnish you with dozens of attractive baking suggestions.

Try this Recipe for Muffins

1 tablespoon butter
2 tablespoons sugar
2 eggs
2 1/2 cups flour
3 teaspoons Magic Baking Powder
1/2 teaspoon salt
1 cup sweet milk

Cream butter and sugar. Add eggs one by one, beat well. Sift dry ingredients together and add to first mixture alternately with milk. If batter not stiff enough, add a little more flour. Put in well-greased muffin pans and bake for 20 minutes in a quick oven.

*This fact was revealed in a recent Dominion-wide investigation.

A NARROW ESCAPE

The necessity of greater care being exercised in the handling of firearms was forcibly brought home to George Wason on Friday last, when he had the exciting experience of having his hair singed by a bullet which had been fired by one of five youngsters who were potting at a tree on Copeland's farm. George Wason was plowing at the time and watched the lads, when one of their number turned round and deliberately fired towards him. His foolish move nearly resulted in a fatality as the bullet passed through his hat, singeing his hair. There is little doubt that the accident was a matter of pure carelessness, but it should prove a good warning that firearms are dangerous weapons and need care and judgment in their proper use.

Local news of the Week

Miss Alice Brown spent the week-end with her parents in town.

Mr. D. D. Mitchell, of Montreal, was the Sunday guest of his mother Mrs. Wm. Mitchell.

Mr. Alfred McCullough, of Montreal, spent a few days in town this week visiting friends.

Mrs. Wilbur Fraser, of Montreal, was visiting friends in town over the week-end.

Dr. W. H. Crabbe, of Montreal, spent the week-end the guest of his sister, Mrs. Geo. Creswell.

Mr. and Mrs. A. W. Young, of Montreal, spent the week-end at their summer home at Lake Louise.

Miss Gladys Cruise, of Montreal, was the week-end guest of her parents, Mr. and Mrs. John Cruise.

Messrs. Gavin and Mac Walker, of Montreal, were the guests of their parents, Mr. and Mrs. J. E. Walker.

Miss Doris Campbell, of Montreal, was the week-end guest of her parents, Mr. and Mrs. John Campbell.

Mr. and Mrs. Moles and Mr. and Mrs. Jackson, of Montreal, were the Sunday guests of Mr. and Mrs. R. A. Giles.

The many friends of Mrs. Penman are pleased to see her home again, and wish her a speedy recovery from her recent illness.

Mr. and Mrs. Arthur Burnett, of Montreal, spent the week-end in town guests of Mr. and Mrs. Geo. Graham, for the week-end.

Mr. and Mrs. Lorne McArthur and daughters Lorna and Mavis, of Ottawa, were week-end guests of Mr. and Mrs. Walker McArthur.

The Victorian Order Nurse, Miss Nickel, has arrived in Lachute and is now on duty. Any person desiring her services will please phone 274.

Miss Evelyn Hamilton, R. N., and Miss Shirley Hamilton, of Montreal, were guests of their parents, Mr. and Mrs. Robert Hamilton over the week-end.

Messrs. Harold McKeen and Gordon Stackhouse and the Misses Marjorie Courtenay and E. McPaul were week-end guests of Mr. and Mrs. J. McPaul.

Mr. Albert Bradford has returned home after spending the past thirteen years in Melville, Sask., and is the guest of his father, Mr. Chas. Bradford, of North River.

Mrs. John Crozier returned home on Monday, after spending a pleasant three weeks' visiting with friends in Montreal. On her return she was accompanied by Mrs. Wm. Strong, who also visited friends in Lachute for a few days.

Last week-end was one of the most beautiful during the year. Many of the residents of the Lakes took advantage of the mild weather to reopen their summer homes and spend a few days there. The sunsets of Saturday and Sunday were glorious and afforded a picture long to be remembered.

Summer is certainly here with us again, as owing to the lovely warm weather we had had during the past week. Mrs. Thompson, of Hill Foot, picked a handful of raspberries from her garden on October 15th, which is a very unusual occurrence for this time of the year.

Special programs have been secured by the direction of the "Rex" Theatre for the coming week. On Friday and Saturday Oct. 17th, and 18th, "The Lone Wolf's Daughter" will be shown and on the 24th, and 25th, the well known play "Cohen and Kelly in Scotland" will be presented by Charlie Murray and Geo. Sidney.

FOOTBALL

We are looking for a big turn out of spectators to enjoy the game arranged for Saturday, October 18th, between Lachute Academy & Brownsburg Juniors. The Academy boys are very keen on the game and we expect ninety minutes of real peppy play. Let's get together and encourage all the boys. The game will be played on the Picnic Ground and will start at 3 p.m. prompt. A return game will be played in Lachute on Saturday, October 25th. The teams will line up as follows:

BROWNSBURG JUNIORS
Goal Keeper—L. Roberts.
Full Backs—H. Tomalty, L. Martin.
Right Half Back—E. McGibbon.
Centre Half—D. Stewart, L. Half Back—L. Martin.
Outside Right—G. Connelly.
Inside Right—G. Stewart.
Centre—W. Mason.
Inside Left—P. Seary.
Outside Left—A. McCulloch, (Capt.)

LACHUTE ACADEMY
Goal Keeper—G. Drysdale.
Right Back—N. Leggett.
Left Back—W. Drew.
Right Half—G. McPaul.
Centre Half—H. Jones.
Left Half—S. Roberts.
Outside Right—M. Langille.
Outside Left—L. Canning.
Centre—G. Clark.
Inside Left—H. Gall.
Outside Left—R. Underhill.

WEDDING BELLS.

McANDREW — GUNN

A very pretty wedding was solemnized in the Dalesville Baptist Church, on Wednesday, Oct. 15th, 1930, when Reta Mary, eldest daughter of Mr. and Mrs. Geo. Gunn, of Dalesville, was united in marriage to Mr. Wesley McAndrew, son of Mrs. Wm. Thompkins, of Lachute. The ceremony was performed by the Rev. A. Penman. The church was prettily decorated with Autumn flowers and ferns. The bride who was given in marriage by her father wore a gown of ivory georgette with radium lace, fashioned in long lines. Her long veil being held in place by sprays of orange blossoms. She carried a bouquet of white roses, sweet peas and maiden hair fern. She was attended by her sister Hazel, who was gowned in pilot blue georgette with French felt hat to match and carried a bouquet of pink asters and sweet peas. Mr. Lesley Keatley acted as best man. Mrs. Gunn, the bride's mother was gowned in black crepe and wore with hat to match. The wedding music was played by Mrs. E. Burk.

A reception followed the ceremony at the residence of the bride's parents, where some eighty guests sat down to a bounteous repast. They were the recipients of numerous and costly gifts. The happy couple left on the evening train for Montreal and other points, the bride wearing a dress of leaf green canton crepe, with black parisian felt hat to match. On their return they will reside in Lachute.

O'BRIEN — GUY

A pretty wedding was solemnized at Hazeldean, on Thursday, Sept. 25, at 10 a.m. in St. Paul's Anglican Church, when Margaret E. Guy, daughter of Mr. Fred Guy, of Irma, Alta., and the late Mrs. Guy, were united in marriage to Lawson O'Brien of Ottawa, son of Mrs. Geo. O'Brien and the late Mr. O'Brien, of Thurso, Que. Rev. Mr. Clark officiated.

The bride was attended by Miss Lillian Neill, and Mr. Erwin McElroy was best man.

Immediately after the ceremony, Mr. and Mrs. O'Brien left on a motor trip through Quebec and the United States, returning by Detroit. The bride travelled in a smart blue ensemble suit, with hat to match, and wore a silver fox fur, the gift of the bridegroom.

The happy couple will make their home at 92 Gilchrist Avenue, Ottawa.

OBITUARY

THE LATE WILLIAM SMITH

The death of William Smith, of Dunany, occurred early Friday morning after an illness of some time at the advanced age of 88 years and 8 months. The deceased was the son of the late Mr. and Mrs. Samuel Smith, and had spent all of his useful life at Dunany.

He was married to Mary Ann Miller, who predeceased him some six years ago. To this union were born a son and daughter, who have also predeceased him.

The funeral was conducted on Saturday afternoon, by the Rev. R. G. Flinder, in the presence of a large number of friends and relatives.

He leaves to mourn his loss one brother, Mr. John Smith, of Wisconsin, and two grand children.

BIRTH

MURDOCH.—At Staynerville, Que., on October 10th, to Mr. and Mrs. Theodore Murdoch, (née Ruby Nicholls,) a daughter. Both doing well.

IN MEMORIAM

McFAUL.—In loving memory of Mrs. Archie McFaul, who passed away Oct. 16th, 1929.

The cup was bitter, the sting severe, To part with one I loved so dear. My sorrow was great, but I'll not complain. But trust in God to meet again. Inserted by her husband.

McCAMBLY.—In loving memory of Mrs. Thos. McCambly, who entered into rest, Oct. 21st, 1929.

She gave me one last farewell. She said good-bye to none. Her spirit fled before we knew. That from us she had gone. Inserted by her sister, Mrs. Richard Brown.

McCAMBLY.—In loving memory of our dear wife and mother Florence May Parke, who went home October 21st, 1929.

How much we loved her none may know. It seemed so hard to see her go. To part with her we loved so dear. The blow was sharp and so severe. Inserted by her husband and little daughters.

APRIL ESCAPEE

By KATHLEEN NORRIS

SYNOPSIS.

The O'Hara family, poor but happy, is supported by Martin and Mary Kate, the two oldest children. Martin who is studying medicine at night, gets a chance to go to Germany with Dr. Van Antwerp, but turns it down because of the family. Mary Kate who wants him to take the opportunity, which will mean a great deal to him, tries to plan some way to get the money which will enable Martin to go.

Mary Kate and a young chap, Cass Keating, are in love and plan to be married as soon as possible.

One night Mary Kate tells her mother of her engagement to Cass Keating, and the older woman shows disapproval.

Then Martin comes in and begins a strategic attack on his mother.

CHAPTER VIII.—(Continued)

"The way you talk, you'd think Cass Keating was too good for Mary Kate," the woman presently said, resentfully.

"Nobody's too good for Mary Kate!" "Well, then, you're talkin' very queer, Mart."

"No, it's like this, Mother. Cass Keating is terrible popular, see? And all the girls—girls of twenty-five, older girls, girls with rich fathers, are after him, see?"

"Now I don't say Mary Kate couldn't hold him, but I do say that he's going to make money, he'll have an automobile—he'll buy a place out in St. Francis Wood or somewhere."

Mrs. O'Hara stirred the mixture in the pot, salted it, tasted it.

"And Mary Kate couldn't keep up with him?" she asked gently.

"Well, I only mean that it would put her at a disadvantage, Ma."

"Mary Kate O'Hara, is that it?"

"Well, Mother, don't get on your high horse! I'm not knocking Molly. I simply say that here's a fellow that's going to make millions, like O'Grady Brothers, or Cunningham Company—"

The rough, expert hands that were manipulating the blue saucepan trembled visibly. Mrs. O'Hara poured hot water into the lower casseroles gently, fitted the upper one in place, pressed down the cover. She set the pan back on the stove.

"I suppose I'm surprised that you don't stand up for your sister, Mart."

Her voice was level, dead.

"Mary Kate understands me!" Martin glanced at his sister; their unsmiling, faintly significant looks met in a steady stare. Ther. Mary Kate dropped her eyes again.

The mother sat down at the table, a strong needle, threaded with black thread, and a child's strap slipper, suddenly in her hands.

"In Mary Kate's place I wouldn't know what to think of you," said Mrs. O'Hara.

Martin was stuffing his pipe; he made no reply.

"Are the Keatings so well thought of, Mart?" the older woman demanded, surprised, in a forcibly restrained voice.

"Cass is," the boy said briefly.

"Is he so? It's a pity then, that he wouldn't go after one of those millionaires' daughters, Mart," Mrs. O'Hara observed drily.

"He will," Mary Kate said bitterly.

"I never said anything against him by word or look, all I'd ask is that a daughter of mine would know her own mind, and be said by her mother and brother, that would love her more than a thousand men, however rich they'd be!" Mrs. O'Hara presently said sententiously and a little uneasily.

"That's kind of an old-country idea, Mother," Mart reminded her, pulling on his pipe.

"What's an old-country idea?"

"That a girl would let her mother and brother pick her husband for her."

"I don't know who'd love her more, that'd do it for her," the woman said.

"You and my father, now. Did you brother pick him?"

"He did not. My brother hated the very step of Tom O'Hara in the dust!" Mrs. O'Hara admitted honestly. "But then was very different days. Mart. No, we run away, Papa and I did—"

"Well, there's your clue, Mary Kate!" Mart reminded his sister cheerfully, in a silence.

"That'd be fine advice to give her!" the mother said, roused to uneasiness, carried beyond her depth.

"I'd always thought I'd have a church wedding," Mary Kate observed dispassionately. Her eyes, with a dancing flicker in them, rested for a moment upon her brother.

"If you can pin that feller down to a wedding at all, Mary Kate—" Mart began.

His mother indignantly interrupted him. "Mart, don't talk that way to your sister! It's disgusting. A body wouldn't know—" Mrs. O'Hara continued with a sharply suspicious glance at her son, "whether you liked him or not. Why would she run off like a bad girl, and be married by a Justice of the Peace in Colma or Vallejo, with her own mother and sisters and brothers all at home, lovin' her? She may be poor, but there's no shame to that, and however rich he'd be, come ten years from now, she'd be as fit to stand beside him as anyone he'd ever find, and too good for him, too, if you ask me!"

"Why Cass Keating," she went on, warning, "whose grandfather ran the 'Eleven Mile Tavern' down the Peninsula—"

"Listen, Mother—" "I'll listen to you, Mart, that ought to be makin' it easy for your sister, askin' the man to the house, and makin' him welcome, and her with all those rich girls pullin' against her! It's not right of you, Mart, and it does piece me very cruel that it'd be her own blood-brother—" "Now, listen, Mother! If you say so, I'll phone Cass tomorrow, and tell him that you want him to come out to dinner—" "Give until—well, that's all right," Mrs. O'Hara said, suddenly restored to normal avenues of thinking and feeling, the old black frying pan and tender split chickens sizzling within it clear in her mind. "Do that now, Mart," she urged. "I can get me dinner in tomorrow mornin'! I'll have him send me a good order. And as for tonight," Mrs. O'Hara continued loftily, "well, I don't know that it'll do him any harm to know that we're in no hurry to get rid of Mary Kate!"

"Oh, Mother!" said Mary Kate, unable to continue the make-believe any longer, and rising to fall upon her knees at her mother's feet, push the sewing aside, and link her hands behind her mother's neck, "you do like him!"

"If you like him, Baby," the mother said gently.

"Oh, I adore you!" the girl said, laughing and crying. She jumped to her feet, ashamed of her own emotion and ran out of the kitchen.

Mrs. O'Hara looked appealingly, pathetically, at her son.

"The way you all have me bedeviled," she complained, "I don't know whether you like him or not, or whether I want her to marry him, or to have you boot him out of me house!"

"Poor Ma!" was all the comfort Mart could give her, as he knocked his pipe free of ashes, folded the strip of newspaper that contained them into a careful bundle, deposited it in the garbage can under the sink, and kissed his mothers daisy-white forehead, where the rich dark hair sprang away in a smooth youthful wave. He laughed as he spoke, but his mother only looked at him darkly, half-suspecting, perhaps, that these two-elder children of hers were manipulating her again.

"The whole lot of you's a heart-scaled to me," she said, gloomily. But when her first-born kissed her, she drew his dark cheek hungrily against her own. The day's work was done now; it was bedtime.

CHAPTER IX.

Her own room, which little Pat shared, adjoined the kitchen, but after she had deposited her damp coat and widow's bonnet there, and gotten into a colorless flannel nightgown, she padded softly in old felt slippers, to the deserted dining-room, that smelled of apples, dust and school books, and groped about in the neighborhood of the fireplace for the old-fashioned gas jet, on a hinged iron arm. Tom slept in this room, on an extension couch. Mart had the little slice of hall bedroom upstairs, and Tom usually undressed there, and kept his shabby wardrobe here and there, in all the household closets—sweaters in the skate and rubber closet under the stairs; neck ties on a nail in the bathroom, coat on another nail, in the downstairs passage.

His mother always opened his bed for him; she had forgotten it tonight. She went to the familiar little job with a heavy heart; where was the boy, on this rainy, unfriendly evening?

But the instant the little wavering bead of light was shining, her spirit was inundated with sudden peace. Tom had opened his own bed; his damp clothing was scattered all over the floor, his dark head deep in the sodden pillow.

His mother sank thankfully upon her knees on the littered floor beside the couch, and put her arms about him and without waking he snuggled close to her, granted and sighed happily, in affectionate content. She kissed the thick dark waves of his hair—her good, dear, innocent boy that had been asleep in here all the time she had been so worrying about him.

"Ah, Tom you're such a darling," "Gee, I adore you, Mother."

"Don't wake up dear." But she

couldn't let him alone. "Where were you, dear?"

"We were at the Alhambra—right behind you. But I got sleepy—"

He had sunk fathoms deep into delicious slumber again. His final, "Gee, I love you—" died off into inarticulate murmuring.

Mrs. O'Hara began her evening prayers, her lips against the thick dark hair that smelled of rain and youth and Martin's jealously cherished "stik-tik."

Meanwhile Martin had slipped into Mary Kate's room and with the exquisite privilege of brotherhood was sitting on the edge of her bed in the dark, her warm, slim, young hands tight in his, her breathless rush of ecstatic confidences coming to him in eager whispers.

"Oh, yes, Mart. Cass and I have been—sort of—working up to it, since Christmas. But of course I wasn't sure. And then, all of a sudden tonight, we were talking about it, you know about what we'd do, and income, and budget and everything! Oh, Mart, you do like him?"

"I think he's a pip."

"Oo, but do you honestly? And, Mart, he is so much older than the others—I mean he's nearly twenty-seven, you know, and I mean he's in earnest. He's marvelous. Mart, Mother'll be all right, won't she?"

(To be continued.)

What New York is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

2662

Here are lovely slenderizing lines for the mature figure.

The wrapped treatment of the bodice narrows its breadth. The trim likewise has a slimming effect.

The side-buttoned closing of the hip yoke has a diminishing effect. The long skirt is smartly cut scalloped at the top to meet each circular gore that widens into graceful flared hem.

Any of the new day fabrics are suitable for its development as canton-faille crepe, wool crepe, flat crepe and crepe marocain.

Style No. 2662 may be had in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 4 1/2 yards of 39-inch with 1/4 yard 9-inch all-over lace for vestee and 1/4 yard 35-inch contrasting.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

"Much Ado About Knotting" was probably suggested by the put-putting of an outboard motor boat.

Minard's Liniment aids tired feet.

Says Reason Is Way To Eugenic Reform

Sir Arthur Keith Holds Time Ripe for Science to Aid in Improving the Race

London—Sir Arthur Keith, scientist, recently appealed for the "rationalizing of human nature" as a forerunner to eugenic reform and improvement in the quality of the race.

"The chief difficulty in the way of eugenic reformers," said Sir Arthur, "is human nature, which is dominated not by reason but by passion, feeling, emotion, prejudice and instinct."

Nevertheless, he told the International Congress of Eugenic Organizations that the time was never more ripe for science to take a hand in safeguarding the quality of future generations.

"Is the generation now growing up as fit in body and mind as the generation which it will replace? Or is the evidence definite that deterioration has set in?" he asked. "If irrefutable evidence were produced that civilization is tending to exchange ability for mediocrity, then we have to discover the measures which have raised man to his present status and can be used to raise him still higher."

Sir Arthur said he approached eugenics with the eye of a prehistorian "who saw only two chapters in man's evolutionary history."

"The first," he said, "began with the emergence of humanity from the pithecanthropoid stage and ended with such full-blown types of humanity as were found in Europe and South Africa toward the end of the last Ice Age. In that phase the progress of man was effected amid natural surroundings."

"Then some 10,000 years ago man's evolution proceeded under new conditions—conditions seen in cities. These conditions were no longer made by nature but by man. In the first, or natural phase, production of the race was everything; in the second, production of the race was sacrificed for the accumulation of wealth. In both phases humanity walked toward its fate with closed eyes."

"If eugenists have their way a new phase—a conscious phase—in the evolution of mankind will be initiated. If we find that the way we are living is leading us straight to physical and mental bankruptcy, we can no longer afford to be mere pawns on the chess-board of evolution. We must take a hand in the game."

"The possibilities of a eugenic reform depend on the extent to which human nature can be rationalized. There are signs which lead me to think the time is favorable. The public of all countries is more willing to listen to eugenic proposals than at any previous period."

Sufficient

A little house, a bush, a tree, A laughing child to play with me.

A task that fills the fragrant days, But leaving time for prayer and praise.

A garden bright with pink and gold, Full harvest as the years grow old.

For every day some beauty gains; For twilight, music's sweet refrain.

A dozen friends with gifts of cheer, And love, more tender year by year.

With these, and Autumn at the door—What mortal man could ask for more!

—Thomas Curtis Clark, in the Chicago Tribune.

Weather, Wolves and Wireless

It has recently been suggested that wireless is to blame for the great drought in America, which has caused serious loss to farmers, and President Hoover has been asked what he intends to do about it.

Wireless seems to be a sort of "universal scapegoat." There are many people in our own country who blame it for the wet summer England experienced—in some places there was just double the usual rainfall during the holiday period.

Whether it affects the weather or not, wireless is certainly proving a boon in a number of ways, quite unconnected with entertainments. For instance, it is now used in some northern countries for hunting wolves. Microphones are suspended from fire-trees in likely areas, and whenever a pack of wolves starts howling near one of these instruments it advertises its presence to those who are listening-in, and a party of riflemen set out to deal with it.

CAUCASIAN BEES

Caucasian bees, a silver-gray variety from Russia, that make an extremely white comb honey and seldom if ever sting, have been raised with success at the New Jersey agricultural experiment station, says "Popular Mechanics Magazine." They produce as much honey as the usual Italian colonies, they swarm less frequently, and, during three years' experience with them, the bee specialist at the station has never been stung. The gray color is due to a growth of small hairs that cover the bodies, which are brown like those of other bees.

"No, we can't take a gramophone back after the customer has had it a year. Is there anything wrong with it?" "Aye—the needle's broke."

Tea must be fresh—SALADA is guaranteed to be fresh

Elusive Pigmies fo East Africa Deeply Interested in Whites

Boston Explorer Brings Back Relics of Livingstone and Stanley Expeditions

The elusive pygmy tribes of East Africa have disclosed one of their secrets to Col. Charles Wellington Furlong, Boston explorer, who returned home Sept. 9. It is that they are every bit as interested in the white men as the white men are interested in them.

Colonel Furlong spent 14 months in Africa, a part of which was passed in dwelling with the "little people" who call themselves "Manitabi." Gaining their confidence, Colonel Furlong was able to sleep in their dwellings, a privilege, he said, which they had accorded to no other white explorer.

"I believe the pygmies to be the most expert woodsmen of the jungle," he declared. "Many have the appearance of full-grown men. They are very primitive but not cannibalistic, very superstitious and move so quietly that you never know when one is around."

"They are peacefully inclined. Their huts are made like beehives and covered with branches of the jungles. Spears, knives and bows and arrows are their weapons for defense and hunting."

"Their currency for trading is anything they may possess that other natives may desire. Some pygmies are only three feet tall; others four feet. Their color is brown."

"Another interesting tribe I found was the Shilluck. The men and women are very tall, in many cases measuring seven feet. They live among the swamps, known as the sudd, along the White Nile. They are warlike, dwell in huts, congregate in tribes, and are great hunters. Agriculture and cattle raising are their principal industries."

Colonel Furlong brought back from Africa relics of the Livingstone and Stanley expeditions which he believes to be the last that can possibly be found.

"Chief Godoy, son of Chief Matubi, one of Stanley's firmest friends, gave them to me," he explained. "They include a spearhead which Matubi wore when he met Stanley, a bracelet and a letter written by Lady Stanley. They will be presented to a museum later."

"One of the greatest finds I made was a 90-year-old native named Chengwimbi. This elderly Negro had remained loyal to David Livingstone

during the perilous trip through East Africa to Zanzibar. The man's fidelity is direct proof of the qualities of affection and ideals in the hearts of men regardless of their color or race."

—from "The Christian Science Monitor."

Make dresses bright as new!

DIAMOND DYES are easy to use. Go on smoothly and evenly; NEW. Never a trace of that faded look when Diamond Dyes are used. Just true, even, new colors that hold their own through the hardest wear and washing. Diamond Dyes owe their superiority to the abundance of pure anilines they contain. Cost more to make. Surely. But you pay no more for them. All drug stores—15c.

AFTER EVERY MEAL

ISSUE No. 39—'30

Third Road to Riches

By Ursula Bloom, The Popular Novelist.

The lamp stood beside the old man's bed, on the round table with the chenille cloth. It was an oil lamp, for the old man was primitive. He was an obstinate old man, a stubborn old mule, with toothless gums, and a smoking cap pulled down over his long strings of grey hair. He had been in bed for nearly four years. Withered legs, which refused to support his stringy old body, rheumy eyes with still some of their old piercing sneer in them; an ugly old man with an ugly old mind.

He was reading the letter; it was a strange letter, written on wide, thick paper, more like a document than a letter.

Three weeks ago the little fool had run away. Nelly, his son's child, wilful, flaxen-haired Nelly, with some of her grandfather's stubbornness. Nelly, who would be his heiress two hundred thousand pounds. . . . He gurgled to himself as he recalled it. Two hundred thousand! A fortune. Taken from people who were too poor to stand up for themselves; people toiling in his factories, at the minimum wage for the maximum hour. That was how he had always worked them. It had done them good, he maintained, and done himself good as well—two hundred thousand pounds' worth of good.

Then he had wanted Nelly to marry. It had been his dearest wish to have a titled granddaughter. Lady Jeffries, that was what he had wanted. He had persuaded the man, Sir John Jeffries was old himself, and Nelly was pretty; besides, there were two hundred thousand pounds to come, and an estate badly in need of repairs. There hadn't been much persuasion necessary.

Only Nelly had refused. Head flung back in defiance, little stupid feet tapping the ground, insolent and arrogant; a man called Peter, some penniless clerk, and it should be he or none other. Granfey had been stung to fury; he had flung things at her. "Get out," he had ordered. "Think it over and let me know. If you marry him, not one penny—not one penny!"

And now this letter, more like a document, than a letter, neatly folded into three. She was so sorry, but she loved Peter; she was frightened because she knew how difficult it would be to live on love and five pounds a week after being used to all manner of luxury. She did not want to quarrel with Granfey, but her life was her own; he must leave his money as he pleased, and after all she did not want much, she hoped they wouldn't be desperately poor. . . .

He'd make her poor. He'd make her poor enough in all conscience. He pulled vigorously at the bell beside him. It was answered by Mrs. Perkins.

Mrs. Perkins had been in his service ten years; a tall, angular woman of no age in particular, greying black hair pulled back from a thin, high-cheek-boned face; a mouth that was thin and supercilious, foxy eyes set close, but a woman with a presence. She had always run the house very well, had Mrs. Perkins. She had always been solicitous for his comfort; she had warned him of Nelly, and he had bade her be silent, for in his own distorted manner he loved Nelly. He loved her very much indeed.

"I want one of the maids to go out and buy me a will form," he said.

Mrs. Perkins bowed. "It shall be done immediately."

"My old will is at the bank, leaving everything to Miss Nelly. I am going to change all that. I'm going to make a new one. . . ."

"She will marry the young gentleman, sir?"

"Yes."

Mrs. Perkins nodded slowly and solemnly. "I guessed as much; she never loved her old Granfey, not as she should have done. It wasn't my place to say anything, but I knew; course I knew. I couldn't help seeing things and hearing things."

"What did you hear?" His head craned forward on its thin neck where the yellow skin sagged in folds. "What did you see?"

"Well, sir, I hardly like to tell you. It doesn't seem fair, only she didn't care, not as she should have done. Not as I did." Mrs. Perkins dabbed her eyes with her handkerchief.

"Um."

"I've always cared, and it has hurt me; it has hurt me terribly."

He said croakingly: "Order that will form and come back here."

She went out with a flutter of silken skirts.

When Mrs. Perkins came back she stood impassively at the end of the bed. In the interval he had been turning over things in his mind; he had no one to leave that money to, no one at all, neither kith nor kin, and he had been thinking of the dogs' home, or the seamen's institute, or something of that sort. Now he said:—

"Supposing I left you the money?" And she answered, "Oh, sir, but I would not know what to do with it."

"Don't be a fool," he snapped.

Still she stood there with her hair pulled back sleekly from her forehead and her eyes glittering. They reminded him of snake's eyes; always had done, though he could not say why.

"I will leave it to you," he declared. She propped him up in bed. He scrawled along the form a brief will,

No farm relief needed here, say these pretty milkmaids competing in national farm girl contest at Los Angeles county fair at Pomona, Calif., recently

Smiling Modern Milkmaids

with a sentence blaming Nelly, and another leaving all to his faithful housekeeper, Mary Minnie Perkins. Then two of the housemaids fled in, nervously fingering their aprons and full of apprehension, and signed their names as witnesses. He fingered the thick paper; it was a vengeance that would pay Nelly out. A lifetime washing slinks, and living on a pittance; she would see love peel away and show through the shallow underlying banalities. She would not be able to keep hold of it. Nothing destroys love quicker than poverty. She would not only be losing his money, but her husband, and her love, and her life.

Late that night, when the old manor house was gutted, and the old man gone to his fathers, she drew the thick paper from her dress. It would be rather awkward proving how she gained possession of it; the coroner might make inquiries.

She bent over the fire in the cottage where she had taken shelter. She opened the paper and read, with smarting eyes:

"Dear Granfey, 'I am so sorry, dear, but I've made up my mind. I am just going to marry Peter. . . .'

Then, quite quietly, Mrs. Perkins fainted.—Tilt-Bits.

Salt Hints

Salt slightly moistened with water will remove stains from egg spoons. A little salt sniffed up the nostrils will relieve a cold in the head.

Sprinkle a little salt over the stove before beginning to fry. This prevents the grease from marking it.

A new broom will last longer if it is allowed to soak for an hour or so in cold water to which a generous amount of salt has been added.

Salt will remove all kinds of stains from enamel ware. Apply with a damp cloth, and rub well into the affected parts.

When cleaning matting, add a generous amount of salt to the solution. This saves much labor.

Moses met Ike in the street, and said to him, "You're lookin' very blue today, Ike. Vot's the troblin' you?"

"I'm bankrupt; that's vot's the matter." "Bankrupt, eh?" said Moses, "but vot did you settle on your wife?"

"I settle nothing on my wife," said Ike. "Vell, vot did you settle on your daughter?" asked Moses. "I settle nothing on my daughter," groaned Ike. "Vy," exclaimed Moses, "you are not bankrupt, you are ruined!"

When Borax Helps

If rain water is not available for washing lingerie, add a little borax to the washing solution. This renders the water delightfully soft and helps to loosen dirt.

Add a generous amount of borax to the water when washing the kitchen towels.

Add a little borax to starch. This gives materials a splendid polish.

When bathing sores and cuts, add borax to the water. This makes a soothing and healing solution.

"Then I may ask your father for your hand?"

"No, you silly thing! Tell him. Don't ask him."

SALT MANUFACTURE IN KOREA

The manufacture of salt in Korea is a government monopoly. The chief salt plants are located at Shusan, Kworyo Bay near Chinnampo, Keiki, South Helan and North Helan, Korea is still forced to import table salt from Japan, although the production of salt from local basins is increasing annually.

Julia—"Teddy used to boast that his love for pretty girls was just a passing fancy, but I hear he's married now." Charles—"Yes, he lingered too long in passing the last one."

TROUBLE

Trouble has a trick of coming butt end first; Viewed approaching, then you've seen it at its worst.

Once surmounted, straight it waxes ever small. And it tapers till there's nothing left at all;

So, whenever a difficulty May impend, Just remember you are facing The butt end;

And that looking back upon it, Like as not, You will marvel at beholding Just a dot.

"Say It in English" Is Berlin Slogan

Berlin.—The one advertising slogan everyone over here understands is: "Say It in English."

In rare cases where the English in these announcements is less clear than one finds in an English advertisement, the text usually gains in flavor what it loses in rhetoric. For example, a certain resort assures prospective visitors it has "a cure that cures rheumatism, gout, sciatica, neuralgia, golf, tennis and fishing."

Just a Life-Saver.

"Oh, save my hair! Save my hair! she cried, pointing to wig rapidly drifting out to sea.

"Madam," replied the gallant life-guard, as he took a firm grip on her shoulder, "I'm only a life-saver, not a hair restorer."

Sorrow wrings the sad soul, and bends it down to earth.—Francis Horace.

A sailor and his girl sat in the gallery of the music-hall clasping hands. They were very happy. They had just become engaged. "I'm yours and you're mine, Bill," she whispered.

"Will it always be so?" "Yes," said Bill. "I'll be yours all my life from now till the second of September, and from the third of December till death. In the time between the dates mentioned I shall be yottin' in the Mediterranean!"

Girl Guide News

Speaking of Hikes

Scene 1. The meeting place on the church steps.

Characters: One captain, one lieutenant, 20 Girl Guides.

Captain (looking at watch): "It's 10 o'clock and time to start. Stragglers get left behind. We'll ride till we get away from the city streets and so we'll need transfers. Louise, will you see how many we shall need?"

Louise: "Sometimes I count 20 of us and sometimes 31, I wish everybody would stand still for half a second so I could get 'em straight. Well, I'll count once more. Now everybody. Please stay still. Twenty-two, altogether, this time. And there come Jean and Mary down the street, and Betty trying to catch up—and here's the car now. Think he'll hold the car for them? (He does, and the Girl Guides board the car as the three late comers arrive breathless and a bit ashamed of themselves for not "being prepared.")

Scene 2. The open country road where cars also enjoy the fresh air.

Captain: "While we are on the highway we are to hike by two's and stay on the left hand side of the road. That gives the driver of a car coming toward us a chance to see our shining faces and know that we see him, too, and won't suddenly make a dive across the street. Hiking is one time when the left side is the right side!"

Louise: "Come on now, everybody in step and let's sing 'Everybody Happy.' I guess the man at that little store ahead there won't mind if we make some noise as long as we're out of the city. (Storekeeper waves as they go by keeping step to their lively songs. And the girls hold their heads a little higher as they overhear his remark. "Those Guides are a good lookin' line o' girls and what's more, they don't rush in my store and beg for drinks for the lot of 'em. They're polite, they are!")

Scene 3. At the camp.

Lieutenant: "Who wants to build the fire with me? All right. Dot and Barbara will clear the ground for the fire, while Jean and Betty go to the spring for water. I see most of the Guides have started for wood already. This Company sure has the spirit."

Any Girl Guide. (A little later): "H'm, this steak and bacon on a stick is yummy, Kabob, do you call it, Captain? And more fun than hot dogs, too. Need another stick on? I'll get one."

Captain (after the last cookie, apple and marshmallow have gone round the circle, begging to be eaten and everyone has looked sadly at them and wished in vain for more room under her belt): "Now for cleaning up. A Girl Guide leaves no sign that she has camped, except to leave the spot a little cleaner than she found it. Let's bury our treasure over here in the soft dirt. Any stick will do for a shovel, but did you ask what the treasure is? Why all our golden orange peels, of course, and all the other things that won't burn. And then we'll have a clean-up contest. Each girl may use only one stick; the one she used for her marshmallows will be all right. With the pointed end of this she is to spear every paper, bread crust, or anything else which doesn't belong here. The patrol with the greatest number picked up wins. No hands allowed. Begin!"

Scene 4. All Girl Guides have long since departed, hiking along to the tune of "Ninety-nine miles from home." Enters Man-in-the-Moon.

Smart Brides

Smart brides, in addition to tossing their bouquets to the lucky attendant who happens to catch it, have started the vogue of giving a new type of bride's bouquets to their bridesmaids and maids of honor.

This is a bouquet of perfume fragrances, instead of real flowers, a package of five different bottles of Paris perfume, arranged in a charming modernistic box of snowy white with silver base and trim in the form of a Maltese cross. Each bottle is a different scent.

EGRETS IN CANADA

Guelph.—Three American egrets, birds resident in the Southern United States and rarely reported north of the Canadian border, have spent the last two months on the farms of Alex. Neubauer and H. K. Ehrhardt, R. R. No. 6, Guelph. To ensure the protection of the birds the authorities have designated the farms as game sanctuaries, and hunting is forbidden on the premises.

Women are said to be more adaptable in acquiring a better accent and style of speech than men.

Counsel (for the defence): "Now what time was it when you were attacked?" Complainant (angrily): "I don't know, ask your client—he took my watch."

Fond Father—"Come, Tommy, even if you have hurt yourself a bit, you shouldn't cry." Tommy—"What's crying—for-then?"

British "baby" motor-cars are very popular on the Continent, more than 11,000 having been exported to France and 14,000 to Germany. In America, where they are made under licence, orders have been received for 167,000 to date. They are sold in the States for about \$140.

Premier Bennett's plan to find a permanent market for Canadian wheat and other agricultural products in Britain, together with his statement of policy to promote inter-Empire trade was made public through the Imperial Conference at London, just two months after he took office as Prime Minister of Canada.

The twenty-minute speech in which he made clear Canada's position and pleaded for mutually beneficial preferences as the only lasting foundation of Empire Trade development has been proclaimed in Britain as one of the most important declarations ever made by an overseas statesman.

Mr. Bennett took the question of Empire preferences out of the realm of vague platitudes and placed it upon the ground of definite realities. In other words the Canadian Premier abandoned after-dinner speaking and made a concrete practical offer to Britain and the other Dominions. If they will buy our wheat we will give them better preferences for their goods. There was no beating about the bush in what Mr. Bennett had to say. He did not set himself up as a saviour of the Empire and made no pretence that he was not animated first by a desire to help Canada. The primary concern of Canada, he declared, was to find a profitable market for her wheat.

"This market we want, and for it we are willing to pay by giving in the Canadian market preferences for British goods."

"I offer to the Mother Country and to all other parts of the Empire a preference in the Canadian market in exchange for like preferences in theirs, based upon the addition of a ten per cent increase in the prevailing general tariffs, or upon tariffs yet to be created."

That is that. If the people of Britain are really anxious for a preference in Canada's market, if they really want to sell us more goods, if, in other words, they are concerned in a practical way with the matter of Imperial trade, their chance is now before them. Mr. Bennett is now interfering, not trying to interfere, with their domestic fiscal policy. He has merely taken hold of something that everybody has been talking about and professing to want, reduced it to an offer, to a plan.

The advantages of the proposition are obvious.

It avoids the clear impossibility of what is known as Empire Free Trade. It gives British manufacturers an average in Canada's markets without endangering the position of our own manufacturers.

It provides for still higher duties in some instances much needed—against countries like the United States.

It in no way interferes with the policy of adequate protection for all Canadian industries.

It provides for the best of all permanent markets for Canadian wheat. By providing this wheat market, profitably, it should reconcile the western farmer to a policy of protection for industry.

Whether the British people are prepared to accept Mr. Bennett's offer, remains to be seen. It may indeed, take some time to find out. Mr. Ramsay MacDonald and Mr. Philip Snowden, traditional free traders, may well raise the old cry about taxing British food, but while Mr. MacDonald and Mr. Snowden are presently the Government of Britain, they are not the people of Britain. And a lot of water has run down the Thames since the days of Joseph Chamberlain.

Nor is it at all sure that Mr. Bennett's proposal would tax British food, or to be more specific, make British food dearer. Why should it make it dearer if the Empire has enough food to supply its own needs, supplies it at a reasonable price? The rest of the world is not anxious to sell wheat at less than a profit.

The compensation which Mr. Bennett offers Britain in return for a preferential market for Canadian wheat is the regular employment of thousands of British workmen in industries which will be granted a concrete preference for their products in Canadian markets.

These industries would produce for Canada a large percentage of the \$600,000,000 worth of manufactured goods which we now import annually from the United States.

The Canadian Prime Minister made it clear that he did not propose any trade agreements that would be harmful to established Canadian industries or to those yet to be created. Apart from such industries Canada

will be compelled to import from three to four hundred million dollars worth of goods per year which can not be economically produced in Canada. It is in the supplying of such goods that Mr. Bennett is ready to extend material preferences to Britain against foreign countries provided that Britain is ready to establish a permanent and reasonable profitable market for Canadian agricultural products.

Mr. Bennett suggested that the various units of the Empire devote six months to a definite and detailed study of all the angles of his plan and then meet in conference in Ottawa early next year to proceed with the consideration of its adoption.

Thus far the reaction amongst the British public may be considered favorable. It will, however, take probably two months to accurately gauge sentiment and it may take a longer period and momentous political developments in Britain to bring about any definite acceptance of the scheme.

In the meantime Canadians together with the rest of the world have with characteristic promptness been placed in possession of Mr. Bennett's policy for dealing with one matter of vital interest to Canada—marketing of wheat.

If Britain is not disposed to embrace his general policy it may be expected that Canada's Premier will find other solutions of the problem.

CUSHING WEST

Mr. Owen Keatley spent last week in Ottawa.

Mrs. Doig, of Hoosier, Sask., is visiting Mrs. C. L. Cooke at present.

Mr. A. C. Pinkerton of Montreal, spent the latter part of the week at his home here.

The Misses Muriel and Norma Cooke, spent Saturday with friends in Gretnville.

Mrs. S. O. Hartley and family also Mr. and Mrs. C. B. Cutten spent the week-end at their Cushing residence.

Mrs. J. Matthews, of Stardale, and son Mr. Willie Matthews were the guests of Mr. and Mrs. G. Nicholls last Sunday.

Mr. A. C. Pinkerton and Miss M. Nicholls motored to Ottawa on Friday and also visited Log Lodge at Lucerne.

Mr. and Mrs. J. Thompson of Athens, Ont., motored down and spent several days last week guests of Mrs. Usher.

Mr. and Mrs. L. M. Whinfield, of Calumet, also Mrs. J. McAbbey, of Piedmont, Que., were guests of Mr. and Miss Whelehan on Thursday evening.

Mr. and Mrs. Ray Dawson, of Stonefield Heights, accompanied by Mr. and Mrs. C. F. Watson, of Cushing motored to Montreal and visited friends last Sunday.

Mr. and Mrs. Neil McCallum and daughters, of Harrington, and Mrs. J. John, of Peterboro, Ont., were guests of Mrs. Usher and Mrs. O. E. Leroy on Sunday last.

Miss Whelehan spent Monday as the guest of her sister Mrs. E. Funcheon, at Monalea, where Mrs. E. J. Mahoney, of Montreal, and Miss T. Robert, of Lachute, were also visitors.

Guests of Dr. H. B. Cushing at his residence here last Sunday were Mr. Thomas Gillispie and Mr. M. L. Williams, of Montreal; Mr. Walter and Miss Florence Cushing were also visitors at the doctor's residence on Saturday.

ST. ANDREWS EAST

The Misses Evans, of Toronto, are spending their holidays at Col. Evans home.

Mr. and Mrs. W. F. Drysdale have returned to the city for the winter.

Mr. and Mrs. Stracan of Montreal, were the week-end guests of Mr. and Mrs. J. Irwin.

The Green Keepers of the various Golf Courses spent Wednesday here.

Mr. Blundell was the guest of Mr. and Mrs. Ball for a couple of days.

Mr. and Mrs. Cowan spent the week-end in Brockville, visiting their two sons.

The St. Andrews "Inn" is getting quite popular for Tourists passing through on their way to Lucerne.

The Professionals of the Quebec Golf Association played over the St. Andrews Golf Course on Monday.

Major F. and Mrs. Shorey spent the week-end on the Hill, enjoying the beauty of nature, surrounding their home.

Here and There

(613)

The first electrically-driven tug to be built in Canada was launched at Lauzon, Quebec, recently, when the "Prescott", Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott and Ogdensburg, slipped into the waters of the St. Lawrence after the traditional bottle of champagne had been broken against her bows by Mrs. M. McDuff, wife of the manager of the Canadian Pacific Great Lakes Steamship service. It is the first electric tug to be built in Canada, and is designed to tow a three-track railway car-float with accommodation for 16 hundred-ton cars.

Canada is taking advantage of all opportunities to fight tuberculosis and I think is far ahead of England in the matter of sending students to sanatoria to make an intensive study of the subject, said Dr. J. A. Coutts, of London, member of the group of British Tubercular experts, interviewed aboard S. S. Montcalm, on his return to England after some weeks' stay in the Dominion.

Now—an Illuminated Cooking Top

no more standing in your own light!

EVEN if your range must be set in the dimmest corner of the kitchen, you can always have plenty of light.

For the new Hotpoint Hi-Speed Range now has a sixth exclusive feature—the Illuminated Cooking Top. Just switch on the lamp conveniently located under the warming shelf, and immediately you flood the cooking top with light.

Only on Hotpoint will you find Hi-Speed Elements . . . Super-Automatic Oven Control . . . sturdy All-Steel Construction . . . Stain-Resisting Enamel Finish . . . and the Economy Cooker.

Choose from a wide variety of models, and take advantage of Hotpoint's convenient terms.

The New Bell Telephone Building in Lachute

The Bell Telephone Company's new office on Water Street is fast nearing completion. Manageress Miss E. Rodgers states that the building will be ready for the installation of equipment by Nov. 1st, and a month or so later will be open to the public.

The new structure is a splendid addition to Lachute's business buildings

and marks the local expansion of the Bell Company. In this respect it is interesting to know that since 1923 over 130 telephones have been added to the local system, bringing the total at August of this year up to 549 telephones.

The new building which is of an attractive design is finished in red brick. In addition to the operating

and equipment rooms there is a large public office. The equipment being installed is of the latest magnetic design and will be adequate to meet the future demand for some years.

The construction of this building at this time is evidence of the faith of The Bell Telephone Company in the future of Lachute and vicinity.

CUSHING

Mr. and Mrs. A. Graham were the guests of Mrs. R. Black, of Mabel, on Sunday.

Mr. Herbert Macomb, of St. Chrysostome, was the guest of Mr. Roy Hobbs over the week-end.

Capt. and Mrs. J. D. Weir and family, of St. Anne de Bellevue, spent Sunday in Cushing.

Mrs. L. M. Gaston spent several days at the home of her father, Mr. A. Grey, of Hawkesbury.

The W. M. S. of St. Mungo's Church met at the home of Mrs. T. Weir Sr. on Tuesday of last week.

Mr. and Mrs. Alfred Britton and some of Montreal, paid a short visit at the home of Mr. and Mrs. A. Graham, on Sunday, en route to Lucerne.

Mr. and Mrs. McDiarmid also Mrs. Burton and daughters, of Montreal, were Sunday guests of Mrs. J. Cleland.

Miss Annie Fuller, of Ottawa, and Mrs. Bert Webb, of Montreal, were guests of Mr. and Mrs. Frank Fuller on Thursday.

The Frontier Women's Institute held a very pleasant meeting at the home of Mrs. Jas. Beattie, of St. Philippe, on Tuesday last.

Communion Services will be held in St. Mungo's Church on Sunday morning, October 19th, with preparatory Service on the Friday night before.

Among those expected to take part in the programme at St. Mungo's Harvest Supper on Friday night, of Oct. 24th, are the Messrs. Collmar, Guitar-players; Mr. J. Vernon, baritone singer; Mr. J. Russell, tenor; Mrs. W. Legge, soprano; Mr. Claydon, comic singer; Mrs. Claydon, accompanist.

THE LATE MR. A. GRAY

We regret to have to report the death of Mr. Alexander Gray, of Hawkesbury, Ont., at his home, on Monday, Oct. 13th, at the age of 83 years. Mr. Gray was a much respected resident of Cushing, for some time occupying the farm now owned by Mr. O. E. Leroy.

The funeral took place on Wednesday afternoon from his late residence, the service was conducted by the Rev. A. J. Back, of Hawkesbury, Presbyterian Church, interment being made in Chute au Blondeau cemetery. The number of beautiful floral tributes paid silent testimony to the departed.

He leaves to mourn his loss his widow Mrs. A. Gray, of Hawkesbury; three daughters and three sons, Mrs. Peotter, of Milwaukee, U. S. A.; Mrs. L. M. Gaston, of Cushing; Mrs. J. Boulton, of Battleford, Sask; Mr. Thomas Gray, of Detroit; Mr. Charles Gray, of Battleford; & Mr. W. Whitney Gray, of Biggar, Sask.

GRENVILLE BAY

Mr. W. McCullough spent a few days in Montreal recently.

Mr. and Mrs. Earl Gray were welcome visitors at the Cottage Sunday.

Miss Jennie Bates visited Mrs. Brechin last week.

Mrs. T. H. Gray, of Montreal, spent a week-end with Mr. and Mrs. Brechin recently.

We are pleased to learn that Mrs. Edgar Larose will be home this week, after being five weeks in the hospital.

We are sorry to report that Mr. Thos. McMichael is still confined to the hospital.

Sunday visitors at the cottage were Mr. and Mrs. Hugh Boyd, of Arundel, also Mr. George Moncrieff who is spending this week with his sister, Mrs. J. Brechin.

Mrs. Robert Gray and son William also Mr. and Mrs. Eddie Gray and twin daughters and son Earl, all of Gray Valley, spent a Sunday afternoon with Mr. and Mrs. Brechin recently.

Purity Flour Cakes Keep Fresh

A cake shown at Toronto Exhibition made from this Recipe kept fresh for five days in the heat and air without protection. Make it today—with Purity.

1 cup of white sugar, 1/4 cup butter, cream together, add 3 beaten egg yolks, 1/4 cup milk and water (dulse-warm), mix 3 teaspoons baking powder in 1/4 cups of PURITY FLOUR, pinch salt, 1 teaspoon vanilla, beat egg whites stiff and stir in mixture. Bake in moderate oven (375°) for 20 minutes.

PURITY FLOUR

Purity is a strong, rich flour made from Western hard wheat—gives you that "better flavor" baking you want. "Still the best for bread."

Send 30c for Purity Flour Cook Book.

Western Canada Flour Mills Co. Limited, Toronto 30c

Look for our Company's name on the Purity Flour sack. It is your guarantee of quality from a responsible milling concern.

Keep FIRE at Bay with GYPROC

FIRE seldom visits houses having Gyproc Wallboard ceilings, partitions, walls and sheathing. On the contrary Gyproc has saved many homes.

This pioneer Canadian fire-safe gypsum board has a new Ivory coloured finish this year that makes decoration unnecessary (when panelled). It is just the thing to use for making extra rooms in the cellar or attic.

Quickly erected, inexpensive, structurally strong, Gyproc Wallboard gives permanent fire protection.

Your dealer's name is listed below. Ask him today for full information or write for interesting free book, "Building and Remodelling with Gyproc."

A VISIT WITH HIS DADDY

Evening rates on "Anyone" (station-to-station) calls now begin at 7 p.m. Night rates begin at 8.30 p.m. Just give "Long Distance" the number you want—it speeds up the service. If you don't know the distant number, "Information" will look it up for you.

Twice a week Jimmy stays up until eight-thirty. Daddy is on the road but he doesn't want to become a stranger to his son. And so, every Monday and Thursday evening, he pays a visit by telephone.

It doesn't cost much because he waits until eight-thirty when the lowest night rates begin. It amounts to about the price of a movie for a call and in return he gets something beyond money—the voices of his wife and his little boy—a touch of home—moments of affection for them all to remember and look forward to.

Many people away from home are using the telephone these days to have regular visits with their families. Out-of-town calls are so simple to make and they are quick and inexpensive. They are the next best thing to being really home.

Your Grocer

Do you know your grocer and do you co-operate with him in trying to save his time and your money? We are familiar with the housewife who comes into the store, not knowing what she wants, and wastes valuable time of the clerk's and keeps other customers waiting while she tries to make up her mind.

A shopping list prepared at home would have avoided this. One cannot always know what attractive things will be in the market, but these can be promptly picked up as extras. The woman without a shopping list is likely to phone to the grocer, after she gets home, and order something she forgot, requiring an extra delivery. We all have to pay the overhead in the up-keep of the grocery, and many such customers demand extra clerk hire and delivery service.

It is possible to do your marketing outside of the regular daily rush hours, which are from eleven to one and five to six o'clock. You will get better attention and save the grocer rush and annoyance. It helps if you know the location of the various goods in the store and make your order accordingly, not expecting the clerk to chase from one end of the store to the other to show you a cheese or a box of prunes.

Some customers will pinch every peach and fee of the food carelessly, increasing its tendency to spoil. If you do this, you should purchase it yourself and not leave it for the grocer to sell to another.

Consider the size of packages. The larger size is cheaper, in proportion to its contents and is economy if you can use it to advantage.

Calories and Reducing

It is almost impossible to reduce by resolving to eat less, in a vague, general way. The only sure and scientific method is to count your calories and know how much you are eating. This is not as difficult as it seems. Maintenance diet for a man at hard work is 2600 calories daily; for a woman at hard work, 2400; for a woman at light work 2200. If you are a short person about 1700. To reduce, you must eat less than that regular maintenance diet; about 1200 calories or less a day.

Knowing the caloric value of a few common foods, you can estimate that of similar foods. The following list will help:

Slice of bread or toast, 100; cracker, 25; muffin, griddle cake, 150; wafer, cornbread, 200; piece of pie, cake, pudding, ice cream, 300 to 500, depending on size and richness; teaspoon sugar, 100; chocolate cream, 100; almond, double peanut, 10; half walnut, 15; cup unsweetened gelatin, 50; pat of butter, 100; tablespoon cream, 40; cup skimmed milk or buttermilk, 80; cup whole milk, 140; cheese, inch cube, 100; meat, small helping lean, 100; fat, 300; one egg, 75.

Fruits—apple, peach, fig, slice pineapple, dish berries, 50; one banana, large orange, pear, 100.

Vegetables—Large helping raw, 15; half cup cooked watery vegetables, 25; starchy vegetables, 50; lima beans, baked beans, dried peas, half cup, 400.

Cereals—Half cup cooked to mush 150. Prepared all-bran, half cup, 25.

In estimating fried or sweetened foods, the fat and sugar added must be counted.

In reducing, eat a variety, but Count Your Calories and keep as near 1000 or 1200 a day as possible. It will make you more comfortable if you eat generously of vegetables and fruits and filling foods of low caloric value.

Beautiful Hands

Washing the hands frequently or having them much in hot water dries the natural oils of the skin and makes the hands wrinkled. Do not put your hands in hot water more than is absolutely necessary. Use tepid water instead. Wash the hands with soft water and a mild soap and rub them with a cut lemon to counteract the alkali of the soap. Rub in the lemon before the hands are dried.

A hand lotion massaged into the hands every night, often if the hands are rough, will replenish the natural oils. If the lotion is not absorbed, and threatens to soil the sheets when you retire wear a pair of clean cotton gloves at night. To wear gloves as much as possible will help to retain the beauty of the hands—rubber gloves when scrubbing about the house, canvas gloves when doing rough work in the basement or garden, kid and fabric when on the streets or travelling, to keep the hands clean and to protect them from the drying effects of sun and wind and from becoming chapped.

Fashions, Fads, Follies

Hamlines are coming down. They now are twelve to thirteen inches from the floor for daytime, shorter for sports; eight inches for late afternoon, with a few reaching the ankle; instep or floor length for evening.

Daytime silhouettes are straight with slight flares. Boleros, or short jackets; poplins; deep boucans and ruffles are frequent. Sleeves are doing strange things. They may be

plain, have capes from the shoulder, be puffed above the elbow or bell shaped below it. The bell sleeve often has a tight inner sleeve. Many afternoon dresses have short sleeves.

Belts are at the normal waist line. Fabrics most used are plain woolsens, light weight knit fabrics, monotone tweeds, Scotch plaids, heavy silk velvets, laces, satin, broadcloth. Colors are green, with a yellowy green for evening; warm browns and maroons and black, with an off-black, a dark prune, called "ink." Color combinations, new and unusual, feature this season. We have pink and red, red and blue, black and turquoise, and green and blue. The one-piece, lightweight wool dress is very popular.

Hats are worn astonishingly far back on the head; or diagonally, up on one side, down on the other. The double brim is new, cut and folded in clever ways, either up or down. The beret-hat, like a skull cap, covers about that much of the head. It may show hair generously all around. There is more than usual variety in this season's hats.

A Man's Room

Men and women have different tastes in room decoration as well as in most other matters. The woman's room will be dainty, ornamental, perhaps fussy. A man prefers his room, sturdy, simple, comfortable, with splashes of color.

A man likes a large able or desk in his room. He will spread out his belongings or work on this. He likes a large comfy chair, leather covered, with a footstool near and a reading lamp beside it. At one side he wants his elbow table of magazines, while his book case is within easy reach. A cabinet with many drawers is a convenience for his belongings. On this, instead of a vase or statuette he prefers a ship model to stir his imagination. The draperies of his room he likes full of color and perhaps gaily flowered.

Perspiration

If the sweat glands of the underarm and feet are excessively active, they may be made less so by the use of a twenty-five per cent. solution of aluminum chloride in distilled water. After a bath, dab this on and allow it to dry. Do not put on your clothing until it is dry. Do this twice a week, twenty-four hours apart, during the first week. After that once a week will be enough.

Morning Prayer

"Now I get me up to work.
I pray Thee, Lord, I may not shrink
If I should die before night.
I pray Thee, Lord, the work's all right."
—Selected.

Love of Life

Love you not the tall trees spreading wide their branches,
Cooling with their shade the sunny days of June?
Love you not the little bird lost among the leaflets,
Dreamily repeating a quaint, brief tune?

Is there not a joy in the waste windy places,
Is there not a song by the long dusty way?
Is there not a glory in the sudden hour of struggle?
Is there not a peace in the long quiet day?

Love you not the meadows with the deep lush grasses;
Love you not the cloud-flocks noiseless in their flight?
Love you not the cool wind that stirs to meet the sunrise;
Love you not the stillness of the warm-summer night?

Have you never wept with a grief that slowly passes;
Have you never laughed when a joy goes running by?
Know you not the peace of rest that follows labor?
You have not learnt to live then; how can you dare to die?
—Tertius Van Dine.

Thoughts on Books

Employ your time in improving yourself by other men's writings.—Socrates.

The writings of the wise are the only riches our posterity cannot squander.—Landor.

It is chiefly through books that we enjoy intercourse with superior minds.—Channing.

The value of a book consists, not in what it will do for our amusement, but in what it will communicate.—Grindon.

The novel, in its best form, I regard as one of the most powerful engines of civilization ever invented.—Herachel.

Would you know whether the tendency of a book is good or evil? Examine in what state of mind you lay it down.—Southey.

He who writes for fools finds an enormous audience. Of bad books we can never read too little; of the good never too much.—Schopenhauer.

Teacher: "What are the constituents of quartz?" Bright Boy: "Pints."

President Elect C. W. N. A.

Roy Sayles, of "The Renfrew Mercury," Renfrew, Ont., General Manager of the Association.—(Canadian National Railway's Photograph.)

MASTERPIECE

They Stifled an Exclamation as He Threw Back the Cover With a Dramatic Gesture

By George Godwin

When Carlton Grant was translated from the prim sedateness of an English county town to that gay whirligig that is life in the Latin Quarter of Paris, it was but natural, perhaps, that he should have sought romance.

"Romance?" Julien Croissart shrugged. "Sometimes, mon ami, life is a romance, but always it is a riddle—the riddle of how to conjure from stony hearts the credit necessary for such excellent work as this."

They were seated in the Cafe des Cubistes. Julien Croissart sat down his empty glass on the red-and-white check table cover and sighed.

A borrowed tube of gamboge—their attelers faced one another across the top landing of a crazy old building—had started this friendship between the young Englishman and the happy-go-lucky designer of strange, and sometimes even staggering, posters.

In a month they were bosom friends. "But, my friend," exclaimed Croissart, his dark eyes sweeping over the motley crowd of students and artists at the little tables, "there it comes, yes! On two legs, under a big sombrero, and with many whiskers."

"What comes?" asked the puzzled Englishman.

"Why, romance, of course," answered Croissart; "but come, we will talk with him."

The young artist rose and went to meet the bearded giant whose mighty mane gave him the appearance of some old Wotan of mythology.

"Cher maitre," he greeted him, "you will drink a bock with me and meet my friend"—and he shot a significant glance towards his companion—"a great admirer of yours, cher maitre."

These words produced an electrical effect upon the giant. He lumbered slowly and clumsily towards the table and sank into the chair.

"So monsieur knows my work, and monsieur admires—greatly admires, hein?"

"What my good friend admires most," cut in Croissart, "is the 'Astarte' in the Luxembourg."

Carlton Grant was gazing with awe upon one addressed as Master.

Maitre! This was indeed luck. This was the real thing.

Carlton Grant had met students in plenty, and artists, too. But chiefly of that sort whose masterpieces are to be painted upon a to-morrow which never arrives.

"That is the misfortune, the penalty of fame," boomed the bearded maitre. "My 'Astarte,' what is it? A mere trifle, an indiscretion of my youth—in the very early manner."

Carlton Grant now realized that, if he was to avoid a blunder, he must talk with care. Yet, for the life of him, keen student of Modernism that he was, he could not recall a great modern painter named so picturesquely, Camille de L'Orme.

He had managed to stammer out a few faltering compliments when he was saved by the source of danger himself.

"Ah, monsieur, as your English friend so greatly admires my work, he must see my masterpiece, for, my dear Julien, it is now—finished!"

"I shall deem it a great honour, cher maitre," spluttered Carlton Grant, enchanted at such condescension. He was rewarded with a vivid smile and a long and mysterious gaze from the great man's strange, secret eyes.

"Then, at once—now!" The giant was already on his feet, and so quick of movement that he overturned the chair, and swept from the little table his beer glass.

"Come!" he commanded, "we will go at once." And there was a note of urgency in his deep voice.

Julien Croissart shrugged his shoulders. "Charmed," he murmured without enthusiasm; and, linking his arm in that of the immortal—a familiarity that scandalized the Englishman—he moved towards the door.

"What I will show you," boomed de L'Orme over his shoulder, "is my

"Dance of Spring," my chef-d'œuvre. It is finished."

Ten minutes later they had climbed the steep stairs of the eyrie of le maitre. There was nothing about this habitation to suggest fame or success; it was, indeed, eloquent of poverty, failure, and decay. But Grant told himself that this was not England, but Paris, the Latin Quarter, and a French genius. Did not Verlaine live in squalor?

"Madame will be enchanted," boomed the great voice, as their host waved them, with a royal gesture, towards the open door of his atelier.

A light flared up from within as a lamp, borne aloft by a woman, illuminated the darkness of the entrance. Carlton Grant saw a slender woman with a pallid face whose beauty was marred by the pittings left by smallpox.

"Ah, messieurs," she chirped, "it is not everybody who is permitted to see the 'Dance of Spring.'"

She turned to the young Frenchman.

"You know, do you not, monsieur, how much persuasion my husband usually needs before he will uncover his masterpiece?"

She laughed gaily, but something in that voice chilled the heart of the stranger. This woman, he told himself, was playing a part—but what part? Her face was a mask of tragedy.

Madame de L'Orme, placing her hand on the arm of her husband, moved towards the closed door of the atelier. A moment later they were in the Master's studio. It was a bare, whitewashed apartment, canvases stacked against the walls, in the centre a big easel shrouded in a dingy linen covering.

Le maitre advanced to the centre of the room, his great body casting a shadow before him. The two young men followed on the heels of the woman with the lamp.

"Monsieur," boomed de L'Orme, "you are well acquainted, as you have yourself told me, with my work. Bien! Now you shall see the full flower of my genius!"

The great figure lumbered towards the canvas, hands outstretched to remove the coverings that hid the great work of art. With a dramatic gesture he drew the covering aside. "The Dance of Spring!" he announced. "The masterpiece of Camille de L'Orme!"

Grant stifled an exclamation as Croissart, seeing the amazement on his face, gripped his arm and signalled with tense fingers. There was silence. The two young men were close together, the woman with the lamp, the bearded figure beside—what?

No masterpiece, this, but a frightful jumble of colour, a riot without design, coherence, meaning, a ghastly blotch.

"You say nothing?" came the deep voice, now vibrant with excitement. The speaker shrugged his massive shoulders.

"It is easily understood. Take your time, my young friends, take your time. 'The Dance of Spring!'—Look well, for here have I captured as never before all the beauty of the world, the great world of sun and flowers, the world of the pink and white blossoms. Yes, here you see the world of Spring—the world of youth." He paused, and continued: "Consider the nymphs, mark well the dappling upon litha bodies as they play in the shade."

The voice ceased. The lamp swayed in a slow circle, the shadows of the men revolved like beams from a lamp of darkness. Then again his voice:—

"Presently, gentlemen, you shall say your hearts I know are gathering in your hearts."

The Englishman looked at the speaker and from him to the woman. He saw a quiver, very slight, but accentuated by the shadows, play about

Lost Literature Found in Verse

Mexico City.—Much of the "lost literature of the Aztecs" has been discovered by John Hubert Cornyn, a Canadian, who is professor of Aztec language and literature at the University of Mexico.

Professor Cornyn has encountered a series of epic Aztec poems, which he has translated into English and published in book form under the title, "The Song of Quetzalcoatl."

Professor Cornyn contends that while Aztec documents have been destroyed the literature was kept alive by oral transmission from generation to generation and that a collection was made by Bernardino de Sahagun, a Franciscan monk, who came to Mexico from Spain in 1529, eight years after the Conquest.

The poetry compiled by Professor Cornyn is in style similar to Longfellow's "The Song of Hiawatha." It deals with the gods of the ancient Indians, with the setting at Tula, in the State of Mexico, which was the old capital of the Aztecs. The principal of the mythical deities with which the "songs" deal was Quetzalcoatl, God of the Wind, who departed from Tula after a struggle with his jealous brother, Tlilacahuan, God of the Moon.

Professor Cornyn plans to depart soon on a tour of the United States, where he will lecture at schools and colleges on the mysteries of the Aztecs. He was educated at the University of Toronto and studied in the United States, Germany and France. He has been a professor at Birmingham Southern College, and at Southwestern University. He is the author of "Around the Wigwam Fire," and "When the Camp Fire Burns."

her dolorous mouth. Pain was stamped upon the pitiful pitted brow, but in the deep eyes only love looked out, the love of a woman for a little child.

Then he heard himself saying: "It is marvellous, marvellous. It is not a painting, it is Spring itself. Surely you have Spring in your heart that you could paint thus!"

"It is enough." As he spoke, Camille de L'Orme advanced upon his strange masterpiece and reverently covered it.

"It is for the nation," he explained. "It is for France."

Five minutes later the two friends were out in the darkness of the narrow street again. Overhead the stars climbed up above the high walls of the leaning houses, and from afar, mysterious and alluring, came the throb of the city's heart. Julien Croissart lit a Caporal cigarette.

"You English say of us that we are logical, but without sentiment," he remarked. "Well, it is not true."

"It is certainly true sentiment that does not mock the mad," said the Englishman, sighing.

"The mad, mon ami, are to be pitied," Croissart shrugged.

"And those who love them too."

"Ah!" exclaimed Croissart, "now you are thinking of Madame. Yes, fifteen years ago she earned money as a model, for she was indeed beautiful. Doubtless, like you, mon ami, she sought romance—and found it in her handsome Louvre attendant." For a while he was silent. Presently he began to talk again, as though to himself. "But life plays tricks upon us," he said; "smallpox ravaged the little beauty."

"And her lover deserted her? . . ."

Julien Croissart stopped and gazed at the lean, keen face of his friend.

"But, no!" he exclaimed. "You do not understand? Did you not see the way she looked at him to-night? It was after they were married that his mind went—after the smallpox through which she nursed him."

"But the name?" put in the other.

"The name?" Croissart laughed. "Know, my friend, that in the archives of the Prefecture there is the dossier of one Andre Dubois, formerly of the staff of the Louvre, and now a madman calling himself Camille de L'Orme," he explained.

They walked in silence for a space. Carlton Grant was seeing the tragedy of it all so clearly. "Poor fellow, imagining himself the creator of such masterpieces as those among which he had spent his working life."

At length he said: "I suppose in his mad eyes that ghastly daub is a beautiful picture in which the splendours of all the springtime are held captive!"

Croissart swung about, sending his spent cigarette, like a little red comet, into the night. For a moment he gazed at his friend with astonishment in his soft eyes. Then he exclaimed:—

"Is it possible that you have not understood—that you do not see? It was the smallpox which made him mad—but first it made him blind."

Half an hour later they were once more in the Cafe des Cubistes. Before them stood a waiter, white-faced, weary-eyed.

Julien Croissart was searching his pockets with diligence. Presently he abandoned the search and turned to his friend.

"I have found the romance for this evening," he smiled, "is it not so? Very well, it is for you to find the solution of my eternal riddle; at this moment, how to pay for these two drinks."

Industrious School-Boys

Boys from St. Marylebone grammar school, London, Eng., are here seen digging out their own swimming pool during their recent holidays at Forest Green, Surrey. About 32 boys took part in the work.

Pale Faces

Jaded Nerves

Due To Weak, Watery Blood.

Anaemia — impoverished blood — comes so stealthily that it is often well advanced before recognized. Fatigue and discomfort, the earliest manifestations of the trouble, are seldom taken seriously. Soon the face becomes pale; the nerves jaded; the heart palpitates violently after the slightest exertion; the appetite becomes fickle and before you realize it you are in a terrible plight.

At such time, by enriching and purifying the blood, Dr. Williams' Pink Pills will build up the nerve cells and correct the run-down condition. Concerning them Miss Margaret Torrey, Toronto, Ont., says:—"I suffered a complete breakdown. My heart would palpitate on the least exertion. Nothing I ate agreed with me. I started taking Dr. Williams' Pink Pills and by the time I had taken several boxes I was ready for anything; I had gained in weight and every distressing symptom had left me."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Treasure Chest Is Found on Lost Ship

Gold Found in Rotting Pouches on Ill-fated "Islander"

Olympia, Wash.—High hopes for success of as fantastic and daring an undersea adventure as ever was written in fiction were raised here when Carl Wiley recovered a small portion of the gold of the lost steamship *Islander*. Rotting buckskin pouches containing \$3,700 of the metal were recovered. That was merely a sample of what local backers of the Olympia diver expect to recover.

Three hundred feet below the surface of Stephens Passage and off the desolate Southeastern Alaska coast lies the wreckage of the *Islander*. For twenty-nine years she had been a treasure chest waiting to be opened.

On August 15, 1901, the ship was steaming home, loaded with returning miners from the Alaska gold field. She carried a fortune in nuggets and dust, estimated at between \$300,000 and ten times that amount. At full speed she struck an iceberg, lurched crazily and plunged for the bottom. Seventy-two passengers were carried to their deaths.

Many attempts were made to salvage the great treasure, but all failed because of the depth at which the *Islander* lay, and because of the rushing current.

Five years ago Wiley made his first attempt. He failed and, his own resources gone, he interested a few small backers here and in Seattle.

This year he had constructed in Olympia a diving bell of his own invention. After months of failures and accidents, it finally raised the first of the gold. In an egg-shaped diving chamber, Wiley operates a long claw-like arm, probing through the debris of the wreckage.

Men Are Like That!

Men can be so terrible,
Men can be so mean;
Sometimes hardly bearable,
All that I have seen.
Why do women stay with them,
Scorning all advice?
Well, they have a way with them—
Men can be so nice.

Men are unreliable,
Women often find;
Men can be so pliable,
Men can be so blind.
Women keep forgiving when
Just as women would—
There are days of living when
Men can be so good.

Men can watch so jealously
Every word and deed;
Men can look so zealously
Where there isn't need;
All the doubting Thomases
Why do women hear?
Men can make such promises
At times can be so dear!
—Douglas Malloch, in "Answers."

"Isn't it awful the way she carries on with that married man?"
"Yes, but what a blessing they are here. This place would be intolerably dull without them."

"I see no reason why a man shouldn't be polite to his wife after divorce," says Cosmo Hamilton. And it really wouldn't hurt him to stretch a point and be polite to her before divorce.

Minard's Liniment a household friend.

Famous Pass Defended

English army bombing plane in flight over Khyber Pass, gateway to India, during recent outbreak among mountain tribes.

Owl Laffs

You are the joy of my life. Thou who wraps me in thy all enveloping presence. I press you to my body and thank the "god" that gave you to me for your warmth and beauty of your nature. At twilight when the whole world dreams and goes romancing, you are my all, my only comfort, my joy. When the day is done and shadows fall I crawl into thy welcome embrace and dream dreams, rosy dreams, golden dreams, for I know you are mine—all mine. I tingle at your touch. I thrill at your every movement. You're so warm, so yielding, so glowing, and I am once more at peace—the world is quiet and still—and I am alone with you—My Bathrobe!

No one is perfect, and that's why we all have a chance to make a showing.

Sweet Young Thing—"I'll positively never marry a man who snores."
Anybody—"Good idea, but how are you going to find out?"

There's a certain young man whose friends all call him Moses, because when he opens his mouth the bull rushes.

The fast eater has what you would call "galloping consumption."

Harry—"Where do you want to go, baby?"
Baby—"I wanna go buy-buy."

If you can be agreeable till ten o'clock in the morning you'll still have the balance of the day in which to be disagreeable.

Golfer (just learning)—"Terrible lot of birds about, boy."
Caddy—"Yes, 'spose they're following us up for worms."

A noted doctor predicts that in 50 years all men will be bald. But they will still be buying their hair tonic from bald-headed barbers.

Many janitors do not keep up with the times. They're still keeping cool with Coolidge.

The women who are wearing the new long skirts had better watch out for prohibition enforcement officials who may arrest them for screening joints.

Gladys—"How did you get into the habit of wearing a mustache?"
Harold—"Oh, it just grew on me."

You May Know the Breed
"My husband is a dreamer," she declares.
"A man of plans and visions!"
Which means six days of work a week she shares.
To get rent and provisions.

A lot of folks seem to believe that thrift consists in meeting their installment payments on time.

We ran across a fellow who thought Babe Ruth was a chorus girl. We classified him along with the man who thinks an Israelite is a new kind of a floor lamp.

Wire Crack: All crack and no wise.

A church on wheels, fitted with an altar-table, rails, reading-desk, and pulpit, and folding chairs, is used on the Egyptian railways by Dr. L. H. Gwynne, Bishop of Egypt and the Sudan.

Backward Babies

Thrive After Use of Baby's Own Tablets

Derangements of the digestive organs are responsible for most of the ailments which afflict young children and keep them backward in development. Baby's Own Tablets regulate the stomach and bowels, restoring them to normal action and this is all that is necessary to set the little sufferer safely on the road to health and happiness.

Baby's Own Tablets are specially designed to correct indigestion, constipation, colic; break up colds and simple fevers and to allay teething pains. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Noses Will Be Used To Classify Man

A new classification of mankind according to the widths of their noses, believed to be related to the climatic histories of different races and probably of considerable importance in racial evolution, has been proposed by Professor John Cameron of Dalhousie University, Nova Scotia, in a recent announcement from the Wistar Institute, in Philadelphia.

The races with the widest noses and most open nostrils, Professor Cameron finds, are the negroes, the native Australians and the former Tasmanian race, now extinct. These races live in hot climates, where a wide, open nose probably helps to cool the blood as the air passes over the nasal membranes, much as a dog cools himself by panting.

The narrowest noses among the major races of the world are found, Professor Cameron continues, in the European whites, but there is a very small racial group with still narrower noses and more tortuous nostrils. These are the eastern Eskimos, chiefly inhabitants of Greenland.

For races living in such rigorous winter climates as that of Greenland it obviously is desirable to have long narrow nasal passages so that the extremely cold outer air will be warmed as much as possible before reaching the more delicate membranes of the throat or lungs. Professor Cameron's fourth group of humanity as classified by nose width includes the Mongolians and the American Indians, which races are intermediate between the wide-nosed whites; just as the Mongolian and North American climates are intermediate between the extreme heat of Africa and the tropics and the extreme cold of northern Europe.

Try a McIntosh!

What is the world's most popular apple?

According to a Canadian horticultural expert, the Jonathan is probably the most popular of all varieties of apples, generally, seem to be more in demand than their rivals.

Cox's Orange is probably the favorite apple in England, and the McIntosh ranks highest in the United States.

"I shouldn't want to see any other apple, dear. After all, it's not the only pebble on the beach." —But the rest of the beach is so stony.

Deadly Silo Gases Overcome Farmer

Farmers Are Warned to Test Silo Before Entering

Before entering the silo the farmer or anyone working for him should make sure that no deadly gases are present, is the admonition of silo experts of the Dominion Department of Agriculture.

At Herron, North Dakota, the other day, the Neldhardt family, father and four children, had their lives snuffed out by what was reported to be Methane gas. The sheriff who attempted to recover the bodies was overcome and barely escaped with his life, after his son had made two attempts to get his father out of the silo.

Methane and carbon dioxide are the two poisonous gases which are likely to occur in any silo. They have their origin in the decomposition of organic matter. Methane CH₄ is an odorless, inflammable gas which occurs naturally as the product of the decomposition of organic matter, and is frequently met with in marshes and mines, being more familiarly known as marsh gas. Carbon dioxide CO₂ is a heavy colorless irrespirable gas which extinguishes flame. It is produced by the action of acids on carbonates, through fermentation, and by the decomposition of organic substances.

Both these gases may be present in the silo and owing to the fact that they are heavier than air as they accumulate they force air away from the top of the silo.

As neither Methane or Carbon Dioxide will degenerate within a few days it is always well before entering a silo during the filling season to run the blower a few minutes to insure an adequate circulation of air. At other times, a lighted lantern should be lowered into the silo to insure that no gas is present. If Carbon Dioxide is present the flame will immediately go out.

There is just as much danger from poisonous gases in the silo as there is in an old well, but the danger is one which may be easily guarded against and is overcome by an adequate supply of fresh air. As ensilage is fed from the top of the silo care should be taken to see that the doors are open to allow free ventilation. Fresh air should be supplied as directly to the top of ensilage as possible.—Issued by the Director of Publicity, Dominion Department of Agriculture, Ottawa.

Inhale Minard's Liniment for Asthma.

A Negro woman who had lost her husband was attending his funeral. Rastus had rarely followed the straight and narrow path, but the parson conducting the service could do nothing but enumerate the deceased's virtues, the majority of which the Negro woman had never heard of. She listened for some time, but at last could not stand it any longer and burst out: "Parson, I think you're burying the wrong man."

Changing Weather

affects your health if you are not protected. Minard's prevents colds and grippe; relieves rheumatism and stiff joints.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The sane and harmless way. First correct the cause, sweeten the stomach and acid stomach, relieve the tension of the decayed and acid food matter, gently stimulate the start the bile flowing and pass off the waste matter from your headache. Try Carter's Liver Pills. Druggists everywhere.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

Congratulations to this month's BRIDES & GROOMS

We hope you will be very happy. May we invite you to try Red Rose Tea?

The inquisitive woman was worrying the gardener. She asked a lot of meaningless questions. "What steps do you take with the caterpillars?" she asked next. "Well, mum," said the exasperated gardener, "I takes half a dozen steps into our nearest field and turns the caterpillars round three times so that they gets giddy and don't know their way back."

for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria. There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, Castoria soothes and quiet him. Sometimes it's a touch of colic, sometimes constipation. Or, perhaps, without any of these, but Castoria has the power to soothe and comfort. Relief will come promptly; if it doesn't, you should call a physician.

CLEAN CLOTHES...

all on the line
not later than Noon!

That's the really delightful part of having an Electric Washer...clothes are just as spotless as though you'd scrubbed them for hours, but actually they're done almost before you know it!

It's because the churning motion of the Electric Washer is so thorough...because it sends the sudsy water through each sheet, and towel, each table cloth again and again, that everything's so snowy white when you hang your washing on the line. But it's all done so rapidly you can hardly believe your eyes...

Drop in today and find out how nearly effortless your washing can be when you do it the electric way. We'll gladly demonstrate.

"Afford one—

why our
GENERAL ELECTRIC
REFRIGERATOR
saves us money
every day"

"OUR General Electric Refrigerator saves us on an average, a dollar and a half a week—more than eighty dollars a year—in food bills.

"It sounds amazing until you realize that the General Electric absolutely eliminates waste of food... and it enables us to market much more economically. We have figured out that our savings are approximately like this:

Savings	Monthly	Yearly
Milk and Cream	\$1.00	\$12.00
Meats	\$2.25	\$27.00
Fruits and Vegetables	\$2.00	\$24.00
Improved Buying Habits	\$1.50	\$18.00
	\$6.75	\$81.00

EASY TERMS ARRANGED

GENERAL ELECTRIC
ALL-STEEL REFRIGERATOR

**GATINEAU ELECTRIC LIGHT
COMPANY LIMITED**

Guaranteed by CANADIAN GENERAL ELECTRIC CO., Limited

"Best of all, the General Electric Refrigerator never costs a cent for maintenance and only a few cents a week for electric current. We always have an abundance of ice cubes and an endless variety of delicious frozen desserts."

Perhaps you've never made Oatmeal Macaroons..

Try this delightful recipe. They're especially good when made with

MAGIC
BAKING POWDER

The kind that 3 out of every 4* Canadian housewives, who bake at home, say they use because it gives consistently better baking results.

*This fact was revealed in a recent Dominion-wide investigation.

Recipe for Oatmeal Macaroons

1 tablespoon butter 2 teaspoons Magic Baking Powder
1 cup white sugar 1 teaspoon vanilla
1 egg 2 cups rolled oats
1 teaspoon salt

Mix together butter, sugar, rolled oats, salt and baking powder, then drop in the egg unbeaten, add vanilla, mix well with wooden spoon. Drop mixture about the size of a hazelnut in buttered pans and bake 10 to 15 minutes.

Look for this mark on every tin. It guarantees that Magic Baking Powder does not contain alum or any harmful ingredients.

If you bake at home the New Magic Cook Book will provide you with dozens of practical yet attractive baking suggestions. A copy will be mailed on request.

IN MEMORIAM

McGRANDEL.—In loving memory of my dear wife, Christina, who passed away November 10th, 1929. What would I give to clasp her hand Her dear kind face to seek, To hear her voice and see her smile That meant so much to me. Its sweet to know we'll meet again Where troubles are no more, And that the one I loved so dear Has just gone on before. Inserted by her husband, James McGrandel.

JOSS.—In loving memory of our dear mother, Mrs. George Joss, who departed this life, October 24, 1929. "Always in our thoughts." Inserted by her children Leith, Charlie and Muriel.

PROTESTANT CEMETERY MEETING

On Thursday evening last President Thos. Miller occupied the chair at a general meeting of shareholders of Lachute Protestant Cemetery Inc. which had been called in the Town Hall for the purpose of securing necessary information in placing the Funds of the Company with the Royal Trust Company of Montreal.

A goodly number were in attendance and secretary Jas. W. Gall read the draft deed submitted by Notary Robert Barron of Montreal, also several letters of the Trust Company laying down the terms which were considered by the members as being most moderate, and after general discussion a committee was appointed to execute the transfer.

Another matter that came up for discussion was a letter of protest from residents of Brownsburg requesting a conference with representatives of the Cemetery Board to discuss the limitations of burial which the Protestant Cemetery Board had now imposed, prohibiting further burials from outside the area which had been duly published.

Before taking this step, the Lachute Cemetery Board gave the matter much careful thought and consideration and considered the step absolutely necessary in order to safeguard the interests of Lachute, as the cemetery was being rapidly filled and there was no prospect of securing additional land to make further extensions. This action in no way affects those who are at present shareholders in the company for they hold the same rights and privileges as before. The secretary was instructed to answer the communication setting forth the views as to why the Board took such action.

SUCCESSFUL PLOWING MATCH AND POULTRY SHOW

The Farmers' Club of Gore held a very interesting competition in plowing, and an added feature in a poultry Show at Long Lake on Wednesday October 15.

The following are the prize winners in the Plowing Match:—

Albert Tomalty, Austin Kyle, A. O. Kerr, Jack Smith, Wilbert Sherritt.

Specials:—

Best Cockerel.—Austin Kyle.

Best Pullet.—Roy Evans.

Class 3.—Pair Turkeys, Mrs. Evans.

Class 4.—Pair Ducks, Mrs. Wm. Evans, Earl Tomalty.

Judge: P. Granger, Lachute.

Local news of the Week

Mr. Percy Carpenter, left on Sunday for Sudbury, Ont.

Mrs. Geo. Clunie spent Wednesday of this week in Montreal.

Mr. Clifford Cunningham spent the week-end with friends in Montreal.

Miss Evelyn Creswell of Montreal, spent the week-end, the guest of Mr. and Mrs. Geo. Creswell.

Mrs. Dr. Harold Hooper and family, of Grand-Mere, are guests of her mother Mrs. John Hay.

Miss Freda Mason and the Misses Dumouchel, of Montreal, were week-end guests of Dr. and Mrs. J. Mason.

Mrs. Wilfred Massiah, of Ottawa, and her son Hubert, of Camp Borden, were guests of Mrs. K. S. Massiah this week.

The Lachute Literary and Dramatic Society will hold a Halloween party in McArthur's Hall, on Tuesday, October 28th, at 8.30 p.m.

Mrs. James Wiswall and daughter Mary Elizabeth and Miss Evelyn Thompson of East Angus, are guests of the former's parents, Mr. and Mrs. A. W. Muir.

Mr. and Mrs. J. B. Dion and daughter Shirley motored to Ottawa over the week-end and were the guests of Mr. and Mrs. Alex. Gibeau, also Mr. and Mrs. Alex. Sennett.

The rector and members of St. Simeon's Church are indeed grateful to Mrs. Geo. L. Rogers, who so generously donated a beautiful new organ, in remembrance of her husband.

Recent visitors at Mrs. Wm. Evans Lakefield, were The Lord Bishop of Montreal, Archdeacon and Mrs. Overing, Rev. Hector Mount, Rev. R. G. Flinder, Mrs. Peter Leroy, Miss D. Leroy, and Mr. and Mrs. W. S. Andrews and family.

Mr. and Mrs. John Derrick, accompanied by Mrs. Annie Stephenson, Miss Katie Stephenson and Mr. L. Stephenson have returned to Dalesville, after a very pleasant motor trip to New York, Paterson, N. J., and Burlington, Vt., where they visited relatives and friends.

On Saturday afternoon last, Mr. B. Maiden had the misfortune to lose his automobile completely by fire. The incident occurred near Lakefield, while descending a steep hill, and the occupants in the car had to make a hurried exit, as flames were shooting through the floor boards.

Although during the last week we have had cool weather, Mr. Albini Foucault, of Chabou, found a number of his strawberry plants in blossom, and also picked raspberries on the 16th. of this month, but the greatest surprise of all was the blooming of an apple tree, which is indeed uncommon for this time of the year.

A Young People's Conference, representative of the Young People of the Presbytery of Montreal (United Church of Canada), is to be held in the Lachute United Church next Saturday and Sunday. Most of the Congregations of the Presbytery will be represented, and the local Society is anticipating the Conference with great expectancy.

The art of bowling has been in vogue for many years, but quite recently has taken on a new phase in so far as considerable interest is now manifest by the feminine members of our community and we understand that a visit is to be made on Saturday next of a ladies' bowling team from Stevens Alley at Verdun who are staging a contest with a team of our local enthusiasts at Bernier's on Saturday evening at 8.30.

A Grand Concert will be held on Saturday next in the Lachute Auditorium. It will comprise a two-act comedy "Le Presbyter en Fleurs" and one act comedy "Lili Reoit" played by well known Montreal artists. During intermissions musical members will be rendered by the Ayers Orchestra assisted by Miss Fitz of Montreal, as soloist. Proceeds in aid of St. Julien Church. Admission 50c. Reserved Seats 75c.

Quite a lively fire broke out at the home of Alexandre Larocque on Friday evening last, but the good work of the Fire Brigade were speedily on hand and it took but a very few minutes to subdue the blaze. The fire started in the shed and was making great headway, having caught in the adjoining shed of Israel St. Jacques but the fire engines and pump gave a pressure of sixty or seventy pounds and the fire was soon out of commission, but not before an automobile and truck had been consumed and the rear of Larocque's house badly scorched.

While the "Rodrigue House" has undergone a wonderful transformation since Mr. Desjardins took it over from Mr. Therrien the new proprietor is not yet satisfied, for he is now installing a new water and heating system that will supply hot and cold running water in each room of the hotel. The beds have all been refitted throughout with Simmons mattresses, and other fine improvements are under way to provide the acme of comfort to his patrons. Mr. Desjardins is to be congratulated upon his enterprise.

Mrs. Taylor and daughter, of Montreal, are the guests of Mrs. Walker McArthur this week.

The Lachute Fire Brigade had the pleasure of a visit from Chief Lemoux, of Ottawa, on Saturday last.

The Lachute Fire Brigade are holding a Dance in the Auditorium, on Friday, November 7th. Gents \$1.00 There will also be a booth of refreshments at moderate prices. Keep the date open.

A successful meeting of the Lachute "North River" Social Club, was held on Tuesday evening, Oct. 21st, 1930. The following officers were elected:—President, H. MacEntyre; Sec. Treas., J. F. Miller; Members: S. Boyd, R. Cruise, C. McFaul, C. Demerise, M. Langille, R. Underhill, A. Hay, A. Cowan and G. McFaul.

BISHOP FARTHING VISITS LAKEFIELD

The annual confirmation service was held at the Trinity Church, Lakefield, on Monday evening last, His Lordship, the Bishop of Montreal officiated, assisted by Canon Overing, Rev. P. P. Mount, Rev. J. A. Lackey, and Rev. R. G. Flinder, rector of the Church. Many candidates from Lachute, Brownsburg, Lakefield and district were confirmed and the service throughout was one of brightness, appropriate hymns being heartily sung by a congregation that filled the quaint old church. The Bishop brought a message that was of priceless value to the one who wished to better himself and herself, and if taken to heart would make this world one of happiness, prosperity, and would banish all causes of war. After the confirmation service, many new articles donated to the Trinity Church by members of the congregation, were dedicated by the Bishop including a tablet, bible and prayer book.

The Annual Meeting of the Lachute Branch of the Montreal Auxiliary of the British and Foreign Bible Society in Canada and Newfoundland was held in the United Church on the 19th. October, 1930.

The meeting opened with the usual devotional exercises. Dr. J. H. Mason President, presided during the business period. The minutes were read and approved. The Treasurer's Report was presented and the amount of \$277.45 was received from the collectors. Collection taken at the meeting amounted to \$17.69.

It was moved by Dr. MacLeod and seconded by Rev. J. A. Lackey that a vote of thanks from this Branch, be tendered to the retiring officers, Dr. J. H. Mason and Mrs. Robert McFaul for their services in the past.

Rev. G. A. McLennan addressed the meeting first speaking of the late Mr. G. F. Calder, who was a member of the Executive, then continued with many interesting features of the work of translations in new languages and also of the great number of Bibles issued in the past year.

The address, which was illustrated dealt with the work carried on by the Missionaries in South Africa. Rev. E. S. Morrison closed the meeting with the Benediction.

CUSHING WEST.

Mr. & Mrs. T. Weir visited friends in Brownsburg and Staynerville on Monday.

Mrs. Usher spent the latter part of the week in Ottawa, where she was the guest of her sister Mrs. (Rev.) Norman Dowd.

Mr. and Mrs. Burton McGill, of Montreal, also Mrs. McGill Sr. were motor guests of Mr. and Miss Wheelahan last Sunday.

Messrs. Laurence and Ernest Hartley and Miss Olive Hartley also Mrs. C. B. Cotten and son Hartley motored up and spent the week-end at their residence.

Mrs. Elvira Connor, Boston Mass., who has been visiting her relatives in this locality for the past two months, left for home last week. She was accompanied by her niece, Miss Pearl Dawson of Stonefield, as far as Montreal where they intended to visit friends for a time.

His Grace Archbishop Forbes, of Ottawa, visited the parish of St. Philippe on Saturday last and administered confirmation to a large number of children besides visiting the aged and infirm members of his flock throughout the parish.

Mrs. A. Piché of Greec's Point, has disposed of her stock of groceries, etc., and is retiring from business intending for the future to make her home in Montreal. Madame Piché and her little store have been landmarks in this locality since long before many who are now heads of families were school children and the disappearance of both is a matter of much regret.

MARRIAGE

Mr. and Mrs. Peter A. MacQuaig of Brownsburg, announce the marriage of their only son Cuthbert Neil to Tiny, only daughter of Mr. and Mrs. Louis Gordon, of Hartford, Connecticut, U. S. A. The ceremony took place at the Rectory. Rev. J. A. Lackey officiating.

APRIL ESCAPE

By KATHLEEN NORRIS

SYNOPSIS

The O'Hara family, poor but happy, is supported by Martin and Mary Kate, the two oldest children. Martin, who is studying medicine at night, gets a chance to go to Germany with Dr. Van Antwerp, but turns it down because of the family. Mary Kate, who wants him to take the opportunity, which will mean a great deal to him, tries to persuade him to go. The money which will enable Martin to go.

Mary Kate and a young chap, Cass Keating, are in love and plan to be married as soon as possible. One night Mary Kate tells her mother of her engagement and the older woman shows disapproval. Then Martin comes in and begins a strategy attack on his mother. Her disapproval is soon overcome and it is agreed that Mary Kate and Cass Keating will be married.

CHAPTER IX.—(Cont'd.)

"Mother's scared to death now for fear you'll lose him," said Mart.

"Oh, the way you managed her! It was marvelous."

"She had to act stiff, at first, you know. She'd do that if you liked the Prince of Wales!"

Gales of mirth. And then, for a good-night, Mary Kate drew her brother's hand young cheek close to her own fragrant one, in the dark, and whispered passionately:

"Mart if I could only do for you what you do for me! You're so wonderful. If I could only make a thousand dollars some way, or half that, and give it to you, and let you go off to Berlin with old Van Antwerp—"

"Oh, shucks, forget it! I oughtn't to have told you!"

"But I can't forget it, Mart. And it seems so mean for Cass and me to be happy, when you will have to go plugging on here—"

"I'll have lots of other chances."

Mary Kate released him, sticking stubbornly to her point.

"I don't care. It's not fair!"

Her last thought, dropping off to sleep, veered suddenly from Cass to her mother. Mother would be mollifying and mild in the morning, and it behooved Mary Kate to be stiff. This was the only way to manage Mother, when she got into one of those glazed, remote, superior moods. Mother, who could be the simplest, most hospitable, most generously self-sacrificing of all the saints could also rise to heights of unreasonableness whereon her natural affections, her sense of humor, her sense of duty, were alike forgotten. But of late years her older children had found themselves more than a match for her.

So the next morning Mary Kate presented a cold, passive exterior to her mother's purposely affectionate eye, and departed for the office after an elaborately slighted breakfast, and a few grudging but exquisitely polite monosyllables. The O'Hara household was in its usual uproar, but the confusion was not so great but what Mrs. O'Hara was keenly conscious of her daughter's mood.

The front room upstairs was rented to Gertrude and Fanny Lahey, trained nurses, who only occasionally used it, being popular in their profession, and hard workers. Both the Laheys were away now, and the room locked. In the back room slept Regina and Teas on a flat double bed, and Mary Kate on a couch. Mart had the hall room; the only other room on the upper floor was a bathroom, smelling of wet wood and plumbing and strong soaps. Mrs. O'Hara, Pat and Tom slept downstairs.

Mary Kate had to leave the breakfast rubbush only half spent. She departed with several warnings to her small sisters regarding the dishes and the parlor's Saturday cleaning, and walked downtown in mild March weather, Martin beside her.

They noted with satisfaction the clearing of ground for a big apartment house at the corner.

"Two, three, and four-room suites, Mart. Maybe they'll be cheap enough for Cass and me!"

"One of the fellows here last night was telling me that they'll begin at seventy. Electric refrigeration, you know, and elevators—"

"Oh, help! But she found instant consolation. "But, Mart, doesn't that

make Mother's property much more valuable?"

"It ought to!"

They parted, as usual, at the big cool doorway of her office building. Mary Kate nodded and bowed to two or three other girls in the elevator. She knew them, but not intimately. She was Gordon Rountree's personal and private clerk, and did not associate, except casually and accidentally, with the other girls in the Rountree employ.

Gordon Rountree, one of three brothers, was not in the family firm. He was an elegant idler, a bachelor, approaching sixty. He played golf, he traveled all over the world, he had an apartment in Paris. Sometimes he did not come into the single room, that was his office, in the big business building, for weeks at a time.

Two men clerks, old Joseph Delaney and young Joseph Delaney, whose wives, children and grandchildren Mary Kate knew well took care of Mr. Gordon Rountree's interests, and Mary Kate O'Hara helped them. Honoria Malloy, in charge of the general office of Rountree Brothers outside of the big office kept a general eye on Mary Kate.

This morning there was nobody in the office, not an unusual situation on a Saturday morning, for young Mr. Delaney was often busy then, down at the Rountree estate in the neighborhood of San Jose, and old Mr. Delaney did not always come into town for the half day.

Mary Kate had put away her hat and coat, and powdered her nose, and pinned on her cuffs, and was busy with the mail, when the door opened without ceremony, and Mr. Christopher Steynes came in. Big, fair-headed, about thirty, too well dressed, he repeated this morning the vaguely unpleasant impression she had had of him yesterday.

CHAPTER X.

"Miss O'Hara," he said.

"O'Hara," substituted Mary Kate, instantly.

"I'm sorry. He did seem disturbed. "Was it O'Hara yesterday?" he asked.

Her lips went up at the corners. "It's always been."

"I must try to remember it," said Mr. Steynes. He sat down, at an angle, close to Mary Kate's typewriter table, and she turned about slightly in her chair and faced him. "O'Hara me back to old Kentucky," he hummed. "I wanted to ask you, before any of the men come in," he began without preamble. "Have you thought over what we were talking about yesterday?"

"There was nothing to think over," said Mary Kate.

"Oh, yes there was! It was a question of telling your mother, do you remember?"

Mary Kate's proud, suspicious face wore a slightly worried expression. Her blue eyes were bright; there was an apricot color beginning to creep up under her creamy skin.

"I tell my mother everything!" she said firmly.

"Naturally. But couldn't you tell her afterward?"

"After what?"

They both laughed, and were the better friends.

"I'm going to tell you the whole story," said Christopher Steynes, after a moment of consideration.

"I wish you would!" said Mary Kate, heartily tired of mystery.

"Well, here it is, do you see?" the man began. "By the way, what is your first name?" he diverged suddenly.

"My first name!"

"Yes. What is it?"

"Why, it's—It's Mary."

"Mary!"

"Yes. But what—what has that to do—"

"It couldn't be better!" he said enthusiastically.

"But what has that to do—why should you say—"

"Mary," he said, "is a name you can't forget. Lydia, now, or Denise, or Olive—you could get those mixed up. But Mary! Oh, marvelous!"

Mary Kate looked at him suspiciously. She did not speak. She glanced significantly at her unfinished mail.

"Here's the situation," Christopher Steynes said hurriedly. "I simply want some fine, lovely looking girl to—well, frankly, to pretend to be my wife for a"—his eye caught Mary Kate's eyes—"for the briefest imaginable period," he finished hastily.

"I hope you keep your good health and spirits until you get me to do that," the girl said, simply. Again they both laughed.

"Listen, it isn't as bad as it sounds!" Steynes assured her placatingly.

"Well, I should hope—"

"I wouldn't come to you with anything as raw as that," the man protested. "No, it's simply this. There's a woman and her daughter coming to town next Thursday, that's the last day of March, and—for various reasons into which I won't go, Miss—"

"Miss Mary—I want them to think that I was married about a month ago."

Suddenly, from rather dithering him, she rather liked him. There was something disarming about the simple,

yellow-headed creature. The thought of money was inseparable from him—gold, ponies, tutors, travel, privilege spoke all over him. But he was nice, too.

"Why can't you just tell them you're married?"

"They wouldn't believe it for one second. I tell you, they're Russian aristocrats—they're desperate," said Christopher Steynes.

"Oh? And which"—her eyes danced—"Which wants to marry you?"

"Both, I imagine," he confessed disconsolately. "Now you see, I'm sailing for Europe on Sunday, a week from to-morrow," he pursued. "That is, I was, I have my passage engaged. Day before yesterday I was informed from New York—I'm a New Yorker—that Madame Yarnowska and Marka are on my trail; they are crossing the continent now and have engaged passage on the same ship."

"Then it wouldn't do any good if you did spring a wife on them, for they'd find out immediately that she wasn't going along. I don't suppose," Mary Kate asked, with a swift lifting of amused blue eyes, "that your contract would call for the wife to go along?"

(To be continued.)

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Finished With Every Pattern

How charming simple clothes are and what a treat it is to find one whose extreme simplicity makes it so easy to copy.

The new and charming neckline in this model gives it that subtle touch that is so entirely youthful.

The hips are smoothly fitted. The pointed outline of the circular flounce emphasizes the fact.

Style No. 2687 may be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Voguish patterned wool crepe made the original Paris dress, but there are numerous other fabrics quite as smart.

You'll like it in cotton crepe, flat crepe and patterned wool jersey.

Size 36 requires 3 1/2 yards 39-inch material with 1/4 yard 39-inch white contrasting and 1/2 yard 35-inch black contrasting.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Treasures

They bring treasures For my treasure-chest. These dimpled hands That bear alone the magic touch

That unlocks the clasp Of the treasure-chest Called my heart;

A mass of gold, they bring In ruffled hair. Heaven so close

In roguish eyes, Moist kisses and contented sighs— Such treasures, these. Soft velvet like the petals

Of a red rose They bring to me In the touch of cheek to cheek; And rubies, precious pearls

In choice design. These, too, they bring. With each sunny smile, For my treasure-chest.

—Rose Stairton, in the Christian Science Monitor.

"Do you believe picture actresses should marry?" "Why, yes, or how could they get divorced?"

Distemper Takes Toll of Dogdom

Expert Describes the Symptoms and Treatment of this Dangerous "Doggie" Disease

Distemper is responsible for a very great proportion of the deaths in the dog world.

The disease is confined to dogs in the puppy stage, and can be extremely dangerous up to six weeks, and also about the time when the puppy is shedding its milk teeth, usually when it is about four months old.

Many people are under the impression that the disease is due to a worm, but it is generally accepted by authorities that it is caused by a germ carried about on the coat, and is contracted by contagion.

The older that the dog is when distemper attacks it, the greater are its chances of pulling through without ill effects.

The symptoms you will observe are a marked lassitude, loss of appetite, dullness of the eyes, and a temperature.

Signs to Look For

This is quickly followed by a discharge from the eyes and nose, a slight, husky cough, accompanied with fits of sneezing and often an eruption on the skin of the stomach and inside the thighs in the form of small pustules, which have an objectionable odor when they break.

The bowels will be out of order, either relaxed or just the reverse. And the dog is constantly vomiting up a "whitish" kind of fluid in small quantities, which you must be quick to swab up, otherwise the animal will lap it up again.

You must also expect fits of shivering and of heat, and a rapid losing of flesh. The whites of the eyes will be bloodshot, and the teeth will take on a yellowish hue and become coated, while the breath is far from sweet.

Put Him on a Diet

Swift action must be taken. The first thing is to make the dog drink a quantity of warm salt water. Then turn the dog out instantly and stand over him until he is sick, burying whatever is vomited. Keep him in a warm, well-ventilated place and, if you think it necessary, place him in a flannel jacket.

The next move is to give him a course of treatment with one of the many proprietary medicines that are on the market, and, if possible, give injections of vaccine.

In fighting against distemper you must be particularly careful to see that no complications set in, such as lung, bowel, and nervous system trouble.

After a few days the dog may seem to be his usual self, but do not be misled into thinking that he is absolutely free, for unless you are careful, a secondary infection may follow.

Put the dog on a light diet, such as boiled fish, beef tea with bread soaked in it, and raw meat scraped finely, gradually coming back to the normal diet as the dog becomes stronger.

When Stimulants Help

If the dog is at all purged, this can be alleviated by giving him boiled arrowroot or wheaten flour, to which has been added some port wine.

An alcoholic stimulant may be necessary; in fact, it is advantageous at times, a few drops of whiskey in some warm milk being a fine tonic.

In the case of bronchitis developing as a result of distemper, give from two to five drops of eucalyptus oil in half a teaspoonful of one teaspoonful of brandy at intervals of eight hours.

Pits may escape your notice at first; these being a momentary champing of the jaws and a trickling of saliva from the mouth, followed by a dazed look. Usually such cases are hopeless.

In dealing with labored breathing, apply Thermogene wool to the throat, chest, and sides, or, as an alternative, some turpentine sprinkled on flannel and wrung out in hot water, after applying a dry flannel to the treated parts.—Answers.

International Boundary

In carrying out its duties of maintaining in a state of effective demarcation the 5,500 miles of international boundary between Canada and the United States, in accordance with the provisions of the Treaty of 1925, the International Boundary Commission, the Canadian section of which functions under the Survey Bureau of the Department of the Interior, has this year a number of important operations on hand. These include reopening the vista and repairing the monuments on some fifty miles of the highlands boundary between Quebec and Maine, making surveys for the revision of certain of the boundary maps between British Columbia and the state of Washington, and erecting monuments at the point where an important international highway between Kelowna, B.C., and Portland, Oregon, crosses the boundary. It is also intended to locate and mark the boundary in the new Detroit-Windsor tunnel before it is officially open for traffic.

A fellow took a very dilapidated car to a garage for repair. "How much did you pay for this bus?" asked the mechanic. "As a matter of fact," replied the owner, "a friend gave it to me for nothing." The garage man shook his head. "You've been swindled," he said.

Salada Orange Pekoe Blend gives greatest satisfaction

Souvenirs of Robin Adair's Famous Love Affair Go On Sale

Famous Ballad Written by Robin Adair's Sweetheart Forms a Romantic Background

Miniatures of Robin Adair, the young medical student for whom the famous ballad of "Robin Adair" was written, have recently been listed by Sotheby's in London for sale at auction. Listed also are miniatures of Robin Adair's family, whose history is likewise remembered because of the romantic inspiration of the ballad.

Robin Adair is supposed to have left Dublin at the age of 22 under a cloud, penniless, and to have deserted medical studies to walk to London to seek his fortune. He was run down en route and injured by a coach which belonged to a London society woman, who drove him to London and later became his patroness. A few years

afterward, established in London society, Robin Adair fell in love with Lady Caroline Keppel, whose father, the Earl of Albemarle, had made other plans for her future. She was banished to Bath, and it was there that she wrote "Robin Adair."

The ballad, sung to an old Irish tune, was almost immediately taken up by London, but it failed to touch the Duke of Albemarle. Lady Caroline was finally forced into what was known as "a decline." Her health became so bad that family objections to her marriage were lifted, and among Sotheby's listings are miniatures of the three children of Lady Caroline Keppel and Robin Adair.

Bananas To Curve Inward And Nuts To Be Self-Cracking

Bristol, England. — Here's comfort for the people who have a hard time in extracting the meat from the proverbially stubborn nut, Dr. A. W. Hill of the Botanical Research Station at Kew, recently told the British Association for the Advancement of Science, that it was at last possible to produce self-cracking nuts. "This is a valuable achievement in a commercial sense," Dr. Hill remarked. "For instance, in California pistachio nuts have been commercially valueless owing to the cost of extracting them."

The botanical expert also recorded research achievement in the case of limes, which has a useful habit of shedding the fruit when 't is ripe, thus enabling the collection of limes on the ground. Botanists, he said, were now striving to produce bananas immune from disease and curving inward on a bunch. This new curve, if brought about, would enable the fruit to be handled more easily and to take up less room on board ship.

Adjutant Stork Is India's Scavenger

The Adjutant or Argada is a native of India, where it is carefully protected because of the scavenger work it does in cleaning the streets. India is a hot country and its inhabitants are extremely careless about sanitary precautions. They throw bits of animals that they are dressing for the table in the public street, instead of placing them in a garbage can, and they soon become unpleasant in the hot sun. Along comes the Adjutant with his enormous beak, and gobbles it up. The beak is so large that he can grab a full-grown cat, or joint of beef or a fowl, and swallow it whole. The meat is digested, and the indigestible portion rejected.

This bird looks something like a vulture, having scarcely any feathers on its head and neck. One of its most useful habits is the killing of snakes, of which India has a great many. It is a funny creature, and strikes peculiar and amusing attitudes when at rest. Sometimes it stands for a long time with its wings spread wide and its beak drooping near the ground. It often looks very fierce, but is quite harmless to people, being, in fact, a bit cowardly. It is easily tamed, and becomes a great pet, walking around the houses, and stealing anything it can get its beak on. So clever a thief is it, that the servants have to guard the dinner table when it is around, or it would steal the meat from the platter. It has been known to grab a roast fowl from under the very nose of the assembled guests, and swallow it whole.

The color of the Adjutant is a sort of ashen grey, and it gets its peculiar name from its habit of haunting the parade-grounds, where the soldiers are drilling.—"The Humane Pleader".

A baby was recently found in a public telephone call-box. There's nothing like starting young when you want a number.

Real dyes give richest colors!

FOR every home use, Diamond Dyes are the finest you can buy. They contain the highest quality anilines that can be produced.

It's the anilines in Diamond Dyes that give such soft, bright, new colors to dresses, drapes, lingerie. Diamond Dyes are easy to use. They go on smoothly and evenly; they do not spot or streak; never give things that re-dyed look. Just true, even, new colors that keep their depth and brilliance in spite of wear and washing. 15c packages. All drug stores.

The Home and the Teacher
Too often the home, the school and the church keep in "watertight" compartments, as though these three institutions were not three sections of a whole plan for the development of our citizens.

The school cannot do its best by our children unless the home gives it co-operation. We should begin by offering a hospitality to our teachers, affording them a comfortable place to live, at a fair price; welcoming them into our clubs, getting acquainted with them and giving them real friendship and a chance to share in our civic life. We are too likely to treat the teacher as an outsider or a mere temporary sojourner.

We owe it to our teachers to visit the schools and know what they are trying to do for our children and how we can gear into their program. We owe it to them to back them up by discipline in the home, which will keep our children fit to do their best in school. We owe it to them to stand by them, always speaking a good word about them before the children and in the community—if they are deserving of it. A critical attitude will not only hurt the teacher, but will make him unable to have much influence or achieve much with our children.

Pottery

The fussy, over-ornate parlor, with its mantle loaded with useless bric-a-brac, is a thing of the past. In its place is the dignified, artistic reception room. On a small table of this room may be one choice vase, or it may reside in a more safe place on a shelf, but it is the center of attraction in the room. It sets the color note and bides no rival in the way of cheap ornament near to it. It reigns alone.

Such a piece of fine porcelain pottery, a jardiniere, a temple jar with a lid, a bottle, a vase, will brighten a dull room or subdue a too garish one. Modern pottery, made by the best companies, is patterned after ancient pottery, and its lines are truly artistic and its colors deep and rich.

The ancients knew six fundamental colors and these had a meaning. Red stood for fire, black for deep water, green represented the woodlands, white was for metal, yellow for the earth and blue for the sky. A vase, copying one of these ancient colors, seems to fairly radiate its rich tone.

Beautiful pottery pieces can be bought at moderate prices and one such is worth a whole roomful of tawdry ornament. Do not purchase one hastily. It is a work of art, to add to the beauty of your room. Be certain it fits in with your color scheme. Select something of which you will never tire, but which you will learn to love more and more. When you have it in your home, remove from its environs and let nothing distract from its simple beauty of line and color.

Cooking Cereals

Cereals are one of the most valuable foods for the person who does heavy manual or outdoor work, and especially for children and young people; but they should be avoided by those past middle age who live sedentary lives. Being carbohydrates, it is well not to sweeten them heavily, for their starch will eventually turn to sugar; and to add more causes sour stomach or undue fermentation. If well salted, the demand for sugar will be less and they will be more palatable.

Different cereals require varying amounts of water, when making a cereal mush. One uses a cup of rolled oats for two cups of water; a cup of rice for three of water, and a cup of cornmeal or four. One must know his cereals.

There is little danger of overcooking them, but much of undercooking. Cereals with the outer coat or whole grain require longer cooking than polished or finer ground.

There are different methods of cooking cereals. One is to sift the cereal into salted, boiling water, stirring frequently at first, and then putting it in the double boiler to finish cooking, for a half hour or hour, or four hours, depending upon the cereal. If you can put it into the fireless cooker for ten hours, that is better. Oatmeal, cornmeal and many granular cereals may be put directly into cold water and cooked in a double boiler without stirring.

Pre-cooked breakfast foods are better if made crisp in the oven before serving. After hours in the fireless cooker, it is necessary to re-heat the cereal before serving.

Marketing

When buying grapes, select large, compact bunches, with large individual berries. When the grapes fall off and the bunches are loose and straggly, something is wrong. The bunches should not show many decayed, cracked, shriveled nor hard, green berries. The bunch as a whole should be good, not merely the individual berries.

The best mangoes have a firm, smooth, bright green outer shell. Dull yellowish, rough wrinkled or flabby shells are not so good. A soft, watery decay should be avoided.

Cabbage should be crisp and green, the head solid and well formed and

the outer leaves trimmed off. Cauliflower should have an outer green jacket, but the flower should be white and clean. It should be free from discoloration and decay.

In good celery the branches are well blanched and brittle and of medium length. The heart should be free from disease.

Chair Covers

For the upholstered chairs in the dining room, a cover may be made to protect the seat covers from grease and soil which children or careless eaters are likely to drop on them. The covers may be made of figured denim, to resemble the original chair seats. Spread a paper over the chair seat and cut a pattern, allowing size enough to fall over the edges of the seat. The covers may be faced or hemmed all around and tied on to the chairs by means of strips of tape, sewed at each corner of the cover. These chair covers may be taken off and washed or left off for special occasions. They save the wear on the original cover and may easily be renewed when worn.

Apple Combinations

For novelties, apples may be combined with other fruits into a sauce, which goes well with quinces. Cook them together, one fourth as much quince as apple. Apples and pineapple combine well into a sauce. Add minced pineapple to the apple sauce. Add one cup of cranberries to one of apples and make a sauce. It will be a pretty pink. To serve with hot pork roast, try apples and onions, combining equal quantities of unsweetened apple sauce and cooked onions. This should be served hot.

A Child's Coat

Children's outdoor garments should be soft and warm and light in weight and large enough to permit freedom of movements. Rough surfaced materials loosely woven, are warmer than fine smooth material of lighter weave. Plain material may be used for the outside, if the lining is light and wooly. Pongee, or any light material, is good for summer coats.

Nut Pudding

Chop fine one package of dates; three-fourths pound graham crackers, twenty-four marshmallows, and one cup nut meats. Mix these together and add a half pint of coffee cream and pack into a loaf in a pan. Let this stand over night; slice; and serve with whipped cream.

Mrs. Solomon Says:

To know that we don't know is the first step toward knowing what we don't know.

A Clever Answer

When the use of anesthetics was first introduced in England, the clergy, almost without exception, denounced it, saying the Lord wanted us to suffer and doctors had no right to make patients unconscious and free from pain while their legs were cut off. That was cheating the Lord. A young Scotch doctor produced the right answer, advising clergymen to read in Genesis how "the Lord caused a deep sleep to fall upon Adam" before he took out his rib.

Since the Lord had operated on Adam, first making him unconscious, the young doctor said he had the right to do the same. He won.

Lupe Velez, lovely screen star, almost believes she has a big ice cream cone at last, while on location way up in the Sierras.

Death-Dealing Trap In South Pacific

Research Carried on by Ill-fated 'Carnegie' Reveals Oxygenless Water

There is a death-dealing belt to all animal life caving in the Pacific just north of the Equator, and was betide the hapless fish or other ocean creature which blunders into this treacherous area, for the breath of life will be cut short for him, unless, by some happy chance, he manages to get out immediately.

This death belt is an area approximately 100 miles wide and extending probably a distance of hundreds of miles east and west in midocean at about 3 to 16 degrees north latitude—between the Central American countries and the South Pacific Islands. It lies from 300 to 800 feet below the surface and extends downward more than 1000 feet.

The water in this area contains practically no oxygen in solution, or at least only about one-fiftieth of the amount ordinarily found in solution at equal depths elsewhere—a quantity probably too small to support any form of life with which biologists are now acquainted.

Cold, still and dark, is this death-dealing trap. Perhaps for thousands of years the water of which it is composed has not seen or felt the light of the sun. For hundreds of years it has not been near the surface where it could absorb a supply of life-giving oxygen.

Some peculiarities of the movements of the Pacific has kept it where it is. Perhaps it marks the line at which the cold heavy waters from the Antarctic have met and stalemated the waters of the Arctic, but no one can be sure of

this explanation. It is just a theory that scientists have advanced, hoping to check its accuracy by future study.

The Carnegie's Discovery

In May, 1923, an expedition aboard the ill-fated ship "Carnegie" set sail. The main objects of the expedition were to take soundings of the ocean bottom off the main steamer tracks, to procure samples of water at various depths in order to study its salinity, temperature and the forms of life existing at various depths and to make magnetic observations.

The ship hove to at 162 "stations" to go through the routine of its ocean water studies. The records were carefully compiled and filed away for study when the voyage was over. On November 23, 1923, the Carnegie was destroyed by an explosion at Apia, Western Samoa, and Captain Anlt and one member of the crew were killed. The records were saved, however.

When samples of water taken at various stations on opposite sides of the Pacific were observed to be very low in oxygen content, no particular attention was paid to the matter. Consequently, no special work was done toward collecting samples of any microscopic forms of life which might exist there. It is hoped that this can be done at some future time.

There have been intimations in the past that such a belt of oxygenless water might exist in the Pacific. The famous Challenger expedition of 1873-76 secured a few such samples of water, but the unbelievable conditions were explained by the scientists by saying that "something evidently had gone wrong with the water bottles" used in collecting the samples. It is only within very recent years that the apparatus for collecting samples of water at such depths has been perfected to such an extent as to enable reliable information to be obtained.

An Explanation

Mr. O. W. Torreyson, the navigator of the Carnegie, who is now in Washington, at the Carnegie Institution, explains what is meant by a strip of water practically devoid of oxygen. "This refers, of course, to oxygen dissolved in the water and not the oxygen entering into the chemical composition of water as expressed by the formula H₂O. All water with which we are ordinarily familiar contains considerable quantities of oxygen or air in solution, a fact easily demonstrated by setting a glass of cold water in a warm room. The beads or bubbles of air which soon collect on the inner surfaces of the glass are made up of the air which has been released because the water cannot retain as much air at the higher temperature.

"Sea water normally contains dissolved oxygen, nitrogen and carbonic acid. The carbonic acid, as a free gas, is present only in quite small quantities. In studies of the chemistry of sea water, the quantities of dissolved gases are stated in cubic centimeter of gas per liter of water. The dissolved oxygen ordinarily found in sea water ranges from one to five centimeters per liter at different depths. In the particular region referred to in the Pacific, the dissolved oxygen content was found to be less than one-tenth of a cubic centimeter per liter—a very small amount as compared with that found at similar depths in other regions.

"In other particulars, however, this strip of water was not found to be abnormal. In temperature, pressure, salinity and other factors it differed little from other belts of water at the same depths."

"But how does this oxygen become dissolved in the sea water?" Mr. Torreyson was asked.

"There are three ways in which the amount of oxygen in the sea is controlled," he answered. "Oxygen is absorbed from the atmosphere. Water is aerated by the dashing of the waves as well as by ordinary contact with the air at the surface of the ocean. Some oxygen is produced during the assimilation of processes of plant organisms, during which carbonic acid is taken in and oxygen given off. And some oxygen is transferred from one layer of water to another.

"Conversely, oxygen is taken from the water by three processes. Ocean creatures in the lower water levels breathe in the dissolved oxygen and give off carbonic acid gas as land animals do. The decomposition of organic matter consumes oxygen and, of course, some oxygen is absorbed from one layer of water by another."

"Has anything similar to this oxygenless belt ever been discovered before?" he was asked.

"Certain small oxygenless areas have been found to exist at various places, notably in Monterey Bay, off the coast of California, and another off the coast of Japan, but for the most part such small areas have been thought to be due to local conditions. The Pacific death belt is the first large area ever discovered.

"But to go back to the discovery of this remarkable area. The Carnegie left Washington in May, 1923, made observations for several months in various parts of the Atlantic and then passed through the Panama Canal to the Pacific. One of our outstanding discoveries is the fact that the assumptions which have up to the present been made about the circulation of the waters of the Pacific Ocean are wrong. The circulation of these waters has been thought to be similar to the circulation of the waters of the Atlantic, but it now has been found to be quite different.

"This knowledge will undoubtedly be important to those who study the climates of the United States and other countries bordering upon the Pacific, and who are helping us to adjust our daily activities in the most

Canada May Be Next Challenger

Spain, Germany or Dominion Looked to as Cup Contenders

Newport, R.I.—Yachtsmen look to Canada, Spain or Germany for the next challenge to race for the America's cup.

In Canada of recent years there has been a growing interest in yachting. Canada builds good yachts and her sailors from the Maritime provinces particularly are regarded as being as competent as any in the world. While Canada does not have the vast resources of some countries to spend on sporting events, the cost of racing a Canadian yacht would not be nearly as heavy as that of bringing another challenger from across the seas.

Sir Thomas Lipton, at 81, has abandoned his lifelong hope of lifting the America's cup for the Royal Ulster Yacht Club, and will not challenge again.

Challenge Rumored

Rumors that another British challenge had been received for the America's cup were heard recently, but members of the New York Yacht Club professed to have no knowledge of it. The report gained circulation when Sir Ronald Lindsay, British Ambassador to the United States, left the Vanderbilt Yacht, Winchester, on which he was a guest, and went over to Sir Thomas Lipton. Some said he had gone to confer with Sir Thomas regarding a syndicate challenge, but Sir Ronald refused to comment on his action.

It was quite generally reported that the Shamrock will remain in the United States. One report even had it that a sale already had been negotiated. There are six boats of its class in American waters, Enterprise, Whirlwind, Yankee and Westamo, built at a cost of nearly a million dollars each for the defense of the cup this year, and Vanitie and Resolute, yachts which were built as cup defenders in 1920.

Enterprise, having provided a summer of sport at a cost of a million dollars, will be taken out of commission for the winter at least. It was said on good authority that it probably will not race again for a year. Talk of its being taken abroad to race in European waters was met with statements by those closely associated with its building and sailing that it would not race out of American waters. Its owners have no dreams of world conquest.

Song of Sleep

"When you lay your head on the pillow, go sinking, sinking
Down, down in the fathomless pool of sleep;
Drowsily, drowsily lie, no thinking,
Thinking;
Let your mind be void, and your breathing slow and deep.

"Down, down, to the rhythmic flowing
Of somnolent waves that ceaselessly roll and roll,
Till you wake and wonder how and whither unknowing
Softly, stealthily over you slumber stole....

"Stole as the waves of the sea go stealing, stealing
Over the shore... When darkness dreams, and the night
Calls you to pillow ease for healing, healing,
Let care from your heart, like a winging bird, take flight.

"Drowsily, drowsily yield, no thinking, thinking;
Let your mind be void, and your breathing slow and deep;
When you lay your head on the pillow, go sinking, sinking
Down, down, down in the pool of sleep....

—Brenda Murray Draper, in the Morning Post says:—

"If these verses are memorized, and the ideas therein assimilated and carried out, peaceful sleep will ensue. Let the head lie heavily on the pillow as the verses are being monotonously repeated."

Birds and Bugs

A bird man who ought to know says that the stomach of a single cedar bird contained 100 canker worms, that one cuckoo had eaten 250 tent caterpillars when disturbed in the midst of a meal, that 454 plant lice were found in the stomach of a chickadee, that a flicker had devoured 1,000 cinch bugs, that a scarlet tanager was seen to eat 600 gray moth caterpillars in 13 minutes, or at the rate of 2,100 an hour, and that a Maryland yellow throat ate 3,500 plant lice in 40 minutes. Though these figures can be only approximately correct, what a story they tell of the value to us of these creatures of the earth and air!

There is nothing more uncertain than a "sure thing."

profitable and healthful ways to climatic conditions."

In fact, so important are the discoveries considered that the man who is today one of the world's foremost oceanographers, Dr. Harold U. Sverdrup, of the Geophysical Institute of Bergen, Norway, the chief scientist of Amundsen's ship *Maud* during its last drift across the North Polar Basin, has been in America to make a special study of the information which has been collected.

Burma's New Governor

After taking oath of allegiance, amid an impressive scene in Rangoon, Sir Joseph Maing Gyl, new governor of Burma, is seen above inappreciable honor.

FRIDAY, OCTOBER 24th, 1930

Subscription Rate per annum.

In Canada—\$1.50.

In United States—\$2.00.

Notices of Entertainment, Concerts, Announcements, etc., 10 cents per count line. Minimum 50c.—if billed 60c.

(Note:—All locals advertising any event from which there are financial proceeds will be charged at the above rate.)

Cards of Thanks, In Memoriam Notices, Births, Marriages and Deaths 50 cents.

With each verse additional—25c.

If replies are directed to Watchman Office 25c. extra charged.

Note:—When estimating count every six words or fraction thereof as one line.

Legal Advertising—\$1.68 per inch. Subsequent insertions—\$1.40 per inch.

Want and For Sale advertisement, 10 cents per count line, minimum 50c.—if billed 60c.

MACHINERY OUSTS 50,000 WORKERS ON POWER UNDERTAKING.

Startling evidence of the manner in which machinery replaces man power was presented early this month when directors of the Beauharnois Power Company conducted representatives of 89 Canadian daily over the huge St. Lawrence Power and 500 Canadian weekly newspapers development now in progress between Lake St. Louis and Lake St. Francis, Quebec.

Machinery there is replacing over 50,000 men on a two-and-a-half year job. A staff of 2,000 men, plus mechanical equipment, is doing a work that would require, without the machinery, between 50,500 and 60,000 men to complete it in the same period.

The ultimate development may reach 2,000,000, while that now under way will provide 500,000 horse power of energy. For a distance of fifteen miles and through a canal 3,000 yards wide a new route is being cut across country for the St. Lawrence. In it will be a passage 600 yards wide, the first link in the deep water navigation development of the St. Lawrence between the Lakes and Montreal.

To carry on the work the corporation has laid and operates 30 miles of railway, power transmission lines for equipment, telephone lines to maintain contact with headquarters, is re-routing rivers and railway lines and highways; in fact is engaged upon a project so immense that a few years ago it would have been possible only for a government to contemplate it.

The chief feature of the undertaking is the manner in which manual labor has been curtailed. A single electric hydraulic dredge is cutting 13½ miles of the new canal basin, sucking out the material and depositing it up to a mile distance at a rate that would require a whole army of men, if man-power were employed. Other great tower and drag-line excavators move more earth and rock every two minutes than a dozen men could move in a full ten hour day.

What machinery is really doing is made clear by the fact that 50,000 men employed at only \$80 per month for thirty months would cost \$120,000,000 in wages, while the total cost of the Beauharnois development now under way will be \$65,000,000 and this figure includes the 28,000 acres of land purchased for the project and all the materials which enter into it. Machinery is reducing the direct labor cost from \$120,000,000 to probably \$10,000,000 and thereby making possible the sale of power at a price that will create industry and thereby give permanent work to more than are now deprived of temporary employment through the mechanization of construction work.

FOOTBALL

Last Saturday's game between Lachute Academy and Brownsburg Juniors provided, as was predicted in the last issue of the Watchman, a very exciting tussle between these two well matched teams. There was a fair number of spectators on hand, despite a rather chilly atmosphere, when the game commenced and every one seemed to warm up to the occasion. For the first ten or fifteen minutes the play went decidedly in favor of Brownsburg, which was quite expected when one remembers that quite a number of the players have frequently taken part in games with much older and more experienced players alongside them. As the game progressed however, it became very evident to the onlookers that the Academy boys did not intend to be upset by this apparent superiority and frequently checked dangerous moves by skilful tackling and methodical passing. In midfield play the Academy forwards showed that they well understood the art of passing the ball, but they were unable to finish up well enough when near goal. In fact both sets of forwards became far too excited when within an ace of scoring. It would be well to remember that a cool head, combined with a well directed shot is productive of goals; whereas aimless kicking and rushing around only tires one out more rapidly, with no beneficial results followed. There were very few infringements of rules governing the game and most of these were caused through misunderstanding rather than intentional. Summed up it was a real interesting game and Brownsburg were just about worth the odd goal in five which went in their favor. The goal scorers were, P. Seary, I. Martin, and G. Connolly for Brownsburg while M. Langille tallied both goals for Lachute. Charlie Duncan handled the game very efficiently.

Both teams are scheduled for a return game on the Academy grounds, Saturday, October 25th, at 3 p.m. There is no finer game the world over than football. It is productive of both sportsmanship and team work, what better combination can we offer the sport loving youth of to-day? Then come along as many as can and encourage these boys to play the game in which they are keenly interested.

Richard Christopher Makes His Last Run

Richard Christopher, for 50 years including the Prince of Wales, Governor-General of Canada, the Duke of Connaught, and many others. It is his boast that in all these years he has never had a single accident. A touching feature of his last run was the fact that his son, Thomas, although also a locomotive engineer, acted as his distinguished Canadian visitors, father's fireman.

Life Assurance is the Best Investment

A MAN can create an estate for himself of \$1,000, \$2,500, \$5,000, \$10,000, or more—all dependent upon his position, income and prospects. Through Sun Life assurance he can be sure of reaching this objective within a specified time, with safety and without loss or impairment of principal.

If death should intervene, Life Assurance will do what no other investment can guarantee—it will make the full intended principal available at once for his family and will carry through the programme that he had planned for them.

The Sun Life of Canada has a policy to cover every need.

Bring Home Superb Heads

The hunting season is in full swing in the Province of Quebec. In the middle of October a party of three Nimrods left the Gray Rocks Inn, St. Jovite, Que., and took a hydroplane trip into the north to investigate moose hunting prospects. They got a big surprise and one of the highlight moments of their careers as hunters of big game. One of the party bagged a moose with the magnificent spread of 66 1/2 inches; another of them shot a 60 1/2 inch head and the third also got a trophy which though smaller than either of the other two, would have ranked high in any average moose hunt. They report that

the section is unusually well stocked with the big animals. The object of the party was to get quickly into the north to spy out the land and come back later for the real hunting with all its pleasurable hardships of portaging, camping out, canoeing one's way through unknown or almost unknown territory and ending up by pitting one's brains and experience against the instinct, sagacity and wariness of the moose. They have returned to tell us of a Mecca for hunters of moose in the North. Lay-out shows the great moose-spread with hydroplane in background, and Tom Wheeler, proprietor of the Gray Rocks Inn, with guide.

CUSHING

Rev. J. W. Maclean attended the Ministerial Association at Vankleek Hill, Ont.

Mrs. Peotter, of Milwaukee, Wis., is the guest of her sister Mrs. L. M. Gaston at present.

Mrs. L. Maw, S. Beecher and Bob Maw were guests of Miss B. Nicholls on Wednesday of last week.

Miss Ruth Dobbie and Mr. Roy Dobbie visited friends in Lachute on Saturday.

Mr. A. Graham was in Montreal on Sunday and Monday.

Mrs. A. Graham was the guest of her niece Mrs. John Mahon, of Calumet, on Saturday, and also paid a call at the home of Mrs. T. Foreman.

Mr. and Mrs. R. J. Graham of Lachute, were guests on Sunday of Mr. and Mrs. A. Graham.

Mr. and Mrs. McDiarmid and the Misses Burton, of Montreal, were the Sunday guests of Mrs. Jas. Cleland.

Don't forget the supper in St. Mungo's Church, on Friday evening and the Musical treat following it the (24.)

A very enjoyable meeting of the St. Mungo's Ladies' Aid was held at the home of Mrs. L. M. Gaston on Wednesday afternoon, and the Rev. Mr. McLennan, on behalf of the Bible Society held a meeting with lantern views in the evening.

Again~ Hotpoint Breaks all Sales Records

CANADIANS are now buying twice as many Hotpoint Hi-Speed Ranges as they did two years ago... because Hotpoint offers far more value for less money! Although constant improvement has been made in the appearance, performance and economy of the Hotpoint Range, prices have been reduced to the lowest point in history.

The Hotpoint Range was designed by women for women. It gives you unexcelled speed for every cooking operation... with Hi-Speed Elements. It gives you extra care-free hours away from your kitchen

... with Super-Automatic Oven Control. It enables you to cook a whole meal on one element, with the Economy Cooker. It is built of All-Steel and finished with Stain-Resisting Enamel, for life-time service and easier cleaning. It provides added convenience with the Illuminated Cooking Top.

Your nearest Hotpoint dealer will gladly demonstrate all these exclusive features. Visit him today and see the new Hotpoint Ranges, now offered in a wide variety of models... with terms to suit your convenience.

Cells Show Intelligence In Reconstructing Sponges

How the single living cells of a sponge animal, separated from each other when the original living creature is crushed and run through a sieve, creep about on the sea bottom or on the bottom of a laboratory aquarium until each cell finds its proper neighbors and its proper place in the reconstruction, thus rebuilding the living animal virtually as good as new just as citizens of a destroyed city would find each his proper location and rebuild his home is described by Dr. Paul S. Galtsoff of the United States Bureau of Fisheries in an address before the Academy of sciences of Washington, D.C., published in abstract by that institution. That living sponges are able to reconstruct themselves thus after being disintegrated has long been known to biologists but it was imagined that the living cells were able to alter their

characters so that virtually any cell could take up any duty in the reconstructed animal or that new cells perhaps grew from a few of the old ones as plants grow from seed. Both of these ideas Dr. Galtsoff finds to be wrong. What really happens, he records, is that the original cells creep about among each other until they come into proper mutual relationship, each cell seeming to know quite well what its place is in the complete animal and keeping on the move until it finds that place. It seems especially, Dr. Galtsoff admits, as though some outside force or "intelligence" were directing the reconstruction but the facts show he believes, that the forces concerned really are no more than the physical and chemical properties of the living protoplasm. On a greasy surface, for example, the cells are unable to move properly and cannot reconstruct the original sponge.

City Trees Suffer From Lack of Air

When you have to fill in around a tree, in grading your lawn, it is not enough to leave a "well" around the trunk.

The tree feeds with its tiny roots, lets twenty or thirty feet away. Many a tree with a "well" supposed to save it, has been thoroughly smothered just the same. So says the Davey Tree Company of Kent, Ohio, in a pamphlet on the subject. They write: "Many trees die from thirst and smothering of the roots."

Trees breathe—hence their need for air is just as real as your own. They must have air, not only above ground for the leaves, but also below the soil for the roots. Since the trees have no respiratory system comparable to that present in animals, it is necessary that air come in direct contact with all the living tissues, especially those which are vitally active as are the growing root tips.

Therefore, lack of air around the roots of a tree soon shows its effect in the size and color of the leaves, which ordinarily afford an excellent key to the general vigor of a tree. A tree with a serious cavity may put out luxuriant foliage, but a heavy crop of well-formed rich green leaves signifies active roots and healthy life processes.

If the leaves are undersized, yellow or brown; if the foliage is thin or sparse; if the tree is full of dead branches; if the annual twig growth is short; then the roots are in serious trouble.

Immediate relief is necessary. Many people have the erroneous idea that a well at the base of the tree is sufficient precaution to provide for the aeration of the roots. Experience proves we are assured, that a well is entirely inadequate.

The well does provide for air around the base of the tree. However, it makes no provision for the vitally active feeding roots which are ten, twenty, or even thirty, feet from the base. These active roots, which need the air most, are just as positively suffocated as they would be were on well made.

An arrangement of this kind does not provide for the circulation of air (and water) where it is most needed. The roots actively engaged in picking up food, air, and water are not the large anchors near the trunk. The active food gatherers are the tiny rootlets out at the edge of the tree's spread.

Aeration and watering are of prime importance in the preservation of trees. Even so shallow a fill-in as three inches will kill a tree unless remedial measures are employed. In the forests a light covering of mold over a naturally porous soil formation takes care of the circulation of air and water. But these natural advantages are not present in the artificial environment which surrounds the city trees.

Too often the result is that city trees fight a losing battle for survival.

Silk Imports

Canada still imports much the larger part of her silk goods. The production of the home industry amounts to a little more than one-third of the imports. Imports of silk into Canada in the calendar year 1929 were valued at \$9,402,000, while imports of artificial silk in the same year were \$12,364,000. Of natural silk imports, \$11,326,000 came from the United States and \$8,211,000 from Japan. Of artificial silk manufactures, the largest source was the United Kingdom, from which the imports were valued at \$5,461,000. Canada's exports of silk and artificial silk combined amounted in the same year to less than \$333,000.

Canada's Canned Goods

Canada's exports of canned foods are more than double her imports of these products. In the calendar year 1929, imports were valued at \$8,617,000, and consisted mostly of fruits and vegetables not grown in the Dominion. Exports of canned foods during that year amounted to \$18,359,000, of which canned fish supplied \$12,517,000 and condensed milk \$3,442,000.

"People's emotions are apt to follow the words they use," Thomas W. Lamont.

Bombing of Clouds Stops Hail Storm

French Farmers Assert that this Method Lessens Hail Destruction

Vichy, France.—A ring of southeast winds blowing over the hills during every storm, fighting hail with explosives. This is the centre of the hail prevention service, in which many French farmers have absolute faith. Here in the suburb Cusset are made most of the rocket bombs, and the semicircular line of outposts that protects farms around the city is one of the best organized in France. The theory is that big rockets shot into storm clouds, exploded by precisely timed fuses, create waves that dissipate clouds and prevent the formation of hail.

When scientists question the efficacy of the method the farmers' associations show statistics to prove that where rockets are used there is a tremendous saving in lessened damage from hail, one of the scourges of this region. Hail stones of great size often are reported.

There are thirty "firing posts," to each of which are detailed two men, usually farmers, one of whom must always be on duty to act at the approach of a storm. As soon as storm clouds approach, the sentinels estimate the height and fire the rockets.

This hail service costs each farmer about eight cents an acre a year. Once cannon were used to fire shells, but the rockets are said to be cheaper and better. Before that there often were used big iron funnels with the large end up. A charge of powder rammed in the small end was exploded, sending up waves that widened.

Hail ringing is practiced at Arronnes near here. A big inverted bell is rung loudly. As the village itself is in a funnel-shaped hollow, the sound waves rise and spread, and the believers in this protection assert clouds are prevented from forming hail.

Britain to Build Super Flying Boats

London.—Work shortly will be begun at the Vickers Supermarine Works at Southampton on the largest flying boat yet attempted in Britain. It is understood. Research has been progressing for some time and details reported call for a vessel 18 feet high and 100 feet long, driven by six engines, developing a total of 3700 horse power.

The craft will accommodate forty passengers in five saloon cabins with sleeping quarters for twenty. Each saloon will have eight armchairs with collapsible sleeping berths above, while further aft will be a baggage room, kitchen and lavatory.

Construction plans provide for a high-wing all-metal monoplane, carrying a navigating deck above passenger quarters. The wingspread will be about 140 feet with a front edge six feet thick. It is anticipated that this large craft, weighing more than 30 tons loaded, will be much more seaworthy than anything so far produced.

Quite the Reverse

Casey and Murphy were admiring a big London building. "It's surprisin'," said Casey, with a knowing air, "how mortar binds all those hundreds of bricks together."

Murphy gave his companion a suspicious sneer. "Whinever are ye goin' to learn a bit of sense, Casey?" he replied.

"Sure and whatever d'ye mean?" queried Casey.

"Bricks aren't kept together by mortar," Murphy explained. "Mortar keeps them apart."

His Secret

The manager of a big company happened to meet one of his employees in the park.

"Good-morning, Smith," he said, "I've been wanting to congratulate you for some time. You're the best outside salesman we've ever had."

"Thank you, sir," responded Smith. "I always do my best."

"What puzzles me," went on the manager, "is how you do it?"

"Easy, sir!" replied the other. "When a woman opens the door to me, I say: 'Good-morning, miss, is your mother in?'"

Maker of Rain

Dr. G. M. Sykes, big rain and wind man of New York City, with his weather control bureau, which he claims can coax rain from the clouds at any time. When he wants to prevent rain he breaks up all the cloud formations in sight.

Hidden Cave of Gold Lures Australians

Two Expeditions Disappear into Bush—Savages Prove Hostile

Adelaide, S. Aust.—Departure of two expeditions into Central Australia in search of gold is largely due to the persistent belief among prospectors that somewhere in the heart of the country there exists an Aladdin's cave of gold closely guarded by aborigines.

One party, leaving Sydney and traveling by way of Alice Springs, includes Captain Blackiston-Houston, aide-de-camp to the Governor-General. It has taken along with it an airplane to assist in the survey work and if necessary to drop food supplies if the men get too far from their base.

The other expedition, from Adelaide, is led by Michael Terry, explorer and author, being financed by a group of some 50 leading citizens. Both parties recently reached their bases in the Alice Springs country about the same time.

The Terry expedition is prepared to remain for 12 months, being one of the best organized expeditions sent into the interior for many years.

Dr. Herbert Basedow, a central Australian authority, puts the object of the quest at the southwest corner of the Northern Territory, between 250 and 300 miles from Alice Springs.

Thirty years ago an explorer named Earle penetrated the wilds and brought back amazing specimens in a bottle-green quartz. Since then parties have endeavored to trace the locality and have failed. Earle's rough sketch of the country showed a cave where invisible wealth rivaling Aladdin's was supposed to be hidden. The natives are said to know, but are unwilling to give the information.

The natives have traveled in from the far interior to the west coast of South Australia with fine specimens from the mysterious field, and men have gone after it, without success. It is said that since the country is subject to long periods of drought, sometimes extending over nine years, the natives think that expeditions visiting the locality with camel teams will use up the small resources of water and, consequently, are hostile when whites put in an appearance.

Dr. Basedow, however, has not found the natives so alarming as they have been painted.

The South Australian Government has already sent three expeditions to Central Australia in search of the deposits. Dr. Basedow, then deputy Government Geologist, accompanied one of them. They obtained some of the green-looking quartz, but there was no gold in it. When Dr. Basedow led the McKay expedition in 1926 he met some natives of the tribes inhabiting the elusive gold-bearing country, but they divulged nothing.

Dr. Basedow is convinced of the presence of gold deposits. The country, he says, has striking auriferous tendencies.

Too Obliging

Herring opened a fish shop, and placed a sign over the door. It read: "Fresh fish sold here."

"What did you put the word 'fresh' on that sign for?" asked an inquisitive customer. "Surely you wouldn't sell the stuff if it wasn't fresh?"

Herring decided that there was something in what the customer said, and he had the word "fresh" taken out.

"Why have you put the word 'here' on the sign?" asked another customer. "You're not selling it anywhere else, are you?"

The following day Herring erased the word "here" from the sign.

"Why use the word 'sold'?" inquired still another customer. "You're not giving the stuff away, are you?"

Finally, only the word "fish" was left.

"Surely nobody can find fault with that," the obliging tradesman told himself.

"I don't see the use of your sign with the word 'fish' on it," another customer told him the following day, "you can smell it a mile away."

NEW LINGERIE

The newest lingerie has its lace dyed to match the silk. White is very good this fall, indicative of the old-fashioned trend of styles.

PEACE AND WAR

No nation ever had an army large enough to guarantee it against attack in time of peace or ensure it victory in time of war.—Calvin Coolidge.

Oyster Is Product Of Days of Laziness

Periwinkle and Starfish Are Oysters Most Deadly Enemies

The oyster, it has been discovered, is the product of ages of laziness. Centuries ago he chose not to walk, so now he must anchor himself to some object below the surface. What was once a foot, and perhaps, ages ago, two feet, is now a scarcely distinguishable protuberance.

But inert as oysters have become they can still do astonishing things. The oyster pays no attention to ordinary noises. However, if while he is feeding he is startled by a thunderclap or explosion, the mouth closes tight. So he can hear.

If an oyster is placed in a tank near a window, and the shade is drawn to shut out the light, he closes his shells. Hence, he can see.

The "mantle" is fringed with delicate tentacles, which have been identified as organs of touch and feeling, as well as of taste and smell.

And at least one oyster has written. He was placed in a tank, with his lower shell cemented to the upper shell. At the upper end the wire was connected to a balance. The balance changed whenever the oyster opened or closed his shell, and the contrivance operated a pen, which marked on paper the record of the oyster's movements, showing the number of hours during which the shells were shut. The bivalve confessed that he feeds eighteen hours out of twenty-four.

The oyster derives his food from the water, his normal daily consumption being five gallons, and a colony of less than a million drink more water in the course of a day than the inhabitants of London.

The female oyster produces at a spawning from ten to fifty million eggs, but only a small percentage survive. If all lived the world would soon be overrun with oyster shells, for the descendants of one pair of oysters would compose in five generations a mass six times the size of the earth.

Many interesting facts have been observed in connection with the sub-aqueous cities in which oysters congregate. The murderers of those undersea cities are the periwinkle which drills through the shells of the oyster and sucks out the meat, and the starfish which embraces his victim with his five strong arms, smothering it until it opens its shell, and then feasts.

An Irish Revolt. Until a few years ago, it looked as though oysters would suffer persecution without revolt. But last year a startling event took place.

On the north-east coast of Ireland, near Donegal, oysters have been growing to enormous size, and it was observed that thousands of rats were going down to the beach, never to return. One day a fisherman found the answer. A rat crept up to an oyster in shallow water. There was a high-pitched screech—and the next wave covered both bivalve and rodent. The rat's nose was caught between the oyster's shells and he had been dragged to death.

Thousands of rats have died in this manner for the shellfish is inevitably the victor. The appetite for oysters around Donegal has diminished, but so has the rat menace, so the people are satisfied!

Apples From Canada Made Debut in 1881

Fruit has been grown in Canada for nearly 300 years. The apple industry of the Annapolis Valley in Nova Scotia now enjoys a world-wide reputation and there are records of the growth of apples in that district as far back as 1635. The census of 1898 showed that at Port Royal alone there were 1,584 apple trees distributed among 54 families, of whom many had orchards of from 75 to 100 trees. At Beaubassin, also in Acadia, the same census showed 32 acres in fruit trees. Historical records of those earlier days are necessarily incomplete, but definite information is available that in 1663 apples were being produced in the Province of Quebec, and it is in that province that the celebrated Fameuse variety is thought to have originated.

The first steamer to carry apples from the Annapolis Valley direct to London sailed in 1881. This ship carried 6,800 barrels, and made the voyage in 14 days. The venture was fairly successful, and from that time to the present the business has continued to increase in volume. A record crop of about 1,900,000 barrels was produced in 1911, when 1,734,376 barrels were marketed; and further records were made in 1919, when the gross crop exceeded 2,000,000 barrels; also, in 1922, when 1,891,350 barrels were packed and sold from the Annapolis Valley and adjacent valleys, which comprise a district of about 100 miles long by six to eleven miles wide.

KNOWLEDGE

There is a kind of knowledge which many persons shrink from. It is that which involves certain duties and responsibilities which they are not willing to accept.

Ottawa.—There were 73,153 students enrolled in the universities and colleges of Canada last year, according to the Dominion Bureau of Statistics. Of his number, 46,354 were men and 26,798 women. There were 6,773 degrees and diplomas granted of which 35.7 per cent, or 2,427 went to women.

What Do You Mean,—Good Luck?

THE ANAEMIC GIRL

Who Has Lost Her Charm and Beauty

"She seems to be losing her looks." This remark is often heard about girls who were once noted for their sparkling eyes, their rosy cheeks and their vitality. The cause is not far to seek—they have become anaemic; that accounts for the pallor and the loss of charm. The anaemic girl, if she neglects her health, may be a sufferer all her life.

Take heed, you pale, anaemic girls. Plenty of fresh air, nourishing food and rest will help you, but what you need most is good blood. Those wretched headaches; that fickle appetite and those terrible heart palpitations can only be banished if the blood is rich, red and pure.

Good blood—the kind that brings good health, is created by Dr. Williams' Pink Pills. The whole mission of these Pills is to build rich, red, health-giving blood. The Pills are sold by all dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Barter

"Count with me the things I sold
For a stranger's paltry gold,
Pleasant things that made my
heaven—
To a stranger's keeping given!

"The four walls that shut in love,
And the sturdy roof above;
Homely things that were all mine,
Braided rugs in quaint design,
Friendly chairs, and firelight's glow,
Gleaming dishes in a row;
Swaying curtains shining floors;

"Windows, whose out-looking showed
Garden, field, and winding road;
Thriving plants upon the sill,
Money-musk, and daffodil;
Scented herbs, and flower-beds,
Roses, nodding lovely heads
Over curving pathways, set
With marigold and magnolia;
Clover patch, and garden wall,
Song-bird's morning madrigal;
Cricket's song, and hum of bees,
Hymn of the wind in bending trees—
All sweet things that made my
heaven,
To a stranger's keeping given!

"Now another hand than mine
Soon shall train the trellised vine,
Allen eyes shall watch unfold
Buds of crimson and of gold.
Oh, little home—how well I know
That no one else can love you so!"
—Edith D. Osborne, in the Woman's
Magazine.

"I am going to the ball game."
"What for?"
"Just to kill time."
"Why waste your ammunition when
the umpire is there?"

In a small village in Ireland the mother of a soldier met the village priest, who asked her if she had had news. "Sure, I have," she said, "Pat has been killed." "Oh, I am very sorry," said the priest. "Did you receive word from the War Office?" "No," she said. "I received word from himself." The priest looked perplexed and said, "But how is that?" "Sure," she said, "here is the letter. Read it yourself." The letter said: "Dear Mother, I am now in the Holy Land."

Early Attention of Doctor Cheats Dread Infantile Paralysis of Victims

Parents Warned to Note Early Symptoms and to Call Doctor Immediately—Delay Is Fatal

"If there is one disease more than any other whose very name strikes dread into the hearts of parents," says a pamphlet recently published by the Health Department of the Ontario Government, "it is Infantile Paralysis" or "Poliomyelitis."

To-day I want to tell you about this dreadful destroyer of young lives, but I do not want to alarm you unnecessarily. Fortunately, it is possible for me to promise you a message of genuine hope insofar as this disease is concerned. For medical science has recently learned a great deal about fighting it, and so, while warning you against it, one is also able to tell you how to protect your children from the crippling and death that so often follow in its wake.

These methods of protection differ from those employed in safeguarding human life and health from any other disease. We know how to prevent smallpox, and we know how to prevent diphtheria, but our doctors have not yet learned how to prevent the crippling that follows the disease.

That, of course, is most important. For while the disease is a serious and dangerous affliction under any circumstances, it is robbed of much of its terrors when parents know that they can practically assure their children ultimate and complete recovery from it.

There are, however, some things which must be borne in mind if this happy conclusion is to be reached on behalf of the little sufferers, and it is those things which I would like to especially stress now.

In the first place, speed is essential in diagnosis and in giving treatment. Every moment of delay in calling the family physician when suspicious symptoms manifest themselves, is a moment of added danger. If you would save the life of a sufferer from infantile paralysis, you must call in the doctor early. Delay is fatal. In order that you may understand why this is the case, let me tell you something about the disease. It is caused by an

inflammatory agent which attacks and destroys the spinal nerve cells which supply motive power to the muscles. The early symptoms (it is most important that you note and remember these symptoms, so I am going to say them over very slowly). The early symptoms are: Fever, Vomiting, Slight Diarrhoea, Listlessness, Unusual Fretfulness and Drowsiness.

Later and more characteristic symptoms are: The Appearance of Weakness in any extremity, Skin and Muscular Sensitiveness, Spinal Pain, Apparent or Real Rigidity of the Neck Muscles.

Now, physicians have developed a substance known as "Convalescent Serum." This serum is actually taken from the blood of individuals who have recovered from the disease. As I indicated, it cannot prevent the disease, but if given during the critical period of forty-eight hours after the onset of the disease, it does enable the body of the sufferer to fight off and prevent the crippling.

Why does it do this? It has been proven that very rarely does this disease recur in the same individual. That is because the blood of one who successfully recovers from it has developed an immunity to the disease. It has been found that if a very small quantity of the blood of a recovered patient is injected into the blood of one who is just contracting the disease, the new sufferer will quickly develop the same immunity that exists in the blood of the recovered patient.

Now you see why it is so important for parents to memorize carefully the symptoms of this disease. And why it is so necessary that the doctor be summoned immediately, upon the first suspicion of their presence.

It's all a question of speed—if the doctor gets on the scene within forty-eight hours after the first symptoms begin to manifest themselves, he can save the child from crippling or death. Otherwise the serum is useless, for it has been proven that once the crippling begins to set in, it is too late for the serum to work.

Doctors Don't Like Aircraft

While the man in the street sees only cause for congratulation in the way in which aircraft are now annihilating distance, medical experts are becoming a little alarmed at it.

They are pointing out that transport so rapid as this is destroying one of the safeguards against the spread of disease. For instance, two of the most dangerous diseases of the East—plague and cholera—are now held in check by the efforts of health authorities at the world's ports. If a man infected by either of these diseases boards a steamer, the trouble has developed during the voyage sufficiently to enable it to be recognized, and the port authorities can take the necessary steps. But aircraft are quicker—and an infected man may land in a new country before the disease has developed.

Another danger is that mosquitoes, bearing the germs of malaria or yellow fever, may "stow away" on an aeroplane and be carried from one part of the world to another by air.

Clergyman (to Mrs. Jones, whose little son has just been christened): "Oh, Mrs. Jones, I have never seen a child that has behaved so well at a christening." Mrs. Jones: "Well, you see it's because my husband and I have been practising on him with a watering can for a whole week!"

Larkins: "You see things in a different light since you married, do you not?" Harkins: "I ought to. There were seven lamps among the wedding presents."

Minard's Liniment gives quick relief.

Crying Babies Are Sickly Babies

The well child does not cry—it is only the sickly baby who cries. The well child is laughing and happy. Baby's cry of distress is his way of telling the mother or nurse that he is ill. Therefore, if your baby cries do not delay in looking for the trouble.

Baby's Own Tablets are a safe and efficient remedy for childhood ailments. They are a mild but thorough laxative which through their action on the stomach and bowels banish constipation and indigestion; break up colds and simple fevers and promote healthful sleep. They will make baby happy and keep him happy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ontario.

Climbing the Hills

"Far over the steep hillside it wound
The path where his feet must go,
The road that summer knew blossom-sweet

Now covered with ice and snow,
And he sighed, this lad, as he strove
to set

His feet on the ice-bound track,
"Oh, the hardest part of climbing a hill
Is to keep from slipping back."

"I thought, as I watched him trudge
along,
Of the hills we all must climb,
Whether the pathway be blossom-starred

Or white with the winter's rime,
And one and all we shall find this
true,

As we follow the upward track,
That the hardest part of climbing a hill
Is to keep from slipping back."

—Florence Jones Hadley, in the New Outlook.

The verger of a village church died, and it was decided to appoint, as his successor, a wise and worthy member of the community. He was offered the job at \$250 a year; but then it turned out that he couldn't either read nor write, so it was given to another. However, as a consolation \$100 was presented to the other man. With this he bought bananas and a harrow and soon was making pots of money. This he deposited from time to time in a bank. One day the bank manager wrote suggesting that, as his fortune was so large it might be advisable to invest it. But he got no reply. Finally he went to see the Banana King, who explained that he could neither read nor write. "Good heavens!" exclaimed the bank manager, "if you've made all that money as it is, just think how much you would have made if you had learnt to read or write!" "I will tell you exactly how much," was the reply. "Two hundred and fifty dollars a year!"

What is the oldest settler in the west? The Sun.

Minard's Liniment has a hundred uses.

Owl Laffs

The biggest screen triumph of the Fall will be taking them down without tearing them to pieces.

Wedding Guest—"This is your fourth daughter to get married, isn't it?"
MacTight—"Ay; and our confetti's gettin' awful gritty."

The professor knows of an absent-minded flapper who powdered her knees and pulled her skirt up over her nose.

Nephew—"Uncle, when are you going to play football again?"

Rich Uncle—"I don't play football. What makes you ask me that question?"

Nephew—"Well, father says when you kick off we are going to get a motor car and a house."

David said in his haste all men are liars, but it would have been equally true if he had taken his time in saying it.

Mabel—"Could you suggest something suitable for a girl friend's birthday?"

Clerk—"How about these book ends?"

Mabel—"Just the thing! She always reads the ends before she does the beginnings."

Did you hear about the Scotchman who wrote to this newspaper that if they didn't stop printing Scotch jokes he was going to read some other paper the next time he went to the library.

The best school of experience is co-ed, too.

It may be unpleasant to play poker with a bad loser, but it's a lot better than playing with any kind of a winner.

She may be the whole show to her mother, but she's only the intermission to me.

He—"Were you ever vaccinated?"
Her—"Why, yes."
He—"I don't see the scar."
Her—"You're not going to, either."

Why didn't you walk home from that auto ride last night, daughter?"
Daughter—"We went too far, mama."

The bootlegger has many temptations but few trials.

Teacher—"Who can tell me why we should always be neat clean?"
Kathleen—"In case of accident, teacher."

A beautiful young lady and her bashful suitor were alone in the parlor. After several minutes of silence she finally said:

She—"What are you thinking about, John?"

He—"The same thing as you are."

She—"Oh, you had boy. I've a good notion to slap you."

A man has to be very good to keep out of jail—or very rich.

Mother—"After all, the boy is only sowing his wild oats."

Father—"I wouldn't mind, if he did not mix in so much rye."

A merchant's biggest boosts are the knocks of a competitor.

Running from creditors is a very unmanly way to take exercise.

Gent (as he paid a small newsboy for his paper): "I see that you are putting up a good many new buildings in your town."

Boy—"That is the only kind we put up here, sir."

Visitor: "Where's the other windmill gone?" Native: "We only had wind enough for one, so we took the other one down."—New Goblin.

When mixed with sweet oil, Minard's serves as an after shaving lotion and antiseptic. Soothes and freshens the skin.

MINARD'S LINIMENT
"KING OF PAIN"

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Bitchiness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills. They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

If baby has COLIC

CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

BACKACHE

Wonderful relief from pain

Backache is one of those wearying complaints which bind all their victims together with a common bond of misery. And when any one suffers from backache finds a sure remedy, fellowship prompts the quick report of that discovery to others. Here's a woman who has her friend to thank for knowledge of a remarkably successful treatment. Now gratitude compels her, in turn, to pass along the good news to you.

"I am writing to tell you of the great benefit I have received from Kruschen Salts. My friend, Mrs. H., had received so much benefit that she begged me to give Kruschen a trial, although at first I was doubtful, because I had tried so many things. At last, however, I tried some of her Kruschen, and, feeling hopeful, I purchased a bottle, and I can honestly say that before I had finished the bottle my backache was gone. I have suffered for years with kidney trouble and dreadful headaches, and now to be free from the pain altogether is wonderful!"
(Mrs. C.)

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

Lydia E. Pinkham's Vegetable Compound

ISSUE No. 40—'30

Immediate Relief for INDIGESTION

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume

in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid; never made in tablet form. Look for the name Phillips' on the bottle. All drug stores—50c.

Here and There

After a trip through western Canada during which he and his fellow directors studied at close range business and agricultural conditions in the four western provinces, E. W. Beatty, chairman and president of the Canadian Pacific Railway, recently announced a programme of improvements and extensions to be undertaken forthwith by his railway which may be described as bold in conception and nation-wide in incidence. This work is advanced to the present time from next year and 1932 and will furnish work for farmers and their work animals and absorb as much as possible of the surplus labor in towns and cities.

Speaking at Winnipeg after a tour of western Canada, with E. W. Beatty, chairman and president of the Canadian Pacific Railway, General Sir Arthur Currie said he returned to the east "more proud, more confident of the country than ever before." Admitting that the times were uncertain and anxious, Sir Arthur urged that wealth, opportunity and resources belonged to Canadians and the solution of "nation-wide depression was up to our men and women and I believe in the Canadian bread and the Canadian breed." As an instance of the creation of new wealth in Canada, he cited the Peace River country with which he had been profoundly impressed.

Occupying the entire top floor of the Royal York Hotel, Toronto, Canada's most up-to-date radio studios were operated for the first time October 3 with the broadcasting of the Canadian Pacific Railway's "hour of cheerful and good music." It will operate a nation-wide radio broadcasting through the winter months.

How high can a fish climb? This is a question over which lovers of angling have often argued and debated. Many experts declare that 50 feet is the maximum for a fish to climb by means of a natural fishway. The Canadian Government Department of Fisheries in an official statement declares that fish in the Mersey River are climbing a fishway 59 feet high and "are making the climb up the river without difficulty."

Consumption of gasoline in Canada increased 543 per cent. from 1920 to 1929 and in the same period the use of fuel and gas oils advanced 138 per cent. The wider use of motor cars, farm tractors and other agricultural machinery is given as the reason for the great increase in the use of gasoline and the growing popularity in the use of oil for heating purposes accounts for the advance in the consumption of fuel and gas oils.

An impressive march past of over 9,000 sockeye salmon was seen this summer at Stamp River Falls, B.C. The fish took from June 11 to July 20 to pass the falls by aid of the fishway constructed by the Canadian Government Department of Fisheries. A count of the fish was made at the falls during ten hours of each day in the six week period. As compared with the previous year there was a large increase, 3,061 against 2,512.

Miss Willow Lavery and Miss Willett, of Montreal, spent the weekend the guests of Mr. and Mrs. W. K. McArthur.

Mr. W. Murray, of Bothwell, Ont., Mr. W. Fraser, of Dunton, Ont., are visiting friends in Lachute and vicinity.

Show Them A Mountain And They'll Do The Rest

Edward Feuz (left) holds that "the climbing urge" is a heritage of all white races, be the objective high furniture for an infant; a tree-top for a schoolboy; or the pinnacle of success or the summit of a mountain for an adult. He ought to know, for he makes his living as a mountain guide in the heart of the famous Canadian Rocky Mountains, with headquarters at the Canadian Pacific Railway's hotels at Banff and Lake Louise, and has more "first ascents" to his credit than any other man in the country. His brother Ernest (right) is also an experienced guide and mountaineer. Both are natives of Interlaken, Switzerland, and have winter-homes in the little Swiss village of Edelweiss, in the Columbia Valley. They are shown scanning the peaks adjoining the Banff Springs Hotel.

Tea Biscuits unusually good when made with Magic Baking Powder

If you bake at home send for the
New Magic Cook Book. It will
suggest many attractive dishes
and save time for you.

Look for this mark on
every tin. It is a guarantee
that Magic Baking
Powder does not contain
alum or any harmful in-
gredients.

3 out of every 4 Canadian housewives* who
bake at home, use Magic Baking Powder be-
cause they find that Magic gives consistently
better baking results.

Next time you bake biscuits, try Magic and
see for yourself how it will help you with
your baking.

Try this Recipe for Biscuits

2 cups flour
4 teaspoons Magic Baking Powder
1/2 teaspoon salt
Method—Sift together flour, magic baking powder and salt,
then cut in shortening. Gradually add cold milk sufficient to
make a soft dough as can be handled, using a knife to mix
with.
Flour centre of board generously, drop dough on it, pat or roll
out very lightly to 1/2" thickness. Cut out, bake 15 to 20 minutes
in a hot oven.
All ingredients should be cold. Handle as little and as lightly as
possible and avoid working in more flour after milk has been
added.

THE LATE MRS. A. D. MCGIBBON.

The sad news of the sudden death of Margaret Mason, beloved wife of Mr. Archibald McGibbon which occurred on Monday afternoon last came as a great shock to her many friends in this community. Deceased lady had not been in the best of health for some time past, but was around and out in her garden a short while before her death. She was born in St. Hermas 69 years ago, the sixth daughter of the late Mr. and Mrs. Robt. Mason. Her early girlhood was spent in Dalesville, her marriage taking place some forty three years ago, since which time she has resided in Lachute. Of a gentle retiring disposition, she was a devoted mother and home-maker and an active member of the Baptist Church. The funeral was conducted on Wednesday afternoon by her pastor, Rev. A. Penman, in the presence of a large number of sympathizing friends and relatives, after which the remains were tenderly laid to rest in the cemetery at Dalesville. The floral tributes were many and of great beauty but not more beautiful than the face of the loved wife and mother now laid to rest.

She is survived by her husband, four daughters, Mrs. Stanley Burroughs, Misses May and Catherine McGibbon, of Montreal; and Miss Jean of Lachute; five sons, John, of Fossmill; Douglas, of Quebec City; Robert, James and George, of Lachute. She also leaves two brothers, Dr. James Mason, of Lachute; and John, of Brownsburg; and three sisters, Mrs. Cassidy, of Wisconsin; Mrs. Wm. Stewart, of Brooklyn; and Mrs. A. Kennedy, of Dalesville.

God's plans like lilies pure and white unfold,
We must not tear the close-shut leaves apart;
Time will reveal the calyxes of Gold.
And when through patient toil we reach the land
Where tired feet, with sandals loosed,
may rest,
When we shall know and understand,
I think that we shall say, "God knew the best."

GRENVILLE

Mr. William McKean is enjoying a visit at his home here.

Mr. Willie Bradshaw was in Ottawa last week.

Mr. Desforges and family are occupying the home of Mr. and Mrs. S. Goudie.

Mr. and Mrs. MacVicar are occupying the home of Mr. and Mrs. Willie Cooke.

Mr. and Mrs. Doxoe and two children called on Mrs. Gaudry last Tuesday.

The Mission Circle of the Grenville Baptist Church held at the residence of Mr. and Mrs. F. Dakin, on October 16th.

Mr. and Mrs. Stewart Goudie, Miss Dorothy and Master Mickey, of Lachute, were the guests of the former's mother, Mrs. Tompkins, on Sunday.

Miss Vera Gauley, of Montreal, spent part of last Sunday with her parents, Mr. and Mrs. John Gauley, and attended the Young People's Conference of the United Church in Lachute on Sunday.

RAFFLE and DANCE

A Raffle and Dance will be held in Morin Heights, on Friday evening, October 31st, for the benefit of the Morin Heights Athletic Society. A Bay Horse will be raffled. Tickets 25 cents.

Local news of the Week

Mrs. Geo. Graham spent last week in Montreal visiting friends.

Mr. and Mrs. McLaren and son, of Montreal, were the guests of Mr. and Mrs. Geo. Deacon on Saturday.

Messrs. Gordon and Lorne Henderson, of Montreal, spent Thursday last guests of Mr. and Mrs. John Hadley.

Miss Louise Sherrett, of Lakeside, is spending some time with her sister, Mrs. C. B. Westgate, of Boston, Mass.

The members of the Literary and Dramatic Society please notice that the new Library Books are at Miss Slater's.

Mr. and Mrs. J. Morrow, Mr. J. Findlay, Miss Leona Garretsee, and Miss Evelyn Creswell, of Montreal, were the guests of Mr. and Mrs. G. Creswell over the week-end.

Miss Milly Davis and Mrs. A. Davis who have been visiting Mrs. Wm. Deacon, left Wednesday for Morin Heights. Mr. Newton of Winnipeg, is also her guest for a few days.

Mr. and Mrs. J. Morrison and son and daughter, of Howick, Misses E. and S. Hamilton, of Montreal, and Mr. & Mrs. D. Massie and son Meredith, were Sunday guests of Mr. and Mrs. Robert Hamilton.

—Mr. C. Stephenson wishes to announce that his Cash and Carry store will be closed all day Saturday, November 1st.

Burial took place in Lachute, on Saturday, October 25th, 1930, of the ashes of the late Lily Margaret Paliser, fourth daughter of the late Joseph Paliser, advocate; and Margaret Lily McGibbon, his wife who died in Vancouver, B. C., on June 2, 1930.

The direction of the Rex Theatre take pleasure in announcing the coming of the following pictures: Richard Barthelemess in Son of the Gods; (Farthel Production) Dynamite; Wm. Haines in Way Out West; Greta Garbo in Romance; Joan Crawford in Blushing Bride; Norma Shearer in Let's Be Gay. The new Serial: The Box of Jades.

The Annual Meeting of the Lachute Red Cross Society will be held in Victoria Hall, on Wednesday, Nov. 5th, 1930, at 2.30 o'clock. Reports on the past year's work will be submitted. Election of officers will take place. It is expected that Col. Buckley, Manager Canadian Red Cross, will be present. Every member is requested to be present.

We join with the many other friends of Mrs. Thos. Wilson, of Montreal, in wishing her many Happy Returns of her 101st Birthday which she celebrated on Tuesday last. Mrs. Wilson was the daughter of Lieutenant Colonel Edwin Pridham, of Grenville, who was also postmaster for over 50 years there. She is now residing with her daughter Mrs. W. J. Tucker, of 1843 Tupper St., Montreal, surrounded by every care and loving attention by her descendants.

In the early hours of Tuesday morning Mr. E. Lavigne, corner of Foundry and Bethany Streets, was robbed of considerable quantity of goods from his store and the thief in search of money was bold enough to enter Mr. Lavigne's bedroom and go through his pockets from which he extracted quite a sum. A number of petty thefts have been reported of late in different parts of the town, which makes one suspect that they are possibly of local perpetration.

The Ladies' Aid of the Brownsburg Presbyterian Church held a very successful Halloween Supper in the Basement of the Church on Friday evening, Oct. 24th. The basement which was suitably decorated for the occasion with black and yellow trimmings held three tables which were daintily set and plentifully laden with meats, salads and desserts presenting not only a pretty sight but an appetizing atmosphere, fully justified the expectations of the congregation in meeting the needs of such an occasion.

After supper had been served a very fine musical programme was given for the entertainment of the guests in the auditorium of the Church. The artists of the evening were Miss Cross, of Montreal, soprano soloist, accompanied by Miss Elizabeth Murray; musical selections by members of the Rover Scouts, under the direction of Mr. F. Vowles; violin selections by Mr. Putzin, accompanied by Mrs. Davies; vocal selections by Messrs. Hugh and Wilson Gall and Miss Florence Hay; tenor solos by Mr. H. Butler; and selections rendered by the Lachute Male Quartette, Messrs. C. Duncan, J. Gorman, E. Todd, D. Todd, accompanied by Miss Ruth Todd.

This programme was enjoyed by those present as each item received hearty applause, and encores were much in evidence. The evening was brought to a close by the singing of the National Anthem, and all agreed they had spent a profitable and enjoyable evening.

Young Peoples' Conference

A Christian Youth Conference was held in Lachute United Church over the last week end, under the auspices of the Young People's Union of the Presbytery of Montreal. A large percentage of the congregations of the Presbytery were represented, there being nearly two hundred in attendance. The general theme of the Conference was: "Think, Pray Live."

The Conference was under the trained and efficient leadership of the Rev. Norman Coll, Secretary of Religious Education for the Conference of Montreal and Ottawa, and Newfoundland. Other leaders associated with him in the conduct of the Conference were: Revs. Charles Cushing, John Macaskill, A. E. Hagar, C. J. McGerrigle, W. B. Rosborough, Misses Grace Grover (Girl's Work Secretary for the Province of Quebec), Edyth Maxwell, Isabelle Dawson, Dorothy Hall, Mrs. Dr. Bourke and Messrs. H. I. Cornell, L. W. James and Basil Howell. In addition to the help given by these individuals a splendid contribution was made in the closing service by Rev. T. W. Jones, Chairman, of Montreal Presbytery and Minister of Calvary Church, Montreal.

The Conference opened on Saturday afternoon with a sing-song, led by Mr. Coll. After this a cordial welcome was extended to visiting delegates, on behalf of the Lachute Church and its Young People's Society by Rev. W. B. Rosborough and Mr. Walter Gordon. At six o'clock that evening upwards of 190 young people sat down to a Banquet, served by the ladies of the Lachute W.M.S. Later in the evening the Conference was divided into six groups or Commissions for the discussion of the following subjects: Jesus Christ, Christian Conduct, Worship and Prayer, Other Youth, Christian Unity and Christian Society. The members of the various groups showed a disposition to discuss these great subjects in a serious and intelligent manner, and an attempt was made to think through to conclusions that would be in accord with the mind and teachings of Jesus. Time was also provided for the discussion of these questions on Sunday morning, and the exchange of thought and opinion which took place proved most helpful and stimulating to all concerned.

The Sunday services were presided over by Mr. Wray Morton, President of the Young People's Union. In the morning service brief addresses were given by six young people on the finding of the Christian Youth Conference of North America which took place recently in Toronto. These addresses were given by Misses Isabelle Dawson, Dorothy Hall, Eileen MacFarlane, and Messrs. Melville Smith, Cyril Wilson and A. Thurston. These addresses were well prepared and delivered in a clear and forceful manner.

At 5.30 the Lachute Society entertained the Members of the Conference at a Banquet Supper, under the Conventorship of Miss Bessie McQuat.

The Conference came to a fitting climax in the splendid closing service which was held Sunday evening. The worship service was led by Miss Grace Grover. The service of praise was led by a Young People's Choir from the Lachute Y. P. S., under the leadership of Mr. Chas. Dunder. The Lachute Male Quartette rendered a beautiful and appropriate number. Rev. T. W. Jones delivered a splendid address on "Following Christ," in which he showed very clearly what following Christ would mean in one's personal life, in the community, and in one's attitude to world situations and problems. This was followed by an impressive and beautiful "Consecration Ceremony," in which the members of the Conference pledged themselves to help Jesus in the carrying out of His great and redeeming purposes in the World.

Altogether it was a helpful and inspiring Conference, well conceived, and ably carried through and the memory of the happy hours that were spent in fellowship and discussion will linger long in the minds of its members.

SCOUT NEWS

Since the summer holidays, fifteen new boys have been enrolled in the 1st Lachute Troop, bringing up the total to 37 all told. Hard work has been the order of the day for everyone concerned so that nearly all the recruits have passed their Tenderfoot test which entitles them to wear the Boy Scout badge. Stuart Armstrong has now been registered as one of the Assistant Scoutmasters and his help is highly appreciated.

The first month of the Troop Competition has just been completed with the following results:—

Bull Dog Patrol,—244 points.
Crow Patrol,—207 points.
Wolf Patrol,—191 points.
Fox Patrol,—189 points.

The following Proficiency Badges have also been gained during the month of October:—

Athletes:—Garfield Clark, Howard Jones, Stanley Langille, Robt. Miller, Sam Milnes, Sidney Roberts.
Treasurer:—Fred Stansfeld.

"SALADA" GREEN TEA

'Fresh from the gardens'

APRIL ESCAPADE

By KATHLEEN NORRIS

SYNOPSIS

Mary Kate O'Hara is in love with Cass Keating and wants to marry him. But she also wants to help her brother, Martin. He is studying medicine at night and has had to turn down an opportunity to go to Germany because of the family's poverty.

Then Christopher Steynes, a friend of her employer, makes a strange proposition. He has been followed by a Russian countess and her daughter with a view to matrimony, and he wishes to discourage them. It means to Mary Kate enough money to give Martin his opportunity.

CHAPTER X.—(Cont'd.)

"You completely misunderstood me," said Christopher Steynes. "I want someone that I can introduce as my wife. I then move my sailing to the next boat, which leaves eleven days later. The Countess and her daughter don't change their sailing, for there is nothing to gain by it. Once thoroughly convinced that I am married, I don't suppose even a Russian countess would bother me. Do you? Do you know anything about them?"

"There are only four on our block," the girl explained.

He had a wild fresh laugh; she described it in her secret soul as an idiot laugh, but she rather liked it. He looked suddenly now, and gave himself and his chair a little jerk nearer her, and settled down with a fresh access of confidence and affability.

"Now listen, here's what I'd want you to do, Gordon Rountree is a prince. You can trust him. Will you concede that?"

She laughed. And remembering how her employer had acted when Mother was ill last summer, and his polite thanks whenever anyone stayed ten minutes late to do anything for him, and the half salary gift at Christmas time, so tactfully presented in a book, or with a handkerchief, she nodded willingly.

"Agreed. All right then! Gordon Rountree has a place down in Burlington, right near the one I rented for the polo. You're acquainted with Burlington. It's some twelve or fifteen miles down the Peninsula, south of the city. You know it, of course. Now I'm a stranger down there, nobody knows much about me—they're all terribly decent to me, and all that, but I mean that none of them would be very much surprised to hear I was married, do you see?"

"Gordon Rountree gives the Countess and Marks a dinner next Friday night, do you get me? And the next day I give them a luncheon at my house. The day after that they take the Overland for New York and then Russia, and it's all over."

"All I ask you—I mean, all I ask anyone to do, is to come to that dinner, sleep overnight at my house—I rented a swell old Danish housekeeper and her husband with the place, and she'll keep her mouth shut—and then play wife again at luncheon the next day."

"Were you engaged to this Russian woman?" Mary Kate asked, thinking, "She thinks I was."

"Has she?" Mary Kate was a movie fan. "Has she letters?"

"Some."

"Are they—incriminating?"

"No. Oh, Lord, no!" said Christopher Steynes. "But they're affectionate."

ISSUE No. 41—30

"Look here," he said. He caught up a pencil on her desk, and wrote some figures on a scrap of paper. Her eyes followed his hand.

"What's that?" asked Mary Kate blankly.

"That's what it's worth to me."

Her incredulous, suspicious look deepened.

"You're crazy!"

"I'm not crazy. I'm in a tight corner. I asked Gordon Rountree if he knew any girl who looked the part who would help him out. If you'll do it I swear to you that I'll treat you as I would my own sister—I'll swear it. You'll be sent to Sacramento Friday night—that's what the office will think and you will come back Saturday. That's all anyone'll know. And that cheque will go into your bank account tomorrow, if you say the word."

"What, before I even go?" She laughed; her cheeks were burning.

"Well," he said, "aren't you trusting me?"

"Yes, I do trust you!" she said quickly. She paused.

"Call it a lark, a practical joke," he pleaded. "It'd be the greatest fun in the world. Say you'll do it."

Mary Kate hesitated for a long minute.

"I'll think about it," she said slowly.

CHAPTER XI

"Now the point is," Mary Kate said with a jump, "exactly what can we pay?"

"Rent?" Cass Keating asked, with a downward glance at her, walking along a sunshiny spring street beside him.

"Rent?"

"Is that a new hat?"

"This? Well, I'll tell you. A girl at the office named Louise Sneyly, gave it to me for Tess. And I gave Tess fifty cents for it."

"It's wonderful," Cass bestowed another look upon his promised wife, a look that broke the first Commandment.

It was Sunday, a warm March Sunday that smelled of earth and flowers. White clouds were moving above a blue, blue sky; the world looked washed and clean, church bells laced the sunny city with a lingering solemn clamor. Late churchgoers were moving briskly along, but Cass and Mary Kate had already performed their Sunday duty and were free.

The girl had indeed been out in the cool twilight of seven o'clock, catching the sunrise over the towers and ship spars of lower San Francisco. She had loitered over a delicious breakfast alone with Ma and Pat, and had seen more sunshine slanting into the shabby kitchen, striking glints from the brass sink faucets and the nickel alarm clock. She had roused Tess and Regina and Tom and Mart, had washed her bright hair, and read the Sunday paper and worked out the crossword puzzle while it dried; she had helped her mother straighten the kitchen, after the children's breakfast, and had heard once more the story of the day Aunt Nellie caught fire the just before the Rowe twins were born, which recollection inevitably led Mrs. O'Hara into a dissertation on Uncle Jim Rowe, who was irresistibly high-spirited, and who had been known in his youth as "the life of the wake."

This naturally evoked memories of the Dugans, the Creels and the Spite Wall.

(To be continued.)

"Spoonerism" Origin
Now Explained

Few men have become the subject of so many myths as Canon Spooner, former warden of New College, Oxford, who died the other day leaving to the English language a new word—"spoonerisms"—topsy-turvy words and phrases. All manners of spoonerisms have been fastened on to him.

Addressing farmers he called them "sons of soil" instead of "sons of toil." He turned "loving shepherd" into "loving leopard." "A half-formed wish" became "half-warmed fish," and once when making reference to "the dear old Queen," it was during Queen Victoria's Jubilee celebration—he spoke of "the queer old dean."

But nobody believes that the venerable ex-warden of New College and high dignitary of the Church, was so absent-minded that when being seen off by a lady relative at a railroad station he gave her a "tip" and kissed the porter.

Dr. Spooner once denied his authorship of these mix-ups, and attributed them to the "woodish" of undergraduates. However "spoonerisms" is an accepted word to be found in all good dictionaries.

And that brings to mind an amusing schoolboy "howler" vouched for by Lord Dawson Penn—King George's physician—a recent visitor over here. It was at a dinner of the Mothercraft Training Society—appropriately enough—that Lord Dawson told his listeners, mostly nurses, of a small boy who, asked to state the famous motto, said:

"Liberty, equality and maternity."

Honey and Water
For Anti-Freeze

Saskatoon.—No more frozen radiators, says the bees of Saskatchewan, according to Dr. C. P. Patterson, professor of horticulture at the university. He announces he has found that a mixture of two parts honey to one of water will prevent radiators from freezing at temperatures under 15 below zero. The mixture, he says, "shushes" but does not freeze.

The Little Princesses and Their Relation to the Throne of England

In the event of the ultimate succession of the Duke of York to the throne would his two daughters, if no brother was born to them, become equal and joint heiresses to the Crown of England?

It is true that when a peer "with remainder to heirs general" dies leaving several daughters but no son they all rank equally and the peerage goes into "abeyance" between them.

But the Crown is not a peerage, and its descent is governed by different rules. Moreover, although the House of Lords, in determining peerage claims acts on the assumption that peerage law has never varied from the earliest times, this is well known to historians to be a mere legal fiction. In fact the nature of peerage and consequently the law governing it have varied very greatly; and in particular the law of abeyance was not established until about three hundred years ago.

A slight inquiry into the history will show why it cannot be held to apply to the Crown.

In the first place, there has never been a legal decision applying the principle of abeyance to any peerage except a barony. Now going back to the beginning of barony, in the first two centuries after the Norman Conquest it is found that the status of a baron involved three things:

- (1) Tenure of land.
- (2) Official of land.
- (3) A title.

The duties were at first of chief importance. They involved a large measure of government of his tenants, and the responsibility for supplying and commanding a contingent troops when the King went to war.

When the baron died the first essential was that his duties should be carried on. If he left sons the matter was simple; the eldest took the land and the title and performed the duties to the King. If he left only daughters it was still essential that the com-

mand of the military contingent and the duty of presiding in the feudal court should devolve upon a single person. So the eldest daughter took the lands and her husband bore the title and did the works.

But when the feudal system began to break up, the sheriff and the justices of assize ousting the barons' courts, and a money payment, taking the place of their military service, the urgent necessity for maintaining the unity of the barony disappeared.

Consequently, in questions of succession the emphasis shifted from the duties to the property. If there were sons the custom of primogeniture was now sufficiently strong to secure the whole of the eldest; but the succession of daughters being much less usual, was less hidebound; and the new custom was able to grow up, where there were only heiresses, of dividing the lands between them.

The title followed the lands; and if the lands were divided it went into abeyance. When the title, rather than the lands, emerged as the main essential of peerage, abeyance survived as the general rule.

Now, the old threefold combination of property, duties, and the title obviously applied to the Crown as well as to a barony. The old rule of succession is therefore logically applicable to the Crown.

But when barons lost their duties the King increased rather than diminished his; and consequently there is no rational ground for supposing the change of custom in succession to apply here. The King, unlike a peer is primarily an officer with duties to perform, and only secondarily a titled and propertied personage. His duties can neither be divided, like property, nor go into abeyance like a title; and so, like a baron of the original type, he must still have a single successor. So if he has only daughters to succeed the eldest of them will be Queen.

Enchantment

A haunting memory of summer past Art thou, October, in thy chequered gown Of gold and scarlet, green and russet brown.

Alas! thy fragile beauty cannot last For thou, October, art beneath a spell Of something magic, who with traitorous kiss Did charm thee into loveliness like this.

Within the leafy shades of yon dark dell The beauty will be fleeting as a breath Alas! October, thou hast been beguiled By that strange sorcerer in the woodlands wild Whose wanton kiss the herald is of death.

—A Nelson Young.

Minard's Liniment has a hundred uses.

Cleansing the Face

The dust which enters the pores during a few hours of motoring, particularly when the roads are crowded with holiday-makers, may be disastrous to the health and beauty of the skin. The incessant use of powder applied without a foundation of cream, keeps the pores open and allows the dust to enter and form blemishes. To cure this condition beauty specialists are giving dozens of open-pore treatments every day. Warm oil is applied with cotton wool and left on for five minutes. When the skin is thoroughly cleansed the pores are closed with astringent. Or an egg-and-oil mask is given, followed by an application of ice, to tighten up the pores and muscles.

For everyday protection the use of a mild day cream with an astringent base is advised. This is puerile, creaseless, but forms an excellent base for powder and rouge.

Uses for Vinegar

Malt vinegar has many household uses. Discolored silver should be rubbed with a rag moistened in pure malt vinegar and dipped in salt. Dry thoroughly, before polishing.

Rinse new or disused kettles with this vinegar and salt before using. Sponges when slimy should be soaked in vinegar for several hours. Rinse several times in hot water before using.

Add two or three drops of vinegar to the last rinsing water when washing white and Shantung silks to keep them a good color.

When Washing China

By the addition of a little borax to the water in which expensive china is washed a lovely gloss is given to the china after it is polished.

The borax helps to remove the dirt from the awkward crevices. Much of the danger in washing valuable china is lessened if a towel is placed in the bottom of the bowl in which the china is being washed.

Do not throw away odd pieces of new linoleum, as these can be cut to form attractive table mats to prevent hot dishes marking polished tables.

Landlady—"Why have you put your tea on a chair?" Boarder—"It was so weak I thought it had better sit down."

Landlady—"Why have you put your tea on a chair?" Boarder—"It was so weak I thought it had better sit down."

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

If you are looking for a dress that is conservative for all-day wear for early Fall here is a charming style.

It's slimming too with the wrapped movement at the front with the skirt falling in soft drapes.

Since patterned wool and silk crepe mixture is so much used, imagine how effective this model is in rich brown coloring with mauve tinge. It's a very flattering shade and suitable for street or afternoon bridge or tea.

Style No. 2682 may be had in sizes 16, 18 years, 36, 38, 40, 42, 44 and 46 inches bust.

Canon crepe, flat crepe and sheer tweed appropriate.

Size 36 requires 3 1/2 yards of 39-inch material with 1/4 yard of 39-inch contrasting.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

"There should be an organized relation between output, employment and consuming capacity." — Sir Philip Gibbs.

True dyes are easiest to use!

Dresses, drapes or lingerie look new when they're re-dyed with Diamond Dyes. No spotting or streaking; never a trace of that re-dyed look. Just rich, even, bright colors that hold amazingly through wear and washing.

Diamond Dyes are the highest quality dyes you can buy because they're so rich in pure anilines. That's what makes them so easy to use. That's what they've been famous for 50 years. 15 cent packages—all drug stores.

When the Continents of the World Slid and Shoved Around

Astronomical Observation Indicate that Greenland is Drifting Westward at the Rate of Sixty Feet Per Year

Look at a map and observe the east coast of South America and the west coast of Africa.

They would nearly fit if put together.

There is a good reason, according to a recent and widely accepted geological theory. They were once actually part of the same continental mass, and were pulled apart. All land masses were part of this primitive continent.

This new theory, that of "continental drift," is explained in an article contributed by W. J. Luyten to the New York Times. He says:

"Why did the continents take on the shape they have?"

"Why are the great mountain ranges where they are?"

"These questions have provided geologists with endless disputes."

"The first ideas on the subject were that the earth, cooling and shrinking, had acted somewhat like an apple, which, as it dries, becomes wrinkled on its surface."

This fine theory was "too good to be true," for, it seems, mountain ranges are not mere wrinkles, but folds and creases where the surface of the earth has been "shoved." A new theory was wanted, and, to supply the need, we are told:

"In 1910 F. B. Taylor at Yale first proposed some rather hazy ideas on the drifting of continents, while Alfred Wegener, in Germany, worked out a similar theory to much greater detail soon afterward. More recently David and Joly put the finishing touches on this theory of 'sliding continents.' Wegener once noticed how extraordinarily alike are the west coast of Africa and the east coast of South America. He finally asked himself: Would they fit if put next to one another? They did."

To-day his theory has grown to maturity, says Mr. Luyten, and it is the only one that is at all acceptable, though still far from perfect. He proceeds:

"The layers of the earth may be divided into three principal strata. The outermost, the light 'scum' on top, is made up principally of silica, with some aluminum. This layer is about twenty-seven miles thick, and rather light—only 2.7 times as heavy as water."

"Next comes a shell, some 1,800 miles in thickness, composed still of silica, but now largely mixed with magnesium, calcium, and iron compounds. Finally, underneath, and forming the inner core of the earth, is a great mass of heavy material, surmised to consist of practically nothing but iron and nickel, eight times heavier than water, and many times more rigid than steel."

Now the top layer, though light, is a real solid, we are told, while the

lower one is really a viscous fluid, apparently very similar to pitch, only 10,000 times "stickier." The great continental blocks are floating in a vast sticky pool which forms the floor of our terrestrial oceans, and extends 1,800 miles downward. To quote again:

"We can at once go back to the time when the earth was without form and void." According to Wegener, there was water everywhere then, except at the South Pole, where all the land was heaped up into one immense continent.

"It was all one solid block, with South America fitting snugly into the west coast of Africa; with North America and Greenland forming one mass with Europe; while on the east coast of Africa that which now is India—much larger in those days—closely adjoined Madagascar. Australia and the present Antarctic completed the picture by merging with South Africa and India."

"This single continent was then draped around the South Pole, the actual pole being located somewhere near what is now Cape Town."

"Then things began gradually to happen."

"The earth was rotating from west to east. The rotation set up a centrifugal force, and made all parts of that great continent try to move away from the Pole toward the Equator."

"The continent was ripped asunder. America came off in the west, Asia, India, and Australia in the east."

"India got the biggest 'push'; and its northern ridge folded over; hence the Himalayas. The two Americas were forcibly pushed westward; North America, being further away from the anchor, sailed faster, and thus curved up more, trailing Central America and Greenland in its wake. South America floated down majestically, and piled up the Andes on its front side."

Are there any confirmatory facts? Well, if the continents once formed a single mass, the different geological formations that existed before the separation should be similar in those masses that were once adjoining. The amount of evidence here is enormous, we are told. But Mr. Luyten goes on:

"The most attractive of all evidence in favor of the drift theory is formed by the climates of past geological periods. The upper layer skidded all over the place, and the various parts of the solid crust enjoyed different climates at different times, sometimes arctic, sometimes tropical. Each period left its traces in the different layers of rocks and fossils."

"If movements of the solid crust have taken place, it is more than likely that similar motions are still in progress. Astronomical observations do indicate that from 1860 to 1922 Greenland was drifting westward at the rate of sixty feet per year."

Mental Laborers Need Little Food

When a man comes home after a hard day's work, he feels entitled to a good dinner. But if his labors have been mental, no matter how tired he is, he has been using very little physical force. His food requirements are almost the same as if he had been idling. Says Good Health (Battle Creek, Mich.):

"Dr. Francis G. Benedict has been testing this subject in the nutrition laboratories of the Carnegie Institution, in Boston."

"He devised an apparatus for measuring the intake of oxygen and the output of carbon dioxide. These factors are an accurate index of the amount of heat produced."

"His subjects were taken after an all-night fast. They had a series of problems in mental arithmetic given to them, such as multiplying seventy-nine by sixty-three. Or if this was too easy, one of the numbers was increased to three figures. Periods of rest alternated with those of work. During the multiplication labors, the respiration became deeper and irregular, but the rate remained the same, about fifteen per minute."

"The men showed an increase in the heart-beats of five per minute on the average, while the single woman subject went up twelve beats per minute. The increase in heat production was only two and three-tenths calories per hour, about 4 per cent."

"One soda biscuit or one-half a peanut would supply this difference. A maid in dusting a professor's desk for five minutes would do more actual work, as measured by heat production, than her employer would in an hour of intense mental effort."

"The lesson of all this is that people who do no physical work should be very moderate in their eating."

To Clean Wallpaper

Put an old lace curtain in cold water tarch and rough dry. Rub the soiled part of the wallpaper over with this lightly, when you will find all traces of dirt have vanished.

"What's a mean, you only get three hours sleep a day?" The Youth—"Yeah—I get the rest at night!"

"Will you marry me?" he asked. "Nope," said she. And they lived happily ever after.

Whiskers Fashion In Russia To-day

Riga, Latvia.—The bushy-faced Russian whom Peter the Great sought to exterminate by forcibly shaving the Slay nobility is returning.

Russia to-day is filled with beards. According to the Soviet satirical weeklies, they have many advantages. They not only obviate the necessity of wearing neckties, which nobody in present-day Russia can afford, but also they mercifully hide a dirty shirt and act as a chest protector.

To be clean-shaven in Russia to-day is a sign that you are of bourgeois extraction.

Curiously enough, the man with red hair does all in his power to keep clean-shaven; for, according to an old Russian superstition, red-headed men are not considered reliable.

The chief reason for the increase of facial foliage under Bolshevism is the impossibility of obtaining shaving requirements.

The Soviets charge \$75 duty for two dozen razor blades. For one old-fashioned razor the duty is \$25, and for 2 lbs. of shaving soap \$150 is demanded.

Hostery Care

Stockings will look new longer if, after the first washing or two, a little mild tan dye is added to the rinse water. This also prevents that pinkish cast so many beige stockings develop.

A house is built of brick and stone, Of tiles and posts and piers, But a home is built of loving deeds That stand a thousand years.

Impatient Customer—"What's become of the waitress?" Cafe Manager—"Was she a tall, fair-haired girl?" Impatient Customer—"Possibly. But she's grown grey since I've been sitting here."

Little Charlie—"Come on, auntie, we'll go in the last carriage!" Auntie—"Oh, no, Charlie! The last carriage is dangerous." Charlie—"Well, why don't they leave it off the train, then?"

Taber, Alberta.—Sugar beets weighing up to nearly eight pounds have been found in the Bubach field of 22 acres, a mile east of Taber. More than 400,000 beets were harvested from this plot, weighing altogether 422 tons or nearly 20 tons to the acre.

Destination Unknown!

Mrs. Victor Bruce, noted English aviatrix, took off from London recently in single seater plane with her destination secret, but Japan or world-tour reported as possibilities.

Pure Ice Is Clearer Than Pure Water

Pure, clear ice is even more transparent to light beams than pure, unfrozen water, so that light passes through such ice for considerable distances without becoming visible and then may be made visible by a layer of bubbles of a roughened ice surface, like the beautiful effects obtained in ornamental signs of clear glass. So it is reported by L. C. Porter and W. A. Steiger, of the National Electric Lamp Works of Cleveland, Ohio, in an account recently published by the General Electric Company describing such ice illumination at Lake Placid, New York and elsewhere. Ordinary electric lamps may be buried inside a cake of ice or underneath the layer of ice that forms the skating rink. If the ice is absolutely clear the light passes through it without making the ice luminous. On the smooth surface of the ice some ornamental design then may be produced by roughening the surface with light hammer blows or with a file. This roughened surface immediately appears self-luminous, since the myriads of small broken ice crystals catch the light rays and reflect them in every direction. The same effect may be produced by layers of snow-ice or of ice containing tiny air bubbles inside a block of clear ice. The reason why solid ice is more transparent than the same water in unfrozen condition probably is that the invisible molecules of water are in continual motion and interfere with the light waves whereas, the same molecules frozen in ice are fixed in their places in the ice crystals.

A London man claims to have attended over five hundred weddings. One is enough for most men.

The Pullet Ration

A definite plan of feeding is necessary to insure best results from laying pullets, poultry experts of the Dominion Department of Agriculture advise. The well-balanced ration includes scratch grain, mash, green feed, grit shell, certain supplementary vitamin feeds, and plenty of fresh clean water. There is, however, a wide variety of materials which go to make up this ration. Home mixing of suitable formulae is recommended. Wheat, oats and corn barley go into the making of a good mash. Fifteen per cent. of animal feeds, 1 per cent. of salt, an equal quantity of cod liver oil, should be mixed in. Grit and oyster shell should be available in hoppers at all times. Alfalfa, clover, or cabbage make excellent green feeds, and where these are not available alfalfa leaf meal may be used. Raw potatoes, field carrots and mangels make succulent supplementary feeds. The feeding of cod liver oil supplies the vitamin which prevents rickets.

Can Stand the Heat

Washington.—Female bodies can withstand much more heat than can male bodies, according to findings of Dr. Oscar Riddle, of the Carnegie Museum. He says that high temperatures slow down male production of energy more than female, thus causing men to lose much of their energy during hot spells.

Teacher—"Markham, what is the Equator?" Markham—"An imaginary line, miss, running round the face of the earth." Teacher (facetiously)—"And could your mother hang clothes on that line?" Markham—"Yes, miss." Teacher—"And, pray, how do you make that out?" Markham—"Imaginary clothes, miss!"

Toads Taken Alive From Indian Mound After Lapse of Centuries

Oklahoma City, Okla.—Three toads taken alive from an Indian mound in Northwestern Oklahoma were scientists said they probably had been imprisoned for three or four centuries, were on display here recently at the State Historical Society Museum.

J. B. Thoburn, curator of the historical society, said the age of the amphibians depended largely upon the origin of the mound. If the elevation was made by hand, he said, it is

probable the toads were imprisoned 300 or 400 years, if it was of natural origin, the age of the toads might be even greater.

Thoburn and two other archaeologists made the discovery while excavating the mound, believed to be the

toads were dormant with lips and eyes sealed. Thoburn said, but within a few moments after being liberated, hopped about with agility, their lips and eyes open.

Have You Tried This Way?

To use left-over mashed potatoes, mix with flour and oatmeal and make into scones. Toast and eat hot with butter.

Small pieces of wash-leather sewn underneath big buttons prevent them from being torn out and leaving big in the garment.

When steeping clothes in blue water add a spoonful of salt. This prevents the blue from coloring the clothes in patches.

To remove inkstains from textiles and silk stockings, rub the stain with a cut tomato, afterwards washing with hot soap and water.

Add vinegar to the washing-up water to remove quickly the smell and taste of onions of fish from pans or cutlery.

When washing kitchen towels and dishcloths, add a little borax to the water. This makes them a good color and removes the dirt and grease.

A jam jar placed in a saucepan of water is as good as a double saucepan for making porridge or egg custard.

Use a rag dipped in turpentine to clean the rollers of a rubber wringer. The painted framework is best cleaned with paraffin.

The Sport of Princes

Polo, which has been much in the limelight recently in connection with the matches between Britain and America for the Westchester Cup, is one of the oldest games in the world.

Its original home was in Ancient Persia. From there it spread to India, China and Japan. It also spread westward, and became the favorite sport of the Byzantine emperors and their courtiers.

In modern times British officers in India saw its possibilities, and started playing it. The game first appeared in England in 1863, but the regular matches and tournaments on the Hurlingham Club ground only date from 1874.

It will be at least three years before there is another contest for the Westchester Cup, which is retained by America.—"Answers"

Home Made!

An easy way to remove stains from the hands after doing housework or preparing vegetables or fruit is to rub in a lotion made of equal parts of vinegar and water. A bottle of this kept by the sink is very useful; it also softens the skin if rubbed in after doing laundry work.

Care of Towels

Kitchen towels that are badly stained should be damped with cold water and rubbed well with yellow soap or sprinkled with soap powder and quickly rolled up as tightly as possible. Leave for a few hours.

A Culinary Puzzle.—Waiter, seeing dissatisfaction on guest's face: "Wasn't the dinner cooked to suit you, sir?" Guest: "Yes, all but the bill. Just take that back and tell them to boil it down a little!"

Ladybug Now Fights Garden Insects

The ladybird, or ladybug, is too busy these days to pay heed to nursery rhymes. She and her children have been conscripted by science to fight insect pests that destroy plants.

Besides the ladybird no longer has a private family life. Her "home," under the direction of science, is one of many laboratories, or "insectaries," where thousands upon thousands of them are grown right in the midst of very insect enemies they are later to combat. And although they are sold three for a ha'penny in England, they save the farmers a fortune in fruit.

Training the Huntress

The ladybug in this instance, however, is only one of 2,000 known species. While many of them feed on other injurious insects many of them do not. But to the layman, all ladybirds are alike. To the entomologist each of the 2,000 species is as different from the other as black from white.

The work of propagating the ladybugs falls into three phases. First a plant must grow on which mealbugs—a deadly fruit pest—may be grown as food for the ladybugs; second, the growing of the mealbugs on that plant; and third, the growing of the ladybugs on the food thus produced.

The plant used as a food base for the mealbug—the first step in the cycle of insect cannibalism—consists of potato sprouts. They are planted in prepared soil in small trays placed on racks in rooms. These rooms are constructed on either side of a central hallway, giving access to the room at the dark hall end. One mealbug lays an average of 600 eggs. They are placed on trays on which are leaves of a native plant acceptable to the pests. Then they are transferred to the trays of sprouts.

With the temperature at 80 degrees, twenty-five adult ladybugs are placed in each tray in the room. About 9,000 of the beetles are required for each room—which means that in one insectary alone there may be 750,000 ladybugs.

10,000 Beetles in his Pocket

The adult beetles deposit their eggs averaging 200 per individual, in the egg masses or larvae of the mealbug. In six days they hatch out small larvae, which feed on the mealbug eggs.

Twelve to twenty days are required for the development of the ladybug larvae. The emerging beetles are placed in gelatine capsules, ten to a capsule.

The ladybirds are carried into the field by organized "liberation" crews. Each man in the crew wears a two-pocket apron, carrying ten thousand beetles in one pocket. Each tree in the orchard is approached, the capsule opened, and the quiescent beetles thrown among the branches.

Theoretically, then, ten ladybugs placed in each tree, with plenty of food available, will increase to 100,000 at the end of ninety days. So, when you see a ladybird—particularly in a fruit orchard don't try to scare it. "Home," in these scientific days, to a ladybird, is where the mealbug is.

World's Strangest Cargo Arrives in London

The merchant ships that move about the world's oceans carry a variety of queer things in their holds. One may arrive at Hamburg with a consignment of elephants for the world's circuses; another may discharge at Secoude tons upon tons of ancient uniforms for the adornment of native chiefs. But perhaps the quaintest cargo ever borne by a ship was that unloaded recently at St. Katherine's Dock in London, from the Philomel.

She was loaded with sea water. Most ships pump out sea-water as fast as it makes its way in, but this one pumped it in special tanks and carried it all the way from the Bay of Biscay to London. In fact, she makes a habit of doing so. The water is for the fish in the aquarium at the Zoo, and only in the Bay of Biscay can the required crystal-clear water be obtained. It comes from a small stretch of ocean between Bordeaux and Ushant.

Each tank is sealed as soon as it is filled, and on arrival in London it is tested in the Zoo laboratories.

Warning Pan

If you want to keep things hot, without cooking them any more, invert an inexpensive pie pan over the flame and set your food pan on top. This makes a nice warming-pan without enough heat to cook.

"What do you do when in doubt about kissing a girl?" "Give her the benefit of the doubt."

WE THINK FOR OURSELVES

Development of co-operative mar-
keting in Canada has quickened the
interest of hundreds of thousands of
Canadians in world trade. To the
extent which interest has expanded,
knowledge has grown. Twenty years
ago the farmer saw no further than
the country elevator into which he
dumped his grain. Then his vision
encompassed the primary markets
where his deliveries were hedged.
Gradually he grew to understand the
export market, until today, through
his own representatives he has the
entire machinery of marketing in his
own hands.

He has learned to digest world
statistics and to do business with
world buyers. And while he is primar-
ily concerned with his own products
his new and broader vision is un-
folding to him what were once the
baffling mysteries of world economics.
One very tangible result is that
this new learning is going to knock
a lot of bluffery out of politics.
For instance, for many years we have
been buying two dollars worth of
goods from the United States, while
they bought one dollar's worth
from us. We bought most manufac-
tured goods. They bought most raw
materials. Yet Liberal speakers from
Mr. King down, and Liberal papers
from the Manitoba Free Press to the
Ottawa Citizen tried—and are still
trying—to make Canadians believe
that it was profitable for us to spend
two dollars to get one back; profit-
able to keep foreign factories run-
ning, while our own are closed.

It is a cold, hard fact that in other
times these agencies actually "got
away" with such claims. Last July
an electorate, informed upon public
issues to a degree never before at-
tained, went to the polls and gave its
answer.

In the years to come, as this year
national pride will play its part in
determining our problems, but the
day of the demagogue and of the
partisan who invents his economics
to fit his politics is past and is not
likely to return. More and more we
think for ourselves.

GRENVILLE BAY

St. Giles Ladies' Aid were enter-
tained at the home of Mrs. Lloyd on
Wednesday of last week. Seven
ladies present and two visitors. Mrs.
D. McIntyre and Mrs. J. E. Arnold.
A very pleasant afternoon was spent
tea was served by the hostess which
was very much enjoyed.

The United Aid was entertained at
the home of Miss A. Campbell last
week. After the business was over
the Rev. Mr. Maclean called. Miss
Campbell served a lovely tea which
all enjoyed.

Sunday visitors at the Cottage
were Mrs. Harold Gill of Montreal;
also Mr. and Mrs. David Brewer and
Miss Phyllis Brewer, Miss Lily Bre-
wer and Frank Peterson all of Mon-
treal, who had motored to Lachute,
and later called on Mrs. Brechin.

Glad to hear that Mrs. Edgar La-
rose is home and improving. We
hope she will soon be herself again.

Mr. and Mrs. Wm. M. McCullough
and daughters Evelyn & Helen visit-
ed Mrs. Wm. Cousins on Sunday.

SUCCESSFUL POULTRY SHOW

The second Annual Poultry Show,
organized under the Grenville Farm-
ers' Club was held in Grenville Vil-
lage on Saturday October 25th.

A pleasing feature of this competi-
tion was the large number of young
men who competed for their first
time.

The following is a list of the Prize
Winners:

CLASS 1.—Pen of Barred Ply-
mouth Rocks:

1. Victor Prophet
2. Ross Matthew
3. Alderic Dupuis

Best Male, Robert Keatlie.

Best Female, Robert Keatlie.

When Messrs Robitaille and Granger
of the Provincial Department of
Agriculture had completed their work
in making the awards, Mr. Bothwell
called the gathering to order and ex-
plained the increased number of en-
tries in the various classes. Mr.
Dancereau, M.P.P. was then called
upon to address those present, which
he did in a short but concise address.
Mr. Dancereau congratulated the local
Farmers' Club in their work and
stated that he was pleased to see so
many young people taking a inter-
est in poultry. Mr. Dancereau thought
that the usual grant from the Quebec
Department of Agriculture would be
continued as long as the members of
the Club showed interest and pro-
gress.

Mr. Robitaille then gave a short
talk on his method of judging the
various breeds and a few poultry
hints which were very much appre-
ciated.

AUCTION SALE

I have been instructed to sell by
Public Auction on

THURSDAY, NOV. 8th, 1930

All the moveables on the farm pre-
viously owned by

GEORGE WESTGATE

Five Miles from Lachute, on Lake-
field Road

CUSHING

Mr. Neil Maclean, of Beauharnois,
spent Sunday with his parents at
the Manse.

Doctor Margaret Owens is at pre-
sent the guest of her parents, Mr.
and Mrs. D. W. Owens.

Miss Margaret Connors, of Little
Rideau, Ont., was the week-end
guest of Mr. Roy Dobbie.

Rev. J. W. Maclean spent Wednes-
day and Thursday of last week with
friends in Kirk Hill, Ont.

Mrs. J. D. Weir and family, of
St. Anne de Bellevue, spent the week-
end at their summer home here.

Mr. and Mrs. Jas. Watters, and
family, visited their old home in
Plaisance the latter part of last
week.

Mrs. Jas. Cleland and Miss Al-
berta Cleland left on Tuesday to take
up their residence in Montreal for the
winter.

Miss Elizabeth Hamilton, of Caril-
lon, spent the week-end with Miss
Helen and Dorothy Weir at their
home here.

Mr. and Mrs. Geo. Bradford, of
Little Rideau, Ont., were guests of
their son John Bradford on Wednes-
day of last week.

Mrs. A. Graham was the guest of
Mr. and Mrs. Albert Scott, also of
Mr. and Mrs. James Catton, of La-
chute, on Monday.

Mr. and Mrs. D. McDiarmid also
Mrs. Geo. Burton and daughters, of
Montreal, were Sunday guests of
their mother, Mrs. Jas. Cleland.

An announcement of the death of
the Rev. Mrs. A. Patterson, of Jol-
lette, was given from the pulpit on
Sunday. Mrs. Patterson was the
wife of a former pastor of St. Mun-
go's Church.

The Misses Edna and Ellen Fore-
man of Calumet, and the Misses
Henderson and Lightfoot, of Ot-
tawa, also the Messrs. Foreman and
Morrison also of Ottawa, were Sun-
day visitors.

Mr. and Mrs. Graham paid a short
call at the home of Mr. and Mrs. D.
W. Owens, of Stonefield, on Sunday.
Mr. and Mrs. Owen Higginson, of
Vankleek Hill, and daughter were
also their guests.

Our congratulations are extended
to Mr. and Mrs. Joseph Bradley Jr.,
of Carillon, on the birth of their little

son on Saturday, the 25th. Mrs.
Bradley was formerly Miss Helena
Dobbie, of Cushing.

Week-end guests at the home of
Mr. and Mrs. A. Graham were the
Misses Elsie Graham, of Verdun;
Enid Jones, of Westmount, Phyllis
Jones, of Sherbrooke, and Miss L. B.
Foreman, of Calumet.

PUBLIC NOTICE is hereby given
that the undermentioned LANDS and
TENEMENTS have been seized, and
will be sold at the respective times
and places mentioned below.

PIERI FACIAS DE TERRIS
Superior Court.

Canada,
Province of Quebec,
District of Terrebonne,
No. 2729.

EUGENE ST. VINCENT, of Saint
Jerome, plaintiff, vs THE HEIRS of the
late Oscar Alarie, of the same
place, defendants.

As belonging to said defendants,
the following immovable, to wit:

An emplacement being part of lot
number two hundred and eighty three
(Pt. No. 283) on the official plan
and book of reference for the town
of Saint Jerome, measuring fifty
feet in width by one hundred feet in
depth, English measure, bounded in
front towards the South by a pro-
jected street, and towards the West
by another part of said lot num-
ber 283, by a line passing at a dis-
tance of six feet English measure,
from the house built on the said lot
of land; towards the North and East
by another part of lot No. 283, be-
longing to Dame Honorine Melancon
—with a house on the said lot of
land.

To be sold at my business office,
in the town of Saint Jerome, said
district, on the EIGHTEENTH day
of NOVEMBER, 1930, at TEN o'clock
in the forenoon.

J. W. CYR,
Sheriff's Office, Sheriff.
Saint Jerome, October 14, 1930.

In 1900 there were 11,906 acres
under tobacco in Canada which
yielded 11,267,000 lbs. Preliminary
estimates for 1930 indicate an area
of over 40,000 acres and a produc-
tion of around 35,000,000 pounds.
The greatest increase is in Ontario
which grew 30 per cent of the crop
in 1900 and 75 per cent this year.

"I sure thought of the old Sun
Life when I was under there!"

A MAN, a mine foreman in Ohio, took out a policy for
\$2,500.00 on October 16th, 1926.

See one of its Representatives

SUN LIFE ASSURANCE
COMPANY OF CANADA
HEAD OFFICE MONTREAL

Four days afterwards, a sec-
tion of the mine roof fell
and twenty-five tons of slate
pinned him down. In falling
it fortunately formed an in-
verted "V", else he would
have been crushed. Two
hours and a half later a
rescue party extricated him.
As he was being carried to
the surface, his first words
were—

"I sure thought of the old
Sun Life when I was under
there."

The Sun Life of Canada will
protect you too, at moderate
cost.

CUSHING WEST

Dr. Cushing and family spent the week-end at their residence.

Mr. P. Heroldson of Montreal, is a guest of Mr. F. Gaston at present.

Miss Wheelahan spent Tuesday in Carillon as a guest of Mrs. W. Villeneuve.

Mr. C. F. Watson and C. Hartley are in St. Anne de Bellevue, this week working for the Department of Marine.

Mrs. J. Funcheon and daughter Miss Helena Funcheon have closed their residence at Monaca, and returned to the city for the winter.

Mrs. Jas. Harcourt of New Glasgow, is spending the week with her parents, Mr. and Mrs. R. Pinkerton.

Mr. A. C. Pinkerton, of Montreal, also spent Sunday at his home here.

Sunday guests of Mr. E. Wheelahan's were Mr. S. Wheelahan and Messrs. Douglas and Ernest Hartley and Mr. Kenrick Dorion, of Montreal; Mr. and Mrs. W. Villeneuve, of Carillon, and Mrs. Randolph McCoy, of Grenville, were also visitors with Mr. and Miss Wheelahan on Sunday.

The sympathy of the community is also extended to Mr. J. H. Cass, of St. Philippe, who received news recently of the death in Beaconsfield, Iowa, of his sister, Mrs. Onstot. The deceased lady leaves a host of friends in this locality who were much grieved to learn of her passing away.

News was received here on Saturday last of the death of Mrs. Rev. Dr. Jas. Patterson, of Joliet, the latter being a former pastor of St. Mungo's Church. Mrs. Patterson is remembered as a most amiable and accomplished lady and the news of her somewhat sudden death was heard with much regret.

Miss Abbott, representing the Junior Red Cross, of Montreal, visited No. 2 School on Friday afternoon and presented the pupils with the banner for their proficiency in Red Cross work for the past year this being the second consecutive year for them to win the flag. Miss Abbott gave an interesting address and the pupils performed an entertaining little programme, under the direction of the teacher, Miss Muriel Cooke.

"Ice Box Cookies"

1 cup butter; 2 cups sugar; 3 1/4 cups Purity Flour; 2 eggs; 2 teaspoons baking powder; flavoring; 1 cup nuts and raisins chopped (optional)

Make the dough in a bowl and keep it overnight in the ice box on a cool place. Slice thinly and bake in a quick oven.

PURITY FLOUR

Best for all baking

Send 30c for 700 Recipe Cook Book.

Western Canada Flour Mills Co. Limited, Toronto.

THE LATE MRS. ONSTOT

Mr. Hall Cass received a telegram announcing the death of his sister, Mrs. D. L. Onstot, of Beaconsfield, Iowa, at her home there on Saturday. The sympathy of our community is extended to Mr. Cass and we mourn with him the loss of a much loved friend, as Mr. Onstot, formerly Miss Amelia Cass was a life long member of St. Mungo's Church until her marriage to Mr. Onstot a few years ago. Of her immediate family, her sister Mrs. Susie Grant, of South Dakota, and two brothers, Mr. Hall Cass, of St. Philippe and Mr. Albert Cass, of Colorado, are left to mourn her loss. Although absent from us for some years now, her loss is keenly felt by her old friends here.

THE LATE MRS. J. CANNING

Another valued friend also has been lost by the death of Mrs. James Canning, of Bethel, Manitoba, sister-in-law of Mr. Thomas and Misses Margaret and Sarah Canning, of Stonefield who was so seriously hurt in a car accident while motoring to Church, on Sunday, Oct. 12th, that she died in the Church without regaining consciousness half an hour after the accident. The accident occurred at a point where two highways joined and a car coming from the other highway crashed into Mr. Canning's car, which was driven by his son Luard. Mrs. W. Walker, also in the coming car was seriously injured and Miss Haynard and Mr. Luard Canning escaped with minor injuries. The Hartney Star in giving an account of her death, speaks of Mrs. Canning as a beloved and highly respected pioneer of Bethel Community. She had lived there forty one years, having gone there as a bride of Mr. James Canning in 1899.

She was born at Grenville, Que. and was a daughter of the late Mr. and Mrs. Thomas Horner. She leaves to mourn her loss her sorrowing husband, and four sons Ermine, of Carrol; Wilbert, of Deleau; Lester of Hartney, and Luard at home; one brother Mr. Ralph Horner, of Ogdensburg; and four sisters, Mrs. William Blair, of Kerrobert, Sask.; Mrs. Malcolm McGillivray, of Grenville; Mrs. A. Crym, Brooklyn, N. Y.; and Mrs. H. Hines, of Montreal.

A short service was conducted at her home by the Rev. Earl S. Dixon, and Rev. A. R. Saunders; the Rev. E. S. Dixon having charge of the public at Bethel Church. The Rev. D. B. Kennedy also took part. Beautiful wreaths from her family; the Bethel Sunday School; Bethel Women's Missionary Society; the Mission Band; Masonic Lodge; Hartney Old Timers; besides a great many others from sorrowing relatives and friends covered the casket which was borne to its last resting place by her four sons and two nephews, Messrs. Norval and Alfred Blair, of Kerrobert, Sask.

FOOTBALL

Lachute Academy vs. Brownsburg Juniors

This game which was played on the Academy grounds last Saturday resulted in the Academy boys losing to the tune of six goals to one. In fairness of the losers it should be stated that they were a much weaker side to that of the previous team which held the Juniors to a margin of one goal. Gall and Drew were both absent through injury and this threw the team completely out of balance. It was however mooted previous to last Saturday's game that the Lachute team intended to use two senior players. This did not materialize as the boys chose rather to lose on merit a very sportsman-like action. The Brownsburg team gave a much improved display, keeping the ball low and combining with precision. The first half was productive of good football from both sides and ended with Brownsburg leading by two goals to nil. After changing ends and with the wind at their backs the Brownsburg boys quite outplayed their opponents who seemed to tire rapidly and repeatedly miskicked in their own goal area, thus paving the way for some of the shots which were converted by their opponents. Drysdale, McFaul and Garfield Clark turned in an excellent game for Lachute, while Roberts, Tomalty and Pat Stewart starred for Brownsburg. After the game coffee and sandwiches were passed round and the boys called it a perfect day.

LACHUTE BOWLING

A Mixed Bowling Match was held in Lachute on Saturday last, when five young ladies of Verdun, motored up to Lachute to put on an exhibition game of Bowling between five members of the Lachute and North River Social Club.

The Young Ladies were afterwards motored around the town and were entertained to a luncheon given by the members of the Club at the Rodrigue House where the proprietor, Mr. H. E. Desjardins had prepared a very nice spread for the visiting team and members of the Club. Speeches and songs were indulged in and all expressed their opinion that Lachute is not to be forgotten for some time to come. A return match will be held in Montreal in the near future.

The score was as follows:—

Montreal Ladies.		
E. Morrison	134	125 103
M. Learith	137	127 100

Why you should buy a Majestic RADIO

A NEW Majestic Electric Radio actually costs you less to own and operate than many sets being offered at special bargain prices. First, because while you may buy some radio sets for less, the depreciation, service, performance and trade-in value wipe out this mythical saving and more before a season has passed.

Most people now buy radios on time, so the purchase of a Majestic means but a few dollars more outlay at the time of purchase and a few more monthly payments. At the end of that time the value of the Majestic as a "trade-in" is definite and sure. There is always a demand for used Majestics, whereas the loss you will take on nameless "stencils" or "specials" or cheap radios built to a price makes your original purchase an expensive one. Majestic is the largest manufacturer of complete radio receiving sets in the world. It is fathered in Canada by the Rogers-Majestic Corporation Limited — the largest radio manufacturers in the British Empire. Were it not for this tremendous output Majestic prices would be 10% to 25% higher, if the same quality were maintained. Due to this enormous production Majestic prices are as low as most radios of much cheaper construction. Thus, every Majestic is really a bargain—extraordinary value for your money. The 1931 Majestic Models with Super-Screen Grid and Super-Coltura Dynamic Speaker are now on display at our store. Come in, see them, and find out about our liberal terms... today.

Farmers

Registered Silver Foxes
will enable you to
Make Money and Keep
your Sons on the Farm

Through the great advantage that this industry offers to farmers particularly, you can profitably keep your sons on the farm. There is no need to send them in the towns to get settled. Silver Fox breeding will be an occupation which will enable them to do exceedingly well in a very few years. It only costs about \$15, a year to feed a fox, and as for space all you need is an acre of land, while the cages you can easily build yourself, one by one as your foxes grow and multiply. Just think... a silver fox pelt sells at \$150. to \$500. while a pair of registered silver foxes should give you in three years at least fifteen new beasts, and in seven years about one hundred... Start breeding now. Write to one of the breeders listed below for full information re breeding, building of cages, sale of pelts etc. Also go and visit their farms—you will be welcome.

Mail the coupon at once to one of them for free booklet on silver fox breeding.

Gentlemen:

Without any obligation on my part please send me your free booklet on Silver Fox breeding.

Love in the Dark

She Was the Prettiest Picture in the Picture-house—and Drew Him Like a Magnet

By J. Hillary Garrett

Nancy Crowther showed you into your seat if you went to the Regal Picture House, Turlington. She was a girl who performed her work quietly, and if you fell on her in the extraordinary darkness within, she dodged you unobtrusively and set you on your feet again.

Light comes into the matter first of all as supplied by the Turlington Gas Company through the Regal's outside lights. One evening it flooded the careless, bored face of Mr. Kenneth Alinger, who was looking at the posters.

Through the doorway to the right of the pay-box was a glass windowlet which sometimes showed the prettiest picture in the picture-house—Nancy Crowther.

Kenneth Alinger, who preferred the homely name of "Feet" (they were admittedly rather large), caught sight of this beautiful piece of absolutely natural coloring—Nancy's fair hair, blue eyes, and pink cheeks—and decided to go in.

You can tell his age by this. Had he been twenty-seven, he would have waited outside to catch her; had he been over fifty, he would have got hold of her name and written her a letter. As it was, he was twenty-three, and bravely made a dash for it.

The only thing is that when he got to the pay-box he felt in his pockets and found he had only sixpence.

However, he noticed with relief that there were seats for sixpence, and pushed that coin through the pigeon-hole. The next moment he got a shock, for he was addressed by his Christian name, added to a "Good-evening!"

"Good heavens! Why, it's Toodles!" he said. "Fancy seeing you, Kenneth!" "Fancy your running a picture-house!"

"Well, governesses are used to being shut up in glass cases!" For this was none other than Kenneth's governess in the days before he went to school and University.

The young man explained that he had left his car at a local garage for slight repairs—he was now staying at a country hotel some little way off—and had previously lent all his ready money to an impetuous friend.

Whereupon Toodles, who was really Miss Amy Todhunter, owner of the little Regal Picture House, pressed a one-and-tenpenny ticket upon him and said he could pay when he came again.

Kenneth's entry into the picture-house provided another "incident." As he passed through the swing-doors, loosely holding the filmy piece of ticket script, a sudden gust of wind caught it and blew it away.

Nancy, who had seen the happening, laughed. "Never mind," said Kenneth Alinger suddenly. "It was only a sixpenny one."

The fact was, he had looked across to his left and seen that, if he went into the one-and-tenpennies, he would be right in the middle and far from the sight of this pretty girl. Alternately, there was a prospect of quite a long walk with her down to the cheap seats.

"This way sir," said Nancy. "What a beautiful—what a good long way, I mean!" exclaimed Kenneth.

Since, away from the best seats, it was particularly dark in the Regal, it was rather a miracle that he followed so well in her footsteps. But there was one consolation. Once, to guide him, she took his hand.

He went several times after that, and he always bought a sixpenny ticket as well as his one-and-tenpenny one.

"Suppose it might do for some poor child," he would, with half a smile, explain vaguely to Miss Todhunter, with whom he had now had many refreshing talks over old times, and—what was more important to Miss Todhunter's fortunes—over present ones. For this was a rich young man.

Meanwhile, it was lovely to take that long walk in the darkness with Nancy, stumbling rather in her wake, as was only to be expected of those feet of his. But, as a reward, he often experienced the thrill of her sheep-herding touch.

Eventually Nancy Crowther confessed to the orchestra, who was Mary Newman, who played the piano, what a mystery the new regular patron of the sixpenny seats was to her.

"A fellow who talks like he does," she said over the orchestra rails, "to all in the sixpennies!"

"Have you looked at his clothes? Perhaps they are worn and threadbare, though still showing the indefinable but undeniable cut of Bond Street. I read something like that in a book last week," said Mary, who was romantic.

"How much do you think I see of his clothes in the dark?" snapped Nancy. "You could push him in front of you and take a look with the torch," said Mary Newman, relapsing into the "Persian Market." "Or you can look at his knees as you pass him on your way back."

Nancy departed. Ten minutes later, finding occasion to come down to the sixpennies again, she leaned over the orchestra rail and said: "Knees all right!"

"Ah, well, he's not feeling the pinch yet!" sighed Mary Newman. But Nancy could not help feeling perturbed. There was no doubt that she liked the new patron of the sixpennies. He seemed so kind and polite, and he had a voice like a broadcaster's. Style. She could not help thinking, however, that things must be going hard with him that he sat there in the cheapest seats.

And then came the peculiar turn in the Regal Picture House's affairs which set Nancy Crowther to thinking of a way of doing something for the unfortunate young fellow of the sixpenny seats who had interested her.

Miss Todhunter—"Toodles"—suddenly announced to Mary the surprising fact that she had acquired another—even more luxurious—picture-house in the neighboring town. Therefore, she was going to engage a manager for the Regal.

When several applicants for the post had been interviewed and Miss Todhunter seemed inclined to one, Nancy had a brief interview with her employer in the box-office.

"Don't give the post to the last man who came," she said. "I don't like his face, and it is extraordinary how right I am in these matters. Now, I know a gentleman who comes here in the sixpennies who is quite suitable—I'm sure quite suitable."

"How do you know he is suitable, Nancy?" said Miss Todhunter amusedly. "Well, he has the right face and manner, a gentleman who has had better times, though he is pinched for money now—and he's here now. Do please see him, Miss Todhunter. I am sure he would suit you."

Miss Todhunter did not know any "gentleman" answering this description, who went into the sixpennies habitually. However, she was not altogether satisfied with the rather overbearing man she had interviewed, and she trusted Nancy's instinct.

In a few minutes Nancy, having gained the necessary permission, was standing excitedly by Kenneth Alinger's elbow.

"Look here, do you want a job?" she said excitedly. "Well," replied the young man slowly, "if it's a certain kind of job." He looked at Nancy glowingly, but the darkness fortunately hid the look. He was being a little too precipitate.

"You can't be too particular these days," snapped the girl. "Have you got your references?" "Well, the Westminster, the National and Provincial, and the Martin Corporation of America," Alinger answered, surprised out of his wits.

"Ah, I thought it was picture-houses!" said Nancy, in mistaken delight. "I thought you might have had something to do with them! Now, come along."

Alinger slowly complied. This was all very mysterious, but he began to gather that she wanted to do something for him, and he felt curious. Presently he found himself in the little pay-box—facing "Toodles."

"This is the gentleman!" said Nancy breathlessly. Miss Todhunter looked—and then burst into roars of laughter.

Nancy's face turned white. Kenneth glanced from one to the other, obviously perplexed. "My dear child," said Miss Todhunter, "do you know what you are saying? This gentleman, as a matter of fact, is financing me—partly—in my purchase of a new picture house. He is an old friend of mine."

"But he has been sitting in the sixpennies," faltered Nancy. "And I thought—" "The sixpennies!" Miss Todhunter's tone was contemptuous. Then she smiled. "I think I understand," she said. "So that's what he did with those odd sixpenny tickets! Oh, he's a sly youth! He's deceived you a little, I fear, Nancy."

Nancy cried out to Alinger: "Oh, you're horrible, horrible! To think that you—" She would have rushed out of the pay-box, but young Mr. Alinger detained her.

"No, don't go, Nancy," he said. "You are the best little girl in the world. Listen. I'm lonely. I've been looking for a wife for a long time among those gold-diggers in the set of people I meet, who would only be glad to have me for my money. But it's fine, I think, for a man to have a wife who is prepared to stand by him when he's down, or she thinks he's down. I've thought it out and considered everything, and my mind is made up. Nancy, will you—?"

But at this moment Miss Todhunter excitedly got off her stool. "I really must go and stop Mary Newman playing that 'Because I Love You.' It's the tenth time—or the eleventh—that she's played it. She's romantic, that girl!"

He Couldn't Believe It! On entering the grocer's shop the customer happened to brush his coat against the newly painted door.

"Look here," he said angrily. "You spoilt my coat on your beastly door." "I'm sorry!" apologized the grocer. "But didn't you see the notice 'fresh paint'?"

"Yes," thrust back the customer, "but I didn't take much notice of it. You have another notice there, 'fresh eggs—but they are not fresh!'"

Life is made up of trials, with an occasional conviction.

A "Churning" Winner

"Just churning for you," says Lucille Gates, American farm girl championship winner at Los Angeles county fair, Pomona, recently. And believe us, churning is just one item on the list.

Modern Age Needs New Physical Laws

Muscular Development Being Considered Less and Less in this Machine Age

Specific researches into the fundamental laws of body growth, study of modern living conditions and more co-operation in the sciences of physical and academic education, public health and medicine are measures urged by Professor Stuart A. Courtis, of the University of Michigan, who believes that the traditional type of athletic work which aims at development of a powerful body may not be the best for the present day student or factory worker. He says the solution lies in researches to discover the type of physical development best suited for modern living conditions.

"Wreck-creation" is indulged in too often instead of the recreation which should be the aim of physical education and activity says Professor Courtis. The laws of biology which would be helpful in determining the best methods of body building and physical education seem to have been neglected or insufficiently recognized by average men and teachers, he states. He maintains that the goals of any health program at any time should be the perfection of stature, perfection of maintenance and perfection of function, and the correlation of these three into a worthy life purpose.

"Even advertising writers, with slogans such as 'Her longest walk from curb to car,' recognizes that muscular development is being less

and less considered in this machine age," says Professor Courtis. "All of us spend many hours, and will increasingly be forced to spend still more hours, in small-muscle activities in spaces largely shut away from light and air. Our physical Hercules does not seem to be long-lived these days. Perhaps the goal of health education should be toward the development of a minimum of exercise and repair. Perhaps the ideal of the future will be the small-bodied individual who makes adjustments at lightning speed with a minimum expenditure of energy and with great powers of endurance."

THE TRUTH

He that finds Truth without loving her is like a bat; which, though it have eyes to discern that there is a sun, yet hath so evil eyes that it cannot delight in the sun.

—Sir P. Sidney.

Well Tutored

All summer the lover has been on the rack, And he is not happy precisely To find that the girl he's engaged to comes back With a wonderful gift to kiss nicely.

Heavy sleepers can't excuse themselves because they "didn't hear the alarm" if a new German invention becomes popular. This novel device is attached to a clock, and at the given moment explodes a cartridge containing pungent gas. This causes the sleeper to sneeze himself awake!

Driver: "My wife says if I don't give up golf she'll leave me." Brassie: "Jove, that's hard luck!" "Yes; I'm surely going to miss her."

Il Duce Looking 'Em Over

Interesting photograph showing Mussolini (right) watching manoeuvres of the Italian army and of Fascisti, near Rome at Monterotondo-Montana.

Room Arrangement

To be charming, a room must be arranged with a definite design, the furniture grouped in centers of interest and not placed about haphazardly. The arrangement of furniture means as much as the beauty of the individual pieces. Ungrouped furniture is meaningless. No matter how choice in themselves, individual pieces look lonesome and dull unless assembled into little islands of charm.

The eye cannot grasp a whole room, as an interesting thing, but it hops delightedly from one of these spots of interest to another. Each calls alluringly to one who enters the room, and in each is all the equipment to make one happy for a season.

If there is a fireplace, that naturally is the chief center, its lightest, most important and most popular feature. A davenport, with end tables and lamps and tapestry, large picture or group of pictures back of it, will make an important center. A large chair, elbow table, books and reading lamp make another; piano, lamp and music cabinet; writing desk, chair and lamp; bay window, plants, rocker and bird-cage, these may be centres. There may be a sewing corner with low chair, mending basket and light; or a kiddy corner with books, games and playthings for the children.

When you have arranged your groups, weave them into a harmonious composition. All of the walls and all of the groups cannot be of equal importance, but they can balance and complement one another, and make a lovely setting for home life.

School Clothes

Jumpers are coming back to the school girl's wardrobe. They enable her to look fresh with a new under blouse worn with her staple jumper dress. The Eton jacket or bolero may give her extra warmth and be worn over her jumper dress, with the ensemble effect and to cover the thin sleeves of her underblouse when on the street.

The beret or tam-like cap has become a school girl classic. It may be of knitted wool or of dressy velvet. The fall fabrics are soft. Light weight wool jersey, novelty weaves, a soft tweed and covert cloth wear well and are good looking. The belt is at the natural waist line and small capes cover slim girlish shoulders.

The boy will wear a suit of tweed mixtures or navy. The boy under twelve will wear shorts and his older brother wears knickers. Both wear double breasted coats to match the trousers. A leather sports jacket will keep out the weather and answer the rough-and-tumble needs of the growing boy. His shirts and ties are mannish looking, resembling Dad's. He will wear striped, golf-looking hose. The primary scholar may wear a slip-over apron to school. Hair bows are going to be popular for wee missies, clipped to the hair with fasteners made for the purpose.

Sweet Potatoes

Baking is one of the best methods of preparing sweet potatoes since some of their flavor and food value is lost when they are boiled or steamed. Mashed sweet potatoes is a delicacy we rarely serve. Boil them with the peeling on until tender; then peel; mash; season with butter, salt and cream; and beat until light and smooth.

To fry sweet potatoes, roll sliced cooked potatoes in flour and brown them carefully in a small amount of fat.

For candied sweet potatoes, partially cook half a dozen sweet potatoes, peel and slice them, and put them in layers in a baking dish. Pour over them a syrup made of one cup brown sugar, cup of hot water, tablespoon of lemon juice or vinegar, teaspoon each of cinnamon and of salt. Add butter generously and bake until the potatoes are clear and somewhat gummy. A few minutes before taking from the oven, top with marshmallows and brown them in the oven. If the potatoes seem to dry out too much while baking, keep them covered to hold the steam in, or add more syrup.

Cleaning Silver

Silver manufacturers have long been trying to make a silver which will not tarnish, but they have not yet been successful in putting such a metal on the market. There are many processes of cleaning silver. Most commercial cleaners are made of whiting, which may be bought inexpensively by the pound; and benzine, gasoline or naphtha. The liquid is very volatile and will soon evaporate, leaving the paste dry. If it does this, the housewife may add a little more. For this reason, it is wise to buy only small quantities of silver polish at one time.

One can hastily make her own silver polish by making a paste of whiting and gasoline or denatured alcohol. Rub the silver with this paste. To make a silver polishing cloth, make a thin paste of whiting and gasoline; spread this on a square of felt and let it dry. When well dry, iron it with a very hot iron, on both sides.

An easy way to clean silver is to put into an aluminum pan a tablespoon each of salt and baking soda. Bring this to the boiling point and put the silver in the pan and boil it. Remove the silver and wash it in clear water. Do not use this process for oxidized silver, as it will remove the oxidizing. An unpleasant task, after cleaning silver by this method, is cleaning the aluminum pan.

Overcoming Perspiration

To perspire is a healthy activity and should be encouraged within limits. Each day one should do enough exercise to work up a sweat, and then he should take a bath. But one does not want to ruin a good dress by overactive sweat glands, nor does one wish to be offensive by feet which perspire too freely.

To reduce the perspiration of offending parts, wash them well with warm water and soap and then rinse them with cold water. Follow this with an astringent lotion which will help close the sweat glands. The following lotion will serve: Three ounces of alcohol and two drams of tannic acid. Apply this night and morning. Before you dress rub in lightly a talcum powder in which boric acid is an ingredient.

If You Are Blue

If ever you come home, from work tired and depressed and feel that it is hardly worth while anyhow, try to forget it by doing something to make someone else happy. Make your life worth while by ministering to someone's need. There are many in the world who are old and feeble, many who are young and inexperienced and in need of guidance and friendships and something constructive to do. Lead a Scout troop. That is well worth while. There are those who are blind and ignorant and half nourished and unloved and ill and lonely and neglected. Find them and open your heart to them and busy your fingers with them and depression will evaporate. The blues are a symptom of selfishness. The joyous life is one of contribution to the welfare of others.

Pot Holders

A half dozen pot holders is a convenience in the kitchen. Make them of glazed chintz, about six inches square, and four thicknesses deep. This will be thick enough to protect the hand and thin enough to launder well. Make a wall pocket, about seven inches wide across the top, in which to keep the holders. It may be made of chintz to match the holders and should hang near the stove.

Mrs. Solomon Says:

All things come to him who hustles while he waits.

Little Princess Will Wear Kilt

Balmoral, Scotland.—The King's little granddaughter, Princess Elizabeth, has just been measured for her first kilt. It is to be made of the Inverness tartan.

The tartan, though little known, is not new; it was designed by an old lady who lived at Inverness in Queen Victoria's time. It owes its name to the fact that the Duke of York, who has adopted it, is Earl of Inverness.

News that Princess Elizabeth is to be allowed to wear a kilt coincides with a revival of its popularity in Scotland.

INEQUALITY

Our inequality materializes our upper class, vulgarizes our middle class, brutalizes our lower class.—Matthew Arnold.

A Real Nerve Tonic

Is a Bountiful Supply of Rich, Health-Giving Blood

Sufferers from nervous debility find themselves tired, low-spirited and unable to keep their minds on anything. They are totally unfit to perform their everyday duties.

Doctoring the nerves with sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich, red blood. To secure this rich, red blood Dr. Williams' Pink Pills should be taken. Enriching and purifying the blood is their whole mission. Concerning them Mrs. Albert Bentley, Bancroft, Ont., writes: "Two years ago I was a complete wreck; in bed for seven months; extremely nervous; had no color. Nothing I tried seemed to help me till I began Dr. Williams' Pink Pills. My condition at once improved and to-day I am well and able for anything without fatigue or trouble."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

1950 Worker Will Get \$27-a-Day Wage

Predicted by Ford in His New Book, "Moving Forward"

New York—Henry Ford blames the present industrial depression on business men who watched the stock market instead of their business, and believes the cure lies in quantity production and intensive marketing of high-class goods.

He outlines his opinions in a book "Moving Forward," published on Oct. 2nd. He predicts that in 1950 the United States workman will get a minimum wage of \$27 a day, advocates high wages as one of the fundamental laws of business, and says genuine over-production has never existed.

In regard to wages, however, Mr. Ford believes that while a man has a right to work, his right to a job depends on his ability to render valuable service. He says belief that a company owes a living to those who work for it is based on "our traditional conception of master and servant."

The book, written in collaboration with Samuel Crowther, says the fundamentals of business principles are: First, to make more and better goods cheaply as possible and force them on the market; second, to strive always for higher quality and lower prices and costs; third, to raise wages gradually and continuously and never to cut them; and fourth, to get the goods to the consumer economically so he may benefit by low cost production.

The carrying out of these modern business laws requires much more leadership than did the old production, Mr. Ford says. He believes that was why interest in the 1929 stock market brought disaster.

"The true occasion for alarm was deeply hid," he says. "It consisted in the complete stoppage of improvement in quality of goods and in methods of manufacture, which in turn causes a stoppage in the increasing values of the purchasing money. There is bound to come a time when things are offered for sale at so much more than they are worth that the public will hesitate to buy them, and then will stop buying altogether and may even fall into a panic about what it has bought."

"No one has yet been born who can manage both to manipulate the market for its stock and also do business in such a way that it will be profitable. The two do not and cannot mix."

Damp Walls

Walls can be rendered damp-proof by an application of water-glass used for preserving eggs. Strip or scrape the old paper from the walls and brush over the damp patches with the waterglass mixture according to the directions on the tin. Allow to dry, then put on two more coats. Each must dry before the next is put on. When repapered the damp will not penetrate again.

Minard's Liniment gives quick relief.

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms, such as heartburn, gas, heartburn, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips and the word genuine in red.

"In Memory—"

The photograph reproduced above shows an interesting view of impressive memorial to Newfoundland's war dead at Grand Bank

Owl Laffs

About the only thing that comes to him who waits is whiskers.

Many doctors are now having their patients say "ee" instead of "ah." "Ow," however, remains the standard for the patient on receiving his bill.

High school teacher—What is Francis Scott Key's greatest distinction? Pupil—He knew all four verses of "The Star Spangled Banner."

All the jokes are not found in the books or in the papers, some of them may be seen walking around town.

Sitting around the bunk house they were swapping lies.

One of them—"When I was logging up in the Northwoods I saw a mountain lion come right up to the skidder one day. It was a fierce beast, but I, with great presence of mind, threw a bucket of water in its face and it slunk away."

Man sitting in corner—"Boys, I can vouch for the truth of that story. A few minutes after that happened I was coming down the side of the hill I met this lion and as is my habit, stopped to stroke its whiskers. Boys, those whiskers were wet."

A HAPPY THOUGHT FOR TO-DAY.

From the moment of birth To the ride in the hearse, There is nothing that happens But might have been worse.

Gertie—"What shall I do, Mother dear? I'm engaged to a man who says he simply can't bear children." Mother—"Well, you can't expect too much from a husband."

"The good die young." But to die good, one must diet young.

Gladys (to her fat boy friend)—"Pardon me, Tiny, but as you age, will you fade like a flower or bust like a balloon?"

LOYALTY.

By Melville Sloan.

How grand that attribute, divine; That golden quality; That priceless gem of honor, fine; That jewel—loyalty. Who will not see an evil done— To him—he calls his friend; Or whom he serves; is really one Of—nature's noblemen!

Times might be much better, if those who don't have to work would knock off and give their jobs to those who do.

Things I'd like to know—Where butchers get their straw hats they wear in winter and comedians get the ones they ruin? What the girls who flip pancakes in windows think about and especially what they'd think

about a fellow who took them to Child's for dinner? Why every extremely attractive girl has an ugly duckling for a chum? Whether anyone is a poor marksman because his mother told him pointing was impossible? And if I'd be happier if I knew all these things?

A local poet thinks bananas rhyme with pajamas. That is one of the several reasons this column does not print but very little home made poetry

Tourist—"Say, boy, where does this road go?"

Indignant—"It don't go nowhere. It's here every morning when I come along."

A humorist's most serious business is trying to make folks smile.

Fortune teller—"You will suffer poverty until you are 35 years old."

The dupe—"And then?"

Fortune teller—"By that time you will have got used to it."

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Kamaron Island Has World's Worst Climate

Though certain parts of the North American Continent might feel justified in claiming "the world's worst climate"—according to Charles Fitzhugh Talman in his Science Service feature "Why the Weather?" (Washington), the favored spot is an island in the Red Sea. He says:

"Hot weather is endurable in the relative humidity remains low; hot days are endurable if the air cools off at night. Neither of these mitigating features is found in the average climate of the Red Sea coast. An English meteorological journal has recently suggested that Kamaron Island, which lies in the Red Sea off the coast of Yemen, can claim the distinction of having the worst climate on earth. A four-year record shows that from April to October, inclusive, the average daily maximum temperatures range from 91° to 95°; which would not be bad were it not for the fact that the average minimum temperatures are from 81° to 86°. The highest single reading during the four years was 105, which we can easily beat in America, but the mercury never once fell below 66°. The average relative humidity was 72 in January and 58 in July. The climate of the island is extremely enervating. In spite of deserts near at hand and an average rainfall of only two inches a year the air generally feels damp, and the winds, though strong, bring no relief. Occasional sand storms add the human discomfort. A lovely place to stay away from is Kamaron!"

Roads Young and Old

Roads that lead to houses And a city's pride Go straight and hard like young men With sure and eager stride.

But roads that lead to mountains Or hidden-desert streams Shuffle along like old men Happy in their dreams.

—By Rachel Harris Campbell, San Diego State Teachers' College.

When asked his idea of rigid economy, Will Rogers replied: "A dead man."

Minard's Liniment also tired feet.

Dishwashing Is Still Hated Task

Childhood Duty Turns Modern Girl Against Homemaking

Compulsory dishwashing in childhood has given millions of girls a drab outlook on life and has caused them to conceive an absolute hatred for homemaking, says Miss Marion S. Van Liew, chief of the home economics education bureau of the University of the State of New York.

Hatred of dishwashing, while it seems of itself a most insignificant matter, becomes the root of an obsession against all phases of housekeeping, she thinks, and therefore has a potentiality of exercising a vicious influence on the entire future of girls and women.

Miss Van Liew, who is widely known throughout the nation as a home economist in addition to her position with the State Department of Education, yesterday became educational director of the Homemaking Center of the New York State Federation of Women's Clubs.

No Fad, She Declares

"Home economics is no fad," Miss Van Liew told an interviewer in Albany. "It has passed that stage and has stood the test. People are more 'home conscious' than ever and it is recovering its former status rapidly. Now, the difficulty is that girls are not prepared to take over the problems of homemaking when they become brides."

"It may astonish people to know that the state is training hundreds of girls and young women for the career of marriage. Outside of New York there are 211 centers under the supervision of the State Department of Education where homemaking is taught as a fine art, and New York does not neglect this important training."

"Women and girls must get away from the old idea that homemaking is nothing but sewing, cooking and cleaning," Miss Van Liew added. "These things are but incidental and as such should be done by means of a time budget so as not to interfere with the major phases of the calling."

She reminds one that choosing harmonious color combinations for the home and purchasing clothing, edibles and other supplies come into the calling of homemaking, as well as personal grooming and adjustment of family relations, and that to be successful in all these the homemaker should be trained.

She declared that every feminine member of every family should be instructed in home economics. She would have the younger children learn it in junior high school, and have mother keep up with them by extension courses in the afternoon and evening.

Any Offers?

As Mrs. King was cleaning her front bed-room windows she saw a friend hurrying along the road.

"What ever has happened?" she cried, running to the garden gate and calling to the friend. "Why are you in such a hurry?"

The friend paused to regain her breath.

"I'm trying to get something for my husband," she panted.

"Oh," replied Mrs. King, very much relieved. "Had any offers?"

INVALUABLE MOMENTS

Never suffer the invaluable moments of life to slip by unimproved, and leave these in idleness and vacancy; but be always either reading, or writing or praying, or meditating, or employed in some useful labor for the common good.

—A Kempis.

"I'm thinking of moving out into the country." "Do you like the country? What will you do in the evenings?" "Oh, I'll run up to town."

COMPLIMENTED ON HER COMPLEXION AT 65

Tells All Women How She Does It

20 YEARS OF KRUSCHEN 20 YEARS OF HEALTH

Just fancy! A grandmother and still being complimented on her complexion! How does she do it? Her letter explains. Kruschen keeps her young and fit. That's the secret of the whole matter.

"When I was on holiday this Summer I was asked what gave me or what I used for my fresh complexion. For 20 years now I've used as directed Kruschen Salts, the finest and only medicine to my knowledge. Before this I was troubled with my liver and biliousness and rheumatism in my arm and shoulders. I just take it regularly as you describe, with the above result. I tell everyone this, also my family, who are now men and women, for I am over 65." —E. B.

Don't be content to envy her. Follow her example. Kruschen will keep you young, just as it keeps her young. The little daily dose keeps you young inside; you wake up every morning as fit and fresh as a schoolgirl, and before the first month is out the wonderful difference is written in your complexion and your eyes. Kruschen

When baby frets

and you can't get your work done - your nerves are getting the better of you -- make a cup of tea - it's a great "pick-me-up". Sit down a few minutes - you will feel better!

TWO QUALITIES -- RED LABEL & ORANGE PEKOE

The Wrong Phrase

Mr. Brown had just returned from the office and was introduced to the new nurse, who was astonishingly pretty.

"She is sensible and scientific, too," said Mrs. Brown, "and she says she will allow no one to kiss the baby while she is near."

"No one would want to," replied Brown tiredly.

"Oh, indeed, John!" snapped the fond mother.

"I mean," faltered Brown, endeavoring to make things better, "not while she is near."

The pretty nurse was given marching orders the following day.

"Is this train ever on time?" growled the grouchy passenger. "Oh," replied the conductor, "we never worry about it being on time. We're satisfied if it's on the track."

WHEN CHILDREN FRET

THERE are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness. Castoria has a good taste; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

Lachute, Main Street, Ladies' and Gent's Shoe Shine

Right in the Town of Lachute

Lachute has learned to stand on her own feet, in many lines, particularly in the building sphere, so why consult outside firms for information and estimates? Now—no building is too large or too artistic for Alcidas Laurin to erect, and specifications may be obtained upon application.

ALCIDAS LAURIN

VICTORIAN ORDER NURSING

Are you able to give the care necessary for recovery and comfort to your dear ones who suffer from sickness in your homes?
The Victorian Order of Nurses for Canada, with its headquarters in Ottawa, has extended its service to Lachute, under the auspices of the Local Committee and the Victorian Order Nurse stationed here will be glad to assist you in this task.
The Aims and Objects of the Order are:
"To supply nurses thoroughly trained in Hospital and Public Health Nursing and subject to one Central authority for the nursing of the sick, the prevention of disease and the promotion of health."
The Victorian Order service meets the special requirements of the many patients whose cases do not demand a full time nurse, of those who have neither the means to pay a full time nurse, nor household accommodations to offer one, as well as of those who for various reasons cannot go into hospital.
Beside nursing in the home is the fundamental principal of Victorian Order Nursing. In connection with this work the Victorian Order Nurse prepares for and assists at confinements and operations, also does surgical dressing and demonstrates how to carry out the physician's orders. She also gives instructions to expectant mothers, with follow up visits to mother and baby in the home.
A sliding scale of fees is arranged to make the service available to every one and free visits are made to patients unable to pay.
The maximum fee is 75c for a visit \$5.00 for assistance at operations and deliveries.
Full cost of a visit is collected whenever possible.
Part cost is collected as the situation warrants.
Visits to expectant mothers are made free of charge and it is in the mothers own interest to make use of this advantage as early as possible.
All instructive and advisory visits are free.
Arrangements will be made shortly with the Metropolitan Life Insurance that the Nursing service for their policy holders should be taken over by the Victorian Order Nurse.
Information where to get the nurse will be given at present. Phone 274.

NOTICE
All persons domiciled in the Province of Quebec who desire to trap, hunt or take Fur Bearing Animals on other lands than their own property, must previously secure a License, which costs Five Dollars (\$5.) for the whole trapping season. Serve GRIDDLE CAKES for tomorrow's breakfast

RECIPE FOR GRIDDLE CAKES

1 quart flour	2 tablespoons shortening
3 teaspoons Magic Baking Powder	1 egg
1 teaspoon salt	2 tablespoons molasses
2 tablespoons sugar	1 pint milk

Mix and sift dry ingredients; beat egg, add milk and molasses, pour slowly on first mixture; beat well. Add melted shortening. Cook at once on hot, well greased griddle. Serve with Maple, Caramel, or Brown Sugar Syrup.

The light, digestible kind that can be quickly made with Magic Baking Powder.

You'll find this and dozens of other interesting recipes in the New Magic Cook Book. A copy will be sent free on request.
